He exuded friendliness. The grin he gave us was so foolish that I wondered whether Marty Walsh hadn't picked the wrong actor. I invited him to drink with us. He said, "Been drinkin' with everybody. Everybody wonderful to me. Nice people here. They treat cops swell."

"What'll you have, Lieutenant?"

"Nothing." He shook his head in solemn reproof. "Regulations say can't drink while on duty. I'm on duty." He stopped and gave it a mental going-over. "Yep! I'm on duty. Only I ain't. I'm a watchdog, but what I'm watching is asleep. So I don't have to watch too hard. Get it?"

We said we got It, but we didn't. At least Pat Kingsley and Brian Garland looked bewildered.

"I'm on duty, but got no duty to do. So I can drink. Sherry."

A DANCING couple, oblivious to everything but their enjoyment of the dance, bumped into our table. Pat said, "Oh!" Brian reached out quickly to keep her drink from spilling, and the masculine member of the couple stopped to apologize. In the brief moment of distraction, Lieutenant Lane looked me straight in the eye and gave me a barely perceptible wink. That made me feel better. So he wasn't out on his feet; so it really was an act that hadn't been made too realistic. The guy was superb.

The sherry was brought. Bert raised his glass. He said, "Here's to crime. Here's to all the free drinks it gets me."

Brian Garland leaned across the table. He said, "What was that about being on duty, Lieutenant?"

Lane shook his head. "Top-secret," he stated. "Very 'ficial."

"Aw! Don't be that way." (was insistent. Too insistent, I t "What's up?"

Lane beamed at us. "All huh?"

"Yes. We're buddies."

"Won't tell secrets?"

Brian promised. Lane lowe voice so it wouldn't carry bey table. "Tomorrow morning," impressively, "tomorrow morn crack this case wide open. Co dawn, we identify the person all those killings." He looked "Very naughty person," he finish

Pat said sharply, "How can sure, Lieutenant?"

"Witness," whispered Bert La pointed to his eye. "Eyewitness."

"You mean . . . ?" Garland ag

"We've got a man who saw th of Rex Kingsley. Saw it with eyes. Saw the killer drive away. row morning he identifies po Boom! Like that! Case all close I go back to detecting who sto body's hubcaps."

"If you've got an eyewitness, Pat Kingsley, "why do you wa morning?"

"Old man," explained Bert "Very old man. Somebody's g ther, at least. Maybe great-gran Maybe a real ancestor. Awful drove all the way down from Vi this afternoon. Doin' his duty a zen. Fine ol' ancestor. Only h He's real sick. So sick when he g he couldn't identify anybody. even sure who he was. All in. said sort of temporary physical c But in the morning—" he waggle ger. "In the morning, he'll be fin he'll show us who did it."

Garland said, "Where is he?"

"Here! Right here in the Casa You know the apartment on the nine where Jeff Nulty was killed where he is. The doc gave him Big shot. Out like a light. Gi'm for his ordeal tomorrow. Identif tough job. But until then, he know anything." He reached sherry. "I'm guarding him."

"You're *what?*"

"Guarding him. Only he's slee why should I stay in there? I gonna wake up tonight. Not a Brian asked with marked "Who knows the man is here?"

didn't seem to know what to do. ed over the prostrate figure of the detective, wringing his hands. Brian Garland and I went over to see what we could do. Pat came along and stood behind us. I saw Floyd Andrews watching from just inside the entrance to the bar.

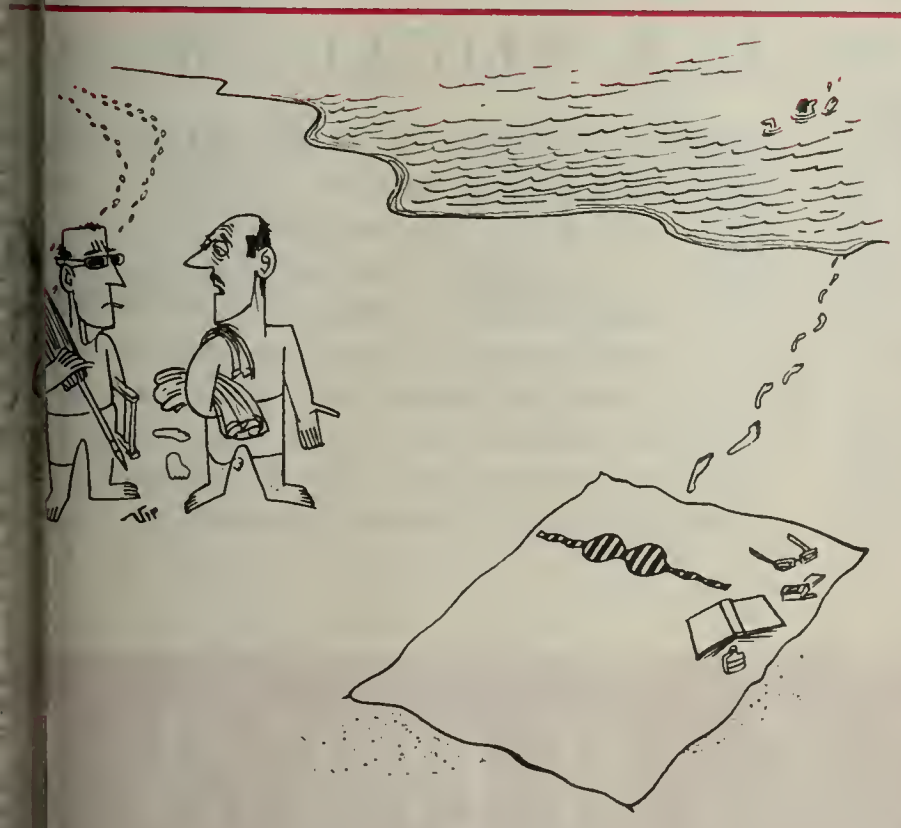
Brian Garland motioned toward the office that had once been used by Rex Kingsley and before that by Jeff Nulty. He said, "Isn't there a couch in there?" and Mario said yes.

"Why don't we drag him in? He won't wake up till morning."

It was an excellent suggestion. I was supposed to have made it, but Brian had beaten me to it. I walked over to where Ramsay was sitting with Rusty. I paid no attention to her, and she returned the compliment. I asked Wade whether we could put the lieutenant in the corner office until he slept it off. He agreed.

It still wasn't an easy job. We tossed Lane on the couch, removed his coat and shoes, and loosened his collar. Mario snapped off the lights and we all left.

THE club was virtually empty. Bus boys were cleaning up, and workers were starting to pile tables and chairs in preparation for the onslaughts of the cleaning women. Rusty Mason, Wade Ramsay and Floyd Andrews had disappeared. Vince Mabry and his boys had long since left the bandstand. Brian Garland said good night, and I took Pat upstairs. I kissed her good night. I did it right in the hall, where anybody who happened along could see. But nobody saw, and so I did it again. She went into her apartment and closed the door. I went into mine and did the same thing.



I doused my face in cold water. I waited perhaps ten minutes. Then I eased out of my apartment, walked to the fire steps and went downstairs. I went out through the garage. I walked around the corner and said hello to Marty Walsh, who looked cold but eager.

I gave him a full report. I told him how wonderful Lane had been. He said he had known it would be that way. Lane was one of their best men.

We waited a half hour out there in the cold. Then Marty produced a couple of master keys. He unlocked the door of the service entrance. We pussyfooted up the dark back stairs to the mezzanine. Another master key let us into Jeff's apartment. We left the door unlocked. There wasn't any witness in the apartment. There never had been.

I was jumpy as a cat. The chips were down. Nothing to do but wait and hope and wonder.

Marty and I sat in the bathroom on a

couple of straight chairs which had been brought in earlier for the purpose. I was scared as hell. I couldn't guess what might happen. I was even more afraid that nothing would. I voiced my doubt to Marty. He said, "It should, Steve."

"Why?"

"Suppose you were a murderer—and we'll hope for the moment you're not. But if you were, if you had killed four people, what would you be thinking?"

I didn't answer, and he went on: "You'd know that a dumb, drunken cop had spilled his guts. You'd know he'd stay paralyzed for the next half-dozen hours. You'd know he was down on the street floor, dead to the world. You'd know that an eyewitness—the one unexpected element in this case—was in the midst of a drugged sleep on the mezzanine, in this apartment. Away from everything and everybody. Unguarded. So if you had killed before, you'd do this one more killing to make yourself really safe. It was your own idea, Steve. Don't go sour on it now."

That was the setup. It was logical thinking. But it still might not work. I fidgeted nervously. Marty's voice came to me through the blackness. He said, "One thing you can bet your pants on, Stevie boy. If anybody *does* rise to this bait—if anyone comes in here, the case will be closed."

We waited an eternity. Silence. Darkness. Marty showed me the illumined dial of his wrist watch. Almost four o'clock. Not so good. I was beginning to fear that my figuring had been faulty.

Then suddenly my body got rigid. I heard something outside. the faintest whisper of footsteps. I felt Marty move. I heard my own heart pounding.

Slowly, with a dreadful, inexorable slowness, the apartment door opened. The hallway was dark. A figure which I felt, rather than saw, moved into the room, closed the door gently.

Then a beam of light from Marty's electric torch flamed across the room and pinned the intruder against the wall. Marty's voice had a cold, metallic sound. He said, "Hold it. Or I'll shoot!"

The intruder stared at us with wide, blinded, terrified eyes.

It was Wade Ramsay.

THERE'S a basic principle in police procedure: When you've got a prime suspect on the ropes, start pounding and never let up until he breaks. You take advantage of the fact that he has been emotionally upset, that he isn't thinking fast or clearly. You figure he'll either give himself away or trip himself. It's something every good cop knows.

Marty Walsh was a good cop. He moved toward the door. His flashlight continued to glare into the blinking, frightened eyes of Wade Ramsay. The gun in Marty's right hand was held negligently, but it was there.

Walsh said, "The party's over, Ramsay."

Wade Ramsay, rotund, immaculately dressed, looking more than ever like a prosperous banker, made an effort to pull himself together. He said, "I don't know what you're talking about."

"Like hell you don't! I know that you murdered Jeff Nulty, and why. You followed that up by killing Conchita Montero, Connolly and Kingsley. Too bad they can only execute you once."

Sweat stood out on Ramsay's forehead. Marty went on, coldly, implacably: "And don't kid yourself I can't make this one stick, fella. We had plenty on you before this visit. But you walking in here, figuring to knock off the eyewitness you thought we had—that was icing on the cake."

There's a truism about a cornered rat. There's a certainty that if a man knows he's going to die violently, he owes himself any forlorn chance. Ramsay knew Marty wasn't bluffing; he recognized the end of the trail.

I saw his hand move. His right hand. I jumped before the hand reappeared, holding a vicious little .32. I grabbed his wrist with my right hand and slugged him with my left.

He slugged right back. He was stronger than I would have expected, and more agile. He knew how to handle himself. I pressed my body against him. We wrestled around, and he butted me with the top of his head. It hurt. I gave him the knee and felt his body sag. He stumbled, the gun skidded across the floor and I landed on him. I wondered why Marty didn't do anything, but even the fact that he was a spectator was reassuring.

The door opened behind me. I saw a pair of lean powerful hands grab Wade Ramsay's collar. I loosened my grip, and watched Lieutenant Bert Lane haul Ramsay to his feet. Lane grabbed one of Ramsay's wrists and I heard the soft click of a handcuff. He twisted the other arm, and another handcuff made a soft, reassuring sound. Ramsay stood trembling, hands pinioned behind his back.

I started to thank Lane, but Marty Walsh spoke. He said, "That was neat, Stevie. But you spoiled everything."

I said, "Spoiled everything how?"

"Barging in like that. I was all set to plug him." He looked over at Lane. "How you feelin'?" he inquired.

"Foggy," grinned Lane. "That sherry routine almost floored me. Think I'll go back to vodka after this."

Marty said, "How'd you happen to come in at the right time?"

"Ramsay played it cute. He walked into the office where I was supposed to be sleeping it off. He talked to me. He even shook me a little. Wanted to be sure I was out. When he left I knew where he was headed."

The two detective lieutenants closed in on Ramsay. "You telling us, Ramsay?" Marty asked, "Or do we tell you?"

Wade didn't say anything. He looked sullen and scared.

"Okay," snapped Walsh. "I'll talk, just so you'll know for sure we ain't bluffing. You killed Nulty because he was bleeding you, because he had something you thought you could get your hands on. You killed Conchita because you thought the gun she found would tie you in, and because you didn't know how much Nulty might have told her before he died. Your killing of Connolly had something to do with those clippings about Rusty Mason. I ain't entirely clear on that one. As for Kingsley, you finished him off because he inherited Nulty's racket. What Nulty had, Kingsley also had. He was milking you dry. And you walked in here tonight to make the record perfect. Am I right?"

Ramsay bit his lower lip, but di anything. Walsh picked up the sh tle gun. "Neat little .32," he comr "Connolly and Kingsley were eac with a .32. We'd have been puz hell to find our witness dead in th ing with a .32 slug in him, and t lying on the floor. I gotta hunch the gun that killed both the other say. If it is, you might as well sta ing. Ballistics tests will prove tha within the next hour."

Wade Ramsay stared at the g then at Marty's hard face. Yo almost hear him thinking. The g the ultimate proof. Ballistics te as accurate as fingerprints, and I knew it.

He said, "I did it. There's no longing the agony."

I HAD known it must be that v his confession still shocked m man who had been genial and who apparently had everything g world could offer. It was grotes

Lane said, "That washes us Marty?"

"Just about."

"Pretty neat thinking, kid."

Walsh said, "Hell, I didn't thin It was Steve Blake." He grinne the first really friendly smile I'd of him. He said, "It's your sho termind. Tell Brother Lane h doped it out."

I said, "I was lucky, that's all. a lot of time trying to figure moti body seemed to have enough, we had thought of seemed to be tight enough with all the victims.

Bert Lane said, "Motive! That thing I can't figure yet."

"When I got back from Cajón said, "after Rex Kingsley had bee I tried going back to the begi listed everything that had happe ery word I could remember. That Wade Ramsay came in, and on ured him, the rest was sheer logic

Walsh said, "What I can't figure is why Rex Kingsley confessed to his wife that he had killed Nulty when he hadn't." He directed his attention to Ramsay. "How do *you* figure that?" he asked.

Ramsay answered in a flat, dead voice. He said, "I don't see any point to holding back now. Nulty had been bleeding me. He kept the real will after he stole it from my father's safe. The day he and Blake had the fight in Blake's apartment, I found Steve's gun. I found it accidentally. Steve's nose was bleeding and he had a cut under one eye. I went to his dresser for some extra handkerchiefs to use in controlling the bleeding. The gun was there. That gave me the idea. I had no intention of killing Nulty. I meant to scare him into giving me the will."

Walsh said, "You didn't play that very smart, Ramsay. After you had shot Nulty, why didn't you leave Steve's gun right there where it could be found?"

Wade Ramsay said, "That's exactly what I did do."

"Then you didn't hide it in the closet in Miss Mason's office?"

RAMSAY passed his hand across his forehead as though thinking was becoming too great an effort. "Certainly not. I was amazed when I heard no gun had been found. Later, when Kingsley started putting the screws on me, I found out why. Kingsley knew I had killed Nulty. He had gone to Nulty's apartment and found the gun, after I left. He selected the catchall closet as a hiding place, knowing I'd never think of looking for it there. But he didn't tell me where he'd put it. He told me that he had it safely hidden, and that he could produce it if and when he needed to. He said it had my fingerprints on it. I always understood that it's pretty difficult to find fingerprints on a gun, but I wasn't sure."

"After you shot Nulty," prompted Walsh, "what happened?"

Ramsay said, "I hunted for the will, but didn't find it."

Walsh asked keenly, "But Kingsley did?"

"Yes. Evidently hidden among the night-club papers in the office. Rex warned me that if the same thing happened to him that had happened to Nulty, they'd find the real will. He said he had hidden it where it couldn't be found as long as he was alive—but that if he died it would be discovered sure. That tied my hands."

Marty said to Lane, "Once Steve got his hunch, he checked the dates at the record bureau, which made Nulty's inheritance look sour. Brian Garland helped him trace the practice of the dead lawyer who had drawn the original will. It had been divided up among a lot of

other law firms. In the files of one of them they found the carbon copy of Ormond Ramsay's real will. It hasn't any legal standing as a will, but it'll be a nice piece of evidence in case this monkey tries to repudiate his confession."

Lane asked, "And you killed Conchita because she had found Steve's gun hidden in the closet in Rusty Mason's office?"

WADE RAMSAY said tonelessly, "It wasn't as simple as that. I knew something was happening. I was afraid because I didn't understand what it was.

"The beginning was when Conchita said she wanted those old theatrical pictures of herself. They were quite good pictures, and had been made in Havana. An agent had been high-pressuring her to get as many as she could, and it would have taken some time to have had prints made in Cuba. The agent had her all steamed up over the idea that he was launching a campaign which might land her a good movie contract.

"I knew where the photos were. We get hundreds of them, from performers and agents. Those we don't use, we toss in that closet. It was Rusty's job, and I was never much interested. But I knew that was where Conchita had gone.

"Later, when she returned to the table, she was excited. I overheard her conversation with Steve Blake, heard her make the appointment to meet him in his apartment. The urgency in her voice indicated to me that she might have found something in that closet, though at the moment I couldn't guess what it was. Frankly, my first thought was the will. Kingsley had hidden it somewhere, and it struck me then that he couldn't have chosen a better hiding place.

"I knew I had a certain amount of time before Blake would show up. I let myself into his apartment with one of the house passkeys. When I walked in, Conchita was stuffing something into her bag. I didn't know then that it was the gun. I still had the will on my mind. If I were right, this was my chance to get it. With that will destroyed, I would be safe.

"Conchita's manner when she saw me was a giveaway. She was terrified. She started to get hysterical. I knew I had to work fast. I demanded that she give me whatever it was she had in her bag. She wouldn't tell me what it was. I'm not sure she was able to, she was so scared. I was certain she was going to scream. I was pretty jittery myself. I killed her, not because I wanted to kill her, but because I had to get what she had in her bag. Then, when she was dead and I looked in the bag, I saw that what she had was the gun, and only the gun. She didn't have the will. I wiped the gun clean in case there were any fingerprints on it. I left it in her bag, chiefly because I couldn't think of what else to do with it, and because it didn't represent any further threat to me." His voice trailed off. "I'm sorry I had to kill her," he said wearily.

"Pete Connolly?" asked Marty. "What about him?"

Ramsay was trying to tell it straight. "Pete came into my office Christmas Eve," he said. "He was ugly drunk. He was sore because I wouldn't check in with some silly scheme of his to force Rusty to marry him.

"He told me he had some papers in his pocket which tied up with the murder of Jeff Nulty. I asked him what he had, and he said he wasn't telling me anything. He was burning. He was that kind of drunk. I knew nothing about any clippings. I didn't know it was newspaper stuff which tied Miss Mason up with Nulty. I naturally thought that Connolly had found the will, and that was—from beginning to end—the crux of the whole thing. It couldn't sound any other way to me. If he hadn't been so drunk as to be unreasonable, if he'd told me what he really had—he wouldn't have been killed. I was desperate."

Marty asked, "Where did you get the gun with which Connolly was killed?"

"It's mine. Registered to me. I've had it for years. I hid it in Apartment 11-A. The tenants there are in Europe. It was a safe hiding place. I put it back again after the death of Rex Kingsley."

I said, "That's something I don't yet understand, Wade. Kingsley's part in this whole thing. Why was he leading with his chin?"

"Helping me," explained Ramsay. "Deliberately beclouding the issue. He didn't care who was punished for the murders, so long as it wasn't me. He wanted me to be clear so he could blackmail me. I believe he found the clippings when he found the will. He sent the clippings to Connolly just to foul things up some more."

"I see." I was remembering that Rex Kingsley had walked in on the end of my conversation with Ramsay about Pete's love life. I was beginning to see something else, too. "And when you listened in on Kingsley's telephone call to me from Victorville—" I started, but Bert Lane broke in. He wanted to know what that meant.

"Just another little detail that tied Ramsay in," I said. "He's a graduate electrical engineer, which doesn't necessarily mean much, except that he would understand about telephone wires. Shortly before the call came in from Rex at Victorville, my phone rang. I picked it up, and heard Mrs. Kingsley talking to someone. Crossed wires, I thought, and let it go at that. The same thing happened a few minutes later. Afterward, when I started thinking along new lines, it made more sense. I went with Brian to see a friend of his, an electrical expert whose hobby is scale-model trains. I asked him about how a telephone could be rigged, and he explained it to me in detail. I checked the back of the switchboard at the Casa Linda. What Ramsay undoubtedly had done—"

"Jumper wires," broke in Lane. "He had put on the jumpers to connect his phone, Pat Kingsley's phone and your phone. If one rang, all rang. He could listen in—which is exactly what he did when Kingsley called. That would be how he knew the details of the appointment in Cajón Pass. Right?"

I said I thought he was right. I said I thought a further investigation of the wires behind the switchboard would show that those three, and no others, had been connected with jumper wires and disconnected later. Ramsay didn't even bother to verify the theory. He knew the police could find that out for themselves.

I said, "Look, Wade—I hate this, but I've got to ask it: Kingsley had the real will with him at Cajón Pass, didn't he? Wasn't that the documentary proof he said he had?"

"Yes."

"What was he planning to do?"

"Turn it over to you. He was afraid that as long as I was free he might be killed. But he was wrong. I wouldn't ever have killed him while he had that will."

"That doesn't check, Ramsay. You killed Conchita because you thought she had the will. You killed Pete Connolly for the same reason."

"Those cases were different," he said reasonably. "Neither Conchita nor Pete would have understood the significance of the will. If I'd been right in either case, I'd have obtained possession of it. That wasn't the case with Rex Kingsley.

"Rex knew what the will meant. He told me it was hidden where I couldn't find it, but where it would come to light if anything happened to him. As long as he remained alive—as long as I paid him off—he'd keep his mouth shut. But if he died suddenly—so he said—the will would be found. So you see, the Cajón Pass deal was different. I felt certain he had the will with him. If that were destroyed, and Kingsley dead, I would be safe."

COLLIER'S

"I'll take one eard . . . by the way, what are the odds against filling an inside straight?"

IRWIN CAPLAN

I SAID, "That explains why his pockets had been rifled, but no money had been taken." I stopped to light a cigarette and drew the smoke deep into my lungs. "He was an accessory," I added.

"Doesn't mean much in this state," volunteered Marty Walsh. "Accessory after the fact carries just a few years. That's a small enough risk to take for what he stood to win."

Lane was persistent. He said, "You had to start thinking somewhere, Steve."

"Yes. It doesn't make a lot of sense, where I started. But it was when Pat told Marty and me that Rex had confessed to her."

"Haven't you got that in reverse?" Lane asked.

"No. It struck me then as wrong. I didn't believe a murderer would ever confess if he didn't have to. But he might if he were covering for someone, if he had reasons of his own. And there seemed to be only one person Kingsley *could* be covering for. His boss. Wade Ramsay. At first, the idea sounde surd. But the more I thought ab the less absurd it seemed."

Marty spoke to Ramsay. He "Did you hire those two hoods t up Steve?"

Ramsay shook his head. "Tha another of Kingsley's cute ideas. I he was afraid Blake might discov truth if he kept at it hard enoug wanted him scared off." He fidge his chair. With handcuffs on, he co get comfortable. He said, "Liste told you everything. I know I'm But I'm tired, too. I'm awful tired. we call it a night?"

They took him out of there. walked down to the club and th the stark, unromantic atmosphere spot which had been gay and wo gay again, but which now was n more than a huge room, reeking o liquor and tobacco. They vanishe the lobby—Lane and Marty Walsh the handcuffed figure of Wade R between them.

I rode up to the seventh floor was beginning to break. I was st ing with fatigue and nervous as I rapped on the door of 7-A.

PAT KINGSLEY opened the She had on the same lovely p blue negligee which I had seen before. It still made her look the most wanted her to look.

I went inside and drew her down me on the couch. I gave her th lights of what had just happened stairs. I held her tight all the time talking.

When I finished, she sat silent long time. Then she said, "I'm wasn't Rex."

I said I was, too. Then she said s something to tell me. It wasn't imp but maybe I'd like to know.

It was about Floyd Andrews. Sh she had just learned—within the p hours—that he had been employ her father to learn the truth of wh happened, to estimate the danger s in, and to protect her from an which might tend to make mor mess of her life.

I said, "Then he did lie to me. H he wasn't a detective."

"He wasn't," Pat explained. "D too shrewd to employ a private i gator. You could too easily have out who and what he was. So c So could the police. That woul defeated his purpose.

"Dad told me he had known A for a long time. Before the war h one of the shrewdest insurance i gators on the West Coast. He ha competently trained for any type vestigative work. During the war with Army Intelligence, which me got additional training, though of ferent sort. It wasn't until after t that he went into the regular ins business.

"Dad had confidence in him a ability. He was in a position to favor of Andrews, and he knew th could be trusted. His job was to le score, and to protect me at all cost

It was clear enough now. So and so logical that it hadn't occu me before. But Floyd Andrews matter now. Nothing mattered that Finis had been written. There be no more murders, no more in no more sensational publicity, n doubt and uncertainty.

Exhaustion was creeping up The girl in my arms was soft and and relaxing.

I said, "Will you marry me, Pa

I saw the top of her head m firmatively, and heard a whisp sounded like, "Yes."

"We'll go on a honeymoon," "A lovely honeymoon. And I'll sk ever."

BENDIX BATS FOR RUTH

Continued from page 18

"I didn't go to high school, so how could I be a doctor or a lawyer?" he asks. "I was a semipro in baseball, a semipro in football and got the gate as a grocery clerk. I can't sing, I can't dance, I can't play an instrument. What's left but acting?"

He was born in New York City, went to P.S. 5 and was on his third month at Townsend Harris High when the wolf scratched plaintively at the Bendix family portal and tried to get a foot in the door. This brought on the abortive grocery-store episode in Orange, New Jersey, where he married his wife, Tess, and seemed set on a career as a merchant prince, till the chain he was working for went in for supermarkets and deposited Bill on the street.

Prior to this the family had lived on Eighth Avenue two blocks from the Polo Grounds in the days when both the Giants and Yankees played there. Bill was successively the boy who turned the stiles for the ticket takers, clubhouse boy and finally bat boy for the Giants. Part of his job as clubhouse boy was rushing hot dogs to Babe Ruth.

"One day he really ran me," says Bendix. "Twenty-four dogs and you'd a thought that woulda killed him but he hit two home runs."

An Actor at Last—But How!

While Bill still had the grocery job in Orange, he one day saw an advertisement for actors at the Henry Street Settlement in New York. Tess said, "What do you know about acting? It's crazy." But Bill went over and got the part of a gangster, and that is where his acting career began. Then he took on as a singing waiter in various Jersey joints and made as much as four bucks a night. This qualified him as an actor and he got on the WPA Federal Theater project in Jersey, since the depression was now on seriously.

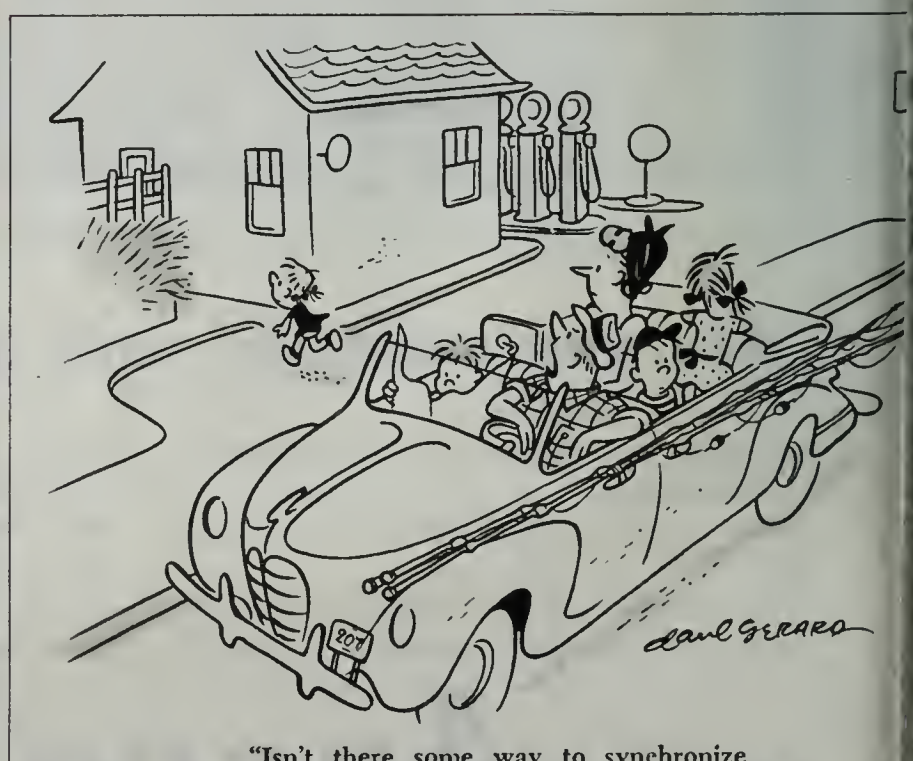
It was understood that the cardinal principle was to get actors OFF the project as soon as possible. So when Bill got parts in New York shows, he hied himself across the Hudson. The WPA was happy to see him go, and he knew that if he failed he could always come back. He always came back. Seventeen shows he got and 17 flops. Most of them rehearsed earnestly and then realized the truth. Others came in and departed before the ushers could learn the seat arrangements.

The next move was to New York so Bill could be near the theatrical a He was getting $94 a month from and continued to get it right up to he finally got into Saroyan's The T Your Life for the Theatre Guild. won the Pulitzer prize, ran for in New York and another year road. Bill got around America.

"Nine weeks of one-night stands see the theater and the hotel a lower berth," says Bill. "Americ me but I don't see America."

The show hit Los Angeles on th and somebody must have liked hi actor. Because after he got back t York and was rehearsing in a pla Otto Preminger, a hurry-up call from M-G-M to get himself on a and out to Hollywood. Preminger to heaven that he was being ruine called Tess to get his only extra su the cleaners and finally he was al away.

And there endeth the tale of p From then on it was gold, gold That picture was Woman of th with Tracy and Hepburn. Bill w to make such wing-dingers as W land and Lifeboat. The movie fam rally brought radio offers and h has his own show, The Life of which is being made by Irving B as a movie. Bendix averages $5,000 a week with movies and rad Encino home has set him back $1 and he has a ranch farther out in t ley where his father-in-law and b in-law operate a chicken farm.



Bendix has the ambition of mouse, meaning none. He has no ing to be a director or a produc certainly harbors no social leanin resolutely refuses to study a mov before he hits the set. He would do a Broadway show and perhap a lick of traveling, but since he w the time, these plans are not feasi

"Save a buck or two and k actin'," he says. "That's me."

"You see, that was the way I wanted it. Even though Mother signed the paper, I was still free. My parents had split up just a while before and the court had made Grandmother my legal guardian. She was the only one who could sign.

"Things broke all right for me in the Cardinal organization and Mr. Rickey always treated me fine, so nothing happened. But all the time I could have been a free man any time I wanted and I'll bet Branch Rickey doesn't know to this day he never had a valid contract with a kid named Johnny Mize."

THE KING OF JACOBS BEACH

Mike Jacobs broke in as a promoter by staging the Barney Ross-Billy Petrolle fight in 1934. Madison Square Garden officials looked down on Jacobs as an opportunist, a brash ticket peddler, but Mike proved them wrong by signing young Joe Louis to an exclusive contract. After Mike moved the Louis-Braddock battle to Chicago, Madison Square Garden capitulated. Jacobs got a grip on the boxing industry.

Coincidentally, the fellows who put Jacobs in the promotional business, Art Winch and Sam Pian, now are part of a movement which may put Jacobs out of business. Winch and Pian were managing Ross when they decided to take a chance on Jacobs' promotion of the Ross-Petrolle fight. Now, they are managing middleweight champion Tony Zale and working with Jacobs' rival, the new syndicate headed by oilman Ben Bodne.

Jacobs, older and in ill health, probably will not battle Bodne as earnestly as he fought Madison Square Garden. But a younger and hungrier Jacobs would have made things interesting for Bodne and his six millionaire associates. Mike knows all the angles of fistic finance. He raised $100,000 in eight hours when Tex Rickard needed a financial transfusion to keep the Dempsey-Carpentier fight alive. Mike collected the money from Broadway ticket brokers by promising them the best seats.

And nobody sold tickets faster than the Mike Jacobs who sat on a policeman's horse outside the Polo Grounds and hawked Dempsey-Firpo ducats to the highest bidders. Of course, Louis was the real secret of Jacobs' promotional success and that's something for Bodne, Inc., to think about. Where are Bodne's millionaires going to find another Joe Louis?

STILL IN THE MONEY

It's still too early to write off Lew Worsham's victory in the 1947 National Open as a golfing accident, even though Lew hasn't won much since. The pros believe Lew can regain his prize-winning touch anytime he wants to get down to hard tournament work.

Lew has been taking it easy, cashing in on the Open title and collecting big exhibition fees. He's also been playing lots of golf at his home club, Oakmont, which abounds in Pittsburgh steel millionaires. Lew never finishes out of the money at Oakmont.

• • •

Taft Wright, the Chicago White Sox outfielder, is philosophical about batting slumps. "I just keep swinging," Taffy says, "and I get a hit now and then. Even a blind hog roots up a few acorns."

AN AFFAIR OF STATE

Continued from page 12

"It was. He had a private dining room on the second floor."

"Tell me," she said, watching the thin spiral of smoke from the clamshell ash tray, "what do you think of generals?"

"I think generals used to be fine for winning wars."

"Used to be?"

"I think generals are archaic, like knights in armor."

"If you talk like that in the department," she said, "you won't be very popular. Generals are chiefs of mission in all the critical areas, and more areas are getting critical all the time."

They talked of the successes and failures of ERP, the uranium mines in Bohemia, British trade, Italian Communists, Chinese graft, and the Japanese Zaibatsus.

THEY leaped across the globe to The Straits, and she asked what he thought of the new Turkish military loan.

"It's ridiculous," he said. "There'll be big parties in the Casino Taxim, and toasts to that noble ally and splendid democracy, Turkey. Then the pashas will take the hundred million bucks and build more villas on the islands in the Marmara. The Turkish army doesn't need equipment. It needs education. It would take one generation for the Turkish army to learn to read, and another to learn how to use radar and jets."

"Jeff," she asked, "do you always say what you think, like that?"

"Yes," he said, "I suppose I do."

"People don't like to hear that sort of talk. It isn't, you know, very diplomatic. Particularly in the department."

"Anyway, it's the truth."

"They'll ship you to Guayaquil, or Addis Ababa," she predicted, naming two of the traditional Siberias of the Foreign Service. "I don't want that to happen to you." She seemed genuinely troubled. "I want you to go to someplace where you are needed. Like Budapest. Or Prague. Or Rome."

He realized for the first time that she had been dropping carefully chosen pebbles into the stream of his thought, and charting the spreading ripples of his reaction. "Susan," he asked, "exactly what do you do in the Secretary's office?"

"I'm just the stenographer who takes the nine-o'clock conference. I'm rated as a confidential secretary."

"That's pretty important, isn't it? Isn't that the Planning Conference? Don't you hear a lot?"

"I hear a lot, and I never talk about it. But sometimes I think."

He wondered how a girl with such irregular features could appear so beautiful. "How is it," he inquired, "that you were free tonight? I'm very happy that you are, but it doesn't seem logical."

"In the first place, don't you realize that there are a hundred thousand more women than men in Washington? And in the second place, I don't run around much, and I'm not getting married."

"You're human, aren't you?"

She didn't reply at once. She tapped her cigarette into the clamshell ash tray, and cocked her head to one side. "There are two answers to that. The first is that I wish I could show you how human I am. The second is that I can't."

"That's no answer. That's a riddle."

"Wait. I'll unriddle it. I married when I was nineteen. My husband was much older. Not that he wasn't a good husband. He was. He was also a wise friend. He was in the Public Health Service, and when war came the Marines took him and shipped him out to the Pacific to clean up those islands. I'd see him every six months or so. He'd come back to get a planeload of little fish to eat mosquito larvae—things like that. He was always fighting for supplies and medicines not only for the Marines but for the people in New Georgia, and the Marshallese, and the Gilbertese."

"And you lost him?"

"I lost him. I celebrated V-J Day in a big way, because I knew he'd soon be back. I woke up with a hang-over and a telegram beginning, 'The Secretary of the Navy regrets.' All I have to show for him is a Legion of Merit, posthumous."

"I'll admit that's tough. But other women lost their husbands and got over it."

"I know. I didn't. Other women don't have to take the State Department's nine-o'clock conference."

"I don't understand."

"You don't? Put it this way: Lots of women won't have babies, nowadays, because they're afraid. They're afraid they'll lose them in another war. They're afraid babies will be killed in their cribs this year, or next year, or the year after. Right here, in Washington. In New York, and Pittsburgh, and Detroit and every other target city. Well, I don't want to have any more men, like other women don't want to have any more babies. I couldn't bear to lose another man."

"What about Fred Keller?" he said.

"I go out with him, very occasionally. He's a dear."

"You mean he doesn't make passes," he suggested.

"As a matter of fact, he doesn't."

"He didn't look so safe to me," Jeff said. Keller was spare and tanned, still a bachelor at forty, and rich enough to have twelve acres in Berwyn, a shooting box on the eastern shore, and an ocean-front villa near Palm Beach.

"Maybe you're right. Maybe he's not safe," Susan Pickett said.

"What do you mean?" Jeff said.

"Nothing, except sometimes he gives me the shivers. He's so casual about war. When he talks about atomic bombs his mouth waters as if they were lemons."

"That's not unusual in these times. And after all, he's not so important. He just has some sort of a control job on the European desk."

"He is important," she insisted. "He's going to Budapest."

"So we'd have something in common, I studied up on paper boxes—THEN I find he don't wanna talk about paper boxes!"

COLLIER'S JOHN RUGE

"Didn't you recommend Budapest for me?"

"I suppose so. It's been on my mind."

"What's cooking in Budapest?"

"Nothing that isn't cooking in Prague and Salonika and Trieste and Vienna and Berlin and Seoul and everywhere else where we're face to face with the Russians. Only in Budapest it's closer to burning." She was silent while the waiter laid the check on the table. "Jeff," she added when the waiter was gone, "sometimes I forget I'm not supposed to think. I'm just the girl who takes the nine-o'clock conference, and I need my job, and if I do too much thinking and talking I'll lose it."

"What're you afraid of—thought-control police?"

"Sure. We all are."

"Okay," he agreed, "no more shop talk. Anyway I like Budapest."

"You've been there?"

"When I was a kid. In the summer after my sophomore year in college. The department sent my father to an audit of the Balkan missions."

"If you're interested in what's g happen to this world," she said "you should try to go there agai

Outside, in a taxi, he suggest Footlight Club, but she said tha it was a nice idea, and she loved to it was too late for her to go an else. She had to be in the office, the agenda for the nine-o'clock ence, at eight every morning.

He took her to her apartmen She said, "I'd ask you in, but it w do either of us any good."

"I guess not." Still, he didn't leave.

"Well, goodby," she said, her poised to turn the key.

"Well, good night," he said, didn't go.

"You don't feel very plato you?"

"Frankly, no."

"I'm not going to be coy, Jeff.

He cupped her shoulders in his "Susan, this isn't the way I was it would be. Look at me."

She kept her eyes on the key. " want it to be like this either. I wa go out with you and see if so wouldn't happen. It didn't."

THE SPENCER CO.
715 WEST LAKE STREET, CHICAGO 6, ILLINOIS

amination time was not until eleven. Dannenberg seemed excited and fluttery. "It's going to be in the other building," he said. "And we've had a surprise. The Secretary himself is going to sit in on the examining board. It's the first time he's ever done it. He's deeply interested in recruitment, you know."

Jeff sat down and picked up a magazine and turned the pages. His eyes scanned sentences and paragraphs, and pretended to read, but his mind did not know what his eyes were seeing.

Dannenberg's phone rang, and he answered it and said, "We'll be right over."

THEY walked out of the institute building, and across the street to the marble and limestone building known as New State. They took an elevator to the fifth floor, passed through a double door over which was the great seal, through an anteroom with empty chairs lining its walls, through a secretarial office, and then through two more sets of double doors, and into a room deeply carpeted and utterly soundless, as if it were detached from the building and from the city. Four men were seated at an oval conference table, with the Secretary at the end. The Secretary's head was down, exposing a bald spot in the gray, and he did not raise his eyes as they entered. He was reading a file of cables.

Dannenberg waited, standing, until the Secretary closed the file. Jeff was close at his side, trying not to stand to attention. "This is Mr. Baker," Dannenberg said, "who is to take the examination today."

The Secretary rose and put out his hand. "This will be a new experience for both of us," he said.

Dannenberg introduced the others: "Mr. Matson, Mr. Richards, Mr. Keller."

"We've met before, haven't we?" Jeff said to Keller.

"Oh, yes, of course," Keller said, but Jeff could see he didn't remember. He had heard of the others, but never seen them before. Matson was chief of the Balkans Division. He had been minister in Sofia and Bucharest. Richards was also of career-minister rank, an expert on the Far East.

"All right, Mr. Baker, take this chair," Dannenberg said. Then Dannenberg seated himself at the opposite side of the table, and Jeff realized that Dannenberg would be the fifth man on the board, and that in the instant his manner had changed, and he was impersonal.

Dannenberg put his plump, white hands on the table, and said, "Would you care to start, Mr. Secretary?"

"No. You gentlemen go ahead."

"Would you care to tell us about your schooling, Mr. Baker?" Dannenberg said.

Jeff told them of Lawrenceville and Princeton.

Keller seemed more interested than the others. "What class at Princeton?"

"Thirty-nine."

"I was twenty-nine myself."

Then the questions began, really. Richards wanted to know whether he could explain the functions of the Far Eastern Commission and the Allied Council for Japan. He could, in a general way. Did he know what parallel separated the American and Russian zones in Korea? Jeff recalled it was the thirty-eighth. What was the agrarian policy of the Kuomintang? He fumbled that one.

The Secretary said, "This is like Information Please in reverse. Five men ask one man questions."

Matson took over. What sixteen nations participated in the ERP conferences? Jeff thought he remembered them all. Outline the importance of the Danube to European economy. That was easy. He knew the Danube. He remembered watching the river in brown flood all one day in Vienna in '45, and seeing not one ship pass. He talked of the Danube as a vital artery now strangled by tourniquets of international red tape. He mentioned the Bulgarian fishing fleet, which for three years had been rotting up the Danube, seven hundred miles from its home ports. He noticed that he had captured the Secretary's attention, and that he made a note on the cover of his cable file.

Yet his answer did not seem to please Matson. "You understand, Mr. Baker," he said, "that if our people in Austria permitted those boats to go back to the Black Sea, then they'd only be used to catch fish for the other side."

He saw Dannenberg's eyes raise in mute warning. No opinions. He found himself saying nevertheless, "We cannot make an ally of hunger. That's a matter of national ethics. Furthermore, it's shortsighted to paralyze the Bulgar fishing fleet. It's just handing another propaganda weapon to the Communists in Bulgaria and Rumania."

"Very interesting viewpoint," said Matson. "But obviously arrived at without benefit of complete information."

Then the questions began to come in French, in Spanish, in Italian and German. He had been told that when they bothered to test your languages you had a chance.

"Now I'm going to ask you a question we ask all our candidates," Dannenberg said. "Why do you want to join the Foreign Service?"

"I've always pointed for it, more or less," he said. "My father was in the department."

This drew Keller's attention. "A legacy, eh?" he said. "I don't remember any Baker, but I suppose he was before my time."

"Baker? Baker?" murmured Matson. "I don't remember him either. Thought I knew everyone in the department. But then, he probably was in London when I was in Sofia, and in Shanghai while I was back home. You know how it is."

"He was a clerk," Jeff said.

"Oh," said Keller, and the single syllable was toned with surprise and disappointment, as if he had been examining a handsome ring, and then had been told the stone was imitation.

"There was another reason I wanted to get in the Foreign Service," Jeff said. He knew he had to get it out, because it was working inside him.

"Yes?" Dannenberg inquired.

"I don't want to see any more wars. I want to do what I can to prevent another war." He saw that they were all eying him now with fresh interest, as if he had told them some private thing about himself that was curious, [illegible] pose that's bombastic," he added [illegible] the need of an explanation. "I [illegible] it's bombastic to think that I can [illegible] thing to help keep the peace. I [illegible] the way I feel, and I know that [illegible] Foreign Service I'd have more [illegible] tunity to do what I want to do [illegible] where else."

"Well, now, I think that's very [illegible] mendable," said Matson.

"Oh, yes," said Richards. "[illegible] splendid aim." He glanced up [illegible] wall clock, as if from then on [illegible] would be wasting time.

The Secretary raised his head, [illegible] realized he had been watchful [illegible] silent. "I take it you don't like [illegible]

"No, sir, I don't."

"What outfit?"

"Eighty-fifth Division, 399th [illegible] ment, sir."

"Coulter was a good general," [illegible] Secretary stated, in the professional [illegible] that one doctor speaks of another [illegible] good man. He ran a forcing [illegible] the tabletop, and Jeff knew he was [illegible] cising his fabulous memory for [illegible] nutiae of battle. He knew sud[illegible] that in the room only he and the [illegible] tary knew—that the Secretary [illegible] ing Jeff's bootprints up the spine [illegible] the Italian peninsula. He was [illegible] Jeff's mad entry into Rome, the [illegible] ambuscades of the 88s on the [illegible] Florence, edging with him across [illegible] mine fields on the banks of the [illegible] He was witnessing the heartbreak [illegible] tack on the Gothic line, and [illegible] through the terrible winter in the [illegible] nines, exulting a little in the last [illegible] across the Po, and experiencing [illegible] ening letdown and disillusion [illegible] lowed victory. "I see," the [illegible] said. "I think I see."

"If there are no more questions," [illegible] nenberg said, "I suppose that will [illegible] They rose, and shook hands, and [illegible] nenberg opened the door for him. [illegible] can find your way out all right?" [illegible] nenberg said. "You'll be informed [illegible] letter, in the usual way."

"Thanks very much," Jeff [illegible] "You've been very considerate. I do [illegible] not think he would see Dannenberg [illegible] again. He feared he had failed. He [illegible] walked back toward Dupont Circle, [illegible] tried to analyze his answers. He tried [illegible] remember what each one had said, [illegible] how they had reacted to him, and [illegible] the Secretary had looked when [illegible]

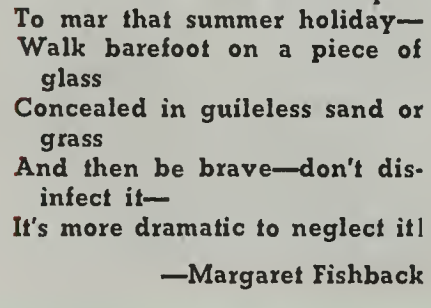
AFTER Jeff was gone, Dannenberg took his seat again. Because [illegible] Secretary's presence, there was an [illegible] usual relaxation after the ease. [illegible] "Well, Mr. Secretary," Dannenberg [illegible] "what did you think of him?"

"I'll wait to hear your reaction [illegible]

"I think on the whole he's a very [illegible] ising candidate," said Dannenberg. [illegible] has enthusiasm, background, [illegible] knows Europe much better than [illegible] men his age."

"He doesn't know Asia," said [illegible] ards. "A man ought to be well [illegible] as the world is rounded."

Dannenberg tried to estimate [illegible] retary's opinion, and decided [illegible] his mind: "On the other hand, I [illegible] expect him to have encyclopedic [illegible] edge at his age. What's your [illegible] Fred?"



Keller lighted a cigarette, [illegible] head upward, and slowly blew [illegible] smoke. "He's a bit visionary," [illegible] "but I think he has the make [illegible] first-class man."

"When you said visionary you [illegible] my objection," said Matson. "[illegible] hardheaded, practical men in the [illegible] ment today. After all, we're [illegible] a life-and-death struggle for our [illegible] of life with a merciless enemy. [illegible] a chance on a do-gooder?"

"We took a chance on him," [illegible] the Secretary said under his [illegible]

"The way I see it," Matson [illegible]

ruthfully, I didn't either, for a id Dannenberg. "You know, Baker, sometimes agreeable silence is the best diplomaey."

"I see," Jeff said.

"I'd stiek pretty elose to Matson, if I were you. I'd try to understand his viewpoint. Sinee he'll be your division ehief while you're at your first post, he'll have a good deal to do with the advancement of your eareer."

"What's Matson's viewpoint?"

"Well, just between us, Matson is a war-now man. I think he was a bit alarmed by what you said about war, and you'd do well to make your peaee with him."

THE next day Matson found a desk for Jeff in the Balkans Division. Over this desk began to pass earbons of the incoming file of eables: An Ameriean lieutenant had been beaten by the Yugoslavs; three conservative leaders in Rumania had disappeared and were presumed dead; the Cominform in Belgrade was sending propagandists into the Caribbean eountries; a Viennese doctor, escaped from a Russian bacteriologieal warfare laboratory, reported the Russians had been extremely sueeessful in their experiments with anthrax and bubonic plague. Prague was excited about the stepped-up produetion of the uranium mines in Bohemia, and was wondering what had beeome of some of our agents in the area. Four Soviet tank divisions were maneuvering in Lower Austria. Budapest said a Swiss traveler had talked to a German scientist who had helped perfeet an atomic bomb, in one of the faetories beyond the Urals, whieh would fit into a suitease. A hand grenade had been thrown at the legation in Tirana. The eonsul in Salonika was sending his wife home.

On the day that the Bulgarian Communists tried and exeeuted Kenov for no greater reason than that he led the opposition, Matson called Jeff into his offiee. "Well, Baker," he asked, "still anxious for the Balkans?"

"Yes, I still want to go," Jeff said.

"You saw the dispateh about Kenov? He was a friend of mine," Matson said. "A good friend. Just as good a friend as any friend I have here in Washington. And he was a gentleman. Furthermore, he was a good public servant. He devoted his life to raising his people out of ignoranee and poverty. He opposed the Nazi tyranny, and he opposed the Red tyranny, and now those damn' beasts have killed him."

"Do you think all of them are beasts?"

"Enough of them are so, sometimes I agree with those who say we ean't be far wrong in wiping out the whole buneh, while there's time."

"You ean't kill two hundred million people."

"Wouldn't have to. Just kill thirty or

"Let's make him take piano lessons. That might cure him of wanting to pound it" SCOTT BROWN

Your home represents dreams, hours of planning and anxious hopes that are finally realized in what is likely to be the largest single investment you will ever make.

It is unfortunate, then, when certain critical parts of this home give way because of damage done by termites or decay. . . . Especially unfortunate if, through neglect, you have failed to protect this big investment of money, time, and energy when protection can be yours at little extra cost.

Lumber that is treated with PENTACHLOROPHENOL gives you protection against the ravages of wood-destroying insects and decay. It safeguards areas in your home that are often difficult of access and costly to repair. Floors, joists, rafters and roofing, frames and sashes—all these are extremely susceptible to such damage. In fact, wherever wood is used in your home, it will pay you to specify PENTACHLOROPHENOL-treated wood.

Consult your architect or builder about PENTACHLOROPHENOL-treated wood and its uses in home, commercial and industrial building.

public ownership, and the damned laborers who didn't know what was good for them.

While he was at Harvard he became alarmed at the radical talk among some of the undergraduates and wrote a letter to the Transcript. The letter was printed, and there was a good deal of comment. His father commended him, praised his literary style, and said the family at last had produced a statesman.

In his second year in the department he wrote an evaluation of the Lenin-Trotsky dogma of world revolution which was good enough to be used as source material for future studies.

In 1925, while he was in Bucharest, he met and married the lovely, sad-eyed Countess Anya Lewenska. She was Russian, and the Bolsheviks had murdered her father and mother and confiscated their estates. He was never able to forget this, for in the years that followed, their home became a port of call, refueling station, and sometimes a permanent

harbor, for her brothers, uncles, aunts, nieces, nephews and cousins.

Gerald Matson's brothers, who now ran the family utilities holdings, kept him informed of the close connections between the Reds in Russia and the Pennsylvania Reds whose unions each year became more powerful and demanding. All his life a Red conspiracy had been closing in around him, and he knew that the only solution was war against Russia. As he constantly warned his colleagues, the United States was engaged in a battle for survival.

IT WAS about eight that night when Gerald Matson drove to his Alexandria home. For two weeks he had been working late in the department, for Count Igor Lewenska, his wife's younger brother, was their house guest. The count's dress shop had failed, and his perfume establishment had failed, and Matson knew he would be wanting capital to start another business.

After coffee Matson remarked that it had been a long time since they had been to a movie, and Bob Hope was playing in Alexandria. He was aware that the count professed to scorn American comedy.

The count, who had his sister's sad eyes, saw his opportunity. "I hear there is much money in Hollywood—much."

"When did you learn that?" Matson said.

"I hear it. I was told that if I had opened my salon in Hollywood I would have been a huge success."

Matson made a rude noise.

"Gerald!" his wife said. "Let Iggy say what he has to say!"

"Yes," the count said. "It came to me last night when I heard the government has ordered there should be anti-Bolshevik pictures."

"The government didn't do any such thing," said Matson. "Some congressman merely suggested it. The government can't order movies made."

The count shrugged. "When anti-Bolshevist pictures are made they will need technical advice. I will be there. It will be a great chance to make money and inform everyone about the Bolsheviks too."

"Meanwhile," said the countess, "Iggy can open a dress shop. He will no doubt meet influential people. When they need technical advice he will be available. I think it's a remarkable idea."

Matson knew he was trapped, yet he continued to struggle. "We'll discuss it tomorrow. I'm tired. They keep unloading pacifists on me. It's disheartening."

"Pacifists!" she exclaimed.

"Yes, pacifists." He told them about Jeff Baker.

"And if he goes to Budapest he will work on the Atlantis Project?" said Anya.

"He might." Anya was still beautiful, and an imaginative and popular hostess, and she had been a great help to him in his career, but sometimes he wished she would not speak so carelessly of secret matters.

"What is this Atlantis Project?" asked Iggy.

"I don't think it should be discussed here, Anya," Matson said.

"Now, Gerald, don't be ridiculous. Iggy is one of the family, and anyway he'd be the last person in the world to mention it."

"I don't want it discussed!" Matson said. He decanted a thimbleful of brandy into one of his King Alexander glasses.

"Gerald, you're so silly," Anya said. Before Matson could stop her she said, "I think it's the most wonderful idea, to build another underground."

"Shut up!" Matson yelled.

"Come, come," said the count. "No quarreling. I don't wish to know your secrets, Gerald, if you do not trust me." He poured brandy to the rim of his glass. "I drink to the downfall of the Bolsheviks!"

"To their end," Matson said mechanically, and raised his own glass. It had to come sooner or later, and it was his judgment that the sooner it came the better. To the war! The war would end this constant rasping of his nerves, his worry over money and his future in the department. The war would eliminate the radicals and emasculate the unions and placate his brothers. The war would give jobs to his in-laws and eventually send them back to their estates in Russia. For Matson, the war would mean peace.

THE day before Jeff was to leave for Budapest, Matson summoned him to his office and said, "I had a call for you from Horace Locke. He wants to see you before you leave. Friend of yours?"

"Horace Locke? No, but I've heard my father speak of him. I thought he was retired."

"He isn't, but he should be. He isn't very well liked in the department. He's outlived his time. I wouldn't take anything he says too seriously. That's just a friendly hint."

"Thanks," Jeff said. He had tried to follow Dannenberg's advice and understand Matson's viewpoint. He had been attentive, respectful and had muffled his own opinions as much as he could. He tried to agree, at least outwardly, with whatever Matson had to say, as he did now. But he could not bring himself to like Matson. When he talked to Matson he felt that his distaste, no matter how carefully he censored it from his voice and masked it from his face, must somehow show, for he knew Matson could feel it.

"If Locke has anything to say about this division I want a complete report on it. He sometimes tries to start trouble."

"Yes, sir."

Jeff found Horace Locke on the second floor of Old State, across the street from the White House. The department, in return for New War, had ceded Old State to the Presidential special agencies, so Horace Locke's office was like a forgotten island around which eddied and bubbled the activity of a foreign sea. On the office door hung a sign—Adviser to The Diplomatic Monuments and Memorials Commission.

There was no anteroom, no secretary, no typists or messengers. There was only a thin, wispy, white-haired man, dressed in tweeds that were soft and silky with years, small in his loneliness. On his desk was the minimum issue, for one of career-minister rank, of double pen set, water flask and glasses, metal calendar, two telephones, and in and out files, empty.

Jeff had expected he would be infirm, or dull-witted or cantankerous with age, but actually he didn't appear so old. He certainly wasn't any older than the Secretary of State, and he didn't seem much older than Dannenberg or Matson. His manner was composed and yet alert, his handshake quick and steady. "You're Baker, eh? Your father was Nicholas Baker, isn't that right?" he began.

"That's right, sir," Jeff said.

"I thought so. Didn't think there would be two Jefferson Wilson Bakers. Can you pull up one of those leather chairs?" He waited until Jeff moved the chair, and then he said, "How proud your father would have been—how very proud! Guess I'll have to be proud for him."

"I've heard him speak of you quite often."

"It was only luck that I knew you'd made the Foreign Service. Saw your name this morning in the department bulletin. That's all that ever crosses my desk, now, the daily bulletin."

Jeff knew he should say something, but he was afraid that whatever he said would be wrong.

For a moment Horace Locke remained silent, too, although his clear gray eyes were inspecting Jeff, drinking in detail, analyzing, judging. "If I had known sooner," he said, "there are some things I could have—" He shook his head. "No, I couldn't have been of any help to you. Sometimes I forget I'm no

longer a division chief. What's your job going to be?"

"I'll just be one of the third secretaries."

"Don't underestimate your own importance. Foreign policy is not made by speeches, or treaties, or directives or proclamations. It is made by men, and what they do. That's why I stay in the department. I've got too big a stake in the 20th century to pick up my chips and get out. Someday I might be able to do something again."

Jeff said, "Mr. Locke, I'm sure with all your experience you'll be called on eventually. But why can't you do anything now?"

Horace Locke didn't seem to hear. "We were so proud of the 20th century," he said softly. "Why, we even named a train after it."

"What happened to you? Why aren't you a chief of division any more?" Jeff hazarded.

Locke's voice was still low: "Because I have dangerous and unfashionable thoughts. Because I won't go along with the 'you're another' school of diplomacy. Because I believe we can have another war, or we can have civilization. But not both."

Jeff said, "Maybe I've got dangerous and unfashionable thoughts too."

"Knowing your father, I thought you would have. But we are not alone. We are only two in a great majority. True, it is a majority inarticulate, confused, and almost ashamed of displaying its consuming will for peace. We turned over our leadership to those who have a vested interest in war, and we have had trouble getting it back. My judgment tells me that we will never get it back, that the odds are for another war, and the dissolving of all our rights and freedoms. We will believe that thus we can beat the Russians, and survive. But if we survive it will be only as blind ants underground, fearfully guarding their eggs and breeding more soldier ants so they can continue to exist."

"That's a pretty black picture."

"I know it. We have the choice of believing Patton, who said, 'Man is war,' or of believing Sherman. I'm afraid we'll believe Patton."

JEFF thought of the *nebelwürfe* coming in on the slopes of Mount Altuzzo, and the terrible winter of '44, when it was always cold and always wet on Route 65, which the homesick doughs called Easy Street. "When it comes," he laughed, "I want to be the guy who hands out the doughnuts on the dock at Hoboken."

Horace Locke smiled, as though he had followed Jeff's chain of thought perfectly. "I don't think that would help you much. There was 'Remember the Maine,' and then there was 'Remember Pearl Harbor,' and the next one will be 'Remember New York.'"

He paused, and the smile disappeared. "In every country are men who want war for one reason or another. The military we can understand. They have been trained and educated for one purpose, and when they pursue their *raison d'être* it is understandable. But there are many others who want war, and their motives are not always so clear as, say, the greed of our local Krupps, and the fear of the men in the Kremlin. All of them have some personal reason—and to them a good reason—for bringing down the house of man in atomic shambles."

"So what can we do?" said Jeff.

"We do what we can. It won't be much, but more than most. Most people cannot make themselves heard above the din for war. In the Foreign Service you can observe, you can report, you can act."

"A third secretary can't do much."

"You'd be surprised what third secretaries have done. Of course they can bottle you up. They can stop all your reports. But there's even a way to get around that. It's been used many times. When you have something to say, and you cannot say it officially, put it in a letter to some friend in the department. A man you trust."

"Isn't there a regulation about that?"

"There is, but it's pretty elastic."

"I don't have any friends in the department," Jeff said.

"You can have me."

Jeff wondered whether he was engaging in a conspiracy. He didn't feel as if it were a conspiracy. It seemed perfectly natural and normal. "I'll remember that," he said.

"I don't know whether I'll be able to do anything with what you write me, if you do write," Horace Locke said, "but I'll try." He put his hands on the arms of his chair, and Jeff knew their talk was over. "I have to keep trying," Locke said as he rose, "until they finally kick me out of here. But I'm afraid it is hopeless. If there is to be peace, it must be dictated from up there." He pointed his hand toward the old-fashioned, soaring ceiling, not self-consciously, but matter-of-factly as if of a certainty there were something up there.

Jeff could not help but look, and there was nothing up there except an embossed great seal, dirty and yellowing, and Jeff realized this once had been part of the suite of the Secretary of State. . . .

Jeff Baker spent the rest of that day completing the list of purchases recommended by the travel experts in the Processing Section. He bought vitamin pills, lighter flints, chocolate, sulfadiazine, a hundred razor blades and a spare razor, a portable radio adjustable for all current frequencies.

He went back to the apartment and began to pack. He found he could get almost everything he possessed, except his books, into the four-suiter, the two-suiter, and the Pullman bag, all new and unscarred by travel. He was even able to pack his maps. He collected maps as some men collect old theater stubs and programs, or first editions.

He had also bought a diplomatic dispatch case, of handsome pigskin, tooled in London. It had cost him forty-five dollars, and this seemed a lot of money, especially when he had nothing to put in it except a handful of personal papers. He was enamored of the dispatch case as a woman with her first mink wrap. It was the insigne of his rank. Anthony Eden could possess no better. He was admiring its austere beauty when Susan Pickett called.

She said she'd just heard from a girl in Balkans that he was leaving soon, and she hoped he'd drop in and see her.

"I'm flying at seven in the morning," he said.

"Oh! I didn't know it was that soon." She sounded upset. "I suppose you're awfully busy, packing and saying goodby."

"I'm all packed," Jeff said. "I've said all my goodbys."

"Except to me."

"Except to you."

"I wish you would come over," she said.

"I'll be over right away."

"Not too quickly. Give me an hour. I just got home."

"Okay. An hour."

He was at her apartment in an hour, exactly. She took his black Homburg, smiled as she smoothed the new felt, and dropped it on a bookcase. Then she turned and raised her eyes to his, directly, but all she said was, "Drink?"

"Please."

"Rye, right?"

"Right."

She seemed different. It wasn't her dress alone. She wore a white blouse with a gold pin at her shoulder, and a full skirt that seemed to possess rhythm of its own, and that eddied and swirled with her smallest movement. As she moved to the teak bar he noticed that her hair was different. It was loose and smooth like dark velvet brushing her shoulders.

Then he noticed that the room too was different. A room changes with the character of its owner, so slowly and subtly that it is always noticed first by the stranger, not by the one who lives there. Exactly how it had changed was difficult to say. Some pieces had been added, some subtracted. He believed the rattan occasional chair was new, but he could not be sure. The room seemed more colorful, yet it was bare of pictures. Even the photograph of the Marine Corps colonel was gone.

He sensed that this night would be different from the last time. He walked to her side at the bar. He took the just-made drinks from her hands and set them down on the dark wood. He put his arms around her, and he could feel her hands, wet and cold from the ice, at the back of his neck. He held her until he had to catch his breath, and then he kissed her eyes and her mouth and her ears and the base of her throat.

"You're ruining me," she said finally.

"I'll be on an airplane in eleven hours," he said, as if in explanation.

"That's time enough."

"It's no time at all."

"At least we can have our drinks. And why don't you admire my dress? I dressed very carefully for you, dar

"Okay," he said. "I'm admiring.

"The question is, should we offer it to the government or keep it exclusively as a box-top premium?"

COLLIER'S — HOWARD SPARBER

Youngstown Kitchens of white-enameled steel fit every kitchen plan—old home or new. You'll marvel at the low price!

eam kitchens cost less than you'd think

48" twin-bowl Kitchenaider—a kitchen ainboard is sliding-removable. Second leep—11". Sink top of acid-resisting por-el. Doors and drawers sound-deadened. greater utility with the new Mullinaider, aste-disposer unit. Optional equipment henaiders. Safe! Sanitary! Space-saving!

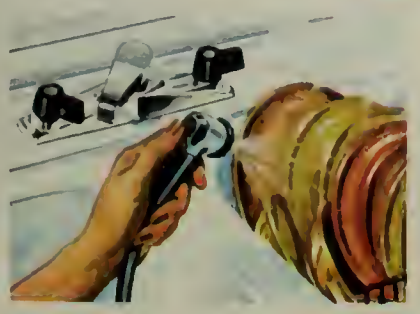
LOVELY, these Youngstown Kitchens.

But there's more to admire than their gleaming, efficient beauty. Just wait until you see the price!

The kitchen illustrated gives you an idea of what you can do with Youngstown Kitchenaider cabinet sinks, base and wall cabinets and accessories.

The 66" twin-bowl Kitchenaider speeds kitchen chores from food preparation to dishwashing. Like loads of work surfaces? You'll have them. How about storage space? Swing open the cabinet doors—open the smooth-sliding drawers. Indeed, here's a kitchen that only the leader, Youngstown, could build.

Best of all, this Youngstown Kitchen costs only about $16.00 a month (complete installation)—financing through dealer or bank. Others are equally low.



Your Youngstown dealer is the man with kitchen ideas—get acquainted! If you're building, specify a Youngstown Kitchen.

MRS. O'BRIEN HOLDS THAT TIGER

Continued from page 29

examinations in 1927. The people next door had to call the police to stop the noise. Do you think he'd let a Princeton man take a girl away from him? And another thing. Do you know Mr. Drayton's mother?"

"Now wait a minute," I said. "I know she's got money, but don't you think she'd be a little bit old for me?"

"Awful," said Mrs. O'Brien. "Really awful. Gracie Allen with two million bucks. She doesn't let that boy of hers alone for a second. The two of them were in and out of here for a whole month before college opened last fall. Picking out new draperies for William's room. Getting new slip covers for William's furniture.

"The slip covers I had on there were good enough the year before for a son of a Morgan partner and good enough the year before that for a man whose family breeds the best hunting horses in Virginia. But they weren't good enough for Mrs. Drayton's dear child William. She calls him up long-distance from Pittsburgh three times a week, mind you, to make sure he wears his glasses when he reads. I wouldn't be surprised if she— Oh, how do you do, Mr. Drayton."

I turned to see the dear child William himself climbing the porch steps with a green bag full of books slung over his shoulder. I hoped he wouldn't notice that I was blushing slightly. But his mind seemed miles away, or at least a half mile up the street, where Emily Adams lived. He smiled at us vaguely and went on into the house.

MRS. O'BRIEN listened to his footsteps reaching the first landing on the stairs and then allowed him time to get to his destination on the third floor.

"Did he hear me, do you suppose?" she asked. "Anyway, as I was saying, even if I didn't have Mr. Lydecker's interest at heart, because Mr. Lydecker is a Yale man, I would hate to see a nice girl like Emily Adams tied up with that Drayton woman's son. Why, that Mrs. Drayton will be calling on them every morning before breakfast to make sure his eggs are boiled exactly three and a half minutes."

"For two million dollars," I said, "I'd be glad to let my mother-in-law time the eggs. I'd even buy her a stop watch."

"Ah, two million dollars," Mrs. O'Brien snorted. "Her two million dollars hasn't got her into society and, believe me, she's breaking her neck trying to get in there. Social climber. You know why she picked this house for her son to live in? I had a Yale man from Pittsburgh here two years ago. You'd know him if I could only think of his name. His family is real society out there."

"Billy Conn?" I asked.

"No, one of the big steel families. The kind of people Mrs. Drayton wants to know in Pittsburgh and doesn't. Well, she told me her William just had to live here because that Yale man lived here. She wanted to go back to Pittsburgh and tell everybody her son was living in the same house in Cambridge that so-and-so had lived in."

"You won't ever have that trouble with the mothers in my town," I said. "If you didn't like Mrs. Drayton, why didn't you tell her you had no vacancies?"

"Well," said Mrs. O'Brien. "I happened to need some ready cash that day. And she offered to pay six months' rent in advancce. What could I do?"

I stood up and reached for my books. "This is all very fascinating," I said, "but it is now four forty and I have a date to play squash at five."

Mrs. O'Brien was hurt by my lack of sympathy. "By the way," she said. "Is Mr. Lydecker upstairs or is he still at the library?"

"He must be upstairs," I said. "I can hear his phonograph. But he can't do you any good. I happen to know he has only one dollar and seventy cents to his name."

Mrs. O'Brien frowned. Then she caught herself and made out as though she was shocked. "Mr. Robbins," she said, "do you think I'd be so coldhearted as to ask Mr. Lydecker for a loan at a time like this? He must be on the verge of a nervous prostration worrying about Mr. Drayton and that Adams girl." . . .

While I kicked off my shoes and unbuttoned my shirt, I inspected our room for evidence of prostration but I didn't notice any. My roommate, Jerome, the rejected lover, did not seem to be acting like one of the male members of the cast of John's Other Wife. He was doing exactly the same thing he had done between four and five every afternoon of the eight months I had roomed with him at Harvard Law School and every afternoon of the two years I had roomed with him before that at Yale College: He was sitting on the edge of a chair with his chin on his fists, listening to his collection of ancient and well-worn jazz records.

There was, however, one significant change in the normal routine. Instead of favoring Fats Waller and the Benny Goodman Quartet as he usually did, Jerome was repeating over and over again the plaintive strains of Bunny Berigan's I Can't Get Started With You.

"How are you standing the strain?" I asked.

He was too lost in the music to hear me. A few moments later when I was struggling into my sweat shirt, he had to get up and change the needle so I tried again.

"Is it true that you are threa sabotage the escalators in Bill department store in Pittsburgh tinues to date Emily Adams?"

Jerome was a man of few w fact, the conversation he did pr rare occasions sounded like a tr tic cablegram. Now he delivered him was an oration.

"Hoped that girl and I were an understanding," he said. " she goes out with Drayton on as well as Saturdays. How ca pete against that kind of an aut And that kind of spending mor

distance for Drayton," I told rien.

d my mouth to yell upstairs for I found no noise coming out ny mouth was being covered somebody's hand. I realized dy was in the hallway but Mrs. nd myself so the hand must nged to her. Then it went away ed and saw Mrs. O'Brien with er at her ear, talking calmly elephone.

you, Mrs. Drayton?" she was Mr. Drayton says he'll be down minutes. I imagine he's dress-

e must have been a study in . Mrs. O'Brien glanced at me d. I started to say something aved at me to be quiet.

r. Drayton looks much better," ying into the telephone. "More is face and he seems more en- es, I think he's taking those ou sent him. But maybe this nce has something to do with y heavens, Mrs. Drayton, I u knew all about it!"

Brien turned to me, nodded at er and rolled her eyes.

ood Lord, Mrs. Drayton, don't on to Mr. Drayton that I said o you about it because, if you ever speak to me again. Yes, sachusetts girl. And not just ry Massachusetts girl, mind n Adams girl."

Brien paused with a smile of and listened to an excited chatter. Evidently, she had mething in Pittsburgh.

at's right," Mrs. O'Brien said. *he* Adamses. Same family as cy Adams and Henry Adams. town here is talking about it. read that book, The Proper s? Well, you can imagine how l it is for an Adams girl, a girl est family in Boston society, to e with a man from Pittsburgh. It's simply unheard of. Her kind of people think you folks in Pittsburgh are still shooting Indians. Mrs. Drayton, I mustn't say another word now because I hear Mr. Drayton coming downstairs. Now remember, for Heaven's sake, don't tell him I told you."

Holding her hand carefully over the mouthpiece, Mrs. O'Brien bellowed, "Mis-ter Dray-ton! Tel-a-phone!"

There was a muffled response from the third floor and then the sound of descending footsteps.

"I think it's your mother," Mrs. O'Brien added sweetly, as if she didn't quite know for sure.

TWO mornings later I found Drayton looking over my shoulder while I was inspecting the mail on the front-hall table. I did him the honor of inviting him to walk with me to our nine-o'clock class, but he said he was cutting classes that morning. He had to drive to the airport to meet Mother, who was coming on from Pittsburgh for a short visit.

I don't know what was Mother's idea of a short visit, because it must have been ten days later when Jerome mentioned that Emily Adams was more inaccessible than ever. "Not one but two Draytons battling me now," he said. "When she's not having dinner with him, she's having tea with his mother. Nights he studies, his mother takes Emily to theater. Looks like Mama is making sure nobody else gets near her."

I passed this intelligence along to Mrs. O'Brien the next time I found her alone on the front porch.

"I don't know what you're trying to do," I said, "but it seems to me you've committed a tactical error. I might even go so far as to say it seems to me you've gummed things up properly."

Mrs. O'Brien appeared to be unperturbed. "That little talk I had on the telephone with Mr. Drayton's mother," she said. "Have you mentioned it to Mr. Lydecker or anybody else?"

I hadn't.

"Well, don't. Remember this old gray head is wiser and more experienced than yours, even though you are a Phi Beta Kappa. Just let Nature take its course."

The situation continued to look black for Jerome until one afternoon several days later when I came back from lunch and saw Emily Adams and a woman, who must have been Mrs. Drayton, sitting together outside our house in the front seat of Drayton's long red convertible. They must have been waiting for Drayton, who was probably upstairs changing into a fresh Tattersall vest. Mrs. Drayton was talking Emily's ear off and Emily was not enjoying it.

I knew Emily pretty well myself because she and Jerome, in the happier days, had tried to fix me up with one of her old classmates from Miss May's School. When Emily saw me, she leaned across Mrs. Drayton's lap and shouted, "Hello, Jack!"

It was one of the biggest hellos I had ever received from a good-looking girl in my entire career. But it had a frantic note in it, like the greeting somebody on a raft would give to a passing ship after going without food for twenty days.

I COULD see that Emily was dying for me to stop and engage in some small talk. But Mrs. Drayton glanced at me as though I was someone who had just been arrested for annoying women in a movie theater. So I merely smiled politely and said, "Hi, Emily," and turned into the front gate.

Jerome was at his desk, copying somebody's criminal-law notes. I asked if he had heard from Emily lately. He shook his head.

"I have a feeling you will soon," I said.

He took off his glasses and laid down his pen, full of interest. "Why?"

"Oh, nothing," I said. "Don't worry about it. Just let Nature take its course."

The very next night about eight o'clock the telephone rang and it was for Jerome. He came back up the stairs without touching a single step.

"Emily wants me to buy her a beer," he said.

Before I could summon an appropriate comment, he was gone. He returned at eleven thirty, looking radiant.

"Drayton's down the drain," he announced. "Too much mother. Emily said high-pressure and constant sales talk became unbearable. Emily feels same way about Princeton men now as Mrs. O'Brien does." . . .

The next morning was warm and sunny and I found Mrs. O'Brien among the forsythia bushes behind the front fence. She was thinning the lower branches with a pair of rusty shears.

"I see where Princeton got beat again," I said.

Mrs. O'Brien straightened up and paused to survey the result of her labor. She wiped her brow. "So I understand," she said. "Poor old Nassau. Hold that tiger!"

"Listen," I said. "I was asking Jerome last night about Emily Adams' ancestors. She is not a descendant of John Quincy Adams and she is not related to any of the Boston Adamses. Her grandfather was born in Scotland and he was running a livery stable in Toledo when her father was born. You knew that all along, didn't you?"

Mrs. O'Brien pointed at her disreputable-looking tomcat, who was rubbing his back against one of the forsythia bushes. He had had a bad night. One of his ears was torn and the white fur on his nose was chewed off, exposing the pink flesh.

"Look at the red nose on that cat," Mrs. O'Brien said. "Sometimes I think he must be a heavy drinker."

When I started to walk away, she called me back.

"By the way!" she said. "Have you got six dollars that you could spare until Monday?"

If I had it, I think I might have handed it to her.

How to Kill Two Birds

During the war, The Springs Cotton Mills was called upon to develop a special fabric for camouflage. It was used in the Pacific to conceal ammunition dumps and gun emplacements, but the Japanese learned to detect it because of its lack of jungle smells. To overcome this, when the fabric was dyed, it was also impregnated with a permanent odor of hibiscus, hydrangea, and old rubber boots. The deception was so successful that when Tokyo fell, the victorious invaders hung a piece of this fabric on a Japanese flagpole.

This process has been patented, and the fabric is now availa to the false bottom and bust bucket business as SPRINGM *PERKER*, made of combed yarns, 37″ wide, 152 x 68 appr mate count, weight about 3.30, the white with garde the pink with camellia, the blush with jasmine, and nude dusty.

If you want to achieve that careless look and avoid ska steam, kill two birds with one stone by getting a camoufla camisole with the SPRINGMAID label below your trademark.

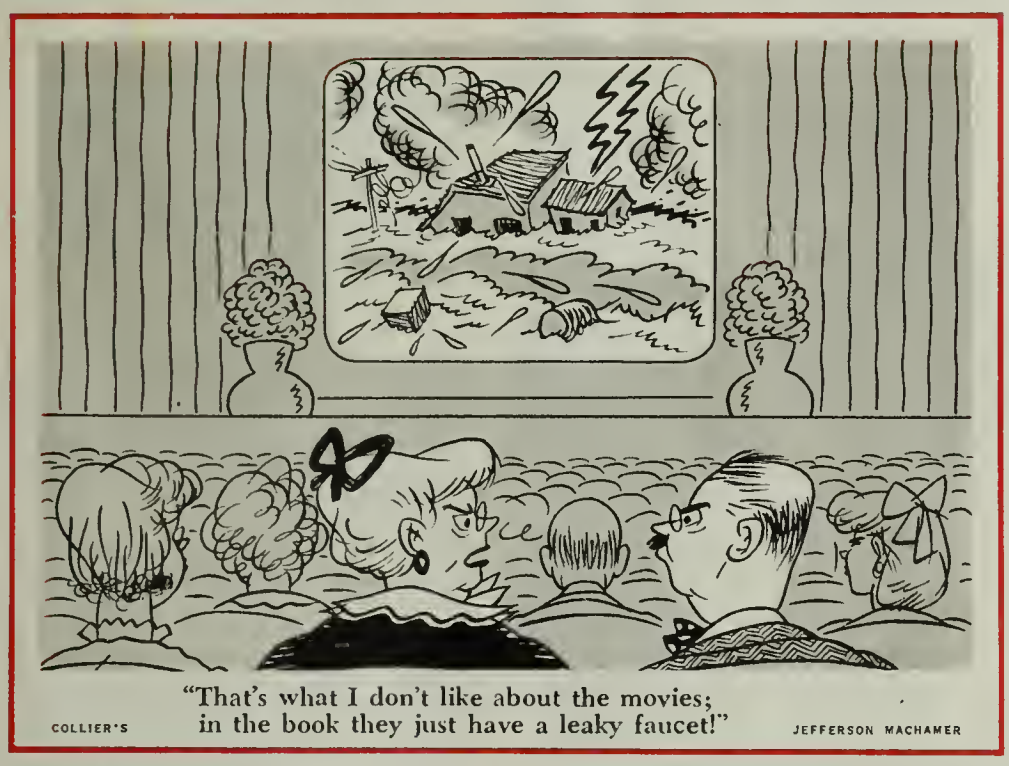
rney from Miami to North s made in a Pan American Boe- r. During the trip across the antic and after the arrival at a, Hopkins wrote some de- otes, as follows:

evening, January 11th, '43. We left Miami at 6:05 this nd landed here at 4:45 P.M. er two nights and a day on the Washington. Eleanor and rs. Roosevelt and Mrs. Hop- good night at the rear door. lways feel that the reason the wanted to meet Churchill in because he wanted to make He was tired of having other articularly myself, speak for d the world . . . He was sick of ling him that it was danger- e in airplanes. He liked the it. But above all, he wanted trip!



the President that the next ategic move should not be hout consultation with Stalin. lin refused the urgent invita- e President to meet with him- Churchill. The Russian front rgent. The next best thing eeting between Churchill, and their respective staffs. President wanted to meet in Churchill agreed . . . And we decide where we shall fight

esident was carried onto the morning in the dark—it taxied harbor and, long before sun- rise, took off with few people knowing the President was on his way to Africa. I sat with him, strapped in, as the plane rose from the water—and he acted like a sixteen-year-old, for he has done no flying since he was President. The trip was smooth, the President happy and interested. Dr. McIntire was worried about the President's bad heart—nothing happened—he slept for two hours after lunch . . .

The next notes were written by Hopkins during the flight from Belém, Brazil, to Bathurst, West Africa:

We had a leisurely breakfast with Admiral Oldendorf and General Pratt—the President still treats it as a first-class holiday—he told some of his old favorite stories and seemed to be in no hurry to get off though the Secret Service were having fits . . .

The ship took to the air beautifully and the ride all the way to Belém—we landed at 3:15 P.M.—was as smooth as

"That's what I don't like about the movies; in the book they just have a leaky faucet!"

COLLIER'S — JEFFERSON MACHAMER

glass. We flew, though, at about 9,000 feet and McIntire was quite disturbed about the President, who appeared to be very pale at times . . .

We drove to the Officers' Quarters (at Belém)—and were given a first-class rum drink—(I wangled two bottles and a cold turkey to take to Africa). Jonas Ingram who commands our operating fleet in the South Atlantic was there—a hearty, ribald, fighting admiral that suits me . . . We left at six, getting off just at dark.

Bathurst, West Africa. They serve cocktails on this flying boat—everybody was feeling pretty good so we had one before dinner last night. But everyone was dog-tired so we turned in early. The President slept late, his first night on an airplane, and woke up in the best of spirits . . .

We landed in this big harbor at the mouth of the Gambia River—an old slave post. The cruiser Memphis and one of our destroyers are in port. We took a trip around the harbor in a motor whaleboat. The President was hoisted to the deck and one of the men carrying him slipped as he stepped onto the cruiser and the President landed on his rear . . .

The final entry in these handwritten notes was made after the arrival at Casablanca.

We landed at the airport about 15 miles from Casablanca. The President's son Elliott was there to meet him. Much "hush-hush" and the President, Elliott and I were hustled into a car—the windows of which were blacked-out with mud to drive to our villa. It is a lovely, modern, California bungalow—part of a hotel—taken over by the Army . . .

Churchill has a house about fifty yards away. I went over to bring him back for a drink before dinner. He was in fine form but looked older. We walked back—and the three of us had a long talk over the military situation. The British Eighth Army is attacking tonight.

(NOTE: This was the attack at Buerat which led to the capture of Tripoli eight days later and the subsequent advance into Tunisia from the east.)

The Chiefs of Staff had been in session for three days prior to Roosevelt's arrival discussing various operations that might be launched after the final defeat of the Germans in Tunisia. The targets for attack which were considered included Sardinia, Sicily, Crete, Rhodes, the Dodecanese Islands and the mainland of Greece.

By Monday, January 18th, four days after Roosevelt's arrival, the Combined Chiefs of Staff had agreed on the decision to attack Sicily, and this proposed operation was given the code name HUSKY.

The purpose of the Casablanca Conference had been almost entirely military but Roosevelt and Churchill immediately became involved in the politics of the inescapable French situation. There had been another and even more violent outburst of criticism in the United States and Britain over the tendency to deal with the discredited men of Vichy. This criticism was all the more bitter because of the emphatic assurances given by Roosevelt in his "temporary expediency" statement.

Before Darlan's assassination, Robert Murphy had sent a message to the State Department saying that Darlan felt that Marcel Peyrouton would be of great help to him in the government of North Africa, since Peyrouton had a reputation as an able administrator in that area. Murphy therefore urged, in Darlan's behalf, that Peyrouton be given authorization and transportation to Algiers from Buenos Aires, where he was living in self-imposed exile.

Hull approved this, and arrangements were accordingly made in a routine manner and, as Roosevelt later stated, without his knowledge. Peyrouton went to Rio de Janeiro to await transportation by air to Africa and, early in January, press correspondents discovered his presence there and the probable reasons for it. The newspapers presented the unsavory details of Peyrouton's record as a particularly brutal Minister of the Interior in the Vichy government.

When Sumner Welles learned of Peyrouton's presence in Rio he gave orders for the cancellation of his further passage and when Hull learned of Welles' orders he overruled them, taking the position that the State Department should not assume responsibility for denying a request by Murphy which had been transmitted with the authority of General Eisenhower. (All cables out of North Africa were signed with Eisenhower's name.) So Peyrouton went on to Algiers, arriving there about the same time Roosevelt arrived at Casablanca. The outraged protests from the United States and Britain were plainly audible in the Villa "Dar es Saada."

On the first day of the Casablanca Conference, Roosevelt conferred with Churchill, Hopkins and Eisenhower. After the first of these meetings, Roosevelt remarked to Hopkins, "Ike seems jittery." Eisenhower had ample reason to seem jittery. He had been suffering from a bad cold pretty steadily since coming to North Africa, and he had been forced to take to his bed with severe grippe just before the assemblage of "top brass" was to descend on him at Casablanca, and he had found himself involved in a bewildering political mess for which he was so ill prepared. The fact that this was not his own fault did not alter his present responsibility for it.

Eisenhower's Side of the Story

However, he stated his case to the President and Prime Minister with courage and candor. He made no attempt to disguise his ignorance of European politics, having spent most of the prewar years in the Philippines. He said that when the name of Peyrouton was mentioned to him by Darlan and Murphy he had no idea who the man was and no knowledge of his background except that he had once been a successful official in Algiers, Tunisia and Morocco. Eisenhower felt that this appointment should be checked with the State Department which first said yes to it and then no and finally yes. (Eisenhower, of course, did not know that the no was from Welles and the final yes from Hull.)

It was on this occasion that Eisenhower made the previously quoted remark to Roosevelt that generals could make mistakes and be fired but that governments could not. He was entirely ready to take the rap for whatever went wrong.

For a time there was some doubt whether Eisenhower would remain in supreme command for HUSKY (Sicily invasion). General Alexander, who outranked him, was now moving into Tunisia from the south with the victorious British forces under the field command of General Montgomery. Here was tough professional competition for Eisenhower at a moment when his own position was most insecure, and I believe he would not have been greatly surprised if he had been put under Alexander or transferred elsewhere. However, he was given the supreme command and a fourth star, which made him equal in rank to his subordinates, Alexander, Cunningham and Tedder.

In announcing this later to the House of Commons, Churchill said, "I have great confidence in General Eisenhower. I regard him as one of the finest men I have ever met." What weighed most heavily with Churchill and Roosevelt in arriving at this decision, aside from Mar-

JUDGE GOLDSBOROUGH TAKES THE STAND

Continued from page 20

was Zearfoss, who caught for the New York Giants; Nichols, the Philadelphia Athletics' shortstop; Smoot, the great St. Louis center fielder; and pitcher Jack Townsend, the old Washington and Pittsburgh hurler. As captain of this awesome aggregation, Goldsborough was one of the first sought by the big-league scouts. But he decided to go to the University of Maryland Law School instead.

Here, the brilliant young Goldsborough hastened through the three-year course in two, and settled down to practice law in Denton, Maryland, the county seat. In 1903, he ran successfully for State's attorney for Caroline County. During his four-year term of office he cleaned up gambling in the county, eliminated the bootlegging of liquor, and handled his routine murder and robbery cases with efficiency and dispatch.

Gains Prestige as Trial Lawyer

When the young man retired to private practice in 1908, he became known as a top-notch trial lawyer all over the state. In one celebrated case, he set precedent before the U.S. Supreme Court by proving that a railroad section-gang cook named Alfred E. Smith was engaged in interstate commerce when the camp car in which he was working was hit by a freight engine near Easton, Maryland.

The Supreme Court supported Goldsborough's argument in its decision, saying, "The repair of bridges used in interstate commerce must be considered as being work in interstate commerce. The cook was employed by the defendant (the Pennsylvania Railroad) to assist the work of the carpenters by keeping their bed and board close to their place of work." This, the first affirmation of an important principle, was quite an achievement for a country lawyer.

The Goldsborough reputation became solidly cemented in 1914, when he became involved in one of the most sensational murder cases of that period. In Chestertown, Maryland, in December, 1913, two young Negro boys, James Paraway and Norman Mabel, admitted slugging a white man named James Coleman with a crowbar, for the purpose of relieving him of $30 he had flashed. Coleman died, and Circuit Judge William H. Adkins appointed Goldsborough to be one of the Negroes' public defenders. Goldsborough arrived just in time to help State's Attorney Harrison Vickers, Sheriff William E. Brown and a handful of deputies fight off a furious lynch mob. Goldsborough succeeded in moving the trial to Elkton, in near-by Cecil County.

There, Goldsborough turned in a defense still used as a classic in law textbooks. He emphasized the youth of the boys (Paraway was sixteen and Mabel eighteen), and he attacked the society which denied them any advantages or even medical treatment for the feeblemindedness they displayed. He proved that there was no premeditation. He proved that Paraway's mother had sold him in exchange for a pig, and that the boy had been working without wages ever since to pay off the debt. Some jurors wept. Instead of the gallows, Paraway and Mabel got sentences of life and 18 years respectively.

From then on, Goldsborough was the top defense attorney in his neck of the woods. In 1920 the local Democratic politicos induced him to run for Congress in Maryland's First Congressional District. He beat the Republican incumbent, William N. Andrews, and was reelected like clockwork until he became dean of the Maryland delegation in the House of Representatives.

When Goldsborough first reported to Democratic Minority Leader Claude Kitchin for committee assignments, Kitchin said to him, "Do you know that you're the only Democrat in the United States who defeated a Republican incumbent in the last election?" Goldsborough said no, he didn't. "Well," said Kitchin, "because of your triumph, I'm going to put you on the powerful Ways and Means Committee."

"No," said Goldsborough to the astounded Kitchin, "I'd rather be on Banking and Currency." And that's where he did most of his work. Every session for 13 sessions, he and Congressman Henry Steagall of Alabama introduced bills calling for a Federal Deposit Insurance Corporation, to protect the funds of bank depositors. Then, after the American people had lost millions of dollars in bank closings in 1932 and 1933, Goldsborough, in a slick parliamentary move, finally got his measure passed by refusing to let one of Senator Carter Glass' banking measures out of committee until that venerable legislator agreed to include Goldsborough's FDIC bill in it.

COLLIER'S "It won't be much of a confession. I'm innocent!" ROLAND COE

COLLIER'S "Where do you expect me to get this amount of cash on such short notice?"

Goldsborough first donned his judicial robes on April 5, 1939. The court on which he sits is the federal district court for the District of Columbia which, because of the complexities of life in the district, is the most unusual court in the country. Not only does it try violators of federal laws, as do all the other federal district courts, but it also does the work of a state court. State courts try such purely local crimes as murders, rapes, robberies, embezzlements, sluggings, divorces, etc. So, Judge Goldsborough (and his 11 associate justices) may pass on a great constitutional matter one week, and then spend the following week listening to the details of how a man beat up his mother-in-law.

Four Miles Walk Every Day

Such a schedule requires considerable mental and physical agility, and for a gentleman of seventy Judge Goldsborough carries it off well. He walks the two miles to his chambers every morning from his Connecticut Avenue apartment, arrives promptly at 8 A.M., has the juice of a lemon and a pint of milk for breakfast, and then puts in a full day until five fifteen, when he walks home again. He allows himself just one cigarette a day, and that is smoked with ceremony after breakfast.

Goldsborough probably is the only major judge in the country who does not write his opinions. He talks from scraps of paper. In his Congressional days, a reporter asked him for a copy of the two-hour speech he had just delivered: Goldsborough told him he never used written speeches: "They just get in my way."

When things are quiet in the courtroom, the judge is not averse to closing down a bit early and hastening over to watch his beloved Washington Senators in action. On rainy days or in winter, he hunts a Western movie instead, since Mrs. Goldsborough (an Eastern Shore girl whom he married in 1909) prefers more cultural pursuits of an evening. The Goldsboroughs have two married daughters, and a former Marine artillery officer son, currently an expert in the Department of Agriculture in Washington.

The judge feels deeply about having to rule against labor, which he always supported in Congress. In his most recent ruling against John L. Lewis, for example, he said, "No one could think any more strongly than the court that it would be a national calamity for the unions to be destroyed, or that anything should happen that would interfere with their effectiveness." But when Lewis persists in violating specific laws specifically, the judge, who is sworn to uphold the law, feels he must enforce th feels that Lewis and the railroad hoods put him on the spot by r their disputes from the realm controversy into the area where ernment can charge them with a national emergency.

"In these cases," he says, "tl of labor are absolutely of second sideration. It is ridiculous to sa order for a railroad worker t more wages, he has the right to the trains in the country. This to chaos and his own slavery, b ing the social structure of the n

The labor people call him a not because he enforces the laws cause he issues his injunctions before there actually *is* a nation gency, and before the union solidate its bargaining position.

This, however, is only a smal the big controversy over Goldsl The main argument revolves ar common-sense methods of de case, as in the child custody suit said, "I consider the welfare of to be the primary considerat something printed in a lawboo typifies the major controversy the American bench today. T side—led by Felix Frankfur Learned Hand—holds that " judge tempers his own opinion with a liberal study of precedent tire legal system will descend t

To this Judge Goldsborough "A judge can make up his mi way on a question, and then hav clerk dig up enough precedent t either decision."

He further says, "The only judge goes against his own co is where the letter of the law is that it is not subject to constr and that happens in relatively stances."

Today, it is difficult to say ho borough's concept of justice wi the widespread difference of le ion. All experts agree, however is a formidable antagonist: The has to work hard to counte borough's picturesque statemer judicial philosophy.

"Justice," he said in one of h decisions, "is like a hotel with trance for employees and a trance for guests. It is a strict ru employees not to use the front But then the hotel catches on fir side entrance is blocked. The e escape by the front entrance. it be ridiculous to say that the e broke the rules by going out door?"

THE HIGH COST OF COLLETTE

Continued from page 17

The huge face was impassive. "The other one is, though."

"The other one?" Dexter felt a vague sinking sensation. "Oh. The other one."

The large man said, "Conan Plascow, Mr. Lawson. House detective."

Tiny beads of perspiration started from Dexter's brow. The elevator door opened behind him, but he made no move to take it. "House detective? Oh. It's good to know we have such—such fine men guarding our life and property, eh?"

The pale eyes were fixed on his face. "We don't get much robberies here," Plascow said. "I consider the biggest part of my duties is protecting the moral reputation of this establishment."

"Now see here," Dexter said. He paused and dabbed a handkerchief at his brow. "I could just as easily phone up to Collette, couldn't I? It would save time."

"Sure," Plascow said. "Why not?" He walked with Dexter to the house phones, and waited while he asked Collette to meet him in the lobby. "It's an interesting situation," Plascow said as Dexter hung up.

"What is?"

"You and your wife and this other one, in the same apartment. The way I see it, it's like one of them old Greek tragedies you read. You know, where everybody is mixed up together."

"This is not a Greek tragedy," Dexter said in a loud voice. "Nobody is mixed up together. As a matter of fact, I sleep on the studio couch!"

Plascow's eyebrows rose slightly.

Dexter flushed. "Will you stop?" he said. "You're framing an innocent man. I'll report this to the management."

"They reported it to me," Plascow said. He nodded and ambled off. When Collette came down, Dexter took her arm and piloted her quickly to the street. He was conscious of Conan Plascow's eyes on him all the way. In a cab, Dexter leaned back and wiped his brow.

"You are *fatigué*, Dexter?" Collette said. She sighed. "It is like life, no?" Collette was tall and slender, with sharp, dark features and full red lips. Her attitude was one of dogged boredom. Her French was the product of one strenuous year in high school. While the rest of her education had largely evaporated, she had clung firmly to her French.

"Everything is set for tonight, Collette," Dexter said wearily. "After we are done shopping, I will take you to the Ritz-Halton. Charley Kendall will pick you up there. Okay?"

"*Bien entendu*, Dex," she said languidly. Her voice, unrecorded, did not have all the force it had in transcription, but it had power to spare. Her "*Bien entendu*" seemed to mean a good deal more than "of course."

"You will sell cologne by the ton," Dexter said fervently.

IT IS in the nature of a talent agent's work to perform many personal services not usual in other forms of salesmanship. Where the product to be sold is a living person, no detail about that person is beyond the scope of the alert agent's personal scrutiny.

In the lingerie section of Benson's Fifth Avenue, Dexter approached a matronly saleslady and said, firmly, "This lady wishes to fill a conspicuous lack."

"I beg your pardon?"

"Falsies," Dexter said.

"Oh," the saleslady said. "You mean gay deceivers."

"Great Christopher!" Dexter said. "All right, gay deceivers. Only not too gay. I'll wait."

He took a chair and rested his head in his hands. The role of the star maker, he thought bitterly, is not without hazard. The decision to equip Collette with falsies had come only after careful analysis. Charley Kendall had been sold by a voice. They couldn't risk unselling him by the vision of Collette. Dexter's head ached as he ran over the possibility of any last-minute angles. Then he looked up and saw Mary Alice. His wife was standing before him with a strange look on her face.

"Mary Alice!" Dexter shouted and leaped to his feet. "Darling—"

"What are you doing here, Dexter?" Her voice seemed to come from a great distance.

"Doing?" Dexter repeated. "Doing? Why, nothing!"

"You couldn't have picked a cozier spot," Mary Alice said. It was at that moment that Collette emerged from the fitting room.

"How do I look?" she said, striking a pose.

Mary Alice looked at her carefully. "Something new has been added," she said.

"*Bien entendu*," Collette murmured.

Dexter said, "Mary Alice, I know this is subject to misinterpretation, but—"

She wasn't listening. She beckoned to a salesgirl.

For the first time Dexter noticed something black and filmy hanging over his wife's arm.

"I've decided not to take this after all," Mary Alice said. "I don't think I'll have any immediate use for it."

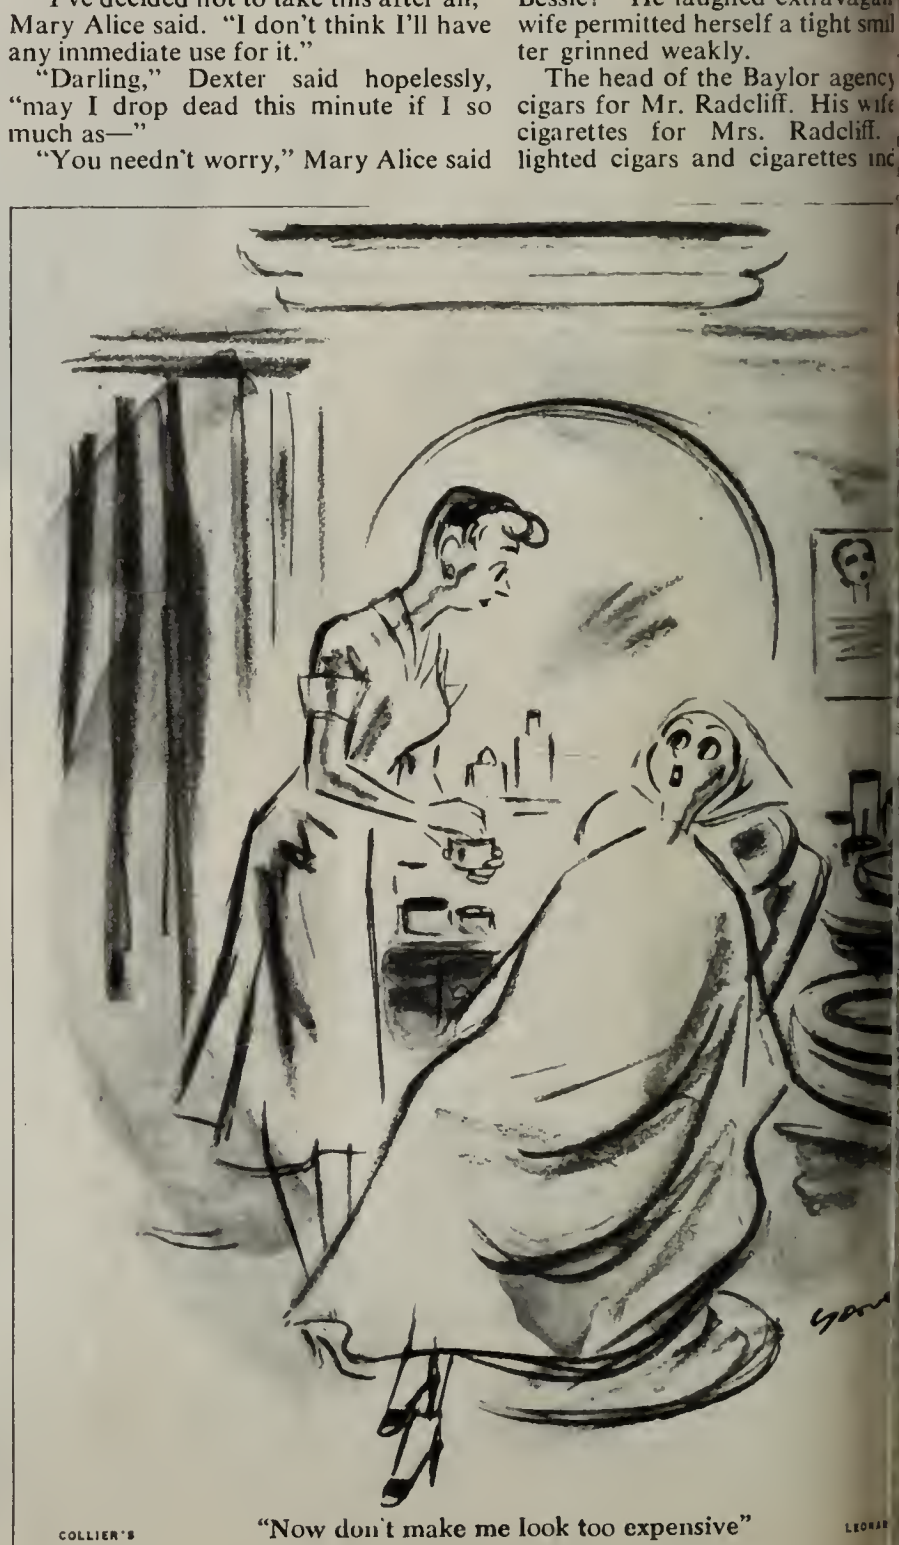
"Darling," Dexter said hopelessly, "may I drop dead this minute if I so much as—"

"You needn't worry," Mary Alice said coldly. "I'll go through with yo tonight. But after that, you're own." She turned and walked away.

Dexter sat down slowly and his head to his hands.

Collette sighed. She said, "It No?"

Dexter looked up. She was be rounded where she had not been "We will take the next larger s said dully. "What can we lose?"



COLLETTE and Charley had rived by nine o'clock. Th which Dexter saw as through darkly, was doing as well as coul pected. Mary Alice was a gracio ess, cool and charming. Dexter throughout the evening, that she eyes studiously away from him. to call on hidden reserves to force for his guests.

Mr. Radcliff, the sponsor, was lywood caricature of a sponsor. portly, bald, and aggressively jo wife was a thin, nervous lady wit like features and a stern eye.

"Our star, Collette, will be al little while," Dexter said, pass cocktails. "You will love her, M cliff."

"I wouldn't dare, Lawson. M my wife around," Mr. Radcliff sa Bessie?" He laughed extravagan wife permitted herself a tight smil ter grinned weakly.

"Conan Plascow again, Mr. Lawson," a voice said from above his head.

"Now see here," Dexter said.

"The management asked me to investigate further," he said. "Mind if I come in?"

"No!" Dexter said wildly. "Not now! I'm entertaining! She's not here!"

The front of the blue serge advanced.

Dexter planted his feet firmly. "You can't do this, Plascow!" he shouted. "You'll ruin me."

"You should have thought of that before you started in," Plascow said gently. "You got such a nice wife, too."

Dexter leaned against the blue serge and pushed. "Out!" he said. "Out!"

"Now take it easy," Plascow said.

A JOVIAL voice behind Dexter said, "My wife just gave me a wonderful idea, Lawson, when you have a minute."

Plascow said, "Mister, maybe you can give me some information."

"No!" Dexter yelled. Something inside him said, "What the hell!" He closed his eyes and swung. His fist landed solidly on the blue serge and kept on going until it ran into something hard.

Dexter remembered thinking: My God, I've gone clean through to his spine! Somewhere a voice was singing Twelfth Night ("You kissed me on the twelfth night, but I'd lost you in two weeks"). Then there was a bright flash, and everything blacked out. . . .

Mary Alice bailed him out early the following morning, and led him silently to Mike's Bistro, where she ordered him a double Scotch.

Dexter sipped the drink silently. A night in the city jail, for assault with intent to do bodily harm, had taken whatever starch was left out of him.

He downed his drink and waved for another. "It was kind of you to bail me out, Mary Alice," he said.

"That's all right," she said.

"All is lost," he said. "All."

"Next time you swing at somebody, don't pick odds of two to one," she said.

"Who's the two?"

"Conan Plascow. He pulverized you."

"I remember now."

Mike brought over his second drink and he stared at it glumly. "Collette?" he said.

"Married."

"How do you like that, hey?"

"Fine," she said. "Mr. Radcliff is buying The Sender."

"You mean—"

"His wife said so. She swooned during Crime and Punishment. She would have hated Collette."

"Yes, yes," Dexter said. "You did this for me, Mary Alice. Thank you." Mike came by and mopped their table. Dexter sighed.

"It's a shame, in a way," he said. "A voice like Collette's. Loaded. And she has to get married."

"It's a healthier outlet," his wife said.

Dexter said, "Mary Alice, I want you to know that, throughout, there was nothing between Collette and me."

"I know," she said. "I slept afternoons."

Dexter looked up. "Then you wouldn't —I mean, would you—No, I guess you wouldn't."

She smiled. "One thing I'm going to do," she said, "is to plug up that guest room. If I have to turn it into a nursery."

Dexter raised bloodshot, incredulous eyes. "But, darling—if I'm on the studio couch—I mean to say—"

She lowered her eyes and her face was pink. *"Bien entendu,"* she murmured.

PHILADELPHIA: CORRUPT AND NOT CONTENTED

Continued from page 15

treatment. When they were brought before him he discharged them in droves. In more serious offenses, where required by law to hold them for a higher court, he imposed instead a fine of, say, $100. Then after witnesses and prosecutor had left the courtroom he would, in direct violation of the law, secretly reduce the fine or let the offender go scot-free.

Not all Philadelphia judges are dishonest, but some who are not are strangely careless. Among the more odious local rackets was one involving the solicitation of advertising for the convention program of a so-called firemen's organization. It was a smooth deal, engineered by a notorious promoter who had a Better Business Bureau record dating back to 1921. He collected $34,292 in a year for a program never published, and he used for a mailing address and phone calls the City Hall offices of a respected municipal court judge.

Petty Crime in the Subway

Small crime thrives in Philadelphia like weeds in an untended cabbage patch. In the cavernous, ill-lighted subway system, a checkup showed 69 crimes in six months. Almost all of them were against lone women and most of them were committed practically under City Hall. Newspaper typesetters were constantly setting the same headlines: War on Crime, Crush Numbers Racket, New Crime Drive, Crime Crack-down, Cleanup Drive.

A typical crime drive is the seven years' war against the world's largest outdoor crap game on the Philadelphia docks. It once earned its operators $10,000 a month. This game rented out a soft-drink concession and ran an extension cord to a city lamppost for free electricity. On January 31, 1940, police started a concentrated effort to break it up. By July 13th, last year, 19 raids and 358 arrests later, police admitted that the racket had not yet been cleaned up.

To every rookie on the Philadelphia police force it must be apparent that "enterprise" pays off. Although illegal, business side lines are not uncommon. One cop has a jewelry business and carries a small case of samples with him while on duty. Another has contracted carpenter jobs. Another operates an automobile agency in a suburb, although recently he cautiously transferred title to his son. Still another serves as in his brother's saloon, even duty.

Most erring police enter mal avenues of trade, howev busy midtown corner one poli collected 25 cents from a store customer he permitted to park Other cops deal directly with sumer. All-day parking in sc hour central city zones can arranged for a flat $1 a week. Ot cop with ten or 15 such steady has a happier financial outlook

Some Philadelphia police a pecuniary considerations. Plea ciations and freedom from one tine are often preferred, like ceramics on city time to neigl children, chauffeuring the w prominent business executive ing the home of a local Phi judge, a personage worth the services of six policemen workir the clock in three shifts. Under the Schuylkill River four-track tunnel built fifteen for $6,500,000, to relieve con- fic. The tunnel has never been azing of the Chinese Wall, the s structure for railroad tracks the center of the city, has dically announced for more years. The Delaware River s built a generation ago with- approaches and stands today mental answer to the question: eless can you get?"

Polluted with Chemicals

t of Philadelphia, for 133 years st in the United States, is slip- lly with a postwar drop from fourth place. The water is gases and chemicals, and the hatter in it is bad for ships' s. Among the wastes sometimes to the river is a highly inflam- stance, a gas that is readily ig- burns upon the surfaces at paces. Some Philadelphians water; shipowners and captains

chine has kept Philadelphia te. Despite nation-wide skyrocketing property values, the city's assessed valuation dropped $700,000,- 000 between the depression of 1932 and the boom of 1948.

The hodgepodge of assessments is unbelievable. In some districts the poor have been soaked so heavily that assessments have been more than 150 per cent of sales prices, while higher-priced homes are assessed as low as 40 per cent of sales price.

Nor do all assessors make an effort, as required by law, to keep the assessments near actual value. One tenement assessed at $4,500 earns its owner $2,700 rents annually. In the 26th Ward a typical house assessed for $4,200 ten years ago sold for $3,250. Recently this house was resold for $8,600, but its assessment was unchanged. In the 35th Ward a check of 181 homes shows that ten years ago their assessment represented 97 per cent of their sales value. When resold recently the average assessment was only 54 per cent of sale price. Students of municipal government regard this as unsound.

Contented Philadelphians seldom live in the city; they reside and vote in lovely, well-run suburbs. The Philadelphians most concerned with the present state of the city are the vast and impotent middle class and the poor who are awed by power. They don't want any trouble.

But neither do they want a city where so many bars and restaurants are without adequate fire extinguishers; where cops shake down auto-parked spooners; where some of the county detectives are machine committeemen; where one hospital is so crowded with mental and tubercular patients who don't belong there that its facilities are limited by 40 per cent, while another hospital operates at only 10 to 30 per cent of capacity; where statistical evidence of crime is confused by records listing snatched purses and picked wallets as lost, and thug-beaten citizens as accidents; where an unheeded garbage scow sinks slowly into the Schuylkill; where an occasional fire inspector takes $10 to $65 to pass an oil or gasoline tank installation, and where some inspectors' agents of the Bureau of Buildings ask $5 to $50 to approve business signs.

They don't want city employees to hold two city jobs, as some do, and work at neither. They don't want to pay $153,000 a year unnecessarily because the council refuses to refund airport bonds. They don't want an annual $600,000 expenditure for police stations, unless they get a reasonable benefit from it.

The people of Philadelphia are not contented with these affairs. They have merely suffered them. How long they will continue to suffer is a question that not even the politicians can answer.

THE END

Always use COLGATE DENTAL CREAM after you eat and before every date

"How much money have you got to bet?" he asks, all business.

You do rapid mental calculation and tell him $10. Or $20. Or maybe $100. Whatever you tell him, Ben shakes his head in disappointment. It isn't enough.

"How do I know you've got any real money to bet?" he demands, once again the old, suspicious stranger. "Let's see how much money you've got on you."

You take out your wallet and Ben firmly removes it from your shaking hands. He starts taking the money out of the wallet bill by bill. You watch, hypnotized, for a minute, and then make a frantic effort to get the wallet back. Big Ben glares and threatens to call the whole deal off. He counts off two or three more bills. Then you grab the wallet with such desperation that he lets go of it. Big Ben then hands back the money with a nice flourish.

"One hundred and ten dollars," he says clearly. "Bet it all on Number Five to win. I'll see you here after the race is won. The syndicate's commission on all bets is 20 per cent."

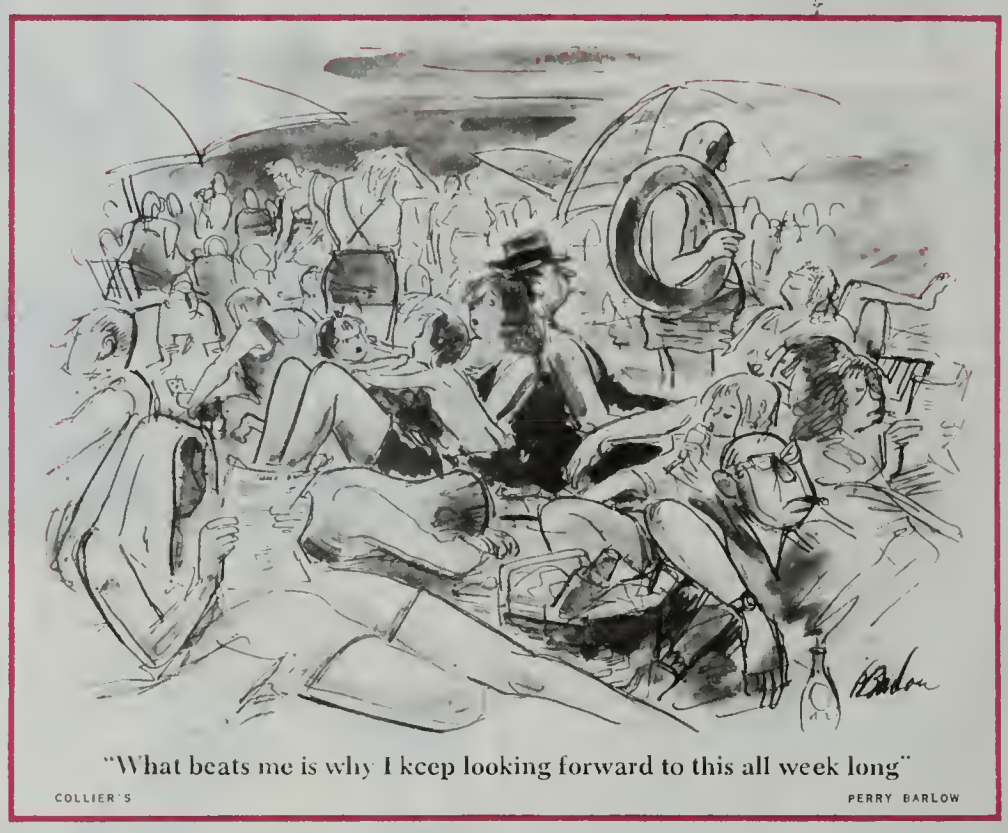
You clutch your Number Five tickets in a moist hand and stagger out to watch the race.

If Number Five does win, Big Ben has got you. Solid. You're convinced that he knows all about racing. He's the guy with the inside dope. He's the guy that won you the money. He's your pal. He admits it. But he firmly refuses (after taking the commission for his big syndicate) to give you the winner of the next race unless you make a *really* big bet.

This time you must make a really *big* bet because the next race is—Shhhhhh!—the next race is fixed. It's the Jockey Ring race. All the jocks are in on it. But if you're going to go along with Ben as your partner you've got to act like a partner. Half of your big bet on this sure winner has got to be for Ben. You've got to give him the tickets *before* the race. Because Ben has to collect the money and pay off all the crooked riders.

That's the story you get from Ben if Number Five, the horse he gave you first, was a winner. If Number Five lost, even if it ran last, you may still go along with Ben on the next race. Because by the time Ben gets through explaining things to you, when you come back to him furious and accusing, it's even money that you'll be back in his clutches. This maneuver is known in touting as "cooling 'em out."

How to Deal With a Sore Loser



"The first thing you do with a sore loser," explains one veteran double hustler, "is start hollering louder than he does. No matter what he lost, the hustler claims he lost ten times as much. He explains the race briefly but in detail, telling just where the horse slipped his stifle and stepped on his fetlock and finally got caught in an air pocket. The tout throws in a lot of other nonsensical horsy talk. All the while he is sliding in hints that the syndicate isn't worried. The syndicate will get even on the sure thing coming up, the big bet of the day, and so on. By the time a first-class double hustler is through with an egg who's a loser the egg is about ready to apologize for causing so much trouble."

While the great percentage of fleeced eggs accept their swindling with silent fortitude—"They stand still for anything," as the touts say—there is, every now and then, an anguished and bleating complaint from some sucker who can't be cooled out.

These stubborn complainants invariably storm into some track official's office and blame all their earthly troubles on the management. Even if the track operators aren't actually involved then, they're still to blame for allowing such burglary. Such squawks and accusations embarrass and frighten track operators.

Thus, the tracks do their best to harry and chivy the double hustlers. For almost as long as anybody can remember the harrying of track touts has been the sole chore of a special section of private detectives of the Pinkerton Agency. For years the headman of the Pinkerton track detail was Edward Grogan (recently transferred to other duties) a veteran Pink who knows more about touts than anybody else in the world.

Grogan is a small, unassuming man who looks somewhat like Barry Fitzgerald and has a photographic memory for faces and dates which is fairly unbelievable. For years he and his men have been nabbing double hustlers day in and day out.

"What beats me is why I keep looking forward to this all week long"

COLLIER'S PERRY BARLOW

There is one small faction of race-track touts for whom even the double hustlers have little but amused contempt. These are known as The Buttonholers. They are *personae* of such complete *non gratae* that they don't dare to sneak into the tracks. Instead, they stay outside and beckon at horse players through the wire fences. If anybody just comes close enough to hear what they're whispering about, the tout gets two fingers through the wire and grabs on to a lapel or shirt collar—i.e., buttonholing—while he tells The Story.

The double hustlers feel that buttonholing is very undignified.

If the double hustlers and the other race-trackers are overendowed with gall and brazen effrontery, the linesmen are scarcely the timid souls of the touting trade. The linesmen, remember, are the boys who work away from the track by telephone and personal interview. Their customers are off-the-track bettors.

The good linesman realizes that the more doorbells he rings the more business he'll get. Once you have made your first bet with him, your name is on a sucker list that will cost you annoyance and, possibly, considerable cash for years to come.

If a linesman tout wins for a new egg he immediately starts what is known to the trade as "playing the uppers." Playing the uppers is comparable to what Big Ben did to you when you won that first bet. Remember? Ben wouldn't let you in on the "fixed" race unless you promised to bet a fairly frightening amount of money. The linesman's technique is the same.

The linesman tout, using the names of famous jockeys he has no possible connection with, usually works as follows:

You are sitting in your office and wishing, rather wistfully, that you could have another run of luck like you had out at Belmont last fall. It would be nice if you could pick up a couple hundred dollars for the wife's . . .

The telephone rings.

"Hello, Mr. Jones," says a breezy voice. "This is Bill Dokes." Pause, while you try to place the name. "Bill Dokes," comes the voice, breezier than ever. "Ted Atkinson's partner. Remember?" You don't.

Mr. Dokes is sorry but he must have made a mistake. Ted Atkinson, the famous jockey, he says, told him to call Mr. J. Jones of the kitchen equipment business in your city. Just a mistake. Sorry.

But, you say quickly, you *are* Mr. J. Jones of said city and said business. What did Teddy Atkinson want? Oh, no, it's not to be that easy. Mr. Dokes explains crisply that Atkinson has a highly confidential piece of information for Mr Jones. A short pause. Are you *sure* you're not the right Mr. Jones?

You're sure, all right, but you're also sure that you'd sure like to know what Ted Atkinson, the famous jockey, has on his mind. From here on in, the telephone technique varies slightly. Perhaps you are led into—or insist upon—making an admission that you sometimes take a flier on the races. Mr. Dokes at this point seems half convinced that you must be the right Jones. Finally Mr. Dokes decides he'll have to talk with Ted again. If Ted says okay, he'll make a personal appointment with you.

In due time the breezy voice phones again and makes an appointment. When he arrives, Mr. Dokes may bring the electrified saddle. He may arrive with the Saddle Cloth Story. He may offer the Radar Wire setup. Or he may bring some other story that sounds much more plausible.

Now, how do you know Mr. Dokes is really from Ted Atkinson? You don't, but you're going to find out soon enough. Mr. Dokes tells you Atkinson is busy riding at a race track in a near-by city or a distant city. But you are to call Atkinson at his hotel room at such and such a time.

Now, should you be cute eno

subject up to gambling amazing sums of money. Linesmen insist that there are countless instances of eggs who started with $5 bets, were built up to $1,000 bets, and finally worked out until they had nothing to bet at all.

There is a police record of one case in which a Chicago furrier bet $100 and won $380. The $380 was pyramided to $1,000, went up and down for a while, and then another win upped the furrier's profit to $2,500. The linesmen "worked" the furrier into betting the $2,500 on a horse appropriately named Hoodlum. Hoodlum won. The furrier now was $28,000 ahead. He was directed to bet his entire $28,000 on Grand Love. This horse won and the furrier's total profit was now $305,000.

Not bad, running $100 up to $305,000. But the touts disappeared and took all the money with them. The furrier went to the police.

The writer recently asked a psychiatrist why horse players behave in the silly way they do.

"Don't come in here with your stories about horse races," this psychiatrist shouted. "Just a few months ago I got a phone call from a man who said he was a friend of one of my patients, a nervous case who gambles heavily. He talked me into betting $5 on a horse. Within two weeks I was betting $100 a race and he finally worked me up to a $1,000 bet. The whole thing cost me over $2,500 and every time I think of it I lie down on a couch in the dark and probe my own brains, if any."

When the psychiatrist cooled out a little he supplied some details which indicated that he had been in the hands of a reasonably honest tout. This tout had started him on a winning streak, and once the doc was a well-done egg, the tout called on him in person and laid $100 on the doctor's desk.

"I'm going to give you the name of a horse," the tout said straightforwardly, "and you can bet whatever you want on it. But if you take my information you must also take this $100, add $100 more to it, and bet $200 in all for me. After the race you give me back my original $100 and the winnings on the $200 bet."

Touts Sometimes Lose, Too

Strangely enough, there is no catch to this. It is the system usually used by touts who have an authentic connection with some stable, trainer or jockey. If their tip loses, the sucker loses his money, including what he bet to match the tout's "insurance deposit." But the tout loses his money, too. The only advantage the method has is that it makes the egg much easier to cool out. It shows sincerity.

It is only fair to add that there actually are touts who do have good connections with racing stables and with jockeys. So the tout sometimes does have good information. Better information, at least, than you could get yourself. Sometimes. More often the touter is just stabbing.

At this point it is appropriate to examine the premise and possibilities of "fixed" races. Although it is impossible to convince habitual horse bettors that 99 per cent of racing is honest the touts are, strangely enough, the first to admit it. In this matter the touts and the race-track authorities find themselves in complete agreement.

There have been crooked races. Racing history lists some and indicates still more. Numerous cases of stimulation of race horses have resulted in official action. There have been other visible instances of favorites being pulled or purposely prevented from winning. In a sense, each of these races was a fixed race. Not even the touts deny it.

But the touts deal in races which are supposedly fixed so that a certain horse will assuredly beat all the other horses in the race. This, the touts will admit privately and somewhat perversely, simply cannot be done with any assurance.

Of the three types of touts, the tipping offices are without doubt the most businesslike. Not more honest, just more businesslike. To run a tipping office the tout must have a legitimate mailing address. Worse, since he has an address, it is also necessary to pay the telephone and telegraph bills. This hurts, but there's no way out.

You've seen the tipping-office advertisements. They are usually headlined in bold black type with the words WON! WON! WON! and are followed with the names of long shots who scampered home yesterday just as the tipping office predicted they would.

The tipping offices don't want much, if you read their ads. Just send 25 cents and they'll send you their list of horses which are sure winners next time out.

So you send in the quarter and, sure enough, back comes a pamphlet which gives you the inside information that Old Naggy should win next out. If you knew how to read the workout times in the Morning Telegraph, the Racing Form or any other legitimate racing paper you'd already know that Old Naggy is training nicely. But if you knew how to read the legit racing papers you wouldn't send a tipping office your quarter. That makes you an egg right away.

So you read about Old Naggy and you read the rest of the tipping-office pamphlet. The pamphlet is full of columns under names like The Unknown Clocker and Our Own Patrol Judge. These columns have a lot of vague patter about killings and sure things and big fixes coming up. By some strange coincidence, there is always a big ad right near to these fascinating articles. The big ad suggests that any reader who wants to get in on a real killing better send in $1 for the Weekly Special. The weekly special is coming up soon. Better hurry.

So you send in a buck. You get several weekly specials. And with them you get the advice that you'd better not get left out on the terrific special special which is coming up. Just send in $5. When any of the specials lose, the tipping office literature is full of excuses and explanations. The "cooling 'em out" maneuver can be handled by mail almost as well as personally.

Preparing this article, the writer set out to call on the operators of twenty advertised New York tipping offices. All but three proved to be nonresident renters of a mailing address with stenographic firms or desk-space agencies. Of the three "turf advisers" who could be found in their offices, two were old tout teams wise enough to talk big but offer no direct information to an unknown stranger. The third was just as uncommunicative, but somewhat fu

u coming out?" Steve bel- he stairs.

"If you don't turn that water on again you'll be sorry!"

Steve came out on the porch. He was wearing a bathrobe over pajamas. There was a wide, pleased grin on his face. "More than one way to skin a cat."

"And people clear to Portland have just heard about it," the commodore said dryly. "Did you turn the hot water on again?"

"No, I want her out of there."

"You'll probably regret it."

Steve chuckled. "This is my inning. She'll be cooled off."

"Oh, she will, will she?" an anything but cooled-off voice demanded.

Steve turned in time to see the screen door open to a kick from within. A small, bare foot had done the kicking. Doris stood there, a dressing gown clinging to her wet body. In her hands she held a bucket.

"Hey!" Steve cried in warning. "Take it easy with that—"

"You take it!"

Steve gasped as he was drenched with cold water. The next instant the empty bucket hurtled by his head. Steve made a grab for Doris but she had closed the door and latched it. Steve glared at her through the screen.

"You might have broken my head with that bucket!" he shouted angrily.

Doris sniffed. "When better buckets are made they still wouldn't hurt that head. And don't think you'll get a warm shower until you crawl."

The commodore closed his eyes wearily. They were still at it from the night before. The commodore supposed that in a way he had started it. But all the commodore had actually said was wouldn't they like to drop over to the yacht-club dance for a while. The commodore wanted to be alone to brood over Cornelius Riggs' letter. Doris had murmured that it would be nice but Steve would probably think it was something like taking his sister.

"Oh, I guess I can take a hint," Steve had said, amiably enough.

"When it's beaten in with brass knuckles," Doris had replied.

"Yeah?" Steve growled, bristling a little. "Well, you might be asked oftener if you'd leave those brass knuckles off once in a while."

The dress in which Doris had reappeared a little later offered no place of concealment for brass knuckles. It was a pale blue, off-the-shoulder affair which contrived a demure effect without losing a single curve of the slim body in it. It was a dress which demanded an appreciative comment. It was unfortunate that the best Steve could do was to say, "You're apt to catch cold, aren't you?"

The commodore had sensed this as being complimentary in some obscure way but Doris' smile had chilled right then and there. She had said, with dripping sweetness, "Perhaps I'll find someone to keep me warm."

AT BREAKFAST the commodore tried to make believe that none of this had happened. He tried to make conversation. "How was the dance?" he asked.

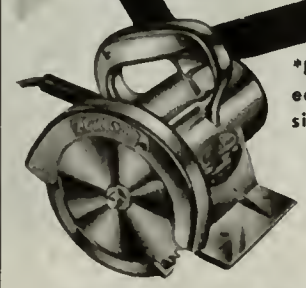
There was malice in Doris' smile. "I had a lovely time. I wouldn't know about Steve. He was busy picking wall flowers."

"Is that so?" Steve said. "Celeste—"

"Celeste!" Doris sniffed. "Means heavenly body. Too bad whoever named that one couldn't have known that she would grow up with ribs sticking out like a beached wreck."

Steve flushed angrily. "Well, it was better than the cold shoulder you were giving me."

Doris smiled. "Was it cold? No one



America's Most Useful* Hobby Tools

¼" HOBBYIST MALLDRILL $22.50 In U.S.A.

Now Available for Home and Farm

*Each of these high quality tools can be quickly and easily converted to a number of other handy tools by simply interchanging attachments.

Steve grunted. "Okay. I won't say anything, only I don't get many chances like this."

"There's too much at stake," the commodore said urgently. "You know what Doris can be like at times."

"Amen," Steve said solemnly. "But one of these days I'm going to batten down her ears—you see if I don't."

"Any time, my boy, any time," the commodore said. "After Harlequin is delivered."

HALFWAY through supper that night Doris looked across the table at Steve and said, "All right, is it a military secret?"

"Huh? Is what a military secret?"

"What that woman thinks about Harlequin."

"Oh. Well, she didn't say."

"All day she didn't say?"

"That's right. Lila—"

"Lila?"

"Well, that's what she told me to call her."

Doris was silent for a moment. Then she said, softly, "How chummy! The only thing she said all day was, 'Call me Lila'?"

Nervously the commodore watched the color climb Steve's neck. Steve put down his fork and looked steadily across the table at Doris. "Look," he growled, "you wanna fight?"

Doris tossed her head disdainfully. "With you? I couldn't be bothered."

The commodore was not in the least reassured, but during the ensuing week he almost forgot about Doris. At the end of each day's sail all Steve reported was that Lila Riggs had been noncommittal about Harlequin and wanted to go out again the next day. Doris heard these reports without comment. The commodore heard them with increasing concern. Was Lila Riggs' decision going to be based on some feminine whim after all?

It was on the seventh day that the commodore was sitting on the veranda thoughtfully watching Harlequin through field glasses. The cutter was far out beyond the harbor. So far as the commodore could tell she was performing beautifully in a stiff breeze. The commodore lowered his glasses, frowned and then sighed. What in the blazes did that girl want a boat to do? At that moment Doris spoke and voiced the commodore's thoughts quite precisely.

"Seven consecutive days they've been out sailing," Doris muttered. "Nobody needs all that time to find out about a boat."

The commodore considered the person of his niece stretched out on the porch hammock. She was wearing shorts and a halter and the commodore thought that if she would only get that sulky look off her face she would be quite irresistible to anyone, including, possibly, even Steve.

"My dear, what is there for him to say? Miss Riggs just seems hard to please."

Doris snorted. "There's only one thing that will please that she-wolf." She said venomously, "That's to get Steve along with Harlequin."

The commodore shook his head. "There is something more to all this than meets the eye," he said.

"In the clothes that woman wears there's practically nothing that doesn't meet the eye," Doris snapped. "I've watched them go out and come in through those glasses. You don't think she's hanging her damn' legs out in the breeze just to get goose flesh, do you?"

"But she's only known Steve for a week."

Doris flared. "How long do you think it takes a girl to make up her mind?"

The commodore did not reply immediately. But he looked steadily at Doris. Then he asked, quietly, "Well, just how long *does* it take?"

Doris regarded the commodore for a moment with widening eyes. Then, suddenly, she flung herself down on the hammock and began beating the cushions with furious little fists. "Damn damn, damn!" she squealed. "He can't do this to me! I'll tear the stubborn brute's ears off!"

Remembering what Steve had so recently said about her ears the commodore shivered. "Please!" he said fervently. "Not until we get Harlequin off our hands."

"To blazes with Harlequin!" Doris stormed.

The commodore raised his eyes and murmured, "Dear Lord!" The fat was

in the fire for fair now and there was no telling what might happen. . . .

Aboard Harlequin at that very moment, Steve was looking at Lila Riggs without particularly noticing how attractive she was in a playsuit that was indeed more revealing than concealing.

Lila, at the tiller, caught Steve's glance. She smiled. "Penny for your thoughts, Steve."

"They're for free. I'm asking myself just what more you want this boat to do. She's done everything but sail underwater."

Lila's smile became impish. "Don't you like to go sailing with me?"

Steve regarded her uncertainly. "I don't know just what that's got to do with it. I'm just trying to show you that Harlequin is all the boat your father ordered. The point is, we're building other boats and I've got to get back on the job."

"Oh, you're all alike!" Lila said. "Men! You seem to think girls should be perfectly content with any old odd moments you can conveniently spare from your jobs."

Alarm came into Steve's eyes. "Hey! We were talking about boats!"

"Well, good for us." Lila said crisply. "Let's keep right on talking about them—and sailing them."

Steve swallowed. "Look, we could sail around the world and you wouldn't know any more about Harlequin than you do right now. This is my last day. Tomorrow I'm going to Portland to see about rigging for some other boats."

"What time will you be back?"

"Too late to go sailing," Steve said quickly. "The wind would die just as we got out a way."

"The auxiliary would bring us in."

Steve felt the need of mopping his brow. "I can't do it."

The same mulish look he had seen so often in Doris' eyes came into Lila's. "Tomorrow," she said sweetly, "you will not only go sailing with me as soon as you come back from Portland but in the evening you will take me to the yacht-club dance."

Steve stared at her. "Listen, Lila, I—"

"Lamb, do you want father's cheek for Harlequin?"

Steve felt the tiny beads of perspiration gather on his brow. "Let's have this straight," he growled. "What is this?"

But Lila merely smiled. "Relax, Steve. You can always save the last bullet for yourself."

TOWARD the middle of the forenoon the next day, a tall, well-dressed young man entered the outer office of the Dinsmore Yacht Works. Doris was there alone, absently doodling on a pad of paper. The doodle suggested a man being torn apart between two horses. The expression on Doris' face was as taut as the ropes stretching the man between the horses. So it had come to the point where Lila could make him go right out sailing in the late afternoon after a trip to Portland and back and then take her to a dance in the evening, had it? The point of the pencil snapped, and Doris became aware of the young man in front of her desk.

"I'm Tom Fletcher," he said.

"Yes?" she said.

"I am a junior partner in Mr. Riggs' firm," he said.

Doris forgot her doodling. She motioned to the chair beside her desk. Tom Fletcher sat down. He shifted uneasily, flushed slightly and then almost blurted, "What I wanted to find out is how much longer is your man Williams going to demonstrate that boat to Miss Riggs?"

Tom Fletcher came into very sharp focus. Doris noted his generally haggard and unhappy expression. She noted the flush and the way he squirmed slightly. She began to tingle with feminine intuition. In fact, she began quietly to exult. Because suddenly everything was quite clear. This young man was being punished for something, and the lengths to which Lila Riggs was going to make him feel wretched was proof, among girls, that she was very, very fond of him. Lila wasn't on Steve's trail. She didn't care two pins about Steve.

Doris noted that Tom Fletcher had a solid jaw, a good spread of shoulders and capable hands. She noted also that he was a very earnest, sincere sort of young man. In his present distraught state almost anything could be done with him. He was practically tailor-made for her purpose.

"I'm glad you dropped in, Mr. Fletcher," she said. "We were beginning to worry about that ourselves. Especially when we learned that Steve is taking Miss Riggs to the dance tonight." Doris quivered happily at the distinct spasm of pain that passed over Tom Fletcher's face. She went on, softly, "You see, we wouldn't want to lose Steve. He's an ex-

Without Painful Backache

Many sufferers relieve nagging backache quickly, once they discover that the real cause of their trouble may be tired kidneys. The kidneys are Nature's chief way of taking the excess acids and waste out of the blood.

When disorder of kidney function permits poisonous matter to remain in your blood, it may cause nagging backache, rheumatic pains, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headaches and dizziness.

Don't wait! Ask your druggist for Doan's Pills, a stimulant diuretic, used successfully by millions for over 50 years. Doan's give happy relief and will help the 15 miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

eellent marine architect. I might as well be frank, Mr. Fletcher. It's possible that Steve doesn't want to be a designer in a small yard all his life. We're afraid that he may be thinking of Miss Riggs as his big chance to get everything he wants quickly."

Tom stared at her. "Why—why, the heel!"

"Let's be charitable," Doris murmured. "Let's say he's ambitious."

"Ambitious!" Tom growled. His jaw came out. "I may as well be frank too. Miss Riggs and I were almost engaged. I worked hard to make good and get into the firm." He looked at Doris. "Maybe that's part of the trouble—perhaps I've been working too hard at making good with Mr. Riggs and not hard enough at making good with Lila."

"I'm sorry," Doris said.

Another spasm twitched Tom's features. "That part's all right," he said. "Lila is free—except that I can't stand by and see some heel hurt her."

"Well, I wish there were something we could do."

Tom stood up. He was a little white around the mouth. "I'm very grateful to you. Maybe I can think of something at the dance tonight."

"I hope you do," Doris said. "Only, of course, I wouldn't be too surprised if they didn't get to the dance."

"Eh? What do you mean?"

"Perhaps Steve has planned this very carefully. Perhaps his Portland trip is just an excuse to get started sailing late, so the breeze will die while they're still out there."

"Isn't there an auxiliary?"

"There will be a full moon tonight," Doris murmured. "Engines stop and other things begin under a full moon."

Tom's large hands became large, white knuckled fists. "That I don't believe Lila would fall for. Would you care to come to the dance with me tonight?"

IN HIS own adjoining office, where Doris had forgotten his presence entirely, the commodore sat still until he heard Doris leave the reception office after Tom's departure. Then, casually, as though checking on the work in the main shed, he followed Doris. He saw her select a pair of heavy pliers from a bench and go down to the landing float where she got in a dinghy and rowed out to Harlequin. Later, a little before noon when Doris had gone up to the house to prepare lunch, he rowed out to the cutter. After a little search he found where the copper gas line from the forward tank to the engine aft had been squeezed together. No one not suspecting sabotage would think to look for that sort of trouble in that spot.

For quite a while the commodore pondered what to do. He could, of course, have a man come out and quietly repair the pipe. But then Steve and Lila Riggs would get to the dance as scheduled and meet Doris and this Tom Fletcher. The commodore shuddered. There was no telling what young Fletcher might say or do with Doris there to prod him. Cornelius Riggs would hear about it and very likely cancel his order. Gossip would spread among yachtsmen the length of the coast. Steve's name would become mud. That would be a body blow to the yard. Wondering bitterly if he would ever get Doris and Steve straightened out so he could simply go about an honest business of building and selling boats, the commodore rowed ashore without touching the pipe.

At eleven that night there was a soft, yellow moon, a mere breath of a breeze and a strong ebb tide. On the porch of the yacht club Doris leaned against the rail and looked out across the water. Harlequin was not at her mooring. Tom Fletcher stood beside Doris. He too was looking at where the cutter was not. He had been coming out with Doris every fifteen minutes to look at that vacant patch of shimmering water. Doris said, "Why don't you just go home and get drunk, Tom? There isn't anything we could do about it if they stayed out until morning. We're just a little too late."

"Morning?" he barked. "He can't keep her out all night!"

"What's to stop him?" Doris inquired softly.

FIFTEEN minutes later Doris sat on the leather-cushioned seat of a big speedboat roaring across the moonlit sea. At the wheel Tom was a grim young man whose eyes swept the sea in all directions.

"It's all right for you to keep saying there isn't anything we can do," Tom shouted at Doris. "But what you don't seem to understand is that when a man loves a girl he doesn't just sit around while some wolf takes advantage of her innocence."

Doris smiled serenely. There would be a big scene which could be worked around to give Lila her big chance to be sweet and forgiving to Tom and leave Steve looking very foolish indeed. The powerboat would tow Harlequin in. Before dawn old Zeke, who would do anything in the world for Doris and say nothing, would have replaced the damaged pipe with a new one. There would be nothing, absolutely nothing, Steve could say in self-defense. Then she, Doris, could be sweet and forgiving too, making certain, of course, that Steve thoroughly understood how big she was being about it all.

"There they are!" Tom grunted suddenly.

He switched on the searchlight. The powerful beam picked up Harlequin almost dead ahead. She was moving slowly with her sails barely filled. Steve and Lila were sitting in the cockpit. They raised their hands to shade their eyes against the brilliant light. Tom throttled the engines and eased the powerboat alongside the cutter. "Make fast at the bow," Tom growled to Doris.

Neither Steve nor Lila said anything nor made any move when Doris jumped aboard the cutter with a bowline. She made fast to the cutter's bow bitts and Harlequin began to tow slowly alongside the big powerboat. Tom kept the searchlight beamed on the cutter's cockpit. Lila turned her face away from the light but Steve looked at Doris and then toward Tom with an amiable grin. The grin irritated Doris. It also irritated Tom.

"All right, Williams!" he barked. "What's the story?"

Steve grinned some more. "Regular third degree with lights and everything, eh? Well, we've got engine trouble and this breath of air won't take us in against an ebb tide."

"What's the matter with your engine?"

"It won't run," Steve said mildly.

"Why aren't you trying to fix it?"

"We've been waiting for a mechanic to come along."

Tom emitted an inarticulate roar. Then he was leaping aboard Harlequin. Lila cried out, "Tom! What are you going to do?"

But Tom did not throw the punch. Because at that precise instant the benign features of the commodore appeared in the companionway. The commodore regarded Tom with some disapproval. "Young man, is that any way to come aboard a boat? Thumping your feet on the deck so the watch below can't sleep?"

Uncertainty replaced Tom's pugnaciousness. It was difficult to reconcile the commodore's presence with any foul plot Steve might have in mind. "What are *you* doing here?" Tom blurted.

The commodore raised an eyebrow. "I am trying to sell Miss Riggs a boat."

Lila attacked from the flank. "One might ask what *you* are doing here, charging around like a rampant Gestapo agent?"

Tom looked even more uncertain than ever. He glanced questionably at Doris. But he was a gentleman. He l

I SMELL DEATH

DEAR SIR: Re your June 26th "correction" of a paragraph in an article about the sense of being able to smell diseases: In 1939, I knew Dr. Geoffrey Carte, a prominent British surgeon. He told me of the extraordinary power of smell which some medical men and women develop—he mentioned a head nurse in one of the London hospitals who could not only tell the patient's malady, but also could tell when a person was dying. I remember very well when he said that many times a doctor would say that a patient could not recover, she would beg him to use every possible treatment, because she did not "smell death"—and at other times she would say that medical treatment was useless.

Unfortunately, Dr. Carte died two years ago, so you cannot check this. . . .

MRS. CHARLES KER REID II,
Washington, D. C.

. . . Been nursing for more than 40 years here in Chicago. . . . Fever smells different than rheumatism, another smell for the mumps—and feather beds can get pretty awful if a guy lays long steady among them. . . .

OUR F.F. READERS

DEAR SIRS: Like no other magazine in the world is Collier's able to interpret the heartbeat of a nation. It fills the soul of the German people with new hope, giving strength to a people which is hungering for a new true wisdom, and which is honestly striving to be once again accepted among the nations whose true ambitions are freedom of individual rights, freedom of speech and religion and freedom from want and fear . . . and once again take delight in the simple joys of living.

HENRY H. ROHNE,
Württemberg, Germany

We hope.

HIGH SWEDISH CHEEKBONES

DEAR EDITOR: As one of Hollywood's "directors of photography" and of Swedish descent I enjoyed Mr. Kyle Crichton's Hunting of the Swede (June 19th).

I do, nevertheless, take exception to Mr. Crichton's last paragraph. Of all the members in the A.S.C., I know not one whose working habits are ever careless in lighting. High cheekbones are not a problem to us and can be ironed out with a single lamp. Swedish cinematographers can "wash out" bumpy cheekbones, even before their stars face our cameras in Hollywood. I enclose a studio shot of another little Swede, Eva Lind. So far as I know she is still there. She appeared in a picture I photographed there last year.

Collier's believes...

...THE U.S. RECORD ISN'T SO BAD

WINSTON CHURCHILL, still swinging the English language as King Richard the Lionheart swung a mace, recently let fly as follows at the Labor party (Socialist) politicians now trying to govern Britain:

How the ministers can deride the system of free enterprise and capitalism which makes America great and wealthy and then at the same time eagerly seek the aid which has hitherto been so generously granted from across the Atlantic—that is a grimace which baffles the limitations of our language to explain.

We hope we're as nearly free as most Americans are from national sensitiveness and vainglory, but we must admit we think Mr. Churchill made a point that time.

After all, the record of the United States in the last few years has not been too bad. During World War II, we dealt out a matter of some 44 billions' worth of Lend-Lease materials to our allies. Of this, around 25 per cent went to Russia, and thereby saved Stalin's hide from Hitler, and about 66 per cent went to Britain. Our capitalist system was able to perform these prodigies of production and delivery while we fought Japan almost single-handed and put up 61 of the 90 western Allied divisions which freed western Europe from the Nazis.

Since the war, we've passed around approximately 21 billions' worth of foreign aid of all descriptions, and are now embarking on the $17,000,000,000 European Recovery Program.

Meanwhile, we are enjoying a domestic boom which, though it is seriously inflationary, is nevertheless a boom such as the Socialist, Communist and semi-Marxist governments of most of Europe for some reason seem unable to bring to their peoples.

Like Mr. Churchill, we feel that any foreign politician who tries to make mock of the American capitalist system only succeeds in making a fool of himself.

Maybe we're foolish to expend all this effort and real wealth in an attempt to help the rest of the world recover from the war. However, the theory underlying it is a hardheaded one, whether sound or not. The theory is that we can save ourselves the colossal cost of another war, in blood and treasure, by spending considerably smaller sums now for world economic recovery.

We could just conceivably, though, lose our patience and a good deal of our present generosity if enough foreign politicos were to go on hissing and pecking at us for a long enough time.

●

. . . THE MARKET IS STILL A GAMBLE: It's pleasantly like old 1926-28 times to see the stock market running along—as of this writing, anyway—at a bullish clip; and far be it from us to do anything knowingly to trip it up. A bull market of sorts surely seems justified, what with civilian consumer demand for goods still strong and the big rearmament and European Recovery programs coming along with heavy demands of their own.

We would like, though, to do what we can to help counteract an impression reported to be widespread among amateurs now playing the market or working up an itch to sit in on the game.

It seems that a lot of people believe the Securities and Exchange Commission, set up in the heyday of the New Deal, will somehow save stock players from taking losses. The notion is ridiculous, of course, but there it is.

The SEC can no more save stock buyers and sellers from losses than a boxing commission or racing commission can keep bettors from having to pay up when they put their money on fighters or horses that don't win.

All that the SEC can do is to try to ride herd on corporations and see to it that they play fair with investors, especially in the matter of publicizing their financial affairs. Neither the SEC nor any other public agency can keep any business concern in the black or any investor making money.

So the market is still a gamble—though, what with 75 per cent margin requirements and the high morality of many present-day exchange ments, it is not the cutthroat game it But you can still lose at it, plenty, es you're an amateur riding hunches an tips. If you do happen to lose your sh exuberant market, kindly don't com squawking that Collier's didn't warn yo

●

. . . PRAISE USUALLY DOES IT: The oth ran across what strikes us as possibly nine-word remark ever yet cracked about children: "Nothing has a better effect o than praise."

Furthermore, the man who said it was r than Richard Brinsley Sheridan (1751-181 lous author of The Rivals, The School fo and other bitingly satirical plays. Mr. too, lived in an era when praise was scarcest commodity in the life of the ave lish or American child.

Many modern parents are wiser; but w whether enough of them are, even now.

Sheridan was so obviously right that strange that this piece of common sense nigh universally understood. It is a fact t —earned praise, we mean, not freewhe tery—makes anybody feel good and ins to try to deserve more of the same. Chi ing direct and highly impressionable in praise reacts even more powerfully on t on adults. In 99 cases out of 100, the r sure to be good.

Anybody who is worried about not gett with his or her children as well as might would be smart, we'd suggest, to try d compliments, applause, etc., for a while, the child does something to merit same. results can almost be guaranteed—esp you'll also take to toning down the adv cisms, on the theory that a child knows well when he's done something foolish, a no need to rub it in.

You Get a Bigger Telephone Package Than Ever Before

When you buy telephone service you buy a great big package of convenience, safety, happiness and achievement all wrapped into one. More minutes in the day. More things done, more easily.

You buy contacts with people—a quick, dependable, economical way of keeping in touch with almost everybody, everywhere.

You now get a bigger package than ever because there are more telephones than ever. In the three years since the war, we've added nearly 9,000,000 new Bell telephones—an increase of 40%.

Many of these new telephones are right in your city, town or neighborhood. They are friends, relatives, neighbors, doctors, nurses, stores, offices: a larger world within your reach. The value of your own telephone has increased because you can call so many more people—and so many more can call you.

It's a big package, this telephone package, and it keeps on getting bigger day by day.

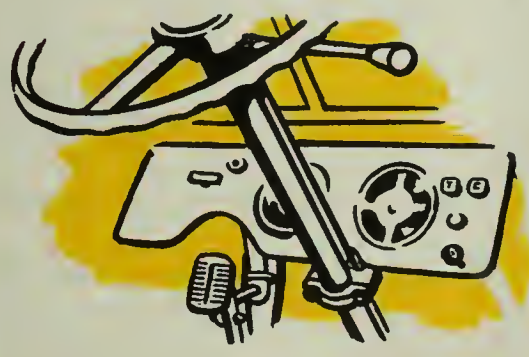
Introducing Two New

CHEVROLET *Dubl-Duti* (FORWARD-CONTROL) CHASSIS



Illustrated above is the 125¼" wheelbase Forward Control Chassis—bumpers optional equipment.

...w Advance-Design Forward Co... Chassis double cubic load spac... without additional wheelbase.

Parking is easier due to better maneuverability and small turning radius.

Electric starter button on instrument panel provides new, clear floor area while Chevrolet's new solenoid-operated mechanism assures positive starting.

...creased safety and operating ...efficiency is provided by the ...unique new foot-operated ...parking brake.

Chevrolet's Advance-Design steering column gearshift control (on 125¼" wheelbase with three-speed transmission) creates new driving ease and convenience.

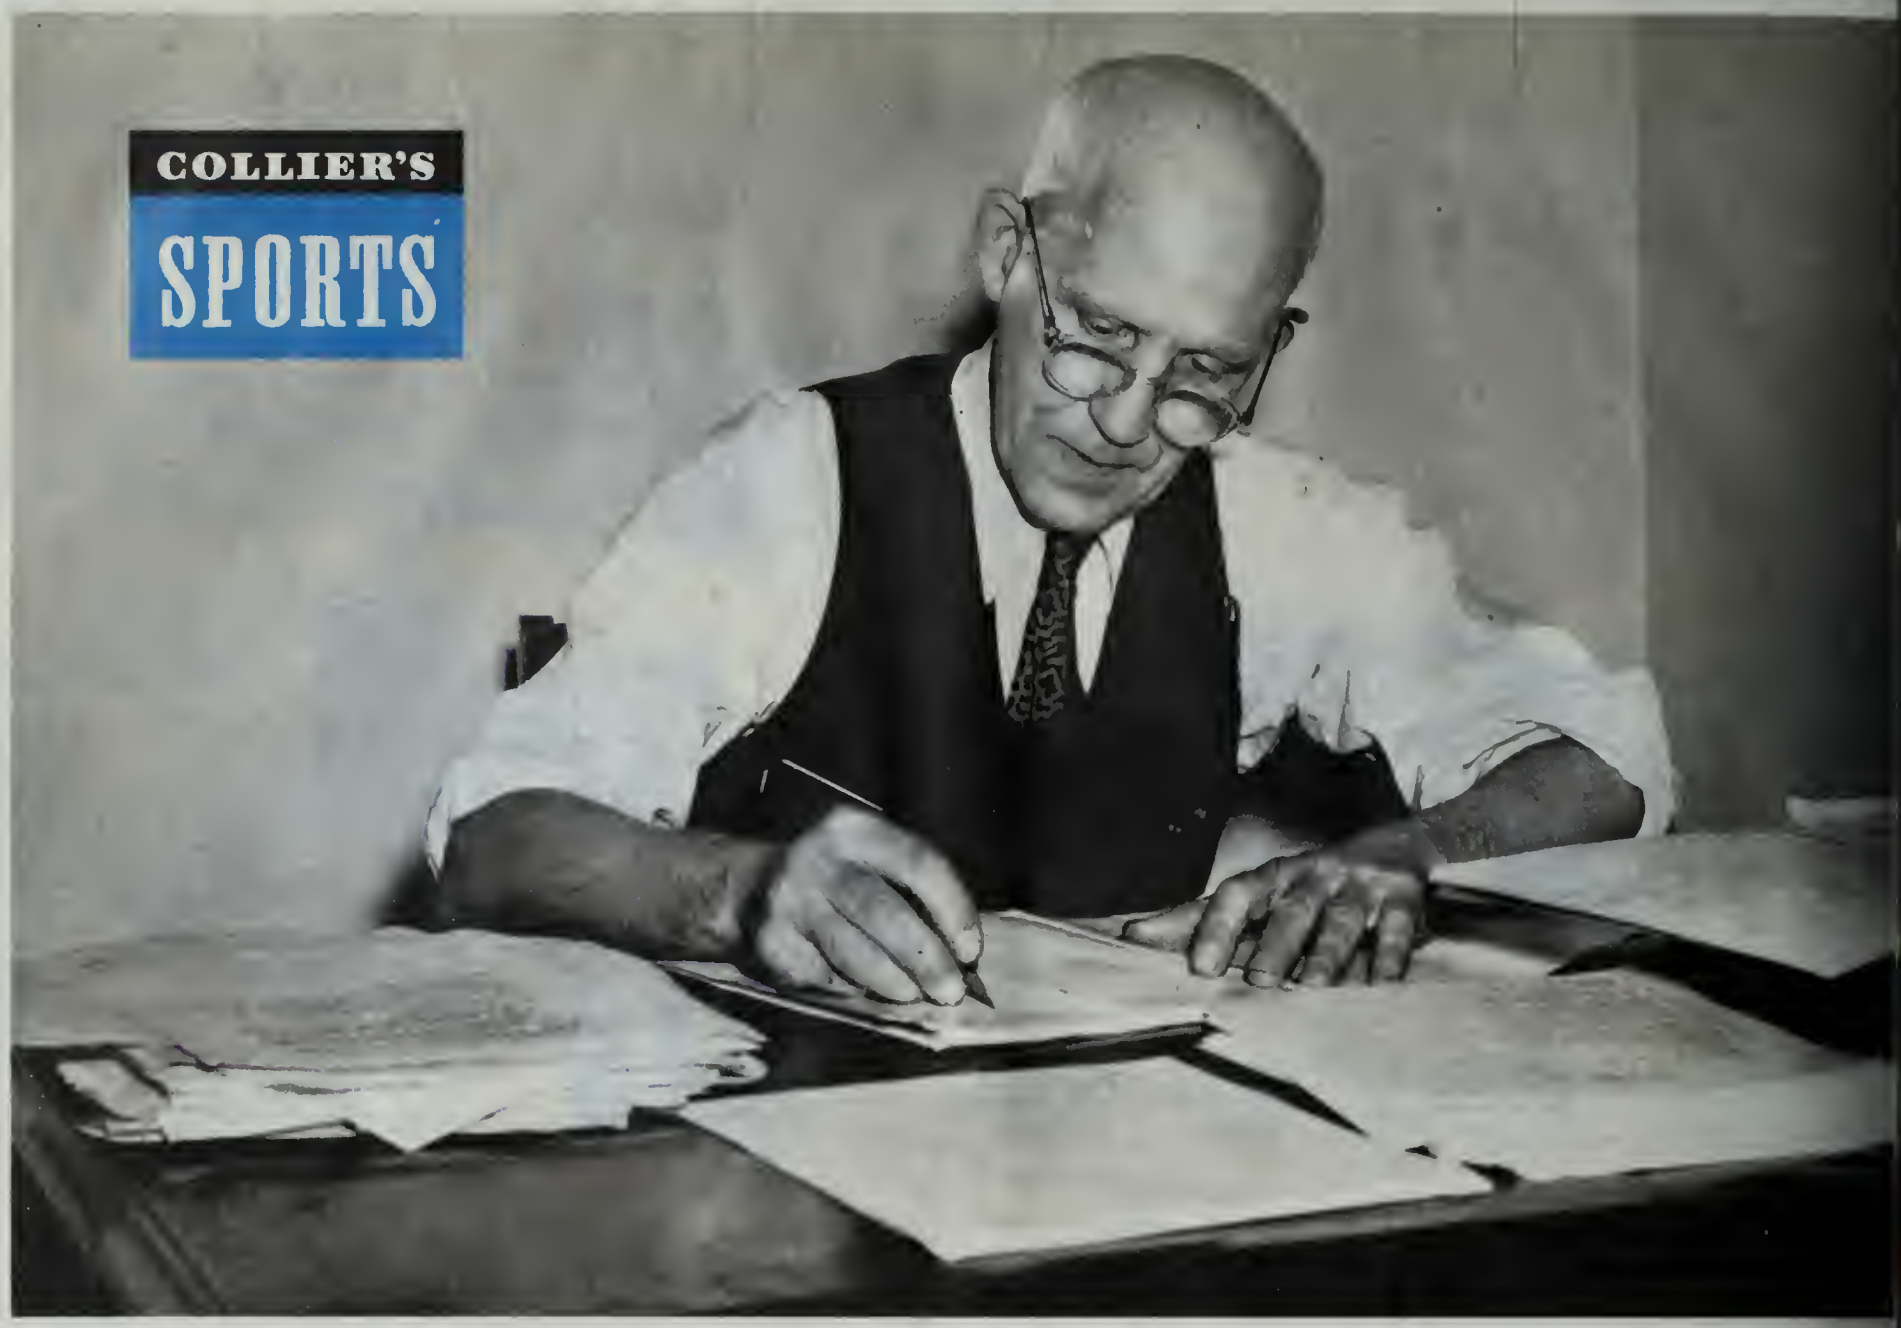
CHEVROLET

Here's the big news in door-to-door delivery! Chevrolet announces two new Chevrolet DUBL-DUTI Forward-Control Chassis . . . ready now for standard body installations that *double* the cubic load space of conventional panel trucks on the same wheelbase. Think what this means in terms of bigger payloads, fewer trips, greater operating efficiency. Consider, too, that these new Chevrolet Dubl-Duti Chassis are ADVANCE-DESIGN throughout . . . rugged, feature-studded, economical to operate and maintain. Chevrolet Dubl-Duti Chassis are great additions to a great line of *lowest price* Chevrolet trucks. See your Chevrolet dealer for complete information.

Forward Control Chassis Model 3742

125¼" wheelbase; three-speed transmission; gross vehicle weights of 6,200 to 7,000 Lbs. Adaptable to nine- and ten-foot bodies.

Forward Control Chassis Model 3942



137" wheelbase; four-speed transmission; gross vehicle weights of 6,700 to 10,000 Lbs. Adaptable to ten- and eleven-foot bodies.

SPORTS

Meet Shorty Ray, speed-up man of the grid. He times the plays, puts the results through a mathematical mill and grinds out flashier football

SLIDE-RULE FOOTBALL

BY BILL FAY

WELL, the football season is nearly here again. Eight All America Conference and ten National League teams are sweating it out in training camp. The first All America game is a few weeks away.

Summer football training is necessary, exacting work. Pro titles have been won and lost in summer drills. Last August, Coach Jimmy Conzelman huddled with Hugh (Shorty) Ray, National League technical adviser, at the Chicago Cardinals' training camp.

"Let's go over your figures, Shorty," Conzelman suggested. "Last year in running and passing we averaged 5.47 yards per play and the Bears averaged only 4.91, but they beat us out for the championship. There must be a hole in our defense somewhere."

Conzelman's suspicions were verified on page 17 of Ray's play-by-play analysis of the 1946 season. "Team B (Ray wrote) runs a kickoff back to its 46, which is 15 yards above normal. They now are in a strategic position to use a well-diversified attack. Had they been restrained to their 31 (normal runback), their attack would have been restrained to three rushes and a punt under normal conditions. (Teams average 3.6 downs in this zone before punting or making a first down.) On the basis of a restricted attack from the 31, Team A (by permitting the extra 15-yard runback) made a gift to B of the equivalent of four downs, besides the playing time of 141 seconds, which this number of plays normally would have consumed."

Pointing directly at the Cardinals, Ray wrote on: "For 1946, the team with the highest combined gain of 5.47 was tied with three other teams for fourth position in games won. . . . This was a direct result of their defensive weakness against runbacks, as attested by their net gain per punt and kickoff, and other items. When the receivers or interceptors are presented with opportunities, in such cases, to advance unduly to positions on the field which are more favorable to retaining the ball offensively, it is reflected in more plays for them and less for the kicking or passing team."

In other words, the Bears (less powerful offensively but more alert defensively) ran 872 plays while the Cards executed 744. The Bears' opponents started only 701 plays while Cardinal opponents had 820 scrimmage opportunities. Offensively, the Bears gained 128 plays; defensively, they gained 119. Overall, the Bears' advantage over the Cards was 247 plays in 11 games.

"Just about 22 plays a game," Conzelman concluded. "Mighty interesting, Shorty. We can travel about 120 yards in 22 plays. We were spotting the Bears the length of the field in every game. We'll have to do something about those runbacks."

The Cardinals did. They improved their defense, held onto the ball longer, ran 922 plays from scrimmage—exactly the number executed by the Bears—and won the National League championship.

An amazing man, Shorty Ray, sixty-five years old, former Western Conference official, retired professor of mechanical drawing. Shorty spends the winter, spring and early summer analyzing statistics. During the fall, he supervises National League officials and observers (two at each game). The observers time officials and teams with a stop watch. Observer number one checks the officials—records how many seconds they use putting the ball in position for the next down. Observer number two checks the offensive team—jots down huddle time.

After tabulating 30,000 stop-watch readings last winter, Ray computed the officials' average ball-handling time at 7.4 seconds. Teams averaged 22.5 seconds putting the ball into play. Ray also spotted the most efficient crew of officials (6.5 average) and the laggard crew (8.2). The 8.2 crew received plenty of winter instruction from the league office.

So what difference does a second make? Plenty. By prodding off and marking the teams that loit huddles, Ray's observers have creased the number of plays per tional League game from 145 1936 to 166.5 in 1947. The spee has been a factor in increasing t down production from 3.4 to 5.9 game in the same period. Specifi (as Shorty points out) each inc of a single second over the 22.5 age destroys 3.3 plays per gam isn't hard to prove, the way Sh does it.

BALOGH EMERGES TRIUMPHA

KEEP UP WITH THE WOR

BY FRELING FOSTER

Some fraudulent spiritualists now employ a "psychic television" set in their materializations. In a typical case, the medium arranges with a widow to have the machine reproduce the features of her late husband and then a confederate, posing as a telephone inspector, calls at her home and surreptitiously photographs a portrait of the deceased. At the seance a few days later, the receiver lights up and, to the accompaniment of strange ethereal sounds, the photograph, enlarged and disguised, slowly comes into focus on the screen. Believing that television waves have transmitted her husband's image from heaven, the widow gladly pays the fee —usually $50.

Probably the most ingenious banknote fraud of all time was that perpetrated by nine crooks in 1924 on the huge London firm that had long printed the paper currency of the Bank of Portugal. Posing as a representative of the bank and armed with forged documents, the ringleader tricked the firm into making and allowing him to deliver $5,000,000 worth of currency. The fraud was not discovered for over a year, and five more years passed before the gang had been caught and convicted. The Bank of Portugal sued the printers and was awarded $1,500,000 compensation for the money it lost in redeeming the unauthorized issue.—*By Andrew Robertson, London, England.*

No painting on record ever approached in size the Panorama of the Mississippi which was executed by John Banvard between 1840 and 1846 and depicted 1,200 miles of the river's landscape between the mouth of the Missouri and New Orleans. As the picture was twelve feet wide and nearly 16,000 feet long, it was exhibited by being passed between two upright revolving cylinders on the stages of large auditoriums, required two hours to be shown in its entirety and earned about $200,000 on its tour of the world's leading cities.

One of the strangest unso- teries in history was creat- peculiar hoofprints in the covered in Devonshire, En the morning of February These impressions were ov the size of a donkey's hoof ceded each other eight inches a direct line as though the a been imitating a tightrope The uninterrupted track led obstacles, crossed a wide riv through 15 towns and cov miles. When scientists stated living creature ever left such was rumored they had been the devil himself and, conse many superstitious perso afraid for months to go after dark.

For decades the Tomb of cemetery near Jedda, Arab visited annually by thousands hammedans who, after dro coin in the slot, asked and Eve's advice—through a tube. The fact that the M Mankind could talk to them she required a resting place wide by 500 feet long did not credulity of her customers. W alleged mausoleum was ord stroyed in 1927, the woman run the racket from an unde room retired with a fortune.

. . . *with* DIAMOND T *reliability*

ONARCH Lumber Company packs a whale of a lot of praise into one short letter reporting on this newest Diamond T del 806A. Here's what they say:

We are very enthusiastic over this new Diamond T, espe- y the lower fuel and maintenance costs. Loads from 8,000 2,000 board feet are hauled *swiftly*, *safely* and *economically* our complete satisfaction. Compared with many other es of trucks we've used, it delivers real trouble-free per- nance because of its modern design and extra-heavy-duty construction."

espite glowing reports like this, Diamond T engineers a 't resting on their laurels. A new Model 704 has just been announced—similar to this 806A but with a new, super-smooth, 162 horse-power engine for higher speeds on long hauls. Other 1948 models have increased road speed; larger, more comfortable cabs; improved steering; more powerful brakes; many other advancements. Today's Diamond T's are the finest we have ever built.

See your Diamond T dealer. Let him figure the model that exactly matches your job (we build all sizes from one-ton up). Learn why drivers, maintenance men and owners say, "We all agree on Diamond T!"

It is a sobering thought that scenes like this are STILL being enacted—in this day and age!

When all this time—ALL THIS TIME!—people could have saved themselves untold "winding worry" by buying a *modern*, absolutely *accurate* alarm clock like the HERALDER with luminous hands and hour dots. This useful General Electric *electric* Clock has an exclusive Select-A-Larm feature. It permits you to select the *precise volume* of "wake-up" which suits *you* best ... from soft to loud or any point in between!

In addition to this, the HERALDER has all those advantages which have made G-E Clocks "the clocks most people want most":

1. **Self-starting** . . . no winding.
2. **Quiet** . . . no disturbing ticktock.
3. **Dependable** . . . wakes you on time, every time.
4. **Accurate** . . . electrically checked by your power company to correspond with official Naval Observatory time.

De Luxe HERALDER, $5.95, plus tax.

ELECTRIC CLOCKS

The HERALDER is only one of a complete line of General Electric alarm, kitchen, and occasional clocks—"The Clocks Most People Want Most."

P.S. Remember this: General Electric Alarm Clocks are available at prices as low as $4.50! General Electric Company, Bridgeport 2, Conn.

Why wind a clock today—get a General Electric and forget it!

GENERAL ELECTRIC

THE Week's Work

A fur-coated kibitzer of Jasper National Park

LIKE a good tourist one of tour-designer John Kord Lagemann's first questions about Jasper National Park (Playground in the Sky, p. 28) was how cold it got in winter. "Cold enough so's you don't have to shave," answered a guide. "All you do is stick your face outside half a minute till your whiskers freeze good and hard. Then smile real quick and they'll drop off clean's a whistle."

Like a wise tourist, however, Mr. Lagemann kept sensibly aloof while interviewing the bears which infest the park—especially after one of them (weight 225) knocked Lagemann down pulling on his camera strap. "Unless you intend to support one the rest of your life," he reports, "the meanest thing you can do is feed a friendly bear. After a few tourist handouts he finds his fellow bear pretty dull company."

In fact when food gets scarce in the wintertime, the bears will lovingly break into your house and raid the pantry. They also love golf; and will trundle happily around the Jasper course kibitzing the foursomes, running ahead to grab the flag on the putting green, and pick up the ball.

They also love to sit on the tee benches and give the hackers the furry ha-ha as they drive off, and curl up for a middle-of-the-fairway snooze. Finally, after finishing a round, the fuzzy-wuzzies like to join the golfers in a cooling shower.

"They used to bite through the shower nozzles until the greens manager installed handles they could operate," relates Lagemann. "Now they merely forget to turn off the water. But while tourists have had some anxious moments, no one in Jasper has been seriously bitten or mauled in 41 years."

Around the golf course, Lagemann heard of a pair of golfers who arrived one Sunday from Troon, Scotland, for a vacation. Grimly pious, they couldn't play on the Sabbath. Neither could they keep away from the course. "So they walked the entire 18 holes," says Lagemann, "without clubs, played it mentally, deliberating over every imaginary shot—and did well, of course."

But Lagemann loved every minute of Jasper (and who wouldn't?), including the flying squirrels and the visitors who, preparing a trip to the Angel Glacier on Mt. Edith Cavell, asked: "When does the glacier spout?"

His sign talk can stop a train

ABOVE are some of the hand signals used by a railroad towerman to flash warnings to crews of passing trains. Hands outstretched and waving up and down (1) means there's a boxcar door unlatched and swinging dangerously.

By stretching both hands directly forward, palms together, (2), he lets the train crew know about a flat wheel.

Even the blue-streak limited must pull up short when, with his hand to nose (3) the towerman tells the trainmen that he's spotted a hotbox.

But if his quick-seeing eye lights on nothing amiss as the train thunders by, he simply leans out of the window (4), and urges it on with the "high-ball" signal.

With towermen on the job, railroaders always have watchful eyes along the track to look out for trouble—skilled hands to help them dodge it.

Too bad there's no equivalent of the railroad towerman to stand watch over your daily comings and goings—to let you know *when* an accident's coming up and *how* to duck it. But there isn't.

So, since you have no personal sentinel to tip you off an accident about to happen, isn't this the wise thing to d

Make sure you've got accident insurance, and *enou* of it.

Accident insurance pays doctor and hospital bills if y should be laid up with an injury. It takes care of the re or the installments on the mortgage. It tides you and yo family over what can otherwise be an awfully tough spot.

It's a simple matter to arrange for the accident insuran you need. Just call in your Travelers agent or broker.

A WORD FROM OMAR BRADLEY

There is no longer any place in the American Army for a "treat 'em rough, tell 'em nothing" school of officers or noncoms. If we are to make good use of these valuable years from the lives of new draftees, then we must offer them a healthy moral, intellectual and social climate in which they will serve willingly—not resentfully because of force or compulsion.

I believe that if the Army is to be a democratic instrument of this nation, then it must respect and value the basic human rights of its soldiers. It must guard their dignity, defend their integrity, and not permit these men to be pushed around unnecessarily because of the inconsiderate assumption of privileges that come with rank.

For that reason I was glad to read the article by Howard Whitman. The Army has made mistakes before—many of them. We may, unfortunately, make many more. But I do want you to know that the Army is out to prove that not only the nation but these young men as well may profit by their service.

The peacetime draft has put the Army on trial before a bar of critical public opinion. We will stand on the record.

WHAT EVERY NEW DRAFTEE SHOULD KNOW

BY HOWARD WHITMAN

NOT long ago, a young lieutenant was addressing a group of recruits at Fort Dix, New Jersey. "Gentlemen," he said, "your officers are here to serve *you*—like a big brother or father. They understand that you are *individuals,* with particular individual characteristics which no other men in the world possess."

If I hadn't been forewarned, I wouldn't have believed my ears. *"Gentlemen" . . . "like a big brother or father."* You didn't hear much of that sort of thing during World Wars I and II.

The answer is: a new kind of "military mind" is running the Army show, and the lads of nineteen to twenty-five who receive their Draft Greetings in the coming months—and eighteen-year-olds who volunteer—will like it. It places the emphasis on brain, not brass. It puts its store in human values, individual dignity, and that good old American chestnut, *the rights of man,* rather than in the pea-brain authoritarianism which G.I.s of World War II knew contemptuously as "chicken."

Speaking of the changed mood, Army leaders often call it "the New Evangelism of Johnnie Devine." For it was aptly named Major General John M. Devine who gave the new philosophy a trial run at the Universal Military Training Experimental Unit at Fort Knox, Kentucky, and is now diffusing it throughout the Army.

Johnnie Devine was recently promoted to Deputy Chief, Army Field Forces, at Fort Monroe, Virginia, where his office is separated by one thin door from that of General Jacob (Jake) L. Devers, the Army Field Forces commander. Devers and Devine, more than any other two men in the Army, are responsible for how you will be treated if the draft board points its finger at you.

He couldn't get along with her. And without her he couldn't get along with himself

Gentleman George

BY R. R. DOISTER

FIVE o'clock George Willis said good night to his secretary, Miss Finchley, a brunette who lived in Brooklyn with her and left his office. On the way down in tor a tall girl stood with her heel digging nstep and he had to tell her politely, when ed his pardon, that it was all right. Outside ining and he had to run—around the cor- he bar where Hal Everet was waiting for al was George's best friend; he had been st of the summer, he was big and an idler, ad a lot to talk about.

e began drinking Irish whisky with Hal ning to him and he could not help compare with Hal and think Hal a pretty gay dog self not much. It made him angry, and an r when they left he was feeling aggressive thing in particular, just things in general. ook George to a French restaurant on rd Street, Victor's. They had wine with er, and George was still feeling aggressive al suggested going to the Navy Officers' Brooklyn to a hop the officers were having, n though George had not been invited he e, why not. And, at the club, as he stood the dancers, especially the girls, he began ot only eager, but that nothing could stop d then he saw her.

She was dancing with a tall ugly captain and to anyone but George they would have looked ludicrous because she was so tiny. Her hair was blond, it hung smoothly to her shoulders, and she was wearing a soft white off-the-shoulder evening gown. George walked directly to her, bumping several couples, and tagged the captain. "Cut," he said curtly.

The captain backed away, and handed the girl to George. She was humming the tune the orchestra was playing, still sort of dancing as she moved toward him and put her hand on his shoulder. But George did not immediately put his arm around her. He stood holding her right hand in his left and grinning at her. He wasn't aware of the world, only of his own feelings.

She looked at him then and anyone but George would have seen that she did not like what she saw. She said, "Do you want to dance or stand?"

GEORGE put his arm around her and began to dance. Almost immediately the music stopped. He released her and as he stood there he saw the musicians put down their instruments and leave the stand. It was an intermission. He said, "Come on, let's go out on the terrace."

She looked up at him again, and she was not amused, only a little bored, but she took his arm. He led her outside. A balustrade ran around the terrace and he took his handkerchief from his breast pocket and put it on the balustrade for her to sit on. He put his hands on her waist and lifted her up, and again he felt the exhilaration that he had felt when he first saw her.

"Why, you're like a doll," he said, "your waist is so small." He took both her hands in one of his. "And your hands. You're just like a doll." He leaned closer and said, "How does anyone as tiny as you get along in this world all by herself?"

"By being smart," she said. She took her hands away. "And knowing that you're tight. I'll bet when you're sober you're as meek as a lamb. What's the matter with you? What're you afraid of?"

George felt a little sick. "I'm sorry," he said. "I guess you're right. I don't know—my best friend came to town today and I began to compare myself with him and feel bad about what I didn't have, and mean—"

"Why?" she said.

"Oh, I am meek," George said. "And I lead a small, dull life and—well, I won't bore you."

"Oh, you don't," she said quickly. Her voice was much softer. "It was awful of me to be so mean to you. I shouldn't have said what I did. It's just that everyone tells me how tiny I am and—I'm tired of it. No one wants to be tiny and look like a child forever."

"Well," George said. He was feeling very self-conscious. "Uh, I'm George Willis."

"You're nice," she said. "You're really very sweet." She looked at him soberly and then leaned forward suddenly as he stood there in front of her and rubbed her nose against his. "I'm Frances Mason."

"Oh, Frank Mason's daughter." He remembered all the things he had heard about her. She was the only child of very wealthy parents and she had a reputation of being a spoiled brat, of always getting everything she wanted. How wrong they are, George thought; why, she's a perfect lady.

"What're you thinking?" Frances said.

"Why, I was just thinking that you're a perfect lady," he said honestly.

She smiled at him, her face grew softer and she said, "That was the nicest thing you could've said to me." Then she leaned down and whispered in his ear. "Let's sneak away."

They took a cab back to Manhattan and sat in a small night club for a while talking. Since he had to work the next day he took her home at twelve. He stood just inside the door of the big town house and told her good night. She made him promise to call her the next day.

But the next day George got involved with some unexpected work that kept him and Miss Finchley in his office until five-thirty. It was exactly six o'clock as he unlocked the door of his apartment. The phone was ringing. It was Frances and he explained what had happened and asked her to dinner.

They went to the Restaurant Chambord that night. After dinner they sat in a movie house holding hands and watching an English film. When they had seen it they walked for a few blocks up Fifth Avenue. He took her home again that night at twelve. Once inside the door of her house she put her hand in his.

He leaned back, looking at her. "You're exquisite, like something very fragile." He stopped. What he had said had been so spontaneous that it frightened him.

"George," she said solemnly, "don't you ever tell anyone else that."

After he returned to his apartment he did not go immediately to bed. He sat for a long while thinking. There was something about her that affected him deeply. You've got to be careful, he told himself; you've got to remember who she is and about all the money she has and who you are. He knew well enough who he was.

Since he had been seven years old, when his parents had been killed in an auto accident, he had been a ward of his great-aunt, Caroline Willis. She was a maiden lady, she had all the family money, and she was old when she had to "take" George. Not knowing what else to do with him she put him in boarding school in New Hampshire. George was the youngest child there; he was lonely, but there was nothing he could do. He grew up that way, in very good schools. And in these schools he learned that the only way he could get along in the world was to be quiet and retiring and never demanding. For he had no home, no parents, no one at all to fall back on. He became, as everyone said, a perfect gentleman.

He never had many friends, male or female, although he knew a lot of people and got along well with them. But in college he had a roommate whose life had been somewhat the same. Hal Everet was loud and uncouth at times and he always did what he wanted. His mother was either getting divorced or remarried and usually there was no home for him. But when there was, Hal lived there. So Hal had something that George did not, and George wished secretly that he could be like Hal, but he couldn't.

When George got out of college he went to work at twenty dollars a week. Hal lived off his mother. During the war George was a supply officer. Hal commanded a PT boat. After the war George got a good job, but a hard one, and Hal went to Mexico for a year. Although George thought that he would like to do as Hal did he would not have liked it, really, because he had become at last what he thought was a perfect gentleman—never thinking of himself first, but always of others.

DURING the rest of the fall of that year George saw Frances every evening. He knew what was happening to him, but for the first time in his life he disregarded what people would say ("He's only after her money, you know.") and did as he wanted to. Shortly before Christmas, George took a week of his vacation and with her uncle and aunt they went to her uncle's hunting lodge in Maine. One afternoon George and Frances went for a walk together. When they returned, tired, their boots soaked through, they sat in front of the fireplace in their stocking feet and drank coffee. The uncle and aunt were in another part of the lodge and George and Frances were alone.

George leaned back on one elbow to look at Frances. Her face was windburned. She brushed her hair back with one hand and smiled at him as she sat there cross-legged beside him in blue ski pants and white sweater. He said suddenly, "You're the most beautiful thing I've ever seen."

"George," she said softly, turning to him.

"You are," he said. He sat up and put his arms around her, and her arms went around his neck. Then he lifted her up and held her on his lap. "You're perfect. I love you very much, Frances."

She tightened her arms around him. "Darling, I've been in love with you for so long. Why didn't you tell me? I knew you were."

"I had to be sure about you," he said. "I couldn't make a mistake and lose you. I've got to have you."

"You have me, darling. I'm right here."

"I have to," he said; "nothing else matters. It's like suddenly having everything I've wanted all my life."

She smiled, shook her head. "No, I've always had everything I've wanted, but nothing's been like this."

He began to kiss her as he sat there in front of the fireplace holding her on his lap. And he had never kissed her like that before. It, like telling her he loved her, was *(Continued on page 52)*

Cartoonist Fred Harman sketches one of his Red Ryder comic strips. Myrtle Headlee and little Samuel Trujillo model for him as Beth and Little Be

RYDER OF THE COMIC PAGE

BY JAMES POLING

Artist Fred Harman puts a lot of himself into his comic-strip cowboy. The locale is Fred's, and all his characters have real-life counterparts in his neighborhood

WHEN cowboy cartoonist Fred Harman jerks his thumb skyward and says, "They went thataway," he is referring to the rocketlike manner in which his two comic-strip heroes have zoomed to fame—Red Ryder, the two-fisted redheaded cowboy who is always in there swinging on the side of law and order, and Little Beaver, his ever-faithful, ever-grunting Indian boy companion.

In two respects Harman's work is unique. It is the only cowboy strip drawn by a real, honest-to-gawd cowpuncher. It is one of the few cartoon strips in which all the main characters have real-life prototypes.

Fred Harman, the strip's creator, is all that a cowboy should be although he isn't as spectacular as one who is *pretending* to be all that a cowboy can be. He has spent most of his life busting broncos, although on occasion the broncs have busted him. He has gnarled hands and a shy smile and the traditional tall, lanky, bowlegged figure of the cow hand. When he says, "Doggone it," or, "I savvy," it sounds good—coming from him. Like Red Ryder, Fred has red hair. That isn't all that the artist has injected of himself into his protagonist.

Ryder rides the range in that section of Colorado in which Fred Harman grew up and still lives —Pagosa Springs, Archuleta County, in the Blanco Basin of the San Juan Mountains. Red wreaks havoc on the dastardly plots of the sort of villains who flourished when the old frontier period was drawing to a close. Those were the days of Fred's youth. Red rides a black horse called Thunder; so does Harman. But although Fred admits that he is drawing his own autobiography in a small way he insists that the actual flesh and blood prototype of Ryder is Bill Flaugh.

Flaugh and Harman grew up together. Bill, a couple of years older, was young Fred's r and protector. Bill taught Fred the rudime shooting, roping and branding and all the tr trail and ranch life. Inevitably he became Harman's boyhood hero. He developed a p attitude toward Harman that has persisted day and now includes the whole Harman fam

Flaugh is six feet two inches and 190 pou really tough muscle. His square-jawed hanc ness has, in his day, got him into that sort of t which seems to dog the footsteps of the big, some he-man type.

dom draws even the incidental characters
aving a living model in mind. His New
ness manager had always reluctantly ac-
cepted the people of the cartoon as caricatures and the product of the broadest artistic license—until he made a trip to the ranch last year and met some of the local populace. He is now considerably less critical. In the Rainbow saloon he became involved in a hot argument with a little old man who had a scraggly mustache, melon belly and isolated teeth —only to learn that he had been the basin's toughest deputy sheriff, the buckaroo who was quickest on the draw in the region.

Even the scenic background of the strip is drawn from actual models. Harman's studio is on a slope looking up to the towering San Juan Range and the Continental Divide a short distance to the east. Its windows look out over the union of the San Juan and Navajo Rivers, and the rimrock and tall pines of the upper ranch country. And if Fred needs a working ranch for a background he has only to turn to his own property for a model.

Ranch Needs More Modern Conveniences

The Red Ryder Ranch is strictly designed for profit, not comfort. Last year, with the aid of a war-surplus generating unit, kerosene lamps gave way to electricity for the first time. The guest cabin still has outdoor plumbing and Mrs. Harman gave up toting her own water just three years ago, when running water and a bathroom were installed in the main house. The other buildings on the 1,200-acre ranch consist of a cookhouse, a food cellar, two barns and a foreman's house. A house for Fred's son, recently married, will soon be erected. Fred, Jr., who has his own brand and his own herd, will help in the management of the ranch—with Bill Flaugh's permission.

Fred, Jr.'s, Eastern bride may soon agree with Mrs. Harman that it is high time the ranch became a little less profitable and considerably more comfortable. But Fred points out that the place is in danger of getting citified. Shucks, they've already got, in joint ownership with a handful of other ranchers, a private telephone line into Pagosa Springs—18 miles distant. And it works real good, too, except when the beavers gnaw down the poles.

Fred Harman came into Archuleta County in 1902, when he was two months old. His father was torn between law and ranching. Ranching won and, except for two interludes in Kansas City when his father briefly renewed his law practice, Fred grew up in the Pagosa Springs region.

In the first World War, Harman ran away to join up, but at fifteen the best he could do was the National Guard. After a few months spent guarding the Kansas City waterworks against potential Uhlan raids he was released. He arrived back in Colorado with $3, which he wisely spent on such staples as salt, lard and flour before he set out to find a job as a cow hand. Even at a dollar a day, most ranchers thought he wasn't much of a bargain. For four months he lived off the land and slept in the woods. Then he got a job as a cow hand and for the next decade supported himself, mainly, as a cowpuncher.

One winter he drifted back to Kansas City and got a job as a "flyboy" in the pressroom of the Kansas City Star. He watched the cartoonists at work and decided that was the career for him. He had been drawing for his own pleasure for as long as he could remember. With the coming of spring he returned to ranching, but the following winter he was back in Kansas City working for the Film Ad Company, an outfit that made commercial cartoon films. He met a fellow employee named Walt Disney. A year later Fred and Walt went into the commercial film business for themselves. The venture collapsed and Disney went on to Hollywood. Fred went back to ranching.

Fred continued to try to make parallel careers of ranching and commercial art work. In 1926 he married and built himself a large log cabin in his old home ranch country. When his son reached school age he decided that on his $40 a month as a cow hand, the boy was in line for an extremely meager education. So he went to Hollywood, borrowed money and set out to syndicate his own cartoon strip.

The strip was then called Bronc Peeler. Later his wife, Lola, persuaded him to make a bid for the juvenile audience by including an appealing, youthful character. So Fred created Little Beaver, modeled after a Navajo youngster he had befriended and made a pal of in Colorado. He changed the strip's title to Bronc Peeler and Little Beaver. Then he went broke. *(Continued on page 77)*

STAR

BY RUSSELL BEGG

Mike Logan was a talent scout who earned his liv hunting up beautiful women. Business was a pleas until he got himself a fiancée who thought otherw

WOULD you like to be another Lana Turner?" I said, slipping onto the stool next to the redhead. I had spotted her when I first walked into the Beverly Hills edition of Schwab's drugstore, and something had gone click in my brain, or wherever it is something goes click when you see a beautiful girl.

"I don't even want to be the first one," the redhead said. I thought for a moment that I would cancel my milk shake and ride back to the office on the iceberg she had just handed me. But she looked too good to leave. She was about twenty-two, with a cute face, a tiny nose and blue eyes. I saw the eyes when she turned to look at me. Maybe they weren't blue, maybe they were battleship gray.

I decided that this was worth fighting for. I fired number two. "What do you think of the latest issue of the Partisan Review?" She looked like the intellectual type, you know, Joan Fontaine right after she takes off the glasses.

"I think it stinks."

I was right. Intellectual. But not talkative. Maybe boats would do it, everybody has a boat. "Been sailing at Balboa lately?"

"I hate sailing."

This was like trying to win on one of those claw-hammer machines at the carnival. "You sure you wouldn't like to be another Lana Turner?"

"That's right, and I don't want to be the Partisan Review, or a sailboat at Balboa."

"Well, you may think you're Ilka Chase," I countered, "but somewhere under that tough exterior there beats a heart."

"You'll lose an arm if you try to find out," she said.

Before anybody gets the idea that I'm a cheap masher, I'd better explain that when I engaged this young lady in conversation, I wasn't doing it for myself, it was business. I work for the Bailey Jones Talent Agency, which discovers and handles movie stars. I was only trying to discover this young lady so she could be handled later on. I am at times sort of a professional masher. In the agency hierarchy, I am about one cut above the doorman, and ninety cuts below Bailey Jones, my boss. I am known as a subagent.

The Bailey Jones Agency may not have as much antique paneling as some of the more famous offices, but we handle almost as many of the top stars. I work the night shift, which means that my job is to escort our female stars to various social events, night clubs and so forth. Mr. Jones has a low impression of the average male movie star, so he has his subagents take out his unmarried female clients.

I am chief boy in this escort bureau, because I have nice manners which I picked up proofreading several Emily Post books, and because, for some strange reason, I have a reputation for not hustling young ladies up to Lookout Mountain.

The reason for this reputation is that I have taken our most luscious star, Barbara Brighton, to several social functions, and have returned her home without laying a hand on her, as the expres goes. And so the boss has the idea that I am scended from one of those little men who sit side the harem door, and I continue to be escort for the agency. On the side, I scout tale places like Schwab's.

"The food here is very bad," I said to the head, who was not another Lana Turner, but plenty. "Don't you hate drugstore sandwich

"No," she said.

I tried several other tacks, like don't you California because of the no-change-in-sea And wouldn't you like to be in New York boy, all those museums and all that opera?

She didn't say anything. I can take a hint. don't have to hit me with Max Factor. I left.

I stood in front of the drugstore for a mom It seemed early to go back to the office and gin rummy, and the sunshine was warm, thought I might stroll down Wilshire Boulevard a distance.

I walked down the boulevard. It was very assuring. On my way back I turned up and wal toward Schwab's again and noticed an old Due berg parked in front of the drugstore. I hav passion for old cars, and this one was old eno for me to be more than usually passionate. I loo at it lovingly for a moment, and then I looked and saw that the girl behind the wheel was the head.

She was as lovely as I had thought, but she having trouble. The car wouldn't start. She turning the motor over and over with no res except that painful sound of somebody tryin start a car. She obviously didn't know what she doing. As a man who practically designed the D senberg, I know a few things about the car that e old man Duesenberg himself doesn't know.

I walked up to the side of the car and said, "L how would you like to be another Lana Turn

"If you think that line is going to grow on you're crazy," she said, without looking up.

"Why don't you call a service station?"

"Why don't you hang yourself?"

"You'll just kill the battery that way."

"Look, there's an excavation over on Santa M ica. If you get over there quick you can stil the steam shovel."

"Do you want to get the car started?" I asked

"No, I'm in business running down batter

"Move over."

"What?"

"I said move over, and I'll start the car for y I expected her to tell me to go fall down a n hole, but she just looked at me for a moment

"All right," she said, her voice softer "start it."

I pulled out a few levers, toyed with the ch delicately pressed the starter, the motor sta then caught with that nice pleasant sound of a tor that has been trying to catch for a long t

ROAD TO THE 19th HOLE

The gallery crowded the fairway in front of Hope as he prepared to take his shot. "Spread your legs slightly," he yelled. "I'd like to play throu

BY TED SHANE

Screen zanies Bob Hope and Bing Crosby often go on the road for a round of golf. This is the tale of a typical match. If you're not wacky at the first hole you will be at the 19th

IT WAS one of those well-washed California days —clean and gentle—and Bob Hope stood outside the Beverly Wilshire Hotel with me. We were waiting for Bing Crosby, to drive down to Long Beach where Hope and Crosby would play a foursome benefit.

"There's Bing now," Hope said, looking up Wilshire Boulevard.

I looked and saw a lot of cars.

"How can you tell?"

"He even drives a car with a slice," Hope said.

Sure enough, it was Crosby, who curved to a stop.

"How are ya, Flabby?" Crosby remarked blithely as he stepped out of his car and into Hope's car.

"Nice of you to come, Festerhead," Hope retorted gaily. "We've only been waiting since Tuesday."

This was Sunday, after twelve. The match was set for one-thirty. Long Beach was about 30 miles away.

On the way down, Jack Hope, Bob's brother, drove, and I sat between Hope and Crosby in the back seat.

"This car is fifty years old," Crosby remarked. "Why don't you get a new one, Bob? It's falling apart."

"Never mind, Dumbo. It'll have to do," H

"Do you like this car as much as the kind gear shift?" Crosby inquired.

Soon, we were out in the rolling hills of th We passed a lot of Sunday horseback riders crossed the highway in front of our car and slow up. The girls looked wonderingly at H Crosby—but didn't recognize them.

"Sing!" cried Hope to Crosby. "Don't there!" But Crosby had another thought.

"How's about picking up a couple of these caddies?" he asked. "Mounted caddies—that thought."

It would take mounted caddies to keep Bing and Bob in their endless round of exhibit benefit matches.

Shortly after Crosby and Hope started th tion-picture tours of just about every Road getic staff of writers could conjure up, they also their tours of the golf courses. Often, thos contributed mightily to the despair of film ers, who would call Bing and *(Continued on*

A LADY FOR BALLAROL

BY GARALD LAGARD

Rackham thought Sime Canought's new girl would make a good wife for his pappy. Then he fell in love with her himself

I LOOKED at Pappy flat on the bullhide, and I said, "Just where you figger on me finding this lady?"

Eighteen hundred and thirty-one was the first year we cleared twenty thousand on the cotton and Pappy spent most of every day on the bullhide. It took six darkies to grab hold of the bull's tail and keep Pappy tugged into the shade, but we had darkies to spare. There was a lot of Pappy, though, and he wore out a bullhide in quick order.

"Blast you, Raek," Pappy said, "go to Natchez. Go to New Orleans. Ballarol can support a lady. It's more on your account. We ain't had a lady on the place since your mammy died in '14: Sort of a middle-sized widow, Raek. You find her, and then I'll get around to pay my respects." Pappy closed his eyes again. "But nobody from Natchez-Under-the-Hill," he said.

So I put on my right and left boots brought from Pittsburgh the summer before, and found my pistols. The mare was fresh and we hit the Trace and kept moving upriver toward Natchez.

A lady on Ballarol wasn't strict to my liking. Things were pleasurable as they were. I had turned twenty-one without bringing a wife down-river, and now Pappy wanted one brought for himself. Pappy, who spent most of his time asleep on a bullhide. I figured you could spend twenty thousand dollars a year just as brisk on things a man did and could use. A lady at Ballarol!

Nobody stopped me on the Trace and I came into Natchez about boat time in the afternoon. I remember it was hot.

"Raekham Ballarol!" It was Simon Canought and he stood on the piazza of the Parker Hotel. I swung off the mare and tossed the reins to a darky and stepped onto the piazza. "Hot, ain't it?" Sime said it as if he wasn't just sure. He turned around, and I followed him into the bar. Sime put his belly tight to the mahogany and tossed a coin on the bar.

"Piseos," he said. "Two piseos, and then maybe two more." *(Continued on page 62)*

She tried to stand up and I grabbed her. I said, "What're you doing?" She kept kicking at me, squealing

The HALF-NAKED Truth

BY LAWRENCE G. BLOCHMA

The police found the young lady running down the street screaming at 2 A. M.

She was Lieutenant Ritter's problem, but Dr. Dan Coffee found the solution

THE redheaded stranger strode through the detectives' squad room with the silent disdain of a man about to foreclose a mortgage on the police station. He opened the door marked "Private—Keep Out" and kicked it shut behind him.

Lieutenant of Detectives Max Ritter did not look up from the daily morgue report. He said, "I didn't hear anybody knock."

"Shrewd observation, Ritter," said the redhead. "I didn't."

Ritter's eyes raised defiantly, to contemplate a sturdy individual with the contours of an oak filing cabinet. The man's face, his lips, his ears, his eyebrows, and the close-cropped hair of his temples were all the same color of brick-dust red. He seemed to be built exclusively of straight lines—his mouth, his shoulders, the span of his invisible eyebrows. Ritter was considering the best means of ejecting his visitor when he noted a bulge under the left armpit, which could be a shoulder holster. There was an undefinable familiarity in the visitor's manner which made Ritter think he might be a colleague of sorts.

"Sit down," the lieutenant said.

The stranger planted one haunch on a corner of Ritter's desk and dropped a card on the blotter. The card read: Peter Lovering, Private Investigator, 408 W. 14th St., New York City. WA 4-2354.

"Ever see this woman?" Lovering asked, handing Ritter a photo.

Ritter studied the regular, handsome features. The woman was young, probably in her early twenties, but her eyes were old. She was beautiful in a hard, dark, cosmetic way.

"No," said Ritter. "Actress?" He tossed the photo back.

Lovering let the photo lie. He looked at Ritter squarely. "She was a night-club dancer," he said. "But she wouldn't be dancing in Northbank."

"What's she hiding from?"

"Look, Ritter. I don't want this woman jugged. I just want to find her. Understand?"

Ritter sighed. He was a slim, tallish young man with dark, curly hair. He might have been aesthetic-looking if he were not quite so homely. And his sad, intelligent eyes deplored the wholesale flexing of muscles that seemed so necessary in his profession.

"I wish you private dicks would all quit trying to act like Humphrey Bogart," Ritter said.

"Look, Ritter," Lovering interrupted. "I'm acting for this woman's husband. He wants her back, that's all—and no fuss. She came to Northbank three weeks ago with another man. They took an apartment at the Whippet Arms, just across from the bus terminal, under the name of Mr. and Mrs. George Taylor. They paid two months in advance and had a phone installed. They were still there the day before yesterday, because the woman wrote to her husband from there. But they moved out last night, bag and baggage. They didn't ask a rent refund, they didn't have the phone disconnected and they didn't leave a forwarding address. Will you help find her?"

"What's her name?" Ritter asked.

"Her maiden name was Nancy Wynn. She may use that."

"What's her married name?"

"I'm not free to say—yet. She's five foot three, weighs 115 pounds when she's eating. Even when she's not, she curves in the right places. She has a walk that makes men follow her in the street, but she doesn't mean it. She also has gray eyes and dark brown hair—almost black. Okay?"

"We'll help." Ritter was making notes. "Where do I reach you?"

"You can't. I checked my toothbrush and clean shirt at the airport. If I bed down somewhere tonight, I'll let you know where."

Ritter clipped his notes to the photograph of Nancy Wynn. "All right, Lovering, you keep in touch."

Ritter watched Peter Lovering go out. Then he stuck his head through the door to the squad room and grunted in the general direction of the card game near the window. "Brody," he called.

One of the detectives put down his cards and stood up.

"Tail that redhead, will you, Brody?" Ritter said.

EARLY next morning Lieutenant Ritter sauntered into the pathology laboratory of Pasteur Hospital. His friend Dr. Daniel Webster Coffee waved a greeting with one hand and went on twisting the focusing knob of his microscope with the other.

"Hi, Doc," said the police detective. "I got problems."

"So have I, Max," the pathologist said. "What's on your mind?"

"Plenty," said Max Ritter. He talked rapidly and without interruption, although Dan Coffee seemed completely engrossed in his microscope. He knew that the pathologist was listening with one ear, and when he reached the point at which he judged Dr. Coffee would enter the conversation, he stopped. Dr. Coffee looked up.

"You say she wore no clothes at all, Max?" Dan Coffee asked.

"She might just as well have been stark naked," Ritter replied. "A pearl necklace ain't clothes. And you could read a phone book through that black chiffon negligee she had on."

"Where is she now, Max?"

"Right here in Pasteur Hospital. There was a cold breeze blowing down Taft Avenue last night and she was starting to turn blue. So the boys called an ambulance and then they called me. I had the ambulance shunted over here to your shop. Will you take a look at her?"

"If you want—but she doesn't sound like a case for pathology," said Dr. Coffee. "What makes you think she's not a mental case?"

"I got reasons," said Ritter. "The hospital put up an argument at first, but they can't refuse an emergency case. And a half-naked lady running down Taft Avenue at 2:00 A.M. yelling bloody murder rates as an emergency in my book. So you can bill the City of Northbank for any tests you make, and make plenty, Doc. I may be in a spot."

"How, Max?"

"Meet me for lunch at Raoul's, Doc, and I'll tell all. But I got a couple of angles to check meanwhile."

"One thing more. Are you sure the lady wasn't drunk?"

"Well, she acted drunk, Doc, and the boys thought she was. She couldn't talk straight. But she didn't smell drunk. She smelled expensive. No liquor on her breath, but she sort of gave off sweet fumes of Who-began-it's Number Ten, or some other $50-an-ounce number. "Is there any poison that smells like expensive perfume, Doc?"

"You think she was poisoned?"

"I'll tell you at noon. By the way, you can tell 'em to write 'Nancy Wynn' on her chart. That may be her name."

When the detective had gone, Dr. Coffee went down to ward F. He talked briefly to the resident, who told him that Nancy—if that were her name—had been in a coma since she was admitted. The pathologist walked down the row of white beds to look at the sleeping patient. Her dark hair fanned out on the pillow. Her face, motionless and very pale, startled Dr. Coffee strangely. An uneasy tremor ran through him, as though he were reacting unconsciously to the presence of some —something like death. Dr. C did not believe in the occult psychic auras, so he shrugged impression as purely subjecti reached for the girl's wrist. Th nothing unworldly about the p respiration, and yet—

Dr. Coffee examined the gir more closely, trying to analyze happy, almost tragic beauty features were symmetrical, eve cate, yet they were tense. E sleep her lips and the muscles face were not relaxed. She wa ing something. Fear, perhaps of what?

GENTLY Dr. Coffee raised cy's eyelids. The smoke-gr stared at him, unseeing. He t her white, well-molded arms. H particularly interested in a pe roughness on the underside forearms, a series of tiny scar two small welts like mosquito The girl moaned faintly.

Dan Coffee exchanged a few with the medical resident an turned to his own domain in th gical wing.

"Dr. Mookerji," he called opened his laboratory door.

Dr. Motilal Mookerji, reside pathology, Calcutta's gift to N bank, was poring over a tray o affin blocks, seeking one con a fragment of thyroid tissue. T tund Dr. Mookerji rose to h five feet four, including the hug turban which coiled and sp upon his head like a pastry dream. He pressed the tips o brown fingers together to salut senior pathologist.

"Greetings, Doctor Sahib, Hindu said. "Five times greet

"I want you to go down to w Dr. Mookerji," Dan Coffee said take a blood sample from a w our friend Lieutenant Ritter sen

"Leftenant Ritter?" The made clucking sounds as he his big head. "We are being co on fresh criminal homicides?"

"No-o," said Dr. Coffee th fully. "At least I don't think s patient came in last night in a apparent delirium, followed by I think she's in insulin shock. set up the colorimeter for a sugar check."

Forty minutes later Dr. Coffe covered that Nancy Wynn's sugar level was at the alarming .03 per cent.

THE SECRET PAPERS OF HARRY L. HOPKINS

BY ROBERT E. SHERWOOD

PART XII. ITALY DOWN FOR THE COUNT

Stalin bitterly accuses the U.S. and Britain of bad faith in postponing D-Day for western Europe. Churchill's scorching reply brings tension to a new high as Italy's collapse fails to relieve the Mediterranean crisis

WHEN Hopkins returned to Washington from Casablanca he found a formidable pile of clippings of newspaper attacks upon him and his wife. There was a fantastic story that Lord Beaverbrook gave Mrs. Hopkins emeralds worth half a million dollars for a wedding present; and there was a great deal of sensational material about the dinner for the Hopkinses given at the Hotel Carlton, on December 16th, by Bernard M. Baruch. According to the various reports, there were from 60 to 80 guests present and Baruch paid anywhere from $10 to $40 a person. (I was one of the guests and can say that it was a large party but I haven't the faintest idea what it cost.)

Whatever the statistics, there was plenty of reason to regret the whole episode. The American Magazine had just published an article by Hopkins with the title You and Your Family Will Be Mobilized, in which he wrote of the extreme toughness of the war, and the need for ever-greater sacrifices on the part of the people. He said:

. . . No family should object to meat rationing when they realize the beef and bacon they don't get is being served to their sons and brothers in the Army.

The newspapers had fun aplenty quoting those words together with the Carlton menu, which ran from caviar through beef à la mode, corned beef in jelly and Virginia ham to three kinds of ice cream, plus vintage champagne.

Of course, Hopkins was long accustomed to vilification. He knew that the really savage attacks came from the Patterson-McCormick-Hearst newspapers and were expressive of their hatred of Roosevelt and their temporarily frustrated isolationism. But these attacks were directed at his wife as much as himself, and he was determined to fight back with suits for libel.

Roosevelt talked him out of this, saying, "This is a fight in which you would be licked before you could even get started. The whole proceedings would give them a glorious opportunity to pile on the smears—and, after what you would have to take, what earthly good would it do you to win a verdict and receive damages of one dollar?" Hopkins reluctantly accepted this good advice. There were other more important causes for concern.

When Stalin received the message dispatched by the President and the Prime Minister at the end of the Casablanca conference, he cabled Roosevelt:

I received your friendly joint message on January 27th. I thank you for the information on the decisions taken in Casablanca regarding operations to be carried out by American and British armed forces in the course of the first nine months of 1943. As I understand that by the decisions taken regarding Germany you yourselves set the task of crushing it by opening a second front in Europe in 1943, I should be very obliged to you for information on the concrete operations planned in this respect and on the scheduled time of their realization.

As regards the Soviet Union, I can assure you that the armed forces of the U.S.S.R. will do everything in their power to continue the offensive against Germany and her allies on the Soviet-German front. Circumstances permitting, we intend to wind up our winter campaign in the first half of February of this year. Our troops are tired, they need rest and will hardly be able to continue the offensive beyond that time.

Eisenhower Expresses an Opinion

This was not easy to answer. The situation in Tunisia was discouraging, and Eisenhower sent a long, detailed cable expressing the opinion that it would be dangerous to launch the Sicily operation as planned. If it were to be attempted too early, said Eisenhower, "it is unlikely to succeed."

When Churchill read this message he immediately cabled Hopkins:

I was much upset about Eisenhower's message. Our people feel pretty sure that they can get their side of things ready for the June date. . . . I think it is an awful thing that in April, May and June, not a single American or British soldier will be killing a single German or Italian soldier while the Russians are chasing 185 divisions around. . . .

The most important consideration of the war now was the results of the battle of Stalingrad. Russia, no longer a beleaguered fortress, was emerging as one of the mightiest of world po

On February 18th Churchill was taken seri ill with pneumonia. Hopkins immediately c him the expression of anxiety that was felt by millions of people.

Churchill's doctors called him "the world's patient" and he was described as "restive and tankerous and constantly calling for the forb cigars." He also never stopped dictating cab commanders on all the battle fronts and to R velt and Hopkins in Washington.

Anthony Eden arrived in Washington on M 12, 1943. According to a memorandum from bassador Winant to the President, Eden's m was to be "limited to the most effective meth preparing for meetings between the governm of all the United Nations to consider ques arising out of the war." The main question w consequence of victory at Stalingrad.

Anthony Eden Visits the President

The first notes that Hopkins wrote after E arrival were dated March 15, 1943, as follow

The President, Mr. Eden and I dined last and discussed, in great detail, the postwar graphical problems of Europe.

RUSSIA. Eden stated he thought Russia our most difficult problem; that she undoub had two different plans up her sleeve—one on British-American co-operation with Russi the other on the assumption that the U.S. w withdraw from all interest in European a after the war. Eden said he believed that R preferred and hoped for the former, because was not prepared to face the implicati Russia's control over European affairs, and land would probably be too weak to face alone diplomatically. I asked him what he th Russia's demands at the peace table wo Eden said he thought they first would deman the Baltic States be absorbed as states U.S.S.R. . . .

The President stated that he thought this action on the part of Russia would meet a good deal of resistance in the United Sta England; that he realized that, realistic Russian armies would be in the Baltic S the time of the downfall of Germany and n us can force them to get out. He, the Pres said he thought the United States woul Russia not to take them into the U.S.S.R. a new plebiscite . . .

POLAND. Eden said he thought Russia demand very little territory of Poland . . . lieved Stalin wanted a strong Poland, pr the right kind of people were running it .

CZECHOSLOVAKIA, RUMANIA, TU BULGARIA, GREECE. Both Eden and th dent thought that none of these countries real difficulties from a geographical point

AUSTRIA and HUNGARY. Both agr Austria and Hungary should be established dependent states. Eden said he thought would want to be pretty arbitrary about H because the Russians do not like the Hun and that Stalin would be unwilling to giv any favors at the peace table.

GERMANY. Eden said that the m portant thing, on which we had to get a of the minds in regard to Germany was th tion of whether we were going to be able with Germany as a unit after the war, dis them, etc., and also for the peace, or whet were going to insist that it be broken up into independent states. Eden said that from th ferences he had had with the Russians he w that Stalin . . . had a deep-seated distrust Germans and that he would insist that G be broken up into a number of states . . .

On March 16th, Hopkins wrote of a with Litvinov:

I called to see the ambassador this eve asked him what he believed the Russian d at the peace table would be. He said tha of course, would want the Baltic State Russia considered them now part of the U.S that they had always been historically p Russia, apart from the fact that they were e to them for security reasons . . .

On March 27th, there was a meeting of velt, Eden, Hull, Welles, Halifax and

, Assistant Undersecretary of State in the n Office, which Hopkins described as follows: I raised the question of the sixty or seventy nd Jews . . . in Bulgaria . . . threatened with hination unless we could get them out and ressed Eden for an answer to the problem. le replied that the whole problem of the Jews ope is very difficult and that we should move autiously about offering to take all Jews out untry like Bulgaria. If we do that, then ws of the world will be wanting us to make offers in Poland and Germany. Hitler well take us up on any such offer and there are not enough ships and means of trans- on in the world to handle them.

n said that the British were ready to take 60,000 more Jews to Palestine but the m of transportation . . . is extremely difficult. Furthermore . . . the Germans would be sure to attempt to put a number of their agents in the group. They have been pretty successful with this technique in getting their agents into both North and South America . . .

During Eden's visit much spadework was done on the organization of the United Nations. From this work there resulted the UNRRA organization and the conferenees at Moscow, Teheran, Bretton Woods, Dumbarton Oaks, Yalta and finally San Franciseo.

At a press conference on March 30th after Eden's departure, Roosevelt said, "If you want to be didactie and put it in terms of figures, I would say that so far . . . we are about 95 per cent together."

I asked Hopkins at the time what the other five per eent consisted of, and he replied, "Mostly France." Eden had stated the British view that they would greatly prefer to deal with one strong Freneh authority, representing all possible elements of Freneh opinion.

Roosevelt and Hull wished to deal separately with the French authorities in the Paeifie Islands and with those in Martinique. Roosevelt persisted in his belief that no single French authority could be set up by the Allies and recognized by them, without eventually ineurring the bitter resentment of the people of metropolitan Franee itself.

After the Eden eonferences in Washington, Churchill eabled, asking Hopkins and Gcneral Marshall to join him for a meeting with Eisenhower in North Africa. The main purpose of the conference was to expedite the launehing of the Sieilian Operation and to determine the answer to the question: "Where do we go from there?"

It was decided later, *(Continued on page 48)*

President Roosevelt and the Earl of Athlone, Governor-General of Canada (seated), Canada's Premier Mackenzie King and Winston Churchill (standing) have reason to smile. As the Quebec Conference meets, Mussolini has fled and Italy is putting out peace feelers

An Affair OF STATE

Jeff Baker meets a wartime Russian friend in Budapest. Leonides warns they will be fighting each other unless Jeff helps him secretly fight to overthrow the Kremlin. This is the second of four parts in a serial of high intrigue

BY PAT FRANK

The Story: After seven years in the Army, JEFF BAKER returns to the States early in 1949, determined to do something to help his country maintain peace in the world. Believing that only a practical application, through our diplomatic corps in Europe, of the democratic principles on which our government was founded can avert war, Jeff applies to the State Department for a commission as a Foreign Service officer. At a cocktail party in Washington he meets SUSAN PICKETT, young widow of COLONEL PICKETT. She is secretary at the important nine-o'clock State Department conference. Although she and Jeff are attracted to each other, she tells him, "I won't have another man. I'm afraid I'll only lose him in another war. I couldn't stand that." Jeff tells her that she is afraid to take a chance on the world, and leaves her. During Jeff's oral exam for the State Department, GERALD MATSON, in charge of the Balkans Division, raises strong objections because Jeff is not "hardheaded" enough. But what Jeff says about war appeals strongly to the Secretary of State, and Jeff is accepted. He is assigned to the U.S. embassy in Budapest. Shortly before he leaves, he receives a call from HORACE LOCKE, a lifelong friend of his father. Locke, once a powerful man, is now in an obscure position, but he shares Jeff's fears and ideals about the world, and tells Jeff to call on him if he ever needs advice and help. As Jeff is packing, the phone rings. It is Susan Pickett. She has heard he is leaving. Jeff goes to her apartment, and aware of the little time remaining, takes her in his arms and kisses her. She responds warmly. Later Susan tells Jeff goodby in the airlines terminal as loud-speakers announce, "Flight 86, loading at gate 3 for Shannon, Prague, Vienna and Budapest."

JEFF BAKER got his assignment his first night in Budapest. He had, of course, reported to the minister the morning of his arrival; that is, he reported to Morgan Collingwood, the consul general, who was senior Foreign Service officer, and Morgan Collingwood had presented him to Admiral Blankenhorn, chief of mission in Budapest.

Mr. Collingwood was a slight, balding man who looked like the oldest and most inconspicuous vice-president in a bank. But the admiral looked like an admiral. His hair was white as the crest of a breaker, his face red as if he had just stepped off a gale-swept bridge.

He sat behind an executive desk framed between the Stars and Stripes and the two-star flag of his rank. On the wall behind him were pictures of Theodore Roosevelt reviewing the Great White Fleet, Franklin D. Roosevelt when he was Assistant Secretary of the Navy, and the battleship Wyoming.

Mr. Collingwood said, "This is Mr. Baker, just in this morning from Washington."

The admiral said, "Glad to have you aboard, Baker."

On the admiral's desk were tiny, perfect models of four destroyers, a cruiser and an aircraft carrier.

"Quincy Todd met the plane at Matyasföld, as usual," said Collingwood.

"Young Todd," the admiral said, "makes an excellent flag secretary. Speaks the language. You don't, do you?"

"No, sir," Jeff said. "I've got Italian and French and German, but no Hungarian. I was going to take lessons."

"Won't need to," said the admiral. "It's the same here as everyplace else. All the educated people speak English. Now you take me. I've been every place in the world Spent my whole life traveling. Never had to speak anything but English."

The admiral asked how things were at home, and Jeff told him things were about the same, and the admiral shook his head as if that were bad and said, "I want you to come up to my place for dinner tonight. I want a firsthand picture of the situation in the States. Like my intelligence fresh. Besides, Fred Keller will be there. I want you to work with him."

"Is Mr. Keller in the building?" Jeff asked.

"No, he's not in the building. You see, Baker, he has a very, very special job. Very delicate. He operates entirely outside the legation. Deals with people who can't afford to be seen going in and out of here. You understand, don't you?"

"Oh, yes, sir. You mean the Atlantis Project."

Jeff knew from the way Collingwood started, and from the admiral's face, which lost all its affability, that he had said the wrong thing.

"Where did you hear Atlantis Project?" the admiral demanded.

"In Washington, sir."

"Fools!" the admiral said, slowly shaking his head from side to side. "Here we break our necks insuring security and those blabbermouths talk about it all over the place."

"I was warned that it was extremely confidential," Jeff protested.

"Confidential, hell! It's classified top-secret! They had no right to tell *anybody!*"

The admiral let out his breath, almost in a whistle, and said, "Well, I guess there's no damage, because I'm going to use you on the job. But it's just as I've always said—it's a mistake to have generals running the State Department. They don't know what security means. Ought to have Navy men."

The admiral slapped his palm on the desk and capsized the cruiser. "Now, look, *(Continued on page 32)*

Jeff asked Rikki to dance—he didn't want her to talk any more right then. In a strange world this was a very strange city

PLAYGROUND IN THE SKY

Jasper's 4,200-square-mile sea of mountains is Canada's largest national park area. The ice age still lingers there, and Americans get a warm welcome. A heated swimming pool, a golf course, well-mannered bears and gorgeous scenery help draw the tourists

BY JOHN KORD LAGEMANN

LEO RACKOWE

CANADIAN NATIONAL RAILWAYS

DESIGNS FOR TOURING—XI

ROUTES: From western U.S. "gateway" at Spokane, Washington, take U.S. Route 95 to border; follow British Columbia Route 4 to Radium, 1-B to Mt. Eisenhower, Alberta, Route 1 to Lake Louise, then scenic Route 1-A to Jasper. Total distance: 537 miles. Gravel roads on Canadian side.

From continental U.S. "gateway" at Shelby, Montana, take U.S. 91 to border, follow Alberta Route 4 to Lethbridge, Route 3 to Macleod, Route 2 to Calgary, Route 1 via Banff to Lake Louise, then Route 1-A to Jasper. Total distance: 525 miles. Gravel roads on Canadian side.

Rail passage via transcontinental Canadian National Railways System.

Identification but no passport required at border. Americans entitled to bring back $400 Canadian purchases duty-free if they have been 12 days in Canada, $100 if they have been there less than 12 days.

ACCOMMODATIONS: At Jasper Park Lodge (650 guests) single rates, American plan only, begin at $10. At Athabasca Hotel in Jasper Village single rates begin at $3 European plan. Numerous "bungalow camps" throughout park offer heated log cabins with mountain views at $3 and up European plan, $7 and up American plan. Columbia Icefield Chalet overlooking glaciers from $5.50 and $8.50 European plan. Accommodations at Maligne and Medicine Lakes and Tonquin Valley are included in price of motor and pack-horse tours.

FOOD: Outstanding cuisine at Jasper Park Lodge and Columbia Icefield Chalet; reliable throughout the park.

WHAT TO WEAR: Informality is the rule, though some "dress for dinner" at lodge.

FOR FURTHER INFORMATION: Write to Mr. Leo D. Dolan, Director Canadian Travel Bureau, Ottawa, Ontario.

FUR traders and explorers crossing the Athabaska Trail over the Canadian Rockies used to say you couldn't find a better host than Jasper Hawes, the yellow-haired ex-Missouri mule skinner who drifted up here to run trap lines and stayed on to run a way station for the Hudson's Bay Company.

Travelers were glad to share the one-room log cabin with Jasper, his Indian wife and their two counted young. Beds consisting of bearhide spread on the puncheon floor looked good to the and at mealtime they smacked their lips over broiled trout, buffalo steak or a Jasper House specialty wildcat roasted whole and stuffed with chunks mountain ram.

Jasper vanished with his family 130-odd years ago when he built a raft and tried to ride the swirling Fraser River down to the coast. But his name and his hospitable reputation stuck to the wild 4,200-square-mile sea of mountains which is Canada's largest national park and one of the most stupendous scenic areas anywhere in the world.

Wayfarers today are mostly well-heeled Americans who come by car, plane or air-conditioned train to gaze, golf, swim, ski, climb or do nothing at all under a mountain sun which produces exquisite tans at daytime summer temperatures averaging around 75 degrees F. At swanky Jasper Park Lodge they rough it in log cabins containing up to five a

sper's most celebrated beauty spot. Here emerald-hued Lac Beauvert reflects snow-laden peaks. It is a "must" on the list of every visitor

ooms, brave the glacial waters of an open-ming pavilion heated to a constant 73 de-, and venture out across the carefully wilds of a championship golf course where atest danger is losing a golf ball to a play-

has been a national park for forty-one t few except hardy mountaineers ever saw n until 1922, when the Canadian National opened the 60-cabin lodge on the land-hores of Lac Beauvert and set out to com-h the Canadian Pacific's long-established t Banff and Lake Louise. Besides the lodge a score of smaller hotels, bungalow camps e ranches to choose from. (See Tour Box.) Banff, where the mountains tower up odeling distance of your hotel window, illage lies in the broad, green Athabaska here the Rockies, like ancestors of time, nd to be looked upon at a serene and stance. The transparent air of the valley range trick of liquefying perspective and you feel as if you were treading interplane-ce among separate worlds of polar snow, serts, flowering meadowlands, tractless for-aerial lakes of the deepest green, violet, in-balt and ultramarine.

where you sit fanning yourself right now e hard to believe, but the ice age isn't quite over yet. From the Jasper-Banff highway you'll see its fantastic remnants in the Columbia Icefield —the 150-square mile "roof of the Rockies" which holds the greatest body of ice outside the Arctic Circle. Water from the mile-wide rivers of ice that creep down the mountainsides flows into the Atlantic, the Pacific and the Arctic oceans.

The glaciers will still be there when you get there, but they're retreating fast, some at the rate of over 30 feet a year and you can measure their movement by waves of fresh rubble they've left in front of them. Guides can always rely on a certain number of tourists to ask, "Where have the glaciers gone?" The stock answer is still: "Back up the mountains, ma'am, to fetch more rock."

Tall Tales of a Wilderness Pioneer

Whenever an American and a Canadian get to arguing over the comparative wonders of their mountains, the Canadian is pretty sure to fall back on the late Dave MacDougall, a Banff rancher and outfitter who spent a lifetime roaming through this country and embellishing its wonders. How much does it snow up here? Well, come spring thaw, Dave could generally recognize his winter camp-sites by the burnt-off tops of tall pines where he'd built his campfires.

As for the size of those pines, Dave was driving his team and wagon back to the ranch one day when he found the bridge over Ghost River Can-yon washed out by floods. He had to cut down one of the trees along the bank to drive across. "You mean to say you drove your team over a fallen tree?" a listener once asked him.

"Shucks, no," said Dave. "That tree was holler and I drove 'em through it."

No less fabulous than Dave MacDougall's tall tales of the Rockies are the actual doings of the six Brewster brothers, who grew up on a remote mountain ranch near Banff, where their pioneer father made a precarious living by guiding wealthy big-game hunters from England and the States. In their infancy, rifles and reins took the place of rat-tles, and by the time most boys climb out of their play pens the Brewsters were scrambling over the mountains.

Besides guiding hunters, the boys broke trail for the railroads and highways; and when the tourists started swarming in over the border, Brewster-owned hotels, restaurants, filling stations, bus lines and guide services were way out in front of com-petitors. At least one of the brothers, the late Jim Brewster, became a millionaire—without changing his ways in the least. During the royal visit in 1939, when he took the king and queen to look at the big-game trophies in his parlor, Jim opened the front door and *(Continued on page 73)*

The leading man had walked home with Jane last night, but nothing happened

COLLIER'S
SHORT SHORT

IF THERE is a lobe in the human brain whose special function is suspicion, Charlie Jordan had one of abnormal size and activity. In one way it was a help to him. He had never been known to cash a bad check and no young teller in the Gotham National Bank had a better future than Charlie. But in most ways Charlie's eternal suspiciousness was a nuisance, and I guess it was partly irritation and partly the wild notion of teaching him a lesson that made me suggest that he hire a private detective. His reaction was to look at me with respect and grudging admiration.

"Now you're talking sense," he said.

"It's nothing of the sort," I recanted testily. "It would be a crime to put a detective on a girl like Jane."

"That's exactly what I would have said a month ago, before I came to my senses. But where there's smoke—"

"—there's always fire," I chorused with him. It never seemed to bother him when I chimed in like this. He just nodded approvingly.

The next morning, when business slacked off, Charlie scratched on the grille between our cages and I drifted over.

"Same thing happened last night," he announced with gloomy satisfaction. "Jane broke a date with me."

"Who is she going with?"

"I can't find out." Charlie said bitterly.

"You mean that you're just guessing that she's running around with another man?"

"Get this," he said grimly. "One month ago Jane suddenly announced that hereafter we couldn't see each other Monday, Wednesday and Friday nights. I simply asked, 'Why not? What's up?' And she practically snarled at me and said if I were going to take that attitude, she'd be damned if she'd tell me. Then she started breaking dates and refusing to explain why. She says that she will never marry a man who can't trust her and I'd better try to develop a little ability in that direction."

I could see her point all right, knowing Charlie as I did. Still, doubt crept into my own mind. Jane was a very pretty girl, a remarkably pretty girl. If it weren't that Charlie was my friend, I'd have been hot on her trail myself long ago. You didn't have to be as suspicious as Charlie to take it for granted that plenty of eligible men would breathe hard in her presence.

The fact was that I had always been a little puzzled at Charlie's success in capturing a girl like Jane. My theory was that he proposed when she was thinking of something else and she absent-mindedly accepted him. Or maybe she thought she saw the shy little boy women are supposed to fall in love with, though the only way I could picture Charlie as a little boy was with his eye plastered to somebody's keyhole.

"When Jane broke that date last night," Charlie exploded, "she shook my faith, shook it badly. To hell with the expense. I'm going to expose her."

"How?" I asked.

"The way you suggested," he said with grim relish. "Tonight a man from the Good Will Detective Agency will start shadowing her."

I was impressed. Charlie was not the man to throw money around lightly and a private detective would draw no dime-store fee. He was burned to the first degree. "How can you afford that sort of thing?" I couldn't help asking.

"By thinking of it as an investment in my own future happiness. I inherited—well, a small inheritance." I registered about ten thousand automatically. "It's worth five hundred to guarantee that my wife will be trustworthy." He turned away and I started sorting deposit slips. The chief teller was approaching.

Three mornings later, Charlie passed behind my cage and muttered out of the corner of his mouth, "Meet me by the water fountain." We were lucky; we had the place to ourselves. "Jane," he announced in a mordant voice, "has joined the Village Players. Three nights a week she rehearses; nights she breaks dates with me, there are extra rehearsals."

"Then everything's okay?"

"No." Charlie looked as if he were sucking quinine. "It's worse than I suspected," he said hollowly. "She's playing Sadie Thompson in Rain. Don't you see that a girl like Jane wouldn't take the role of a prostitute if she weren't in love with the leading man?"

"Charlie," I said soberly, "sometimes you frighten me."

He gave me a fatherly clap on the shoulder without relaxing the undertaker's expression on his broad face. "Glad you're finally waking up. I've worried about you. Dangerous to be so naïve." He relapsed into dark meditation, then grated, "Another week, another report—then I'll really tell her off."

Charlie's influence was insidious. Several times I caught myself imagining Jane in the leading man's arms with the light of true love in her eyes. When the day arrived for the next report, I was in a stew of curiosity. The detective came to make his report at the bank. It was funny, but this suddenly made the whole affair seem more grave. He was younger than I would have assumed and had one of those eager, almost painfully honest faces. Even Charlie would have to acknowledge his integrity.

AFTER he'd gone, Charlie gave me the high sign and I wandered casually out to the water fountain. The leading man had walked home with Jane last night but the detective swore nothing happened. Furthermore, he advised Charlie to drop the investigation. He was positive Jane was not deceiving Charlie.

Charlie snorted. "Detective!" he said with acid. "It's so appallingly obvious that Jane and that pretty boy knew he was trailing them. Of course nothing happened—then. Know what the idiot did? He went home, but don't try to tell me that matinee idol did the same thing. All he had to do was walk around the block!"

"You're keeping up the investigation?"

"Certainly. After the going-over I gave that detective, I think I can expect some real results now."

Two weeks later, Charlie strode into my cage and held out a letter. "How do you like that?" he demanded.

It was from the Good Will Detective Agency. It informed Charlie that their investigation, scrupulously and conscientiously carried out by one of their best operators, had established beyond doubt that the suspect was consorting privately with no man, that her attendance at rehearsals of the Village Players signified a genuine interest in dramatics and nothing more, and that there… the slightest evidence of her en… involvement with her leading m… Lee Sandhover, or with any othe… Accordingly, the agency could or… sider the case closed and forthw… turned his check in advance payi… the next scheduled week's work… they could not conscientiously…

et all "DINNER-QUALITY" meat every time!

Swift's Premium Franks

the flavor-protecting package

Whether you serve them as America's favorite snack (the simple frank on a bun) or as a hearty, "quickie" supper, you want links that are *succulent and all nourishment.* This sealed, cellophane package is your assurance. For SWIFT'S PREMIUM FRANKS are *all "Dinner-Quality" meat.* Tender beef and juicy pork—rich in energizing protein. Just a *7-minute simmer* and they're ready to serve piping hot. Packed 8 to 10 to the pound, they're **MADE FRESH DAILY FROM COAST TO COAST.**

Beat the heat with this 10-minute treat!

FRANKS AND FRUIT SALAD

Simmer 2 pounds of Swift's Premium Franks in water for about 7 minutes. Drain and place 2 on each toasted bun half. Top with hot, undiluted mushroom soup and grated cheese. Serve with chilled fruit salad. Yield: 8 servings.

Listen to ARCHIE ANDREWS ON NBC, SATURDAYS, 10:30 A.M., NEW YORK TIME

A 'ROUND THE CLOCK FAVORITE!

SWIFT'S BROOKFIELD Pure Pork SAUSAGE

In links or meat for patties. Famous for its "just-right" seasoning. Serve it for better breakfasts, hot midday meals and speedy suppers.

FOR SUMMERTIME LUNCHES, SUPPERS, PICNICS!

SWIFT'S PREMIUM Table-Ready MEATS

like tasty Cooked Specialty, a delicious luncheon item with no bone, no waste—it's all meat. Keep some on hand for work-free, hurry-up meals!

AN AFFAIR OF STATE

Continued from page 26

Baker, from now on I never want you to mention the word Atlantis. Is that clear?"

"Yes, sir."

"And you'll be at my place at seven."

"I'll be there, sir."

Jeff spent the rest of the day with Quincy Todd. Todd was a stocky man with pink, round, beardless cheeks. His face looked five years younger than Jeff's, but his double-breasted suit strained to conceal a paunch, and Jeff guessed he was older. He also was a third secretary and vice-consul, but he had slipped into the job that some missions call "stableboy" and others "donkey boy." This meant that he did a great many chores that had nothing to do with diplomacy.

He wheedled gasoline out of the Hungarian Ministry of Transport, argued exchange with the Finance Minister, and fought the Ministry of the Interior, when employees of the legation fell into the hands of the police, or simply disappeared. He knew his way around the Russian *Kommandatura*, and the intricacies of the Soviet bureaucracy. If a truckload of canned food, or a correspondent, or a typewriter or a courier vanished on the road from Vienna to Budapest, he knew where to find it, or him.

He shepherded Jeff from office to office, presenting him to the staff. As he introduced the men, and a few women, he identified them by their jobs. He said, "This is Mr. Kovacs, our chief disbursing officer," or, "This is Captain Reedy, our assistant air attaché." But some he introduced simply by their names, without referring to their jobs. When it was finished Todd said, "Let's have a drink. There's an *espresso* around the corner where I can always get a fair cognac. I'll cut you in on it."

OUT on the street Jeff put aside his thoughts to begin his assessment of the city and its people. Pest was not a ruin like Buda. Here in Pest the streets were free of rubble. New plaster and unpainted boards, ugly as scar tissue, had grown across the wounds in the buildings.

They turned into the broad Vaczi Korut, and then into an alley, and there was the *espresso* with its sign in flaked gold on the glass, Café Molnar. They sat at a table with a top no bigger than a checkerboard, an elaborate steel-and-silver urn on the counter hissed and spat and produced thick Turkish coffee, and a girl brought them the coffee in tiny cups, along with the cognac.

"You want to keep this place quiet," Todd said. "We don't want it overrun by the Dick Tracys."

"The Dick Tracys? What do they do?"

"Everything. We've got the M.I.S., the O.N.I., the C.I.C., the F.B.I. the C.I.D., G-2 from USFA, Central Intelligence Agency, assorted Treasury agents, and our own security people. We're supposed to have more Dick Tracys," Quincy Todd added with some pride, "than any other mission in Europe."

"Don't they get in one another's hair?"

"Well, they spy on one another, and they read one another's mail, and they try to scoop one another on hot intelligence, but they don't exactly get in one another's hair. Theoretically, the admiral co-ordinates their activities. But they do get in my hair. They use all the transport, and eat all the food, and drink all the Scotch at the Park Club, and every once in a while one of them investigates me. It's the price I pay for the maintenance of democracy and Western civilization."

Then Todd talked of the routine of the legation. "The admiral," Todd said, "likes everybody to eat at the mess at lunch. You can have dinner anyplace you want, but it's best to turn up at the Park Club sometime during the evening."

"How about the admiral?" Jeff said.

"All I know," Todd said, "is that when I came here we had a general, and then we had a regular career minister, and now we have an admiral. Maybe it's because they've got generals everywhere else, and the Navy thought it was being discriminated against."

"I never heard of him."

"Didn't you? Out in the Pacific we heard of him. He had a task force. Lost a carrier and a transport. Then he was promoted to COMYDDOCSOUWESPAC."

"What's that?"

"Why, that's Commander of Yards and Docks, Southwest Pacific. He fought the battle of Sydney in Prince's and Romano's. Then he became a wheel in Navy Intelligence, and now he's here. He's not a bad guy. Just security-happy."

"Hope you don't mind. I couldn't find a cork to fit it"

COLLIER'S JEFFERSON MACHAMER

Todd signaled with his eyes, and the girl brought more cognac. She had strong legs that were flattered by her brief dirndl, and she weaved between the tables, her body erect but her hips moving as if she danced. She spoke to Todd in a language that Jeff had never heard before, with a few French phrases surprisingly dropping out of the sentences. Todd replied in Hungarian, and the girl said, "Okay, okay," and smiled at Jeff.

"What's going on?" Jeff said.

Todd smiled up at the girl as if they were discussing her beauty. "You've got to be careful about these women in Pest. Now you take Marina, here. She's a dish, all right, but she's a Rumanian Gypsy, and if you ever fell for her you'd find yourself involved with her six brothers, three sisters and maybe her whole tribe."

"I'm not going to let it worry me."

"You're not going to be a dedicated man like your boss, are you?"

"My boss? Who?"

"Fred Keller."

"How do you know he's going to be my boss?"

"My boy, in a mission like this everybody knows everything."

They left after another drink, and Todd dropped him at his hotel. "I'll have transportation for you at six thirty," he promised. "Most of our vehicles are jeeps, but I'll pry loose a staff car for you tonight."

While he shaved Jeff wondered what it was about Quincy Todd's speech that seemed so familiar, and yet so irritating and strange. It was not until he was on the way out the Andrássy Utca, which slices the city from the river to the suburbs straight as a sword cut, that it came to him. He had been taking stock of the passing traffic, noting that the cars and trucks were shabby as the people.

Then he realized what it was that was familiar and yet queer about the way Quincy Todd talked. Automobiles weren't automobiles. They were vehicles, or transportation. A garage was a motor pool. Hell, he thought, it's like being back in the Army. . . .

The admiral lived in the austere legation residence, standing behind its statcly poplars and circular driveway in the embassy section that adjoins the Városliget, the big park that was like Rock Creek Park in Washington. A uniformed doorman bowed Jeff out of the sedan, and a butler took his topcoat and black Homburg and said, "You're Mr. Baker, sir? The admiral is waiting for you in the library." He led Jeff down a long hallway, deeply carpeted, rich with murals and statuary that reflected the good taste of some former occupant, slid open a pair of double doors. Jeff walked through them, and met a quarter-deck bellow: "Watch where the hell you're putting your feet!"

Jeff stood like a crane with one foot in the air. He looked down. He had almost stepped on a model battleship. It was one of a fleet that sailed through a narrow channel of leather-bound books across an isthmus of Oriental runner. The admiral was on his hands and knees in the middle of another fleet on the other side of the room, glaring up at him like an angry bulldog. "All right, Baker, come in," he growled. "Don't stand staring like you never saw me before."

"Yes, sir."

The admiral sat back and crossed his legs. That morning he had been wearing a tweed suit, but now he was Navy, his uniform coat across the back of a chair. Jeff guessed that he changed into uniform at the end of a day, for comfort, the way some men put on a dressing gown. "I'm working out a problem," the admiral said. "Want to join me? Move some of these ships around?"

"I'll try," Jeff said, "but I'm afraid I don't know much about it."

"That's all right. I'll tell you wh do. Take that fleet."

"The one between the books?"

"Yes. The one in the Bosporus. Y got the American fleet, and I've g Russian fleet, over here in the Sea."

Jeff sat down on the floor, cross-l like the admiral.

The admiral's voice and m changed. He was no longer sittir the floor in a Budapest suburb. He a great War Room in Washington with wonderful maps of many sea he was briefing the Joint Chiefs of

"Gentlemen," he said, "the situat as follows. Fighting has broken Berlin, and it appears inevitable within forty-eight hours our land will be swept from the continent o rope. But the Navy has used fore The Navy has mobilized all ava ships in the Atlantic, and dispa them to the Straits, for we know th enemy's first thrust will be at Turke have three battleships, six carrier cruisers and suitable escort destroy the Straits. In the Black Sea the have six battleships, ten carriers, f cruisers and an estimated forty su rines. Now the problem is—"

JEFF interrupted, "Where did the sians get all those battleships an riers? I thought they only had o two."

"They've taken over the British The British are Socialists, aren't the

"Yes, but—"

"Quiet! Now the problem is, sh go into the Black Sea and attac transports which must now be load Burgas, Varna and Odessa—riskin nihilation if the Red fleet is operat a single force—or shall we retreat Mediterranean and accept battle when we have land-based air cover North Africa?"

The admiral stopped speaking looked inquiringly at Jeff. "Wel finally said, "what's your decision?

Jeff rested his elbows on his knee propped his chin in his hands, and ined the fleets. "I'm the America miral—right, sir?"

"Correct."

"Well, I'm going to get my fle from between these books—out Bosporus, I mean—right now, and them west as fast as they can go, an I'm going to load about ten atom b on B-two-nines and B-three-sixes field in North Africa, and then I'm to blow hell out of the Russian Burgas, Varna, Odessa, and mayb grade and Moscow too."

"That's not fair!" the admiral tested. "I never use atom bombs in problems!"

"They're available, aren't they? asked.

"It spoils the fun," said the admi

He frowned, as if the subject bur and troubled him. "Don't misunder me," he went on. "Atom bombs replace navies. Anybody who thin atom bomb will replace the Navy defeatist. As a matter of fact, the bomb can only help the Navy. It just enough to make atom bombs, got to deliver them, and the best w deliver them is by aircraft carrie we're going to be protected by bigge better battleships, armed with r and guided missiles. The Navy a looks ahead."

They had dry-docked the warsh a bookcase, and the admiral was p on his coat, when Fred Keller a with another guest. Keller greete warmly, and said he had been lo forward to his coming to Budapes that they had a big job cut out for

RCA VICTOR

DIVISION OF RADIO CORPORATION OF AMERICA

he introduced Jeff to William Quigley, who said, "We met this morning."

"I'm sorry," Jeff apologized, "I didn't place you."

"Perfectly all right. I like people to forget me."

Jeff thought this a queer statement. As they made their way into the dining room he watched Quigley and decided that if Quigley's ambition was to have people forget him, he'd be successful. Quigley was neither short nor tall, thin nor stout, young nor old.

"Quig is in the department's Security and Investigation Division," Keller explained, "especially assigned to our project."

THE dining-room table had been designed to seat forty at diplomatic dinners, but a fence of flowers cleverly set aside one end of it. The admiral and Keller sat at the table's head. Jeff was on the admiral's right, opposite Quigley. The admiral asked Jeff whether he'd seen the big heavyweight fight, and Jeff said yes, on television. The admiral said he thought too many Negroes were winning fight championships.

Jeff said the prize ring was one of the few places where a Negro had an absolutely equal chance. "You never hear of Negro tennis or golf champions," he said, "because they're not allowed to join our country clubs."

Keller said, "It's good propaganda to have colored champions. It counteracts the Russian line. When they start talking about our racial frictions, that's one fact the Reds can't get around."

"Well, Fred, there may be something in what you say," the admiral admitted. "It may be an international asset, but it doesn't sound any good at home. Ever since Louis won the title, the Negroes have been pushing. Why, they're even talking about giving them commissions in the Navy."

The white-jacketed Filipino brought in an enormous silver platter, with a hill of black caviar rising in its center. "It was a present," the admiral said, "from the Russian naval attaché. Genuine Black Sea sturgeon. His name is Yassovsky. Met him in Washington in '44. Very decent fellow. Has a reputation as a brilliant tactician."

"Do you see him often?" Jeff asked.

"See him! Certainly not! I couldn't have him here, any more than he could invite me over to his place. Why, that'd be fraternization, wouldn't it? But he did send me this caviar, and I sent him cigarettes." The admiral glanced at Quigley, who was listening without expression. "Anyway, I hear he's left the city."

"That's the report," Quigley said.

They ate curry, and a salad, and tiny pancakes swimming in a flaming sauce, and Jeff answered questions on the political situation at home, careful to give the facts without opinion. The Filipino brought coffee, and the admiral told him, "You can go out now, Juan. Shut the doors and see that they stay shut."

Jeff knew that they had reached the hour for business.

"I think the time has come," the admiral said, "to go from the planning to the operational stage of Atlantis Project. So a general review is in order, not only to brief our young newcomer, but as a recap for ourselves. Right?"

"Right, Admiral," Keller agreed.

"Now as you know, I'm simply in charge of policy. With a war coming on I'd rather be on active service, naturally, but the powers that be have decided that I can be useful in this post. I'll admit that this is the most interesting shore assignment a man could want, and what makes it especially interesting is the Atlantis Project. Do you know that this is the first time we have ever really prepared intelligently for a war? We're doing things now that we don't usually do until the shooting has started. Usually, we get caught with our pants down."

The admiral's voice became rou oratorical, exactly as it had bee he outlined the battle problem library floor. "Europe will be o No doubt about it, and we might accept it. Some of our people i many and Austria may fight their the coast, but at best we can ass American Dunkerque. Ordinarily that we ourselves would be captu interned.

"But I have reason to believe—n definite, you understand—that k sonnel in the Atlantis Project flown out when war becomes ine Now our principal objective is th lishment of an organized undergr Europe to work for us after we'r Is that correct, Fred?"

"Right." Keller began to talk, as an actor underplaying his par his tanned, expressive hands in th reserved of gestures. Hungary w vital to the Russians. It would l the bulk of their armies in the c western Europe, in the hope t would not drop atom bombs o cities.

"They know we're softearte admiral interrupted. "They kn don't like to destroy friendly civili ulations."

Keller went on talking, and Je ized that he must have been the a of the project, for he spoke with man's glibness, answering all the tions before they could be pre "Now I think the Hungarians are ally friendly to us. At this time munist government has been i upon them, but I think it is fair that generally the Hungarians a Communist.

"Our aims are fairly obvious. F most important, we need constant intelligence and information. We on the strategic level for the efficie duct of political warfare, and we on the tactical level for our militar ners. Secondly, our people will le sive resistance, and be in charge of sabotage conducted for morale pu They will operate an undergroun and clandestine radio stations. Th keep alive the flame of freedom. when American forces once again the Continent, our people will the nucleus of a resistance army t attack the Reds in the rear."

He turned to Jeff. "What do yo of it?" he asked.

"It frightens me a little," Jeff sa

"Because it is audacious? The will tell you that no political or m plan—and the two are as one no succeed without risk and daring."

"It isn't that," Jeff said. "It is—I that I'm afraid of making a mistak

"He means the security angle admiral suggested. "And he's quit Frightened all of us, at first."

KELLER nodded. Now it see words were directed at Quigle are all aware, and must continu aware, of the dangers of pene The Secretary, as the admiral sa worried. If the Russians or th garian Communists knew, o guessed at our plans, the result be catastrophic. They'd slit the th our Hungarian friends and sma organization before it was born. don't know what might happen to

"I do," said Quigley.

"I wish you'd quit worrying, Keller said. "There aren't goin any leaks, because nobody is g talk, nothing is to be committed ing, and our contacts with the H ans will be careful, careful, careful take Baker's assignment as a mo

g to be a tight little opera- the admiral. "A nice, nice, operation. And I want to aker, that if we're success- I'm not the kind of a com- o keeps all the glory for himself. There'll be plenty for all of us."

They talked until midnight. When Jeff left, the stars shone cold and blue-white like a handful of diamonds flung against the sky, and the wind blew steadily from the east and cut through his topcoat. He got into the car, and the driver slid the sedan down the Andrássy Utca. The streets were dim, and deserted.

They were halfway through the city when a man's scream of terror filled the street. The sedan jerked forward, but Jeff turned in time for one quick look down the side street. He saw two dark figures running, and in the instant that the side street was in his vision, one man leaped upon the other and brought him to the pavement, precisely as a wild animal drags down its prey.

The car spurted forward for three blocks and then slowed again. "What the hell was that?" Jeff asked in German.

"The *unbekannt Menschen,*" the driver replied without turning his head. "The unknown men."

"What's that mean?"

"Russian deserters. At this season they stop fools who are out at this hour, and strip them of their clothes. So then they can hide in civilian clothes and perhaps try to escape to the west."

JEFF relaxed against the back of the seat and lighted a cigarette, and then lighted another for the driver. He discovered that his hands were shaking, and he was glad when they stopped under the marquee lights of the Astoria. He told the driver to return to the motor pool, went to the desk, and the night porter gave him his key and a brown envelope. He turned it over and saw that all that was on it was "J. W. Baker" printed with pencil. "Who left this?" Jeff asked.

"A man, sir."

"Someone from the legation?"

"No. I think a Hungarian, sir."

Jeff put the envelope in his pocket and walked upstairs, his legs heavy and aching. Their stiffness, he thought, was the result of his deep sleep in the plane the night before. A plane's reclining chairs are comfortable, but you cannot fully stretch out your legs. He found his cigarettes, and then ripped open the envelope. Inside was a letter, neatly printed, but some of the letters looked queer, as if written backward, or backhanded.

"If you are the Captain Jeff W. Baker who was at the Oriente Hotel in Bari," it read, "I would very much like to see you. If you are that Baker please be so kind as to leave a note at the apartment of János Donat, at Lovag Ut. 25, and assign a place of meeting. Any place of meeting will be okay with me but I do not wish to be embarrassment to you."

The letter was signed, "Leonides."

Jeff knew only one Leonides, and he

"I wouldn't get my hopes up. Most likely there'll be a new deal when we get back"

IRWIN CAPLAN

Shutter-clicker's husband puts her back in focus

7 A.M. "I feel awful, and I've got to be there when the 20th Century rolls in," moans glamorous news photog. "I need a laxative . . . I'm logy . . . and my head aches."

"Here," her reporter husband says. "Sal Hepatica will have you bright as a flash bulb in a jiffy."

9 A.M. Now everything's clicking. As usual, Sal Hepatica, the sparkling saline laxative, brought quick, gentle relief. Taken first thing in the morning, it usually acts within an hour. Don't risk feeling miserable all day, waiting until bedtime to take a slow-acting laxative.

Sal Hepatica also aids in counteracting excess gastric acidity and helps sweeten a sour stomach. So always keep a bottle of Sal Hepatica handy!

In a national survey, more than half the doctors recommended Sal Hepatica. Why not try speedy Sal Hepatica next time *you* need a laxative?

Ask your doctor why Sal Hepatica works so fast. He knows that Sal Hepatica is a *fluid bulk laxative* that exerts soft pressure within the intestine to stimulate *gentle,* speedy action.

Whenever you need a laxative —take gentle, *speedy*

SAL HEPATICA

TUNE IN: "MR. DISTRICT ATTORNEY"—Wednesday night, NBC Network
"BREAK THE BANK"—Friday night, ABC Network

was Leonides Lasenko, a major in the Russian air force. Jeff read the note again, and shoved it under his pillow. He was too tired to think about it. He snapped out the light and got into bed....

Quincy Todd found him an apartment—only a room and bath, with its private entrance into the hallway, in Madame Angell's flat on the fourth floor of a reddish stone house on Revay Utca. Madame Angell had been letting out this room to British and Americans since the twilight years after the first World War. Her third husband had been an Englishman, and he had willed her his name and his nationality, which was her distinction and her pride.

Quincy Todd had told him all this, and more. The building superintendent, Sandor, who also functioned as elevator operator, was a police spy. But that was to be expected anywhere in Europe. Madame Angell would use Jeff as a sounding board against which to exercise her favorite among her ten or twelve tongues. Hot water would appear only at sporadic intervals.

However, there were compensations. His rent was six hundred forints a month, which was within his living allowance. And it was a large room with plenty of wall space for his maps.

HE DISCOVERED that Madame Angell stayed up all night maneuvering the dials of a large and intricate radio. Madame Angell was a propaganda fan. She maintained herself in a narcotic state of tension and excitement by absorbing the whole world's cacophony of violence—threats of war and rumors of war, news of fighting, bombings, assassinations, revolutions. She was a soap-opera addict on an international scale. For Madame Angell the troubles of Hungary were dwarfed by the monumental crises of greater nations, just as the troubles of the American housewife are dispelled as she is anesthetized by the agonies of Ma Perkins, Stella Dallas, Young Widder Brown and Our Gal Sunday.

Jeff had requisitioned a portable typewriter from the legation, and each Wednesday and Saturday evening he wrote to Susan, for the diplomatic air pouches closed for personal mail at noon on Thursdays and Sundays. On the Wednesday of his third week in Budapest he was in his room, writing to Susan, when Madame Angell jostled her way through his door, carrying a tea tray.

"A little tiffin, Mr. Baker," she said, "but no sugar. It would be nice if you could get some sugar."

"I'll try," Jeff promised reluctantly. He had provided her with five pounds of sugar only two weeks before.

Madame Angell located a pocket in the folds of her dress and drew out an envelope. "Sandor brought this up."

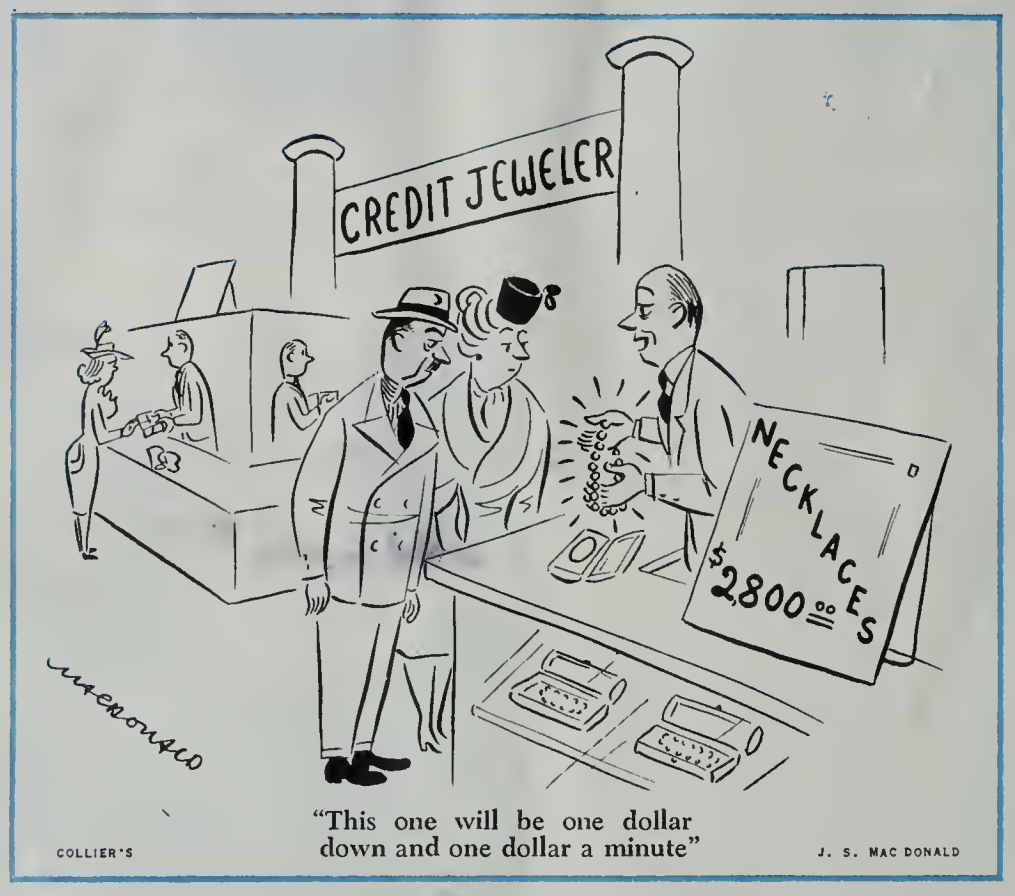
He put the envelope beside his typewriter. "Thanks, Madame Angell."

She kept her eyes on the envelope, as if in hopes that Jeff would open it while she remained there. "Sandor didn't say who brought it, or when. Sandor is a bad type, you know. Sandor may have—"

"I know."

She shrugged her heavy shoulders. "You Americans have grown secret like all the rest. Now I must listen to Belgrade. Did you know that Tito has his own atomic bomb? God's truth. Heard it on Belgrade last night."

Jeff waited until he heard her door close, and then he opened the envelope. The note, this time, was curt:



"You go often to the Espresso Molnar. I beg you to be there tonight. I will wait until midnight."

He reread the last page of his letter to Susan.

"I met this Russian in Bari," he had written, "at the Fifteenth Air Force Headquarters. We were both liaison officers, and were billeted together in the Hotel Oriente.

"I think I'd better explain a little more about why I was there, and why he was there. After I left the rest camp they didn't send me back to Division, but assigned me to Fifth Army Headquarters in Florence. I was the captain who moved the maps in the briefing tent—about as useful as a magician's assistant. Then, when they were planning the spring offensive in 1945, they decided to use heavy bombers in tactical support of the Fifth Army in the attack on Bologna. Since I knew the ground fairly well, they sent me to Bari, and we figured out ways for the heavies to identify our forward positions so they wouldn't bomb our own troops. Leonides was in Bari for exactly the same reason, except his job was to protect the Russian army operating on the other side of the Adriatic. He had a devil of a time wheedling a bomb line out of his own generals.

"But he did his best, and he was a swell guy. Everybody liked him, and he was the best poker player in the Oriente."

The last paragraph he had written said, "Much as I would like to see him, I don't know how I can risk it. It would be sure to become known, and the legation would consider me most indiscreet, and perhaps dangerous."

Jeff ran a string of x's through this paragraph, and wrote: "Although I know it is indiscreet, I am going to see him tonight. I just received another note from him. I think he's in trouble and needs my help. Anyway, what the hell, I'm a free American citizen, am I not, and can talk to whomever I choose?"

Now he had made his decision he was in a hurry to go. He would finish the letter later, or in the morning. He put on his overcoat, stepped into the hallway, and rang three times for the elevator, and was about to use the stairs when he heard it grumbling its way upward.

Sandor Patek was fifty, bent and slight, with watery blue eyes and faded yellow hair that curled raggedly at the ends. "You go out this night?" he asked in German, as the elevator descended. "Is not this Wednesday, the night you remain upstairs? Perhaps the note I brought had something to do with it."

"You are absolutely right," Jeff said. "The note is from a beautiful woman. She needs my help."

"So?" Sandor said, expectantly.

"She was seized by Rajk's secret police and now hangs suspended by her toes from the Franz Josef Bridge. I am on my way to rescue her."

The elevator jerked to a stop, and Sandor opened the door, his face showing anger and shock, as if Jeff had committed a desecration. Rajk was the Communist Minister of the Interior, and therefore Sandor's boss, and his name was not used loosely, nor was the secret police ever ridiculed, although it might be hated. Sandor said something nasty in Hungarian. All the way to the *espresso* Jeff felt pleased.

He walked through the door of the Café Molnar and he saw Leonides immediately, for his was the only uniform there. Leonides' uniform was immaculate, the blouse smooth until it reached the belt, and evenly pleated below. His boots were black and shining, the stiff epaulets on his shoulders soft yellow. He was not so tall as Jeff, but built compactly, and when he rose he gave the impression of endurance and power, like a locomotive that has been still on the track, and then moves slowly ahead.

Thus he rose as Jeff threaded his way toward him, and held out his broad hand, and grinned so that the four steel teeth in the front of his mouth gleamed silver. "So you came!" Leonides said. "You have not declared war on me."

"Not yet," Jeff said, grasping Leonides' hand in both his hands. He was conscious that his words rang louder than they should. As he seated himself he heard no other sound in the *espresso* except the scrape of his chair. It is the custom, in a Budapest café, for the patrons to be openly and pleasantly curious about those around them. But not so curious as this. Not paralyzed.

"You look fine," Jeff said. "You don't look any older."

Leonides put his elbows on the table and his fists alongside his mouth so that only Jeff could see his lips, and when he spoke he spoke very softly, and his lips hardly moved. "I am older," he said. "And you are older, also. We are both so old that we will die very soon."

"Cut out the drama," Jeff said.

"Quietly. Quietly. What I have to say is only for you, not for the Pest rumor factory. You're going to kill me, and I'm going to kill you."

Jeff knew exactly what Leonides meant, and he had hoped they would not speak of this immediately. He had hoped they could bat the breeze about Bari, and perhaps get a little drunk, drunk enough to forget for a time this wall that stood between them. "What did you do after you left Bari?" he said. "You were going back to Moscow and burn your uniform. You were going to fly transport planes on the Moscow-New York run. You were going to marry that girl—what was her name?"

"Vilma. I didn't. She was dead.

"I'm sorry," Jeff said, and race from this unpleasantness. "Wha you doing in Budapest now, Leoni

"Can't you guess?"

Jeff wished he had asked som else. This ordinary question was n embarrassing and personal as inqu about a man's religion. "No, I c

"In this day, what would you d a Russian who speaks English not b who for two years went to Camb and who for another two years w liaison officer with the Americans?

"Propaganda?" Jeff ventured.

"Try once more. Remember th other Russian in Budapest, not ev marshal, would dare be seen in p with an American."

"In a place like Budapest," Jeff "you put him to watching the Amer and British."

"You win the sixty-four dollars," Leonides. "See, I remember my Yes, my job is to watch the Amer Not the actual spying, mind you. is the province of the foreign bran MVD. derstanding. "I learn English more. Okay," she said. Leonides patted her round bottom, and she whirled away.

"What was it we used to say at the Oriente?" said Leonides. "Stacked. Yes, really stacked. With such beautiful creatures in the world, why is it we must think of war?"

"So you're sure there'll be a war?"

LEONIDES traced squares in the moisture on the table, frowning as he talked. "Yes. We are like two ships on a collision course, with blind men stiff in fear at the wheel. Not only will there be a war, but I think I can tell you how it will start, and the course it will run, and how it will end. You will attack us. Your memory of Pearl Harbor will always be fresh and raw and you will not again risk surprise. You will attack us at that moment when your President believes we have the atomic weapon, and are ready to attack you. Your President will make this awful decision alone, without the customary reference to your Congress, because it will be a military necessity that he do so.

"Your Central Intelligence Agency will know when we have a stock pile of atomic bombs. Already he must have been informed of our progress in bacteriological warfare, in which we are perhaps further advanced than you. Your reconnaissance will unmask our airfields. Your F.B.I. will have penetrated our plots within your own homeland. Our actions in Germany and Austria and Manchuria and Korea and Greece will become intolerable to your Army. Our overt acts in the Middle East will frighten your Navy, which might starve without the Middle East oil, and the admirals too will clamor for war. And in that moment when he is certain your country faces another Pearl Harbor, then he will order the attack. He must."

Jeff drank his cognac in a gulp. "Go on," he said.

"In the first day your Air Force will destroy all our important centers. You will turn into radioactive power Voroshilovgrad, Magnitogorsk, Gorki, Leningrad, Stalingrad, Odessa, Dnepropetrovsk, of course Moscow, and the new uranium cities beyond the Urals. How many millions you will kill I cannot estimate, nor will the number you kill affect the course of the war."

Jeff interrupted: "No, because by then you will have your armies in the cities of western Europe, and you will drive the Western armies into the sea."

"Only in the beginning," Leonides said. "Later you will land on the Continent, and your armies will defeat the Soviet armies just as they did the Germans, and for the same reason. You will have overwhelming production and fire power and air power. Most of the Soviet armies will be destroyed."

"Then the war will be over," Jeff said.

"Oh, no," said Leonides. "That will be only the second phase. The third phase will come when you occupy most of Russia, and all of Europe. I should think it will take ten or twelve million men. It will be extremely difficult and perhaps impossible. There will be interminable guerrilla warfare."

"And then we will have won the war," Jeff said.

"No, you will not have won. You will simply have performed a Russian tragedy. You will, out of fear for your own life, have committed murder and then suicide."

"I don't understand."

"Naturally, you will be under a military dictatorship. With so many ideological traitors and Soviet agents in your country you could not successfully conduct a war without such a dictatorship. Your jails will be bursting, and all your freedoms vanished. You will drain your natural resources to win this victory, and the drain will never end, for always there will be your millions of soldiers outside your borders, s to maintain the victory and order. All of Europe and some will be in such ruins and chaos would be better to let it again jungle. But you will not be abl this, because people will still liv and they will all hate you. And ally you will crack and break your suicide will be complete."

Jeff signaled Marina to bring other drink. "All of what you s be true, Leonides," he said, "but one thing worse than winning a w that is losing it."

"That is true," said Leonide there is not much difference in t Nobody ever again will win a wa

Marina came with Jeff's drink, swallowed it quickly, as he had th and it did not sting or warm h seemed innocuous as water. " silly, doesn't it?" he said.

"It is truly silly, but there it day closer."

"And you have no hope?"

"I do have hope. If I had no would leave here this minute an myself into the Danube." L looked at Marina, and smiled at h she saw from his smile that what to say was serious and private a her concern. She touched his s and went back behind the bar.

"There is a saying here in Buc he went on, "that, like many othe pest sayings, is funny and yet tru 'Stalin made two mistakes. He the Red Army to Europe, and he Europe to the Red Army.'"

Jeff laughed aloud.

"As I say, it is true," Leonid tinued. "Our soldiers have seen wi own eyes. They know that even beaten and cringing country the live better than in Russia. The more opportunity, more freedom have more things, like bathtubs lets and electric stoves. They are l Some can laugh. Do you know means not to be able to laugh. that the MVD may see you laughi suspect you laugh at *him?*"

"Go ahead," Jeff urged.

"Most important, in many plac as Berlin and Vienna, the Red Ar been in contact with the American and they have seen what the Ar Army has—what matériel and wh ileges—and it is not believable. part, the happiest days of my life in Bari. I think I know Amer Americans, and I like them and am doing, my best not to war o There are many others like m know the West. There is even o in our government who is our And we have talked with each oth we are moving. Not quickly, for i be fatal. We are the Second Russi olution." He reached out his wi strong hand and gripped Jeff's arm you hear that, Jeff—the Second Revolution!"

THE limitless possibilities ope fore Jeff's mind. "I heard," I "I didn't think it was possible, bu see I was foolish. We didn't thin was opposition against Hitler, But there was, and they very killed Hitler."

"We will most certainly kil Leonides said. "We will kill *him,* other sour and crazy ones, and in we will have a new government new country and there will be

municate what you have told
me to someone else, in case anything should happen to me?"

"I have placed my life in your hands," Leonides said simply, but in a tone that was almost a rebuke. "Not only my life, but many others."

"I'm aware of it."

"It is true that it would be better if one other besides yourself should know what I have told you, and yet I am hesitant to give my sanction that it pass beyond you." Leonides looked down at the table, and Jeff knew that he was looking into the days to come, and estimating the possibilities. "If you have a friend in your government whose insides you know, whom perhaps you have known all your life, whose lips cannot be opened by any means, then I agree. I say yes."

"You are very careful," Jeff observed.

"Your Department of State," said Leonides, "is not secure."

IN THE morning Jeff awoke thinking. He showered and shaved and when he stepped out of the bathroom there was a pot of scalding water on his table. He mixed his powdered coffee, set the cup alongside his typewriter, and concluded his letter to Susan.

"Thursday A.M.," he wrote. "I saw Leonides. He looked fine." This sounded inane, but how much more could he dare tell her, or anyone, except the one person in whom he eventually must confide? He could not tell her of the cabal of which Leonides was a part. He trusted her, certainly, but he was afraid that if it became necessary for her to transmit Leonides' story to the department, the story would not be credited. She was, after all, only the girl who took the nine-o'clock conference.

He signed his name to the last sheet of the letter, and was typing the address on the envelope when there was a knock on his door. He hoped it was Quincy Todd. He would like to explain last night to Quincy, so he would not suspect Jeff of traffic with the Russians, and tattle to Morgan Collingwood. He didn't think Todd would do this. Todd would talk to him first.

"Come in," Jeff called.

It was Quigley. For the first time Jeff was conscious that Quigley wore rimless glasses, and that the eyes behind them were hard like freshly cast metal.

"Is this room secure?" Quigley inquired.

"I don't know. Maybe there's a red-headed Russian under the bed. Why don't you look?"

"Don't be funny, Mr. Baker. You're in no position to be funny."

When he had last seen Quigley, at the mess, Quigley had called him by his first name. Now Quigley was calling him "Mr. Baker."

"I see you were writing a long letter," Quigley said. "Do you mind if I look at it?"

"You're damned right I mind!" Jeff came out of his chair and put himself in front of the security officer.

Quigley was a small man. The top of his hat came level with Jeff's eyes. He said, "I must insist."

"Do you *like* to read other people's mail?" Jeff asked.

"As a matter of fact, I do."

"Well, you're not going to read mine."

"Yes, I am," Quigley said quietly. "You see, Mr. Baker, you've committed a really astonishing breach of security. I've been in this business for a long time, Mr. Baker, and I've never heard of anything more brazen. You spent three hours last night with one of the most dangerous Russians in Pest. A clever Intelligence officer. His assignment is to learn about the Americans, in case you don't know it. You have been entrusted with the most sensitive, and highly classified, information in this mission. You drink with this Russian for three hours, and the next morning you write a long letter. I think you will agree that I must require a com-

That new U. S. Royal Golf Ball certainly can travel

HERE'S WHY: It's the ball with the lively Silicone "Magic" Center . . . and has Electronic Winding too. Sets new standards of distance, accuracy and uniform compression.

U. S. ROYAL HAS
ALL THESE FEATURES

SILICONE "MAGIC" CENTER
Liveliest substance ever put in a golf ball.

ELECTRONIC WINOING
For uniformity, accuracy and controllability.

CADWELL-GEER COVER
Toughest cover of all.

Fact is. Pros and golfers have found out that the Silicone "Magic" Center is easily the liveliest center we've ever put in a golf ball—and that power plus is locked in perfect balance by Electronic Winding. This new U. S. Royal gets longer, straighter drives, swell control on chip shots, and for true roll in putting it's a honey.

plete statement. I must see this letter."

Suddenly Jeff felt awkward and out of place. He picked the letter from the desk, handed it to Quigley.

Quigley read the letter and said, "Well, Mr. Baker, I think that explains everything very well. It doesn't seem to be so serious as I had imagined."

"You mean I'm not going to be hanged, or boiled in oil?"

"This is still not funny, Mr. Baker. If the admiral hears about it, he may want you flogged, keelhauled and thrown into irons." The very smallest, most elusive bit of humor touched the corners of Quigley's mouth. He dropped the letter on the desk and peered at the address on the envelope. "Susan Pickett, Bay State Apartments," he repeated. "Fine girl. Colonel Pickett's widow."

"Do you know her?"

"No. I just know of her. I know of almost everyone in the department."

Jeff found, to his surprise, that his indignation had burned out, and had been replaced by curiosity. "Tell me," he said. "How did you know I met Major Lasenko in the *espresso* last night?"

Quigley sat down, placed a hand on each knee, and said: "Mr. Baker, I am a professional. There are some so-called security officers here—the ones whom Quincy Todd calls 'Dick Tracys'—who are not professionals. They are not fit to wear a Junior G-Man badge. They may once have been Alcohol Tax Unit agents, chasing bootleggers, or prison keys, or divorce snoops, or third-grade detectives in fourth-rate police departments. When war came they got themselves jobs in Intelligence, or Security, and now they have found a new band wagon. They have discovered that it pays to be mysterious. They get a nice salary, and all-expense tours to Europe and Asia and South America, and unvouchered cash in large lumps, and neither the Congress nor Internal Revenue dares ask where the money goes, because they are all chasing the Reds, and anyone who questions them is meddling with national security and is probably a Red himself, or anyway a fellow traveler. They are wrecking my profession. I have been in the department for thirty years, first as a courier and later as a security officer. Because I am a professional I know everything that goes on, and because I am a professional I cannot tell you how I know, because it might compromise my sources."

"I see," Jeff said. "Thirty years in the department! I wonder if you knew my father?"

"Baker? Baker? The only Baker I knew was Nicholas Baker. He was an important man in the European Division."

"My father's name was Nicholas Baker, and he was in the European Division, but he was a clerk."

THERE was another subtle change in Quigley, hardly a change in expression, perhaps only a change in the cadence of his words. "So you're Nick Baker's son. He was a friend of mine. And he was important. I'm sure that on occasion his influence directed policy. In those days the little, unknown men like your father insured the continuity of our policy. The department is too big for that now, and the work too specialized. The little man can see only the smallest fragment of the whole. He should attend to his own job. I do. You should, too, Jeff."

"I am. I am doing the very best I know how."

"I'm sure you are. I'm sure Nick would be proud of you. You know, Jeff, Nick talked about you a great deal. Well, I'm going back to the legation."

When Quigley was gone Jeff flopped down on the bed and for a long time lay on his back without moving, staring up at the stains on the ceiling.

When at last he shook himself off the bed he knew something that he had not known before. The career for whi had prepared no longer existed, fo or anyone. The art of diplomacy many other things, lay buried i radioactive dust of Hiroshima. V Hiroshima itself there might be, v few generations, mutations of the They would be shocking and ugly not dangerous. There had been mo mediate mutations in the mind of His lobe of fear had abnormally g his confidence in a better future ha integrated, his instinct for brothe and kindness was vestigial, his mo of the Sermon on the Mount was where gone.

He understood the way of it. was the bomb, and there was thi war. There was a saying. "Whe begins, diplomacy ends," and the U States was at war. It was wrong t it a cold war, as if it moved with cier's deliberation, or were safel cased in the freezing compartme was a war hot and consuming dreadfully wasteful, a war fully tioned with passion and hatred.

JEFF missed Quincy Todd at the l eon mess in the pension off K Lajos-tér, but he found him that ni the Park Club, in the cocktail lo Quincy Todd was dancing with Collins, who was in Cryptography their feet were barely moving fo were entranced with the music. Quincy Todd saw Jeff, and winke called out, "I'm at Fred Keller's Come on over."

Jeff made his way across the floor, and Keller was at a table a the wall. "Come on over," he cal Jeff. "I've got someone here wa meet you."

The someone was the girl with She was the most striking woma had ever seen. She seemed to illun the side of the room. "This is Rik redy," Keller said. He held out his as a horticulturist might bring att to a unique camellia. "Isn't she l Rikki—Jeff Baker."

"Oh, I've heard of you," Jeff said ing himself. "You dance at the Ari

"She is *the* dancer at the Ari Keller said. "I told Rikki last nigh you were interested in the excha talent, and other cultural matter tween Hungary and America, and said she hoped you'd be here to and here you are. I think you tw find a great deal to talk about toge

"I'm sure of it," Jeff said. Fre bird-dogging a target for him. Fre telling him that Rikki was a prospe Atlantis Project.

Then the music ended and a brought fresh drinks. Quincy and came back to the table, and Quinc "Later."

"They've got secrets," said Marg lins. "Those two have secrets toge

Quincy laughed and said, "Yes, got secrets—both of us."

Keller then told the classic tale the American correspondent wh pushed around by a Russian genera his awful revenge. He cabled hor ports that the Russian general—wh tually was no more co-operative any other Russian general, and les most—was chummy with his A American opposite numbers on th lied Control Council. The story wa by the Russian embassy in Washi relayed back to Moscow, and the sian was recalled, and presumably s Siberia. Jeff didn't listen. He had the yarn before, and anyway h watching Rikki.

She was, he supposed, the Magyar type, and in Hungary are some of the most beautiful women world. The soft glow of the room her coppery hair with many tiny Her cheekbones were wide and inent, her face was triangular, he golden as if she had carefully ra

n hardly believe it," Jeff said, because he was nervous, and because he felt he should say something.

"It must be true," said Rikki, "because all stocks went up on the Bourse this afternoon. And in the black bourse the forint rose. Yesterday the forint was twenty to the dollar, black. Today it is fifteen. Everybody is thrilled. Everybody is excited."

Quincy Todd looked at him in the oddest way, and Jeff asked Rikki to dance again, because he wanted her to talk no more of it. In a strange world, this was a strange city.

ONE day in mid-December the admiral's secretary, a yeoman seconded to the State Department, called Fred Keller and said the admiral would like to see him at once. Ordinarily the admiral didn't issue such peremptory orders, through another party, to Keller.

So Keller was disturbed. He was a little afraid of the admiral anyway, although he was sure he never showed it, and certain that no one else could notice. When he forced himself to inspect this uneasiness, or fear, he knew only that the admiral's hearty voice and didactic statements alarmed him.

When Fred Keller walked into the admiral's office he was careful to conceal his unease. It was necessary to treat the admiral with respect, but also it was necessary to maintain equality. When the admiral sensed that a man was afraid of him, or awed by his rank, then that man's life became miserable.

The admiral pointed to a chair. "Sit down, Fred," he said.

Keller sat down.

"Fred," the admiral said, "I just got a confidential letter from a friend of mine in Washington. I've been thinking over what he said, and I think we'd better speed up our operations."

"You mean Atlantis Project?"

"Well, yes. That's about the only thing we've got going here that isn't routine. Everything else would rock along whether I was here or not, but I'd like to see something come of Atlantis in a hurry."

Keller knew that while the admiral had his idiosyncrasies, he was politically shrewd. His career proved that. He had gone into Naval Intelligence, which had once been regarded as the graveyard of ambitious officers, at precisely the right time. And now, when political and traditional warfare merged into one, he occupied a strategic post of command. Keller said, "I thought it was agreed, sir, that we should move slowly."

"Times change. Events move faster, and we have to speed up to keep pace. Besides, there's always the chance of competition." The admiral leaned back in his chair. "What one man can think

-and they are mild!

of, another can think of. I'd like to see us put this thing across first, wouldn't you, Fred?"

Now Keller knew what was up. In some other part of the world, somebody else was working on something approximating Atlantis Project. The admiral, naturally, wanted the kudos that would go to those associated with the first success.

"Very well, sir," Keller said.

ONE by one, that afternoon, Fred Keller called in the men on his team. They were, ostensibly, commercial attachés, oil technicians, financial experts, or in the offices of the naval, military and air attachés.

Keller, in keeping with standard security practice, called in the men of his team singly. It was not necessary or desirable that they know one another. This was protection against the possible unmasking of Atlantis from the lowest echelons. Each man on the team knew only what was necessary to form his own cell.

He didn't get to Jeff Baker until the following morning. He had purposely saved Baker for last. He had great hopes for Baker. For one thing the theater was traditionally a center of antitotalitarian activity in Hungary. And he had confidence in Baker's work. Baker seemed to show more imagination and perception than some of the others. Baker was a Princeton man.

At nine o'clock Keller called Jeff and told him to come over, "Whenever you have the chance," but in a tone that would let Jeff know it was important. Baker said he'd be there in thirty minutes.

Keller told his butler to run up coffee. He changed his tie and took off his lounging robe, and put on a sweater and sport jacket. He examined his hair in the bathroom mirror, and touched his temples with a dark liquid. He was too young to show gray.

He wondered how far Jeff Baker had progressed with Rikki Telredy. He discovered he had difficulty in imagining Baker as a lover. In one way Baker seemed only a lank and immature boy, and yet he possessed that lacquer of sophistication, that outer hardness, that comes to those who have been part of a conquering army.

When Jeff Baker arrived the room was dusted and immaculate, and the coffee made. "Forget your hat again?" Keller greeted Baker.

Jeff put his hand on top of his head and said, "I did, didn't I?"

Keller asked him how he was progressing, and Jeff told him fairly well. "Offhand," Jeff said, "most of the theatrical people dislike the Russians and like the Americans, and they aren't bashful about saying so. But I haven't been making any judgments on words alone. I've been trying to test their inner loyalties by presenting problems and situations and observing their reactions."

"That's smart," Keller agreed, "but we'll have to move faster from now on."

"I can't say," Jeff said, "that I'm sure of more than a few yet."

"You ought to be able to do something with that Zukats," Keller told him. "I should think he'd be completely dependent on Hollywood."

"He may be," Jeff said. "But he's a smoothie. I'm seeing him again this afternoon."

"And Miss Genghis Khan—what about her? You shouldn't have any trouble with her. She wants to get to America." Everyone in the legation called Rikki Telredy Miss Genghis Khan.

"Oh, I'm sure she'll be all right," Jeff said. "Should I put the question to her? I'm seeing her tonight."

Keller smiled. "Seeing quite a bit of her, aren't you? All business, Jeff?"

Jeff wondered whether he had been poaching on private property in seeing Rikki so often. Sounded like it. Yet she always seemed willing to date him. "Well, you see," Jeff explained, "Miss Genghis Khan is especially useful because there isn't anybody she doesn't know."

"Now don't worry, Jeff," Keller said. "See her as often as you like. All of us have to sacrifice something, and I guess I can sacrifice Rikki."

Jeff went home and got his hat. He also changed his shirt from blue to white, and his tie to polka dot, and his suit from tweed to the best blue. Miklös Zukats, who owned five cinemas in the city, a stack of gold Swiss francs in a vault in Geneva, and a packet of RKO and Paramount stock in another vault in New York, regarded Jeff as a special emissary to him from Washington.

Jeff was always welcome in Zukats' office in the Rakoczi, although sometimes Jeff suspected it was only because his presence boosted the exhibitor's ego.

"Of course we'll wear them! You don't want to be conspicuous out in Arizona, do you?"

COLLIER'S — DON TOBIN

Zukats regarded himself as a cosmopolite and citizen of the world. His office was decorated in Italian modern, which is perhaps more modern and extreme than Los Angeles modern. If an American diplomat visited his office to talk films, then the darkness could not be closing in around him. The world wasn't going to pot. It was only his imagination.

"Well," Zukats greeted Jeff this day, "did you hear what's happened now?"

"You mean the fighting in the Near East?" Jeff said. "That's hardly news."

"Oh, that business!" said Zukats, waving it away with a gesture of two fingers. "Let's not talk about it. No. I meant Lana Turner."

Jeff said, "I didn't hear about Lana Turner."

"Again she is in trouble with her studio," Zukats said. "And me twitching for her!"

"You what?"

"As you say, I have a twitch for her. I like her. She draws. She is Box Office. Also in Hollywood three years ago I met her personally. Such gams. At the same party I met the great producer Goldwyn. Such a great man! Never plays the red board."

"What do you mean?" Jeff asked, and told himself he'd have to start reading Variety. He'd ask Quincy Todd to make some sort of deal with the air line, so he could get Variety.

"It is not money alone he wants. He is hep to art."

Jeff opened a plastic cigarette box on the desk and took out an American cigarette. "Do you mind?"

"Please. Every week I have them shipped especially." Zukats winked. "There are ways."

Jeff congratulated himself. The communication lines of business always have a way of bridging the fissures of world disorder. But his instinct reined him in. "You know, Mr. Zukats, I think you ought to follow Goldwyn's example. If he makes good American pictures, you ought to show good American pictures."

"Oh, that again."

"That again. From the junk you show in your theaters the people of Budapest must have a peculiar opinion of America. They must think that one third of us are gangsters who own night clubs, and the other third cowboys, and the rest of us the dipsomaniac sons and daughters of millionaires."

Zukats shrugged. "It's good Box Office."

"It isn't good propaganda. You're making it easy for the Communists. When you show pictures like that you're making Moscow's line sound true."

"You know how it is," Zukats said. "All your big stars are barred. They go and yap about the Communists, so they get barred here. It is their own fault. Why don't they clam up?"

"Something called the right of free speech," Jeff said. "Remember?"

"Does it do any good to have free speech, and no foreign grosses?"

Jeff tried his technique of testing loyalty by forcing a decision. "I can get you good pictures if you've got the courage to show them."

"What? Documentaries? Do you want me to go dark?"

"We'd rather have you show no American pictures than the ones you show now."

Zukats leaned back in his chair and folded his plump, pink hands across his stomach. "You know that I am your friend. Why, I am almost an American. Do you want to ruin your friends?"

"The time has come," Jeff said carefully, "when every man must take his stand. What will happen to you if war comes—or even if relations are broken? Where will you get your films then? What will happen to you when the state not only tells you what pictures to show, but owns all the theaters and takes all the profits?"

Zukats' hands jumped ner

A fine car made even finer

PONTIAC

Thousands Won't Look At Another Car!

An amazing number of people buy Pontiacs time and again—for they have learned that Pontiac gives them precisely what they want.

They know that, year after year, Pontiac is always beautiful—always individual in appearance. They know it is always easy to drive, always comfortable, always safe. They know it is unsurpassed for dependability.

They know, too, that many *new* things will be brought to the low-price field *first* by Pontiac. *This* year Pontiac offers the great General Motors Hydra-Matic Drive*—and it is the world's lowest-priced car to provide you with this sensational contribution to extra safety, driving ease and sparkling performance.

Yes—this year, or *any* other year—you would be wise to choose a Pontiac. For once you own a Pontiac, we feel sure you will join the thousands who don't even *look* at another car. Pontiac is *always* a great car, a great value!

*Models Illustrated: De Luxe Streamliner 4-Door Sedan and De Luxe Streamliner Sedan Coupe. *GM Hydra-Matic Drive and white sidewall tires optional at additional cost.*

PONTIAC MOTOR DIVISION of GENERAL MOTORS CORPORATION

For Safety's Sake--

have your automobile brake system checked regularly --- and when service is required, insist upon

WAGNER LOCKHEED
HYDRAULIC BRAKE PARTS and FLUID

You can't afford to take chances with unsafe brakes. Ask your serviceman to check the level of the fluid in your car's brake system today!

If fluid is required—it pays to specify WAGNER LOCKHEED HYDRAULIC BRAKE FLUID.

Wagner Lockheed is an all-season fluid, and functions regardless of climatic conditions. Used by car, truck and bus manufacturers and recommended for all automotive vehicles having hydraulic brakes.

In addition, ask your serviceman to check your car's brake system. If any parts need replacement, specify WAGNER LOCKHEED HYDRAULIC BRAKE PARTS. When brakes need relining, insist upon WAGNER CoMaX BRAKE LINING for quick, safe, smooth stops. Minor repairs today may save you major service expense tomorrow. Wagner Electric Corporation, 6400 Plymouth Ave., St. Louis 14, Mo., U.S.A. (In Canada: Wagner Brake Company Limited, Toronto).

BRAKE FLUID SHOULD BE CHECKED TWICE EACH YEAR!

means new broadtail coat over her arm. She moved directly to his table.

"Well, where tonight?" she greeted him. "The Park Club, I hope. I am hungry."

"You're always hungry, Rikki."

"If you did my dance every night, and other dances also, and rehearsed the new show two afternoons a week, and carried everything up and down five flights of stairs because of no elevator, and walked everywhere because of no car, you would be hungry, too. It is true that I eat three thousand calories a day—four thousand when I can get butter or fats. But do you see any fat on me? Look! Look, you Jeff!"

Jeff looked, and said, "Don't get me wrong, Rikki. You're not fat."

"I will have a drink—a raki—and then we will go to the Park Club and have one of those wonderful club sandwiches with ham, chicken and turkey. Is that possible?"

"You know, Rikki, I never see you alone. We never have a chance to talk alone, and I have important things to say to you, Rikki. You know that."

"You can see me alone if you wish, Jeff. I think you have misunderstood me." She raised her eyes, so queerly slanted, so wise and yet so sensitive to hurt. The music started, and Jeff took her hand and led her down the terraces.

The Arizona's dance floor revolved, and this created a pleasant illusion for the dancers. Even when standing still, they had the sensation of smooth movement, and the faces at the tables whirled past without effort. So Jeff stood still now and tightened his arm around her, so that her face pressed against his shoulder, and the perfume of her hair was in his nostrils, and he could feel the whole lithe length of her body against his. She put her hand on his chest and eased him away. "Take it easy," she said. "No hurry. You have food at your place?"

"Canned stuff," Jeff said. "And it isn't much of a place. It isn't like Fred Keller's. It's only one room. I'm not rich, like Fred."

"Are you really worried about Fred? Have you jealousy?"

"I don't know. I suppose so."

Rikki laughed.

THERE were shadows along the Revay Utca. Some shadows were black and solid and poised for movement, so Jeff carefully chained his jeep. Unless one chained his jeep it would certainly vanish. Even with chains, sometimes a jeep vanished, piecemeal—or entirely, if one left it in the streets the whole night. He drove his own jeep now. He had discovered it was simpler, and perhaps more secure considering his job, to drive himself instead of using a Hungarian driver from the legation pool.

Jeff rang the night bell for the elevator, and it made a great clangor, and Sandor came out from his room under the stairs, belting up his trousers. Ordinarily Sandor was surly and disgruntled but when he saw Rikki his eyes became bright and observant, and he pretended courtesy.

"If you need me later," Sandor said in German as they reached Jeff's floor, "do not hesitate to ring."

Jeff and Rikki went into the room, and Rikki looked around the room, and slipped off her coat. Jeff put it on a hanger in the closet. From the closet shelf he took a half loaf of round brown bread, a box of crackers, jars of cheeses, a can of chicken and tinned butter.

Jeff marveled at how she ate. She ate like a puddler off the night shift. When they finished, and Rikki was wiping the crumbs from the table, Madame Angell came in and said she'd heard them talking, and would they like tea. The water was already boiling. Rikki said Madame Angell was very kind.

Madame Angell brought the tea, and said Radio Lyons was very exciting that night. Radio Lyons reported a coup in Azerbaijan, and Russian troops i area, and also massing on the Kars tier. It certainly looked as if war not be far off. Jeff said that was ve teresting. Madame Angell wor whether Jeff and the young lady ca listen to Radio Lyons. Jeff sai thanks. Madame Angell said the sit was critical, and they should listen week had been like the week of M Jeff found a box of hard candies h concealed between his shirts, an sented it to Madame Angell. She away.

RIKKI climbed on the bed, and the pillows against the wall leaned back against them. "Now v this private thing of which you w speak?" she asked, gibing at Jeff w word "private."

"This business of your going to ica," Jeff told her. "Suppose it through? Suppose you have to sta and you are still here when war co

"When war comes—how lightl say it! You know only one side o you Americans. You cannot in how it is to lose your cities, your p your country, to be degraded like and hungry like beasts. I think you a mistake with your atom bombs second one you should have dropp Chicago."

"If war comes," Jeff amended. this day he had said "when war c and it worried him.

This was for the pengö inflation, when stripping our fingers and our o as to eat, and it was possible for one with dollars to make a profit on our misery. I was sick. I cannot forget."

Jeff Baker had always believed in the intrinsic goodness of his country and his countrymen. America might make mistakes, but they were mistakes of judgment, not of the heart. This girl, Rikki, was saying his heart wasn't right, and he didn't like it.

Rikki said, "It is not money that we ask from America, Jeff. It is something of the spirit. You had it once. Where did it go? You were climbing to the stars, and stretching out your hands to pull us up with you. But now, your eyes are on the ground just before you—not a meter more."

Jeff was growing angry. "What about ERP?" he demanded. "What about that? You've been listening to Soviet propaganda, Rikki."

"Of course I listen to Soviet propaganda, to British propaganda, to American propaganda, to all other propaganda. We Europeans understand propaganda. We have learned to separate the fact, the motive, from what we hear. We can smell what is hidden. We have been educated in propaganda by a master, Jeff—by Goebbels."

"Well, what about ERP?"

RIKKI said, "It sounds good, until one remembers the speeches in your Congress. One remembers how they haggled and bickered not only on how much should be given, but what should be demanded in return."

"My department isn't responsible for what is said in the Senate, as you are smart enough to know. You Europeans can never understand our free speech. You never believe that anyone in or out of public life, except in my department and the Army and Navy, can say whatever he wishes about policy. That's what confuses you people."

Rikki made a face. "Your department! Do you think anyone trusts your department now? There were people who believed you. I did. What happened to the Four Freedoms? And the Atlantic Charter? And the United Nations? Do you know what I think now? I think your department betrayed the United Nations."

"Rikki!"

"It is what I think. Your department has no policy except the expedient, and fear of the Soviets. You can even be blackmailed by the Arabs. Your department is the upholder of Franco, and the Argentine dictator. All over the world you support bad people. In China the corrupt ones, in Greece the worst of the reaction, in Turkey a police state as bad as we have here. Is it that your leaders are all old men, or cynics?"

"You like the Russkies better?" Jeff snapped.

"Don't be silly. There is one thing more. You. I thought you brought me here for one thing, and it is something else. Perhaps it is only my pride, but I did not come here to be enlisted as a spy."

He recognized that there was nothing more to say. He tried to keep his temper, but he said, "Okay, I guess this is where you get off." He took her coat from the closet, and she wormed into it with angry movements of her shoulders, and without speaking. They walked down the steps, she remaining one step ahead of him.

He helped her into the jeep, and then he got in himself, and wrestled with the heavy lock on the chain. Finally he had the stubborn chain off the wheel, turned the key in the ignition, and jammed his foot down on the starter.

Jeff never knew what hit him. The bomb under the hood of the jeep attached to the spark-plug wires exploded, ripping the hood backward toward the windshield. And the sound of the explosion was all that Jeff was aware of, and then he was aware of nothing.

THE SECRET PAPERS OF HARRY L. HOPKINS

Continued from page 25

however, that Churchill should come to Washington with his Chiefs of Staff for full-dress conferences in May. On May 2d, he cabled Hopkins that he was well aware that the President was distracted by domestic affairs, particularly the coal crisis, and he suggested that it might be well for him to stay at the British embassy rather than at the White House.

The coal crisis referred to was one of the recurrent eruptions of John L. Lewis. It compelled Roosevelt to issue an order to Harold Ickes, as Secretary of the Interior and Solid Fuels Administrator for War, to take over all the bituminous and anthracite mines and operate them under the protection of the U.S. Army. On May 2d, Roosevelt made an extraordinary appeal over the radio to the miners to go back to work as a patriotic duty. But just as the President was being wheeled from his study to go down to the Oval Room where he made his broadcasts, word came that the melodramatic Lewis had just announced that he had concluded an agreement with Ickes for the return of the miners to work in two days. Roosevelt gave the speech anyway.

Date Set for Normandy Invasion

On May 11th, Hopkins went to Staten Island to meet Churchill and Lord Beaverbrook, who had crossed on the Queen Mary together with several thousand German and Italian prisoners of war. Hopkins accompanied them to Washington for the two-weeks conference which bore the name TRIDENT and at which the date for the Normandy invasion—May 1, 1944—was at last definitely set.

Roosevelt would not hear of the suggestion that Churchill stay at the British embassy, so the Prime Minister went straight to the White House. The week end of May 15th was spent at Shangri-La.

On the drive from the White House to the Catoctin Hills, the President's car passed as usual through the old town of Frederick, Maryland. Churchill saw the roadside signs advertising Barbara Frietchie candy, and asked about them. Roosevelt explained that Barbara Frietchie was a semilegendary character of our Civil War about whom Whittier had written a poem. All the President could remember of it was:

"Shoot, if you must, this old gray head,
But spare your country's flag," she said.

Whereupon Churchill proceeded to recite the entire poem, stating afterward that he had not thought of it in at least 30 years. A little farther on he saw a road sign pointing to Gettysburg and asked how far away that was. It was, roughly, 40 miles. He said, "Why, this may have been the very road by which Longstreet moved up," and then went on to review the whole battle. A few days later, Churchill was invited to speak before a joint session of Congress and he compared the present status of the second World War—after Stalingrad and Tunisia—to the status of the Civil War after Gettysburg. (This proved to be an amazingly accurate estimate of the time that remained before victory.)

Churchill's speech to the Congress was so informative that Congressmen were louder than ever in their complaints that "the only time we get to find out what's going on in the war is when the British Prime Minister visits Washington and tells us."

When Stalin learned that the opening of the Second Front had been definitely postponed for one year British and American relations with the Soviet Union, which had been none too good for months, became appreciably worse. Admiral Standley had issued a rather blunt statement to the press that Russia had given us no credit for Lend-Lease aid, and it was obvious that he must be recalled, but the selection of his successor was not an easy one. Roosevelt tried to persuade Joseph E. Davies to go back to his old job in Moscow, but the state of Davies' health made it impossible for him to accept the post. Davies strongly urged that Hopkins be chosen; Roosevelt flatly rejected this suggestion, for he did not want Hopkins to be away from Washington for any length of time.

"What a vacation! Rained every day. Never felt so rested in my life"

COLLIER'S KIRK

Stalin sent Churchill a cable in which he reviewed at length all the assurances that had been given during the past 13 months relative to the opening of a second front, and concluded with words which could be interpreted only as charges of deliberate bad faith by the Western Allies. Churchill dispatched an angry reply to this without consulting Roosevelt, and the tension increased.

Stalin recalled Ambassadors Litvinov from Washington and Maisky from London. There was now an atmosphere alarmingly reminiscent of that which had preceded the Molotov-Ribbentrop Pact of August, 1939, and the fears of a separate Russo-German armistice were revived. It was fortunate that the enemy did not know how bad relations were between the Allies at that moment, how close they were to disruption.

Hopkins had an unusual (for him) experience at this time: He was given some friendly publicity. Harold Ross, brilliant editor of The New Yorker, assigned one of his best men, Geoffrey T. Hellman, to do a profile of Hopkins. Hellman persuaded Hopkins to talk freely about the old days at Grinnell College, the welfare work in New York City, the passions and the hatreds of the New Deal era and the peregrinations during the war. When Hopkins read this profile—which said that he resembled "an animated piece of shredded wheat"—he wrote a note of appreciation to Hellman and remarked, "I seem to turn out a mixture of a Baptist preacher and a race-track tout."

On June 29th, as the hazardous Sicilian expedition was about to embark and the tension with Moscow was most acute, Vice-President Wallace delivered his all too blatant public blast against the Secretary of Commerce, Jesse H. Jones, charging that he had obstructed the efforts of the Board of Economic Warfare to build up stock piles of critical and strategic war materials in 1940, 1941 and even after Pearl Harbor. This was undoubtedly the worst of all the public brawls that marred the record of the Roosevelt Administration and it gave to the American people—not to mention the people of other United Nations—an alarming sense of disunity and blundering incompetence in high places.

Roosevelt was extremely angry at Wallace for this outburst and at Jones for the manner in which he snapped back. On July 15th, Roosevelt dissolved the Board of Economic Warfare, of which Wallace was chairman, and put its functions and various others connected with foreign economic matters, which had been in Jones's department, under the authority of Byrnes, whose title now was Director of the Office of War Mobilization.

Sunday afternoon, July 25th, Judge Rosenman and I were with the President at Shangri-La, Hopkins having left that morning with General Arnold for some salmon fishing in Canada. We had been working on a speech to be delivered the following Tuesday mainly for the purpose of trying to save the National Resources Planning Board from death at the hands of Congress; to the conservative majority on Capitol Hill the very word "plan" was considered a Communist invention and any planning board must be part of a plot to disrupt the capitalist system of free enterprise.

Roosevelt made the point in this speech that we had *planned* the North African campaign more than a year ago and we had *planned* the Sicilian campaign more than six months ago, and it was none too soon to start planning for postwar reconversion; he presented for the first time the proposal for a G.I. Bill of Rights, the plan for which had been drawn by the NRPB.

The speech was in virtually final form late Sunday afternoon, when Steve Early telephoned from Washington to say he had just heard a news flash over the radio to the effect that Mussolini had resigned. The report had been picked up from the Rome radio, which, of course, was a highly unreliable source.

The President seemed quite sur but not tremendously excited and "I wonder how we could get any firmation on that?" I telephoned associates in the OWI short-wave casting center in New York. The heard it, all right, and had com cated with the B.B.C. authorities in don who were inclined to believe it the OWI people had subsequently trying to get confirmation of it fro White House or any other official in Washington, while the White was now trying to get confirmation *them*. I reported this to the Pre and he said, "Oh, we'll find out ab later."

We resumed work on the speec a leisurely dinner, then drove ba Washington, arriving late in the ev The President went to his study to reach Churchill on the telep It was to me an amazing glimpse Roosevelt's manner of life: For a of more than five hours all tha President of the United States hea the downfall of the first of the Axi tators was the chance report on a news flash. One would have though dispatches would have been flashin stantly from and to all directions, on the radio-equipped Secret Servic during the drive back to Washingt

The next day Roosevelt's speec substantially revised to meet the ne velopments. The President said:

Our terms to Italy are still the sa our terms to Germany and Japan— conditional Surrender." We will no truck with Fascism in any shape or manner. We will perm vestige of Fascism to remain.

By then it became clear that the of Italy had managed to remain throne throughout the palace revo and had appointed Marshal Ba Prime Minister. The question im ately arose as to whether the should treat with the new govern overlooking the fact that the kin accepted if not blessed the Mussoli gime and that Badoglio had bee Duce's commander in chief in Eth

Again there were indignant pr from those who had been outrag the measures of "expediency" in Africa. The merest suggestion o ognition brought down more o brium on the State Department, by now was regarded in liberal circ the very citadel of reaction and policy of "doing business" wit avowed enemy.

Advantages of Italian Surrend

However, the State Departmen by no means the predominant p making instrument in considerin new situation in Italy. It was a n of cold, hard military calculation. eral Eisenhower and the Com Chiefs of Staff were conscious o enormous possible advantage of h any Italian government, regardless political coloration, which would the authority to deliver an imm surrender. The question of imm was all-important, for the Allies w to move into Naples and the Fogg base and Rome itself before the Ge could reinforce these points.

In Badoglio's first public stat after the fall of Mussolini, he ind that Italy would not seek a se peace; he said, "The war goes on, he did not add *"positively."* Ther little doubt that peace feelers woul emerge from Rome. This presen situation the handling of whic a minute-to-minute basis, was a r of overwhelming importance.

It was obvious, therefore, tha

time had come for another Roosevelt-Churchill conference, and arrangements were rapidly made for a meeting in Quebec. The Chiefs of Staff assembled first to lay the groundwork for military discussion, arriving in Quebec on August 12th. The following day the Prime Minister joined the President at Hyde Park for preliminary conversations. En route, Churchill went far out of the way to show his daughter, Lieutenant Mary Churchill, Niagara Falls; he told assembled newspapermen that he had seen the falls some thirty years before and that the principle of the thing still seemed to be about the same.

Shortly after the Quebec conference started, Roosevelt and Churchill sent the following message to Stalin:

The British ambassador in Madrid reported to us on August 15th that General Castellano, representing Badoglio, had arrived there bearing a letter of introduction from the British Minister at the Vatican. Castellano declared that he had authorization from Badoglio to state Italy's willingness to surrender unconditionally if she could thereupon join the Allies. This seems a firm offer, the British Minister at the Vatican having confirmed that Badoglio had stated in writing that he had given authorization to Castellano. We do not intend to enter into any bargain with Badoglio's government for the purpose of inducing Italy to change sides.

We recognize, on the other hand, many advantages in the acceleration of the campaign which might result. Our invasion of the mainland of Italy will begin probably before September 1st, and approximately a week later we shall make our full-scale landings at AVALANCHE (the Salerno Beachhead south of Naples). It would seem likely that Badoglio's government will not survive that long. There are one or more German armored divisions outside Rome, and once they suspect that Badoglio is playing them false they would be able to overthrow him and set up another Fascist government under Farinacci, for instance. Or, the Badoglio government might collapse and plunge all of Italy into anarchy.

This message went on to say that a zation had been sent to Eisenho send emissaries to meet with Cas in Lisbon.

This mission was entrusted tough-fibered General "Beadle" accompanied by Brigadier K. Strong, a British officer, who was Eisenhower's staff. Castellano tolc and Strong that the principal Ital sire was, first, for protection agai Germans during their present pl defenselessness and, then, an op nity to join with the United Nat fighting the Germans. Eisenh representatives said that all the authorized to offer were terms for tary capitulation which must be a unconditionally, but they said th Allies were prepared to give ass and support to Italian forces or i uals who would fight or work to o the German military effort.

Stalin Is Kept Informed

Having completed the preli conversations with Castellano, and Strong returned to Algiers. sions as to further steps were pa Quebec. Roosevelt and Churchi Stalin informed of every subsequ velopment so that the Soviet would be in full agreement with terms of Italian surrender and indeed, participate in its acceptan

Otherwise, the principal accor ments of the Quebec Conference w Anglo-American agreement on th of a Four Power Declaration, to i the Soviet Union and China, as the United Kingdom and the States, for the establishment of a tive international organization.

In the military field, the princi cisions were the reaffirmation of get date (May 1, 1944) for OVER and the establishment of the So Asia Command under Mount with Stilwell as Deputy Supreme Commander.

Churchill was by no means rec to the Normandy invasion nor other major operation in weste rope. He advanced his usual and

erful warnings of the appalling cas-es that might be suffered. He ted again and again to the map of ce, showing the tremendous logisti-dvantages enjoyed by the Germans, quantity of supply lines, the roads railroads running east and west to Channel ports.

owever, the Air Force now had ved the answer to this: concen-d, unrelenting bombing which d disrupt the system of supply and ct facility of maneuver. The com- bombing offensive was given the name Operation POINT BLANK, he Italian part of it was called Op-n STRANGLE. The ultimate of the success of this huge and pro-d application of air power is writ-the German records.

Quebec the decision was made—e first time, in so far as I know—to ement the Normandy invasion with gs by American and newly armed h forces in the Toulon-Marseille of southern France. This was an tion against which Churchill fought cably until within a few days of its plishment on August 15, 1944, upon he turned up aboard a Brit-estroyer and, with apparent ex-n, waved the victory sign to the shed troops as they moved toward viera beaches.

kins had with him at the Quebec rence a document headed Russia's n, which was quoted from "a high-level United States military gic estimate" (the source was ise unidentified). It contained the ing:

sia's postwar position in Europe a dominant one. With Germany d, there is no power in Europe to her tremendous military forces. rue that Great Britain is building osition in the Mediterranean vis-Russia that she may find useful aneing power in Europe. How-even here she may not be able to Russia unless she is otherwise ted.

conclusions from the foregoing vious. Since Russia is the deci-etor in the war she must be given assistance, and every effort must de to obtain her friendship. Like-since without question she will ate Europe on the defeat of the is even more essential to develop aintain the most friendly relations Russia.

lly, the most important factor the States has to consider in relation sia is the proseeution of the war Pacific. With Russia as an ally in the war against Japan, the war can be terminated in less time and at less expense in life and resources than if the reverse were the case. Should the war in the Pacific have to be carried on with an unfriendly or a negative attitude on the part of Russia, the difficulties will be immeasurably increased and operations might become abortive.

This estimate was obviously of great importance as indicating the policy which guided the making of decisions at Teheran and, much later, at Yalta.

Toward the end of the Quebec Conference, word was received from Stalin agreeing to a meeting of the Foreign Secretaries in Moscow. This news was greeted enthusiastically for it meant the beginning of the long desired collaboration of the Big Three, as well as the easing of the dangerous tension that had existed between the Western Allies and the Soviet Union.

Churchill Awarded Degree at Harvard

Churchill accompanied Roosevelt back to the White House after the Quebec Conference and remained in Washington off and on for three weeks, during which time the British and Canadian troops landed on the Italian boot, General Clark's Fifth Army landed at Salerno, and Italy surrendered. On September 6th, Churchill went to Cambridge, Massachusetts, to receive an honorary degree from Harvard University. This ceremony had been long planned and Roosevelt, a member of the Class of 1904, took a great deal of interest in it.

In his speech, Churchill made a statement that he would hardly have dared to make at any previous and less propitious moment in the war or, indeed, at any previous time since the Declaration of Independence. He said, "This gift of a common tongue is a priceless inheritance, and it may well someday become the foundation of a common citizenship. I like to think of British and Americans moving about freely over each other's wide estates with hardly a sense of being foreigners to one another."

After the Quebec Conference—and after practically every other conference in the war—Hopkins was in a state of utter depletion and had to go to the Naval Hospital for rest and revival. (His frequent visits to this hospital often impelled the critics of the Administration to ask why the taxpayers' penicillin should be wasted on the restoration of Hopkins.) One of the most interesting pieces of reading matter that now came to his sickbed was a full-page feature

Thank goodness—for a minute I thought it was going in the rough!"

from the Chicago Sunday Tribune with a colored cartoon that showed Hopkins leering and, hovering over his shoulder, the sinister image of Grigorii Rasputin.

In the accompanying article, Walter Trohan achieved a remarkable effect in juxtaposition: "One evening in 1907, a peasant strode across the highly polished floor of the salon of Count Alexander Pavlovich Ignatiev— He bowed clumsily to an ill-assorted circle of nobles, politicians, schemers, charlatans, adventurers, clergy and dignitaries . . . unkempt brown hair, stringy brown beard gave him a wild appearance . . . Rasputin went on to sway Russia by the power of his eye. Nicholas, the czar of all the Russias, fell on his knees before this curious mixture of penitent and debauchee and called him a 'Christ.' The czarina believed in him implicitly. For almost nine years this preacher of redemption thru sin virtually ruled Russia . . .

"On a May day in 1933 a lean, gangly figure with thinning brown hair and dandruff made his way . . . thru an ill-assorted group of representatives, crackpots, senators, bums, governors, job seekers, political leaders, and toadies . . . in the person of Harry Lloyd Hopkins, son of an Iowa harness maker, Santa Claus had come to town. He emptied his hands of other people's money. This strange and contradictory figure spent on and on to sway a nation and then the world. The President of the United States brought him into his official family and then into his private family and poured his innermost thoughts into the spender's prominent ears. The wife of the President adopted his small child in all but name."

Trohan quoted Representative Dewey Short (Republican of Missouri) as having said in "a message of extraordinary importance" to the House of Representatives: "Would the followers of the Rasputin of the White House . . . use this war as a smoke screen to saddle upon America a type of government and a kind of economy entirely foreign and contrary to those we have ever known?"

Hopkins pasted the Trohan article in his scrapbook.

On September 20th, Hopkins read a copy of the proposed agreement whereby Italy would be permitted to enter the war not as an "ally" but as a "cobelligerent," and he wrote the following memorandum and sent it to the President:

I hope you will not encourage Eisenhower to recognize Italy as a cobelligerent. This will put them in exactly the same status as the rest of our allies. Nor do I think there is enough evidence that Badoglio and the king can be trusted for us to arm any of their divisions. I should think that Eisenhower could quietly look the other way if some of the armistice terms are being violated, such as Italian naval ships being used to transport our troops, or Italian bombers from Sardini fighting the Germans . . .

Would it not be better in paragraph two to cut the words "to wage war against Germany" and substitute "to assist us in the war"?

I cannot see that a declaration of war by Badoglio gets us anywhere except a precipitated recognition of two men who have worked very closely with the Fascists in the past . . .

COLLIER'S "Your speech is running about three minutes long!" FRITZ WILKINSON

On September 25th, Roosevel nounced the resignation of Su Welles as Undersecretary of Stat the appointment of Edward R. tinius, Jr., to that position. This m the unhappy conclusion of the proti conflict between Hull and Welles. Roosevelt could no longer prod semblance of pacification with te softening words. Roosevelt was a to have Welles go to Moscow f conference with Molotov and but Welles felt that he had no but to get out of government serv together. To the best of my know Hopkins wrote nothing about the Welles dispute and I never hear comment on it one way or the oth

Roosevelt's concept of his deper on Hull was justified by the eno success of the Moscow Conf in October, and its consequent found effect on Congressional o On November 5th, as Hull was ing from Moscow, the Senate ap by a vote of 85 to 5 the Connally lution providing for postwar coll tion to secure and maintain peace world and for the establishment general international organizatio might become a new League of N

This decisive action streng Roosevelt's hand immeasurably as barked for the first conference of t Three at Teheran. It served not the other United Nations that in t tlement of the second World W contrasted with the first one, Ro had the backing of the legislative b which Wilson had so disastrously

(Next week: Teheran—the Three meeting for the first time, pl future of an entire planet. Stalin ual promise that Russia will fight after Germany has been d changes the whole war picture.)

GENTLEMAN GEORGE

Continued from page 15

something he had saved. The fire burned down to embers and the room grew black. He continued to kiss her, he was drunk with her, and her scent clogged his nostrils. The fire burned out completely, the room grew cold, but they did not notice. . . .

After they went back to New York they did not tell anyone they were going to be married. Her parents were in Florida and she wanted to tell them first, she did not want to write them about it. George agreed. About that time, too, he started meeting all her friends. There were Christmas parties, New Year's parties, and before he knew it winter had passed. Her father had gone to California on business—he went directly from Florida—and when spring came her parents were still on the Coast.

Hal Everet, who had also spent the winter in Florida, came back to town. He was the only real friend that George had to introduce to Frances, although George did not tell Hal about the marriage, because Frances' parents did not know. Too, Hal began to go a lot of places with them, and several times when George could not get away from the office Hal took Frances out. At the time George thought nothing of it.

Spring came early that year. The last week in April, Frances' uncle who had the hunting lodge in Maine asked her to open his summer place in Massachusetts for him. George planned to go with her one week end, but when it came he had to stay and work. He was terribly disappointed.

"Darling," he said over the phone, "I don't want you to go if I can't get away. Can't we go next week end?"

"But I promised my uncle, George."

"But you know he really doesn't care."

"George, I promised him. We mustn't be selfish, you know, dear."

"That's right," he said. He had suddenly had so much of what he had yearned for all his life that he guessed he had become a little blind to other people's wishes. "Well, you go ahead. I'll miss you, darling."

That Saturday night on his way home from the office George stopped in at the men's bar at the Ritz for a drink. As he walked in he saw Frances' uncle sitting alone at a small table. The uncle waved to him and George went over.

"Why, sir," he said, "I thought you were in Massachusetts."

"No," the uncle said. "But I did think that you went."

"Why, no," George said.

"Well, I know she went up with some young man," the uncle said. "I'll bet I've confused you with him."

George felt sick. "What young man?"

"Your name is George," the uncle said. "Of course. Why, she went up with Hal then. That's who it was, Hal."

For a moment George could not move. He sat there feeling sicker and sicker.

"Poor Arthur! When the cop stopped us Arthur was scared to death—!"

"So I said—listen, you big ape! Just because you got that badge doesn't mean—!"

COLLIER'S DAVE GERARD

So that's why she was so eager this week end, he was thinking, why she couldn't wait until I co He jumped up.

"What's the matter?" the uncl "Hey!"

George went out to the stre stood at the curb. He wanted someone and he thought: I'll ki I'll kill him. Automatically he sta walk. He went down Madison A to the park at Twenty-third Street he sat on a bench and put his h his hands. His face was hot, hi hurt. She had been everything h wanted, he had never tried to hav thing that he had wanted before, the misery and the loneliness that had in him all his life came to the s

He got up and walked again. I he got some cigarettes and a drin the bar was too noisy. He left. W got to his apartment he went to b he could not sleep. All his life h let people push him around. W hell with her then! He was t with her. If he couldn't have all he wasn't going to have only pa

Monday afternoon when he home from his work his telepho ringing. He did not answer it, a moment it stopped. Fifteen m later it began ringing again. A evening it rang at fifteen-minute vals. He knew it was Frances and not answer it. The next night h telegram every hour, delivered by senger. He burned them without them. When he got home, Wed night, there were two letters in h from Frances and one from H tore them up, unopened. He going to let them butter him u some fast talk so they would

friends again. This time no one was going to talk him into anything.

After two weeks the telegrams, phone calls and letters stopped.

The next week the vice-president of his firm in charge of personnel called George into the office and asked him bluntly if he would consider taking the position of manager of their Buenos Aires branch. Immediately George said yes.

"Now wait a minute," the vice-president said. "You don't know what this means. It's very likely that if you do well in Buenos Aires, you'll spend the rest of your business life in South America."

"Good," George said. "I'll go."

HE WAS scheduled to sail in two weeks, and he worked the first one, but not the second. He gave Miss Finchley a new fountain pen and inkwell set and a box of candy, cleaned out his desk, and left. Every night of his last week in town he went to the theater, alone. And he wrote his great-aunt Caroline a note telling her what he was going to do.

The day before he was to sail he received a note from his great-aunt telling him that he could come to see her. So that morning at eleven he called at the small Park Avenue apartment that she had kept since she had sold the old family house. A maid as old as his aunt let him in and he found his aunt in a small sitting room. She was small, wrinkled and deaf.

George sat on a small uncomfortable chair and held his hat in his lap. "In my note I forgot to tell you where I'm going. South America. Buenos Aires in particular."

The aunt looked at him with old eyes that had heavy lids like a turtle's.

"I probably won't come back for a good many years, if ever." He cleared his throat. "So this is probably the last time we shall see each other."

"You know that I'm leaving the money to charity." the great-aunt said. "You mustn't expect anything."

"I don't," George said.

"You should get married," she said. "You're the last one of us."

George suddenly wanted to talk to her, to tell her about Frances, to tell her how miserable he felt. He had never done such a thing before. "Aunt," he said, "listen. I was going to get married, I was engaged to Frances Mason. But something happened, and, I want to talk to you. I need to."

She looked at him, then twisted the knob on her hearing aid and shook the battery case. "What did you say?" she said.

He managed a smile. That was an old trick of hers, pretending that she did not hear what she did not want to. "I said goodby," he said.

When he went out of the apartment building he stopped for a moment on the sidewalk. The sun was shining and the weather was pleasantly mild. Lately he had avoided going anyplace where Frances might be. But now he had only one more day, he might never come back. He wanted to have lunch at Victor's because he was lonely and he had to talk to someone, even a bartender.

He walked downtown to Fifty-third and went into Victor's. It was decorated in soft grays and the lights were indirect. He went to the bar. As he was standing there staring down at his Martini he felt someone put a hand on his shoulder and he heard her say, "Hello, George."

He knew, of course, but he turned around as if he were surprised. "Why, Frances, hello."

She was smiling up at him and she had never looked better. Her hand was still lightly on his arm and right then it began all over for him again.

"I've been looking for you," she said. "I heard you were going to South America."

"Yes," he said.

"Be gone long?"

"I probably won't come back." He had somehow finished his drink. "Well, I must go."

"George," she said, "please have lunch with me. Please talk to me. I know I've hurt you, but I don't know how. Please tell me about it. Don't you know how I feel about you? All you have to do is say come, and I'll go with you anywhere, do anything for you. You've got to tell me what it is."

He took a deep breath. There it was. All he had to do was accept her explanation, believe what she wanted him to believe about the week end. Just be a good little boy and fall in line. "I don't think you'd better say any more. You'll only embarrass us both."

"Oh, don't be such a fool!"

"Goodby, Frances," he said. As he went to get his hat from the hat-check girl he saw in the mirror behind the bar that Frances had her face in her hands. He wanted to go back, but he wouldn't let himself.

Later that afternoon he went to his apartment and finished packing. The phone rang at five. It was Miss Finchley. She had some papers that he was to take with him, she said she would come by from work with them. He thanked her, hung up. Almost immediately the phone rang again. Thinking it was Miss Finchley again he answered it.

"Hey, George!" Hal said. "What's this I—"

"None of your damn' business," he said.

"Listen, George," Hal said. "I want to—"

"Go to hell!" he said and slammed down the phone. That was too much. He went to the liquor cabinet and poured a stiff drink.

MISS FINCHLEY came at five-thirty. When George opened the door she held out an envelope and said, "Here are the papers, Mr. Willis."

He took them and stood there looking at her. He was feeling pretty aggressive again. Miss Finchley was brunette, and she was young. He decided that she was not half bad. "Would you care to come in?" he said.

"Yes." Miss Finchley said.

He let her in, seated her and said, "Would you care for a drink?"

"Uh-huh," Miss Finchley said.

George gave her the drink. She drank it and he poured her a second, which she sipped. She smiled at him and said, "I hope you'll be very happy."

"I will," George said. "Don't you worry. Say, what's your first name?"

"Gladys," she said.

"Let's have another drink," he said. He made the drinks and when he sat down beside her on the couch, he put his arms around her and kissed her.

She pushed him away. "Now calm down, Junior."

"Listen, Gladys," he said.

"No," she said. "No. What's the matter with you anyway?"

George put his face in his hands. He was fed up with himself again. It seemed he couldn't do anything right. "What a jerk I am!" he said.

"What's the matter?" she said.

George told her all about Frances. He left out nothing. When he had finished, Gladys Finchley said, "You're crazy. So what if her uncle didn't go? Maybe her aunt went. Or even if they were there alone it doesn't necessarily mean anything. Gee, I feel sorry for you. You just don't know very much about people, do you?"

"What do you mean?" George said.

"Give the girl a break," she said. "Give her the benefit of the doubt, can't you?" She looked at her watch. "Gee, I have to go."

After Miss Finchley left, George sat down and poured himself another drink

week end—"

and I were never together ur hours a day," she said. "How about the daytime? Didn't you worry about that? How did you know whom I was with and what I was doing? If we were married would you stay home all day to watch me?"

"No," he said, "I—"

"Don't you see how ridiculous you are?"

He was very tired and he knew that all the torment he had been through in the past few months was all due to himself. He had hated people all his life for putting things over on him, when it had been his fault for letting them do so. It was a weakness that he had tried to conquer by pushing other people around himself.

"Maybe it was because I had never cared about anyone before, maybe I loved you too much. You know, I can't remember my parents and I never got any love from my aunt. I never had a girl before, Frances, I never loved anyone, anyone at all. If you hadn't chased me some I would never have loved you. But when I did I had to make up for everything I never had. It just came pouring out. There was too much of it, and that's no good." He paused. "I guess I was afraid all along that something would happen so I wouldn't get you. When it looked as if something had happened then I was too ready to believe that it really had."

She was looking up at him, she took his hand in both of hers. "I thought I'd been miserable," she said. "I thought I'd had a very hard time. You've never had a very good time, have you, George?" She held his hand against her cheek. "Do you want me to go to South America with you? Or anywhere else? I'll go, because I love you. I never stopped for a minute. Let me help you, darling."

"Help me," he said. "You want to help me." He leaned back and sighed, but he did not feel so bad any more. He looked at her as she held his hand against her cheek; he grinned at her. "Now how could you help me?" he said. "How could anyone as tiny as you help anyone? Why, you're like a doll. Listen, how does someone as tiny as you get along in the world all by herself, anyway?"

"By being smart," she said quickly, "and knowing that men like you just say these things to me."

"Oh?" he said. "Well, not any more. All that's going to change."

"Is it?" she said. She put both her hands in his, and looked up at him, grinning a bit. "Tell me about it, George."

"It'll take time," he said.

"We have all afternoon," she said.

"No," he said. "I mean a long time. You know, like forever."

She laughed. "Well, you just go right ahead then."

THE END

"This is my boss, Tommy. See how absurd it is to be jealous?"

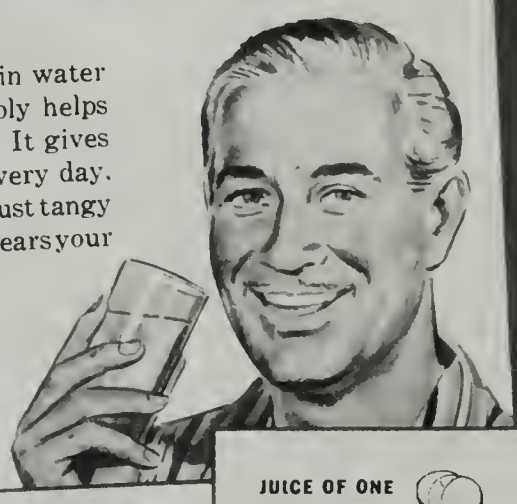
I learned this about laxatives—

I found that harsh laxatives *irritate your digestive tract and impair nutrition.* So I looked for something better. It proved to be surprisingly simple!



Lemon in Water is all I need

Yes—just the juice of a lemon in a glass of water, taken the very first thing when I get up in the morning. Most people find that this natural fruit drink, taken at that time of day, is all that's necessary to insure prompt, *normal* elimination.

—and it's healthful!

Get this straight:—lemon in water is *not* a purgative. It simply helps the system *regulate itself.* It gives best results when taken every day. It isn't too sharp or sour—just tangy enough to be refreshing. Clears your mouth, wakes you up. Better try it!

JUICE OF ONE FRESH LEMON

IN A GLASS OF WATER

FIRST THING ON ARISING

NO FRUIT MORE HEALTHFUL THAN LEMONS!

Generations of Americans have taken lemons for health—and generations of doctors have recommended them. They are among the richest sources of vitamin C; supply valuable amounts of B_1 and P. They alkalinize, aid digestion. Lemon in water, when taken daily first thing on arising, makes harsh laxatives wholly unnecessary for most people. Try it! Give it time to establish regularity for you.

California **Sunkist** *Lemons*

THE WEEK'S MAIL

Continued from page 4

And what about the fellow who bets the horses through a bookie? He never sees the bangtails run—just phones the bookie and drops a check into the mailbox every now and then. Rarely is he required to use energy to open an envelope containing his winnings.

Getting my vote as all-time high in inactive sportsmen is the fellow who scored the world's fish endurance record. Back in 1934, a gray nurse shark, Skipper IV by name, was installed in an aquarium pool at Taronga Park, Sydney, Australia. The shark swam continuously, at three miles an hour, until 1939, a total of some 105,000 miles. Then along came the war, and the shark watcher suddenly found himself with other duties. On his return, presumably he suspected that Skipper IV might have stopped, once or twice during his absence, for the record has not been picked up since the end of hostilities.

JOHN DERR, Upper Montclair, N. J.

. . . Lazy Man's Sport reads: ". . . You never have to wait up for them because pigeons look for a comfortable tree at dusk and stay there until dawn."

I have read of passenger pigeons breaking down trees with the weight of their nest, a hundred years ago, but that particular kind of pigeon is extinct. I have never seen a pigeon alight in a tree.

GUY K. BROWNING, Wilmington, Del.

. . . I understand that a pigeon's feet are so formed that to grasp anything with the toes is an impossibility. You will never see them resting on wires, either.

CLIFFORD B. EWING, Peoria, Ill.

KNOCK MR. DAVENPORT'S HEAD

DEAR SIR: In answer to Russell Y. Ritchey's question of What Would You Do? (June 26th), I submit the following suggestion:

Take Mr. Ritchey's head and knock it against that of Mr. Davenport, your editor, for producing one of the most arrant pieces of warmongering ever published by a periodical in this or any other country.

MRS. ALICE L. FALLENDER, Hollywood, Cal.

MUSCLED U.N.

DEAR EDITOR: There was a frightfully sour note running all through Collie Small's The Hot Potato Olympics (July 3d). It seems to be virulent among sports writers at the moment. Why not build instead of break? I have reported several Olympic games and by and large the competitors were the finest sort of fellows, better than those I met at meetings of the League of Nations, at national political conventions or even at the meetings of the executive committee of the British Labor party.

ARTHUR S. DRAPER, Chestertown, N. Y.

It's not the athletes who cause the Olympic ructions. It's the nations behind them.

ART CRITICISM

DEAR ED: Six Artists and a Model (July 3d) should have been entitled Six Monstrosities and a Model. You are reading the letter of a great artist of ten years back, as I used to do that sort of stuff in kindergarten. This modern art is really going to extremes, and getting too technical:—goofy pictures that only goofy characters could think up.

Seventh Unmonstrosity

Undoubtedly, I'd never win an art award for my piece of work, but at least the majority of the people look at it and tell what it is, so he seventh piece for the model to see

STARS—TWO STYLES

similarity between Beverly Baker
ertrude Augusta (Gussie) Moran,
lery favorites on the tennis circuit,
graphical and coincidental. Bev
ssie live in Santa Monica, Califor-
yond that there is nothing similar.
idextrous Beverly, just turned
n, has no backhand. Maybe it would be more accurate to say she has two forehands, right and left. She serves right-handed, writes left-handed, and eats right-handed. On shots down the middle, she does what comes naturally.

"I use whatever hand the racket happens to be in," Bev says. "If you start thinking about it, it gets too complicated."

Bev's double-barreled forehand didn't just happen. Her dad planned it that way. "Bev isn't much over five feet," Frank Baker explains. "The two forehands increase Bev's reach—help her to cover almost as much court as a taller girl."

The all-forehand style also gives Bev extra hitting power. She won the National public parks title in 1946, and scored her first big victory last September by upsetting Pat Todd (ranked No. 4 nationally) in the finals of the Pacific Southwest.

Galleryites who revel in Bev's unorthodox strokes are captivated by Gussie Moran's classic style and form: hips 35 inches, waist 27 inches, bust 36 inches. Glamorous Gussie rates No. 9 nationally, surprisingly high when you remember Gussie quit tennis in 1941 after winning the girls' doubles title with Louise Brough, now the American champion.

Gussie had movie ambitions at eighteen (her dad is a Hollywood sound technician). Friends told her tennis would put muscles where curves ought to be. "So I quit," Gussie recalls. "I decided I wanted to be a girl."

Several minor parts—including a dancing bit in Rhapsody in Blue—ended Gussie's movie aspirations. She worked the graveyard shift at Douglas Aircraft for three years.

"When the war ended," Gussie says, "I decided to play tennis again. Went East but everybody beat me in 1945. The next year I got to the national quarter finals, took a set from champion Pauline Betz, and ranked 13th. Jumped to nine last summer. This year I'm aiming for No. 4—and the title in 1949."

Strangely enough, tennis officials do not share the gallery's enthusiasm for Gussie. "I don't think they like the way I dress," Gussie admits. Court protocol decrees knee-length dresses or longish shorts for lady tennis players. Gussie wears short-shorts and a T-shirt.

Down East last summer, Gussie put one of the disapproving brass hats on the spot. "What's wrong with my T-shirt?" she asked.

"Well, Miss Moran, isn't it a bit—that is—can't you buy a larger size?"

"I always buy the large size," Gussie replied—then added mischievously, "but they shrink."

THE END

"What say we try one Sunday evening without him?" JOHN RUGE

A day had twenty-four hours in grandmother's time. It still does. But we pack more into it. And so time seems to get constantly shorter and more valuable. And more than ever we depend on the incorruptible honesty of Westclox to keep us from losing even one precious moment.

us! I'm getting married!"

"Look, there's nobody left to take Barbara, and she's fond of you."

"But, boss—"

"And her contract with us runs out this month, and we've got to be especially nice to her so we get a renewal."

"But, boss—"

"Pick her up at her house at eight."

"But, boss—"

WELL, it wasn't much of a job, but it was the only one I had. So I called Janice. You don't say to your bride-to-be that you can't get married because you've got a date with another girl, particularly when it's Barbara Brighton, whose face and figure are more familiar to the American male than the multiplication tables.

So I said I had to work, something very important had come up at the office, we were going to have to go over the books all night.

"My wife watches on television and—
silly of us, I suppose—when I tug
my cap twice it means 'I love you'"

COLLIER'S PERRY BARLOW

"Books—I didn't know agents could read."

"This isn't that kind of book. This is accounts."

"But, darling, this is our wedding night," Janice said with a tear in her voice, or else there was a bad connection.

"How do you think I feel?" I said. "Do you think I'd rather go over the books than—? I mean marry you?"

"No," she said.

"All right, I'll pick you up in the morning. I love you, baby."

"I love you too."

"I'll pick you up in the morning."

"Get here early." . . .

I felt like a heel at that dinner with Barbara. She looked quite lovely in a low-cut evening gown, but I had never had any particular interest in her because she had a way of calling me Michael and fawning all over me, when I knew that she was really only interested in herself, and could never be interested in anybody else. Still, it had been pleasant before to be seen with her, to be envied by the uninitiated who didn't know her as she really was, but only as the first citizen of their dream world. It had been pleasant in that way before, but that night I felt horrible. I should be in that small town up the coast with my bride, and here I was having dinner with the most celebrated beauty in the world. It was crazy.

There was champagne. I don't drink, but Barbara has a special interest in champagne. She won't drink anything else, some kind of a Madame Du Barry complex but she makes up for her shortages in the other departments by putting away champagne like it was corned beef and cabbage. The result was that toward the end of the evening she grew rather fond of me and kept saying what a dear boy Michael was, the only agent who didn't want to maul her. This wouldn't have been so bad but at a particularly inopportune moment, a photographer took her picture. She was demonstrating her fondness for me by giving me a big bear hug when I saw the flash.

I tried to catch the photographer but he was gone. I hoped he wasn't from one of the newspapers because if that picture got printed and Janice saw it—

I took Barbara home and then tried to get a little sleep. I had told Janice I would be by about ten in the morning and we would leisurely drive up the coast and somewhere above Santa Barbara we would get married.

I got up at ten and drove to Santa Monica. I rang the doorbell and the redhead let me in. Those blue eyes were battleship gray again.

"Going over the books, eh?" she started.

"What's the matter?" I said.

"This," she cried, pointing at a newspaper in her hand. I knew without looking that it had printed The Picture.

"Now look, baby, there's nothing between me and Barbara."

"You were just trying to keep warm?"

"That's my job."

"Keeping her warm?"

"No, taking her to dinner."

"You said books, accounts!"

"I didn't want to worry you!"

"Go!"

"But, Janice—"

"Leave! Go!"

"But, darling—this is our wedding day!

"It *was* our wedding day—go!

It was then she started throwing things. Unfortunately I had taken her to Ocean Park a few nights before and won for her about a dozen little dolls, dogs, elephants and the like. She had placed them all on the mantel, and now, one by one, she threw them at me. She showed much more skill than she had at Ocean Park, she didn't miss me once. That elephant hurt.

"But, darling!" I shouted once more and then fled to my car. . . .

Driving back into town, I decided that I would resign my job with the agency. That would show Bailey Jones, and it would also show Janice that I really loved only her. I considered having Barbara call Janice to tell her that she had hugged me for a gag, but it didn't seem like such a good idea. Barbara was strange; she might not want to lose me for an escort.

I entered the boss's office and said, "Mr. Jones, I want to resign."

"But, Mike! Baby!" he said in that tone he always used when he wanted to talk somebody out of something. "Aren't you happy here?"

"I'm very unhappy."

"But you go out with the loveliest girls in the world. What's wrong?"

"I don't want to go out with the loveliest girls in the world, I want to go out with my wife. I mean, I want to get married."

"Married?"

"Yes, to a girl."

"But why didn't you say so?"

"I tried to tell you yesterday, Mr. Jones, but you wouldn't listen."

"You—married?" the boss said, suddenly realizing what I meant.

"Well, it's not so impossible. I'm twenty-nine now and—"

"But if you get married, you'll have to go out with your wife!"

"That's why I'm resigning."

"You—married," he repeated. "I think this is wonderful, Mike; marriage, you know, is a wonderful institution!"

"You should know," I said, "you've been in eight times."

"But you don't have to resign to get married."

"I don't?"

"No—you can go on day shift."

"Fine, boss!" I said. Day shift meant that I would have to have lunch with people instead of dinner, take girls to tennis matches instead of night clubs, and carry contracts around from studio to studio, like an office boy, but it would give me my evenings free.

"No, sir, no more nightwork for you, Mike," the boss said. Then he put on his serious look, lectured me on the sanctity of the home, and said, "This is a fine thing you're doing."

"A far, far better thing than I have ever done before," I said.

"Exactly."

JANICE wouldn't answer the door or the phone, and it was a week before I found her. During lunch hour I was walking down Wilshire to see the girls in their California dresses, and I happened to turn up and walk by Schwab's. I wasn't going to go in, but I saw the old Duesenberg, and changed my mind. I saw the redhead sitting at the counter.

There was an empty stool beside her so I slid onto it. "How would you like to be another Lana Turner?" I said.

She didn't even look.

"I've got it fixed with the boss, baby," I continued, "I don't ever have to take any of our clients out at night."

No answer.

"Never any more."

No answer.

"Never. Ever."

"I don't believe it."

"Honest, I'm on a day shift."

"We'll see," she said.

"You mean it's all right?"

GET TWO CANS TODAY

"We'll see."

"How about tonight? Dinner?"

"All right. Are you sure you're not going to have to take Barbara someplace?"

"Positive."

"Well, I guess I need somebody who knows how to start a Duesenberg."

We walked outside and I started the car for her. "Pick you up about seven. Maybe we could get married tonight."

"No."

"Janice, I love you," I said, racing the motor, "and I don't have to work nights any more and I'm crazy about you." Then I did rather an unusual thing for me. I grabbed her and kissed her. The motor was racing and so was I. I won.

"Oh, Mike," she said, "maybe we better get married." I kissed her again, and there was a roar of approval, not from the motor but from an audience of people who had come out of the drugstore to watch us. I stood up, took off my hat, bowed and drove away in triumph.

THAT evening, I was in my apartment packing my clothes to get married. (I still couldn't make up my mind about the tennis racket.) The phone rang. I let it ring for a long time, but then I thought I'd better answer it. It could always be a rich uncle wanting to leave me a lot of money, or a publishing house saying they had decided to publish that novel.

I answered it. It wasn't my uncle. It wasn't the publisher. It was Bailey Jones.

"Look, Mike, I've got a little job for you," he said.

"We said no more nightwork, boss."

"I know, Mike, but do you think I'd ask you to do this if it wasn't important?"

"No."

"Well, we're in a jam, and I know I can always count on you in a jam, can't I?"

"I suppose so."

"All right then. Barbara had a date with Cary Sprague to go to the Lambert newspaper dinner tonight, but she's been stood up. You've got to take her!"

"But I just took her to that dinner last week."

"That was another newspaper syndicate; it was just a rehearsal, this is the big one. You've got to take her, we can't offend the press."

I took a deep breath and thought the situation over. If I ran out on Janice again, I would never help her start the Duesenberg or anything else. And yet, if I told the boss I couldn't go because I was getting married, he'd talk me out of it, or I'd probably get fired. Then, right out of the Sunday section of the paper, an idea came to me.

"Look, boss, I'd love to do it, but I can't—"

"Why not?"

"Well, I'm working on something that's more important for the agency."

"Like what?"

I paused, trying to think of something.

"You don't mean you're getting married?" he said.

"Oh, no, nothing like that. I mean I'm trying to sign up a little girl that every other agency in town wants to handle."

"What's she like?"

"Well, she's—uh—sensational. Plenty of oomph and all that."

"Good teeth?"

"Yeah, all of them."

"Dark hair?"

"Sort of."

"Good!"

"So I won't be able to take Barbara to the dinner, boss, I've got to track this girl down."

"That's great, Mike, bring her over here in an hour!"

"But what about Barbara?"

"She can go with her husband if she has to: get that girl over here. Jerry Kent is in the office and I've just told him I've got a new girl for him to put in his picture."

From Installment XIII of THE SECRET PAPERS OF HARRY L. HOPKINS: "Churchill wanted to drive the Japanese out of it [Burma] not so much for the purpose of gaining access to China as to avenge a mortal insult to imperial prestige, and he did not relish the idea that the Americans or, more especially, the Chinese should have any share in the credit for its liberation."

"But don't you want to use the girl you've got, boss?"

"Don't be silly, Mike, I haven't got any girl. I was just stalling. Get that girl over here!"

"But, boss—"

He hung up on me.

For a moment I looked at my diploma on the wall and wished I'd been a Latin teacher like I was going to in the beginning, before I took Latin. And then I made a decision. I threw the tennis racket in the car and continued packing. I was going to get married, even if it meant my job. I could worry about work after the honeymoon. After all, a man who can start a Duesenberg must be in demand someplace.

I drove to Santa Monica and picked up Janice. She looked lovely in her wedding gown—blue jeans and a red shirt. Something old and something blue, she explained.

"Do you think we'll really get married?" she grinned.

"What could stop us?" I said bravely.

"I thought maybe you might have to take Barbara to the flea circus."

"Darling, we're going to be married if I have to lose my job," I said, thinking it was going to work out just like that.

My plan was to drop by the office and tell the boss that the girl I was trying to get for him had gone to Fresno to see her mother and I was going to drive up there, nab her and bring her back.

I parked in front of the Bailey Jones offices in Beverly Hills and said to Janice, "I've got to tell my boss something. I'll be right out."

"Is this the hallowed hall?"

"This is it."

"Mind if I take a look?"

"You want to see the insides?"

"It was in a magazine last r Very modern. I'd like to take a

"All right," I said, "come on. went inside. I left Janice looking *décor* of the outer room and open door into the boss's office.

"Where is our new star?" Bailey said immediately. I saw Jerry Ke producer, sitting on the couch.

"Hi, Mike," Jerry said. He wa man with a cigar, and a Hungari cent he picked up on a trip to Pas

THE END

"I suppose it hasn't occurred to you that you may be laying yourself open to a possible suit for false arrest?"

COLLIER'S

GARONE

IN CASE OF EMERGENCY...

The lifeguard is an expert swimmer. His duty is to keep people from drowning.

In a sense, the Household Finance branch office manager is a lifeguard, too. His duty is to help people out of "deep water" of another kind—a money emergency.

These branch office managers are responsible for the financial advice and assistance needed by Household's customers. They have spent an average of 11 years with HFC and they know their business.

They know how to help our customers to use our loan service—how to help them get out of money difficulties, and maintain their living standards while doing so. In many cases, but not all, an HFC installment loan is recommended and provides prompt help. More than 100,000 such customers are served every month through 445 branch offices of Household Finance and its subsidiaries.

Reconstructing family finances is an exacting, painstaking and socially useful business. Our branch office employees in the United States and Canada are proud of their records of service to the public and of Household's 70 year history as a source of emergency money. Largely because we offer this prompt personal service, past and present borrowers recommend Household to friends, neighbors and relatives, in need of money help. We must continue to deserve these recommendations.

It is Household's business to make cash loans to families and individuals. It is equally our responsibility to prevent misuse of consumer cash credit.

We have for many years encouraged a better understanding of money—how to save it, how to use it, how to *avoid* money emergencies. The Money Management Library was developed by our Research Department as a major contribution to this consumer education activity.

Write, today, for your *free* copy of "The Budget Calendar" which shows how to make a simple practical plan of Money Management.

Address: Research Department, Household Finance Corporation, 919 N. Michigan Ave., Chicago 11, Illinois. For nearest branch office, see your 'phone book.

1878—SERVING THE PUBLIC 70 YEARS—1948

A LADY FOR BALLAROL

Continued from page 21

I drank the pisco right down. I looked around. Delbert and Delevan Hale were yelling at each other like always, and Press Farmer was trying to get out from between the twins before he went deaf. I waved, then I said to the bartender, "Two more piscos."

What with piscos, and then more piscos we stayed in the Parker Hotel bar a long time. Then Sime took out a big watch, looked at it, then shook his head and showed it to the bartender.

"What's it say?" he asked.

The bartender said, "Ten minutes after five, Mr. Canought."

"Oh, hell," Sime said. "I got to go to the boat."

The bartender rubbed the bar. "What boat, Mr. Canought? Boat's gone long time ago."

"You figure on taking the boat, Sime?" I asked. "You just came back from New Orleans. You going again?"

Sime scowled at me. "No, I ain't taking the boat." He finished another pisco, then banged the glass down. "She's coming on it. I got to meet the boat." He took my arm. "We gotta meet the boat, Rack."

WE WENT out, and I mounted the mare. Sime looked up the street, and one of the Canought darkies drove the carriage up. Sime got in and he told the coachman to get out. I rode alongside.

"Who's she?" I asked him.

"I tol' you," Sime said. "How many times I gotta tell you, Rack? She's comin' on the boat." He touched the back of the horse with the whip. "Seems as how you're showin' too much interest in this lady, Rack."

Sime and I were good friends. He lived a little way upriver from Ballarol and we had grown up together. We had a lot of arguments. Two years before we couldn't agree over a hound-dog. I still have the mark on my leg where Sime put the bullet. It never hurt much, and we had always been friendly. A gentleman has to show spirit. I liked Sime fine but I wouldn't take anything off him.

"Sime," I said, "I won't take anything off you." Then I remembered Pappy and what I'd come to Natchez for. I stopped the mare and Sime stopped the carriage.

"I ain't going to meet Dolly by myself," Sime blurted.

"All right," I said. "But you dull your tongue, Sime."

Natchez-Under-the-Hill was a place to see and smell. You could see anything down there, and you could smell the garbage and the mud flat that spread from the foot of the cliff to the river. There wasn't a boat in sight when we got to the Landing. There was a red-haired girl sitting on a round-top trunk, and she stood up when Sime got out of the carriage. She didn't say anything, and Sime just looked at her for a minute. Then he looked at me.

I reckon I was staring real hard. She was a little girl, but she was good-sized in the right places. Her eyes were green, with little speckles of brown in them. She kept looking at Sime.

"Miss Remson," Sime said at last, "Dolly, this is Rackham Ballarol."

"I am waiting for the next boat," she said to him. "I am not waiting for you any longer."

"I was kept, Dolly," Sime said, and his voice was weak.

I cleared my throat. "Ma'am," I said, "you can't wait all night. Not here in Natchez-Under-the-Hill."

"Mind your own business," Dolly said, still looking at Sime. And Sime turned to me. There was a high flush on his face, and it wasn't all due to the piscos. Sime was working himself up.

"I don't reckon we need you, Rack," he said.

I bowed to Dolly, and I said, "Ma'am, I bid you good day."

"Don't you dare leave me alone with this man!" Dolly cried. Sime moved toward me.

"You going to make trouble, Rack?" he said.

"She says, Sime," I told him carefully, "that she don't want to be alone with you. I reckon she knows what she wants." I looked at Dolly Remson's red hair, and her green eyes with the flecks of brown in them. I figured if anybody made trouble it would be Dolly Remson. And I didn't figure it was any of my trouble. I stepped toward the mare, and Sime gave me a push. My feet sort of twisted and I fell down. I was up in a hurry.

I poked Sime, and he lit on one elbow and the seat of his breeches. He got up.

"Here's the hatchet, Ed. Would you split me some kindling, please?"

COLLIER'S — VIRGIL PARTCH

He bowed to Dolly Remson. She stared at both of us in turn, her eyes big as plums.

"My apologies, ma'am," Sime said, and he bowed with a jerk. "You will please excuse us," Sime said. "We will be crossing over into Louisiana."

"One of us," I said, "will be back soon."

"No!" Dolly said. "No! Please—"

"We got to," Sime grunted. "Dueling ain't legal in Mississippi any more." He walked toward the carriage. "Don't you fret, I'll be back."

"Ha-ha!" I laughed. Then she looked straight at me and I stopped laughing. Sime got in the carriage and I mounted the mare. I swung my hat off, and Dolly's lip trembled. I had to spur the mare to catch Sime. He was going up the hill fast.

I followed Sime into the bar at the Parker Hotel.

"This," I told myself, "will be a scandal like nobody ever had before." I began to pride myself in it. I had never fought any man over any woman before. I wasn't sure I was fighting Sime over Dolly Remson, but I began to hope so. I drank two piscos while Delevan Hale argued with Delbert Hale over choice of weapons and distance. Everybody knew it would be pistols, and everybody knew it would be twenty paces. But the twins were cold as river ice in February and very polite to each other. Delevan came to stand beside me, and Delbert went to have a pisco with Sime.

"Gentlemen," Press Farmer said, "who is the injured party?" Press was a lawyer and a man for wasting time.

"I am!" Both Sime and I said it at once, and there wasn't another sound in the room except the clink of a pisco bottle against a glass.

"What was the injury?" Press asked. "Do you agree on that?"

Sime clamped his mouth shut, and I didn't say anything. I began to think hard, but I couldn't remember who was injured, except Dolly Remson. And the longer she sat down in Natchez-Under-the-Hill on her round-top trunk, the more injured she would be. Whichever one of us went back down the hill—I shuddered.

"Pistols," Press Farmer said at last, "at twenty paces? Is that agreeable?"

Delevan and Delbert looked at each other, then both said, "Yes, sir." Sime and I didn't say anything, even on the way across the river into Louisiana.

THERE were oaks shading the dueling ground and you could see the river. I scraped my feet over the grass. The ground was dry and the grass thick. I waited, while Doc Price held onto his little black bag, standing a little apart from the seconds and the witnesses. He kept watching me, until I swore under my breath and looked away across the Mississippi toward Natchez. So far as I knew Dolly Remson was still sitting on her round-top trunk.

Delevan came up to me. "This is very irregular," he said. "But Mr. Canought would like to speak to you, Mr. Ballarol."

"Damn it, Del," I said, "don't call me mister. It sounds like you're talking about a corpse. What's he want?"

Sime stood a ways off, and he looked over at me. Delevan didn't say anything more, so I scowled at Sime and took a few steps in his direction. He met me.

"You want to apologize, Sime?" I asked him.

He showed his teeth at me, then said, "I trust you are an honorable m

"What's that got to do with it asked.

"If I fall," Sime said, "there is lady."

"What's that got to do with me demanded.

"As if you didn't know, Rackham larol!" Simon sneered.

"As if I gave a damn, Simon nought!" I sneered back. "Let's ge with this."

We both bowed, and I chose a from the rosewood case. It was a barreled gun and it had a nice ba and a light trigger pull from a trigger you could set. I watched take the other pistol.

"Take your places, gentlemen." I walked over and backed into "Ten paces, gentlemen. The word be fire, one, two, three. No firing the count."

I held the pistol high. I didn't of anything as I walked. Then I sto and turned around just as Sime d let the pistol down, aiming at There was plenty of daylight left, couldn't see him too well. I hear word and I pulled the trigger. I s puff of smoke from Sime's pist waited a minute, then I shook mysel easy. Sime was down.

I walked over and looked at him. was only a little blood on his shirt.

"Rackham Ballarol," Sime said, have done for me."

"I ain't!" I cried, and Doc Price up and knelt on the grass, laying his bag open. "Doc," I said, "he ain bad!"

Sime batted his eyes, then he el at his shoulder. "You have don me—" He didn't say any more, and Price said, "I fear unconsciousnes set in."

I dropped the pistol, and De picked it up and put it in the case clapped me on the back. I scowled a and walked toward the riverbank our boat was. I got in and sat dow a thwart. I could see Doc Price wo away at Sime on the ground.

SHE wasn't at the landing when I back. And when I found she ha a carter and had gone up the hill. I up the hill myself. I was trying to of a middle-sized widow for Pappy I couldn't keep my mind on it. I back to the Parker Hotel bar, and as as I got inside there was a great h and I was thumped and drunk to. had been taken home in his carriag he was perky enough to sit up and at the loafers under the portico o Agricultural Bank as he rode by. lived alone, his house like a man's sl be—filled with dogs, tack for his h and liquor handy to a man's hand Ballarol was like that, but now P wanted a lady on the place to regul into fussyness. I wasn't in any hur think about a middle-sized widow.

After a while the desk clerk ca and put a note in my hand. He told better read it because it was from a

She was upstairs, in the ladies' p and even filled as I was with pisco I was a long time on the stairs. Bu wasn't mad like she'd been at the ing. She sat on the sofa, and she w different dress. There was a lot spread over the horsehair sofa. there wasn't much spread over her top. All I could do was bow.

"You murderer," she said, and h began to quiver and her bosom he

World's Most Popular Club Soda

know how Sime would feel about me showing up with her while his shoulder was still hot from my bullet. And looking at her in that dress, I decided I didn't want Sime to have another look at her at all.

All of a sudden she began to cry. "I'm going back to New Orleans! I don't want to marry anybody, least of all Simon Canought. I want to go home!"

"Ma'am," I said, "you mean you were going to marry him?"

Dolly Remson began to tear her handkerchief up, while she nodded, making the tears run all directions on her cheeks.

"Why Sime?" I said. "He ain't any more a marrying man than I am."

Dolly put her handkerchief up to her eyes, but I could see her looking at me through a hole she had torn in it. "Men change," she whispered. "I thought Sime—I reckon I wouldn't have promised—" She stopped and looked at the toe of her shoe that peeped out from beneath her spread skirt. "I just had to marry somebody," she whispered.

All of a sudden I coughed, and Dolly stared at me.

"I haven't any family," she said. "I've been tending children of sort of kinfolk. I'm a poor relation," she went on bravely, but spots of red came to her cheeks. "And Sime—" The color spread on her face, but she went on. "I reckon I set my cap for him, when he came to visit last month. I reckon I did just that, Mr. Ballarol. And then I was sorry." She looked past me, then added, "I reckon Sime was sorry too."

"Sime's a fool," I said. Then I swallowed hard and added, "But if you want him, ma'am, I reckon you'll have him. I'll have a talk with Sime—"

"You won't!" Dolly Remson cried. She looked down at her hands. "I can get a man without you to mix in. You, and your pistols!"

"I reckon, then," I said, "I won't mix in any more, ma'am."

"All right," Dolly said, still looking at her hands.

"I'll be going, ma'am," I said.

"Well," Dolly said, "why don't you go? Don't just stand there. You look like a man who knows his own mind."

I sat down. "I reckon I ain't so sure," I muttered, and my mind filled up with confusion and anger at myself.

"I'll go back to New Orleans," Dolly said. "I'll go back and raise those—" she bit the words off.

"You don't have to do that," I said with a rush. "You would like Ballarol! You would like Pappy!" I licked my lips. Then I closed my eyes, still seeing her as she looked—trim, and red-haired and with her tiny shoe peeking out from beneath her skirt. "Mammy," I said it to myself, then I groaned out loud.

"Are you in pain, Mr. Ballarol?" Dolly said stiffly.

"I reckon I am, Miss Remson," I said. "I ain't been a marrying man, so Pappy—" I put my head down and let out a long and hollow moan. "I just can't do it!"

I heard her skirts rustle, but I didn't look up. When at last I did, she was gone. I went back downstairs. I didn't go into the bar again. I got my mare and hit the Trace fast.

THE Canought house was all lighted up, and I found Sime propped up in bed. He had a bottle of whisky handy, and he was holding a pistol between his knees and running oiled patches through the barrel with one hand. His right arm was in a sling. Two big hound-dogs lay on the bed. They both sat up and barked at me when I came in the bedroom. The sperm oil on the pistol patches smelled stronger than the hound-dogs.

I sniffed. "I reckon it's plain, Sime," I said carefully, "why a lady wouldn't feel at home here."

"You're damn' tidy all of a sudden, Rack," Sime said. He sighted th the pistol barrel, then he poured a of whisky for himself. He eyed m the glass. "If you're talkin' about Remson"—he drank the whisky finished—"I reckon a man can his mind."

I nodded. "I reckon he can. But gets first chance at it, Sime." I wi him, and I watched the pistol, watched both the hound-dogs. It be like Sime, having his pistol em sick dogs on me. "She's got to tur down, Sime. And I reckon I got her do it."

"Now, Rack," Sime said, "you she won't do that! You ain't givi any chance at all." Then he beg wheedle me. "You're my best f Rack, and nobody ought to com tween us. A woman changes a something awful. He won't hav more say than—" He stopped. " Sime ended, "he won't have any all."

"You ain't got any say now, Sim said. "It's hers." I headed for the "I'll be back, Sime."

PAPPY was sleeping on his back his knees up and a steady flutter lips. I looked at him in the candl then I grabbed one knee and shook He grumbled a minute in his slee then he sat up with a roar.

"I did what you asked, Pappy," "The lady is in Natchez."

"Huh?" Pappy said. "Blast Rack—" He sat up, grabbing the about his neck. "You ain't found Rack?"

But I nodded. "I have, Pappy. you said."

"But that was yesterday," I groaned.

"She's got to turn you down, Pa I said. "It has to be her choice."

When I got back to the Parker in Natchez, it was six o'clock i morning. The night clerk blinked v asked to see Miss Remson.

"You can send a boy up with said, "but I'm going up and knock door."

"Mr. Ballarol," the clerk began, didn't wait. I went up the stairs steps at a time. I knocked on her

"Who is it?" I heard her say. "W you want?"

I waited while I thought how swer. I couldn't think so I kep ping. She came to the door and the bolt slip back. She opened it a and peeked out. She hadn't made a but I could see her in the light fro window.

"Who is it?" she asked.

"Rackham Ballarol," I replied gave a little shriek and slammed the I didn't hear the bolt slip. "Miss son," I said, "Dolly, you got to with me. We're going down-river.

"You go away!" Dolly said, and tled the door. "No!" she squealed. away!"

I didn't answer; I just stood there door trying to think what to do After a minute Dolly asked, "Ha gone away?" She said it nervousl the door opened again slowly.

"You better get dressed," I said wait right here until you do."

Dolly glared at me and slamm door. But I could hear her around.

When she came out she walke me without saying a word. But I s look at me from the corner o eye. We went downstairs and o I handed her into a carriage I had h got in, and then I looked at her. S on a cloak, but under the cloak sh the same dress I'd seen her in th ning before in the ladies' parlor.

"That ain't fair," I said. "Sime-

"Simon Canought," I said, "good morning to you!" And I bowed and hustled Dolly out into the hallway. Sime yelled after us, but I handed her into the carriage and whipped up the horse.

"If you are so frightened of me," Dolly said, "it will be a comfort to know I will not refuse the next man who asks me. And even if you make him ask me at pistol point."

I grinned at her. The sun was bright on her hair, and she had her feet flat on the floor boards, her tiny shoes showing below her skirt. She was such a little girl to be so saucy.

"I went to Natchez to get a wife for Pappy," I told her. "To get a lady for Ballarol. Now I reckon I'll go back there for a parson, if you've made your mind up."

WE GOT to Ballarol in the heat of the afternoon, and I knew Pappy would be sound asleep on the bullhide. I let the parson sit in the carriage, and I lifted Dolly down and led her toward the six darkies who were sleeping in a row beside Pappy, ready to take hold of the bullhide and tug him into the shade.

"Pappy!" I called, and Pappy's eyes opened and his mouth went shut. He blinked. Then he saw Dolly Remson.

"Rack!" he said, and his voice was hoarse and low. "Rack, not her!"

"Her, Pappy," I said. "A lady for Ballarol."

He sat up, and a shaft of sunlight hit him in the eye.

"Move me!" he yelled, and the six darkies took hold of the bull's tail on the hide and moved him. He fixed his eyes on Dolly, then he groaned and looked at me.

"She ain't middle-sized, Rack," he said. "And if she's a widow—"

"She ain't, Pappy," I said. "She ain't even a wife yet. Pappy, a man can change his mind, can't he?"

"Not me, Rack!" Pappy hollered. "I'm too old to change my mind!"

"But I ain't too old to change mine," and I looked at Dolly Remson. She stepped back a little ways, but not quite out of my reach. "I let you have your say once," I told her. "Now I'll let you have it again. You want to be married here by the bullhide, or you want to be married in the house?"

"I don't care," Dolly said, "so long as it's you. And I reckon it is you, this time."

Pappy gave a deep sigh, then he lay back on the bullhide.

"I reckon it was all the time," I said, and Dolly smiled as if it was a secret.

THE HALF-NAKED TRUTH

Continued from page 22

"Go down and tell Dr. Green that the diagnosis is hypoglycemia," Dan Coffee told the Hindu resident. "He'll know what to do."

"Have not previously witnessed case of diabetes in reverse," Dr. Mookerji remarked. "What is prognosis, Doctor Sahib?"

"We'll have to find out if it's chronic hyperinsulinism or just an overdose," Dr. Coffee said. "I've got to go out to lunch pretty soon, but keep in touch with Dr. Green. When the patient wakes up, we'll see about a glucose tolerance test."

"Will establish liaison with ward F instantly," said the Hindu. "Am wishing you most tremendous appetite, Doctor Sahib."

DAN COFFEE'S appetite did not require the un-Vedantic blessings of his Hindu resident, for if there was anything the pathologist found as exciting as the discovery of a new strain of bacteria, it was a new or rare gastronomic experience. And the surest way of luring Dr. Coffee away from his laboratory at midday, as Max Ritter had learned, was to suggest lunch at Raoul's, a tiny restaurant one flight up, on the wrong side of the tracks in industrial Northbank.

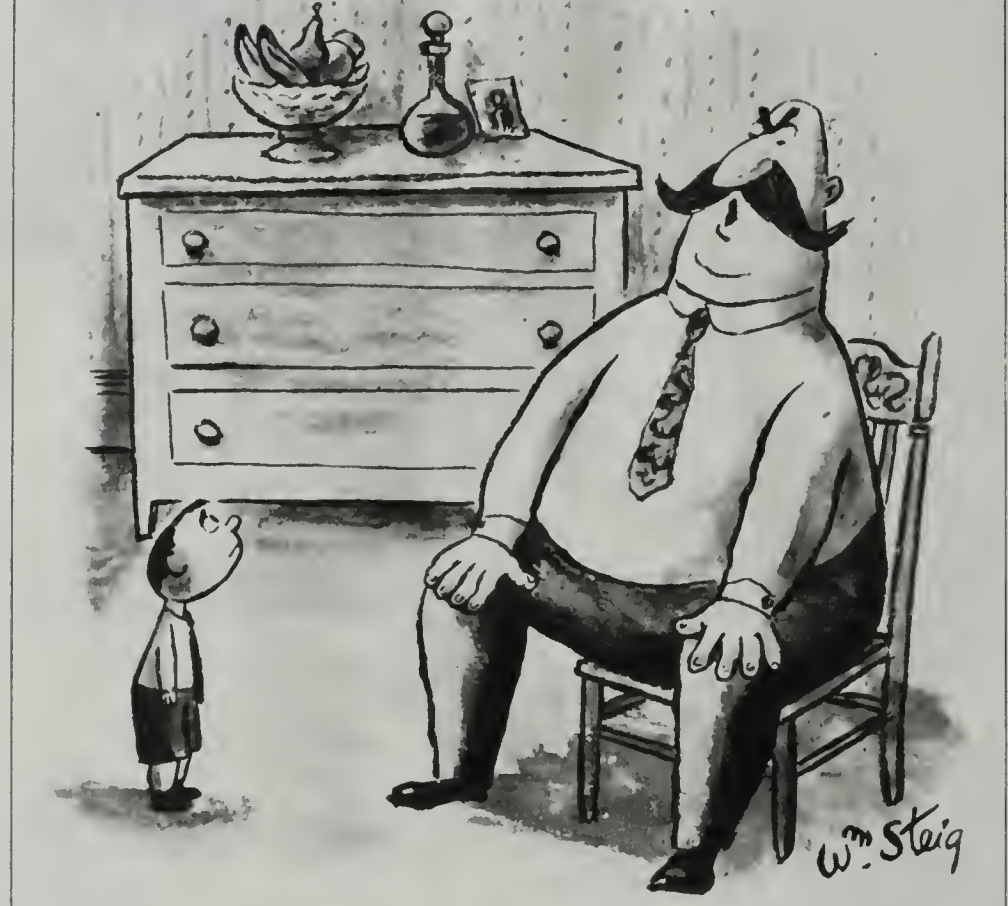
Dr. Coffee arrived at Raoul's promptly at noon, for he knew that on the second Friday of the month the place would be crowded, chiefly with cooks from the near-by food canneries come to eat Raoul's bouillabaisse. As Raoul would rather be found dead than serve a bouillabaisse made with fresh-water fish, the celebrated Marseille specialty graced his menu only on alternate Fridays, when his biweekly shipment of conger eels, sea robins, lobsters, flounders, sea bream, and salt-water mussels arrived by air express from the Atlantic seaboard.

As he climbed the narrow staircase, Dan Coffee sniffed the pleasant aroma of onions and tomatoes and saffron simmering in good olive oil, with overtones of deep-sea fragrance, a grace note of garlic and contrapuntal accents of bay leaves.

When the tall, rangy silhouette of Dr. Coffee emerged from the stairway, Max Ritter was already seated. The detective was dejectedly making patterns with his fork on the wine-stained checkered tablecloth.

"Hi, Doc," Ritter said gloomily. "I ordered some of that boo—some of that fish stew, before it's all gone. Okay?"

"Perfect, Max." Dr. Coffee tucked his napkin into his collar, for eating bouillabaisse at Raoul's was a serious affair, with no holds barred and ground rules undictated by Emily Post.



"I think maybe I got you here under false pretenses, Doc," Ritter said.

"Nonsense, Max. There's bouillabaisse."

"I mean about that Nancy Wynn dame. I thought we had something hot there, but now I dunno. Anyhow, here's the score. Yesterday a private dick who thinks he's tough because he's got red hair and comes from New York brings me a picture of a good-looking tomato he says is on the lam from her lawful-wedded husband. This dick's name is Pete Lovering, and he says Nancy is in Northbank and will I help dig her up because the husband says come home, all is forgiven. So what happens? So we find Nancy in bed at your hospital, but we can't find the private dick."

A cloud of fragrant steam arose from the center of the table as Dan Coffee lifted the lid of an earthenware casserole which had just been put down. He ladled some of the golden liquid into his soup plate. "He'll probably turn up," Dr. Coffee said. "I saw the story in the early editions of the afternoon papers, with a pretty good description of Nancy."

"But why does this dick take a powder on me?" Ritter asked. "I had him tailed when he left the squad room yesterday, because he wouldn't give me an address. It took him just half an hour to shake the tail. Brody followed him to the Union Station and waited for twenty minutes outside the men's room. Brody is very considerate for a cop. When he finally went inside to look, Lovering was gone—down the drain, Brody figured—until he noticed there was another exit through the janitor's room. We haven't seen him since."

COLLIER'S "Who's the boss—you or me?" WILLIAM STEIG

"Are you putting a watch on Nancy?" Dr. Coffee asked.

"What for?" Ritter was attacking a lobster claw. "Far as I know, she hasn't done anything I can hold her for. The way I see it, Nancy just likes it with the guy she ran away with and doesn't want to go home. This strip tease last night was probably just an act to get away from Lovering. Or was it, Doc?"

"It was no act," said Dr. Coffee. "It was hypoglycemia. Insulin shock."

THE detective whistled. "Sounds bad," he said.

"They act like drunks," Dr. Coffee said. "Irrational actions, incoherent speech, temporary blackout, delirium and coma. She probably doesn't even remember running around like a fan dancer without fans."

"Let's forget about her," Ritter said. "Far as I'm concerned, the case is closed. The hell with Lovering."

Dr. Coffee sopped up the last of the saffron-tinted sauce with a piece of French bread. He drained his wine glass and unfastened his napkin. Suddenly he had a recurrence of the same queer uneasiness he had felt when he first saw the tense, fear-haunted face of the unconscious Nancy Wynn. He stared at the worried frown on the detective's forehead.

"Max, you're a liar," he said. "This case has got under your skin. You can't drop it yet, and you know it. Let's have some coffee, and then we'll both go back to the lab."

"I guess you're right, Doc," Ritter admitted.

The centrifuge was whirring as Dr. Coffee and the detective entered the laboratory.

"Well, Dr. Mookerji, how's the patient in ward F?" Dan Coffee asked above the drone of the machine.

The Hindu touched a switch and the spinning coronet of test tubes purred slowly to a stop. "Can report glucose test now quite superfluous," he replied. "Lady patient has departed from this abode of pain."

Dr. Coffee's hand, which was reaching for his white coat, dropped to his side. "Dead?" he asked.

"Quite contrariwise, Doctor Sahib," the Hindu replied. "Copious administrations of dextrose and other carbohydrates by Dr. Green caused speedy recovery. Whereupon lady departed from hospital for home and cozy fireside."

"Hey, wait a minute, swami." Max Ritter grimaced as if he had bitten into something very sour. "You mean Nancy Wynn went home under her own power?"

"Partially," said the Hindu. "Lady's power was partially derived from own quite handsome legs, and partially from strong arm of loving husband."

"Husband?" echoed Ritter.

"You should have had her transferred to a private room with a guard on the door," Dr. Coffee suggested.

"It's no crime in this state for a dame to go home with her own husband—if it was her husband. Did you see them go, swami?"

"Was involuntary witness to entire scene of domestic bliss and happy reunion," Dr. Mookerji said. "When informed by Dr. Green that lady patient was in wakeful condition, had repaired instantly to ward F. Lady was quite jolly and talkative regarding terpsichorean subjects. Upon learning of Bengali origin of self, lady expressed great curiosity concerning nautch dancers and Hindu rigadoons and hornpipes. volunteering simple demonstratio bayadere temple dance when loving band burst upon scene."

"What did he look like, swami?" Ritter asked.

"Greatly regret cannot describe c tenance or other anatomical featu the Hindu replied. "As result of m Bengali upbringing, am moved to b ing confusion by public osculation similar Occidental phenomena ol travagant affection. Therefore av eyes during mutual kissings and t twining of arms."

"Don't tell me that Nancy went in that pearl necklace and Cellop slip she arrived in," Max Ritter said

"Thoughtful husband provided bu of female clothings and lady pa garbed self in same prior to happy

said. "Taylor. I'll be waiting at the main entrance."

"You'll want to report this matter to the police," Dr. Coffee said. "Lieutenant Ritter will be here any minute."

"I don't need the police. This is a personal matter." The young man paused at the door. "And I'll handle it personally." The door closed after him.

Dr. Coffee immediately called the office of the hospital. "Is Dr. Mookerji there? Then flash his number on the call board. He's to come to the lab at once —with Lieutenant Ritter."

The instrument had scarcely dropped into its cradle when the bell rang. "Laboratory," said Dr. Coffee—and felt his scalp tingle. The receiver vibrated with a shrill, feminine voice, strident with terror.

"Dr. Mookerji? Oh, help me, Doctor," cried the panic-stricken voice.

"Dr. Mookerji just stepped out. This is Dr. Coffee."

"Oh, help me, Doctor! This is—Nancy Wynn." The voice quavered with despair. "He's trying to kill me. I've been shot. Oh!" The voice died in a whimper.

"Hello," said Dr. Coffee. "Hello." But the wire was dead.

Automatically he lighted a cigarette. Then he sprang up and stalked to the window. A taxi was drawing up in front of the main entrance to the hospital. The dapper George Taylor walked down the steps and got in. The taxi drove off. Dan Coffee noted the license number. Then he looked at his watch. It was exactly three o'clock.

The telephone rang again.

"Laboratory," said Dr. Coffee. "No, Lieutenant Ritter isn't here, but I can— Hold on. Here he comes now."

Max Ritter circled Dr. Mookerji's right end to take the phone. He grunted a few times and hung up.

"The boys grabbed Peter Lovering five minutes ago," he said. "He was going into the Whippet Arms Apartments with a suitcase full of woman's clothes. I'd left word I was at the hospital, so the boys are bringing him over. They're on their way now."

"If those clothes were for Nancy Wynn," Dr. Coffee said, "we'll be going right back to Whippet Arms. Nancy's been shot."

"Are you kidding, Doc?"

"Nancy just telephoned. She asked for Dr. Mookerji. She said somebody was trying to kill her. Said she'd been shot. She sounded bad."

"Let's meet the boys out front," Ritter said. "I want the swami to come along to identify Lovering. I think he's the guy who walked Nancy out of here a while ago."

"I forgot to tell you," said Dr. Coffee, "that a rather stunning young man just left here after claiming *he* was Nancy's husband. He said his name was George Taylor and he lives at Taft and Wilson. Here's the number of his taxi."

"Some gals have more husbands," Ritter said.

WHEN the police car drove up to the hospital entrance, Dr. Mookerji pointed to Peter Lovering, seated between two detectives, and exclaimed, "Gentleman with crimson hairs is indeed beloved husband of lady in ward F."

"Husband for today, maybe," Ritter said. "Climb out, boys. Doc Coffee and I are going to ride with the tough guy. You take my car and go to Taft and Wilson to pick up a good-looking young gent who may or may not admit he's George Taylor. What address on Taft Avenue did you get these female duds, Lovering?"

"None of your damned business," Lovering growled.

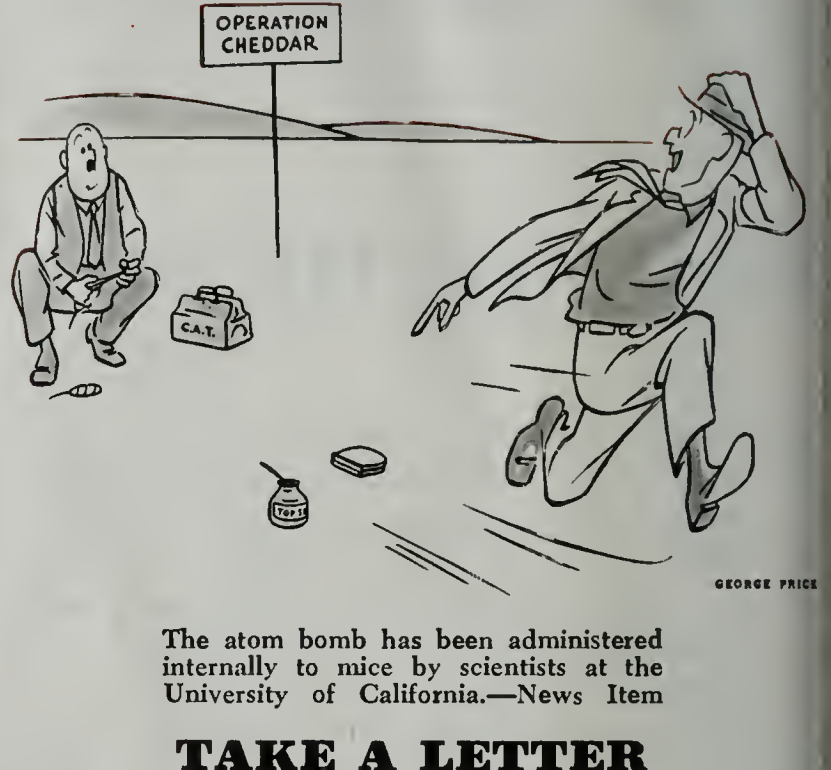
"There's a park on one side of Taft Avenue at Wilson," Ritter said. "And there's a church on one of the other corners. So you won't have any trouble finding Taylor. When you get him, bring him to the Whippet Arms." As Ritter stepped into the car, his hands explored Lovering's armpits. "Where's your gun, Lovering?"

"I don't carry a gun," Lovering said.

"You had one yesterday," Ritter said. "Whippet Arms, Jim. And fast."

"What's the idea of the Whippet Arms, Ritter?" Lovering demanded.

"You got Nancy Wynn hiding there," Ritter said.



"So what? So I found her and the case is closed. Lay off, will you, Ritter?"

"We want to talk to Nancy," said. "We heard she got hurt. We to ask a few questions."

"She's not hurt, and I'll answer questions. Damn it, Ritter, keep this. I'm taking the girl back to York on the five-o'clock plane. chance of salvaging two lives, s you lay off, Ritter, and give the break?"

"Tell me more," said Ritter. "I the red light, Jim. We're in a hurr

The police car leaped ahead, moaning, to squirm through the t

The atom bomb has been administered internally to mice by scientists at the University of California.—News Item

TAKE A LETTER

Dr. C. A. Tobias,
University of California,
Berkeley, Calif.

Dear Sir:

Congratulations! You have not only built a better mousetrap than your neighbor but you have proved conclusively that the next war will be fought not with rocket planes, supersonic bombers and guided missiles but with atomic mice.

I do not presume to stick my nose into your experiments, sir, but it so happens that for the past several months I have been bombarding bits of cheese with slow neutrons. I did this out of sheer boredom rather than with any scientific purpose in mind. However, since reading of your injections of U-235 into mice, my neutronic cheese, which should still be in the icebox if my wife hasn't been nibbling, takes on cataclysmic importance. Indeed, it would not surprise me one whit if your fissionable mouse and my impregnated cracker spread would bring Stalin around to our way of thinking. How's about meeting me in Alamogordo, New Mexico, next Thursday for "Operation Cheddar"? I will be carrying an innocent-looking cheese-on-rye and a jar of mustard marked "Top Secret" in case I'm shadowed by enemy agents. You bring along a couple of your atomic mice wrapped in lead foil, a Geiger counter and some sliced ham. The procedure is obvious: We will place a bit of cheese far out in the desert at the site of the first atomic experiment. You will then release a mouse within sniffing distance. If I am any judge of atomic energy, Mickey's first nibble will be his last. The chain reaction should rattle windows as far away as Houston and make the Bikini blast sound like a busted piece of bubble gum.

If our experiment is one half as successful as it appears on paper, it will be no trick at all for a group of specially trained commandos to infiltrate into Russia and stuff bits of my hopped-up cheese into hundreds of strategic chinks and crannies. At the zero hour you will uncork your nuclear mice and—BOOM! Peace treaties will be signed before the fur has settled over Moscow.

If you think well of my plan please wire your approval before the little woman decides to whip up a soufflé.

Yours truly,
Jack Cluet

gged intersection. Peter Lovering sat ward tensely on the edge of the seat, king straight ahead. His red, square-vn face was hard as he said, "I'll spill confidential details, Ritter, if you e me your word you won't keep ncy off that five-o'clock plane. She's n, so far as Northbank is con-ned."

I won't stop her," said Ritter, "if 's clean—and able to travel."

)VERING spoke in clipped, brittle phrases, impassively, with clinical ctiveness. His metallic voice cut ugh the wail of the siren as he told icy Wynn's story. Nancy was an up-e girl who had come to Broadway years ago and clicked at once as a t-club dancer. She had an Oriental ine—a damned good one—and a fu-

Then she fell for an actor on the same a handsome young impersonator m the night club's press agent called second Julian Eltinge." Unfortu-ly, the actor was a dope addict, and tarted Nancy using the needle. He happened to do a little dope ped-g on the side, and attracted the atten-of a federal narcotics agent. The ral agent set a trap for the actor, but e caught was Nancy Wynn. At least, 's what he thought. He didn't realize he was caught himself—that he'd n in love with Nancy.

The court let Nancy off with a light nce to a state hospital," Lovering "to take the cure. The narcotics t went to see her every day, and n she got out, he married her. I guess rved him right. Any guy who's run the dope squad ought to know bet-han marry a hop-head. He knows nine out of ten never stayed cured. a guy in love is screwy anyhow, and particular guy was so crazy in love Nancy that he was sure she was ber ten and would stay off the junk er. She stayed off for exactly four ths. Then she ran away from home." With the second Julian Eltinge?" r asked.

ight," said Lovering. "The actor er right back on the main line, and ran away with him. The federal took it pretty hard. He turned in adge, of course. He concentrated forgetting about Nancy. He kept from everything that reminded him s wife—and of narcotics. Then a days ago the husband gets a letter Nancy—she's sorry, she's in North-, and she's in a jam. Will he please and get her out. And that's where e in. I had to be cagey with you, r, on account of the husband. I had e what kind of a jam she was in, When I located her in the hospital, ght some clothes and brought her e Whippet Arms. Then I went to Avenue to get her things. She was l to go back there."

hat was she afraid of?" Ritter

e won't tell me till we get out of She's still afraid."

very sad story," said Ritter. "Is it

tter, I ought to bust your teeth in." aybe you made up the sob story," said, "because you shot Nancy for reason or other, and that's why on't pack a gun today."

left my gun with Nancy when I for her clothes. I told you she was

w did you get in and out of Whip-ms the first time without the boys you?"

ur boys never think about back " Lovering said.

t's try the front door this time," said. "Here we are."

police car squatted low on its s as the driver braked to a sudden A plain-clothes man sauntered the steps of the Whippet Arms.

"Brody," Ritter asked, "did you hear any gunfire during the last half hour?"

"I wouldn't know," Brody replied. "With all those busses burping in and out o' that bus station across the street, anything but a howitzer or a block buster would sound like backfire to me."

"I guess you got the key to Nancy's apartment, Lovering," Ritter said. "Let's go up."

Dr. Coffee climbed two flights of stairs behind Ritter and Lovering, with Dr. Mookerji panting along six lengths to the rear. Ritter took the key from Lovering and turned it in the lock. The door opened directly on a small living room. There was a gray rug on the floor. A peculiar gourd-shaped design in deep red glistened at one end of the rug. At the small end of the crimson pattern Nancy Wynn lay on her face.

Dr. Coffee stepped over the .45 automatic lying on the rug near the telephone stand. He bent over the pitiful bundle that had been Nancy Wynn. He listened for a heartbeat, although one glance at the ugly wound in the nape of her neck told him that there would be none. He examined the wound at length.

"All I can say, Max," he declared at last, "is that she probably died within the hour."

Max Ritter made no comment. He was watching Lovering. The redheaded private detective stood against the wall. He was not merely leaning. His shoulders were thrust back, his hands pressed tightly against the plaster as if he were clinging to the wall for support. His normally red face was ashen. He didn't look at Nancy. He stared at the gun on the rug.

"That your automatic, Lovering?" Ritter asked.

Lovering nodded. He managed a sneer. "I suppose you'll find my prints on it."

"Nuts!" Ritter said. "I never saw anybody yet who could develop prints off corrugated metal—not even a private dick."

BEFORE Lovering could comment, there was a noisy interruption from the hall. A plain-clothes man entered the room, dragging the protesting George Taylor, who was sharing a pair of handcuffs. The handsome young man's hair was mussed, and his faultless attire was no longer faultless.

"We had a little trouble," said the plain-clothes man. "He didn't want to come."

"Take this thing off of me!" the handsome young man shouted. "Take—" Then he saw Lovering, and screamed, "Kidnaper!" When he saw Nancy Wynn's body he went on screaming, but the words were unintelligible.

"Shut up!" Ritter ordered. "Know this guy, Lovering?"

"Yes. That's George Tacoma."

"Tacoma?" Ritter frowned, trying to remember something.

"My name's Taylor." The young man had stopped screaming.

"Is this the second Julian Eltinge?" Dr. Coffee asked.

Lovering clenched his fists. "The ham," he said, "the wife stealer and the dope peddler."

Dr. Coffee had moved close to Taylor-Tacoma. His fingers encircled the young man's wrists, pushed back his sleeves from his forearms. Then he raised his hands to touch the young man's face, as though testing the texture of the skin.

"Keep your hands off me!" Tacoma shouted. And Dr. Coffee looked at his gums.

"Close your eyes," said Dr. Coffee quietly. He placed his thumbs against Tacoma's eyelids, pressed gently. "Soft eyeballs," he said, half to himself. "How long have you been a diabetic, Mr. Tacoma?"

"How can you talk medical nonsense,"

Remember when even the best cooks had failures?

But today EVERYTHING'S UNDER CONTROL

No more ruined roasts or muffed muffins—with a "Robertshaw" oven heat control to eliminate guesswork, and a "Grayson" time control to turn the oven on and off automatically. A "Robertshaw" or "Grayson" control on your kitchen range, automatic water heater, space heater, or laundry machine assures utmost convenience, economy and dependability of operation. Look for the name "Robertshaw" or "Grayson", just as industry looks for "Fulton Sylphon" as a mark of quality in industrial controls for temperature and pressure. All are trademarks of Robertshaw-Fulton Controls Company.

EVERYTHING'S UNDER CONTROL when automatic gas or electric water heaters are equipped with "Robertshaw" or "Grayson" automatic controls. Look for them on the heater you buy. They assure abundant hot water, utmost economy of heater operation.

EVERYTHING'S UNDER CONTROL when the heating, ventilating and air conditioning system is equipped with "Robertshaw" or "Fulton Sylphon" automatic controls. No overheating... no overcooling...no waste...no bother. Look for them.

In home and industry,

EVERYTHING'S UNDER CONTROL

Tacoma protested, "when my wife's been killed? How—"

"Your wife!" Lovering broke in bitterly.

"Max," said Dr. Coffee, "you'd better arrest Mr. Tacoma for the murder of Nancy Wynn."

"You're all crazy!" Tacoma objected. "I haven't seen Nancy since I went to Chicago last night. You can check with the air line. You can check with my hotel in Chicago—"

"I'm sure we'd find you were in Chicago," Dr. Coffee continued. "But I'm just as sure that before you left her last night, you filled Nancy's hypodermic with insulin, instead of her usual evening shot of morphine—and I'll undertake to prove that you use insulin, Tacoma. You expected to find Nancy dead of insulin shock when you got back today. When the newspapers told you what had actually happened, you started for the hospital to take further measures. Did you see Nancy and Lovering come out together, Tacoma?"

"But I haven't seen Nancy, I tell you!"

"Let's say you followed them to the Whippet Arms," Dr. Coffee went on. "You waited until Lovering left Nancy alone. Since your rent on this apartment is paid up, you must still have the key. So you let yourself in and shot Nancy with the gun that Lovering conveniently left behind."

"But you're mad!" Tacoma protested. "I went right to the hospital. I was in your laboratory, Doctor—talking to you. I didn't leave the hospital until three o'clock. The cab driver will tell you that. That's the truth. That's the naked truth."

"The half-naked truth, at most," said Dr. Coffee, "veiled with lies. After Tacoma left my lab, and before he got into his cab, he had time to call me from one of the phone booths in the hospital lobby. He's the second Julian Eltinge, you know. And it shouldn't be difficult for a brilliant female impersonator to imitate Nancy's voice."

"Are you guessing, Doc?" Ritter asked.

"No, Max, that's not a guess," said Dan Coffee quietly. "When Tacoma came to my lab Nancy was already dead. He came because he thought he was building a perfect alibi for himself. He didn't know he had already destroyed that alibi with a single shot. It was physically impossible for Nancy to have telephoned the hospital. Even if she had lived for a minute or two after being shot through the neck—which I doubt—she could not have dialed a number or even lifted the phone from its cradle. [illegible] shot destroyed at least one of her c[illegible] cal vertebrae—after which she could[illegible] have moved her hands or lifted [illegible] arms."

Max Ritter nodded, and the str[illegible]gling, yelling Tacoma was dragged f[illegible] the apartment.

Lovering walked across the roo[illegible] the body of Nancy Wynn. He m[illegible] slowly, as if in a trance. There was n[illegible] ing hard-boiled about him now. [illegible] shoulders sagged. Something b[illegible] glistened on his lower eyelids. He lo[illegible] down at the body.

RITTER ambled over to Lovering a[illegible] awkwardly put one hand on [illegible] shoulder. There was an unfam[illegible] note of compassion in his voice a[illegible] said, "So you turned in your fe[illegible] badge."

Lovering said, "Why the hell di[illegible] have to kill her?"

"When did Nancy leave you, P[illegible] Ritter asked. "On the twenty-firs[illegible] last month?"

"She left several days before, but[illegible] wrote me a farewell note dated [illegible] twenty-first," Lovering said listl[illegible] Then he looked up, startled. "How[illegible] you know?"

"If you hadn't worked so hard at [illegible] getting," Ritter said. "If you hadn't [illegible] such a good job steering clear of [illegible] thing to do with the racket and you[illegible] beat, you might have heard that a [illegible] cotics agent was shot in New Yor[illegible] the twenty-first, and that a hop[illegible] named George Tacoma was suspecte[illegible] happen to know, because we got [illegible] New York circular here about two w[illegible] ago. A very cold-blooded job. I[illegible] pened right out on the street. No[illegible] there were just one witness to that [illegible] York shooting and if the one wi[illegible] kicks over the traces and tries to [illegible] away, don't you think Tacoma n[illegible] have killed her?"

Lovering fumbled for his hand[illegible] chief. "I guess I got something in [illegible] eye," he said.

Dr. Coffee nudged Dr. Mookerji [illegible] indicated the door.

"We haven't finished today's s[illegible] cals, Doctor." Dan Coffee said. "[illegible] to the lab."

"With utmost pleasure and r[illegible] Doctor Sahib," the Hindu said. "[illegible] finding self somewhat embarrasse[illegible] discovery that hardened minions of [illegible] and order possess tenderized hearts [illegible] functioning lachrymal ducts."

THE END

"What do you mean—'Where are we going on our vacation?' We'll be lucky if we can stay right here"

COLLIER'S

WHAT EVERY NEW DRAFTEE SHOULD KNOW

Continued from page 13

Every man in the Army," says De-e, "shares the basic human needs: He ds self-respect, he needs the respect of ers, he needs a chance to get ahead, he needs warmth and affection."

One brass hat, still living in the days Prussian glory, exposed himself to the evangelism and said to Johnnie De-, "There's only one trouble with your plan. These men won't fight!"

eneral Devine's eyes sharpened. at just proves to me that you've never in a battle," he replied icily.

ater he said to me, "I've seen a lot of fight and a lot run away. I think learned what really makes men fight. the self-respect and the individual gth you build into them."

rmy life for the postwar soldier will n at one of the 250 main recruiting ons now operated by the Army (plus 75 more being activated for the). These correspond to the induc-centers of World War II and they he draftee's first stop after receiving Greetings. The Army will look over body and mind and then send him e. If he is okay, he'll be called up raining, usually within two weeks.

THE HITCH

ere's nothing like a friend in need
And I have many such.
e only drawback is, indeed,
They seem to need so much.

hat New Recruits Can Expect

Fort Dix, New Jersey, I went h the draft-geared reception rig-with a dozen new recruits for a w of what the draftee can expect. Sergeant Henry C. Reichle, the interviewer, checked each man's , assigned him to a company in ining division, and, since the lads rived by evening, promptly dis-d them to their first Army meal. down in the "processing mess" ese boys from Baltimore and Bos-a meal of pork chops, boiled pota-ring beans, corn, celery, oranges, latin, bread and butter and coffee. the meal we went to "prepack where the new men were given ls to tide them over until cloth-e the next day.

was also handed a manual called life. On one of the opening pages d read, "This Army has a great for your mind . . . You, too, must your own mind. Don't sit back p thinking simply because you e food and a place to sleep. Ask ns . . ."

uld also notice on the bulletin a nt sheet headed: "Opportunity nt complaints and grievances." received a mimeographed greet-ing from Lieutenant Colonel Charles F. Army, head of the receiving division, in which his scanning eye could find such lines as:

"The Army belongs to you and 140,000,000 other Americans . . . We must prevent future wars, and guarantee peace for ourselves by assuring peace in the rest of the world . . . We convinced the world of our power in the fighting war. Will we prove our points in the 'war of ideas'?"

And so to barracks for the night. Next morning the four-day "processing cycle" began.

Recruits Treated with More Respect

It began at 0800 (8 A.M., Army style) with "reception orientation." The lads, still in civvies, sat in a lounge draped with the flags of the United Nations and heard Fort Dix officers brief them on life in the Army. To those who had visions of Hard-boiled Smiths barking, "Okay, punks, yer in the Army now," it must have come as a surprise to hear the first speaker say, "Good morning, gentlemen," and then go on as if he were talking to the American Association of Bank Presidents.

At 1:00 P.M. the new men were given a physical looking over, followed by a clothing issue. Each received, compliments of Uncle Sam, raiment worth $134.03 at PX prices (probably amounting to over $200 at your favorite store). This included three pairs of shoes, an overcoat, three jackets, three pairs of trousers, four shirts, seven pairs of socks, five sets of underwear, a sweater, gloves, galoshes, neckties, caps, and a proud batch of insignia, including the cookie-shaped Ninth Infantry Division shoulder patch.

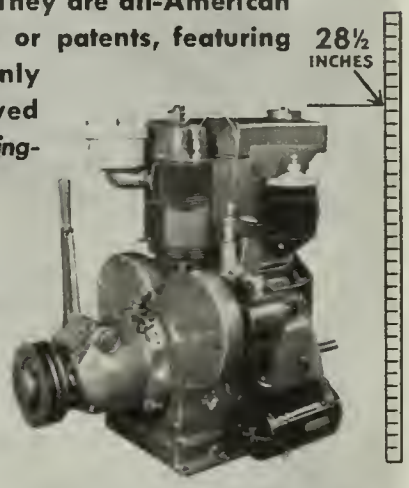
At 5:00 P.M. the new men received a $5 advance on their first month's pay. This would keep them in haircuts, laundry and cigarettes, until their first payday (last day of the calendar month). Pay is $75 a month, 50 per cent more than the G.I.s of World War II received and 150 per cent more than the doughboys of World War I.

Finally, at 6:30 P.M. the men labeled all their clothing and equipment, and their first full day in the Army was over. For the remaining three days of their processing they would receive classification tests, aptitude and specialty tests, officer candidate tests, inoculations, blood typing, X rays, information on soldier insurance, bonds and allotments, and finally a personal interview.

Then—basic training.

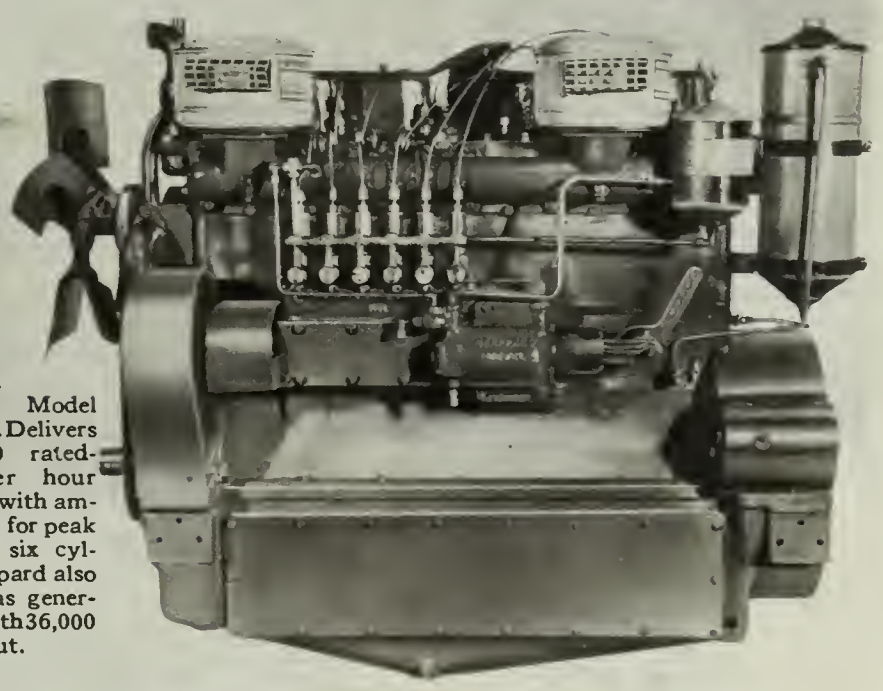
This *bête noir* of Army life has been considerably changed from what the World War II soldier knew. To accommodate the draft traffic it has been reduced temporarily from 13 weeks to eight. Much of the blood and thunder, like the famous "infiltration course" in which soldiers slithered forward on their bellies while live machine-gun fire whizzed over their heads, has been eliminated. So have the courses in dirty fighting, judo, bayonet jabbing, and groin kicking which were deemed necessary during the savage press of war.

Most veterans will remember a bitter pill of their basic training days known as the "obstacle course," in which they had to climb perpendicular walls, scramble over log barricades, leap from stump to stump, shinny up poles, slide down ropes, crawl through pipes, slither under barbed wire, and engage in a number of other less-than-intriguing activities.



I saw trainees doing the same things at Fort Dix. But there was a big differ-

Find Out How



Sheppard DIESELS

Solve YOUR Power Problems

Now Sheppard brings low-cost Diesel performance within the reach of all small engine users. Power-packed Sheppard Diesels are built to do as much or more than gasoline engines, better and longer at one-fourth the fuel cost. They are all-American Diesels, built without any foreign parts or patents, featuring Sheppard's unique fuel injector with only one moving part. They have proved their merit as *power units*, as *generating-sets*, as *marine engines*.

AMAZING SMALL AIR-COOLED DIESEL (Sheppard Model 14, at right). At last—5.4 horsepower of dependable, economical Diesel power for light moving equipment, stationary machines, and as a generating set of 2000 watts. Low maintenance, small operating cost. Standard Sheppard features including push-button starting, one moving part in injector; delivered complete.

POWERFUL SHEPPARD Model 12E Diesel. Delivers 61 to 100 rated-horsepower hour after hour, with ample reserve for peak loads. This six cylinder Sheppard also available as generating set with 36,000 watt output.

Check These Sheppard Advantages Against Your Present Power

Fuel Economy: Sheppard Diesels cost only ¼ as much to operate as gasoline engines of the same H. P.

Diesel Dependability, Long Life: Tests have proved 2 to 3 times longer operation without breakdowns or overhauls when compared to other type engines.

Easy Maintenance: All Sheppard Diesels have fuel injector with only *one* moving part; no carburetor; no ignition system. All Sheppard Diesels easily serviced by any average mechanic.

Simple Operation: Electrical push-button starter. No operating adjustments. To start—set throttle, press button. To stop—close throttle. Runs itself.

Delivered Complete: Available in 1, 2, 3 and 6 cylinder models. Ready to produce power. No extras to buy. All accessories standard; electric starting; power take-off with clutch, instrument panel, filters, etc.

Mail **FREE BOOKLET COUPON** *Today*

DEALERS:
Complete your line of engines and equipment with Sheppard—the *small* engine that opens a great new market for Diesels! A few dealer territories still open. Send coupon for Sheppard Diesel franchise plan. No obligation. Mail coupon today!

ence. The course wasn't called an "obstacle course." It was a "confidence course." The trainee wasn't forced to take any of the hurdles he didn't want to. It was left entirely up to him. If he had the "confidence" he did it. If not, he could walk around it. Result: Every trainee took every hurdle, and took great pride in so doing.

"The Army's getting smart in its old age," a battalion commander remarked. "These kids get a kick out of the course now. Man, how they used to cuss it in the old days!"

The Basic Training Period

During his eight weeks' basic training, the draftee will work a closely packed 44-hour, five-and-one-half-day week. All told, he'll get, among other things, 24 hours of drill; 16 hours of inspections; 30 hours of clothing, equipment and quarters maintenance; eight hours of map reading; 20 hours of marches, bivouacs and tent pitching; 12 hours of first aid, and mental and physical hygiene; 30 hours of physical training; 30 hours of tactical training (combat formations, camouflage, fortifications, scouting, etc.), and 84 hours of weapons training.

Unlike the basic training of the war draftees, he will not have any truck with grenades, mines, bazookas and other dangerous weapons during the eight weeks. He will fire only the M-1 (Garand) rifle and the carbine. Other pyrotechnics he will know only by witnessing demonstrations—at least until he completes basic and gets his unit assignment.

While the new man is in his fifth or sixth week of basic, the classification board at the training center will decide whether to ship him to an Army unit after his eighth week, or to hang onto him a bit longer for specialist training or for the Army's new pride and joy, the "leadership course."

Just as old-line militarism stressed *followers,* so the new evangelism stresses *leaders.*

The leadership training course is under Brigadier General Wayne C. Smith (who demonstrated his own leadership quotient by rising from buck private to general). Part of it is the working out of 20 problem situations drawn up especially for trainees by a team of nationally known psychologists. For example:

Here's a new-fangled tent you've never seen before. Pitch it, while a rating officer checks how efficiently and intelligently you go about it.

You're in a reconnaissance patrol. What's that in the path? An enemy dispatch case! Hurrah—you'll pick it up, rush back to headquarters and they'll make you a general. Boom! Sorry, fella, that had a booby trap connected to it. You should have thought of that.

Men chosen for the leadership course get kid-glove treatment. They eat in a special "leaders' mess" with handsome drapes on the windows and flowers on the tables. They have a day-room as elegant as any officers' club. Many of them will go direct to Officer Candidate School and come out with bars on their shoulders.

"The leadership idea," says General Smith, "is the Army's answer to the caste system."

After his eight weeks' basic training (plus six weeks more if he's sent to the leadership course, or eight weeks more if he gets specialist training) the draftee will eventually find himself assigned to an Army unit. Maybe it will be in the U.S.; maybe overseas.

The best Army estimates, at this writing, are that approximately one third of the draftees will be assigned to occupation forces in Germany and Japan. Two thirds will stay in this country. However, the situation being as explosive as it is, none of the big brass wants to make a commitment just now.

Can the draftee choose his theater?

No. Draftees come into the Army with no strings attached. Unlike volunteers they cannot choose a unit on the Rhine River, Osaka Bay, or familiar old Lake Michigan. They go where the Army needs them.

If the draftee is assigned overseas, how long will he stay?

Probably the whole time. The Army has found it wastes dollars to ship a man overseas for less than a year or two. Right now 12 months is the minimum for overseas service. If a draftee is assigned as an occupation replacement he will probably stay in foreign parts until his 21-month hitch is up. If he's sent to a unit in this country, the chances are he will be a home soldier throughout.

But when can the draftee get home to see his folks and his girl friend?

He can't get home at all during his first month in the Army. No passes will be permitted. After four weeks he can get the usual week-end passes and go home if home is close enough. If he is assigned overseas he will get a pre-embarkation leave (one week plus travel time). He can go home in the full blaze of olive drab, plus insignia, or he can slip into his civvies if he wishes. Unlike the wartime soldier, he can doff the Army garb when off post and off duty.

Every man is entitled to 30 days furlough time per year. If he wishes (and his C.O. doesn't object), he may accumulate the 53 days due him for his 21-month hitch and take them all at the tail end, reducing his draft service to about 19 months.

What if the man is critically needed at home—death, illness, or emergency in the family?

He can request an emergency furlough. The Red Cross checks all these requests. The way to get your lad home fastest is to go directly to your local Red Cross chapter, tell them the story and let them carry the ball from there.

Relieving Mother's Fears

The American mother, staunch soul that she is, has two big worries when her boy goes into the Army: 1. Will he get enough to eat? 2. Will he come back a "good boy"?

Right now the Army feed bag totals nearly 4,000 calories per day. This is at least two-and-a-half times as much as a man needs to live, and 33 per cent more than the average U.S. civilian consumption.

Yes, drafted Donald is going to get enough to eat. But is he going to come home a "good boy"?

The new evangelism has a good deal to say about V.D. It regards the World War II policy as a miserable failure, turns thumbs down on the idea of handing men cures and preventatives. With greater wisdom, the Army's new idea is right to the basic problem of sex its seeks to build up the soldier's u standing of sex and human relatio put sex in its proper setting, to int it with love, marriage and family l

I sat in a small Army theate viewed the new V.D. film which dr will see: The Miracle of Livin theme was home and family, but it its punches with a wallop. Typical new evangelism, it turned away the negative arguments—warnin dire results—and held out the p goals of marriage and good home ing. It showed how incongruous tion is when a man thinks of the g in love with.

During basic training the draft attend four V.D. lectures, with the ico and the chaplain sharing the ro He will, of course, learn the ABC's cial disease, but particularly he w adult concepts of what sex is all abo

ed upstairs: "Dell, we got company." n Jasper, even the residents get con- ed sometimes and call it "Brewster k." It was Major Fred Brewster, a duate engineer, veteran of World r I, and dreamer of the Brewster n, who picked the site of the lodge on Beauvert and contracted to build st of the "cabins" and turn a moun- forest into the 18-hole golf course gned by golf architect Stanley mpson.

ow the only Brewster left in Jasper, d has kept only the enterprises that ble him to spend a lot of time with horses and get out on the trail.

New Pinnacles to Conquer

ecause it was completely forsaken ween the end of the fur brigades and coming of the railroad, a large part asper hasn't yet been thoroughly ex- ed. Canada's Alpine Club and its t climbers have conquered the most cult peaks, but if you want to make way up where no mortal has ever oot, the guides can still help you se- just the pinnacle to suit your pocket- .

e mountains require a special breed orse as well as man. In Jasper, Fred ster, Red Creighton and others are g to bring back a reasonable fac- e of the "cayuse."

e original cayuse was a wiry, short- ed, long-haired critter which car- pack or rider up to 50 to 60 miles a ver broken terrain. It required no ng, and thrived in desert country. ually, plow horses brought in by settlers diluted the strain.

out the closest you'll come to it he little horses you'll ride through nountains in Jasper. Every one of 250 cayuses Fred Brewster turned in Brulé Valley last fall survived old and snow of the subarctic win- ithout any special feeding.

ong with the mountains, Jasperites ally include Dr. Thomas Riley gan among the park's natural won- The town physician for 25 years, as never asked whether a patient pay, never sent a bill, and never to answer a call for help, even it involved a nighttime ascent of nountain trails. On his seventieth lay—he is now nearing eighty—the town "put on a do," as they say rties up here, and presented him $1,000 gift and the request that w it in on his first vacation. Dr. gan went to New York and spent hole month there attending gradu- minars at the Columbia University al School.

en Paramount filmed the outdoor for The Emperor Waltz at Jasper two summers ago, Bing Crosby spent most of his spare time on the golf course. Last summer he came back to compete in the annual Totem Pole tournament—and won it! The whole town has a crush on Bing and everywhere you go you'll find his autographed pictures hanging beside those of the king and queen, who spent a couple of days here during their tour.

While he was Prince of Wales, the present Duke of Windsor stopped off here several times on his Canadian tours. One of the local golfers who played several rounds with him noticed that the prince spoiled most of his drives by holding his head high and arching his back. "Keep your eye on the ball," he finally burst out, "and tuck in your belly." The prince wheeled about in astonishment, and for a moment it looked like the end of a beautiful golf friendship.

Then he grinned. "You know," he said, "that's the first time anybody ever told me I had a belly."

Many of the lodge's guests come back summer after summer and consider the place their own. Jasper looks out for them. Among these are the two elderly spinster twin sisters from Boston who are affectionately known to everybody in Jasper as "Haig & Haig." No guest in the lodge ever sits at their dining-room table by mistake. Their chairs are marked with pink ribbons, tied in identical bows.

There are two dozen good trout lakes and streams within walking distance of Jasper, and hundreds of glacier-fed lakes and streams within reach by car and on horseback.

The best angler in the Jasper sector is the American dipper, a saucy gray bird about the size of a robin known locally as the "water ouzel." You'll find him around any of the mountain streams and it's hard to believe your eyes the first time you see him walk down the shore of a mountain torrent, wade into the rushing water, and calmly keep on going till he disappears under the surface. The ouzels build their nests behind waterfalls and fly in and out of a solid wall of water with the greatest of nonchalance.

Jasper Park is an animal republic in which deer, elk, mountain sheep and bear enjoy liberty, equality and fraternity with the human population. In town it is not at all unusual to see a group of deer mincing down the main street, pausing to window-shop along the way.

Till recently the town favorite was Old Tubby, a fat buck which had his regular rounds and always knocked politely at the back door for handouts. Playing with children he let them hang on his horns and climb on his back, and come Christmas he trotted around gaily with jinglebells and colored paper streamers on his antlers. Tubby's end came last fall on the cinder lot in back of the roundhouse where he fought for six hours running with a strange young buck. Half dead, Tubby retreated to a near-by back yard. But next day he staggered back to make his last stand. This time his rival finished him off with one swipe of his antlers.

Now and then a brown bear wanders into town to have a look around. Generally, however, the bears stick to the lodge or the bungalow camps outside of town. They've been great golf enthusiasts ever since Field Marshal Earl Haig opened the course in 1925, and on the fourth hole a big brown bear chased Haig's ball and batted it down the fairway with his paw. Today some of the big fellows like to sit on the benches and watch you tee off.

If you take a trail trip, one of the most curious animals you'll see—and certainly the laziest—is the whistling marmot. Up around 6,000 feet they sit on a sunny rock like fairy-tale dwarfs, turning their heads to follow each member of your pack train as you pass, and whistling in mild astonishment. They look as if they'd just got up from a long sleep and could hardly pull their eyes open—and this is just about the fact. They sleep seven months of the year and at least 12 hours out of the 24 during the five months they're out of their winter burrow. Their footprints in sand or mud bear a weird resemblance to those of a small child.

On moonlight nights you can walk through the woods and watch the flying squirrels—whole families of them swooping merrily from branch to branch.

Watch the Beavers at Work

The beavers—the beaver is Canada's national animal—are numerous around Jasper, too, and tourists like to play sidewalk superintendent to their construction work.

Not long ago Jasper sent a pair of its beavers over to neighboring Prince Albert Park, where engineers had painstakingly built a model beaver dam and lodge. The first thing the beavers did was to tear it down piece by piece and rebuild it properly.

To most Americans, Canada "feels like home," but every now and then, when you are here, you'll pick up a magazine or newspaper warning Dominion readers against "Americanization." The late Stephen Leacock, the Canadian humorist, once called it "the same kind of apprehension as is felt on a respectable farm when the daughter of the family is going out too much with the hired man—you can't tell what might happen."

You'll have a hard time unearthing any such apprehension among western Canadians. On the purely material side, they need American dollars; and last year U.S. visitors to Alberta Province alone left nearly $5,000,000 behind them.

An atomic scientist who vacationed in Jasper last summer came about as close as anybody to summing up the way the Rockies make you feel. He spent most of his time on the trails, pausing often to look up at the peaks, which even in midsummer are full of snow and *noblesse oblige*.

"What do they say to you?" asked a fellow hiker.

"They say," the scientist quoted the mountains, " 'Never mind, little man, we'll let you know when the time comes.' "

THE END

"I thought you'd be hungry after that hard ride" STANLEY BERENSTAIN

ROAD TO THE 19TH HOLE

Continued from page 20

Bob to do a scene, only to learn that the irrepressible pair had departed the set to make some shots of their own on a golf course.

These niblick nitwits have enticed galleries to part with considerable amounts of money for War Bonds, for the discouragement of juvenile delinquency, for the treatment of virtually every disease known to civilized man.

And there was a large crowd of contributions-on-the-hoof milling about us as we stepped out of the car at the Long Beach Recreation Club, with honors in insults approximately even. A mob of girls thrust autograph albums into the stars' faces.

Hope patiently explained that no autographs would be signed before or during the match. "Bad for the golfists," he said, "unless you follow through."

In the locker room sat two gentlemen.

"Shake hands with Willie Hunter and Macdonald Smith," Hope said. "They're 300 apiece."

Hunter, quite a tournament golfer despite the fact that he is well into his fifties, offered us a drink. His cheeks were red and he looked Scotcher than the Scotch. Macdonald Smith was older, quite a gay and dudish gent.

The Gallery Likes to Laugh

We bantered a bit in the locker room as the boys slipped into golf togs and spiked shoes. Then we moved out into a little room where a table was set for a slight repast. Willie Hunter took meat and potatoes, and both boys took pie and ice cream, as the crowd looked on, gaping and smiling. Some hung over a little balcony to listen to the repartee.

"The crowd comes not for golf," Hunter commented, "but for laughs."

"How's Sinatra?" cried a girl leaning over the balcony, aiming her question at Crosby.

"Never mind Sinatra." Hope replied. "What's the matter with Crosby here? He's Sinatra's father in age. You know, the mothers of the girls who squeal for Sinatra squeal for Crosby."

Crosby took refuge in song—Sinatra's hit, All or Nothing at All. The girls in the balcony began to squeal and weave the way the Sinatra-minded do.

A tanned, good-looking young man stepped up—George Lake, the affable pro of the club. He wanted to know if the boys were ready to go. Details of the match were corroborated. It was to be best ball, and Hope and Hunter were to play Crosby and Smith. Hope would have a two handicap, one stroke on each half. While Crosby is considered the better of the two, Hope has played ding-dong golf with him, each alternating in wins. At Lakeside, their home club, Crosby has a three-stroke handicap, has shot a 68. Hope's handicap is four strokes.

"How's about the financial arrangements?" Crosby urged. "Would ten, ten and ten suit you?"

"Yes, except I'd like to see the money," Hope taunted.

"You don't trust me?"

"Well, I don't want to bet," said Hope, "unless you've got it with you. You have such a bad memory."

The bets were satisfactorily arranged. Having a high regard for Crosby's lower handicap, I asked for and was granted a modest interest in his side.

Lunch over, we returned to the locker room, where the players hefted their well-stocked bags. Crosby uses Ken Smith woods, Burke irons. Hope uses Jones irons and Jimmy Thomson woods.

"Also a stomach pump," Bob added, "for use after every shot."

A huge auxiliary police escort shouldered a path through the crowd to the first tee, where a microphone stood. Crosby moved easily to the mike, and the shouting gallery quieted.

"I think I ought to say," Crosby began, "that owing to his advancing years and general preoccupation with the female members of the gallery, Mr. Hope will be allowed a handicap of four."

Hope took the microphone and said, "Pay no attention, folks. Stick around and maybe you'll see something of Crosby's finish. It will be the first time, if you do."

"Listen to him," Crosby cried. "He's nothing but Red Skelton with a stomach."

Hope's rebuttal was to refer to Crosby as "Sinatra with hips."

"Careful girls," Crosby warned. "Stay clear of the woods. Hope makes more shots into them—!"

George Lake announced that the match was on.

Willie Hunter was up. Winner of all sorts of crowns and a big-time money champ, now pro and manager at the Riviera Country Club near Hollywood, Hunter pegged his ball, stepped up to it, and drove off. Sharp and true, the ball was away down the first fairway. The crowd roared its approval.

"And now," said George Lake, "all-time grand old man of golf and holder of many titles—"

Hope leaped forward.

"—Macdonald Smith!" Lake finished.

Hope mugged disappointedly, and the crowd roared.

Someone estimated Smith's drive at 230 yards, down the center. Then it was Crosby to the tee.

"Athlete of the month—" Lake announced, and again Hope rushed to the tee eagerly, only to be displaced by Crosby. Bing addressed his ball, clipped it neatly and sent it booming straight down the fairway, about 220 yards.

"And now," said Lake, "I'd like to introduce that wonderful man—Red Skelton with a belly."

"Never mind that," Hope cautioned. "And please overcome that bad habit of marking my sixes upside down."

He made elaborate preparations, dusting the tee, removing a matchstick, warning folks back. Then he settled down seriously to make his shot. He hit the ball a terrific wallop and it exploded. Someone had slipped him a trick ball. Who knows? The switch might have been made by Hope himself.

I fully expected all these monkeyshines to throw him off. Golf is a game at which one doesn't horse around. But Hope's drive was far down the middle of the fairway and I was to learn that it was no accident.

The crowd milled down the course, trying to climb up the players' legs. I tried to make notes on what I had seen and heard, and found myself being bounced around by determined little girls in sweaters, who were not to be denied their chance to breathe down the boys' necks.

The gallery stood nearly in front of Hope as he prepared to take his second shot.

"Spread your legs slightly," he y
"I'd like to play through."

SPORTING ODDS

On a Louisville golf course Pee Wee Reese once shot a par four on a 355-yard hole and was at no time on the fairway, in the rough or on the green.

His long drive landed in a sand trap, slightly to the left of the fairway and about 100 yards short of the green. His second shot, out of the sand, landed in another trap adjoining the green. His third shot, an explosion out of the sand, carried a bit long and passed completely over the green, landing in still a third sand trap beyond the green. Only a fellow who had lived for three years in Brooklyn, where daffy things happen, could have kept from breaking up his sticks at that point. Pee Wee selected a niblick and blasted the ball out of the sand, up in the air over the bunker at the edge of the green. Without touching the green the ball landed in the cup on the fly, and stayed there as a quick-thinking caddie yanked the pin.

—Alvin A. Brunner, Louisville, Ky.

CARDMASTER COMPANY
4546 RAVENSWOOD, Dept. 38-B, CHICAGO 40, ILL.

Spanish mission clubhouse, Hope smashed straight and far.

"Where are you getting your marijuana these days?" Crosby muttered.

As we approached the ninth green I had a feeling I was licked. Hope lay two, about 200 yards from the green. The crowd made an alley up the slope to the green.

"What is this?" Hope called. "The Burma Road?" Then he waved to the crowd blocking his path. "Let me look at the green, dear people."

The crowd laughed and fell back. Hope hit a long wood, which zinged over the green and into the crowd beyond.

Four thousand galleryites, at $1 a head and fifty cents for kids, ringed the ninth green as Hope lined up his 25-foot putt.

A Bet Is Made

"It is time to put playthings aside and turn commercial," Crosby said. "I shall wager you four to one that you can't sink it."

Hope looked at him in amazement.

"Five to one," Bing continued. "Six to one. Eight to one."

Hope continued to look at him as if he were a Rockefeller offering a workingman a lollipop in lieu of a raise.

"How bad can you need money?" Crosby asked.

"I just want a pile something like yours," Hope said carelessly. To the crowd, he added, "You know, last year, Bing fell off his wallet and broke his leg."

"Ten to one!" Crosby said, turning away with the air of a man making a final offer.

"Now that you're talking, okay," Hope agreed. He measured the putt, squatted, sighted it.

"If he sinks this, I'll be back in the Coconut Grove," Crosby muttered.

As Hope putted, the crowd held its breath. It went straight into the cup. Hope gave a swooning cry, tossed his club aside and fell backward. The putt halved the hole, all players getting par fives. Hope and Hunter led at the turn, two up.

Hope dropped into the clubhouse for coffee. He weighs about 180 pounds, and golf keeps him in fattish fair condition.

"Isn't it wonderful, Ted?" he confided as he strode toward the clubhouse. "No one's ever done this in the movie colony before. Bing and I have been all over the country. The people are nuts about it. It does everybody good, including us. Healthy all around."

He's very friendly and good-natured, this Hope, despite his merry-go-round wit. He works at humor all the time, but rarely repeats himself.

We returned to the 10th tee, and were off again, all four playing with their usual steadiness. Thus far, hardly a poor stroke had been made.

A baby started to cry as Hope swung on his second shot.

"I know just how you feel," Bob sympathized. "That's the way I feel too."

Everybody took a five on this par-four, 422-yard hole. On the 11th, it was par golf all around. But on the 12th, a 162-yard shorty, things happened. Smith was on, but too deep. Hunter almost hit the flag. Crosby was short. He'd taken a lot of club and hit too lightly. Hope's shot was almost to the pin.

"It would have been right in the cup," he apologized, "if I'd hit it right—which I didn't intend to, anyway."

He and Hunter took the hole with snazzy threes, and Crosby and Smith were three down.

Hope drove a long one into the crowd on the 13th, and Crosby sadly said, "He just annihilated Long Beach."

On the green, Hope sank a 15-footer, then swelled up magnificently, threw his club away and strutted like a superman. Crosby had a 25-footer to sink, but was short by six inches. Hunter and Smith had threes, and the hole was halved. The 13th was halved, too.

Crosby was informed that Hope would have another stroke handicap on the fourteenth.

"Aren't you ashamed to take a handicap from an old man like me?" Bing asked plaintively. Crosby drove out of bounds.

"Retake!" Hope yelled to the crowd, waving them back so Crosby could shoot again.

"Hey, Bob!" yelled a crowd comedian as Hope teed up. "Gimme your ball!"

Hope turned to me in mock despair. "Everywhere I go, I have nine or ten straight men," he observed. "A guy can't play golf."

Hope was off well, and when they got to the green he sank his putt. He and Hunter were four up. Crosby conceded, and my five bucks went.

"Don't go, folks!" George Lake megaphoned to the crowd on the fifteenth hole. "Hope begins to tire here."

"You make the jokes and I'll play golf," Hope retorted.

Nobody left, even though the match was over. They wanted laughs, and never mind the golf. Hope drove off, and broke his wooden tee. Someone in the crowd dived for it, but Hope dived faster.

"Have that reshafted," he said to his caddy, Don Boren, crack club golfer who had volunteered to take him around.

Crosby's drive shot straight into a big, spreading eucalyptus.

"Hey!" cried Hope in alarm. "Careful! You'll knock Johnny Weissmuller out of that tree!"

Nothing much happened after that, except that at one point Bing broke into song, to the delight of the gallery.

"Hey, Bing! Don't do that!" Hope warned. "You'll bring on a moose!"

On the eighteenth, Bing and Bob arranged their private bets. Then Bing drove off well.

"Oh, why did I open my big, fat kisser?" Hope wailed. Then he turned to his caddy. "My lumber, please!" The caddy tossed him a tee.

His drive skidded to the left, then cut grass and disappeared.

We battled through the crowd, Hope mourning all the way about the shot. Then, to his amazement, he found it lying well up with the others.

"I've got relatives in this crowd," he said. He swung with an eight iron, and lofted the ball straight over the green. But when we got there, the ball was closest in. The crowd had kicked his ball out.

"Everybody's a comedian here," he said, as he dropped his putt.

All Have Good Scores

We fought our way into the locker room, and as the boys changed, Hunter commented that it was reasonably good golf, but that crowds won't behave.

"When that guy grabbed my club," Hope said, seriously, "I didn't like it too much. It's hard enough to play against the straight men. The Hopes in the crowd are worse."

As we left, the autograph hunters were there, and Bing and Bob signed their way to the car. Then we were rolling on the California cement. We passed a movie house, outside of which a long line stretched.

"Hey, Bing," Bob asked, "how's about they revive Two for Tonight? They might catch the overflow dough."

"Yeah," Crosby agreed. "If they put Some Like It Hot on with it."

I gathered that these represented the two biggest floperoos the boys had made.

Loosening my shoes to allow cool air to get at my suffering feet, I drew out a pencil stub and figured the individual scores as we rode along. Hunter had a neat 73. Both Smith and Crosby scored 75s. Hope, despite his clowning, had taken a 77.

And that's not bad golf!

RYDER OF THE COMIC PAGE

Continued from page 17

An Eastern publisher who knew his ious work—remarkably realistic oil ntings of Indian and cowboy life— t Fred the money to come East, to te and illustrate a book on frontier . He signed him up. The serious book ot yet finished but the publisher has e a good thing out of the Red Ryder l Little Beaver books. Fred's first job to draw a strip called Red Ryder, ch sold immediately to one of the ntry's largest syndicates. This was ate '38. The rest is history.

oday, Fred is one of the fastest artists he business and one of the hardest- king. He has no assistants, which ng strip cartoonists is unusual. He perfectionist and temperamentally pable of working with a helper. An stant might not know the difference ween a California, single or center- rig and that, of course, would be mitous.

red's syndicate takes a rather jaun- d view of his active ranch life. After here is a lot of that long green riding is battered right hand and he is con- tly being thrown, bitten or stomped on. Two years ago he broke his right el- bow, had his arm set in a right-angle cast and, two days later, was back at his draw- ing board.

Whether Red Ryder rates first, second or third among Western cartoon strips is anyone's guess. If Red isn't champ he is certainly a leading contender for the title. He is seen by 45,000,000 people in over 750 daily and Sunday newspapers in this country, Canada, Australia and Central and South America; 65,000,000 people see the eight annual Red Ryder films, each of which is released in more than 8,000 theaters; 12,000,000 Red Ryder comic magazines are sold yearly and 1,000,000 Little Beaver and Red Ryder books cross the counter annually. Mr. Hooper hasn't counted the ears of those who listen to Ryder's drawl on the radio but he figures that a mighty big parcel of people listen in.

It seems reasonably safe to say that Ryder and his little pal command the high esteem of a considerable chunk of people. All in all, Fred Harman's future looks secure.

THE DOW CHEMICAL COMPANY • MIDLAND, MICHIGAN

Collier's believes...

...HERE'S SOMETHING TO THINK ABOUT

THE agreement worked out by the General Motors Corporation and the United Auto Workers Union (C.I.O.) raised some questions that we will be talking about for a long time to come.

The immediate advantage to the company, to the union and to the consuming public is that a strike was avoided. A large strike at this time would have had a very sour effect. It would have been costly to the company, tragic to some of the workers, and a headache to the nation that has quite enough to worry over.

Two ideas which were injected into the agreement will demand continuing attention. Of the 11-cent-an-hour wage increase, three cents represent an "annual improvement factor." The eight cents is a cost-of-living adjustment.

The cost-of-living adjustment is familiar. Many years ago the cost of living was the wage basis advocated by labor. In recent times wages have been fixed by other considerations, chief of which is the scarcity of workers. Sometime, of course, the cost of living will again have to be considered. The price level is the final measure of any wage. So it is good to have the relationship between wages and prices formally recognized.

The "annual improvement factor" is a new and an ambitious consideration. Only a large and thoughtful organization could dare promise to increase efficiency annually so that it could afford to make a wage increase based on improvement of production. Behind that pledge to improve industrial processes and to share the fruit of improvement are research, engineering, advertising and mass production. Invention following scientific experimentation is the way to such a goal.

A large corporation rich in man power can risk such a bet on its future, but too many lesser industrial enterprises lack such aids to improvement. Nevertheless where an enterprise does grow and better its productivity, it is wise to distribute widely these gains.

All in all the wage treaty made by General Motors and the union is an interesting document. A great many people on both sides of the industrial table will be considering its consequences for a long time to come. . . . W. L. C.

●

. . . IN CALLING A SPADE A SPADE: Every once in a while, some entirely well-meaning person suggests in public that we take to calling the American economic system by another name than capitalism or the profit system.

The latest of these as we go to press is Walter Mitchell, Jr., managing director of the Controllers (accountants) Institute of America. Mr. Mitchell sprang his idea at this organization's recent Middle West conference that was held in St. Paul, Minnesota.

He argued, as do all who make similar suggestions, that when we call our setup capitalism or the profit system we "make it easy for Communists and other left-wingers to allege that we are merely trying to safeguard the 'vested interests.'" So Mr. Mitchell thinks we ought to take to calling our financial and social mechanism the "enterprise economy."

We move we just keep on calling it capitalism, with a big C and without apologies.

Capitalism is the correct name for it, for one thing. For another, the Communists are the world's current champions at the art of calling things by their wrong names. The Reds term their own tyranny "democracy," claim that their one-man-rule system expresses the will of "the toiling masses," call Hitler-style elections like the recent thing in Czechoslovakia "free democratic elections," and so on.

Liars eventually defeat themselves. We may sound crazy in saying so at this moment in world history, but we think the Communists will eventually cut their own throats somehow with their distortions and contradictions. Why ape them in that respect?

Capitalism is an honorable word, and the system it describes has made more people happy than any other economic device ever yet evolved. Let's keep the word. Let's make the system better and better.

●

. . . SCIENCE CAN STUB ITS TOE: We take note of police use here and there of allegedly infallible scientific gadgets for registering degrees of drunkenness. You know—the cops pick up some motorist and apply the device to his breath, and if he's found to have such and such a percentage of alcohol under his belt the judge is supposed to fine him or suspend his license for drunken driving.

We don't doubt that these things can measure anybody's alcoholic content accurately. But how can any of them possibly register the way alcohol affects the particular person under inspection?

Mr. A, for example, can take five highballs or three dry Martinis and still be a reasonably safe driver. Mr. B gets too potted on one drink to be trusted at the steering gear of a kiddy car. And there is an occasional Mr. C, who gets blotto squiffed on the first three or four drinks, becomes as steady as a gyroscope on the next few, and then suddenly and quietly falls flat on his face about drink number 10 or 11. So it goes.

We don't think the gadget has been or can be invented that will register these individual alcoholic tolerances and peculiarities. Consequently, police use of such devices seems to us unreliable and unscientific. Science has its limitations, and we believe this is definitely one of them.

All science aside, the best advice under this head is: Don't drive at all when you've been drinking at all.

How big a portion is profit?

You hear a lot of talk these days about how much of the money that industry takes in should be for profit. Many folks have an idea that profits take a pretty big portion of the "bean pot."

The great majority of these same people—when asked what they thought would be a *fair* profit for business to make—said *from 10 to 15 cents out of each dollar of sales.*

But the fact of the matter is: *Government figures show industry averages less than half that much profit!*

4. And remember, about half of what industry does make goes "right back into the pot" to help pay for the development and expansion that bring more products, more jobs, and greater security for all.

5. That's the way the American system works to give more people more good things than are enjoyed anywhere else on earth!

THE WEEK'S MAIL

MARGARET ROSE

DEAR SIRS: Read in Collie Small's wonderful recounting of the charms of Princess Margaret Rose of Britain (The Blooming of Margaret Rose, July 17th) that her father, the king, gets only $1,640,000 a year salary, while Princess Elizabeth, as heir apparent, must struggle along on a mere $160,000. Meanwhile sister Margaret Rose gets not a red sou, and must depend on Dad for handouts. With the cost of living as it is, I am deeply touched and would like to contribute a couple of bucks for tiara polish, and moth flakes for little Margaret's royal ermines. Not much, but it should help.

JIM MCCLEAN, South Norwalk, Conn.

. . . Collie Small's name should be reversed, the dog, for daring to say that Margaret Rose is narrow-shouldered and bandy-legged.

JIM ADAMS, New York, N. Y.

. . . I have a scheme. . . . The royal family sues the United States for Collie Small's statement that Margaret Rose is bandy-legged. With the money, England pays off her debts, becomes solvent and forces the Socialist government out of office. The conservatives and prosperity return, India is recaptured, the Empire is restored, and Collie Small is knighted.

GEORGE HILTEBEITEL, Westport, Conn.

HIGHWAY MURDER

DEAR SIRS: In your editorial of July 17 (These Are the Worst Drivers) you call for nominations for the World's Worst Drivers. I hereby offer The Driver Who Straddles the Center Stripe; The Driver Who Passes on the Right; The Elderly Woman Slow Driver, and The Young Woman Fast Driver. . . .

KIRKLAND FESSENTEN, Cleveland, Ohio.

. . . My nomination is He Who Refuses to Dim at Night, and the Famous Last Worder who says: "I won't dim if I won't!" . . .

PHIL GREGORY, San Francisco, Calif.

. . . The Drunken Driver. . . .

VINCENTE GREEVE, Flushing, N. Y.

Working Out with Bob Feller

"Rapid Robert"—fireballer and strikeout king. As a kid on dad's farm, learned control by pitching into barrel. Bob's ball park workouts under blistering sun are a threat to his hair... so he plays safe with **Vitalis.**

"My hair's got perfect control against scorching sun and showers after the **Vitalis** '60-Second Workout,'" says Bob Feller. Keep **your** hair from a weather-beating this summer. Give it the same smart care that leaders in every league do. Use **Vitalis** regularly.

Product of Bristol-Myers

here's how the

Vitalis

"60-Second Workout"

keeps hair summerproofed and handsome

Massaging **Vitalis'** pure vegetable oil on sun-baked scalp protects hair from harmful, drying effects of sun, wind, water. Routs loose dandruff. Helps check excessive falling hair.

Now hair is no longer dull, brittle, hard to handle. Looks **naturally** well-groomed. No greasy, "patent-leather" shine—**Vitalis** contains no mineral oil. For a complete summer hair-conditioning, use **Vitalis!**

P. S. Your barber is an expert. He knows how to keep your hair looking its best for summer. Ask him about Vitalis and the individual, sanitary Sealtube application. *Vitalis and Sealtube are Bristol-Myers trade marks*

Lester Dent about to wing his way on a short story assignme

AT THE age of eight, Lester Dent spent several frustrated weeks on the banks of the same treacherous river that plays a villain in River Crossing (p. 25). The Dents had been ranching happily north of Gillette, Wyoming, and when a neighbor settled about ten miles away, they decided it was time to move to less overpopulated territory.

Whereupon they and little Lester's assorted uncles climbed into a covered wagon and pushed West. "In a few weeks (I made the same trip recently in about four hours) we came to the Big Powder River and its quicksand," relates Lester. "Various uncles rode in, were lassoed, and hauled out. During the fifth week a wool train arrived—several great wagons drawn by twelve-horse hitches.

"The wool boss knew the way across, he said, and then he lost a wagon and five horses. You really get to know quicksand when you hear the sound a horse makes as he sinks out of sight in the stuff. The heck of it all," Dent mourns, "is I can't remember how we finally crossed."

However, free of quicksands, Dent in time became a telegrapher, pulp writer, and seeker of pirate treasure from a small schooner he owned. Right now he keeps and flies a light plane, has yet to make a forced landing. When he isn't grinding out whodunits, Dent acts as pix-snapper and negative-washer for an aerial photography venture he says started as a hobby and has turned into a small monster.

AL SANTORO, who recounts the fabulous Pot Shots of One Shot Ross (p. 24), became sports editor of the Los Angeles Examiner in a roundabout way. A New York City boy, Al's family early migrated to San Francisco where Al went into the newspaper business. He sold papers on street corners. After graduating from business college, Al set out to make millions as a bookkeeper, but when he gummed up a trial balance, he returned hastily to journalism.

At this distinguished craft he bought ham on ryes (with mustard) for the manager, swept up, and valeted bundles of fresh-laid newspapers into waiting trucks—all for $7.50 a week. But the ambitious Alger hero is not to be denied, and years and years and millions and millions of words later, Al finally wound up in his present position.

ARTHUR MAYSE writes 'em the Hard Way. Last fall, out experimenting for The Logger and the Lady (p. 22), he accepted a ride deadhead in the cab of a truck skinner named Mac, high in the Vancouver Island timberland. "We tilted downhill ir fifty tons of fir, cedar and h Mr. Mayse tells us. "Down miles of looping, twisting spired by a roller coaster, a 2,000 feet to tidewater."

As brakes and transmissio the law of gravity, Mayse discussed runaway trucks, hook up the trailer air-bra the prospect of jumping in trouble (they weren't goo nudged from behind by a foot log, and insurance truckers. "When we finally to the booming grounds a sand thrills and chills later Mr. Mayse, "I asked Mac i get his nerves. 'Some,' he 'after six months or so, you You lie awake thinking of that might happen before those pay checks cashed. hen time you took yourself a le day.'" For said holiday, see

Incidentally, Mr. Mayse i rm girl flunkies, camp tennis c rt other softening influences h e tamed the West Coast log point that he's willing to b lumberjack.

MR. LOUIS PAUL, who Plenty of Time for Lo has a plaint. Seems he's not Writer. TRAFFIC TRAPS FOR TOURISTS

The American Automobile Association reports soak-the-stranger traffic arrests are flourishing in many sections of the nation. Speed traps, roadside finings and threats of jail are making it tough for the motorist

BY JACK HARRISON POLLACK

THIS year twelve to fifteen million American motorists will be apprehended for traffic violations. Most of these will be bona fide cases of deliberate or careless lawbreaking. But many of the arrests will be unjust.

With a record motoring season in full swing, the American Automobile Association reports that soak-the-stranger methods are flourishing in many sections of the country. They may operate for the tourist who does not hew strictly to the line of local regulations with which he is not familiar. Or, as has been the case in some communities, speed traps, roadside trials, and threats or violence are used.

No responsible citizen can object to honest, impartial traffic enforcement. But it is a national scandal when innocent motorists must worry about being swindled in the name of the law.

Even members of Congress have not been immune from this sort of treatment.

A Southern Representative who was motoring home one week end last fall was arrested for speeding as he drove through a certain township.

The congressman made no effort to use his legislative influence, but paid the $15 and started to leave. On his way out he remarked facetiously, "I think it's a dirty trick to drive a patrol car without identification." The remark was not taken humorously. Before the Representative could identify himself he was thrown into a jail cell. And there he stayed for several hours, even though the Constitution specifically forbids a legislator's detention for anything but treason, felony or breach of the peace when Congress is in session. Local authorities contended that the peace had actually been breached.

Strong-arm tactics are not uncommon. Recently a reputable St. Paul, Minnesota, businessman and his wife were motoring through a Southern township when their car began heating up. To let it cool off, they pulled over to the side. A police car drove up. Troopers began searching the businessman's baggage and found some whisky—illegal in a dry county.

"One cop hit my wife, knocking her against the car door and injuring her back," reports the businessman. "Inside the jail he knocked me down. I was refused permission to telephone a lawyer. They threw us into crowded, dirty cells overnight. There wasn't even a cot in mine. I spent the night on a cement floor. The sheriff came in the morning and let us out. We found the locks of our baggage torn out, all our belongings scattered, and a camera, fountain pen and some money missing."

Many other motorists have complained to the A.A.A. about a noticeable lack of Southern hospitality on the part of authorities enforcing traffic laws on Dixie's highways. An out-of-state doctor was recently bled for $20 in a Southern town. He grudgingly paid the fine and remarked that it was a "damn' outrage." Whereupon he was struck from behind, seized by the belt *(Continued on page 64)*

"Collier's is to be highly congratulated for presenting to the American public Jack Pollack's forthright and comprehensive article on ways and means used by all too many law-enforcement agencies in soaking the motorist—particularly the motorist who is traveling away from his home state.

"The spotlight of public attention thus thrown on the problem should be of immediate benefit. It should also invigorate efforts by all those engaged in the difficult task of redesigning and modernizing antique legal machinery."

—R. J. Schmunk, President,
American Automobile Association

Between the tasks set by her Latin teacher and the traps laid by her younger brother, Jane did not have

PLENTY OF TIME FOR LOVE

BY LOUIS PA

I'D LIKE to, Lucille, but—well, he's inhuman. Eighteen pages of Livy! I mean, after all, the whole thing's unconscionable. It's—"

"If you'd put down that telephone and do it, it wouldn't be so unconscionable," said Aunt Martha. "You don't even know what the word means. I want to talk to your father about having the furnace cleaned."

"G'by, Lucille. G'by, now. Aunt Martha wants to use the phone." Jane hung up regretfully. "Lucille wanted me to play some doubles." She sighed heavily. "I'm the victim of Kismet. The new Ancient Lit is inhuman, so I get him. Mr. Harrington. He's young enough, but he's inhuman. We call him Fisheyes. He keeps staring at you without blinking—honestly, Aunt Martha, it's gruesome."

The phone bell rang again. Jane lifted the receiver with a practiced gesture. "Who? Oh, hel-lo! But *naturally*. But of course! Lucille just called me, but she didn't say who—"

"Hang up that phone," ordered Aunt Martha. "You've been out every afternoon this week. I want you to help me with the curtains when you've finished your schoolwork."

"—but I think I'll have to stay in and grind on the Livy. G'by. G'by, Johnny. G'by. G'by. And thanks frightfully for asking me." Hanging up, she turned to her aunt. "Do you realize who that happened to be? Just Johnny Ballou, that's all. I guess he's the most popular athletic star Stapleton High ever had. He thinks I have possibilities."

Aunt Martha lifted her eyebrows. "I beg your pardon?"

"He thinks I'll make the interscholastic tennis team this year."

"Does Mr. Harrington think you have possibilities?"

"Fisheyes? Huh! All he needs is a toga to make him the noblest Roman of them all. Eighteen pages of Livy, when I could be out playing mixed doubles with Johnny Ballou." Jane shook her head sadly.

Oliver came bouncing in, slamming the front door hard enough to rattle every window in the rambling house. "Hello, everybody!" cried Oliver. "Ain't Aunt Eldreth home from givin' her piano lessons yet? She said she'd bring me some jelly doughnuts. Jever see a ole frog that'd croak when you ast him to?" Extracting a well-grown frog from his back pocket, he held it up in front of Jane's nose. "Croak, Franklyn. Go ahead." Franklyn duly obliged.

"Ugh! Take that thing away from me," said Jane. "Don't you know frogs'll give you warts on your hands?"

"Ha, ha," said Oliver. "I'd rather have warts on my hands than red fingernails. Woops!" Franklyn had popped out of Oliver's palms. He pursued the frog across the living-room rug and into the hallway.

"Aunt Martha, you ought to do something about Oliver. I mean—"

"Never you mind about Oliver. Get up and finish your Cicero—"

"Livy."

"Whatever it is. The parlor curtains are all washed, and I want you to help me get them on the stretchers in the basement. If Eldreth comes home early, I'll ask her to go over the Livy with you. Why your father continues to live in this drafty barrack of a house I'm sure I don't know. What did I come in here for?"

"You said you wanted to phone Papa about having the furnace cleaned."

"Oh, yes. Every year he waits until the last minute."

Jane gathered up her books and climbed the winding stairs to her bedroom. Reluctantly she opened her Livy to the appropriate place. The words danced in front of her eyes, and she saw a vision of herself winning the interscholastic singles. Johnny Ballou's tall athletic figure came bounding over the court to congratulate her. Later they went strolling in Linden Lane. "But I *am* in love with you, Jane," he said tenderly. "I guess I always have been. When I saw you win the final round of the match against Andrews High, I realized—" Somehow the unblinking stare of Fisheyes came between herself and this fantasy. Jane sighed. Why did she have to have Fisheyes in Ancient Lit? Why was she burdened with an aggravating brother like Oliver?

Since life was just one series of tragedies after another, Jane considered the possibility of sacrificing love for a career. Perhaps she would become a great tragic actress. Standing before the mirror, she tried to think of a speech from some play, but no lines came to her mind. As a consequence she was compelled to improvise.

"Mr. Ballou, our love is doomed," she informed her reflection. "Ah, no— *(Continued on page 30)*

"Mippity, pippity, kibble and coo," came a singsong voice from underneath the bed. "Jane McCrory loves Johnny Ballou." Jane dragged Oliver into the open. "You gruesome creature!"

MYRON EHRENE

Behind Markos, Communist leader of the Greek guerrillas, a rising storm casts its m
acing shadow over one of the mountain valleys whose people cry for bread and pea

INTERNATIONAL

RED CLOUDS OVER OLYMPUS

BY QUENTIN REYNOLDS

Upon the heels of the hated Germans came the Communists to make life miserable for the simple, hard-working Greek peasant. The story of Magoula is the story of 10,000 Greek villages. This is a vivid picture of the struggle going on in one of the most troubled parts of the world

MYRON EHRENBERG

One of the traveling Greek War Relief doctors examines a young villager's foot. Those nasty running sores spell malnutrition—evidence of vitamin deficiency

MYRON EHRENBERG

The threadbare condition of this southern peasant typifies rural Greece today

ATHENS, GREECE

IT IS hardly likely that you've ever heard of the village called Magoula, or of a gray-haired woman with steady, dark blue eyes, med Filia Economou, who has taught in the one-om schoolhouse in Magoula for 29 years. It is ubtful if you've ever heard of Father Constantine kiniotis, the wise old bearded priest of Magoula, of wiry, smiling, thirty-four-year-old Spiros Ni-s, who is the village carpenter.

As a matter of fact, very few people in Greece ve ever heard of Magoula. It is a 200-year-old ricultural village that leans against a rounded, ck-crested hill in southern Greece, and the 650 ople who live there do not consider themselves portant at all. Nor do the mighty government ures in Athens or the heads of the American ssion think the people of Magoula important. ey are all much too busy planning the destruc-n of the guerrilla army of Markos to bother out a small village and its 650 inhabitants. They e busy with the great cosmic problems of the day. I think, however, that Magoula is important, cause Magoula and the 10,000 villages of Greece e Magoula, which contain 70 per cent of the reek population, are costing the American tax-yer hundreds of millions a year right now. That an awful lot of drachmas.

We as a country are pouring that much money to Greece in an effort to keep the country from coming Communist-dominated. We have armed e Greek military forces, sent our crack military aders to Greece to "advise" the Greek army, and ve put a hand-picked government into power in thens.

There are a great many critics of our State Department who do not like this at all, but like it or not, one cannot criticize the State Department of any crime worse than realistic thinking and planning. If the military equipment and leadership which we have given Greece had been withheld, there is little doubt that Markos would be in the driver's seat right now. And the Russians (or reasonable facsimiles thereof) would be sitting snugly in such harbors as Piraeus, Kalamos, Salonika, Kavalla and others too numerous to mention.

From that point it would be only a matter of leisurely reaching out a huge paw and we would find Turkey being "liberated" from the dreadful toils of American imperialism.

This would be very embarrassing to our Western bloc in Europe and to our plans for the economic reconstruction of the Continent.

Broadcasting to the Little People

Let us consider the people of Magoula, for in the long-range picture they are more important than they realize. There are nearly 5,000,000 of them in Greece out of a 7,000,000 population, and it is to them that Markos has been directing three radio broadcasts a day from a high-powered station in Yugoslavia. It is true there are probably not more than 25,000 radio sets in all Greece and not one in Magoula, but the messages of Markos come to Magoula and the other 10,000 villages by word of mouth.

Come with me to Magoula and meet the folks and maybe we can find an answer or two that is impossible to find in Athens. It is a big day in the village. The church in the square, where you are baptized as a baby, where you go as a young man to be married, and from where you are buried, is the Church of the Analipsis. It is a holiday in Magoula.

The family of Spiros Nikas is up very early. Katina Spiros saw to that. Katina is ten, and last Easter her father gave her the first pair of shoes she had ever owned. Today she is allowed to wear them. Her younger brother, five-year-old George, is as excited as Katina and even the four-month-old nameless son gurgles happily.

Suppose we share the family's breakfast. It is the same every day—goat's milk and bread. Spiros Nikas owns a brown and white goat which is tied to a stake behind his house. He also owns five chickens. In normal times Spiros is a fairly substantial citizen. He is the only mason and carpenter in town and there is plenty of work for him. In fact, he usually makes about 150,000 drachmas ($15) a week. But now he has been put in charge of the village guard and every night he and 25 other men guard the roads to Magoula, for even here in southern Greece quick fierce raids by the guerrillas are not unknown.

Spiros receives no pay for his ten hours of guard duty but he does receives 17 oka (an oka equals 2.82 pounds) of flour each month, which is enough to keep the family in bread. He also receives seven pounds of sugar. These come from the Ministry of Supply, and the Ministry of Supply gets the flour and the sugar from the American mission. Spiros has to borrow money from neighbors to buy vegetables and meat but he only buys meat once in 15 days.

"I owe my neighbors a lot of money"—Spiros grins, showing fine white *(Continued on page 71)*

The INSPECTOR Had a Wife

BY CHARLES B. CHILD

Madame Chafik did not have all the facts—but she was a woman, and perhaps she did not need them

CHAFIK J. CHAFIK, of the Baghdad Criminal Investigation Department, sat at the dining-room table in his modest house at the corner of Nathir-al-Ni'am Street and the Karradat Miriam. He was informally clad in a wide-sleeved, ankle-length gown of brown silk, opened at the neck to catch the breezes from the Tigris. The late evening meal had been cleared, and he was engaged in his hobby of detecting philatelic forgeries.

He announced, as he lifted a stamp with a pair of tweezers, "A Bermuda 'Perot.' It would be valued at four hundred dinars if genuine. But it is an excellent copy by a Swiss craftsman, and therefore worthless." The Inspector looked at the dark woman who stood at the window intently watching the moonlit street. "You are not thrilled by this addition to my collection, Leila," he complained.

Madame Chafik said tartly, "When you find a stamp worth four hundred dinars I will be thrilled."

"My hobby is relaxing," her husband defended himself. "It is also more dignified than your pastime of observing our neighbors. You were pleased to see Madame Dejani return by boat a few minutes ago?"

His wife turned quickly. "Now you mock me. How do you know what goes on in a street you cannot see from where you sit?"

The Inspector lighted a cigarette with irritating care. "I observed you look toward the river, where there is a landing for boats. Then you retired behind the curtains, which you would not have done if the person you watched had walked on the other side of the street. Finally you contorted yourself to peer in the direction of our neighbor's front door. You had already informed me that Mr. Dejani had gone away, and that his wife had accompanied him to the train. So it was simplicity itself."

Leila said, "He must have taken the Basra train. It was after six when the taxi came. There was only one suitcase, so I knew she wasn't making the journey with him."

"Your reasoning has merit. But are you sure Madame Dejani has now returned? May I know how you penetrated the shroud of outdoor robe which makes the women of Baghdad resemble animated corpses?"

"The passenger from the boat entered the Dejani home with a key. Who else could it have been if not our neighbor? You are foolish."

"I am still not satisfied." Chafik twinkled with mischief. "The railroad station is on this side of the river, and yet this person came back across the river."

"That is strange," admitted Leila, and brightened with new curiosity. "What has she been doing all this time? It is now nearly nine thirty, and the Basra train left at seven. Where did she go? Who—"

"Give me peace," said Chafik. "Such questions remind me of my unfortunate profession—"

"It puzzles me, too, why a woman of character should be devoted to a man who neglects her for an English adventuress—"

"Wife, wife!" said the little man in a shocked voice. "How do you know about Miss Violet Shaw?"

Leila answered evasively. "But it it known to all the ladies in the neighborhood. And once when I was visiting our cousin in the Alwiyah district, I saw Mr. Dejani driving in a carriage with a shameless foreign woman. I asked our cousin, who told me—"

"Enough! You hold dossiers as complete as my own at headquarters. I have now lost all interest in my hobby." The Inspector closed the stamp album and stood up, a slight figure, strangely dignified in the long robe. "I do not keep a mistress myself," he said. "If I did I would be more discreet. This Violet Shaw, who is actually a Eurasian from Bombay, is indeed an adventuress. Mr. Dejani is not a wealthy man, and her extravagances are leading him into difficulties."

"They dine almost nightly at the Zia Hotel and—"

Leila's new disclosures were interrupted by the telephone bell. Chafik's heelless slippers made a sad shuffle on the polished floor as he went to the bedroom. He took the instrument between finger and thumb.

A familiar voice said, "Sir?"

The little man lifted an eyebrow at his wife, who had followed him. He said with resignation into the telephone, "Speak." A few minutes later he said, "I come," and returned the instrument to its bedside stand. "That was, of course, my dour but admirable assistant, Sergeant Abdullah. There was a note of satisfaction in his voice. He announced a corpse."

"Murder?"

"He would not disturb me otherwise." Inspector Chafik began to dress quickly but carefully. "The corpse," he said casually as he adjusted his polka-dot tie, "is labeled 'Violet Shaw'—" . . .

The body was in a half-kneeling position on the floor; the head and shoulders and outflung arm rested across a divan, which was upholstered in black and scattered with orange-colored cushions. The woman had been wearing a canary-yellow wrapper and red slippers.

She had tried to accentuate her English features by fluffing out her straight black hair, and by using light powder on her faintly dusky cheeks. But her figure, which was seductive, had been inherited from a Hindu mother and could not be disguised.

Inspector Chafik, who stood in the doorway, said, "Poor Miss Shaw. What was the cause of death?"

"Sir, she has been dealt several heavy blows on the left side of the

"The Merciful One defend us!" Daoud Shuman clutched the Inspector's arm. "I see her! But she is dead!"

ILLUSTRATED BY JOHN PIKE

d. The weapon, which I have not ted, was a blunt instrument."

Chafik went to the body and raised head to examine the wound. "This ndeed ugly. The object had a nd, beveled edge." He looked und the room and then bent over ble at the end of the divan. "There ust," he said. "Observe, Abdullah, nething with a round base, perhaps mp, stood here recently. Possibly weapon we seek."

Shall I make inquiries, sir, for a on seen leaving carrying a bulky ct?"

It is extremely unlikely the murer was observed. The house is reetly isolated; there are no neighbors to watch the coming and going of visitors." The Inspector placed his hand under the armpit of the corpse. "There is still warmth, but bodies do not cool quickly in the heat of Baghdad. The woman may have been dead some hours. I note she met death in an angry mood."

"Sir?"

"You can see for yourself," Chafik said sharply. "There is ash scattered over the divan and carpet. She constantly flicked her cigarette, as a person does when irritated!" He took a clean handkerchief from his pocket and wiped his hands. "Miss Violet did not keep a servant in the house. Who, then, found her body?"

Sergeant Abdullah produced a notebook and read in a harsh voice, "The following is the statement of Mr. Daoud Shuman. Quote. 'At about eight twenty tonight I was walking on the Alwiyah water front in the company of my friend, Ahmed Faris, when I saw a lady resembling Miss Violet Shaw, who is well known to me. I was surprised, because she had previously broken an appointment with me, pleading a headache—' "

Chafik interrupted, "Briefly, what did Mr. Shuman do?"

"Sir, he went to speak to her, but she hurried away and he lost her in the crowd. Then he began to search for her. It would appear he has a suspicious nature. He went to various cafés and bars, but the woman had not been seen. He says. Quote. 'Then I went to the house. The time was about eight fifty. After knocking and getting no answer, I opened the door with a key Miss Shaw had previously given me—' "

"This is interesting, Abdullah, for a key was also in the possession of Mr. Dejani. So Mr. Shuman demanded an explanation and was confronted by a corpse. What did he do then?"

"His action was commendable. He telephoned us. He does not appear to realize he is a top suspect."

The Inspector winced. "A detective

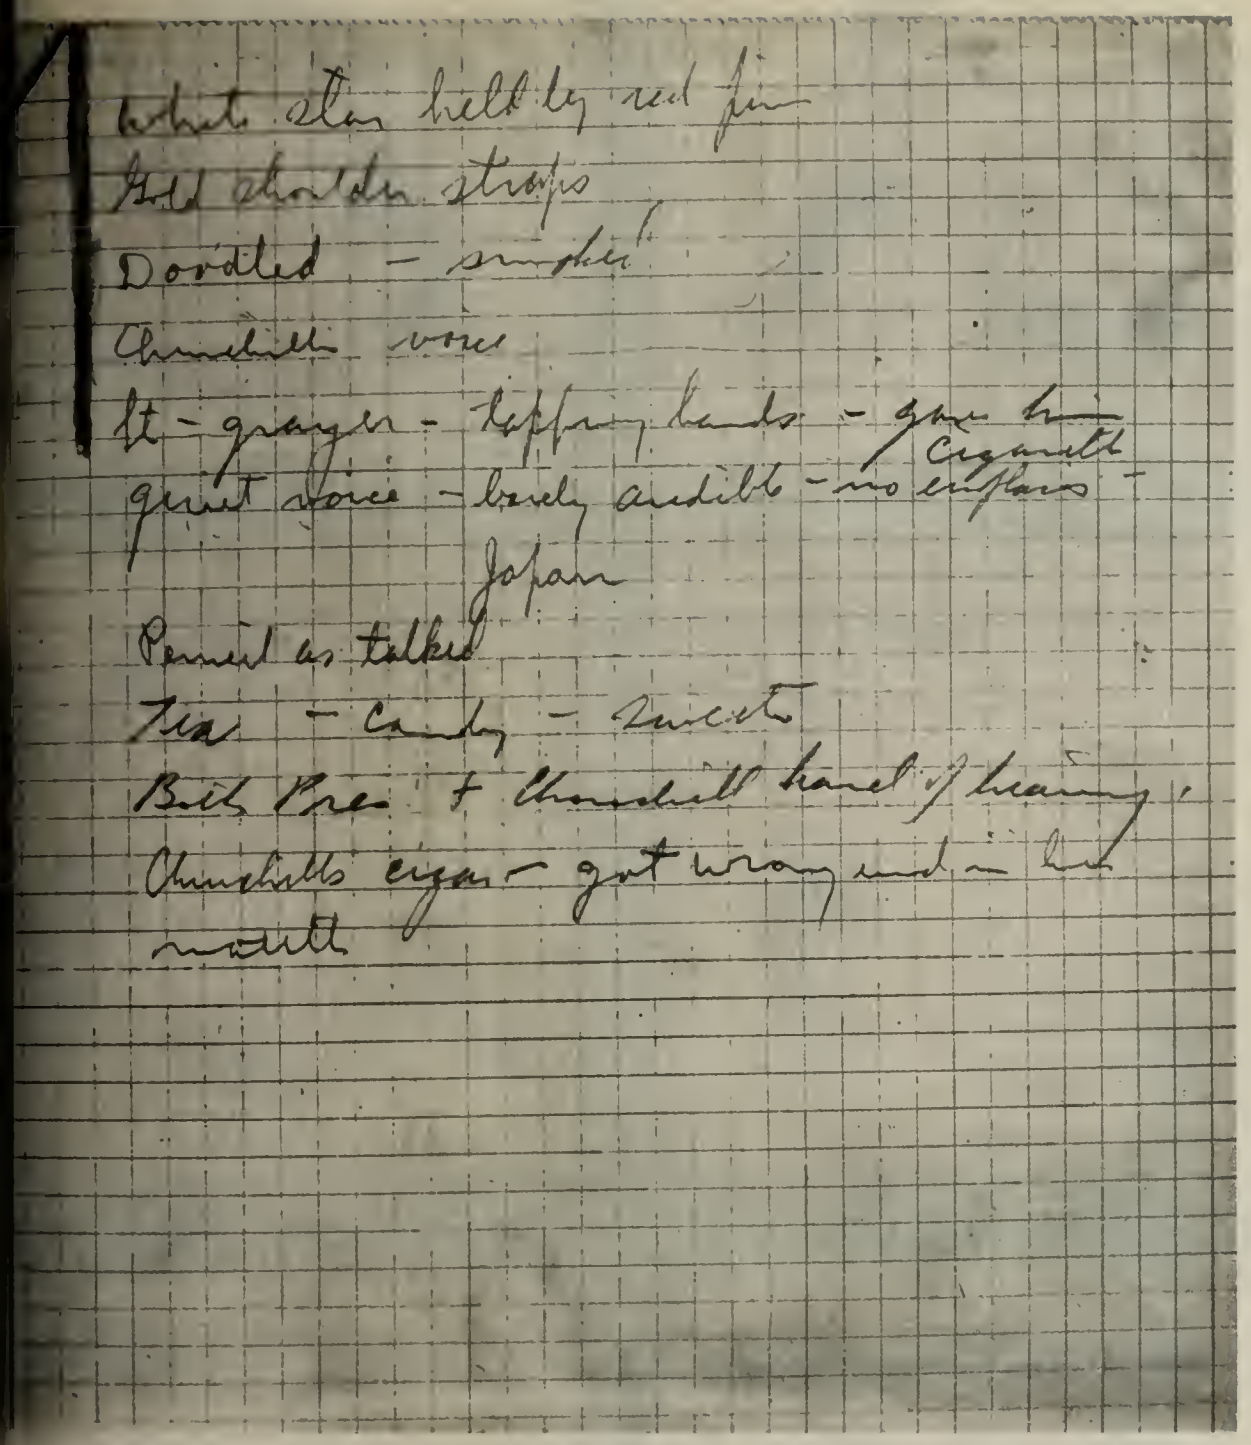
(Continued on page 75)

Stalin and Roosevelt meet for the first time at Teheran. Those wide epaulets Stalin is wearing are gold, and the large white stars are fastened by red pins. As the Big Three settled down to talk, Stalin doodled and smoked incessantly. Hopkins reported that Stalin's voice was barely audible

THE SECRET PAPERS OF HARRY L. HOPKINS

PART XIII—FROM CAIRO TO TEHERAN

★



BY ROBERT E. SHERWOOD

The Cairo plans for threefold thrusts in the Far East, and Churchill's ho[pe] for a European campaign based on northern Italy die a-borning. Bu[t a] few words from Stalin change the entire Allied strategy for global [war]

ON NOVEMBER 13, 1943, the Presi[dent] sailed from Hampton Roads, Virgini[a] on the new battleship, U.S.S. Iowa, which [was] commanded by Roosevelt's former naval aide and good friend, Captain John McCrea. Also trav[eling] on the ship were Hopkins, Generals Marshall, Arnold, Watson, Somervell and Handy and Admi[rals] Leahy, King, Brown, McIntire and Cooke. There were some highly important discussions among the Chiefs of Staff aboard the Iowa.

It was their experience that, while Churchill invariably gave his most enthusiastic and eloquent approval to OVERLORD (the Normandy invasion) in principle, he steadfastly refused to accept it as a scheduled fact, preferring to believe that German man power could be worn down by attrition to the point of collapse, whereupon the Anglo-American forces in the United Kingdom could perform a triumphal march from the Channel to Berlin with no more than a few snipers' bullets to annoy them.

Whether or not these apprehensions were

Hopkins' seribbled deseription of the Big Three at their historie first meeting is reproduced here. Churchill's aecident with his eigar, referred to in the note, must have provided a lively interruption

ıstified, they were so substantial that the U.S. hiefs of Staff drew up papers looking toward comromise arrangements in the event that their British pposite numbers, dominated by the Prime Minister, should present a solid wall of resistance.

On the second day out, there was an extraordiary episode which caused the Navy's most omious warning, "This ain't no drill!" to be shouted rom the bridge. (The statement is generally enered in the log, if one survives, as. "This is *not* a rill!"—but I believe that few sailors have ever said that way in the heat of the moment.)

An American Torpedo on the Rampage

Hopkins wrote a description of this episode, as ollows:

This afternoon the eaptain arranged for an antiireraft drill. Three balloons are released—tied ogether—and the batteries of forties and twenties et loose when the balloons reaeh a proper height nd distanee from the ship . . .

The President was wheeled from the luneheon able to the deek just outside his mess—Wilson Brown, Ross MeIntire, Pa Watson and I went long. The firing began—it seemed pretty good o me although the five-ineh guns made a whale of raeket in spite of the eotton whieh all of us put n our ears . . .

Suddenly an offieer from the bridge two deeks bove leaned over and yelled, "It's the real thing! t's the real thing!" The President doesn't hear ell anyway and with his ears stuffed with eotton e had a hard time getting the offieer's words whieh I repeated to him several times before he understood. I asked him whether he wanted to go inside; he said, "No—where is it?"

Just as I got to the starboard side to find out, everything fired at onee at the wake of a torpedo about six hundred yards away—the firing lasted about thirty seeonds. The wake went well astern.

It was a torpedo all right—but not from a German submarine. One of our destroyers had let loose a torpedo direetly at the Iowa. The first the Iowa heard about it was a flash from the destroyer that a torpedo was moving toward the Iowa, and it was four or five minutes later that the message eame that the torpedo was fired by our own eseort.

The eommander of the destroyer explained it as follows: The torpedo was in plaee but with no primer attaehed—the torpedo must have been unloosed beeause of the heavy seas in some unaeeountable fashion. But Admiral King and Captain McCrea thought this pretty thin. An investigation is afoot.

Can you imagine our own eseort torpedoing an Ameriean battleship—the newest and biggest—with the President of the United States aboard—along with the Chief of Staff of the Army and the Chief of Naval Operations? In view of the faet that there were twenty Army offieers aboard, I doubt if the Navy will ever hear the last of it.

The records give the identity of the hapless destroyer, but I am not going to mention her name in these pages. Her skipper probably did not know who, if any, were the passengers aboard the Iowa. It was bad enough for him to know that one of his torpedoes had been loosed toward the great ship and caused her to maneuver to avoid being hit. It would have been worse, of course, had he been aware that the President of the United States was one of the possible victims. But, had he known that the President's party included Admiral Ernest J. King, he would undoubtedly have attached the anchor to his neck and plunged himself to the bottom of the sea rather than live to face the awful consequences.

The Iowa arrived at Oran on November 20th, where the President was met by Eisenhower and his staff and the three sons who were in that theater, Elliott, Franklin D., Jr., and Robert Hopkins. Roosevelt then flew to Tunis in the C-54 transport plane which had already been given the unofficial but enduring name, The Sacred Cow. The next day, Sunday, he went for a tour of the Tunisian battlefields with Eisenhower, who did not realize at the time that he was being subjected to most searching scrutiny and appraisal.

Roosevelt showed great interest in the site of ancient Carthage—which had once been subjected to unconditional surrender—and he concluded that the Carthaginian armies had probably avoided those forbidding mountains which provided very bad terrain for elephants. Roosevelt, in his casual, seemingly offhand manner, also talked about the future—particularly OVERLORD.

Field Generals Get Most of the Glory

He said to Eisenhower, "Ike, you and I know who was the Chief of Staff during the last years of the Civil War but practically no one else knows, although the names of the field generals—Grant, of course, and Lee, and Jackson, Sherman, Sheridan and the others—every schoolboy knows them. I hate to think that 50 years from now practically nobody will know who George Marshall was. That is one of the reasons why I want George to have the big command—he is entitled to establish his place in history as a great general."

Roosevelt also told Eisenhower of the plan to bring him back to Washington as Acting Chief of Staff. It is probable that Eisenhower expressed to the President his total lack of enthusiasm for a career in the Pentagon Building, but he was a soldier, and he would go where he was sent. Later, Eisenhower was somewhat less certain that these decisions had been finally made, for Admiral King told him of his personal belief that Roosevelt would in the end refuse to move Marshall from his present position.

When the Presidential party took off for the long flight to Cairo late Sunday evening, Eisenhower did not know what the future might hold for him and he remained in ignorance for more than two weeks while the memorable conferences were taking place.

On the fourth and last day of the first Cairo conference some forty-three American and British press correspondents formed themselves into a committee, of which the able Cyrus L. Sulzberger of the New York Times was chairman, and signed a round-robin letter to Hopkins which began:

The undersigned correspondents representing all Anglo-American and Dominion newspapers, agencies and radio chains are addressing this to you as an influential friend of the press.

We wish to express the strongest dissatisfaction with the manner in which we are being treated during the present important conferences. We demand that we be taken further into confidence of the authorities on an off-the-record basis and be given some idea of what everything is about in order to prepare our advance material.

We request a conference with yourself wherein we could present some of our problems to a person known to be our friend, of sufficient influence and energy to help us out and of sufficient experience and understanding to be able to do so.

There followed specific requests, including one for a press conference with the President, Prime Minister and generalissimo, and for another conference in the event that a Russian delegation might arrive in Cairo after the Chinese had departed. It was suspected that Stalin himself might appear, it not then being known, of course, that the British and American delegations were going on to Teheran to meet him there.

Had Hopkins met the press, there was not much he could have told them other than the agreements that were subsequently announced in the official communiqué. There was *(Continued on page 43)*

COLLIER'S

SHORT SHORT

THE FUGITIVE

BY VAL DUNCAN

Stymie let up a bit on the man's throat. "I didn't know you could help me. Now I'll show you I'm on the level"

TYMIE knew he ought to be moving instead of sitting there fishing. He ought to be travel- till staying with the river, of e. Sure, he'd been lucky so far. ng some kid's homemade fish had been a break and this spot ts points, too. It ought to be for he had thorn cover all d him and in front was the sweep of the river.

looked safe, but somehow it *feel* safe. The leaves trembled hey were afraid of something. y, he rubbed his beard stubble ouched the puffy blue spot on eek. That guy had hit hard. He d at the split knuckles of his hand. He'd given better than he

re was a noise to his left in the and he froze. He set the pole silently and stared into the dim- A shadow flickered and a young darted out, almost hit him, bounded away. He let go his and swore softly.

n he saw the boat, one man g into the little cove where he tting. Every once in a while the ooked over his shoulder to judge ering. With that pale face, this asn't a regular riverman. When ached shallow water, the boat- umped out and shoved the boat the mudbank. He saluted Sty- with a lift of his head. "Any

was a hard-built guy, about e's height, and with that barrel he could give you a tough time ight. He flipped the boat on its ike a toy.

oo hot for 'em today," said e.

e boatman watched water sluice of the boat. "Scraped a rock. r came in pretty fast."

ough," said Stymie. "Can you

asy with a knife. Got one?"

shook his head.

ost guys fishin' have a knife with

ocketful of knives wouldn't make babies bite today."

The boatman snapped off a small branch of a willow tree. With his fingernail he started to strip it down to white wood. "They're fishin' for plenty upriver today."

When the boatman bent to his work of fitting the wood in the crack, Stymie said: "And catchin' nothin', I bet."

"So far. But guys'll fish a long time for a thousand bucks."

He sat tight as the boatman dug up a stone as big as his fist and started to tamp the wood plug into place. Finally the man quit hammering. "Seen any cops around here?"

"Cops?" The word always stuck in Stymie's throat. "No."

The boatman straightened up. "Thought maybe some of 'em got down this far. Up around Brantville State Pen the hills are crawling with cops and troopers. Dogs, too. They've put up a thousand-buck reward. The guy who broke out is a killer."

"Crashed out of the state pen?"

"Sure," said the boatman. "Last night. That's fifteen miles from here. If he was heading this way, he'd be gettin' here around this time."

"It's tough traveling country. Specially following the river."

The boatman hefted the stone in his hand. "He'd want the river for water and to keep his direction straight. If he found the right spot he could hole up for days till things cooled off."

Stymie's eyes wandered around the little cove he'd picked out.

"Sure," said the boatman. "A little place just like this."

Stymie shifted position, tucking his feet flat under him. If he had to move fast, he had to be set. "You got things all figured out."

ROLLING the boat right side up, the boatman eased it back into the water and slung its rope over a limb of the tree. "Yeah," he said. "I'm kinda handy at figuring things."

"Must be nice to be smart like that. Guy that crashed out must have knowed how to dope things, too."

"Sure, but he won't figure it all the way."

The sun was higher now and beating down hot. Stymie wished he had a floppy hat like the boatman. The sunshine made the guy's face stand out very white. "You're talkin' like a cop."

The boatman was filling a pipe. "Maybe I am a cop."

"You don't look like one with that white face. They're lookin' for a guy with your kind of skin—"

"A cop who's got brains," broke in the other. "Who wears stripes on his arm, who don't get out much himself. On vacation at his brother's place five miles upriver."

"Lissen," said Stymie, his voice hoarse, "you think I'm a thousand bucks? Wise up, mister. A travelin' man can head into a little trouble with a railroad dick, can't he? And say," he hoisted a shoe, "you don't wear a hole that size in fifteen miles."

The boatman fumbled for a match. "Crashing out like that, you have a plant. A pal leaves some duds buried under a tree. Old duds, worn, maybe a fish pole, too."

"Or," said Stymie, "he's a pal with a boat, leaving it tied up so a white-faced con who's plenty smart can sail down the river, nice as you please. When he's spotted by a guy fishin' he pulls in fast and tries a cover-up with a phony line of talk about bein' a cop. He knows he's worth a grand to the fishin' guy."

The face was whiter than ever now and the mouth was drawn in a tight line. The boatman clamped down hard on his cold pipe. "Got a match?"

"Sure," Stymie felt in his pocket and brought out a little hoard of blue-headed matches in a twist of Cellophane. "Make it do," he said. "One's all I can spare."

"Thanks." He knelt down near Stymie's shoulder, scraped the match against the stone and cupped his hands around the bowl. They were the closest now they'd ever been. The flame was on the tobacco and the man was drawing hard to get a good light.

Stymie was on his feet in an easy spring. Out of the hand that held the matches flicked the blade of a spring knife that had also been in his pocket.

The boatman's jaw dropped and the pipe fell. His hand went back and the stone flew. It stung Stymie's arm and sent the knife spinning. The boatman followed fast, throwing a trick wrestling lock on him. Jujitsu. Cops learned that stuff. He felt the squeeze tightening on his neck. Air was hard come by. His head was being forced down to the guy's stomach. Then he saw the gold belt buckle. On it were the words, "Fallville Police Dept. Marksmanship 1942."

DRUMS pounded in his head but he was slippery. A twist and a foot thrown behind the guy and they were both rolling on the bank.

Stymie wriggled like a snared snake. His fingers found the man's throat and closed. He squirmed over that barrel chest and grinned into the bulging eyes.

"So you *are* a cop."

The man's tongue hung out like a thirsty dog's.

"Well, lissen—" Stymie bent close to the man's ear and let up a bit on his throat. "For the first time I'm givin' a cop a break. But only because there's dough in it. For both of us.

"Up to now I didn't know you were a cop, but now you can help me. I couldn't do it before by myself with no gun. Then when you came I thought maybe you were the escaped con—and you were thinkin' the same about me. Now, to show you I'm on the level I'm lettin' up on you. Then we go to work."

Freed, the man sat up, rubbing his throat. His voice was hoarse. "What the hell are you talking about?"

Stymie grinned. "All these years on the road, I know a coupla things, too. Just before you came, I saw a shadow in the thorn over there. Then a rabbit jumped out on me. A rabbit won't jump at one man unless there's another one scaring him behind. That con's in the brush. A thousand bucks waitin'. For us, see?"

"Yeah," said the cop, nodding slowly. "Yeah."

"Let's collect," said Stymie. ★★★

THE LOGGER AND THE LADY

He couldn't believe that a beautiful girl would cheat—but then, he hadn't seen a white woman in six months

BY ARTHUR MAYSE

ILLUSTRATED BY EDWIN DAWES

SHE'S a great old tub, the Marlum. The boys who follow the woods call her the Loggers' Hearse, and they say if you're hard up for a fight or a frolic you can always find one or the other, or both, on board her. She carries a bridal suite on her top deck and a lockup below. You never know who you'll meet on the Marlum, or what will happen after you meet him or her. Like the time this young truck skinner, Ric Truro, was coming down from the spruce camps with six months' pay and tangled with the poker-playing redhead in the Marlum's lounge.

Ric Truro didn't know she was a poker player, of course. He jus... it was six months since he'... eyes on a white girl in nylons—... year of skinning a ten-speed ... down the grades with fifty t... logs at the back of his nec...—an... that anyhow, the game was g... sleep on account of a bu... farmers and home guards and r... stiffs who wouldn't let him bo... ante.

"Excuse me, boys," Ric sa... we're bound to play lady-st... might as well do it proper." H... in his hand and crossed to w... girl sat reading in one of t... leather chairs with the light sh...

There never was such a game on the Marlum before, and there's never likely to be again

r hair, which was the color of new-
t cedarwood.

"Miss," Ric said, his brown town-
ing hat in his hand, "you look
nely. No offense, but how'd you like
sit in?"

The girl glanced up from her maga-
ne: What she saw was shoulders a
lling-ax-handle across, curly black
ir that was going to make some bar-
r scream like a cougar, and a set
features scrambled by spills and
ttles but adding up to a happy,
mely face. She gave Ric a cool
tle smile: she had large eyes with the
ngest, darkest lashes you ever saw.

Thank you," she said. "No."

"Why not?" Ric asked her. "We're
l sober and well-behaved. You can
ack a book anytime, babe."

This time she really looked at Ric.
ver his checked shirt he wore a con-
rvative brown jacket that must have set him back fifty bucks. A nice happy-go-lucky tame ape duded up for town. Maybe, too, she heard the fifteen hundred dollars sizzling quietly in his hip pocket. Anyhow, she closed her magazine and got up. Her suit was light, kind of severe and businesslike, but her white blouse had a tricky bow at the throat.

"Very well," she said in her soft, cool voice. "I'll play, if you insist."

There never was anything wrong with Ric Truro's manners. He fetched a chair for her and set her in to the table mighty gallant with his pack of cigarettes handy to her elbow.

"I guess you wouldn't know how to play draw poker," he said, and grinned at her with the light flashing off his gold front tooth. "You'll pick it up in a few hands, though. If I do say so, you've got a good teacher, babe."

"I'm sure I have," the redhead said, and it seemed to Ric her smile had warmed up considerable. "As a matter of fact I used to play poker now and then, winter evenings with Daddy. Am I supposed to deal?"

She picked up the deck with slender white fingers. The cards flitted from her left hand to her right with a *wheet—wheet—wheet* like the sound of a razor on a strop.

One of the home guards shoved back from the table and reached for his billfold kind of hasty. "Evening's getting on," he said. "Just deal me out, eh, lady?"

"Me too," said one of the married stiffs. "I remember I told my missus I'd come back to the stateroom early."

That left only a rigging slinger from Menzies Bay, a Swenska falling-bucker off one of those Texada Island gyppo shows, one of the Marlum's crew, Ric Truro, and the red-haired girl.

"If you're ready, gentlemen," she said, and began to deal.

Highball play is nothing new on the Marlum, but they do say that game came near to hanging up a record. The redhead tucked Ric's bonus check into her handbag an hour after they started, and exactly two hours later by the lounge clock, Ric was clean as a barked fir butt. The rigging slinger and the gyppo bucker had pulled out when the girl suggested they switch to wild widow and take the limit off. They watched bug-eyed while she closed her bag with a snap like a rattrap on the last of fifteen hundred bucks.

"Thank you so much for the lesson, Mr. Truro," she said. "I don't imagine we'll meet, but if we do by some accident, my name isn't babe!"

SHE tucked the white handbag under her arm, and walked out of the lounge, leaving Ric Truro with a flat wallet and a breath of perfume.

The rigging slinger snickered, and Ric kicked the table out of the way and batted him in the whiskers. Not that he couldn't bear to lose, you understand. He just resented the suggestion that a girl who smelled so nice would go around clipping tame apes.

Even for the Marlum, they say it was quite a battle. The ship's second officer lost most of his uniform, and reinforcements had to be called from the engine room before they could toss Ric Truro into the poky. And there he sat, thinking of life and women, and women and poker, until the Marlum nosed alongside the North Coast Steamships Company pier in the morning.

The purser, a crab-faced old Scot, turned Ric loose. "Here," he said, and slapped an envelope into Ric's hand. "A lassie left this for ye. She has mair heart than sense, a'm thinking."

Ric tore open the envelope. Inside were his six company checks, his bonus and a scatteration of bills.

"We hae made deductions," the purser told him. "One table, two chairs and a porthole glass broken, and domoge to the second's uniforrrm. We didna' charge for oor winchman's teeth."

"Mac," Ric said, "what was that girl's name?"

"A gey queer thing," the purser said with his eye on the envelope. "I hae forgotten it quite."

Ric jogged his memory with the first bill that came to hand. "Why," said the purser, "now I ken! Janet, she's called. Janet Jamieson, and she's daughter to the late Jamie Jamieson, him that used to gamble up and doon the coast. He bought a wee logging ootfit at Summer Harbor ten years ago wi' money won at sinfu' games of chance upon this verra vessel. But her name will do ye no guid, Muster Truro, for she's a boss logger—"

"Like hell it won't!" Ric said, and jammed the envelope into his stranded pants. "I don't mind losing my stake, but I won't be insulted by her treating me like I was a kid that oughtn't to be playing for keeps. Boss logger or no, when I find that carrottop, Mac, she's going over my knee."

"Best arm yer fist wi' muckle strength then," the purser told him dryly. "I'll no gainsay ye're a braw lad in a roughhoose, but ye've yet to meet Blackjack Mike Halloran, her camp push. Do ye so much as look sideways at Janet Jamieson, and Blackjack Mike will make cat's meat of ye." He tucked Ric's five-spot into his brass-buttoned vest. "Awa' now!" he said. "Go fritter yer hard-earnt pay on drink and hussies and the like foolishness!"

THAT sounded like mighty good advice to a boy just down from the spruce country where it rains all day and all night. Ric Truro had friends in town, scads of them in every beer parlor, and he knew plenty of girls, blondes and brunettes and even a couple of redheads. But he couldn't seem to work up a proper interest in partying. By ten o'clock that night he was back in his Granville Street hotel, cold sober and without more than ten bucks frittered.

He slumped in an armchair with his feet on the window sill and watched the Marlum's lights slide away from the North Coast pier, trying to figure what had come over him. For all the fun he'd had since he hit town, he might as well been roosting in a bunkhouse. First off, Ric tried to blame it on his job. You skin a sixteen-wheeler up and down those sidehills long enough and it gets you, he thought. You know all the time what's due to pop someday when you hit a soft shoulder or your load slides or your air brakes let go on a grade. It's the job; it's making an old man of me.

He sat there chain-smoking, and he couldn't sleep worth a hoot that night for dreaming about the red-haired girl. In the morning he felt even worse. All while he was fiddling with his porridge and hot cakes and eggs and bacon he kept thinking about how sore he was at her, and how sweetly she'd smiled at him.

He was mooching along Granville Street, trying to remember had there been any rings on her fingers, when the Blundell & Ryan Timber Company man-catcher tapped him on the shoulder. Man-catchers, they say, are like ravens, paying no heed to a well buck but sticking close to one that's off his feed. They know better than to tackle a logger till his look and his walk tell them he's broke and is ready for the woods again. Right after Ric Truro told the man-catcher what he could do with his job, he knew what ailed him. He was broke. He had six months' pay in his pockets, but just the same, he was broke, because that dough belonged to the redhead.

With that settled, Ric felt a lot better. He had a quick beer with a hook tender in from Salmon River, then high-stepped across-town to Brady's hiring hall.

"Sign me out," he told Joe Brady behind the counter.

Brady, a skinny little dude with a bald dome and a green eyeshade,

Manager Wirt Ross talks a good fight when he's telling one of his heavyweight hopefuls how to handle his dukes

POT SHOTS BY

ONE SHOT ROSS

BY AL SANTORO

He's a fabulous character who runs a stable of pugilists in Los Angeles. When he was a squirt in Kentucky his pa named him Wirt and he had to shoot his way out of that with a squirrel gun. His buddies were people like Sure-Thing Slim and Chilkoot Charley

PHOTOGRAPH FOR COLLIER'S BY HANS KNOPF

THE first time I ever mixed beer and sto with One Shot Ross, the Old Rebel, Goodfellows Grotto on Main Street in L Angeles, I sat in a chair facing the entrance. T Grotto, where Oysters Rockefeller have been serv delicately to gourmets since 1900, is several do down from the Main Street Gymnasium where e are scrambled daily, but not delicately.

"Excuse me," said One Shot. "Do you mi changing places?"

I didn't mind.

"Ever since they shot Jesse James in the bac am careful never to sit down unless I'm fronti the door," said One Shot.

As a preface, this may serve to show that t story of One Shot Ross may not be recorded capsule form. Ross, whose Christian name is rea Wirt, has been a soldier, gambler and adventu Currently he is a manager of fighters. In the spo world he has scored undying fame as the ent preneur who gave Henry Armstrong's contract Al Jolson for a trifling sum only later to see He come down a fast fistic track to win three cha pionships.

One Shot claims to have been a participant many a dramatic episode, either as the cen character, or at least as one of the supernum aries in the wings. He is an authority on the West. And after blowing the collar off the th glass of beer and stout you may, with no difficu televise One Shot breaking trail through swelter tropical jungles; beating a man to the draw in Skagway, or, astride a fast quarter horse, ridin breakneck speed to grab the reins on the lead h of a careening stagecoach bearing dust from diggings. One Shot claims to have been a r agent once, although you get nowhere trying to him down as to when and where he last told a one to stand and deliver.

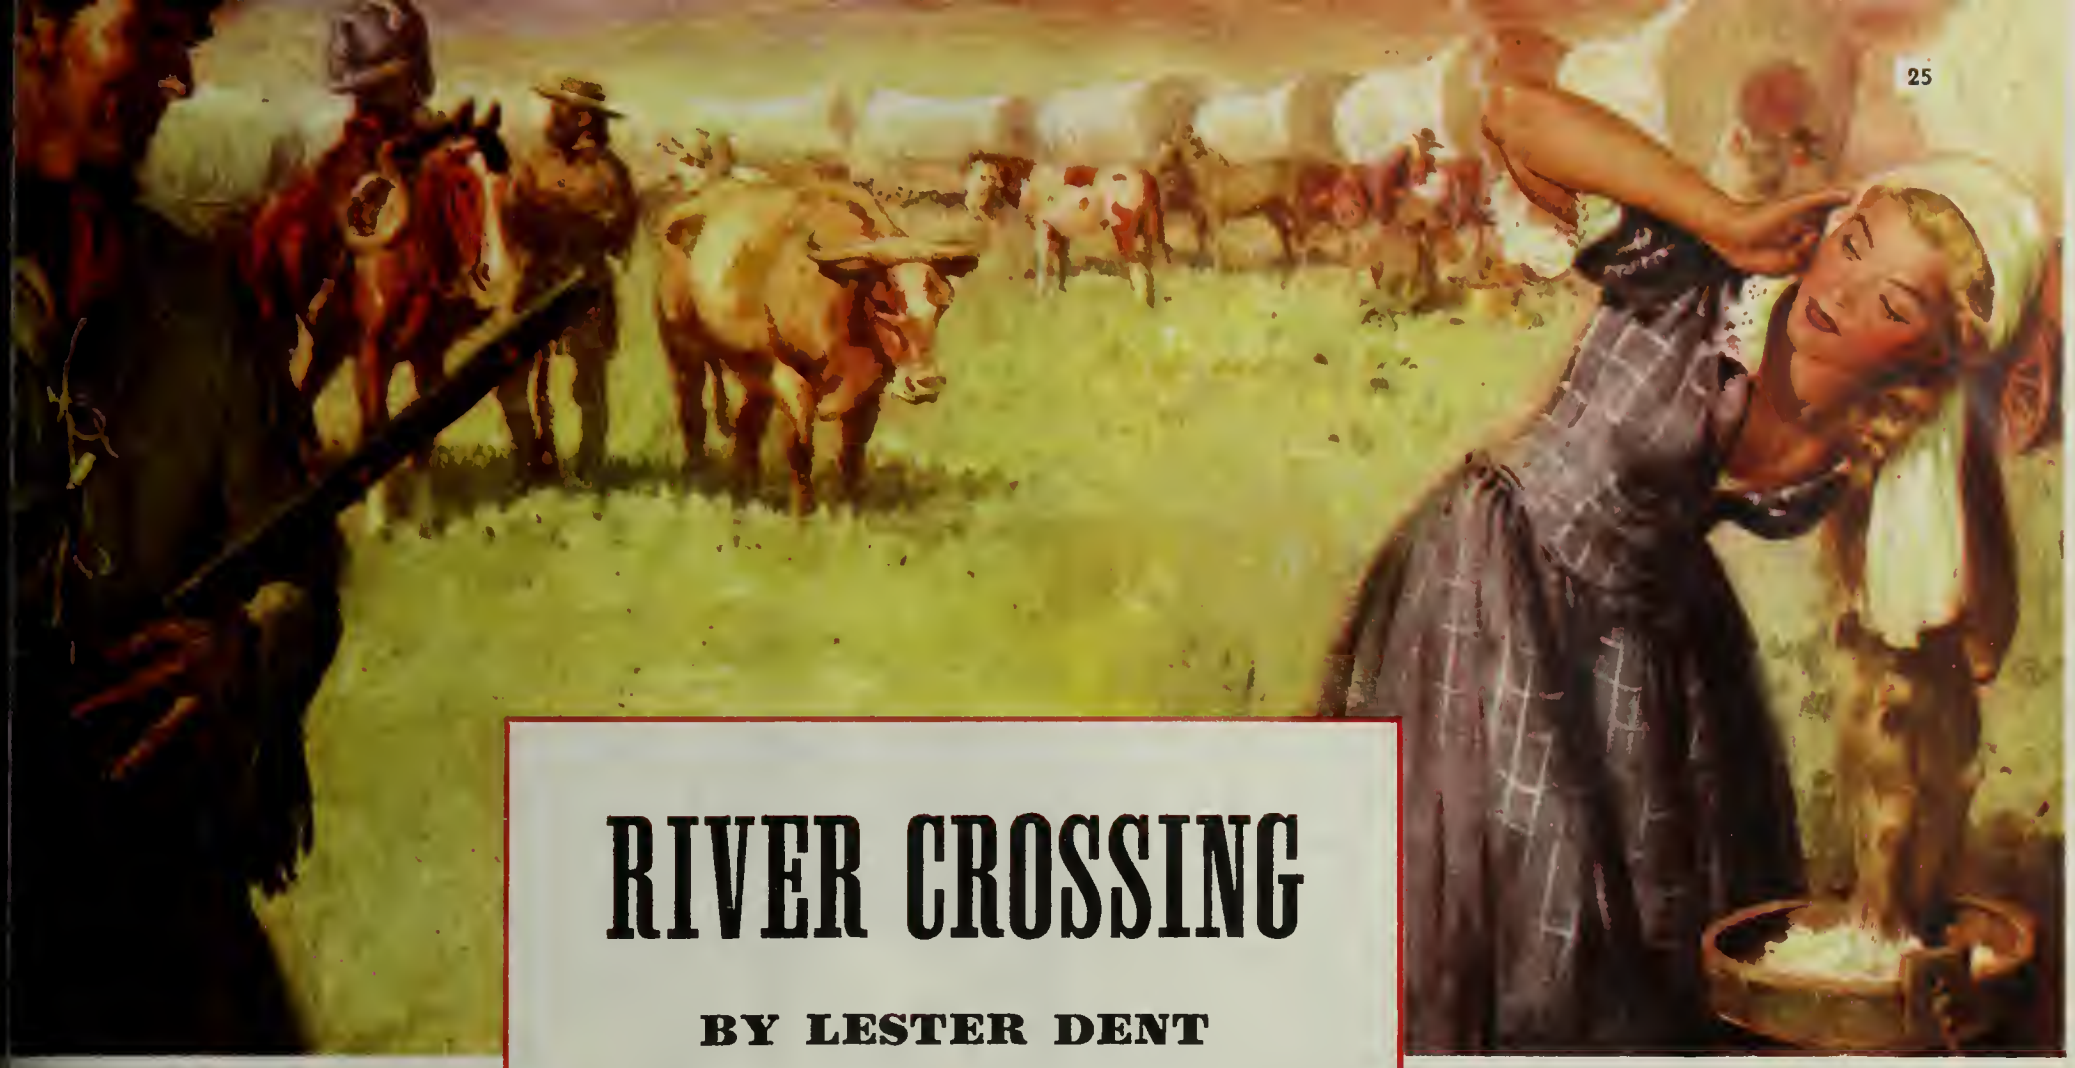
"Oh, there's nothing against me on paper," will say if you hint that he is a man with a rec

One Shot soldiered in the Spanish-Ameri War, Pacific theater. His cronies in those " member-the-Maine" days were rugged individu like Three Card Dallas, Poison Tom Ivy, Back Back Crowley, Sure-Thing Slim, Pompadour P and Chilkoot Charley.

One Shot is six feet tall. He has a ruddy sch girl complexion, but there is snow in the thatch covers his rooftop. One would judge he first the light of day threescore and ten years ago (Shot makes a marginal note—"I'm 76"). Ye seems ageless. He is mighty of shoulder an girth, although not *too* portly. He stands str as a ramrod, with a throwback of his shoulders dates back to the days when Uncle Sam was pa him fourteen dollars a month and cakes.

In recent years One Shot has gone Hollyw but only to a slight extent. His two-toned s blouses cause the lifting of many an eye in Main Street Gym. But the Hollywood stuff en his skypiece. Old man Stetson would writhe i could see One Shot put the crusher on one o more expensive numbers. One Shot pulls th down over his ears and sets the headpiece he askew.

He has a fondness for warm-colored neckw which usually supports one of his two diam stickpins. These are barometers of his fina standing of the moment. Both stones are can The large one is just under the size of a plover's



Before "Hammering Henry" Became a Cha

I first met One Shot in Oakland, California, ago. He was managing Henry Armstrong, to hold the featherweight, lightweight and w weight titles. At that time Henry was merely ing in one of the special events. One Shot wearing a piece of ice in the knot of his flamin

"I can see by your headlight that you are balling along and things are all rosy and right you," I said, having heard of his propensit stickpin gems.

"Not too good," One Shot replied, using a designed to frustrate the possible floating slow loan. "The big one's in hock."

It must have been during one of the periods the big headlight was at Uncle Ben's that One decided to sell Armstrong's contract to Ma singer Jolson for a mere $10,000. After Jolson had sold him, Henry earned thousands of d in the ring. With a thirty-three-and-a-third manager, One Shot would *(Continued on pag 66)*

RIVER CROSSING

BY LESTER DENT

Everyone except Stack wanted to hang the old Indian for stealing the ox. But the ox had belonged to Stack, and in a hard country he was a soft man

Stack said, "I would like to know what happened to you at our meeting this afternoon?"

NELS STACK left the wagon camp afoot and plodded slowly up the ridge against the sunshine that was so glittering and so sursingly without warmth. Halfway up, Stack met rfolk a Missouri emigrant, and he asked Nork, "What have they done?"

Norfolk reined in his horse. "Nels, they're going hang the old Indian," he said. "They're waiting you."

"Yes, they sent Tom Davis to tell me," Stack d. "I thought maybe they had got impat."

He did not say more than this, but looked at rfolk searchingly. Stack was seeking signs of me in Norfolk, and he decided he saw some, ough to tell him that shame was the reason for rfolk riding back to camp alone. Stack felt a rm rush of plain human approval, and he tried think of a way of showing Norfolk that he did prove, but nothing came to mind. Norfolk uld resent it anyway.

Norfolk said suddenly, "I don't see why the hell y're waiting on you, Nels. You'll only talk them t of it." Then Norfolk spurred his horse and le on.

Now there, Stack thought, was a thing he'd obved before. A contrary thing. They threw their entment at gentleness and humanity, even when y were overflowing with the same emotion mselves. If Nels Stack stood between them and old Indian, which he intended doing, then Nels ck would be cursed for softness. Stack was sure this. He also knew that he was already labeled a soft young man. Not a wise, humanitarian ung man. A soft one. He had even heard himf called "Preach." But this had happened only a uple of times, since Stack was a moderately althy man, and in the West in 1857, riches were t associated with the clergy.

Stack figured it this way: The wagon train had en stalled here three weeks, thwarted by the river icksands, and in hostile country, too, so everyone was plagued by desperation. Desperation begets fear. Hardness is the only feasible defense against fear in such a situation, and so Stack had moved apart by remaining gentle. It was not an easy lot for him.

Stack resumed his climbing, but he did not hurry. His body did not have the rawhide toughness of these others, but that was not why he did not hurry. The longer they had to ponder their hanging, the more crevices there would be for driving in wedges of common sense.

When he was breathing short, Stack paused to rest and look back at the river.

The river was behind and below him now. The river wasn't a mile wide and an inch deep, the way they'd heard. But it was a nasty river. It was the flat skin of a yellow snake. If it had any bottom other than quicksand, they hadn't found it. It seemed to be an insurmountable obstacle to their trek westward, because nowhere was the water deep enough to float the wagons over, or even swim horses across.

Stack, when he heard hoofbeats, quickly turned. Relief touched him as he saw two women riding sidesaddle back to the wagon camp. They hadn't disposed of the Indian yet, apparently.

And then when Stack saw that one of the women was Laura Collin, his relief warmed into something more. When the women swung to pass him close by, Stack at once removed his hat and waited.

Laura Collin rode slightly ahead of Mrs. Davis, the other woman. It was, Stack had noticed before, a habit of hers to move in the forefront. Not apart, but out in front; there was a great difference about whether a woman was apart from other women, or was one of them, but standing prominently. The women liked Laura Collin. She would, before long, Stack imagined, become their leader and spokeswoman.

Laura Collin was, Stack had guessed, about twenty-four. She had more maturity than that about the mouth and eyes, and a lovely face: he liked the lean erect air she had, and the impression that he got that the bloom was still in her a well-filled cup. There was also—and here he was not guessing—considerable dark tragedy in her past. She had joined the wagon train on the Platte, when he was away on a business trip to the Black Hills. He had found her with the party when he returned, ten days ago, to find progress stalled by the river quicksands, and a state of considerable alarm.

"Good afternoon, Mrs. Davis," Stack said politely. "Hello, Miss Collin."

"Mr. Stack!" said Mrs. Davis.

"Good afternoon, Mr. Stack," Laura Collin said, and she gave him a measuring glance, a look that was plainly an attempt to weigh his value against the crisis of the moment.

Stack bent his head in a special way, wishing her to understand he appreciated her interest. Truthfully, it was the first time he was sure she had shown a clear interest in him. There had been other times when he suspected something more than the casual. But those times there'd been too good a chance that what he thought he saw was only the reflection of his own hope.

"Mr. Stack," said Mrs. Davis, "they're planning to hang the old Indian."

He looked at the older woman, wondered why she did not go ahead and have her tears, and said, "So I understand, Mrs. Davis."

"He's such an old Indian," Mrs. Davis said thinly.

"Yes, I know," said Stack gently.

"He's so pitiful-looking."

"Now, now, Mrs. Davis," Stack said. "You should ride to camp and forget about this."

"Mr. Stack, you own ten wagons, and you're a rich man," Mrs. Davis said appealingly. "You can stop them, can't you?"

Stack, knowing the kind of richness she meant did not come from owning ten wagons or a hundred wagons, grew *(Continued on page 60)*

"THERE GOES RUSTY!"

BY KYLE CRICHTON

Taunton is a good name for this Massachusetts track. Here Rusty, the very fast mechanical rabbit, leads six hungry greyhounds a wild chase for the benefit of the bettors—and the cameramen

THE greyhound is an incredibly swift and incurably stupid animal that chases a fake rabbit around a race track, makes a fortune for various humans and gets nothing for his pains but a day without food. Anybody is entitled to love a greyhound but under our laws the affection is returned in only five states, with Massachusetts and Florida providing the bulk of thc adoration.

The sport started in Emeryville, California, in 1919, when Owen P. Smith found the greyhound was a sucker from away back, so Mr. Smith invented the mechanical rabbit. The dogs, penned up in boxes at the starting line, can hear the gadget (named Rusty) as it carecns around the track. When it passes over their heads the boxes are opened, the dogs take off and the race is run. Devotees of the pastime insist that greyhound racing is the most honest form of gambling because a dog may be dumb but he has no jockey to educate him.

It was not always so and skulduggery was in flower in the earlier days. Many a hound left the box so saturated with drinking water and stuffed with provender that he traveled only with distress. The laws, supervised now by the International Greyhound Association, are as inexorably fixed as a Balinese wedding rite. The dog eats nothing for twenty-four hours before a race and at 5 P.M. is turned over to the kennel masters (one from the state and one from the track).

The state racing commission then "Bertillons" each dog, checking his feet, color of toenails, scars, chest and side markings. Then the dogs are locked in pens guarded by state troopers. Nobody can get near them. At race timc they are "Bertilloned" again and escorted to the starting line by uniformed gentlemen who look like Air Force officers.

There are 20 tracks in this country, with St. Petersburg, Florida, the oldest; Revere Beach, Massachusetts, the largest, and Taunton, Massachusetts, which is pictured here, making claims to being the most beautiful. Taunton draws 10,000 on weekday nights and 14,000 on Saturdays. Mutuel machines are used for betting and the tote at Taunton goes as high as $354,000 on a Saturday night.

This country breeds about 6,000 greyhounds a year. They start racing when around fifteen months of age and go on until they are five years old. When sold they bring from $300 to $40,000—thc price offered for the famous Flashy Sir. He won 62 out of 68 races during his career. Other great dogs were Never Roll and Lucky Pilot, who still hold most of the current records. The most renowned of all was Mick, the Miller, an Irish dog that won $50,000 in purses between 1929 and 1931.

Greyhounds race twice a week, get a good meal after the race and have their paws cleaned and their eyes washed by a veterinarian, and are said to be as happy as a greyhound has any right to be.

The best racing dogs weigh around 70 pounds, cover between 12 and 20 feet per leap and for an eighth of a mile are about as fast as a horse. They were first brought to this country by Western farmers and ranchers to kill jack rabbits. They did this acceptably and have also ruined many unwary bettors since.

Dog racing is exactly like horse racing except that dog races take place at night, the track is much smaller and horses are not dogs, except upon occasion. Experts hold that dogs run more nearly true to form than horses but this may be an illusion based on misery. As a matter of fact, the swiftest of all four-footed animals is the cheetah. But who could build a sport on a name like that? ★★★

Before a race, Massachusetts Racing Commission checks the dogs twice against identification cards

A second after the mechanical rabbit shoots by, the doors of the starting boxes sp[illegible]es this

The dogs race past the grandstand just after the start. They make one turn around he track and finish directly before the stands. The usual distances are 550 and 660 y[illegible]ds

ing boxes n uses this new English-type device, with the doors opening upward. Usually there are eight dogs in a race, but in this one, two entries were scratched

round the last turn of the track, the greyhounds come flying, headed into the omestretch. At least three must finish before the judges can declare it a race

Number 1 streaks over the finish line well in the lead. The winning time of each race is recorded electrically by the time clock in the background

There's been a leak in a top-secret State Department project,

in this third of a four-part serial. World peace may hang in the balance

From the other end of St. Stephen's there rose the chant of a choir. "Is that why you came here?" Jeff asked. "How did you know that I was here?"

An Affair OF STATE

★

BY PAT FRANK

The Story: After seven years in the Army, JEFF B KER returns to the States in 1949, determined to something to keep his country out of war. He mak application to the State Department and is accepted a Foreign Service officer. An old friend of Jeff's fath HORACE LOCKE, now in an obscure State Departme position, promises to help Jeff. SUSAN PICKETT, who Jeff loves, will not marry him because she is afra there will be another war and she will lose him. B when Jeff is assigned to Budapest, Susan promises wait for him. In Budapest, Jeff meets the chief of t mission, ADMIRAL BLANKENHORN, an ambitious, mi tary-minded man, who acts as if war has been declar already. Jeff also meets FRED KELLER, who is head the top-secret Atlantis Project, to which Jeff is assign The Project is an attempt to build up, secretly, an u derground organization in Europe that would oper in the event of war with Russia. An attaché nam WILLIAM QUIGLEY is in charge of security for Atlan Jeff's job is to contact theatrical people. Going ho late one night Jeff finds a letter from LEONIDES L SENKO, a Russian whom he knew very well in Italy d ing World War II, pleading to meet him. Jeff me Leonides, who tells him that he is a member of a gro in Russia that is planning a counter-revolution, and wants Jeff, at the proper time, to transmit this to superiors. Jeff agrees. Quigley finds out about the me ing but does not tell the admiral. Jeff meets RIKKI T REDY, a dancer, the most beautiful woman in Budap she is part of his assignment. One night Jeff takes Ri to his room. When he asks her to be a spy, she g angry and insists on leaving. They go outside and in Jeff's jeep. When he steps on the starter a bomb t has been placed under the hood explodes.

IT WAS not a big bomb. It was an absur small bomb. It was a petard, of no m power than an old-fashioned July Fou giant cracker, and perhaps not so much as the pl- tic Red Devil grenades used by the Italians, so i said, to frighten the enemy to death.

Its repercussions were felt in New York a Washington, but they were muffled by grea events and bigger bombs. The Inquirer Journal t an eight-column banner out of it for one edition.

REDS BOMB U.S. DIPLOMAT

BUDAPEST, Dec. 17 (UNS)—(delayed b censor)—Red goon squads today were blame for last night's bombing of an American lega tion automobile, and the wounding of J. W Baker, of Washington, D. C., legation thir secretary. The bomb was planted in Mr. Ba ker's car while it was parked in front of h home. Baker will survive.

Admiral Randolph Blankenhorn, America minister to Hungary, said, "This is an obviou attempt to frighten us out of the country. The won't get away with *(Continued on page 4*

Cooling Idea

THERE ARE THOSE who say it just wouldn't seem like summer without e famous Four Roses cake of iee.

So here it is again—a timely reminder how gloriously eool and refreshing a our-Roses-and-ice-and-soda ean be.

If you'll follow our suggestion and try e—at home, or at your favorite bar—u'll quickly discover that you're sip-ng a highball that's very much on the ecial side, with a mellow magnificence and distinctive flavor all its own.

That's because Four Roses itself is such a speeial whiskey—delightfully *dif-ferent* from other fine whiskies you've known in the past.

Right now would be a wonderful time to find this out, don't you think?

PLENTY OF TIME FOR LOVE

Continued from page 12

hear me out. When I have done, we shall part. But I shall carry concealed in my heart like a bleeding rose the—"

"Hello," said Eldreth, looking through the door. "Practicing a speech for a play?"

"Well, not exactly."

Eldreth went in. She was a tall woman of twenty-six or -seven, her dark hair worn in an almost affectedly severe arrangement.

ELDRETH HENNING lived with the McCrorys. She was a cousin of Papa's, a young widow of rather mysterious antecedents who had come to Stapleton when her husband lost his life in the Merchant Marine. She supported herself at present by giving piano lessons to the children of the town. She was not overtalkative, and Jane had endowed her with a hundred imaginary biographies.

"I once played in Medea," Eldreth said. " 'He, whose well-being was my greatest happiness, the lord of my soul, has become the basest of men!' " Then she treated Jane to one of her rare smiles. "You shouldn't be pursuing the tragic Muse at your age. What's the matter now?"

"Oh, this Livy and Aunt Martha and Oliver and everything. Were you really on the stage, Eldreth?"

"Well, I was and I wasn't," said Eldreth cryptically. "Here, let me help you with the Livy."

The eighteen pages didn't seem too burdensome with Eldreth to help. Jane finally said, "Do you think a marriage between a girl and a much older man has any chance of success?"

"That all depends. How much older?"

"Oh, I don't know exactly. About a year or so. He's a senior and I'm—I mean, the girl's a junior in high school."

Eldreth laughed. "I don't want to sound like Aunt Martha, but I'd say you had plenty of time yet to think about love."

"How old were you when you first fell in love?"

Eldreth went to the mirror and surveyed her reflection in it. "I had the leads in several college plays, and then a boy came along and somehow the stage didn't matter any longer. When you're that young, love is all cobwebs and dreams."

"Was he the one that died?"

"Yes. And now I've got more problem children on my hands than if I'd had ten marriages—you and Oliver being by no means the least of them. I stayed in here to help with the Livy, not to—"

Jane looked up, startled. "What was that?"

"What?"

"Eldreth, I absolutely and distinctly heard someone cough in this room. There's someone in here!"

"Mippity, pippity, kibble and coo," came a singsong voice from underneath the bed. "Jane McCrory loves Johnny Ballou. Ha, ha."

"Oliver!" exclaimed Jane, horrified. She dragged the culprit into the open. "How dare you, you—you gruesome creature!"

Oliver, disheveled but unperturbed, said, "I came in here because Franklyn is lost and I thought maybe he might of snuck under your bed. When you come in I figured I'd stay there because you get so excited about everything." He turned to Eldreth and asked innocently, "I'm in the third grade. Do I have plenty of time yet to think about love, Aunt Eldreth?"

"I've a notion to put you over my knee," said Eldreth, half joking.

Oliver managed to beat a dignified retreat. "G'by, everybody!" . . .

Papa was in one of his absent-minded moods at dinner. Absorbed in his profession as one of Stapleton's practicing physicians, he had been somewhat imposed upon until Aunt Martha had come to manage his household after the death of his wife.

"But you aren't *listening!*" Jane exclaimed at dinner table.

"Of course I'm listening, if only subconsciously." Papa smiled. "Something about a new friend of yours named Franklyn."

"Franklyn," explained Eldreth, "is a frog that Oliver's let loose in the house."

"It's time something was done about that child," Jane said. "He's inhuman."

"Well, young man," said Papa to Oliver, "why do you persist in doing these things?"

"Me?" said Oliver. "I dunno. I'm inhuman. Kin I have your pudding if you don't want it, Aunt Eldreth?"

CHALLENGE TO AUTHORS

In next week's issue, Collier's begins publication of the STAR STORY. A STAR STORY will appear in each issue. It will be, in our opinion, The Best Story of the Week. For every STAR STORY Collier's will pay $1,000 in addition to the purchase price. This is our Challenge To Authors and friendly salute to our readers.

FOR THE BEST IN FICTION READ COLLIER'S!

"Well, there it is," said Papa, amused. "He admits he's inhuman. I dare say he's beyond the help of medical science."

At this point the telephone in the hall began jingling. "I'll get it," said Jane.

While Jane was outside chatting, Papa turned to Eldreth: "Well, how do the lessons go?"

"Oh, all right," said Eldreth. "Sometimes I feel like an inquisitor. The little ruffians would rather be out kicking a football around, and here I am saying, 'No, no, no! B-flat, Mortimer.' "

"Oh, but definitely," Jane was saying on the phone. "I'll have to manage it, Lucille—you know the problems one has. The central wing at eight. 'By for now. G'by."

Papa had to go to a meeting after dinner. Eldreth said, "I'm going out, too. I've an appointment to keep." Then Aunt Martha announced that she had set her mind on seeing a new picture at the Bijou.

"But that leaves me here all alone with Oliver!" Jane said. "I just told Lucille I'd meet her in the library. We're going to study."

"Then call her up and say you spoke too hastily," said Papa.

"But, Papa! I mean, this is Kismet, it really is. Livy all afternoon, and Oliver all evening. Gosh, couldn't you take Oliver with you, Aunt Martha?"

"Oliver sees too many movies as it is," Aunt Martha declared.

When the others had left, Jane cast a baneful eye on her brother. "Honestly, I believe you take a delight in making my life miserable."

"Who, me?" Oliver cocked his head innocently to one side. "How come you haff to go to that liberry to study? Is it on account of Johnny Ballou is liable to haff to go there to study too?"

"Oliver McCrory, I could—honestly, I could wring your neck!"

"You know what?" said Oliver. "Sposen you went out and I jist never noticed it, why then you could come home early, and who'd know?"

Jane was in something of a quandary. The attraction of the library was very strong. After all, why should a grown boy of nine need a baby sitter? "All right. But what'll you do by yourself while I'm out?"

"Oh, I got a lot of work to do on my television set down in the basement."

"What television set?"

"It's a ole radio that don't work good. I'm still in the experimental state with it."

"Okay," said Jane. A wave of affection for Oliver welled up in her. "Here's a quarter. Tomorrow you can go out and make yourself sick on ice cream."

It was sheer coincidence that Jane failed to notice the familiar figures of a man and a woman crossing the lawn in front of the library.

"Where shall we walk?" said the man.

"Oh, in Linden Lane, I suppose," said Eldreth. "A phrase has been running through my head all afternoon. I was helping Jane with her Livy, and she wanted to know how old I was when I first fell in love. She has a crush on some kid named Johnny Ballou. I told her when you're young, love is all cobwebs and dreams. I'm wondering whether it isn't all cobwebs and dreams at any time."

"Maybe." He pushed some tobacco into the bowl of his pipe.

"What's it like to you, Howard?"

"What is what like?"

"Love."

"H'm. You, I guess. I think about you. Your life. The kind of courage you have—unspectacular. Coming to this small town, giving kids piano lessons, making something whole out of something broken."

"Were you ever in love before?" Eldreth added hastily, "I didn't mean to ask that. Don't answer."

He smiled. "Yes. She was the most beautiful creature who ever existe Italian girl. She's dead."

"Oh! I'm sorry—"

"That's all right." He laughed. had been dead for thirteen hu years when they found her. A p discovered the stone coffin in a fie ing the 15th century. All Rome insane over her beauty, which w fectly preserved. I was enchanted story when I came across it." He with mock seriousness. "Perhaps right. Maybe love is cobweb dreams at any time."

She reached for his hand. "Yo wonderful person, Howard," sh "I don't think anybody appreciat —but me. I'm glad I came here well, and found you."

He laughed. "You're not qu beautiful as Julia, but you're pr much more practical."

"Julia?"

"The Roman princess." . . .

Jane, meanwhile, had met Lu the center wing of the library. Condon and Johnny Ballou hap as it were, to be doing some rese chemistry. The library seemed ward, so they went for sodas at M Drugstore. On her way home Jan still feel the warm place where h had rested inside Johnny's. Whe parted, a court match had been upon for the following afternoo stars winked mysteriously at her approached her home. Her hea or less in the clouds, she ran into in a tweed topcoat.

"Awfully sorry," he said. His had been knocked askew and he to adjust them. "Good evening McCrory."

"Fisheyes!" Jane stammered G-good evening, Mr. Harringto is my street. I'm on my way hom the library. Good night, Mr. H ton."

"Good night," said Fisheyes.

IT WAS tough enough to end stares of Fisheyes during the da out bumping into him at nig thought. People like that wer man. Her momentary irritation short by the sudden knowled practically every light was on in rack. With a shock her mind adj self to the fact that more than thr had disappeared somewhere i void. Something frightful had in her absence, that much was pl dashed up the rickety steps of t porch, her heart in her mouth.

"What's the matter, Aunt M

"Matter enough." Aunt Mart pression was fixed in a mold as plaster cast. Eldreth apparen just come in.

Jane turned to Eldreth. . "Wh pened?"

Eldreth shook her head absen edly. Aunt Martha said, "I'll th to accompany me into the b young lady."

They went down the narrow s Jane was horror-stricken by t that met her eyes. Sections o pipes lay all over the basement. Crory was shoveling soot into Oliver, holding the dustpan, v ered with black grime. But m ble of all to behold were Aunt curtains on their stretchers. Pap up. "Ah, Jane. I presume you the library after all."

"Yes," said Jane. "I thought-

"William," interrupted Aunt "may I ask what you intend doi this young woman? Just *look* curtains I slaved over all aftern

"Now, now," said Papa sc "Let's not cry over spilled soot.

Firestone

SUPER-BALLOONS

GIVE YOU A RIDE AS SOFT AND AS SMOOTH AS A MAGIC CARPET

NOW ON SALE FOR 1941 OR LATER MODEL CARS

Super-Comfort

Here is the latest sensation in riding and driving luxury, made by Firestone, originator of the first balloon tire. The new Firestone Super-Balloon holds MORE air at LOWER pressure. You can drive farther, faster, with less fatigue because it absorbs the shocks of rocks, bumps and rough roads instead of transmitting them to you and your car.

Super-Safety

Exclusive Firestone Skid-Resistors in the tread and larger area of contact with the road provide unequalled protection against skidding.

Super-Economy

In addition to giving you long mileage, this tire saves you money on repair bills. There are fewer trips to the repair shop, less wear on parts.

Super-Style

Firestone Super-Balloons are being featured on the new model cars. But you do not have to wait until you get a new car to enjoy their advantages. Your nearby Firestone Dealer or Store will put a set of Firestone Super-Balloons on your present car TODAY!

E TIRES THAT ARE FEATURED ON THE NEW MODEL CARS

the Voice of Firestone every Monday evening over NBC

Always use **COLGATE DENTAL CREAM** *after you eat and before every date*

Oliver didn't knock the pipes down deliberately."

Oliver said, "I figured this frog, this Franklyn, must of snuck down the ventilator from Jane's room and got caught in the hot-air pipe. I was tryin' to bring in some television when I heard him croakin' up there. First I climbed inside the furnace and tried to reach him with my hand. Then I got up on a chair and banged at the pipe with that there broomstick. How did I know the pipes'd all come apart the first minute somebody went ahead and banged 'em?"

"Did you finally rescue the frog?" asked Papa.

"No, sir. I guess he got lost again in the shuffle."

"Just look at my curtains," Aunt Martha said to Eldreth. "I declare, this house lacks the slightest evidence of discipline." Turning to her brother she said, "If Jane hadn't gone out in pursuit of her own selfish ends this wouldn't have happened. Well, William, one satisfaction I demand: I must have it understood that Jane stays in tomorrow afternoon and rewashes these curtains."

"That seems fair enough," said Papa mildly.

AT THE thought of again being prevented from keeping her date on the courts with Johnny, Jane's heart turned into a leaden ball. "All right, Papa. I told you to do something about this gruesome little boy, but you wouldn't. Now I have to stay in and—"

When Oliver was washed and ready for bed Jane cornered him outside his bedroom. "Come here."

"Me?"

"Where's that quarter I gave you?"

"Oh, that." He fished it out of his pocket. "Indian giver!"

"You're Kismet, that's what you are!" Jane railed at him. "You're positively and absolutely inhuman. There's just really no point in talking to you. Go to bed!"

"G'night," said Oliver imperturbably. "I'm Kismet, that's who I am. Ha, ha."

Jane climbed into bed and turned out the light. In her mind she recreated Johnny Ballou's magic smile and deep laughter. Maybe his interest was not merely athletic and professional. Maybe— She leaped up, shrieking. Something cold had touched her forehead. "Papa! Eldreth!"

Eldreth came running in, followed by Oliver. "Aw, don't be a-scared," said Oliver reassuringly. The frog was sitting unconcernedly on Jane's pillow. "It's only Franklyn, that's all." . . .

Jane was unable to find words to describe her predicament to Lucille the following day. To add to her case against Fate, Fisheyes Harrington religiously avoided calling upon her after she had given her all to Livy. "It's definitely and completely unconscionable!" she complained to Lucille at lunchtime. "Washing curtains—and by hand! Why did everybody have to go out last night? Where was Aunt Eldreth? I think she's a mystery woman, Lucille. She goes out at night, and nobody ever knows where. What am I going to say to Johnny? After all, I mean, one can't stand up an athlete like Johnny Ballou twice in succession."

Lucille offered to come over and help her with the curtains. "After all, if a person's best friend is in trouble, well, I guess there's no sacrifice too great for that best friend to make."

Jane was touched. "I wouldn't think of it, Lucille. It's just too gruesome to think of. And all on account of a darned frog. What *will* I say to Johnny?"

"Don't say anything. I'll see if I can make up some excuse."

On her way home from school Jane heaved a series of abysmal sighs. It seemed as though fate had decided to choose her as its plaything. She wondered if Eldreth would be sympathetic to her problem. Probably not. Eldreth ha own mysterious concerns. She wouldn't understand about love—el persons of twenty-six or -seven no l vibrated to the poetry of romance there wasn't anywhere she could tu understanding. She sighed again, cluding that she had been made to the whims of outrageous fortune sil

When she arrived home Aunt M was out, but there was a note which *"Jane. I expect to find the cu washed and dazzling white on m turn."* Getting into one of Aunt Ma ugly aprons, which went twice a her, she let the water run and du three boxes of soap flakes in the swishing them into a foam with a cake turner. Lifting the soot-staine tains distastefully with her forefi she lowered them into the water. Sh working the inert things up and her hair straggling over her fore when the sound of a masculine startled her. Through the spots in of her eyes she made out the fa Johnny Ballou. Please, Lord, she p Let this be a hallucination. But it w

"I hope you don't mind my dro by." He wore a white sweater with red S on the chest, and his rackets under his arm. "I wanted to see moment."

"Oh, not at all! I suppose Lucil *kind* enough to tell you where I wa what I was doing?"

Johnny chuckled. "No. I haven Lucille. I ran into Oliver on m from school and he told me he'd kn down some pipes and they were h you responsible."

"Honestly, Johnny, that broth mine is utterly impossible!"

"Well, I just wanted to say again think you have a good chance of m the interscholastic if you can get e practice between now and next we you could get in a solid week of noons with me, I even think you win the singles. So see what you c Lock Oliver in the coalbin or som Anyway, since you couldn't make afternoon I thought I'd stop by a 'chin up' or words to that effect."

"I'll try to get out, Johnny. I h and truly will. It's frightfully kind to be so encouraging."

"Okay. See you soon."

JANE hardly knew whether t happy or sad. A solid week of noons with Johnny Ballou! Bu chance would there be to arrange f such things?

"Who was that?" asked Eldreth ing in as young Ballou made his w

"Just about the most popular in the whole school, that's all. He I could win the interscholastic si my afternoons were free for a week. But I guess there's no chanc one thing my Ancient Lit comes afternoons. I have to grind on tha rington has no soul. Honestly, E he's inhuman. I mean, he just nev a thought to anything but that d Latin. It wouldn't be any use askin eyes for a favor. He just doesn't this world."

"Fisheyes," said Eldreth. "Is th they call the new Ancient Lit te

"It's those glasses, I guess. A he's inhuman."

"You like this Johnny Ballou don't you?" said Eldreth.

"Well, I mean, after all! Wh greatest star we've ever had invi out for a solid week of afterno mean, 'like' isn't precisely and the right word."

"H'm," said Eldreth specul Then finally, "We'll see."

"See what?"

"Oh, I have a little idea. If it's tion of being excused from a week cient Lit, maybe that can be arr

"But you don't know Fisheyes!

"Possibly not. We'll see. I'm g

n now. I'll talk to you about it again ght."

ne resumed her curtain washing. Her s were not too bright, even with th's encouragement. After all, what l Eldreth do? Oliver sauntered in, rupting her thoughts.

Lo."

ou're just the one person I've been ng to see," Jane pointed to a spot a inches from her feet. "Come here."

What do you want?" said Oliver wa-

ome *here!*"

sidled over reluctantly, cautious of thcoming box on the ear.

hat do you mean by telling Johnny u I was down in the basement wash- urtains?"

didn't mean anything," Oliver pro- d. "Kin I help it if that's what you doin'?"

h, no. You never can help anything. me somebody told you the facts of Oliver. When somebody knows body that they think the world of, don't want that person to see them ing curtains. It's—it's demeaning, bsolutely and completely demean- hat's what it is!"

a, ha," said Oliver. "Washin' cur- ain't nothin' to see. I seen two lov- ssin' each other in the dark."

hat do you mean, you gruesome ? Who did you see?"

h, not you. I was outside the other lookin' for the ball I lost on the I got my head caught in the picket and couldn't get it out for a while. I seen Aunt Eldreth come along a man, and she kissed him in front e gate. About nine times."

ldreth!" Jane exclaimed. "You're y and absolutely out of your mind. th never kissed any man in front of te and you know it. Don't you ever say such a thing to anyone again!"

kay," said Oliver. "G'by."

hen Oliver was gone, she went back more to her task. The whole thing Kismet, she decided. She'd never win nterscholastic singles. There'd never ything but sad memories between lf and Johnny. Cobwebs and ns, that's all love was. . . .

for Eldreth, she went directly to Harrington. "I'm sorry to come in u like this, but there's something I to discuss with you."

'. Harrington rose from behind his He removed his glasses, and there two little red marks where they ed against his nose. "Of course."

wonder if it's possible to excuse for a week from her Ancient Lit s? It's much more important to han it may sound to you or me."

"In what way is it important?"

Eldreth said, "She has a chance to win some contest or other, and to see more of a young man she seems very fond of. When you're young, these things make a great deal of difference."

The instructor took a pipe from his tweed coat and stuffed it full of tobacco. "Well, I dare say it can be arranged. Her work in Ancient Lit's been better than average. Do you mind if I smoke?"

"No. Of course not." She paused hesitantly, then finally spoke again: "Did you know that—well, that all the students call you Fisheyes?"

He laughed outright. "I'd feel insecure in this job if they didn't. A teacher without a nickname is practically no teacher at all."

"Then I can tell Jane it's all right?" He nodded. "Thanks very much, Howard. Shall I see you the same time tonight?"

"Of course. Goodby, my dear."

IT WAS between sets of doubles the following afternoon. What Johnny Ballou was wondering was why he and Ralph Condon were thoroughly sweat-soaked, while the young ladies seemed after their efforts as pink and fresh as powder puffs. Jane was wondering something entirely different. Changing courts, she had a few moments conversation with Johnny.

"I don't get it," she said.

"We'll take them this time, don't worry."

"I don't mean that. I mean Eldreth. Fisheyes is the toughest nut to crack in the whole school. Yet she goes over there to see him, and in five minutes has me excused for a whole week."

Johnny looked down at his partner with a certain air of amusement. "You're a delightful character," he told her. "Let's not spend all our time on tennis. Let's go one place and another when we're through. And let me have you over to meet Mother and Dad."

To conceal her inner excitement Jane said, "What do you mean, I'm a character?"

Johnny grinned. "Eldreth and Harrington. Everybody knows they're bound for the altar—everybody in town but you."

"Hey!" cried Lucille. "Is this tennis or afternoon tea?"

"Tennis," Johnny called. Turning to Jane, he murmured, "Let's get this over with, and then go for a spin to the beach in my jerker."

Jane nodded her head, still bewildered. "Cobwebs and dreams," she murmured absently. "That's what it is, cobwebs and dreams."

THE END

"Just see if that Stephens woman doesn't make poor Mr. Larkin late again for bingo!"

There's a word for good Peanuts ...and Peanut Candy

YES, folks know that PLANTERS is the word for peanuts. Only the world's peanut experts can roast and salt peanuts the way PLANTERS do. Only PLANTERS can make those big Jumbo Blocks taste so good.

You'll love those big, fine Virginia peanuts, roasted and salted to crisp perfection. In the cellophane bag, they're famous as America's Nickel Lunch. More energy in them than in meat—fish or eggs.

And PLANTERS famous Jumbo Block is equally delicious—equally satisfying. Real, pure peanut candy at its very best. They're both only 5c each —both Planterrific!

These PLANTERS products are also made in Toronto, and sold everywhere in Canada.

PLANTERS is the word for PEANUTS

THE LOGGER AND THE LADY

Continued from page 23

looked up. "Are you nuts?" she said. "You only blew in yesterday."

"That's right," Ric said, "and now I'm blowing out."

"If it's just that you got rolled again," Brady said, "I can get you an advance from Blundell & Ryan. What's eating you, Truro?"

"If you have to know," Ric said, short and cranky, "I got busted at poker. Make her out to Jamiesons' at Summer Harbor, Joe."

"Jamieson's?" Brady took his cigar out of his mouth, which is something he doesn't often do. "Mister," he said, "now I know you're bushed. Jamiesons' is a hell of a layout. The owner's a kid fresh out of college and her super's the thief of the coast. You don't want that."

"You heard me," Ric said. "Jamiesons' or nowhere."

"Then it's nowhere," Brady snapped. "I won't send a good man to that stump-ranch even if he has jolted a screw loose."

"Yes you will," Ric said. "I'm going to squat right here till you do."

And he did. Joe Brady was stubborn too, but when Ric had tramped in at opening time four days running and planked himself on the waiting bench, Brady cracked. He shot his cigar into his big brass spittoon and grabbed his phone and called Jamiesons' town office.

"I've got a boy here wants to work for you," he said, "don't ask me why. A truck skinner by the name of Truro."

WHEN he slapped the phone back in its cradle a couple of seconds later, he was wearing a sour grin under his eyeshade. "The answer is no," he told Ric. "Miss Jamieson says she don't need any truck skinners, especially skinners called Truro."

"I'm going to Summer Harbor," Ric said, and settled himself back on the bench. "Keep hitting her, Joe."

Morning and afternoon, Brady kept trying, and each time he phoned, the redhead gave him a brush-off. On the eighth morning he jammed his hat on over his eyeshade and reached for his jacket, and took Ric Truro out for a drink, something he'd never been known to do for a tame ape before.

"Now look," he said when he'd salted his beer and blown off the froth, "I'm going to talk to you like a father. Jamiesons' aren't just cheap, they're haywire. Janet Jamieson don't know one side of a tree from the other, and Blackjack Mike Halloran, her camp push, is running the outfit into the ground. You put this notion out of your head, Ric, and Blundell & Ryan will take you on as a salary man. You'll be pushing camp for them inside of a year."

Ric finished off his beer. "Let's get back to the office, Joe," he said. "Time we were hitting her again."

Brady phoned, and this time he was almost crying. "Miss Jamieson," he said, "this goof is driving me wacky. Take him off my hands and I'll give you a second-loader and four good chokermen to boot!"

He listened a minute, gnawing his cigar, then hung up. "Well," he said, "you win. And remember, mister, you asked for it. Catch the night boat." . . .

They didn't exactly welcome Ric Truro aboard the Marlum when he toted his packsack and suitcase up her gangplank at eight o'clock. The winchman spat through the gap in his front teeth, and the mate gave Ric a mean glare from the bridge wing.

"Back so soon?" the purser said, scowling through his wicket. "Ye'll no be wanting the same quarters, I trust."

"Any cabin at all," Ric told him.

"A'm refairing to the wee cage below," said the purser, "and it's there ye'll go do ye put so much as a look or a worrrd on the Jamieson lassie this trip. She has troubles enough wi'oot a great timber beast like yersel' fleering after her."

Ric's heart hit his ribs a double kick like a brakeman hopping off a long train. "She on board?" he asked.

"Aye," the purser told him dourly. "She and Blackjack Mike Halloran that's been explaining the company books to her in toon. And I repeat, Muster Truro, ye'll let her strictly alone. She's a lady, and ye're no but a tame ape!"

She wasn't in the lounge and she wasn't in the coffee bar, but along toward evening Ric found her on the main deck up past the forward cargo winch. She was watching the sunset from the Marlum's rusty bows with a white coat over her shoulders and her cedar-colored hair blowing back in the west wind.

"Hello, babe," Ric said.

She stiffened, but when she turned she didn't seem at all surprised. "Mr. Truro," she said, "I think we should understand each other. I hired you for one reason only—because my superintendent tells me we need truck drivers. If you make a nuisance I can fire you just as easily."

"No you can't," Ric told her. "Not till I've worked out my return fare. I figure we should understand each other too. For instance I'm curious to know if you clipped me in that poker session the other night."

"Of course I didn't," she snapped at him, every word an icicle. "It wasn't necessary. I simply applied the principles my father taught me. I wanted to drive a lesson through your thick skull."

"You did that all right," Ric said. "You taught me not to play poker with pretty redheads." He hauled out the envelope, crumpled and ratty by now, and shoved it at her. "Here you go, babe. She's fifty short, but you can knock that off my first month's time."

"No!" she said, and whipped both hands into her coat pockets. "I hate gambling. I won't take it!"

"Sweetheart," Ric told her, still pleasant and polite but kind of edging up on her, "you may be fresh out of college and a boss logger, but you'll take this or get spanked."

Her eyes went round as saucers, and she squeezed as far into the bows as she could get. "You keep away from me," she gasped at him. "If you dare touch me, you—you big gorilla, I'll—"

Ric Truro reached for her and his heart kicked him again, only a lot harder this time. Then he was holding her close and had planted one kiss on her l mouth and was lining her up for an A hand clamped on his shoulder swung round, real reluctant, and s fist the size of a choker hook c for his chin, but not in time to duc

When he woke, he was sprawled Marlum's lockup with his suitca his chest and his packsack for a pill

Hell, he thought, his head still this place is getting to feel like hon

BRIGHT and early next mornin purser banged on the lockup d

"Summer Harbor," he told Ric. ye leave us, Muster Truro."

"Who slugged me?" Ric asked He'd never been hit that hard b and all night, when he wasn't pu over why he'd kissed the redhead he meant to paddle her, he'd been dering who owned that choker-hoc

"Why, Blackjack Mike Hallor course," the purser told him wh fumbled with the key, "as I wan he would. He was for putting the to ye as ye lay there sucking but the lassie stoppit him, a'm so say."

"Well," Ric said, still rubbing jaw, "that's something, Mac. wouldn't do that if she hadn't t shine to me. Anyhow, she kiss right back."

"Nothing o' the sort!" said the and he sounded downright scand "She's a lady. An orphan in a v full o' such wicked limbs as Ha who has gi'en her camp so evil a that no proper mon will sign Jamiesons'. Just brawlers and w dle-footed kelpies like yersel'."

"Then why don't she can thi loran?" Ric asked.

"Because he has a contract, ye the purser told him, "and his contr two years still to run. And bef time's oot, the company will be rupt from his mismanagement, be bought wi' money he's already from it."

"Mac," Ric told him, solemn an "that kid needs someone to loo her. I'm electing myself to the jo

jumps ahead of a faller's ax. And soon as ever he saw Blackjack Mike Halloran, he judged that Joe Brady and the Marlinn's purser had been singing off the right page.

That was right after Ric had spotted his trailer under the loading boom on his first trip up from the beach. He was killing a smoke in the truck cab when a dude who looked closer to seven feet high than six tramped in from the haulback bight. He was wearing a black-and-white checked shirt with a furry chest bulging out of it, pants stagged at his boot tops, and a red rain-test hat tipped back on his hair. And when he hollered, his voice sent the ravens kiting for the green timber.

"Hey!" he yelled at Ric. "What the hell kind of short-logger's load you call that?"

"Nothing wrong with her that I can see," Ric told him, sitting easy in his cab.

Blackjack Mike didn't answer him, just jumped to the brow-log of the landing and heaved the poor old creep of a head loader aside. He grabbed the loading tongs and slung them into a boom-stick butt. The leverman on the donkey engine hoisted away, all in a rush as if he was scared not to, the second loader threw his tongs, and Ric felt the trailer settle hard on her rub irons as the boom stick jolted into place atop his load.

"There!" Blackjack Mike bawled at him. "That's what we call a load on this claim, Mister. Wheel her away."

A highball skinner doesn't have to take sass even from an owner, but Ric hadn't yet figured how he could help the redhead keep her outfit off the rocks. So he just stamped out his cigarette, while Blackjack Mike gave him a nasty grin from the brow-log, and set his truck rolling down the grade with that oversize boom-stick peaker wagging ten feet past the top of the cab.

Jamiesons' road drops twenty-two hundred feet in the nine miles between green timber and tidewater, and except for two or three flats, she's just one long widow-making hill. But as he highballed down with his load, Ric hardly thought once of the big brown logs pyramided behind him. His mind just kept churning away at how he could run Blackjack Mike Halloran off the claim.

He was still studying on it, and getting nowhere, when he rounded a bend in the canyon stretch and saw an upbound jeep not forty feet below. There was room to pass, but logging trucks are just about the biggest rigs that roll on rubber, and a driver that's not used to them feels like a bug about to be trampled by an elephant when he meets one head on. Even while Ric gave his sixteen wheels the air, he knew the jeep wasn't going to make it. He leaned into the steering wheel and swung his truck out toward the edge, knowing there wasn't more than a logger's prayer between his off tires and a four-hundred-foot dive into Summer Creek. The jeep scraped past, but Ric heard part of his load go bouncing and crashing into the canyon.

HE STOPPED on the next little flat, and hopped out for a look-see. The boom-stick peaker and three other logs were gone, and Ric Truro sure did hate to lose a log. But he wasn't worrying about that, because as he stared at what was left of his load, it all of a sudden came to him how Blackjack Mike was thieving off the redhead. Only three of those logs carried the company brand stamped into their butts, and a log without a brand is money in the bank for anyone who can weasel it out of the booming grounds at tidewater.

Ric was still staring when feet scuffed in the gravel behind him, and he turned to see Janet Jamieson, panting and breathless as if she'd run a quarter mile, which she probably had. She was rigged out in green corduroy slacks with the cuffs rolled logger-style, and little caulked boots with fringed false to and a high-necked white sweater.

"Look, babe," Ric said to her, "got other trucks, but the Lord onl me one neck. What's the idea?"

"I'm sorry," she said. "I guess it was my fault. I—well, I had thi my mind. You're all right?"

"Sure." Ric patted the running and she sat down beside him as knees were weak too. "Why wou be?"

"I was afraid—that is, I thoug Halloran might have hurt you. last night, I mean."

"S'pose he had?" Ric asked her.

"I don't know," she said. "Tha trouble, Mr. Truro."

THEY sat on the running boar ing down at their boots for spell. Then Janet said, "Will you kiss me again?"

Ric said, "Huh?"

"Don't get any silly ideas," Jan "It's just scientific curiosity. I've a—a disorganized state since last Mr. Truro, and I can't take steps rect it until I know the reason, ca

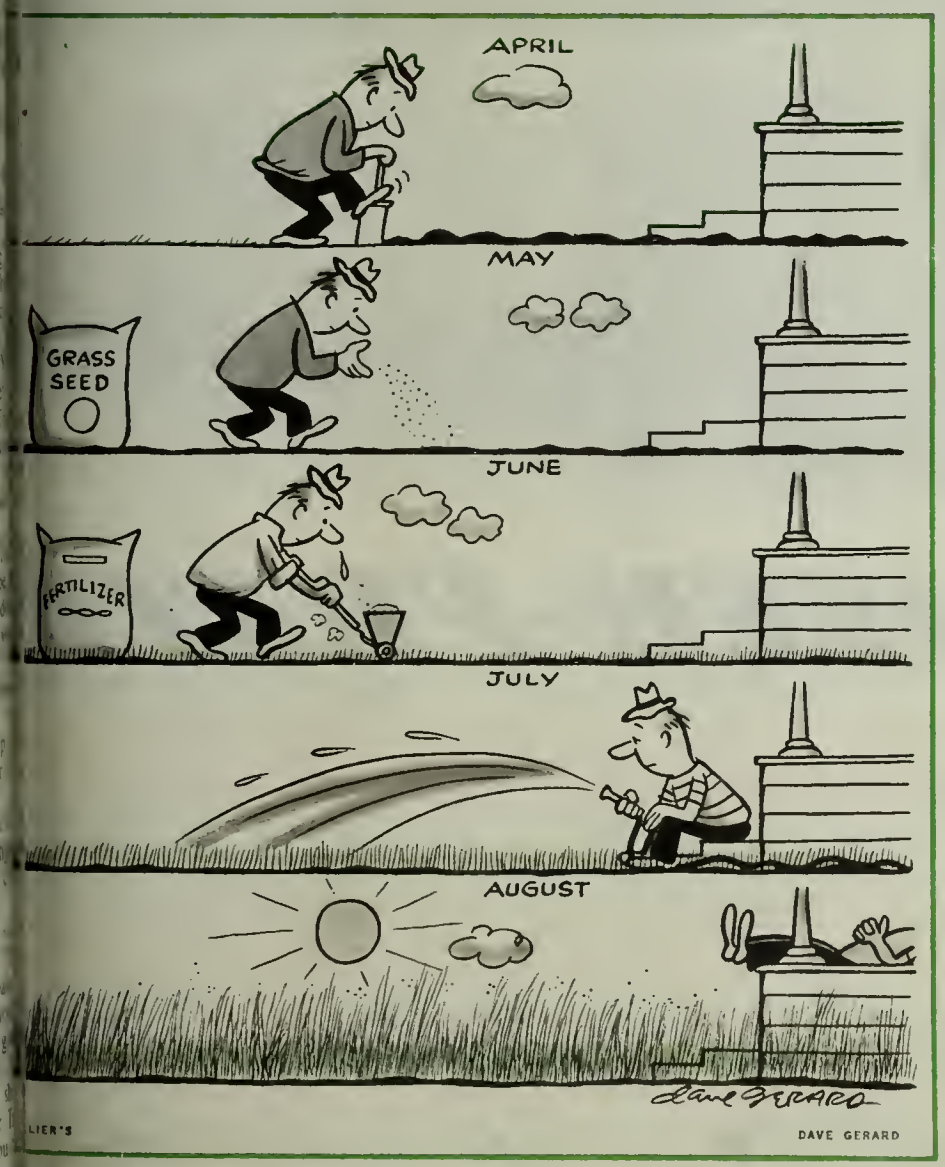
cards went *wheet—wheet—wheet* gh her slim white fingers. Black-jack Mike smeared more sweat off his face. The scaler reached a shaking hand to an ash tray and fumbled the lighted end of a cigarette into his mouth.

There never was a game like that on the Marlum before, and they say there's never likely to be again. By the time they put in at Race Point, the redhead had Blackjack Mike's contract in her handbag, and in another hour she'd cleaned Pete Kyle right down to the loose silver in his pockets. At Campbell River, Blackjack Mike was too broke even to write another check, and Ric, who'd been holding even all this time, of a sudden began to win. With the lights of Comox in sight, he found that as well as having better than two thousand bucks in checks, he was a boss logger holding a half interest in Jamiesons', won off the redhead with the only royal flush he'd ever been dealt in his life.



"So much for that," Janet said. She straightened the deck, and there was nothing at all cool about her smile. "One other thing, Mr. Truro. I've changed my mind. It was—very conclusive."

And that's all there was to it, except after the redhead had walked out of the lounge, leaving just a touch of hyacinth behind her, Blackjack Mike got back enough of his nerve to hint she'd had those cards pretty well trained, and of course a boss logger like Ric Truro doesn't stand for any such talk about his girl. They say it was the best battle ever staged on the Marlum. They battled from Whaletown clear to Blubber Bay before Ric came up from under the wreck of a table and laid Blackjack Mike cold with a fire extinguisher.

"It grieves me to say it," the purser told Ric as he turned his key in the lockup door, "but there's other quarters bespoken for ye next trip up." Hard as it was to believe, the look on his ugly little red face couldn't be anything else but a grin. "A'm refairing to oor bridal suite, Muster Truro."

She's no liner, the Marlum, but she's a great old tub just the same. Anything can happen on board her—and you'd be surprised how often it does!

THE WEEK'S MAIL

Continued from page 4

certainly seeing his worst fears realized. I quote from it: ". . . Will Joe Stalin be as charitable toward democracy in that great day as he is in the day when the two biggest democracies are rushing to the help of his hard-pressed regime? Or will he try to slip his Communist ideas in whole or in part into the peace treaty or treaties? Will he go on subsidizing subversive Communist groups in other countries; or will he subscribe wholeheartedly to the Roosevelt-Churchill doctrine that every country has the right to the form of government its people prefer?

"Let's not forget Joe's kind words for democracy in the summer of 1941. Let's remind him of them, vigorously, when and if he shows signs of going back on them."

RAYMOND G. HAMEL, Lawrence, Mass.

SCHOOLBOY FAY

GENTLEMEN: It seems to me that a great national weekly like Collier's, with its former great sporting writers like Walter Camp and Grantland Rice, could do much better than this William Fay, who is currently doing sports for you. In his column of July 10th he complained of Manager Eddie Dyers' decision to use Schoolboy Rowe as a pinch hitter because he (Rowe) batted ninth in the Phillies' line-up. May I ask just where the hell any other pitcher (American or National) bats?

WINSTON H. REUFFER, Lansing, Mich.

THE HOUSE THAT JERRY BUILT

DEAR MR. DAVENPORT: I read with interest and disgust the first installment of Collier's story about the gypping of G.I.s in the housing racket (Scandals in Veterans' Housing, July 3d).

Your article cannot but create a generally false impression.

The real responsibility for the quality of houses built under FHA authority rests upon the government itself. FHA is charged with the duty of *inspecting* houses not only *while* they are in process of construction, but also *after* they're finished.

The monthly payments required of the buyers of such houses are far below the current rentals of comparable houses offered to tenants. Disregarding quality and durability, "buyers" are, in ultimate analysis, getting mighty cheap housing.

The real pay-off—the big scandal—will come when the "Guv'ment," meaning the taxpayers, has to take the tremendous losses that will eventually be incurred.

E. A. GENE HARRIS, San Antonio, Texas

. . . It seems to me that during the past year so much publicity has been given to the unscrupulous and profit-grabbing people in the building industry that the sincere, established builder has become the forgotten man.

WILLIAM F. SIEGEL, River Edge, N. J.

. . . It seems to me that the conditions described are a fair sample of the sort of thing one could expect if the government went into big-scale housing, as so many people think it should. Too many persons in this country sit in their easy chairs and yell for the government to do this, that and the other; one of these days they'll wake up to find the government running their business and their lives as well.

WILBUR W. DE ATLEY,
Niagara Falls, N. Y.

. . . Examples very similar to those reported by Mr. Maisel occurred here in Albuquerque. Repeated complaints by the local inspector for the State Contractors' License Board brought no results.

Your story of no vents for heating appliances, improper floor joists, no subflooring is an old one. Let me add roof flashing made out of old baby-powder cans!

I suggest that veterans who do not get immediate results—not promises from local officials—should take the matt their own hands with competent courageous legal assistance. Eve American Legion won't always help

uch more that he could have told even after V-J Day when the se- bars were down. For while this Cairo conference had plenty in the of "color"—the Pyramids, the x and the extremely chic costumes adame Chiang Kai-shek, about the correspondents could write more skillfully than Hopkins could principal news value was the mere hat it was held; aside from the dec- n assuring the freedom and inde- nce of Korea, the effect of these ngs on the progress of the war or tory was negligible.

ans for a Campaign in Burma

military talks produced a sem- of agreement on an expansion of NAKIM plan to drive the Japanese Burma and reopen the long-sealed ommunications with China: There be a determined ground offensive north by Chinese, British and assigned American troops under ll's field command, coupled with amphibious operations in the south iy under Mountbatten.

urchill viewed the proposals for operations in Burma with scant en- sm: he considered Burma solely as tpost of the Empire, rather than as ea of strategic importance. He d to drive the Japanese out of it, much for the purpose of gaining to China as to avenge a mortal to imperial prestige, and he did lish the idea that the Americans or, especially, the Chinese should have hare in the credit for its liberation. always went along with the propo- that the supply route to China must pened in order to sustain Chinese e and to keep this gigantic mass manity in the war, but it is apparent he did this out of deference to velt's sentiments.

osevelt, however, was determined his conference should be a success the Chinese point of view and he supported firmly by the military ent of the U.S. Chiefs of Staff. was certainly an instance of a sharp n between the British and the icans on nationalistic lines.

Eisenhower's command, harmoni- nd wholehearted co-operation was le because British and American ives could be summed up in one —"Berlin." In southeast Asia, on ther hand, the British and Ameri- were fighting two different wars for nt purposes, and the Kuomintang nment of China was fighting a third or purposes largely its own. I be- t may be said, without descending w level of chauvinism, that Roose- as the only one of the leaders in the war against Japan who adhered to ain military objective of destroying nemy's power and compelling his nder by the most direct means in ortest possible time.

pkins did not set down his views his subject of Allied disunity in t to the Far East and the reader ave to take my word for it that I given a faithful reflection of them. uld not ignore the fact that such ity existed, nor could Roosevelt, hall, King and Arnold, for there too many emphatic and repeated ders of it. Hopkins was certainly hent in his denunciation of any ican who by word or deed tended to vate it while the war was on, but he so one who believed that the record rse than valueless which, like the sun dial, tells only of the "shining " of sweetness and light.

Despite Churchill's obvious reluctance to commit considerable British forces to the proposed campaigns in Burma, Roosevelt at this time went down the line in supporting the view of Chiang Kai-shek, Stilwell, and possibly also of Mountbatten. Therefore, when the generalissimo and Madame departed for Chungking on November 28th, their hopes were high. These hopes, however, were short-lived. The agreement at Cairo did not stick for more than ten days, and it was not until after American forces had started to strangle Japan from the Pacific, in the last six months of the war, that the first trucks started to roll over the Ledo or Stilwell Road from Burma into China. By then it was too late to matter much.

During these days at Cairo, Roosevelt had to spend many hours on the enormous mass of White House papers that had accumulated during his week at sea and been flown from Washington. Included in this were twenty-nine Congressional bills of which he signed twenty-seven and vetoed the other two. It was always necessary for the President to act on these bills within ten days—he could not delegate his authority to anyone in his absence—and this was the consideration which limited the scope of his travel. No previous President could have gone as far from Washington while Congress was in session as Roosevelt did because only the development of the air transport (including the establishment of the intermediate bases) made it possible for documents to be delivered and returned within the ten-day period.

A State Department Career Man

During these days at Cairo, Hopkins formed a friendship with Charles E. Bohlen, a young State Department career man who had been brought along by Harriman from the embassy in Moscow because of his fluency in the Russian language. Hopkins asked him all manner of questions about the Soviet Union and was surprised and impressed by the objectivity and lack of bias as well as by the considerable scholarship revealed in his answers. Hopkins told Bohlen in characteristic words of the low opinion he had formed of many of the Foreign Service men that he had encountered in his travels, describing them as "cookie-pushers, pansies—and usually isolationists to boot."

Bohlen gave so vigorous and intelligent a defense of the State Department, and explanation of the hopeless handicaps under which its personnel often must work, that Hopkins subsequently persuaded the President to appoint Bohlen to a post in the White House where he would act as a liaison officer with the State Department, thereby filling a really long-felt want. From then on, Bohlen's star was very much in the ascendant, and he later became counselor of the department under Secretary Marshall.

On Thursday evening, November 26th, Roosevelt was host at a Thanksgiving dinner at his villa, the residence of Ambassador Alexander C. Kirk, near the Pyramids of Giza some miles west of Cairo. The guests included the Prime Minister, his daughter Sarah, Eden, Winant, Steinhardt and Elliott Roosevelt and Robert Hopkins. Roosevelt proposed Churchill's health and expressed his particular delight that this year he could share the Thanksgiving celebration in company with his great friend, the Prime Minister.

At this point, he seemed to have reached the conclusion of his remarks,

if you're the one who does the cooking.. look at the new

and Churchill arose to respond, but Roosevelt told him that he had not yet finished. He then went on to say that Thanksgiving was traditionally a family festival and that this year Britain and America formed one family which was more united than ever before.

There was a meeting at Cairo of Roosevelt, Churchill and the Combined Chiefs of Staff (Hopkins being the only other civilian present) at which a general survey was made of future European operations in anticipation of the forthcoming discussions with Stalin at Teheran. Churchill gave a lengthy résumé of the general situation, reviewing the long series of Allied successes in the Mediterranean which, in recent weeks, had turned into a succession of disappointments on the Italian front. He urged that, despite the heavy German reinforcements, the Allied campaign there should be pushed more vigorously than ever with a view to capturing Rome—for "whoever holds Rome holds the title deeds of Italy."

He placed particular emphasis on the assurance that he had in no way relaxed his zeal for OVERLORD but he recommended that this major operation should not be such a "tyrant" as to rule out every other activity in the Mediterranean. Among the various activities that he mentioned was the capture of the Island of Rhodes, which had been the ultimate objective of the recent, ill-fated Dodecanese campaign.

The U.S. Chiefs of Staff had no doubt as to just what all this signified. They felt certain that the persistent Prime Minister was resuming the advocacy of strategic diversions into southeastern Europe and away from northern France. They prepared themselves for battles at Teheran in which the American and the Russians would form a united front.

At Teheran, Roosevelt, Hopkins, Leahy, Brown and Major John Boettiger (the President's son-in-law) at first occupied quarters in the American legation. This was at some distance from the compounds of the Russian and British legations, which were close together. Harriman told Roosevelt of Stalin's concern over the strong possibility that there were many enemy agents in the city and the distinguished visitors might be subjected to what was described as "an unhappy incident" (which meant assassination) while driving between their separated residences.

Secret Police Acted as Servants

On the day after his arrival at Teheran —this was Sunday, November 28th— Roosevelt agreed to accept Stalin's invitation to move to a villa in the Russian embassy compound where complete security could be enforced. It certainly was enforced, for the servants who made the beds and cleaned the rooms for Roosevelt's party were all members of the highly efficient NKVD, the secret police, and expressive bulges were plainly discernible under their neat white coats. It was a nervous time for Michael F. Reilly and his White House Secret Service men, who did not like to admit into the President's presence anyone armed with as much as a gold toothpick.

Roosevelt arrived at his new quarters at three o'clock in the afternoon and 15 minutes later Stalin came to call. This was the first meeting of the wartime leaders of the Soviet Union and the United States. Aside from the President and Marshal Stalin, the only two present at this meeting were the interpreters, Bohlen and Pavlov.

Roosevelt greeted Stalin with the statement, "I am glad to see you. I have tried for a long time to bring this about." Stalin, after suitable expressions of pleasure at meeting the President, said that he was to blame for the delay in this meeting; that he had been very occupied because of military matters. Roosevelt asked Stalin how things were going on the Russian front, and Stalin gave a realistic picture of the situation which was somewhat less favorable at the moment than information available to the Western Allies had indicated. Roosevelt said that among the main topics for discussion at Teheran were measures which would bring about the removal of 30 or 40 German divisions from the eastern front and Stalin agreed that such a transfer would be most helpful.

Roosevelt then said that by the end of the war, the American-British merchant fleet would have achieved such proportions that it would be more than the two nations could possibly need, and he felt that some of these ships should be made available to the Soviet Union. To this Stalin replied that an adequate merchant fleet would be of great value, both to the Soviet Union, and for the development of relations between the Soviet Union and the United States after the war, which he hoped would be greatly expanded.

There was considerable discussion of French affairs during which Stalin surprised the President by expressing the opinion that it was Pétain rather than De Gaulle who represented "the real physical France." There was no doubt in Roosevelt's mind that Stalin considered the collaborationists more important than the fighters of the resistance movement in expressing French sentiments.

Mention of Indo-China brought the conversation around to the Far East and Roosevelt told Stalin of his conversations with Chiang Kai-shek and the plans for offensive operations in Burma. He cautioned Stalin against bringing up the problems of India with Churchill, and Stalin agreed that this was undoubtedly a sore subject.

This meeting lasted 45 minutes but, like all conferences with the Russians, most of the time was taken up in the arduous process of translation. At four o'clock, Churchill and the Combined Chiefs of Staff arrived for the First Plenary Session. Also present at this first session were Hopkins, Eden and Molotov—and it should be noted that throughout the Teheran Conference, Hopkins acted, in effect, as Secretary of State. Stalin's only military aide was Marshal Voroshilov, and Leahy and King represented the U.S. Joint Chiefs. Marshall and Arnold were not present; they had misunderstood the time of the meeting and had gone off on a sightseeing tour around Teheran.

Stalin and Churchill agreed that the President should take the chair at this first meeting and he opened it by saying that he was glad to welcome the Russians as "new members of the family circle" and to assure them that these conferences were always conducted as gatherings of friends with complete frankness on all sides. Churchill said that here was represented the greatest concentration of power that the world had ever seen and that in the hands of those present was the happy future of mankind; he prayed that they might be worthy of this God-given opportunity. Stalin said that this fraternal meeting did indeed represent a great opportunity and it was up to those present to use wisely the power which their respective peoples had given them.

Roosevelt then expressed the American point of view toward the war. He had the impression that Stalin knew very little about the progress of the war against Japan and he therefore dealt with that subject first. He said that the United States was more directly affected by the war with Japan and that the United States forces were bearing the chief burden in that area with, of course, help from Australia and Britain; the greater part of the U.S. naval establishment was in the Pacific and over a million men were being maintained there.

He listed briefly the operations as planned, and summed up the aims of these operations as follows: (1) to open the road to China and supply that country in order to keep it in the war, and (2) by opening the road to China and through increased use of transport planes to put ourselves in position to bomb Japan proper.

The President then said he would take up the most important theater of the war in Europe. He said he wished to emphasize that for over one year and a half all military plans had revolved around the need to relieve the German pressure on the Soviet front; that largely because of the difficulties of sea transport it had not been possible before Quebec to set a date for the cross-Channel operations. He pointed out that the English Channel was a disagreeable body of water and unsafe for military operations prior to the month of May, and that the plan adopted at Quebec involved an immense expedition and had been set at that time for May 1, 1944.

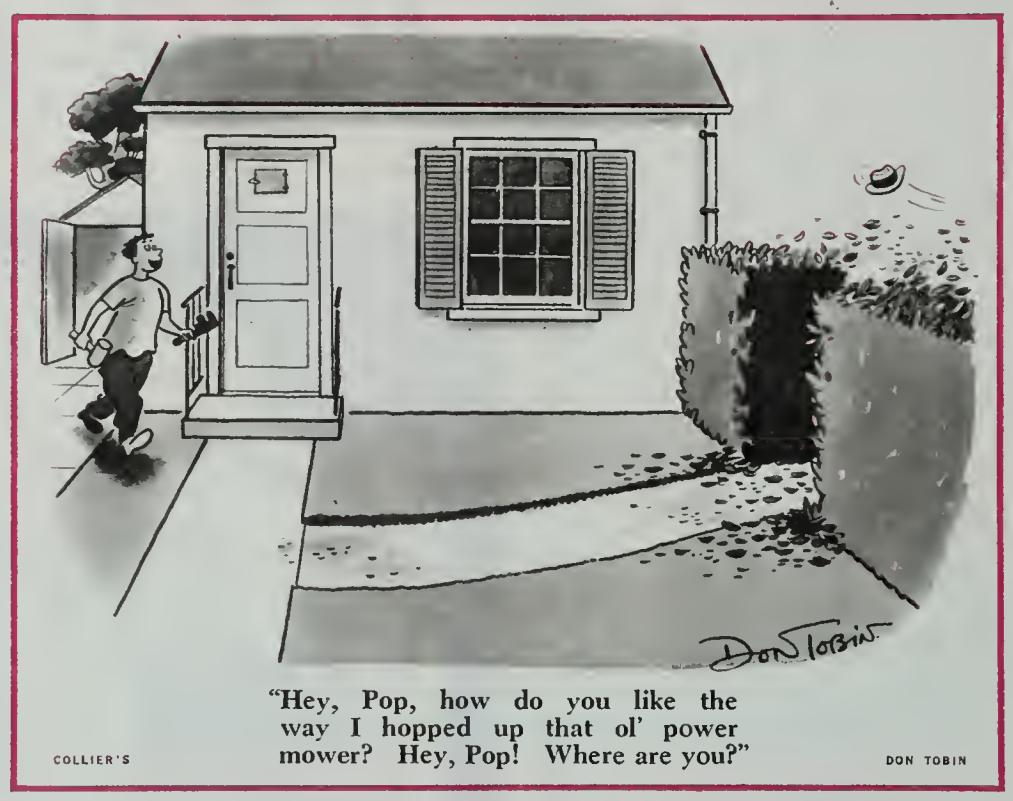
At this point, Churchill interposed the remark that the British people had every reason in the past to be thankful that the English Channel was such a disagreeable body of water.

Roosevelt went on to say that although he was not in favor of any secondary operations which might tend to delay the cross-Channel invasion, OVERLORD, he and the Prime Minister had been discussing possible future operations in Italy, the Adriatic and Aegean Seas, and from Turkey as a base in the event that the Turks might be induced to enter the war. He also mentioned the proposal to supplement OVERLORD with an operation in southern France.

Stalin then spoke of the war in the Pacific, making no bones of the fact that the Soviet government welcomed the Anglo-American successes against the Japanese. He explained that the Russian forces in Siberia were sufficient for purely defensive purposes but that they would have to be increased threefold before they could be strong enough to engage in offensive ground operations against the Japanese—and he added that when Germany was finally defeated, the necessary Russian reinforcements could be sent to eastern Siberia and then, he said, "we shall be able by our common front to beat Japan." (This was the first assurance given to Roosevelt or Churchill to that important effect. It changed the whole strategic picture.)

The Way to the Heart of Germany

Referring to the Italian campaign, Stalin said that great benefit had resulted from the freeing of the Mediterranean to Allied shipping but he did not believe that further advances up the peninsula would be of much avail, for the Germans presented an almost insuperable barrier, as the heroic Russian General Suvorov discovered in his time. He said the entry of Turkey into the war might be helpful in opening the way to the Balkans but that the Balkans were far from the heart of Germany, and the only direct way of striking at that heart was through France.



Churchill gave assurance that it was now planned to put one million men on the continent of Europe in May, June and July, 1944. He said that the ordinary force for OVERLORD would consist of 19 American and 16 British divisions, that being the maximum number that Britain could afford because of its manpower limitations. The additional divisions for the subsequent exploitation of OVERLORD would come in a steady stream from the United States.

He said that there might be delay in the launching of OVERLORD because of a great bottleneck at the moment being the shortage of landing craft—and that pending such delays the Allied troops should not remain idle. He then returned to the desirability of getting Turkey into the war, as he did over and over again with a persistence that was both admirable and monotonous.

Stalin expressed the opinion that it would be unwise to scatter forces in various operations throughout the eastern Mediterranean. He said he thought that after the capture of Rome the forces there should be sent into southern France to provide a diversionary operation in support of OVERLORD. He even thought that it might be better to abandon the capture of Rome altogether, leaving enough divisions to hold the present line in Italy and using the rest of the Allied forces for the invasion of southern France. He stated quite plainly, and repeated several times, his conviction that in any case Turkey would not agree to enter the war.

Churchill said that he could not believe the Turks would be so "mad" as to reject this opportunity to join with the united nations under the most favorable circumstances, but Stalin observed that there were some people who apparently preferred to remain "mad."

This first meeting ended at 7:20, having lasted three hours and 20 minutes —and thereafter Roosevelt signed some more Congressional bills and a proclamation and worked on his mail until dinnertime, eight thirty, when he was host to Stalin, Molotov, Churchill, Eden, Archibald Clark-Kerr (British ambassador in Moscow), Hopkins, Harriman and the three interpreters. This dinner represented a major achievement by the Filipino sailors, who had moved only hours previously into a strange

which lacked most of the essential equipment, including a range.

Hopkins noted that Stalin was grayer than when he had seen him last in the summer of 1941 and also much dressier, now wearing a uniform with gold epaulets each bearing a large, white star fastened with a red pin. Stalin doodled and smoked during the meetings. His voice was quiet—barely audible—and he seemed to expend no effort in placing emphasis on anything as he talked to the interpreter. Harriman has said that Stalin in greeting Hopkins at Teheran displayed more open and warm cordiality than he had been known to show to any foreigner; evidently the marshal saw in Hopkins one who had made promises and done his level best to keep them.

At dinner on the first evening the conversation turned to the subject of postwar treatment of Germany and the frontiers of Poland. Stalin said that Poland should extend to the Oder but he was not specific about Poland's eastern frontier.

Discussing Baltic Problems

The President remarked that he would be interested in the question of assuring the approaches to the Baltic Sea and had in mind some form of trusteeship with perhaps an international state in the vicinity of the Kiel Canal to insure free navigation in both directions. Marshal Stalin apparently thought that the President was referring to the question of the Baltic States. He replied emphatically that the Baltic States had by an expression of the will of the people voted to join the Soviet Union and that this question was not therefore one for discussion. After the misapprehension was straightened out, however, he expressed himself favorable in regard to the question of insuring free navigation to and from the Baltic Sea.

A memorandum was written on Stalin's views concerning postwar Germany, which may be summarized as follows:

In regard to Germany, Marshal Stalin apparently considered the measures proposed by either the President or Churchill for the subjugation and for the control of Germany as inadequate. He tried to persuade the President or the Prime Minister to go further in expressing their views as to the stringency of the measures which should be applied to Germany. He seemed to have no faith in the possibility of the reform of the German people and spoke bitterly of the attitude of the German workers in the war against the Soviet Union.

As evidence of the fundamental German devotion to legality he told of being in Leipzig in 1907 when 200 German workers failed to appear at an important mass meeting because there was no controller at the station platform to punch their tickets so that they could leave the station.

He was convinced that this mentality of discipline and obedience could not be changed.

He said that Hitler was very able, but not basically intelligent. That he was lacking in culture and had a primitive approach to political and other problems. He did not share the President's opinion that Hitler was mentally unbalanced and countered that only a very able man could accomplish what Hitler had done in solidifying the German people whatever we thought of the methods.

As a wartime measure Marshal Stalin questioned the wisdom of the unconditional-surrender principle with no definition of the exact terms which would be imposed upon Germany. He felt that to leave these unclarified merely served to unite the German people, whereas to draw up specific terms, no matter how hard, and tell the German people that this was what they would have to accept would, in his opinion, hasten the day of German capitulation.

The next morning, Monday, mili staff talks were held at which it was termined that it would be feasible mount an operation against soutl France with a two-division assault ar 10-division follow-up to be launchec multaneously with OVERLORD D-I or from two to three weeks precedin

Voroshilov asked a great many sea ing questions about the actual prep tions for OVERLORD. He was interested in the "program" for proc tion; he wanted to know what was a ally being *done*. He asked Gen Brooke point-blank if he attached same importance to OVERLORD General Marshall did. Brooke replie the affirmative but added that he k how strong the German defenses northern France were and that der certain circumstances OVERLO could fail. Voroshilov admitted the ficulties of a trans-Channel operatio had Stalin, but said that the Russians encountered comparable difficulties the crossing of wide rivers and had o come them because they "had the wi do it."

Marshall, whom both Stalin and V shilov obviously recognized as the preme advocate of OVERLORD, that he wished to offer one comm "The difference between a river cross however wide, and a landing from ocean is that the failure of a river cr

UDAPEST, Dec. 17—(delayed
censor)—An American legation
p, clearly painted with American
s, was booby-trapped last night.
W. Baker, legation third secre-
y, suffered shock. His companion,
ress Rikki Telredy of the famous
zona Club, was uninjured.

A bomb was planted under the
's hood while it was parked in
nt of Baker's Revay Street resi-
nce. When he put his foot on the
rter it exploded, blowing the hood
k and cracking, but not splinter-
the windshield.

It is impossible to place responsi-
ty for the bombing, and it is
ubtful if the Communist-con-
lled Budapest police will make
ch of an effort. Anti-American
ngarians could have done it, or
d Army troops, or the police
emselves. Or it could have been
ne by a gang of young hoodlums,
by frustrated car thieves who
nd the jeep securely chained.

WHEN the explosion came Rikki
could not see for a minute, and her
and mouth were filled with smoke
umes, and she was deafened; and if
creamed she did not know it. Then
rst shock passed, and she thought of
nd she groped for and finally found
ever that opened the canvas door
threw herself outside. Not until
did she think of Jeff.

e ran around to the other side of the
and she saw him. He did not look
t like Jeff. He did not look or act
ny man she had ever seen. He was
is belly in the gutter and he was
ng at the dirt and stones in jerky,
ng motions. He was saying words,
what they were she could not under-
d, and in between the rush of words
pitched sobbing sounds came out
s throat. She kneeled beside him in
lime and raised his head and talked
m in Hungarian as a panicky mother
to a hurt child. She stopped talk-
Hungarian, suddenly, and talked in
ish:

What's the matter, Jeff? What's the
er? Oh, be quiet, Jeff! Be quiet! I
ere. I am here. It is all right."

tore his head away from her hands
buried his face in the dark place
een curb and gutter, and Rikki rose
began to shout for help.

the short, dark length of Revay
, there was no movement, no new
, no answering sound. There was
only the babbling man, and the echo of her terror. She stopped screaming. She knew that the people of Budapest do not stir from their beds when there are loud and sudden noises in the night.

She turned to Jeff, and the noises still issued from him. She tried once again to lift his head, failed, and fell across his body, sobbing. . . .

It was thus that the police from the station at 60 Andrássy found them. There were six policemen in this emergency squad. It was the squad that always went to the scene of bombings and shootings, and they knew how to handle it. They dropped off their truck alongside the jeep. Two men with rifles paid no attention to the jeep, but concentrated on the strect and the surrounding houses, to guard against a trap.

THE leader of the squad, a corporal, glanced at the girl huddled over the man. By his sound, the man was badly hurt. The corporal looked inside the hood of the jeep, smelled, examined the wires of the bomb, one twisted around a spark plug and the other attached to the starter wire. He saw how the explosion had blown the hood back against the windshield. The explosion had created its own armor, and he wondered how it was that the man was hurt. Perhaps he was shot.

He took the woman by the waist and lifted her up and stood her on her feet, and when she continued to sob he shook her shoulders. "Shut up!" he said. She was quiet. Then he knelt on one knee beside the man and tried to turn him. The man resisted; he was tall and very strong. "Hey, I need help," the corporal called. Two of his men came, and the three of them forced the man over on his back, holding the arms so they would not be clawed. The man was a mess, and his eyes were wide in madness, and his arms and legs jerked and shook, but there was no blood. "I have seen this," one of the policemen said. "This is battle fear."

The corporal turned to the girl. "Were you in this car with him?"

"Yes."

"He is an American, is he?"

"Yes. he is American. This is his home here. Help me take him inside. He needs help at once."

"Not so fast," the corporal said. "How did this happen? Who is he?"

"I will tell you all that later. Help me get him inside. He must have a doctor."

"No. we will put him in the truck and take him to the station. A doctor can attend him there. We will take you too."

"*Mafla*—stupid ass," the woman said. "I am Rikki Telredy. I know Rajk. I know the whole government. You will do what I say or there will be trouble."

The man was quieter now, and the corporal rose. "So you are Telredy?" he said. "Always you actresses go with the Americans. Why is it?"

"Perhaps they are better men."

"Or have more money," the corporal said. "All right, we will carry him inside. But we will wait with him until his own people come and give me a receipt for him. I will not be responsible."

So they carried Jeff inside, and Sandor came out from under the stairs, his eyes blinking in excitement, and took them up in the elevator. They laid Jeff on the bed and wiped the filth from his face with wet towels, while Rikki telephoned the Park Club. She asked for Fred Keller and told him what had happened and he said he'd be right over.

Jeff was still babbling, but not so wildly now. When she spoke to him he still did not reply. She looked in the medicine closet in the bathroom. There were medicines, there, but none that would

help him except aspirin, and aspirin seemed silly. She saw a bottle of vitamin tablets, and without thinking popped two of them into her mouth.

Until Fred Keller and Quincy Todd came with Major L'Engle, the mission doctor, she sat on the bed, running her fingers along Jeff's temples, and shielding his wide eyes from the light. The policemen found Jeff's cigarettes, smoked, and grew bored. Every few minutes the corporal would think of a question, and she would answer in a monosyllable.

Major L'Engle was an Army Department doctor who had served in France and Germany, and later in a base hospital in England, and he knew combat fatigue when he saw it. "All right," he ordered, "everybody clear out!" He looked at Rikki. "You stay. I'll have to look at you later."

The corporal wanted to know who was going to give him a receipt, and Fred Keller said he would. Keller said this was a most serious matter, and he trusted that the corporal would make a complete examination of the jeep, and make every effort to discover who was responsible. The corporal shrugged his shoulders and said it was always difficult in a bombing of this type. Also, once the criminals fled, it became a political matter, and therefore a matter for the secret police. No doubt the secret police would make an investigation. Keller and Quincy Todd both laughed. The corporal pocketed a pack of Jeff's cigarettes, summoned his men with his eyes, and left.

"You two can stay if you want," Major L'Engle said then. "Just wanted to get rid of those monkeys."

He lifted Jeff's eyelids and examined the palms of his hands. He loosened Jeff's collar and pulled a blanket over his body. "He's got a bad dose of it," he said. "Look at his arms and legs."

"Bad dose of what?" Keller asked.

"Combat fatigue."

"It scares me," Quincy Todd said. "Can you catch what he's saying?"

"I wish I could use narcosynthesis," Major L'Engle said. "But I'll cool him down with Blue Eighty-eights."

"What's that?" Keller asked

"Sodium Amytal." Major L'Engle was a tightly knit man who wore a military mustache and he carried a military kit. In the bottom of his bag he found a fat, round, blue bottle. Into his hand he shook two pills, bullet-shaped, blue, and long as the end of a man's second finger.

"Can he swallow those?" Rikki asked.

"Sure. You get some water."

The major cradled Jeff's head in one arm, forced the pills into his mouth and shook them into his throat, and made him swallow water after.

"What's he talking about?" said Quincy Todd. "Lot of Italian names, and something that sounds like fire co-ordinates. I never heard him swear like that before. Sounds like he's fighting a battle."

"He is," said Major L'Engle. "He's fighting a battle all over again."

IN THIRTY minutes Jeff's trembling was not so apparent, and his incoherent words were spoken thickly and slowly. Then at last he was silent, and his breathing became regular, and he slept.

Rikki began to cry, and Major L'Engle put his arm around her shoulders and said, "Now, honey, I'll have to find something for you."

She said, "I'm all right. I am perfectly all right. I want to stay here." Then she saw herself in the mirror. She looked her thirty-four years, and the three others she never mentioned. "All right," she said. "I'll go."

"I'll give you a couple of pills. You can take them when you get home. Fred and Quincy will take you."

"Is he going to be all right?" Keller asked. "This isn't permanent?"

"No. Oh, no. He'll have to stay in bed for a couple of days, and rest for maybe a week. Then he'll be as good as ever."

"Suppose he has a recurrence?"

"He won't—unless he gets another bomb."

"We'll all have to be more careful. No more using a car without a driver. I'll get Quigley out of bed and send him up here just in case."

"Yes," the major said, "we'll all have to be more careful." . . .

When Jeff lifted his head and opened his eyes his mouth was thick and parched and his head and face felt swollen and he asked for water. Then he saw L'Engle sitting on the edge of the bed, and Quigley in a chair close by. "Hello, Major. Hello, Quig," he said. "What a hangover! My mouth is full of goat wool. Can you hear what I'm saying? It's morning, isn't it?"

The major had a glass of water in his said, very quietly. "However, that's all past, and you are going to be all right, and Quig is here to see that nobody tosses any more bombs around. But if you were able to tell me everything that happened to you—the thing that sent you to the station hospital—you'd be better off."

"It wasn't much," Jeff said. "Some *Nebelwürfe* came into my position. That's all there was to it."

OF COURSE, that wasn't all there was to it, but it was all he could consciously tell. When the 85th Division was assigned to take the heights commanding Futa Pass, Jeff knew nothing of the grand strategy. All he knew was that the company would kick off at 0200 hours and his platoon would go first.

He also knew that he was afraid. He was always afraid in battle. There was

"Pardon me, please . . . I'm sorry . . . excuse me . . . oops, sorry . . . beg your pardon . . ."

hand, as if he had been waiting. Jeff drank, and said, "Where's Rikki? What happened?"

"You were booby-trapped."

"Oh. What about Rikki?"

"She's okay. Wasn't scratched."

"What happened to me?"

"Baker, that's something I can't tell you. You'll have to tell me."

"I don't understand."

"You must've had a pretty bad shock in the war."

Jeff raised himself on his elbows. "Oh, that's it. I did have a shock, I suppose. No worse than others. Not as bad as some."

"Hospitalized for combat fatigue?"

"You mean did I crack up?"

"That's what I mean."

"No, I don't think so. They took me back to the station hospital in Florence, but then they decided I wasn't so bad, and they sent me to rest camp for a couple of weeks. You know the Fifth Army rest camp? The Hotel Imperial in Rome? Boy, was it wonderful!"

"Ever get any narcosynthesis treatment?"

"No. They didn't think I needed it." This wasn't precisely true. The medics in Florence had thought he needed it. But there were so many others in worse shape that when he'd pulled himself together, when his pride conquered his fear, they'd let him go to rest camp instead of base hospital.

Major L'Engle looked at Jeff's hands again. "I think they were wrong," he no waking moment when he was in range of an enemy shell that he was not afraid.

And he was afraid because he was a smart soldier who kept track of casualty percentages in the combat infantry, and he could estimate his chances. He was deathly afraid of mines and booby traps. He always tried to put his feet only on the fresh tracks of heavy vehicles. . . .

In the late afternoon they rode in trucks almost as far as the regimental OP in Scarperia, and hit the ground there, and immediately came under fire. It was very dry in Italy that autumn, and the vehicles and the scuffing boots of the men raised a tattling cloud of dust as they pressed forward. Jeff cursed the dust, for he knew it invited shellfire. As he had expected, the German SP guns up in the mountains fired into the dust all the afternoon. At the crossroads in Scarperia, Jeff lost his communications sergeant, who was an old and reliable friend, and from that moment Jeff was depressed and had a premonition he would die.

So they came to the jumping-off place, and flopped down in a little dry ditch shielded by dusty bushes. He had not known there would be a ditch there, and it was handy because the enemy's heavy machine guns were searching this ground, and his mortars were nervously working it over.

His bazooka man said, "Ain't good, is it, Lieutenant?"

And Jeff said, "You never had it so good! Look at that sunset! Ever se sunset like that?"

Jeff heard his bazooka man mov back along the ditch, and whisper and he heard the muffled laughter his men. He knew they would be rep ing, "Did you hear what he said? never had it so good!" So he knew men were going to be all right, and told them to eat and get their rest.

He could not sleep, although others seemed to sleep. He grudged e minute that slipped by on his watch, he found himself wishing crazy thi like how wonderful it would be if t would turn backward, and the mi hand would move the other way. last hour was the worst, and his hardly left his watch. Fifteen min before 0200 the guns all opened at o and he thought surely the sky must cr and fall in.

He sensed the men stirring aro him, and he passed the word. When minute hand touched the hour he s "Okay, let's go." He climbed out of ditch and moved forward, his body mind concentrating on making him small. Out of the corner of his eye could see his men moving along w him, and he felt a measure of relief.

Almost immediately he saw w would have to be done. There wa fence of tracer across his path, con from a machine gun on the left. He been taught that tracer at night loo deadlier than it actually was, and should ignore it and press on. This probably a good theory until you actu saw the tracer. Then it was no good. thought they should go get that gun.

THEY did get the gun. Then surp ingly there was no tracer wall to cr and it seemed that they walked throu lane. There was fire and terror on b sides, but straight ahead, miraculousl was not bad. So he walked straight ah toward the deeper black that was mountains. They went on until they climbing, and Jeff wondered whe they had gone too far.

Then he saw the bulk of this hill realized that he crouched at its very b He thought it would be good if he w up this hill, although he had not b told to take any hills. He saw little gouts of rifle fire from the top of the and heard a burp gun working up th

His bazooka man said, "Where hell you goin', Lieutenant?"

Jeff said, "Up the hill."

They went up the hill and at the they found six Krauts, two of t wounded. They had to kill the K officer, and the others gave up. Krauts said they were from the Fo Para Division, and had been expec the attack for a week. They said were all that was left of a company. bombardment had killed all the rest.

He told his men to dig in.

In the early dawn he stared north west until his eyes ran, and finally landscape began to come clear. It lo as if he could spit across to the to Altuzzo. Directly opposite, on the of his eyes, was the corkscrew road ran up Altuzzo, and there were Ger on this road with tanks and self-prop guns and queer-looking equipment.

He did not fire on the Germans, cause he did not want to attract attention sooner than necessary. waited for what he knew must come.

It came. They had received three vos before Jeff realized from the of the smoke that a battery of his 105s was zeroed in on his position.

He was counting his dead, and sh ing for the morphine sucrates for wounded when heavier stuff bega come in, and this time the smoke brown and he knew he had got his toon under bombardment from armies. He lay on the ground, the cussions hurting his belly, and praye

fter that he did not know anything he awoke in the station hospital lorence. They told him his men held ill against a counterattack, but this id not remember. People called the hill Baker's Peak, because it turned to be important enough to deserve ame. People said we might never got Futa Pass, except for Baker's

ff stopped shaking after his two ks in Rome. But for a long time a backfire, or the casual shooting that on in war even behind the lines, ld send him face down and quivering ditch. So they made him a captain, gave him a Silver Star, and attached to Army H.Q., which found good for him as liaison officer with the Air Force in Bari in the spring.

F NONE of this could he speak, nor could he articulate his hatred of the nsate force that had pounded his will courage from his body. Major gle understood all this very well, he gave Jeff another Blue Eighty- , and watched him until he again was asleep.

ff recovered quickly, as the major predicted, but they made him stay in oom. When his hands stopped trem- without the sedation of the Blue ty-eights, Major L'Engle told him he d soon get back to his work. "But t step on any more starters," he ed, "and don't get shot at."

verybody was nice. Almost every- in the legation came to see him, or flowers. Except the admiral. Jeff dered why there was not so much as te from the admiral. Then Mor- Collingwood, the consul general, ped in on an afternoon.

ff saw his chance to ask Morgan ingwood about the admiral. He tried e casual, and remarked, "I haven't any word from the admiral."

lorgan Collingwood looked uncom- able. "It's most unfortunate about dmiral," he said.

What's unfortunate?" Jeff asked.

Well, the way he looks at things."

don't get it, Mr. Collingwood."

Jeff could guess.

Well, Baker, the admiral isn't happy t your behavior. Do you want me eak frankly?"

certainly do."

The admiral heard—from whom I 't know—that you did nothing to ect the woman you were escorting. heard that you cowered in the street. course the admiral hasn't said any- publicly or officially about his ngs. As a matter of fact he praised at his press conference the other The admiral called a special press erence. He wanted to be sure that nstructive version of the affair ap- ed in the press at home. But pri- ly the admiral is chagrined at your duct."

ff tried to keep silent, but he dn't. "That's too bad," he burst out.

Now, now!" said Morgan Colling- d. "That sort of talk won't do you r good."

No, of course not," Jeff said. "Didn't or L'Engle explain—didn't he ex- n to the admiral?"

Yes, he explained, but it only made orse." Collingwood leaned over the as if what next he had to say was fidential. "You see, the admiral said he didn't believe you'd had an injury in the war, because there was nothing in your record to show it. And anyway, he claims there isn't any such thing as combat fatigue. He quoted General Patton, and he said General Patton ought to know."

"Well, he can have his opinion," Jeff said, "and I'll have mine."

"Now that's being sensible," said Morgan Collingwood.

Jeff received cards from most of the mission in Budapest, but none from the Russians, the Jugs, the Bulgars, or the other satellites. The Hungarian Ministry of Foreign Affairs sent him a stilted, insincere note of regret.

He received two cables. The one from Horace Locke said: "RELIEVED TO HEAR YOU NOT BADLY INJURED WOULD APPRECIATE LETTER."

Jeff felt guilty because he had not written Horace Locke, and a little foolish for not having thought of him as a confidant, now in this time when he needed an utterly reliable friend in the department. Should he confide Leonides' conspirational plans to Horace Locke? Could Horace Locke get to the Secretary, if necessary?

He should imagine that Horace Locke could get to the Secretary. After all, Locke had once been a chief of division, and an important man in the department. He thought Horace Locke might be his man.

But there was the difficulty of secure communications with Locke.

The other cable said: "DISMAYED HEAR OF ATTEMPT ON YOUR LIFE STOP JEFF PLEASE PLEASE DONT LET ANYTHING HAPPEN STOP AM WRITING FULLY LOVE SUSAN."

This cable worried him, and yet in a way it made him feel good. She had committed herself entirely. She wasn't just shocked. She was dismayed. He had become part of someone else.

Every afternoon when she was not rehearsing, Rikki came to see him. Sometimes she brought flowers, and sometimes books from her own library, books printed in the United States, their pages limp from much handling. Some, like Look Homeward, Angel, had been published twenty years before, and Jeff had read it but it was good to read again.

She came to see him on his last day in bed. He marveled at her chic, her smartness. She wore a blue suit labeled Fifth Avenue but without a Fifth Avenue label. She told him it was American Army blanket, traded in the black market in Vienna, smuggled across the frontier, sold at a fantastic price in Budapest, and then cleverly dyed and cut by men who loved their craft.

He was sitting up in bed, with the pillows piled behind him, and wore a robe of white toweling. She leaned toward him, and plucked at the threads of the robe. "This matter of which we were speaking," she said. "This matter over which we quarreled—"

"What about it?"

"I will do what you want me to do," Jeff."

"That's fine, Rikki."

"Anything you want, I will do."

"There isn't anything to do right now. I just wanted to know how you felt." He knew what she meant.

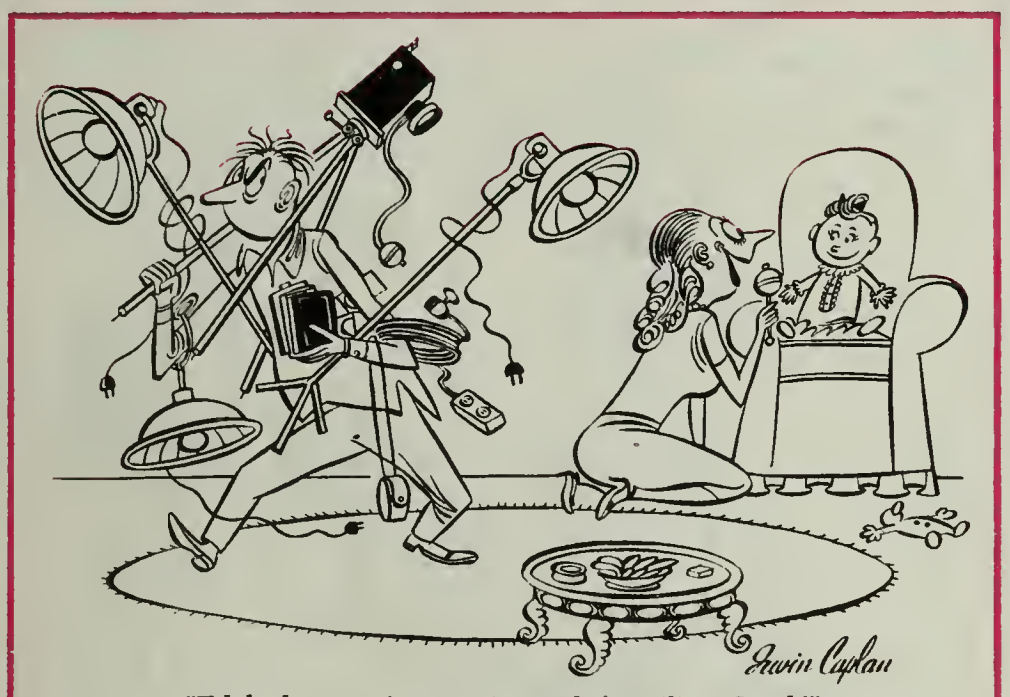
Then she sat up straight, her head resting exactly on her straight spine, in the manner of dancers. "Every time I think I understand you Americans," she said, "I find I am mistaken. The ones with wives and four children far away across an ocean, they will chase me. They will tell me they will divorce their wives and forget their children for me, which of course I do not believe but that is what they will say. But you, who have no wife, you hesitate, you shake—look at your hands—you have disturbances of the brain, you have a churning inside you. What is wrong, Jeff? What is this woman you have back there?"

"She's just a girl."

"What is her name?"

"Susan."

"Susan." Rikki considered the sound. "So plain."



"She isn't plain. She's very complicated."

"And all the time you are here, she expects you to be a monk?"

"I don't think so, she's very liberal, and broad-minded."

Rikki smiled, and showed the tip of her tongue between her teeth. "I would like to meet that Susan!" she said. It was afternoon by the clock, but the night comes fast in Budapest's winter, and the darkness had come.

Soon Rikki would leave, and he would be alone, and lonely with the loneliness of the traveler in a strange city and the alien in a foreign land. He said, "Rikki, come here."

COLLIER'S "Ed, look . . . set it up again . . . she's smiling. Quick!" IRWIN CAPLAN

WHEN Major L'Engle came in the morning, Jeff was up and dressed. The major gave him the usual examination. Then he told Jeff to hold out his hands, palms up. Jeff held out his hands, and the major laid a newspaper across them. The edges of the paper did not tremble.

"You've progressed a long way in twenty-four hours," the major said. "All of a sudden, you're completely relaxed. I didn't think you'd be this relaxed in a month."

"Didn't you?"

"No. You can go out of the house today. Take a little walk. Not too far."

Major L'Engle put on his muffler and overcoat, and felt in his coat pocket, "Almost forgot. I brought your mail from the legation." He brought out a fat packet of air mail, compressed by rubber bands. "These ought to keep you busy a while. You must have a lot of friends back home."

Jeff opened them, starting from the top, with the impatient eagerness of a small boy tearing through a pile of Christmas presents. There were a surprising number of letters from people he didn't know. Most of them were warm and sympathetic. They wanted him to know that the people back home were behind him.

THERE was a letter from Susan: "Dear Jeff—I was in New State cafeteria, having my coffee before the nine-o'clock conference, when I saw your picture looking at me from the front page of The Post, and all I could see in the headline was the word 'bomb,' and for a long time I didn't dare read it. I thought: This can't happen to me—not twice in a lifetime.

"But I hear from Gertrude Kerns—she's my friend in the Balkans Division—that a dispatch came in saying you were getting along fine, and would soon be back on your feet. Thank God! Oh, please, Jeff, be careful!

"I am enclosing clippings from The Post, Times-Herald, Star and News. What really happened? Every story is different. Who was responsible?

"You will notice that the T-H has a photograph of that Hungarian actress, Rikki something-or-other. She looks sort of slinky. I'd never trust a person with eyes like that—man or woman.

"Jeff, you know we didn't do much talking about us. We never had time. I don't know when we ever will have time. Judging from the news, time is running out on us.

"Remember how fearful I was? How afraid I was to have you? How I have changed. I want you, while time remains. I think of the line from Omar: 'The Bird of Time has but a little way to flutter—and the Bird is on the Wing.' I find I'm beginning to agree with Omar now.

"Jeff, I am afraid there is nothing left for you to do. We both feel the same way, dear, but there is nothing either of us can do. All the words have been said at Lake Success (what an ironic name for the place) and all the speeches have been broadcast, and all the notes sent and rejected, and all the treaties made and broken.

"I despair.

"And so, Jeff, I suggest that you resign from the department and come to me. Come to me, Jeff,

Susan."

He put the letter with the others on the leather-topped Italian desk, and yanked his overcoat out of the closet. He felt that he must get away from that letter. Why had she written it? Why had she put into hard, clear, written words what he dared not even think? He left hastily.

He saw an enormous dome looming above him, and in a way it reminded him of the Capitol. He knew, then, that he was going to go into St. Stephen's. He had not been inside a church, to pray, for a long time, oh, twelve or fourteen years.

The climb up the marble entrance left his knees watery, although there were not many steps. Inside he paused to remove his hat, and found that as usual he had forgotten his hat. He walked to the central pillars, and examined the statue of Saint Ladislaus. He felt self-conscious, but no one was watching.

He walked toward a side altar and there were backless wooden benches before the altar, all unoccupied, for this was not an hour of Mass. He became aware of the quiet, the peace. There was a murmur inside St. Stephen's, there was even music from the other side of the

nave, and yet it was wonderfully quiet.

He didn't know how long he had been there when he heard the creak of a man's shoes coming down the aisle behind him, and was aware that somebody moved toward him along his bench. He thought: With all the other benches, why does he have to come here? In the soft light he was aware that the man knelt and crossed himself. He turned his head, and said, "Good Lord!"

"Shh!" said Leonides.

"Don't do that to me!" Jeff said.

"That bomb did your nerves no good, eh, Jeff?"

"I'll say not," he managed to whisper.

"Yes, keep your voice low. We will attract no attention, praying here, unless we make noise."

"What about the bomb?" Jeff asked. "Who did it?"

"Not us. The MVD was concerned because of it. They have orders not to unbalance things here. Not now. The situation is too tense. *He* is not quite ready. *He* will carefully choose his time, but the time, I am afraid, is short. We must somehow begin our operations. We must somehow divert *him*."

FROM the other end of St. Stephen's there rose the chant of a choir. "Is that why you came here?" Jeff asked. "How did you know I was here anyway?"

"I have been watching. This is the third day I have been watching. It is important for you."

"You mean your operations? Sure it's important."

"No, there is something more immediate. This girl, Telredy, who comes to see you—do you like her?"

"Yes, I like her. Why?"

"Then do not see her again. Never again see her."

"Why shouldn't I see her?"

"Because if you see her, she will die. Your Atlantis Project is known, Jeff. It is known that you are in it. Any Hungarian whom you often see will, sooner or later, die or wish he were dead."

Jeff had the queerest feeling, as if he and Leonides had been through this before. He looked at Leonides, sitting on the bench beside him, his big hands clasped, his round, cropped head bent. And when he looked he made a conscious effort to control his own features, and the effort made him realize that this was like the poker games in the Oriente. "What kind of project?" he said. "I don't understand you, Leonides."

"You are a bad liar, Jeff."

"That may be," Jeff said. "But I remember you are a good liar. I'd like to have a nickel for every pot you pulled in with a busted straight."

The chant died away, so that when Leonides spoke next it was only a whisper. "I am not bluffing, Jeff. If you think I am bluffing, continue with this Atlantis Project and see what injuries are caused. But do not continue, Jeff. Stop it quickly. I do not ask you to say yes or no, only listen to what I have to say. The MVD knows of it all. The MVD knows that Keller is at the top, and you and a number of others below. I don't know the MVD source exactly. I know it is from the United States, and probably from the White Russian colony in the United States.

"It is easy for the MVD to operate among White Russians. The Communists and their followers your F.B.I. automatically suspects. The White Russians your F.B.I. automatically trusts. Your F.B.I. forgets that often the White Russians have primary interests in their motherland—family, estates, sweethearts. And a Russian is a Russian. The Germans learned that. They learned it when we emptied our political prisons, and formed the prisoners into divisions, and sent them to Stalingrad. The political prisoners fought well. They loved Russia."

Jeff said, "I have listened to what you had to say, Leonides. Now what about your operations?"

"We are fearful for Yassovsky. He was sent to the Crimea from Moscow, and we have not heard from him since."

"Anything else?"

"Our radio is set. We have it in a truck on the Hochschwab."

"The mountains in the British zone in Austria? I've driven across the Semmering."

"Not even the British patrol the Hochschwab. It will be safe for quite a time. It will do more harm to *him* than all your wireless, and the B.B.C. We will call it RFR—Radio Free Russia."

"How soon can I tell my department?"

Leonides bent his head until his heavy chin touched his chest, and he appeared deep in prayer. His lips moved. "Soon now, please God." Then he asked, "Have you yet told your one person?"

"Not yet."

"Who will he be?"

"Would Keller be all right?" Jeff said.

"Of course it's bumpy. We're sitting directly over the wheels"

COLLIER'S GARDNER REA

The choir began a new chant, and Leonides raised his head and stared at the great painting of St. Stephen, offering a crown to the Virgin, over the altar. Jeff knew that Leonides was searching the files of his mind for what he knew of Keller. He was going through all the reports. He was evaluating Intelligence. At last he said, "I do not think it should be your Keller, Jeff."

"Very well," Jeff said, "I'll tell Horace Locke, back in Washington."

"You can communicate with him in secret?"

"I'll find a way," Jeff said.

WHEN Jeff got back to his room he fell across the bed. The short walk and the hour spent in St. Stephen's with Leonides had tired him.

When he awoke he knew from the sun that it was afternoon. Rikki was there with a bowl of soup from Madame Angell's kitchen. "Look what I brought you," she said.

"Hello, Rikki," he said, swinging his legs off the bed and shaking the sleep from his head. Now he must act. He must act at once and decisively, so there would be no mistake. "Thanks for the soup, Rikki. It was very thoughtful of you. I'm hungry and I'll eat it. But put it down on the table and get out of here, Rikki. I can't see you again."

"Jeff," she said, "what is wrong? You are sick again?"

"Rikki, it's dangerous for you to be here. I can't explain it all, but you'll have to get out. Right now. Go on now, Rikki."

She put the soup down on the table so that it slopped over the rim of the bowl. "What kind of man are you!"

"This is for your own good, Rikki."

She saw the pile of opened letters on the desk. "Now I see," she said. "Now I see." She smiled as if nothing was funny. "My Jeff has a letter from his Susan. He has remorse."

"Nothing of the sort," Jeff said. He stood up, and tried to say what he had to say quietly, without affront or anger. "Rikki, this isn't a matter of Susan. This is you, Rikki. This is your life."

Her expression changed. He had frightened her. She didn't say anything. She was beginning to understand.

"You can't come up here any more, Rikki. We can't meet anywhere any more. You should not go to Fred Keller's again. You should not eat or dance at the Park Club. You should never enter the legation."

She lowered her head, and said, "Why not?" but she said it as if she already knew the answer.

"Americans are poison for you, Rikki."

"This thing of which we talked?" she asked, without raising her head. "This Hungarian Maquis? Cannot I be in that?"

He knew that as soon as he talked to Keller there wouldn't be any Atlantis Project. "No. You'll have to forget that."

"So you Americans have given up?"

"I have given up that idea. Can't you guess why? Can't you guess why I can't see you any more? Why you shouldn't be seen around any Americans?"

"Yes, I know. But it is very discouraging, Jeff. I am sick. I am empty. You know, all my life was with your people. I thought I was one of you. Now I am alone." She turned away from him, and went out into the hallway, and presently he heard her footfall on the stairs, and the diminishing sound was slow and heavy, and not that of a dancer.

Jeff looked at the soup. He was no longer hungry. Then he realized he must see Fred Keller at once. He picked up the telephone and called. When Fred answered the phone Jeff said, "I've got to see you."

"I'm pretty well tied up."

"Got to see you right away."

"You can't. I've got appointments with Lower Slobbovians all afternoon, and I expect Miss Genghis Khan for dinner." Lower Slobbovians were Hungarians.

Jeff said, "She can't come."

"Why not?"

"She's sick and can't get well." Th meant that she was suspected by t MVD.

"Oh. That's too bad. Yes, you'd b ter come up at eight."

"You should see me right now."

"I can't. That's all there is to it." A then Keller hung up.

AT SEVEN o'clock Jeff put on overcoat and went to the missi He went up to the second floor and tr the door of the dispensary. It was op and the lights were on inside, but L'E gle wasn't there.

He sat on a white metal stool and tr to read a month-old copy of a magazi The type kept jumping out of focus. wished L'Engle would hurry up a come back. He looked up at the rows square bottles on the shelves. Proba better stocked than any hospital in Pest, he thought. His eyes stopped at bottle of Blue Eighty-eights.

He wanted one of those Blue Eigh eights.

Jeff slid off the stool and reached and took the bottle of Blue Eighty-eigh and Miss Ellis, the nurse, opened door and said, "Put that down!"

"Now wait a minute, Miss Ellis," said. "I just came up here to find Ma L'Engle and get a Blue Eighty-eight need it and I know he'd give me on he were here."

"Put that down!"

He saw there wasn't any sense argu with her, and he turned his back so could not interfere and shook ou Blue Eighty-eight and popped it into mouth and swallowed.

"Why, you filthy thief!"

He couldn't answer because he having a hard time swallowing.

"I hope they put you in Leavenwo for ten years. You'll never get a with this, you know. Why, it's the m brazen thing I've ever seen!"

He got it down, but it still felt lik lump under his breastbone. "All ri Miss Ellis," Jeff said, "just take it e When you see L'Engle tell him I came here and took one Blue Eighty-ei Just one, mind you! And I don't th you talk like a lady, Miss Ellis."

He hurried out. It was quicker to w to the motor pool than call and wait a vehicle. If he walked right over h be at Keller's on time.

When Jeff walked into Keller's ap ment he found Fred at ease in a mar lounging robe, the faultless lapels fa with black satin. Fred was smokin a pipe and there was a brandy snifter an open book on the table beside his chair. He seemed like a man wh thoughts were only on a book and an disturbed evening, until you loo closely at his face. Then you saw all muscles were taut, and new lines sho around the mouth. "Hello, Jeff," he s "Do you want to eat first, or talk?"

"I've eaten, thanks," Jeff said. "I th we'd better talk." He folded himself a chair and lighted a cigarette. He relieved to see the Blue Eighty-eight dispatched his jitters. "Atlantis Pro has been penetrated. The Russians k about it. We've had it, Fred."

Keller's tan faded to yellow. "How you know?"

"A Russian told me."

"I don't believe you!"

So Jeff told him the story. He sta in the beginning at Bari. He told everything, but he did not mention onides' own secret. He didn't men Leonides' resistance movement.

When Jeff finished, Keller's pipe out but he was still puffing at it. looked at Jeff, estimating, analyz searching. He said, "Well, it's not as as I thought. I really don't see any son to discontinue Atlantis."

"You don't!"

"No, I don't. But I do see reasons

34,000 OIL COMPANIES
RE THE NATION...

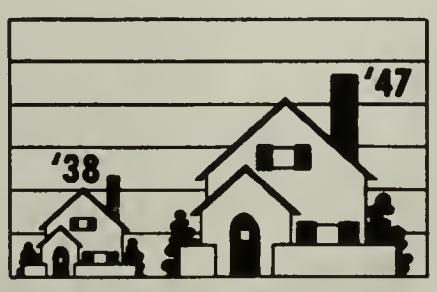
WORKING NIGHT AND DAY

Over 400 companies are engaged in the refining branch of the oil industry... working *harder than ever* to supply you with more petroleum products.

PLYING ENOUGH PETROLEUM to meet your
s is a round-the-clock job. Yes, we're work-
ht and day to fill the nation's demands for
d more oil.

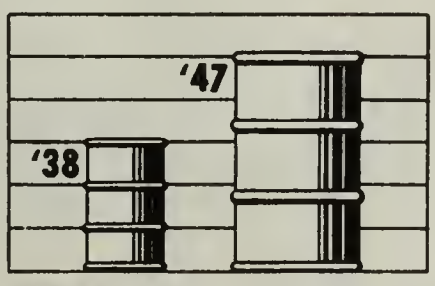
o these efforts has come the greatest supply
merica has *ever* had—over 200 million gal-
ily—a flow of petroleum products greater
at maintained during our peak war year.
ve're using more oil all the time! This year,
936 billion gallons of gasoline will be used
er the nation's cars, trucks and busses...
r over 31 billion gallons of fuel oil will be required for homes, schools, hospitals, factories... and almost 4 billion gallons must go to meet huge Army-Navy requirements. Add to this the tremendous quantities of oil needed to keep farm machinery and industrial equipment, planes, trains and ships in motion—and there's the biggest job the oil industry has ever faced.

With a trillion-gallon underground reserve as backlog, over 34,000 individual oil companies strive to supply you with *more* and *more*. Every branch of the oil industry—production, refining, transportation, marketing—is stepping up the pace in 1948... working to supply America's ever-increasing needs.

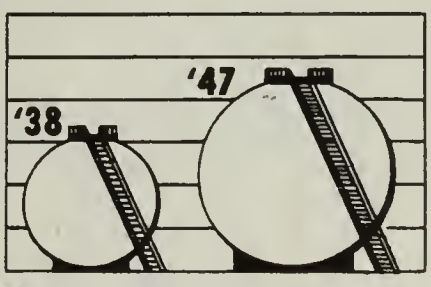


More petroleum products will be delivered this year. Be sure to use them *efficiently*. Oil is energy for America. Oil means more comfort, better living, greater convenience—for *you*.

OIL INDUSTRY INFORMATION COMMITTEE



670 Fifth Avenue, New York 19, N.Y.



GASOLINE: America's huge motor fleet now numbers over 37 million vehicles. That's 7 million over 1938. Cars average about 730 gallons yearly... trucks, busses use even *more*.

DOMESTIC FUEL OIL: Demand for fuel oil has skyrocketed since 1938. Today, over *twice* as many oil burners are used in heating our homes, schools and hospitals.

LUBRICANTS: Farms, railroads, mines and factories require ever increasing quantities of lubricants. Production of lubricants *today* is 68% higher than in 1938.

REFINING: Oil refineries handled 77 billion gallons of crude oil last year—with facilities expanding, refineries will soon top this mark ... deliver even *more* oil products to you.

if what you told me became known—say to the admiral—you'd be fired."

"Are you sure you listened carefully to what I told you?" Jeff asked.

"I digested every word. I'm only worried about one thing. How much did you leak to the Russian?"

Jeff knew he was growing angry. "Give away to the Russians! Nothing, of course!"

"I hope not. I wouldn't like to lose you, Jeff. I think you've been doing a good job, except for this one thing."

"But don't you see that this one thing finishes us?" Jeff demanded.

KELLER said, "You *are* dense." He rose and paced to the bar, and poured a thimble measure of brandy into the fat-bellied glass. He swished it around, and warmed the snifter with his long-sinewed hands. He seemed to have forgotten to offer a drink to Jeff.

"Don't you see?" Keller continued. "Don't you honestly? Don't you see that the Russians are on a fishing expedition? Oh, they may know something. They may even know the name of our project, although I honestly don't see how they'd even know that."

"It seems to me that they know everything," Jeff said, "and they picked it all up right in Washington."

"That's ridiculous. As I said, they may have a little hint of what's going on. So they assign this chap—what's his name?"

"Leonides Lasenko."

"They assign your friend Lasenko to pump you. Why did they pick you, and not me, or one of the others? First of all, you're fresh out here, and obviously don't know enough to stay away from Russians. And secondly, Lasenko knew you. That's the important thing. Lasenko got your name from customs, and he recognized it, and went after you. Perhaps you were the only approachable American in Budapest."

"Yes, I'm sure of that, anyway," Jeff said.

"Now I'll tell you what I'm going to do," Keller said, and Jeff could see he was composed again. "You're just to forget about this whole thing and let me handle it. You're not to mention it to anyone else. You're just to forget about it. And nothing is going to happen to you, except for God's sake, Jeff, don't see that Russian again."

Jeff was silent, but he knew what presently he was going to say.

"Yes, I'll handle it all," Keller went on. "I'll change the name of the project. If the Russians have heard anything about Atlantis, and are trying to find out what it is, we'll just eliminate the name."

"It won't work," Jeff said.

"Nonsense. I'll just tell the admiral it's best for security that we change the name. Time we changed it, as a security measure, anyway. You go right ahead with your work. How're you getting along with Miss Genghis Khan?"

Jeff said, "I'm not going to see her again, and you're not going to see her again."

"Now, Jeff, don't be difficult."

Jeff leaned back in his chair. He was quiet and calm now, and it wasn't the Blue Eighty-eight that had given him this steadiness. "It's easy for you, Keller," he said. "You know the Russians won't kill you. You're safe, because if you were killed that'd be an incident, and at this time they don't want such an incident. But if they grab Rikki, and snaffle out her life, that doesn't hurt you, Keller."

"That's enough, Jeff!"

"No, it's not enough. You know damn' well the way the MVD operates. You know damn' well you're safe. You know they'll watch—are watching now. And every Hungarian you see often enough, or I see often enough, that Hungarian is as good as dead. Do you want to be a murderer, Keller?"

Keller said, "One last chance, Jeff. I know you're unstrung. The bomb—that explosion."

"I'm not unstrung."

"I'd hate to believe that you were a coward. The admiral thinks you're a coward. One last chance, Jeff. I directly order you to continue with your work."

"I'm not going to do it."

Keller shook his head. He seemed older than forty now, and he had lost his spruceness, his straightness. "You will go to your apartment. I will have to see the admiral." . . .

Jeff had a bad three days. The first day, nobody called him, or visited. This in itself was a bad sign. He spent the day typing a letter to Horace Locke. The letter was a careful summary of everything Leonides had told him of what Leonides had called the Second Russian Revolution.

He had no idea how he was going to get the letter to Locke. He knew that any letter he dropped into the pouch, from now on, would be suspect. And he had the same premonition Susan had. Time was running out.

"Take Hal Brenner for instance—one season in summer stock and now he's got a steady job as a union carpenter in Newark"

COLLIER'S BARNEY TOBEY

THE second day Major L'Engle came to see him, looking harassed. "The admiral," he said. "He's wild. What happened?"

"You mean in your dispensary?"

"Sure, in my dispensary."

Jeff told him what happened, and the major nodded and said, "That's what I thought, but nobody is going to believe me, or you."

"What do you mean, won't believe you?" Jeff asked.

"Well, you taking that Blue Eighty-eight is only part of it." The major twisted his hands together as if what he was saying were difficult. "Baker, that thwarted, lard-faced harridan in white reported other drugs missing. She wrote a letter to the admiral. I knew they were missing before she did. You see, I took them."

Jeff said, "I suppose they blame that on me, too."

"Oh, no, the admiral lets me have all that. You see, I told him. I told him the truth, but he thinks I sold the stuff on the Bourse, and I'm under charges."

Jeff took out the bottle of cognac he kept locked in his dispatch case and gave the major a drink, because obviously the major needed a drink. Then he took one himself. "I'm confused," Jeff said.

The major drank the cognac in a gulp. "If I had just been smart enough to lie! If I had just told the admiral that some of the G.I.s in the M.A.'s office had been sick, or even that I was sick myself, nothing would have happened. But I told the truth. You know the Hunyadi Home?"

"I've heard of it. The home for boys."

"Yes. It's near my place, and every once in a while I drop in there. I don't have any boys myself. But I like boys. Their infirmary is deplorable. No equipment at all."

"So?"

"So for the last six or eight months I've been helping them out. I've saved three pneumonias, and one meningitis, and some others. I told the admiral the truth about it. In the first place, he doesn't believe me, and in the second place I'm not supposed to use the mission's drugs for indigenous personnel. He's right, of course. No getting away from it. He's right, officially."

"I'm sorry," Jeff said. "I'm sorry that I started this."

"Oh, I told him about you too. I told him it was perfectly okay if you took a Blue Eighty-eight because there wasn't anybody there to give it to you. I explained the stuff wasn't habit-forming unless you took it for a considerable period. Did it do any good? No. Every time I mentioned your name he just sputtered. I don't know what else you've done, Baker, but whatever it is, you've got him wild."

"I hope he'll cool down."

"He won't. I'm on tomorrow's plane, going home under charges."

"Oh, that's too bad!" Jeff tried to think of something cheerful, because he liked L'Engle. "You'll be all right. It's the best he could do.

"No, I won't. There'll be an investigation, and anyway a repri[mand] and they'll look on their maps and either the hottest place in the wo[rld] the coldest place in the world and say, 'We've got a new post for you, gle, where there are no black m[ail]. Goodby, bub.' "

Jeff poured another drink, and w[hen] handed the glass to L'Engle he l[ooked] deep into his face. L'Engle's fa[ce] like rock, but rock weathered an[d] lowed by his years and his prof[ession]. "So you're going on tomorrow's p[lane]," Jeff said. "And you're a decent gu[y]."

"You don't have to feel so damn[ed] for me."

"I wasn't feeling sorry. Will y[ou] liver a letter for me, Major?"

"Depends on where it's going[.] going to Washington."

"That's where the letter's going[.]" jor."

"So long as it doesn't contain [any] fied material, sure."

Jeff said, "This hasn't been cl[as]sified yet. There isn't any classification [on] it."

"Now that sounds interesting," t[he] jor said.

Jeff finished his drink. "This [letter] might get you into trouble, Majo[r]," said. "I want you to read it, and [make] your own decision."

He handed the letter to L'Engl[e]. major started reading it, and then h[e] a pair of glasses from the inside [pocket] of his blouse, and put them o[n] started again. When he finish[ed] handed it back to Jeff. "I'll deliver [it]," said. "You got an envelope?"

"Yes." Jeff sat down at the de[sk] wrote, "Horace Locke. Old State [Place] and Pennsylvania Avenues, N.W., [Wash]ington, D. C." He said, "Here yo[u are]."

Major L'Engle dropped the en[velope] into his doctor's bag. "You don['t have] to worry about it," he said, "becau[se my] bag always goes with me, and I nev[er] get it."

"I'm not worried," Jeff said.

"Yes you are," said L'Engle. "[You're] worried that I might talk. You [don't] have to worry about that, either." took the bag in his hand. "So long [and] me up—if you ever get to Alaska.

ON THE morning of the thi[rd] Quincy Todd phoned and [said] "Hey, where you been?"

"You know damn' well where I [have] been."

"You don't have to act like [an] untouchable. You're not, you know."

"No, I didn't know."

"Well, meet me at noon and [I'll] you."

So at noon Jeff walked to th[e] Molnar. Quincy Todd was sitting [at a] table which by custom was their[s]. Marina wasn't there to serve ther[e]. other girl was there, and Jef[f] "Where's your girl friend?"

"I don't know," Quincy said[.] she's not my girl friend any more[.] Russky beat my time."

"You mean my Russky—the n[ew]"

"Yes, your Russky."

"I thought she didn't like Rus[sky]"

"She likes that one. Every nig[ht] I've been here for the last two [weeks] there she is with the Russky. So w[hat] I do? Can I go over and try to e[ject] out of the picture? No. I just sit h[ere] it comes closing time and he ta[kes] home—or somewhere. What's [he] that I haven't got?"

"Nothing. He just gets here fir[st]."

Quincy dumped his cognac i[nto] coffee. "First today," he said. "[Do] know what we call the second floo[r] legation now? The Whispering G[all]. And do you know what they're a[ll] ing about? About you, Jeff."

"I'm not surprised."

"Now, Jeff, I don't want you [to]

The FIESTA, a luxurious diner-lounge on the new GOLDEN STATE, is one of the most picturesque passenger cars ever built. Its canopied ceiling, tiled floor, adobe bar and hand-carved furnishings are appropriately in the Mexican-Southwestern motif; for this fast streamlined train runs between Chicago and Los Angeles, and is jointly operated by the Rock Island and the Southern Pacific. The General Motors locomotive up ahead adds to the pleasure.

Quiet Sunday dinner—100 miles an hour

WHEN a train powered by a General Motors Diesel locomotive glides into — or out of — a station, there's not even a ripple in the glass of water at your elbow.

You travel with a new smoothness — and a new speed, too. Often, on the straightaways, your train may make 100 miles an hour.

General Motors locomotives have also brought a new cleanliness to travel — no soot and cinders to mar your appearance; no clouds of smoke and steam to mar your view.

They have held, for several years, the records for on-time arrivals.

That's why it is easy to see why 200 of America's finest, fastest name trains are headed by General Motors power.

Easy to understand why better trains follow General Motors locomotives.

See the Electro-Motive Exhibit at the Chicago Railroad Fair.

How to Save Over $100

Yet Own as Fine a Hearing Aid as Money Can Buy! See Coupon Below

HEAR BETTER OR PAY NOTHING!

Wear the New Zenith "75" at home, at work, anywhere. If it isn't better than you ever dreamed ANY hearing aid could be, return it within 10 days of receipt and Zenith will refund your money in full.

You can now own this superb quality hearing aid for only $75 because . . . 1. It is a product of the great Zenith Radio laboratories, world's leading producer of radionic devices exclusively. 2. It employs an advanced principle that eliminates expense of "fitting" and excessive high-pressure sales commissions—costs that would make its price $195 instead of $75! You save well over $100 cash!

Instantly Adjustable—by You. Thanks to this advanced principle (recently confirmed in U. S. Government-sponsored research at Harvard University) you, yourself, can instantly adjust the New Zenith "75" for *your* best hearing in any surroundings. That's why this instrument can come to you by mail—all ready to use at home, office, church, theater.

Lowest Operating Cost, Too! Not only do you save tremendously on original cost, but on upkeep, too. For actual tests prove the new Zenith "75" costs less to operate (¾ of a cent per hour battery cost) than *any* other single-unit hearing aid of equal power! So do as tens of thousands have already done—mail the coupon below, find new happiness and success—and save over $100 in the bargain! Check coupon for details of our time payment plans if you prefer easy terms.

NEW ZENITH RADIONIC HEARING AID

BY THE MAKERS OF FAMOUS ZENITH RADIOS

ACCEPTED COUNCIL ON PHYSICAL MEDICINE AMERICAN MEDICAL ASSOCIATION

Look only to your doctor for advice on your ears and hearing.

ORDER NOW! MAIL THIS COUPON!

Zenith Radio Corporation
Hearing Aid Division, Dept. C838
5801 Dickens Avenue, Chicago 39, Illinois

☐ I enclose check or money order for $75* for one Zenith "75" Hearing Aid. Unless I am completely satisfied and find the Zenith "75" superior to *any* other hearing aid, I may return it within ten days of receipt and get my money back in full. **Plus tax of $1.50 if delivery is made in Illinois.*

☐ Please send details of your convenient time payment plans and free descriptive literature.

me anything about this. I know you're in a jam, and I know the whole thing is extra-secret. I just want to tell you what's been going on, and I want to pass along a little advice."

"Okay."

"In the first place they've been having conferences about you every day—I mean the big boys—the admiral and Morgan Collingwood and Fred Keller and Quigley. That means they can't agree."

"Maybe," Jeff said.

"I've got a hunch, Jeff, that if you go into this thing tomorrow and say, 'Okay, I've been a bad boy and I won't do it again,' why, nothing will happen."

"I'll think it over," Jeff promised.

JEFF'S phone rang again on the afternoon of that third day. At first he thought it was somebody at the legation, because when he used only simple phrases Leonides' voice was without accent, and almost American.

"I've got to see you right away," Leonides said.

"Who is this?"

"Don't you know?"

"I'm not sure."

"The night you had four deuces, I had four tens."

"Oh. Where?"

"The same place as last time."

"In thirty minutes."

On this dark day St. Stephen's was darker, even, than it had been before. On this day there was no choir, nor music from the organ. In the gloom he could see small groups of women silent on the benches. They had come in from the cold, or rested here a while, their baskets beside them, before trudging through the snow to their homes and their stoves.

Exactly on the minute he heard the scrape of boots on the stone corridor, and felt someone brush against the bench. He did not raise his head until Leonides sat down close to him. Then he saw that the trousers were not Russian uniform trousers, but worn, shabby flannels.

"What happened to you?" Jeff whispered. "Where did you get that outfit?"

Leonides didn't raise his cropped head an inch, and when he spoke Jeff could detect no movement of his lips. "I am a fugitive. I don't speak of how I got these clothes."

"Your plan?"

"Is known. They questioned Yassovsky. They questioned him for one month before they killed him."

"What're you going to do?"

"Run the border. Run the border across the Raab into the British zone. Then to the Hochschwab and our transmitter. We do not quit. We fight."

"I don't think much of your chances, Leonides. You know how they watch the border. You know how they watch for deserters. And they'll be after you. You know they'll be after you," Jeff said.

"There is no chance here. Here my face is too well known. I must go quickly."

"Do you need anything?"

"Perhaps some American money. It is wanted everywhere."

Jeff reached in his pocket and took out his wallet. He had five twenty-dollar bills in an inner pouch. He handed them under his knees to Leonides. "I still think it's terribly dangerous. You haven't papers, or anything, have you?"

"Papers are no good for me," Leonides said. "Today nobody can safely cross a boundary even with an endorsement from God. Only the gypsies travel today. Only the gypsies laugh at passports. Only the gypsies know the safe ways, for they have been doing it for two thousand years."

"I see," Jeff said. "Marina."

"We will not see each other again for a long time, Jeff. So I give you the name of another, with whom you can have liaison. Zatsikeffsky, the Civil Air Attaché."

"How do you spell it?"

"You'd better write it down. Have you a pencil?"

Jeff moved very slowly, raising his hand to his chest. He found a pencil in his vest pocket. Leonides gave him a brown paper envelope, and spelled out Zatsikeffsky, slowly and in whispers.

"And in case something happens to him, too?" Jeff asked.

"He is the last of us here in Budapest."

"Elsewhere?"

Leonides was silent.

"Can't you tell me, Leonides?"

"It is forbidden. I am pledged never to mention the name. Yet on occasion, one must take a chance, and I must now take it. I know the names of few important ones in other places. We do not wish to know. It is not good to know, for it could happen to any of us what happened to Yassovsky, and there is no man who will not talk. Only when a man is dead is he truly silent. I know one in Moscow who is above me." He mentioned a three-syllable name, and Jeff wrote it down. "You spell it?" Leonides observed.

"I've heard it before." Jeff thought of his own troubles, and wondered whether he should tell Leonides, and decided he wouldn't do it, because Leonides had enough worries now. He did say, "I've sent a report to Washington, Leonides, to a man I completely trust."

"That's good. It's not so important that you be secret now, except with the names. As to the plan itself, it is known because of Yassovsky. Now I will go, Jeff. The quicker we start, the better."

"So long, Leonides."

"Goodby." Leonides rose and moved away, his hands in his pockets, and his head lowered.

That was Thursday. At ten o'clock Friday morning Lieutenant Commander Phelan, of the Naval Attaché's office, came to Jeff's room. He was dressed in his best uniform, and wore his ribbons.

"Mr. Baker," Phelan said, "the admiral sent me to inform you that you are wanted in his office."

When Jeff entered the admiral's office he could see that this was not to be so much a trial as passage of sentence. He could tell by their stiffness. The admiral was behind his desk, and the others—Keller, Collingwood and Quigley—were seated in a semicircle, with their backs to the light. There was an empty straight chair in front of the desk, and Jeff knew he was supposed to take chair. He did not want to sit there, ever, because the light would be i eyes and he could not clearly see faces. "Sit down, Mr. Baker," th miral said.

"If you don't mind I'll move chair," Jeff said, and he did move ward the end of the desk. Then b down. In the better light he coul the admiral's face growing red.

The admiral picked up a sheaf o pers, rustled them into a pile, an them down again. The model cr carrier and four miniature destr still sailed across his desk, but in disg ful formation. "Now, Mr. Baker, admiral began, "you know why y here. No matter what my personal ings may be, I want to be fair with It's always been my contention tha ery man deserves a hearing. I'd g hearing to a seaman second class I'll give one to you. Now what hav got to say for yourself?"

"Nothing, sir," Jeff said.

"It is absolutely incomprehensit me," the admiral said, "that you consort with a Russian, and be tak by such a cock-and-bull story. N speak of your other actions. Not to tion your shameful public display b the Hungarian police simply be there's a little harmless explosion. I've seen men stand up under a six inch salvo and grin. Done it mysel

Jeff sensed that the admiral was ing him. Jeff felt that the admiral w him to lose his temper. He looked little fleet in disarray on the desk kept his mouth shut.

"If it were entirely up to me—it would be if the Department of believed in maintaining taut ship—be on the way back to the United today with L'Engle. But the consu eral here tells me I've got to be po you, because you're a Foreign S officer." The admiral enunciated eign Service officer" in what he th was a babyish treble.

"Yes, I've got to be very polite admiral went on. "I can't fire yo self. I can only ask Washington call you. And I have to prefer ch Well, that I'll do."

William Quigley hadn't said any He was sitting with his hands in h wooden as part of the furniture. Quigley felt called upon to speak you will pardon me, Admiral," he "I want to point out that I am res ble to the department for the secur Atlantis Project. Mr. Baker says th project has been penetrated."

"I don't believe it," the admiral

Quigley said, "It is not possib anyone to say arbitrarily that it h hasn't until there has been an inve tion. I propose to conduct such vestigation."

THE admiral's office was quiet William Quigley raised his co eyes. "Jeff," he said, "it is my o that you haven't told us everythin

"You're right, Quig," Jeff said.

"You've seen your Russian again, haven't you?"

"Yes, I did. I saw Leonides La again. I saw him yesterday after He was wearing civilian clothes, a was trying to get across the borde the British zone. He has become the *unbekannte Menschen*. He is a in a resistance movement agains Soviet regime."

The admiral leaned his big across the desk. "Do you make t up as you go along?" he inquired.

"Before he left, Lasenko gave m names," Jeff went on. "One here. in Moscow."

Quigley stirred in his chair. "W he going?" he asked. "Where's th senko going?"

"He's trying to get to the Hochsc They've got a transmitter up

admiral shook his impressive, maned head. "Well, I suppose I'll o go along with you," he said. . . . ncy Todd called Jeff late on Satur- orning and said, "I see you're still

"Barely," Jeff said.

"I'll come up tonight and bring some local talent."

"I'd rather not." He had been trying to write Susan, and found there was nothing really he could say.

"Just for laughs."

"Okay, for laughs." It would be good, anyway, to see a human face.

ON SATURDAY afternoon Quigley visited him. Quigley sat down in the prim way he had, and dropped a worn dispatch case, its lock askew and its seams leaking threads, at his feet. "Going somewhere?" Jeff said.

"Yes, I'm going to Washington. I suppose you can guess why."

"I suppose I can. Do you think I have a chance?"

"You're in a helluva situation, if you will pardon the language. You see, you have nothing to substantiate your story. It is true that your friend Leonides doesn't seem to be in Budapest. That I've discovered. But it doesn't prove anything."

"It's true."

"I believe it, Jeff. But who else will? It might be better if you had a friend in the department."

Jeff thought it over. "I suppose you'd call him a friend. You know Horace Locke?"

"Certainly I know Horace Locke. But he has no influence, and almost no job. I feel very sorry for him, and I'm afraid he won't be able to help you."

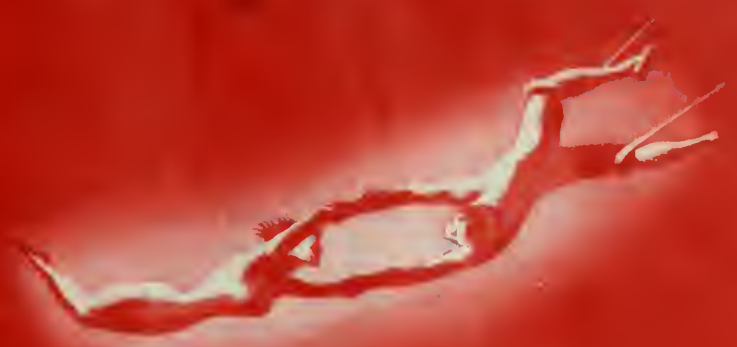
"He is the only friend, except Susan Pickett, of course."

Quigley struggled with the twisted lock of his dispatch case, said, "Darn it! Darn it!" and finally it opened. He took out a notebook. "Now, Jeff, I want you to tell me the rest of the story about Lasenko."

So Jeff told everything he hadn't told in the admiral's office the day before—except the two names—the survivor in Budapest and the one in Moscow, the big one. He knew that Quigley was going to ask for the names, and when he did ask, Jeff said:

"I'm sorry, Quig."

Quigley nodded. "I understand. As a matter of fact I think you're very discreet, Jeff, and I won't press you. But I do urge you also to send the names to Locke."



Jeff smiled. "How?"

"I'll take them."

A man couldn't do everything himself. A man had to trust other men. Jeff found he trusted Quigley as he trusted L'Engle. He moved across the room and sat down at the typewriter and wrote one brief paragraph. Then he signed his name and addressed an envelope. He folded the

paper and slipped it inside the envelope and handed it to Quigley.

"Aren't you going to seal it?"

"No."

Quigley took the envelope and dropped it into his dispatch case on top of his notebook and other envelopes garnished with red wax. He didn't say anything. He spent an absurd length of time fussing with the lock.

Jeff watched him, and then went to the closet and found his own dispatch case, which since he arrived in Budapest had been used for nothing. What was it Susan had said about this case? She hoped it would bring back something to wipe her fear away? Well, this was the only chance the case would get. "Quig," he said, "how about trading cases? Yours has had it, and I never use mine."

"No, you keep it."

"I wish you would trade. I've got reasons."

Quigley stood up and took Jeff's case and ran his fingers along the beautifully turned leather and picked at the seams and inspected the lock. Then he took his envelopes and notebook out of the old case and transferred them to Jeff's case. "This is awfully good of you."

"You're really doing me a favor when you take it," Jeff said.

Quigley shook hands, and Jeff said, "I guess I won't be seeing you again."

"I hope you'll be seeing me very soon and very often. You've done a very nice thing for me, Jeff. I don't think anybody ever did such a nice thing for me."

Jeff thought it was very strange that a hard little guy like Quigley would be so upset, and even have tears in his eyes, and he wondered why.

QUIGLEY had crossed the Atlantic sixty-four times by ship. This was his fiftieth crossing by air, and therefore something of a milestone. On this day, after he was seated in the Constellation, and had wedged his dispatch case against the plane's cushiony side with his leg, he took out his notebook—the thirtieth of identical size and shape that he had used up since joining the department—and wrote, "December 25, 1949." December 25th. Another Christmas away from home. The motors showed their power, the plane began to move, and when he was sure they were air-borne he wrote, "Took off from Budapest 9:32 A.M. Central European time."

He slept from Budapest to Vienna and he slept from Vienna to Prague and from Prague to Shannon. In Shannon he ate roast-beef sandwiches and drank a quart of rich Irish milk. It was when they were halfway across the Atlantic that he put his dispatch case across his knees, opened it and checked the envelopes within. When he came to Jeff's letter to Horace Locke he balanced it on his fingers and it was very thin and fragile, not at all like the other bulkier envelopes with their heavy red seals. He put it back in the dispatch case. Then he slept again.

When the plane touched down at National Airport he took out his notebook and wrote, "December 26, 1949—arrived Washington 10:57 A.M. EST."

Customs and Immigration knew him, of course. As he got into a cab a newsboy was yelling about a new crisis, but he didn't buy a paper because he didn't want to know of any more crises. He debated what to do first, and decided that business must come first, and said, "New State."

While he waited in Gerald Matson's secretarial office he wished he'd stopped at the airport restaurant for coffee. People came in and out of Matson's office as if they were attached to an endless chain. He said to the receptionist, "I beg your pardon, but I just came in from Budapest. Didn't the admiral cable that I was coming?"

"I really don't know," the girl said. He could see that she hadn't been long in the department.

"Well, perhaps," he suggested, "you'd better tell Mr. Matson that I'm here from Budapest, and I have to see him on important business."

"Oh, come off it, mister," the receptionist said. "All our business is important."

Into the mind of Quigley there crept a pixie. "You will, eventually, tell him I'm here, won't you?" he inquired.

"Oh, yes, eventually."

Quigley thought: I've never done anything like this before, and why I should start at my age I don't know. But it might be fun and I think I'll try it because at my age one doesn't have much fun. "When you decide to present my name to Mr. Matson," he said, "would you also give him a brief message? Just a few words?"

"Okay, Mister Quigley."

"Just say, 'Atlantis has been penetrated.'"

She repeated, "Atlantis has been penetrated. Atlantis has been penetrated. Atlantis has been penetrated. Okay, Mr. Quigley, as soon as Mr. Soukis has conferred with Mr. Matson, I'll go in there and say Atlantis has been penetrated."

"Please listen to me, dear. There was a stack of dirty dishes in the sink. I washed them. I wasn't gadding around in night clubs!"

COLLIER'S HERB WILLIAMS

A man came out of Matson's office, and the receptionist said, "Well, there goes Soukis. He's a big Greek. But I mean, big. Now I'll tell Mr. Matson you're here." She fixed her hair. "What was it you said to tell him?"

"Atlantis has been penetrated."

"Oh, sure," She went through the door.

She came out again almost immediately. She didn't stop in the outer office, but fled into the hallway. Behind her was Gerald Matson, his dark eyes blazing like beacons in the pallid desert of his face.

Quigley's interview with Matson lasted through the lunch hour, and into the afternoon. Quigley presented the documents, and then told what could not be put down on paper. He told everything, because he was a perfect reporter. He mentioned everything except the letter he had for Horace Locke. This he classified as a personal matter.

Matson asked, "And what did the admiral recommend?"

"He wants Baker recalled."

"But what about Atlantis?"

"He's laying that in your lap, Mr. Matson."

"He's not going to put it in my lap. It's Keller's baby."

"Isn't it your baby, too, Mr. Matson?"

"This Baker," Matson remarked, "has certainly fouled things up. Not that I didn't expect it. I expected it all along. My opinion is that he got himself into trouble and concocted a story."

"Whatever mistakes he may have made," said Quigley, "I don't believe Jeff Baker is malicious."

"Oh, yes, he's malicious!" said Matson. "He knows very well that my wife is a White Russian! So he cunningly contrived to quote this so-called Russian turncoat as blaming this so-called penetration on White Russians here in the United States. You know what I think it is? I think it's a plot!"

Quigley crossed his knees and seemed to be absorbed in adjusting the crease in his trousers. "You know," he said, "I hadn't thought of that."

"You don't think my wife would be indiscreet, do you?" Matson said.

"Anybody can be indiscreet."

"Are there any more questions you wish to ask me?"

"No. I'll call if I need you. Goodby, Mr. Matson." Quigley was in a hurry to leave.

When he was gone Matson picked up the telephone and called his wife. "Anya," he said, "where's Iggy?"

"Why, he's still in Hollywood."

"That place is full of Reds."

"What are you talking about?"

He hesitated, while he tried to frame the question safely. "Anya," he said, "now don't be angry, but I want to ask you something. Do you remember when Iggy was in Washington and we were discussing something very important, and I told you not to talk in front of him?"

"Of course I remember it. Why did you bring it up?"

"You didn't talk to him any more, did you?"

There was that infinitesimal moment of hesitation that the lie detector can diagnose but the human ear can only sense, and never with sureness. "Why, of course not, dear."

"That's good, dear."

"Why, what's this all about, Gerald?"

"Can't talk about it over the phone. Just remember that you never mentioned anything to Iggy."

"Why, I didn't, dear," she said, and hung up.

Gerald Matson made up his mind. . . .

Quigley found Horace Locke at his desk. They had not seen each other for two or three years, but their greetings didn't show this. In the space of their service and acquaintanceship two or three years was not a long period of time.

Quigley unsnapped the lock on his case, and Horace Locke said, "Th nice case you've got, Quig. Your ol finally collapse?"

"I traded," said Quigley, "with Jeff Baker." He brought out Jeff's and handed it to Locke. "I brough letter from him."

Horace Locke took the envelop turned it in his hands. He saw th flap was unsealed—saw that it had been sealed. "Do you know wh here?" he asked.

"I know it contains two names."

"What kind of trouble is Jeff in?"

"I don't know what's come over Quigley said. "Everything about thi is classified, some of it confidential, secret, and some of it top-secret, a still going to tell you."

"I used to be allowed to keep se

"So you did. So you did. But you'll have to take action."

HORACE LOCKE looked out window at the White House a Capitol. It was his view. He had se long time. But it always fascinate for somehow it seemed always changing. It was almost as if the ings changed with the character people inside them. "I've known since Friday that I would have t action," Locke said. "I knew Frida I had been waiting here all this tim

"I don't think it will be easy for Quigley said.

"I will do what is required."

Horace Locke considered his firs Eventually the affair would have t the Secretary. Of that he was sure tainly the news of this Russian should go before the Secretary at

But more pressing was the predic of Nicholas Baker's son. If Jeff were discredited, and tossed out department, his story of the Russi sistance would never be believed. It not be believed in any case, but o was deprived of his official standi would have no chance. The best was to sound out Matson. Horace didn't like Matson, but he unde him. He deduced it would be in M interest to get rid of Nick's son.

He dialed the Balkans Divisi girl, probably the receptionist in th office, answered. "I would like to to Mr. Matson," he said. "This is H Locke speaking. It's urgent."

"I'm sorry," the girl said in a si Tennessee twang, "but Mr. Mats gone for the day."

"Has he gone home?"

"How do I know? He's gone."

Horace Locke called Matson's in Alexandria. He wasn't hom Anya Matson didn't know wh would be home. He must be worki at the office.

Horace Locke waited thirty m and dialed Balkans again. The rec ist was still there, and he thou strange that she would be there i son had left for the day. "Are y same guy who called before?" she "Don't ring here any more. I'm

Horace Locke put down his tel gently and leaned back in his cha told himself to control his tempe buffs like this always made hi bad, made him want to go off wher weren't any people, and he kne this feeling was not right. It seen Horace Locke that people were ing. They all seemed rude and pish.

He tried Matson's home once and he still wasn't there. Well, pr Matson wouldn't make his deci once. retary, although he had a hunch the Secretary would still be on the job. Horace Locke went home to his club. . . .

That morning the Secretary had ridden for his usual hour in Rock Creek Park, breakfasted at seven, and arrived at the office at eight thirty. The early-morning broadcasts had warned him he'd have a busy day. Even Arthur Godfrey sounded lugubrious, and when there was no cheer in Godfrey then the world was in a sorry state.

The Russians had murdered an eighteen-year-old G.I. in Vienna. So said Headquarters of United States Forces Austria. Radio Moscow's version was different.

Stockholm was frightened. All night Stockholm had seen shooting stars that didn't come from heaven.

Something foul was going on in the uranium mines of the Belgian Congo. Brussels blamed it on Soviet propaganda. But Brussels also suggested that if the Southern senators could be persuaded to stop screaming their racism, the blacks in the Congo might go back to work.

The un-American Committee was sniping at one of his section chiefs whose wife's nephew had attended a Communist Front rally in San Francisco. The committee wanted him fired at once, and the section chief was in the Secretary's outer office, hysterical and in tears, with an armload of affidavits saying he had always lived in Westchester County and voted straight Republican.

The President was in bed with a touch of intestinal flu.

Greece and Turkey needed more money.

So did China.

The Dominican Republic said Trujillo was en route to Washington, where he expected to be received by the President and presented with a four-motored flying yacht, and a cruiser, three destroyers and a few tanks. He wanted to fight Venezuela.

There was bad news from Korea, Afghanistan, Damascus, Jerusalem, Prague, Indo-China, Trieste and Rome.

The Secretary lunched with the Joint Chiefs of Staff and attended a three-o'clock Cabinet meeting.

When he got back to his office, memoranda and cables rose in a ten-inch pile from the center of his desk. They were all urgent, and all required immediate decisions and answers.

The Secretary canceled his press conference.

He was presented with a scroll by the Daughters of the Spanish-American War.

He took two aspirins and a glass of bicarbonate of soda, and then dictated the speech he would make the following night at the Legion banquet.

A cable typed on red paper, labeling it extremely confidential, came in from the counselor of a Central American mission. It said the minister had been on a three weeks' toot, and what should he do?

The Secretary telephoned his wife that he wouldn't be home for dinner.

He had chicken sandwiches and milk in his office, and talked by telephone to the President, the ambassador in London, and his son, who was going to N York for the New Year's week end needed an extra hundred dollars.

France needed an extra hundred m lion.

No matter how fast he thought, couldn't seem to diminish the pile of pers on his desk, all tabbed red for gent.

He became aware that one of his retaries was dead tired and sent her ho

The Department of State was qu now. It was past nine, and the busi of government was slowing down. Ir New State, only the lights in the c and cipher section and the Secreta office still burned.

He was wearing down that pile. ten o'clock a messenger brought f final cables to be read and rejected initialed.

The Secretary's hands and knees tr bled with tiredness. His shoulders w broad and his courage was limitless, there was too much trouble in the wo for one man.

The last cable was outgoing fr Balkans to Budapest. It demanded resignation of someone in the Buda mission called Baker. The Secretary li his glasses to his forehead and rubbed eyes. It was too bad, he thought, bad that some could not stand the str and must fall by the wayside. He itialed the cable. A secretary appea and took it away. The Secretary deci to go home and get to bed. Tomor might be worse.

(To be concluded next week)

RIVER CROSSING

Continued from page 25

uncomfortable. That sort of richness was only inside a man. Plainly put, it was how much others respected you. He was not sure how poor he might be in that way just now.

"Mr. Stack," said Laura Collin.

"Yes?" He gave Laura Collin his utmost attention.

He saw a curious thing happen to Laura Collin. She was all ready with something to say. It was very sharp, whatever it was; Laura Collin definitely had a whip in her hand. But she laid it down without lashing him.

"They're waiting for you, Mr. Stack, so I think we should proceed," Laura Collin said. "Good afternoon, Mr. Stack."

He watched Laura Collin ride on. He said softly, "Well, now!" and drew the back of a hand across his forehead. There for a moment, there had been a terrific flash of intensity in Laura Collin. He wished he knew what it was. Even more, he wished he were sure why she had lowered her whip.

STACK attacked the climb again. Except for the last part, the meeting had been very agreeable to him. He was puzzled, though.

Then he got it. Or he was afraid he did. She had merely weighed his gentleness—or his softness as the men were beginning, he suspected, to call it—and found him wanting. And why shouldn't she? He understood that her family had been wiped out in a massacre by the Sioux on the Niobrara. He'd heard that. Naturally she would feel contempt for a man soft enough to feel sympathy for a Sioux. The bitterness was now understandable. But why had she laid down her whip? If there were any comfort in the thing, it lay there.

Of another matter, he was certain. Laura Collin was a woman of straightforward character. He had felt this from the first, and somehow that meeting a moment ago had whipped the fog away and he saw her character for the monument it was. Passiveness was not in her. Then why in the devil, having contempt for his gentleness, had she held back?

Near the top, Stack turned to look gloomily at the camp. The two women were just riding through a gap in the twenty-wagon horseshoe that was the camp. The wagon that normally filled the gap, and two other wagons, were to the south on the river flat. Stack could barely see the three wagons through the sand mice the wind was blowing across the flat. The figures of men, tiny and futile at that distance, were laboriously loading sagebrush and greasewood into the trio of wagons.

Stack, switching his gaze back to the river near the camp, wondered if he would be able to see any sign of the seventy wagonloads of sagebrush and greasewood they'd dumped into the quicksand, trying to make a bottom. Sure enough, he could not see more than a trace.

He crossed the ridge and walked down to the men waiting. He counted them, and the figure reached fifteen, with the old Indian not at once visible. But there was a large rock near the lip of a cut bank, and a rope around the rock, so he surmised the redskin was lying bound behind the boulder, ready for the happy hunting grounds.

Some of the men had kept their eyes riveted on him from the moment he topped the ridge, as he had known they would. Others steadfastly refused to look at him, and Stack had known these men would do that, too. He could have picked them out even, by name, before he left the wagon camp.

For Stack had a way of knowing them in a fashion that went beyond beards and clothing and voices and mannerisms. It was a facility he had. It was given to him, he supposed, as a reward for liking all people.

"Hello, Thornbeck," Stack said.

Thornbeck's grunt, his scowl, were not warm. Thornbeck was a darkly serious man with an overmuchness of jaw and shoulders. He was the wagon boss.

Stack returned to Thornbeck a hand wave of the utmost pleasure, and pa the man by. Thornbeck's scowl g ered weight. Thornbeck did not un stand that Stack's pleasure was genu that Stack understood and sympath with Thornbeck's inability to show old Indian any mercy. It was Th beck's way to be hard.

Stack went directly and gently at ting his way. He chose Shorty Ling the first.

"Shorty." He placed a friendly h on Shorty Ling's shoulder. "Sho what have we here?"

"Why, Nels, we're going to hang Indian," Shorty said.

"The Indian is very old and feeble starving, and his war party went a and left him to die," Stack said. "I in God's name did he manage a feat downing another ox?"

"With a rock, it looked like," Sh said. "Nels, remember we took his and arrows and his hunting knife a from him after he killed the first Well, he dropped this one with a st He was trying to butcher it with a p of flintrock when we found him." Sh hesitated, then added, "It was qui trick for such an old geezer, at that."

"The years do not dull the trea that is life, I believe," Stack said. always remains one value worth keepi

"It was your ox, Nels."

"Yes, Tom Davis said so."

"And the old Indian had been war After he killed the first ox, he was wa plenty."

"Yes, I know."

"Don't you think he should be h Nels? Hell, he's a Sioux."

"He is very old, and life is all he l Stack said softly. There was not m time, so Stack added at once, "Rem ber your Grandfather Ling? R how, back in Nebraska, everybody sure Grandpa Ling was going to die erybody but Grandpa and the doc

ld man," Stack said.
e Indian neither spoke nor looked

ck said, "They're not going to push you off a cut bank at the end of a rope."

Stack was sure he had some understanding of English, but there was no response.

"They did not do it because they were weak," Stack added. "It's simply a matter of the courage to be decent. But you would not understand, would you? That's too bad. But not your fault."

Stack laid the chunk of meat at the Indian's feet. He untied the ropes that bound the gaunt frame.

The old Indian began to try to get to his feet, and Stack reached down to help him; with a hissing cat sound and surprising vigor, the old man struck Stack's hand aside. The Indian tottered erect. He spat at Stack, then spat again on the ground. He bent and sank dirty walnut claws into the meat, and tottered away with it.

AS THE old man left, Stack knew some grudging admiration. Yonder walked an integrity that was still intact. It was a considerable thing when a man stuck to his principles when he was as near eternity as the old Indian was.

Stack picked up the rope which had bound the old man, coiled it and carried it with him. He walked in a heavy and burdened way, full of his dark concerns about his gentleness.

He topped the ridge, and the mountains in the west were still under crowns of snow. It was from these mountains that the sun seemed to borrow its chill. The mountains fed the river, for there was still the river and its damnable quicksand.

He glanced down at the camp, and he saw the three wagonloads of sagebrush and greasewood had returned. Men were dumping the loads into the river. There was not even enough water in the river to float the brush away. The water, Stack thought, repeating his earlier reflections, was the empty thin skin of a yellow snake. Below its film was the seemingly bottomless quicksand that would swallow these three wagonloads as it had seventy others, practically without a trace.

Only once did Stack pause on the return walk, and that was halfway down the ridge, when he was touched by something that made him halt. When he looked down at the ground at his feet, he understood himself. The hoofprints of Laura Collin's horse were there. He pocketed his hands, frowning.

He saw immediately that he would have to clear his position with Laura Collin. He needed to know what sort of man she regarded him as being. And how his qualities, if any, meshed with her requirements.

It was urgent. He recalled how she had sat her horse at this very spot; he saw the whip of words she had held, and

"How about today you row and I'll watch out for reefs?"

how she had laid it aside. And he was sure that if he knew why she had put the whip down, most of his questions would have their clear answers.

I'll ask her, he decided. Now.

He walked purposefully into camp, and said to Norfolk, "Norfolk, I brought back your rope. The one with which the Indian was tied."

"It isn't my rope, Nels," Norfolk said.

"Oh. I thought it was yours."

"It's Thornbeck's." Norfolk looked at Stack with a dogged unease and added, "I'll give it to him, Nels. Thornbeck's in ugly humor."

Stack turned away, saying, "No, I'll do it myself, Norfolk." He saw that Thornbeck was helping dump the brush into the river, and walked in the direction, then saw Laura Collin.

LAURA COLLIN and another woman were carrying a bucket of water from the river. Stack, suddenly fired with the anxieties of a man running for the crest of a mountain ridge, to see a new country for the first time, started forward impulsively. But two riders galloped in front of him, making a blinding dust. After wind had pulled the dust away, he saw that Laura Collin and the woman were pouring the water into a kettle, over a fire. Stack debated with himself, decided he wouldn't like to face two women with this, and went on to the riverbank.

"Your rope, Thornbeck," he said.

"Nels, they all wanted to hang that Indian at first," Thornbeck said.

"I believe it was something they hadn't thought over, and they realized it," Stack said gently.

"No. You talked them out of it. You've got a lot of words, and the words get you your way, Nels."

"I talked, and they saw they should let some humanity come into their minds. Let's put it that way," Stack suggested.

"Let's add more to it," Thornbeck said. "Let's say you're a big man here, but a softhearted one. Then let's ask if that's any good in a country like this."

"Thornbeck, you'll feel better when we cross the river. And we will cross. Somehow, we will." Stack extended the rope. "Here's your rope."

Thornbeck stepped away, scowling at Stack with the air of a man frantically anxious to settle this in a fisted way that he understood. "Put it in my wagon, Nels," Thornbeck said, and waited for open trouble, wishful for it.

But Stack gave the order a friendly smile and said, "Sure, of course. I should have noticed you were busy, and thought of leaving it in your wagon."

And Thornbeck, understanding that Stack had bested him without either fighting or backing down, said, "I don't know how a man handles you, Nels. That I don't know."

Stack tossed the rope in Thornbeck's wagon. He walked past the Tom Davis wagon, and saw Laura Collin was now there alone. He stood by the wagon and watched her. She was washing her hair.

The bucket stood on a box, and Laura Collin leaned over it, working the suds through her hair with quick hands. He stared at her, then suddenly placed his eyes on the distant mountains, stunned by the enormity of his desire. The breath would not move in his lungs. He knew that her importance to him was as complete as importance could be. This was as much an appeal to his life as the throaty rushing of a cool mountain stream would be to a man perishing of thirst. Presently his lungs rebelled from no air, and he coughed.

"Oh!" Laura Collin groped for a towel, bundled her hair in it, and faced him. "Oh, it's you, Mr. Stack."

"I had to stop," he said. "I hope you don't mind."

"I do mind."

"I apologize. But you made a very nice picture."

"Well—thank you."

"Miss Collin, I would like to ask you something," he said gently.

He saw move into her much the same kind of interest, a probing of his values as they related to the present, that he had seen that afternoon halfway up the ridge. She asked, "Will you wait while I rinse my hair?"

"Of course."

She swung with a swirl of skirts, put fresh water in the bucket, and again her hands made quick motions. He sensed that she was not indifferent.

She turned to him, toweling her hair, tossing her head so that her hair was a rich golden waterfall that was friendly to the sunlight. She said, "You're a direct man, aren't you, Mr. Stack?"

"I'm afraid so, usually at the wrong times," he said, smiling. "Are you against it?"

"Most women are against directness," she said. "What is your question?"

"I would like to know what happened

"It's a pleasant enough little business but there's absolutely no future in it"

COLLIER'S JACK MARKOW

to you at our meeting halfway up the ridge this afternoon," Stack said.

"Why, Mr. Stack," she said. "No woman would answer a question like that."

He looked at her, saying, "Something did happen this afternoon, didn't it?"

"Something happens to every woman, usually more than once every day," she said, smiling. "Haven't you learned that, Mr. Stack?"

He lost his patience. He was a fool, he decided. So he bowed to her deeply, and said, "My apologies, Miss Collin." He wheeled, not noticing the startled way her hands came up, the regret accompanying the gesture. He was too busy walking away to observe.

Stack went to his wagon and dropped on his tarp roll under the wagon bed, where he was still lying when Thornbeck's shout jarred him.

"Nels! Look at your Indian now!"

Stack rolled from under the wagon. "What is it, Thornbeck?"

"Yonder. The old devil's stolen a horse now," said Thornbeck savagely.

Stack ran between the wagons, and then he saw the old Indian about a quarter of a mile distant, sitting a horse on the riverbank. It was a stolen horse, all right. It was Thornbeck's roan.

Distance did not hide the insolent contempt for them which filled the old Indian at this moment. The ancient copper bag of bones sat as straight as an arrow on the pilfered horse. Stack had the impression the Indian had sat there a long time, gloating. There was no doubt at all that the old man now spat in the direction of the wagon camp. A[nd] then reined the horse about and r[ode] the riverbank.

"Can you beat that!" Thor[nton] snarled. "Wait'll I get my rifle."

There was angry shouting throu[ghout] camp, and men were running f[rom] river. Stack joined the stamped[ing] with mixed feelings. He almost w[anted] to laugh. The unmitigated gall [of] old Indian was superb. The redsk[in] vanished down the riverbank.

"My God!" a man screamed. "[My] God! He's riding right across the [ford]. There's a crossing down there!" [There] was a high hysterical delight in the scream.

Stack got to the riverbank as s[oon] any other, and he watched the c[old] dian complete his crossing. It w[as] intricate route; no wonder the [cow]train men hadn't found it. But it s[tood] clearly now. The old Indian had n[ot] it for them; the hard gray mud fr[om] roan's hoofs stained a trail on th[e] dirty-yellow river water. Alread[y] were splashing out on that trail, th[eir] sticks down into the bottom to m[ake] zigzagging course.

Stack heard low words beside[him]. He looked around, and was star[tled] see Tom Davis praying, on his [knees]. And it was all right, too. Thi[s] across the infernal river was w[ith] prayer.

Across the river now, the old [man] faced to them. He sat straight. He s[hook] his contempt, and then put back h[is] and gave a Sioux yell so faint they [could] hardly hear it. A feeble distant w[ail] but a very full expression of an in[dian] that was still intact. Then the o[ld] turned his stolen horse and began [to] to the mountains.

THORNBECK laid down his ri[fle] picked up a rock and threw i[t] the old Indian. The rock fell [in] river. "Go on, you old devil," Tho[rnton] said.

"But, Thornbeck, he's riding [a] horse," Norfolk said.

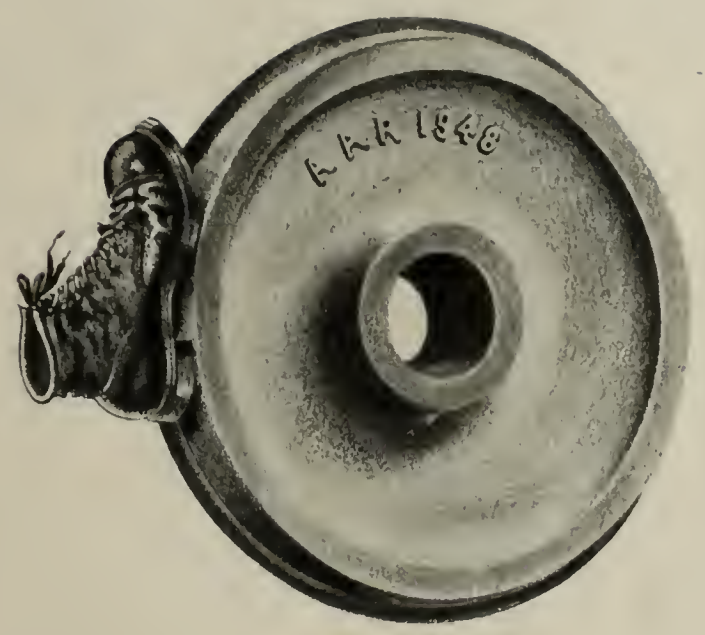
"Let him steal it, if he gets so d[amn] much satisfaction out of it," Tho[rnton] said. He came to Stack. He said, "[I] I've never apologized to a man [in] do I go about it?"

Stack saw the men looking a[t] There was not much difference [in] way they were looking at him, h[ow] ized suddenly. And he knew that [a] deal of his feeling that they were [in] his gentleness, and against him, h[ad] been justified. He, like they, had [also] been a victim of the tensions. H[e] Thornbeck, "You don't."

He went back to camp. There [was] spanning of the oxen to be done; [the] men were riding up to round up t[he] mals. Before nightfall, the [cow]train would be across the river. It wou[ld] very cheerful camp this night.

He saw Laura Collin flying ab[out] Davis wagon, helping Mrs. Dav[is] the gear. Stack leaned against the [wagon] and watched, smiling, then said, "[I] to make a fool of myself, but [I] quently do."

Laura Collin put down the cop[per] tle she was carrying. Her hands [went] her damp hair, the way a woma[n] gers will instinctively check on [the] of her appearance about which [she] doubts.



"Mr. Stack," she said, "I'm n[ot] who was foolish, but it wasn't yo[u]."

She came toward him, and he [saw] her face again the sweet certainty [of] the flower a woman's face [has] when she feels secure about an[y] tant thing.

"Do you have to have your [question] answered?" she asked. "I will, [I] insist."

"No, I'd rather not," he said, [and] "I think it would be more fun t[o] it out."

THE END

"Shoeing" the Iron Horse

Every railroad car wears
ast four pairs of "shoes." Not the kind of
s *you* wear, of course, but heavy-duty
e shoes, upon which depend the safety
efficiency of every train that rolls.

hese rugged cast-iron shoes will never
ally be called upon to clamp down on
whcels speeding at 160 miles per hour.
in the testing laboratories where Associa-
of American Railroad standards are set,
must prove they're tough enough to do
that.

es, and every brake shoe must fit in any
e assembly built by any brake manufac-
r, so that it can be readily replaced at
any railroad shop or terminal.

Fixing the requirements for such a commonplace item of equipment is just one example of the testing and development activities which the railroads carry on through the Association of American Railroads, their mutual agency for the improvement of *all* railroading. Comparable standards are also set for other interchangeable parts, such as wheels, axles, trucks, draft gear, and safety devices.

This is part of the cooperative effort by which railroads, while competing with one another for business, make sure that every piece of their equipment meets strict specifications for strength, safety, and convenience.

It is this kind of cooperation for progress which helps provide America with the most economical, the safest, the most efficient mass transportation system in the world.

ASSOCIATION OF AMERICAN RAILROADS
WASHINGTON 6, D. C.

TRAFFIC TRAPS FOR TOURISTS

Continued from page 11

and collar and tossed into a cell. The charge: disorderly conduct.

But usually it's only money that's wanted. All sorts of gimmicks are used. Lately tourists have complained to the A.A.A. about an empty, abandoned school bus parked as a decoy on certain Southern highways. Unsuspecting Yankees drive past without seeing it—and are nabbed for failing to stop for a school bus!

Some Florida school zones have 10-mile-an-hour speed limits, even though it is difficult to drive a car that slowly on main highways. In one Florida town, a stream of cars was traveling approximately 20 miles an hour in a school zone after classes were out. All the cars had Florida licenses except one—a big car with New Jersey plates.

"I alone was picked out of the line," said the Jersey motorist. "The reason must be obvious."

Cases like these have angered not only auto clubs but chambers of commerce, hotel associations, travel agencies and others anxious to get a bite of the $6,000,000,000 annual highway vacation business. Yet throughout the U.S.—even in tourist states which spend thousands of dollars to lure visitors—motorists are mercilessly bilked. In a small Arizona town, an Eastern motorist was imprisoned for making a U-turn. His six cellmates welcomed him with, "We've been waiting for you. They haven't picked up their quota for the day yet." In the morning he was fined $35.

Belligerent, abusive and discourteous treatment is only part of the sordid story. There are still many parts of the U.S. where it is difficult to get a fair trial for a minor traffic violation. You either forfeit your collateral—usually ranging from $10 to $100—and get out of town, or stand on your principles behind bars.

It Costs More to Stand Trial

Cases are on record where out-of-state motorists have been fined when no charges were preferred and no evidence presented against them. Usually, though, you have the alternative of pleading guilty and paying, say, a $25 fine or posting a $100 cash bond and returning for trial much later. Very often, your apprehenders warn you that it will cost you more should you return for trial. A North Carolina magistrate told a visiting victim that his fine was $30, but if he came back it would be $41.

Even if you are old-fashioned and righteously insist on your day in court, your trial can be whimsically postponed after an expensive and troublesome return trip. In many places court meets only once or twice a month. A college professor, demanding trial for his "offense" in Georgia, was told it wouldn't come up for six months. Another tourist was advised that since "the judge was out of town," he could either post a $20 bond and sign a blank sheet of paper that he was guilty—or be thrown in the hoosegow.

One night several weeks ago, former Judge Joseph Goldstein of Brooklyn was driving through New Jersey on his way to Washington. At Gibbstown he was stopped by a policeman accompanied by a justice of the peace and charged with driving without lights. He was ordered to the justice's home, where he pleaded not guilty and was fined $5 and $2.50 costs. Judge Goldstein paid, "under protest pending appeal," and went on.

Thirteen days later he sent a petition to the justice of the peace, moving to vacate the conviction for a number of reasons, including the ground that the justice, as a witness to the alleged violation, was disqualified to sit as a judge.

The answer of the justice of the peace was that Goldstein had admitted his lights were not lighted. Besides, said the J.P., the 10-day statute of limitations had expired. He denied the petition.

Formal hearings are dispensed with when the fining is done directly from the roadside. Receipts are usually not issued in roadside fining. Recently a corporation executive who was stopped in a Middle Western town and fined $15 requested one. Furious, the officer hauled the culprit before the local justice and warned, "Better not ask the judge for a receipt or he'll hold you in contempt of court!" The judge cheerfully boosted the fine to $25, which he promptly pocketed—without a receipt.

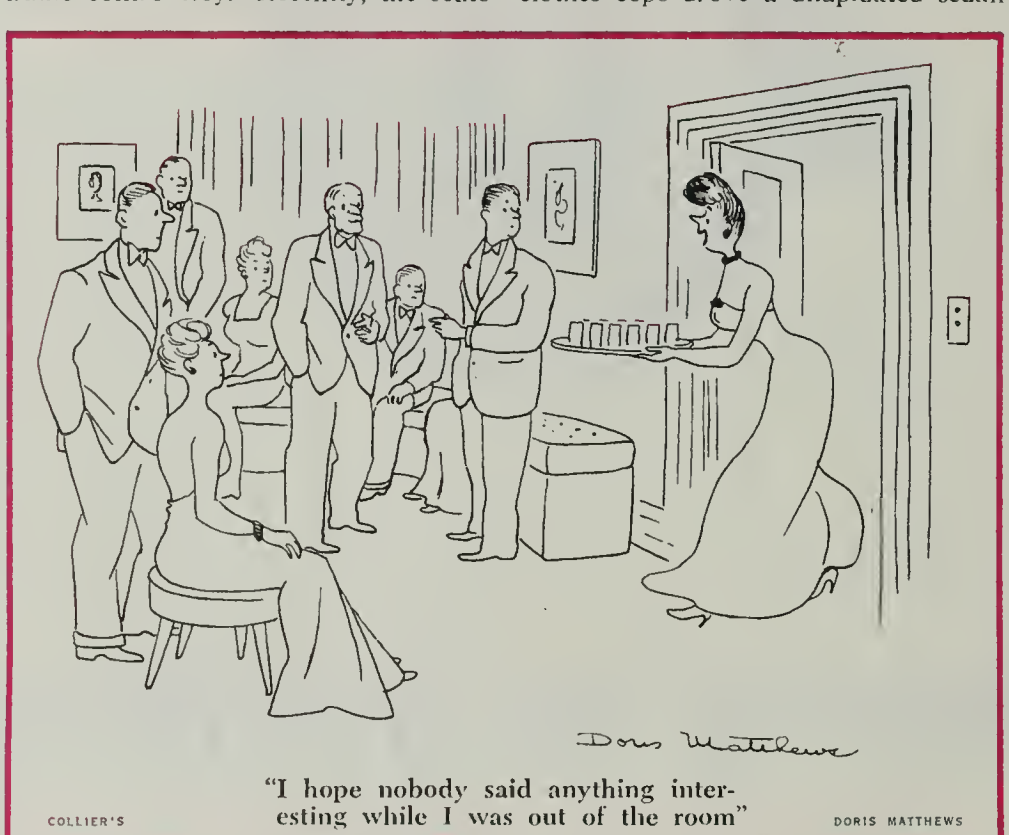
In some big cities, tickets are issued for the most trivial violations. Detroit, which issues more tickets than any other city in the U.S., has been embroiled in a bitter traffic controversy. Recently, the Auto Club of Michigan, which represents 250,000 motorists, publicly charged that the Detroit Police Department operates an interprecinct "Ticket Contest," with cops getting awards for the greatest number of tickets.

Last year more tickets were written in that city (538,425) than there were passenger cars in Wayne County (510,000), netting $2,277,729 in fines. "If this wholesale and indiscriminate passing out of tickets isn't stopped," ominously warns Auto Club general manager Richard Harfst, "motorists will soon be afraid to drive on Detroit's streets." But Police Commissioner Harry S. Toy defends his policy on safety grounds.

A New York county was recently charged by a local paper with running an interprecinct competition. Cops were rated "excellent," "good," "fair" or "poor"—with the latter worrying about being transferred back to foot patrol.

The speed trap is a well-known way of increasing the traffic violation "take." Though experts differ on what constitutes a speed trap, the average motorist would define it as a place where speeds are not posted or where the posted speed is so unnecessarily slow as to tempt him to break the law.

Responsible North Carolinians insist that an organized speed trap preys on out-of-state motorists on one of the state's major routes.



The traps seem to be operated by that old and vicious combination—constable and justice of the peace, said a representative of the official state travel promotion agency in Raleigh.

Georgia and Florida have theirs, too. A Middle Western dentist was arrested three times on the same day in Georgia. "They were all speed traps," he insists.

One young woman states she was driving a new car equipped with a governor which held it down to 45 miles an hour. She was accused of doing 70 miles per hour on a Florida highway and fined $50.

The A.A.A. has been told that "a speed trap as effective as any in the South" operates in upstate New York. Recently the New York State Automobile Association succeeded in pushing through a state law requiring cities and villages "to post suitable signs informing motorists when the end of a restricted speed zone has been reached."

A unique speed trap formerly operated in Maryland. On a lonely road, plainclothes cops drove a dilapidated sedan with only one light. Motorists approaching it feared a holdup, stepped on the gas to get away—and were nabbed.

"I hope nobody said anything interesting while I was out of the room"

COLLIER'S — DORIS MATTHEWS

Traffic lights are good revenue raisers. They are installed at many whistle stops despite engineers' objections that the small traffic trickle makes them unnecessary. During a 13-month period an Ohio justice of the peace collected almost $5,000 from a single red light. A Michigan hamlet operated a camouflaged light. The cop who camped there netted himself $200 to $300 weekly with the co-operation of the local justice of the peace.

If you ever have to face one of America's 46,000 justices of the peace, your chances of escaping unscathed are pretty thin. Over 98 per cent of all violators hauled before J.P.s are convicted.

The J.P. has become a powerful trial judge—thanks to the automobile—even though sometimes he can hardly read or write his own name and often has little or no knowledge of law. Forty-five of the 47 states having justices lay down *no* requirements for the job—not even citizenship.

Since the J.P. often collects most of his income from the redoubtable "fee" system, which prevails in 33 states, his take is heaviest during the "travel season." Approximately 20 to 25 per cent of the nation's millions of traffic cases now come before these men who are frequently "paid by the piece." How can you expect justice when your judge's salary depends on how much he fines you?

When a motorist lacks money, some J.P.s accept other items in lieu of fine rings, watches, cameras, binoculars, sp tires, auto jacks, groceries. But if American Bar Association's current t fic-enforcement program succeeds, "bargaining justice" will be elimina

The modern trend is to replace J with supervised, state-wide courts least one in each county. Pending schools for J.P.s are now being held the first time in major universities. impetus for such training has come f the most active J.P. state association California, Illinois, Pennsylvania New York.

Besides J.P. horse-and-buggy jus the methods of our municipal, po magistrate, city and county courts, w handle about 10,000,000 traffic cases nually, are also frequently disgrac Nearly half our cities do not even di guish between traffic and other cases. tell your side of the story, you may to waste a whole day in court while criminals, prostitutes, drunks and as and battery cases are tried ahead of

A New Concept of Traffic Court

Since more than three fourths o accidents are traceable to traffic v tions, a traffic court should be a c room as well as a courtroom, Norman Damon, Automotive S Foundation vice-president. Viol should leave the court thoughtful a safety rather than bitter about justic

Wide-awake communities are ta steps to improve traffic enforcement. cal papers are publishing daily lis traffic violators. Michigan is tryin standardize motor fines with viola listed "less serious," "more serious" "most serious." Some states have e lished uniform speed laws for all ness, residential and open highway a In California fines cannot be used t enforcement officers' salaries.

La Crosse, Wisconsin, has a uniqu ucational "Fair Deal" traffic cour motorist leaves court cheerfully ming because Judge George P. Rue lets him tell his side of the story questionnaire that says, "Your sign is for identification and is not an a sion of guilt."

Anxious to restore faith in the c the legal profession is now trying to tor the nation's traffic tribunals. T a nation-wide program to invigorat traffic courts is clicking on many ders. One brand-new developmen series of regional Traffic Court J and Prosecutors Conferences he leading U.S. law schools, sponsore the American Bar Association Northwestern University Traffic tute. James P. Economos, the Bar ciation's traffic committee secreta sparking the program. Judges r from these conferences with refr ideas of their responsibilities. "I understood before what a traffic was supposed to do," one new judg mitted.

Where it is necessary, police stan are being raised, too, said Frankli Kreml, traffic director of the Int tional Association of Chiefs of P

But much still remains to be do curb unjust arresting on highways ahead with that trip you were pla With luck you won't run into a cha like the Utah justice of the peace operated from his own front porc would hail a passing motorist, who have to make a U-turn to reach Then the J.P. would announce, pletely dead-pan: "I charge you making a U-turn. Ten dollars!"

All the furious motorist could d sputter and pay up

POT SHOTS BY ONE SHOT ROSS

Continued from page 24

have been in the heavy sugar. The deal prompted everybody in California, from the governor down, to query him on what made him dispose of so valuable a contract for such small potatoes.

I have asked One Shot a dozen times. He always evades the question with a quizzical look that mirrors a who-the-hell-do-you-think-you-are-the district-attorney? expression. Then One Shot will smile. He will reach for the sweating pitcher of beer and stout and proceed with an illuminating lecture on the proper temperature for ingredients that have such great slaking powers. He fills your glass. He does not neglect his. Then with great ceremony he lifts his aloft, always with this rustic toast: "Well, here's how—Father lost his farm!"

The Beginnings of a Career

Over the beer and stout One Shot tells me he was born at Browns Crossroads, Clinton County, Kentucky. He began to give Baron Munchausen a tussle for telling tall tales as a mere stripling on his father's farm. Tired of hoeing corn one day in the heat of the afternoon sun, he and a pal, Sure-Thing Slim, retreated to the protection of a shade tree. They chewed the fat about this and that, and Sure-Thing Slim hauled out some advertising which he had torn from a magazine. It read:

DO CARD TRICKS!
ENTERTAIN AND MYSTIFY
YOUR FRIENDS!
SEND FOUR DOLLARS!

"Let's send for them," said Sure-Thing Slim.

"Where will we get four dollars?" asked One Shot.

Sure-Thing Slim scratched his chin and stared a long time at Old Man Ross' prize coon dog that lay stretched lazily at their feet.

"We could sell the dog."

"And that's what we did," says One Shot Ross.

When the package of cards arrived, One Shot and Sure-Thing Slim practiced diligently. By following directions printed on the package, Sure-Thing Slim, who had quick hands, manipulated those short cards until he could make the king, queen and jack talk. After a few weeks they started looking for customers, and took the barber for fifteen dollars. Then came the butcher. A few other curious men about town were relieved of their rainy-day funds. Then the wheels of trade began to drag for want of greasing. The local chapter of yokels was fresh out of chips.

One day a stranger arrived at Browns Crossroads, and before anybody could take a pot shot at him as a possible revenue officer, he was in animated conversation with Sure-Thing Slim and One Shot.

The boys, as one, asked him whether he ever turned a card now and then for pastime. The stranger allowed as how he did and in no time at all they were in action in the old barn loft and Sure-Thing was dealing. One Shot stood directly behind the stranger, who didn't seem to mind. Suddenly One Shot let out a yelp and reached for his six-gun. The stranger seemed mildly surprised and asked, "Why, what's the matter?"

"What's the matter?" echoed One Shot. "You are holding cards my partner never deals you!"

The stranger smiled and said, "Now, don't get excited. Put down that fire stick. It might go off. When I first came here and saw Sure-Thing Slim riffle the deck, I noticed that he was pretty good. But he is still somewhat crude. Boys, it takes years. Here, look!"

The stranger took off his coat and displayed a sleeve holdout that slid cards into his hands slicker than anything Sure-Thing Slim had ever figured on. He had cards under his vest and in his shoe tops. And before Sure-Thing Slim and One Shot could recover their tongues the stranger fanned out a royal flush for them—ace, king, queen, jack and ten.

One Shot put up his six-gun. Then the stranger said, "Well, boys, what do you say? You know a lot of people in these mountains. All you have to do is send them in and we'll cut it up three ways!"

Things went along fine for a while. The boys would have done all right except for what One Shot calls "an unforeseen incident."

One morning Mister Ross addressed his son: "Wirt, here is six rifle balls and some powder. Take the old muzzle-loader and let's have some squirrel."

But young Wirt came back with only five squirrels. When he tossed them on the floor the old man said, "Wirt, where's the other one?"

"Dad, I gets him all right," One Shot explained, "but when I hits him he drops into the crotch of an elm tree 'bout seventy-five feet high, and big around as this cabin."

The old man fixed a hard look on One Shot and said, "Fetch me the ax. I mean to have me *that* squirrel for supper."

One Shot came by his name naturally because with a bead on a squirrel in his sights he always hit it right between the peepers. He is now mighty ashamed. This particular squirrel had spotted One Shot just a tenth of a fraction after One Shot spotted him. He shimmied around the upper trunk of the tree forcing One Shot to take a snap shot. One Shot missed for the first time in his life.

"And that's why I told my father a lie," he said. "I never lied to him before. But I knew that when he chopped down that elm and found no squirrel he'd feel mighty hostile toward me. And that's why I left home and joined the Army."

One Shot was first stationed at Fort Dyea near Skagway, Alaska. It was during the fall of 1897. Tex Rickard, Jack London, Rex Beach, Alexander Pantages and a number of other famed characters were there.

One night One Shot went into town dressed in civilian clothes. This night One Shot was holding. He took the poke and carefully tucked it into the inside pocket of his vest and clamped a safety pin over the pocket. Then he sat in a stud game and had a lot of luck, most of it bad. When the time came to pay off he reached for his pocket and unhooked the safety pin. The poke was gone! He turned to Sure-Thing Slim.

"Slim, I can't understand. The safety pin is still clasped, but there's no poke!"

One of the gamblers sitting near One Shot smiled. He said, "I guess you gents never heard tell of Chilkoot Charley, just about the slickest pickpocket in Alaska—maybe the whole world!"

One Shot had several occasions in the near future to catch fleeting glimpses of Chilkoot Charley. But he only got within shouting distance. Every time Chilkoot saw One Shot, Chilkoot was off like the Gazelle Boy.

One day, though, One Shot came up behind him and collared him. He held on with one arm and stretched out his other hand. He said, "Me friend."

When it dawned on Chilkoot that One Shot desired an acquaintance and held no ill against him for lifting the poke he no longer was nervous. One Shot asked him, "Chilkoot, how did you do it? I admire champions in all walks of life. I am glad to call you friend. If a man of your accomplishments will only join me and Sure-Thing Slim, we will make a barrel of dough and cut it up three ways!"

One Shot relates that the triple the evil intent did a land-office bu for a while.

When the Spanish-American broke out, One Shot found himse ing sentry duty in a camp in th above Manila Bay one dark and night. The camp was on the Some head-hunters had been t through the lines during the nigl had managed to collect a few tr

ercation. Since Browns Cross- all for law and order, the sheriff over inquiring for old Uncle

n they had been paid off at Angel n San Francisco Bay on Septem- 1901, Sure-Thing Slim, Back-to- rowley and One Shot had cut up 0 three ways. The wad had been from odds and ends like betting fights, card games and dice and o One Shot, always fast with a says to his uncle: "Uncle John, fistful of this scratch—and may swift afoot."

ncle John in the Big Money

day Ross received a letter post- Arizona. It was from Poison y, who wrote he had just returned Fannin County, Texas, where John was doing all right. Uncle ad worked on a ranch until he e to get some land of his own that bad you couldn't raise an um- n it. Uncle John, however, dug er and struck oil. In no time at all more dough than there are sheep tana.

n Tom reported: "One Shot, your hould give you back that scratch t him. He's really holding now. he's getting kind of old and if I I would hustle down Texas way otect my investment. Your uncle ys getting very sore when some rowels a horse and right away he o a fight."

Shot was doing pretty well around Crossroads and there was always ing that would come up just when set to take off. But finally word at his Uncle John had died, mak- Shot his sole heir. One Shot left Crossroads and when he got to County he headed for the court-

himself he allowed, "One Shot, oubles are over. You are a very n at last." But when he got to the use he found that his uncle had actically penniless.

gives all his money," says One to a Foundation for the Extermi- of Horseflies."

Shot decided to head for Califor- California he got into the boxing s. His greatest fighter was Arm- But he had a whole stable of pugilists, among them Chalky , Cannonball Green, Dynamite n, Young Peter Jackson, King n, Santiago Zorrilla, Dry Gulch , Forty-Five Oliver, Bitter Root harley Pitts, Pancho Blanco and o. Currently One Shot is the man-ager of Freddie Beshore, a good-looking heavyweight who has run up a string of 22 wins against two defeats.

Just before World War II, Mrs. Ross became very worried about One Shot's sudden strange behavior. One Shot took to pacing up and down in their back yard. He refused to talk. Their cat, Soapy Smith, arched his back whenever One Shot came near him. Their dog, Pancho Villa, cringed every time he spotted One Shot. So one day Mrs. Ross telephoned Bill Miller, public relations man for the Olympic Auditorium fight club in Los Angeles, an old friend of the family, and asked him to come out.

Miller hastened to the Ross manse at El Monte, just a dollar's throw from Los Angeles, if you have a throwing arm like George Washington's. One Shot appeared in deep thought. He stared vacantly as he walked up and down. Miller fell into step. He tried to start a conversation. No luck. He told One Shot the latest story he'd heard. No soap. He knew One Shot liked to sing and broke out in his very best tenor with They Call Her Frivolous Sal. Still One Shot continued his wordless walking. By this time Miller was out of patience. He turned to Mrs. Ross and said, "I guess you're right. He's nuttier than a fruitcake. The only thing to do is call for the wagon and haul him off to the booby hatch."

When he heard Miller mention the laughing factory, One Shot snapped right out of it. He grabbed Miller like a long-lost brother.

"Bill, I am right glad to see you. You are a sight for sore eyes. Seeing you reminds me I ain't been down to the Main Street Gym for a couple of weeks. Guess I'd better hurry down there before somebody steals all my fighters. I have been in deep concentration because I have a dream. In it I see two heavyweights. And I think: What a wonderful thing! It is tough enough to find one good heavyweight but in my dream I have *two* good ones and they are identical twins."

Now very excited, One Shot said he had to hurry to the gym and got into his car. As he rolled down the Freeway, he tells me, he saw a couple of broad-shouldered lads, and, being always on the lookout for talent, he slowed down for a better look. After the first glance he braked his car to a stop and reversed gears.

"Hello," said One Shot. "Could I give you boys a lift into town?"

One Shot's curiosity was bubbling over. "You boys are big enough to be fighters. You wouldn't be fighters by any chance?" he asked.

One of them spoke up. "Why, yes, we're fighters and we're on our way to the Main Street Gym."

"By sheerest coincidence I am also on my way to the Main Street Gym this very minute and I would be glad to give you boys a lift," said One Shot. "My name's Ross—One Shot Ross they call me."

The boys were astonished.

"Why, this is indeed a strange coincidence! We have a letter here addressed to One Shot Ross. It is from Sure-Thing Slim."

"Will wonders never cease!" said One Shot. "Sure-Thing Slim is my dearest friend. I make some good scores with him in the Philippines. What did you say are your names?"

"Dalton," says one of the boys. "I am Bill Dalton, and this is my brother Bob."

"Well, well, the Dalton boys," One Shot says, with enthusiasm. "Great boys, those Daltons. But tell me, which of you is the oldest?"

"We're twenty-one," says Bill. "We're both twenty-one. We're twins!"

"Shades of Poker Barkely," exclaims One Shot. "My dream's come true!"

One Shot immediately took the boys to Main Street. He had them ready for bouts within a few weeks, fighting them on the same card at the Olympic Auditorium. One Shot opines he might have developed them if the war had not interfered. The Daltons joined the service.

"If the Japs didn't bomb Pearl Harbor," One Shot tells me, "I would have bombed the Brown Bomber. I figure it all this way. The twins are so identical that when we fought Louis I would have one of them in the ring and the other under the ring as sort of a spare. If things got tough, as they probably would, I would have Bill Miller switch out the lights while I switched fighters. Joe wouldn't savvy why the guy in front of him stayed so fresh. He might blow up in sheer disgust."

The Night He Socked the Referee

Only once have I seen One Shot Ross become temperamental. He blew his top one night at the Olympic Auditorium. Frankie Van, the crack little referee, called a close decision against one of his fighters. One Shot hurled his 225 pounds through the ropes and socked Van right on the chin. Before Van could exercise his prerogative of taking a return swing, One Shot was hustled away. He was ordered to explain his riotous conduct to the California State Athletic Commission. Jerry Giesler, the famous attorney, was then chairman. Attorneys Jules Covey and Anthony (Tony) Entenza were also members of the commission.

"Gentlemen," said One Shot, "I can explain everything. Last night I have a dream. I dream I am sitting in the bar at this place Café Society, near the Main Street Gym. There's a lot of good people there. In this dream I am having, Frankie Van calls the waiter and orders drinks for the house. I feel so good about that that I immediately go up to Frankie Van and apologize for hitting him. Frankie is so glad that he apologizes to me. In this dream Frankie says, 'One Shot, I know that I gave you a bum decision—and I promise right here and now that I never again will rob one of your fighters!' "

By this time the California State Athletic Commission was laughing almost convulsively. But what really laid them in the aisles was One Shot's concluding defense.

"Gentlemen," he continued, "you are all lawyers and you will understand what I mean when I say that I plead not guilty by reason of insanity. And I can prove that by anybody in the Main Street Gym. It is a fact that always they are saying, 'One Shot, you are unquestionably very crazy because you sold Henry Armstrong's contract to Al Jolson for only ten Gs.' "

THE END

"Yes, I remember that night. I wore a white satin evening gown, a pearl choker, turquoise earrings, white slippers, and I had a gardenia in my hair. Was I out with you?"

In backswing, Fernando Isais' arm is almost perpendicular to the ground

HORSESHOE'S BIG PITCH

BY BILL FAY

FERNANDO ISAIS can do anything with a horseshoe except shoe a horse. He can nick a kitchen match into flame at 10 feet, knock the ash off your cigar at 15 feet, or ring the legs of an upturned chair at 40 feet—the regulation distance between pegs in tournament tossing.

Pitching at pegs instead of legs last summer, Fernando captured the national championship by averaging 82.3 per cent ringers over 34 games. Nothing bothered the slender Mexamerican from Los Angeles. Fernando sipped scalding tomato soup, sauntered from peg to peg and thoroughly mystified Pop Woodfield, seventy-one-year-old dean of America's 10,000,000 horseshoe pitchers.

Pop finally asked Fernando to take off his shirt. "Every time you pitch," Pop observed, "your shoulder blade seems to dive down under your armpit. Never saw anything like it. I want to see what happens."

What really happens, Pop discovered, is that Fernando has an amazingly flexible right shoulder joint. At the top of his backswing, his pitching arm is almost perpendicular to the ground.

"Coming down," Fernando explained to Pop, "the arm falls naturally like a pendulum. They fooled around with a tape measure a couple of years ago and somebody figured out that my motion lacks only about six inches of being a complete 360-degree revolution—from the top of the backswing, that is."

Fernando's rubber shoulder might have made him a top-flight tennis player, but he spent too much time pitching shoes and stringing rackets in his tiny shop near Los Angeles Memorial Coliseum. He's thirty-three years old now, but he still smacks a tremendous service and volleys with finesse. He whipped Pancho Gonzales, 1-6, 6-4, 7-5, in the semifinals of the Olympic club tournament last summer. (That's the Gonzales who later upset Bob Falkenburg, Jaroslav Drobny and Frankie Parker in the Pacific Southwest.)

"Tennis is tougher physically," Fernando concedes, "but it's harder to score points in horseshoes. A ringer counts three points, but your opponent can cancel your ringer with one of his own. For instance, you toss two ringers—what we call a 'double'—and your opponent throws a double, and it's no count—what we call 'four dead.' Guy Zimmerman of Oakland and Ted Allen of Boulder, Colorado, threw 50 'four deads' in one game at the 1940 nationals. Zimmerman started with 36 straight ringers, but Allen beat him, 50-48."

Allen, Zimmerman and Casey Jones of Waukesha, Wisconsin, are leading challengers for Fernando's crown in the nationals at Milwaukee this month. Fernando's only loss in the 1947 tournament was to Jones, but Fernando isn't worrying about him. "I can beat him almost every time," unbashful Fernando ave "Casey likes to keep the throttle do and play fast. I walk slow and p slow and he gets restless and goes his game."

Fernando has an ambition bey retaining the championship. He'd l to play a command performance the nation's number-one horsesho Harry S. (Lefty) Truman. One of first things Lefty did after moving i the White House was build a court the back yard. The porch came lat

TED PLAYS BALL

Just a little story to remember next time somebody insists that T Williams is a surly, unco-operat jerk.

"Ted," the reporter said, "I'm do a piece about the toughest field plays—position by position. Dom Maggio was talking about center fi a few minutes ago and—"

"What did he say was toughest?"

"Coming in on those low, sink liners—making up your mind whet to take a chance on a shoestring ca or play it safe on the hop."

"Dom's right. That's the tough play for me in left field, too, but t won't make a very good story for y —two guys with the same probl Look, I gotta hit a couple now. think it over. Be right back."

Ted hopped off the bench a started for the batting cage. A behind the Red Sox dugout gree him with a loud boooooo. "The ea worm," somebody remarked, "gets bird."

Ted pulled two drives against right-field fence, then slammed a li down the left-field line. Back on bench again, he said: "Funny h often I've been hitting to left this s son. Haven't tried to. Guess it's pitchers' fault. They've been putt everything on the outside corner. still pulling for right but often as —when I sock that outside pitch— ball ends up in left field."

"One of the Boston writers was s ing about half your hits have gon left, including four straight aga Cleveland last month. Guess B dreau's about ready to give up on shift."

"Hope so. Say, how's this for angle on your fielding story. DiM gio's a little guy—has trouble v those sinking liners. But I'm a skinny guy, who has trouble benc over for grounders that little D picks up easy. That's it—the toug play for me is bending way down a grounder and straightening up make the throw to second on a runner. If anybody asks me the s question, I'll remember not to tell that I really have more trouble v liners. Come to think of it, maybe have more trouble with grounders.

TELEVISION TAKES THE GATE

The Louis-Walcott minuet have set sports television back years. A pro football owner, un tunate enough to be in Yankee dium that June evening, looked at

AT DRUG COUNTERS EVERYWHERE ★ McKesson & Robbins, Inc., Bridgeport, Conn.

"Then after fourteen days on the river, and twenty-six days through an unpenetrable forest, I proceeded due north where I finally caught up with him at a dance hall at St. Claire. That was when he took my gun away from me"

COLLIER'S — TOM HUDSON

center-field bleachers and shook his head. "Less than half filled," he commented. "Before television, the fans lined up six hours early and jammed those bleachers at five bucks a head.

"Nobody," he went on, "knows all the answers, but I'm just about convinced television will take our fans out of the bleachers and park them in the corner saloon. The people who can afford it will still buy the best seats between the 20-yard lines, but you can see the game better on television than you can from the cheap end-zone seats.

"Before I sell the television rights this fall, somebody will have to pay me for all the fans who won't be sitting out there"—he gestured toward the bleachers—"and I don't think advertisers are ready to spend that kind of money yet. It doesn't look like there will be any football television from my park this fall—and don't be surprised if a good many other owners decide against television, too."

Promoter Mike Jacobs lost an estimated $70,000 by accepting $100,000 for Louis-Walcott television and radio privileges. Jacobs anticipated a million-dollar gate. He settled for $930,000, television booty included. The $50 ringside section was packed, but the $5-10-20 seats were sparsely populated.

One thing sure, television did not increase Walcott's box-office appeal. People who watched Jersey Joe in meteoric flight across the video screen won't rush to attend any of his appearances in the proposed tournament to determine Louis' successor. Maybe the promoters ought to save Jersey Joe for the Millrose Games. Track fans might pay to watch the Camden Comet try to run the first four-minute mile.

HUMAN CORKS

During the late 1880s, a Massachusetts resident named Enoch Lowell remained underwater for four minutes, 46 and 1/5 seconds.

On an even more breath-taking occasion, Enoch dunked himself for 14 minutes, 30½ seconds out of a possible 15 minutes (coming up for air 12 times).

Proving nothing, perhaps, except that there will always be aquatic nonconformists who look upon standard swimming and diving events as dull, routine exercise. Take Thomas Vincent Lilly of Philadelphia, for instance: Thomas Vincent recently celebrated his eighty-second birthday by asking his neighbors to throw him, bound and gagged, off a di board. They obliged. Thomas Vin wiggled out of the ropes in one mi and five seconds.

Lilly, a pensioned city employee, n estly discounts any element of risk can't sink," he explains. "I float all without twitching a muscle. Doc have examined me plenty of times they can't account for my corkiness.

Lilly was an amateur boxer, pr sional tap dancer and amateur diver fore he became a cork. It happene his fifty-fifth birthday when skep friends bound his ankles, knees wrists with sash cord and tossed hi fully clothed—into a swimming Lilly shucked off the ropes, undre (to his trunks), wrung out his wet clo stored them on his stomach, flo around for a bit, then dressed and s to the pool ladder.

"Weighed 170 pounds in those d Lilly recalls somewhat enviously. " I'm 150 and it's harder for me to down when I want to turn some u water somersaults. Used to do five Now I pop up after two or three."

So much for Thomas Vincent L the cork. Last year a Winter Haven, ida, youngster named A. G. Hancoc vented the most hazardous aqua trick of them all—water skiing wit skis. Two other Floridians, Dick Jr., and Glenn Kirkpatrick, quickly tered Hancock's technique. "You off riding one ski," Kirkpatrick expl "At 35 miles an hour, you put one down on the water. When it's ri firm, you put the other foot down get rid of the ski—quick."

Kirkpatrick can travel a quarter mile on his bare feet. "At 35 mile hour," he says, "the water is hard board. If you've ever walked on a golf green in your bare feet, you've pretty good idea of what hard water like."

PERISCOPE ON THE GREEN

Golf has been the worst spectator for years, but manufacturers are wo on a gadget that will give galleryit unobstructed view of every putt— when the jam is 10-deep. It's a seat with a built-in periscope. When y tired, you sit on it. When the crowd in, you raise it like an umbrella. The scope makes every spectator 10 fe —and one inch thick.

THE END

"You're right, ma'am—it *is* burned out!"

What do you do if your radio burns out? Why you call the radio service dealer who displays the Sylvania emblem. Anything short of a heap of ashes, he can fix. Count on this friendly expert whenever your set shows signs of wear. His work is tops, his prices fair. He uses both Sylvania testing equipment and Sylvania radio tubes for best results. Remember, when your radio needs fixing, look for this sign of dependable service.

s, who has lost his earlier shy- lks of life in Magoula.

gs were all right until war came," . "I was in the army fighting in . I had left a two-month-old son e. We fought as well as we could beat the Italians, too, but the Ger- vere too strong for us. I came nd found that my baby had died ation. Did you know that 55,000 died of starvation in Athens alone? And here in Magoula 20 died. The Germans were very clever. They had an airfield near here. They surrounded our village well with barbed wire and put a guard there. You have seen the well; it is only a mile from the village. It is the only well in the district.

"The Germans would not let our women draw water from the well, unless they brought eggs with them. For a gallon of water they demanded two eggs. They had already taken our cattle and our sheep and our goats. If our women did not have the eggs they got no water and children need water. My wife had no food for our children but our chickens kept laying eggs, so she had water. But the little one grew thinner and thinner. Finally my wife had to kill a chicken to keep him alive. Then she had to kill another chicken. Soon she had to kill them all and then there was nothing left to eat and because there were no eggs there was no water. And the little one died."

"Was it better after the liberation?" I ask.

"No." His face, burned a deep red by the sun, hardens. "Then they came down from the hills—the guerrillas. We welcomed them. They had fought well during the occupation. But when these men came down out of the hills they did not carry a Greek flag; they carried Communist flags. We could never understand that. They were Greeks. Why did they carry Russian flags?"

By now Mass is over and the people of Magoula are streaming out of church and the square is filled with the chatter of women and the laughter of children. Grizzled old Elias Milos, mayor of Magoula, joins us. So does Father Kokiniotis, a handsome, erect, black-bearded man with a hawklike nose and large, intelligent eyes. Everyone arises and mur-

"I don't want to discourage you, son, or interfere with yer plans; but I think it's only fair t' tell you that somebody beat ya to it. Only last week there was another artist feller up here, and he painted a pitcher of that very same lighthouse" JOHN RUGE

murs the conventional *"kallimera pater,"* and bows to the priest.

It is obvious that there is a great bond of affection between the people and the priest. Like them, Father Kokiniotis was born here in the village. He is one of them and he had suffered with them during the occupation. And he is suffering with them now, for he eats only what they eat, and his house is no better than theirs. Only his beard and his black cassock set him apart from them.

He asks if he might send to his house for a bottle of *retsina.* Everyone nods happily.

"My friend Spiros Nikas has been telling you of our troubles," he says softly. "We have had many troubles. He did not mention the pine trees, did he? In the country surrounding our village we had 50,000 acres of pine trees. The people of Magoula made their living from them and with the money they made they bought sheep and goats and sometimes a plot of land where olive trees grew. Our people would draw the resin from the trunk of the pine tree. That resin has many commercial uses; it is needed for turpentine, for paint and for *retsina."*

The *retsina* has arrived and the keeper of the coffeehouse brings out half a dozen clean glasses. The *retsina* is honey-colored and when the sun hits the bottle the wine seems to change color and dance. The priest pours the wine.

"This is the same wine they drank in Greece 3,000 years ago," he smiles. "It is flavored with resin from the pine tree. That resin also takes the impurities out of the wine. This wine is drunk all over Greece. That is why our pine forests were important to us. But the Germans used the pine trees for fuel. When they went away they burned all the trees that were left.

"We will be all right when the water comes," Filia Economou says. Smiles light up the faces of everyone at the table and they repeat the word "water" softly so that it sounds like a short prayer.

Where Water Is Scarce and Bad

"That is a dream we've had for many generations," Father Kokiniotis laughs. "Our grandfathers dreamed of a time when there would be water right here in the village square. Our well is a mile away and the children and the women have to fetch it here to their homes. It is a deep well and they have to draw the water up by hand. It is not good water and we know that the malaria and the intestinal diseases our people get are all due to the water.

"But a man came here not long ago and said that he was going to get a motorized pump from the Americans that would pump the water from the well. And he told us to get some pipe so that the water could be pumped right here to the village square. The Germans had left some pipe at their airfield and our men dug that up and are cleaning it now. We of the village are going to dig the ditch for the pipe. This man was from the Near East Foundation. He says that he will chlorinate the water and bring cement so we can line the well with it. We will be a happy village if we can have water. Not many villages in Greece have water."

"He will do as he says," the schoolteacher says, emphatically. "He told us he would get a latrine for our school and he did so."

The priest nods. "You must see the school latrine," he says. "It is the only latrine in the village. He showed us how to build it. Our children carried the bricks and the lumber and helped Spiros to build it." The village carpenter grows red with pleased embarrassment. "No flies can get inside. It is very wonderful to have a latrine in the village."

By now half a dozen others have joined us. The keeper of the little coffeehouse comes out with two large plates and a dozen forks. One plate holds hot bits of veal; the other holds slices of tomato and cucumber soaked in lemon and olive oil. There are cries of pleased surprise and now it is the priest's turn to look embarrassed. This is his surprise.

I had met these people before. I had met them in small villages in our own Southwest and in the towns of northern France way back in 1940 and in remote villages in Palestine only a month before. I had even met such people in small agricultural villages near Vyazma on the road to Smolensk during the war. These were people unconcerned with the complexities of life or with the political strife among nations. Their fight for survival occupied all of their attention.

The people of Magoula have an active dislike for Communism and a conviction that bad as their own government is, it is a lot better than Communism would be. It is Father Kokiniotis who brings the subject up.

"I know you want to ask us what we think of Markos and of Communism," he says suddenly. "I will tell you and if I am wrong my friends will correct me. We saw what Communism was in 1944. We were too small a village for them to bother with but we saw what happened in Mandra, not far away. They occupied Mandra and killed a great many people there. They brought people out from Athens and took them behind the hills here and shot them. I went and prayed over the bodies. There were hundreds of them. We all saw the bodies."

There are murmured assents from around the table.

"Do you know what they do when they capture villages in the north? First they kill the mayor, the priest and the most prosperous farmer in the village, and they burn their houses. They say to the people, 'You can divide the property which these three capitalists held. Now let your young men come with us and we will free you from the American and Fascist domination.' What is this American domination they talk about?"

Filia Economou raises her head.

"I only know that if it had not been for the Americans we would not have our school latrine," she says. "I know that soon we will have water here in the village because we are going to get a pump from the Americans. And it has been promised that we will have water right in our schoolhouse. I have 82 pupils." She adds, "When the water comes to our school they will know that it was the generosity of Americans that brought it."

"I will tell you," Elias Milos, who combines farming with the job of being mayor, breaks in, "of a man named Athanasios Diakos. In 1820 he led a revolt against the Turks who had occupied our country for 400 years. They caught him and tortured him. They put his feet in a fire and he laughed and just before he died, he cried out, 'Better one hour of freedom than forty years of slavery.' That is now one of our national songs. Markos says that the poor people of rural Greece are all on his side. Well, we are the poor people of rural Greece and there is not one person in our village who is on the side of Markos."

Elias Milos stops suddenly and his face is red. His friends clap him on the back and say, "Well spoken, Elias!" The priest smiles and fills our glasses for the last time. We clink glasses and everyone murmurs, *"Eis eyian,"* which means "To your health," and then I left.

I went to other villages and found that basically they all thought as Magoula thought.

It is easy for critics outside of Greece to castigate the present Greek government and to insist that it is not representative of the Greek people. They are right, but when they go further and say that in a free election the present government would be thrown out by the people they are being guilty of very wishful thinking. There is no doubt that the people would welcome a government that is in the tradition of the great Eleutherios Venizelos, founder of the labor party and the man who broke up the huge estates and distributed land plots to hundreds of thousands of families.

Venizelos did this many years before our New Deal was thought of and he did it because he believed that the alternative was Communism. He was the great guardian of Greek civil rights. But Venizelos died and today his labor party is pretty much of a mockery.

Criticism of this government ha violent by most correspondei Athens. The government replies placently that it was elected by th ple. Actually, in Greece, gove does not come from the people bu the top. For instance the governi currently appointing the mayors cities, towns and villages in G Even purely local problems are h by the central government in A This is a bit different from our c tion of democracy.

The charge made by Markos a followers that Greece has becom ing but a police state has been by the correspondents. It is cc true that when the Socialist Machi ventured to criticize the g ment for the wholesale execution members who had been in jail fo years, two Machi editors were off to jail. No one knows how Communists and alleged Comi have been shot during the la months. The Moscow radio and publications like the New Tim with their usual fine restraint tha sands and thousands have been ex

Aftermath of a Murder

It is a fact that the governm panicky early last May, when G Ladas, Minister of Justice, was sinated, and dragged 120 men ou and shot them. At the same time net went out to bring in carlo Markos sympathizers and a grea of them were shot and hundreds island concentration camps. Th the effect (governmental officials of acting as an excellent recruitir for Markos.

Public opinion, privately ex was bitter against the executions a prisonments. People will tell you that hundreds of those punished w Communists; they were merely c a governmental policy. And h of disgusted young men who un had no sympathy for Communi to the hills to join Markos mer protest against the government doing things.

The Soviet publications insist tween 60,000 and 70,000 political ers are being held on Makronesos Jura Island and in mainland pris concentration camps. I asked M of Justice George Melas how clos truth the Soviet estimate was.

Minister Melas is well known York, because while acting as rep sentative to the United Nations h Vishinsky squirm more than onc made Gromyko laugh. Melas, a m of the Liberal party, is one of men who talked extemporanec ly Lake Success, and you could n language. Handsome and ch George Melas is one man who i respected in Athens by all faction looked astonished at the high given by the Soviet.

"Good heavens!" he said. "Th mean we had one per cent of th population of Greece behind ba figure is absurd, of course. We h haps a little more than 20,000 p in jail. And we've executed quit and while we're on the subject going to execute some more. Ev we've executed deserved it; each a fair trial, competent counsel found guilty. These men were of the state. Don't forget that fighting for the life of our countr

When Melas touched on the s the recent killing of George Pol Columbia Broadcasting System narrowed with anger. Melas is i of the investigation into the m the American correspondent.

"What made me absolutely s said, and his voice trembled, " ports that we in the governme hand in the murder of George.

HANK KETCHAM

SPORTING ODDS

At a track in England many years ago, a mounted policeman was helping to get the race horses into starting position. At the cry, "They're off!" the policeman's horse broke with the field and the astonished bobby found himself desperately trying to pull in his mount. The best he could do, however, was to slow him down to third place. On the stretch, the horse began to fight it out with one of the official entries, and, despite the policeman's efforts to pull out of the race, he came in second, a scant neck behind a horse ridden by Freddy Archer, one of England's greatest jockeys.

—Dee Eckman, Allen Park, Mich.

what a monstrous lie! You can accuse us Greeks of a great many things and you would be justified, but no one ever accused us of being downright stupid. For our government to instigate the murder of an American correspondent would be downright stupid. We are depending for our very existence on America today.

"We've been working hard on the killing of George Polk. We've explored every possibility. To my mind there is only one answer. The Communists murdered him to embarrass our government."

There are a great many in Athens who share Melas' view that Polk was murdered by the *antartes*. The Greeks always refer to the Markos forces as *antartes* (revolutionists). Members of the American mission and the American embassy always refer to Markos' followers as "the bandits."

The statement by Melas that Greece was fighting for her very existence is certainly no overstatement. Even Lieutenant General James A. van Fleet, ranking American officer in Greece who now virtually runs the Greek army, was none too sanguine about immediate military success against Markos. Van Fleet is tall, hard-muscled and flat-stomached and looks like the combat man that he is. Van Fleet is the possessor of three D.S.C.s, three Silver Stars, three Bronze Stars and three Purple Hearts. He was a full colonel under General Patton during the war.

Van Fleet got along with Patton and now he gets along with the Greeks.

The Politicos Offer Advice

In the beginning Greek politicians tried to tell Van Fleet and his officers how to go about defeating Markos. Today they follow his "suggestions" with enthusiasm. Now the Greek army is engaged in a full-scale offensive against Markos—an offensive planned by Van Fleet.

"But from here on in it won't be easy," Van Fleet said, pointing to the big map on his office wall. "Look at those mountains. There have been bandits in those mountains for 2,000 years. Not even the Turks could drive them out and they had something like 400 years to do it.

"However, I am hopeful that by the end of the year the Greek army will have broken up Markos' big concentrations. Once that is done the big military phase of the fighting should be over and it should develop into a police problem."

The Greek army is using American guns, aircraft, rations and leadership. The *antartes* are using Yugoslav and Albanian equipment and Moscow-trained military leaders. Russia supports Markos; we support the Greek army—but only Greeks are killed. And a lot of Greeks are being killed or made homeless.

The hopeless refugees are the immediate problem of owl-faced Theodore Dessilas, Minister of Welfare. I caught the minister just as he returned from a six-day flying trip to survey the situation. He was a discouraged and unhappy man.

"We have between 600,000 and 700,000 refugees to take care of," he said, and he couldn't keep the despair out of his voice. "If we could only have one convincing military victory it would give them—and us—hope and confidence in the future. Our whole economy has come to a standstill. The *antartes* have no great military strength but they have great nuisance value. They dash into a mine and kill twenty workmen and then flee. You can't expect workmen to go back into that mine. Markos raids a rural area and kills a few farmers. You can't expect the other farmers to keep on working. They take their families and move out of the territory. It's not a bright picture."

If I have dwelt overlong on the shortcomings of the Greek government it should by no means be construed as any championing of Markos. Let's take a look at this character. He is Moscow-trained. So is Nikos Zachariades, the real brain of the Markos movement. Zachariades has been described as the most brilliant student ever to attend the Moscow School of Oriental Studies. As secretary-general of the Greek Communist party he is responsible for the policy of the group which is called, in typical Soviet terminology, "Markos' provisional people's democratic government."

Like any Soviet-dominated group, this one relies a great deal on propaganda as a weapon, and from the looks of the propaganda turned out to date it seems obvious that the second team is in there. On May 27th of this year the Geneva newspaper, La Voix Ouvrière (The Voice of the Worker), published a harrowing photograph which depicted ten starving children. The caption under the picture read: "These are victims of Athens monarcho-Fascists. Their parents have been deported, arrested or shot by the Athens monarcho-Fascists in the pay of the Yankee imperialists. They were found roaming the Greek countryside and were saved by the people's army of General Markos."

The same picture, with a similar caption, was used in the press of Hungary, Czechoslovakia and France. There was one slight error in the caption. The picture was actually taken in 1941, not in 1948, and it showed Greek children who were starving under the German occupation. It was then reproduced in a book, The Greek Triology, written by Colonel W. Byford-Jones and published in 1945 by Hutchinson & Company of London. I found the book in an Athens bookshop. The pictures were identical.

The "provisional people's democratic government" broadcasts a great deal, and some of the broadcasts are models of hysterical invective. May I present a sample or two? When a Markos attack had been repulsed in the Sterea Hellas area of Greece the radio blasted, "Van Fleet ordered the vassal criminal generals of the monarcho-Fascists to slay and exterminate all the noncombatant population of Sterea Hellas." Another time the radio droned, "As soon as he arrived in Greece supermurderer General van Fleet inaugurated the policy: 'Kill all prisoners of war.'"

And one day the radio told the world, "The murder of George Polk was inspired by the American imperialist Governor Griswold and the supermurderer van Fleet." Yet one more: "The American and Athenian tyrants will not s money to care for refugee children stead they march them naked and less through the streets of Athe attract sympathy."

This kind of hysteria is dished three times a day. The Greek govern isn't very good at propaganda itsel it never descends to such depths. most effective Greek propagand know is a thirty-three-year-old eng named Constantine Doxiadis. A g ate of the Architectural College in ens, he took his doctor's degre engineering in Berlin.

A Vast Rebuilding Project

Young, dynamic Doxiadis is about the only Greek alive who is politician. He belongs to no party has respect for none. His title is D tor-General of Reconstruction an immediate job is to rebuild the villages destroyed during the war b Germans. Doxiadis began his re struction in the most devastated re the section close to the Bulgarian b in the north. He designed the house stayed in the north until they were pleted.

Markos and his men were al threatening this region but Doxiadis on building.

"When you say that a man love soil of his country it sounds very Doxiadis told me in sharp, clipped qual English, "but it is also a lot of l You won't love the soil long if you to sleep on it with nothing over yo the stars. Now, a home is the lin tween a man and the soil. Give h home and he'll love the soil. Once rebuilt the villages up north we m out. Markos came in, then, trying recruits. The people laughed at What did he have to offer them? had homes. Give all of our people h and you won't find many Comm in the country."

There is an old proverb which "Greece and poverty have always sisters," and most Greeks accept t the truth. They'll have to accept it truth for many years. But they ar fully nice people and someday they remember that the word "democ was coined by their ancient fore and they may decide to try it thems Villages like Magoula will have Every schoolhouse will have a latrin Greece will be a pretty nice count live in.

THE INSPECTOR HAD A WIFE

Continued from page 17

d arrive at a conclusion only after s collected facts. Is Mr. Shuman "

held him incommunicado, awaitour interrogation, sir."

ules and regulations are engraved ters of gold on your heart! While I to the gentleman, kindly inquire if eighbor, Mr. Mohammed Dejani, a passenger on the Basra train to- Secondly, I wish to see the boatwho took a lady across the river anded her at Nathir-al-Ni'am Street ly before nine thirty. Now bring Ir. Shuman."

Here, sir?" The sergeant looked ingly at the corpse.

Ve shall not disturb Miss Violet. witnesses are less inclined to lie in presence of the dead."

WHEN his assistant had gone, Chafik went to the window and parted raperies, which were closely drawn. room was airless. He looked out on hadowy plumes of date palms and ink night sky of the city, and noted the seclusion of the house. It was unded by uncultivated land, and a ing path led through clumps of negd palms to Mamoun Avenue. "There o neighbors within clear sight. The permits secretive approaches and rtures," Chafik said in a flat voice. e drawn curtains worried him. It he custom in Baghdad to shade win- against the fierce heat of the day, open up everything at sundown to the breezes. "There is something rmal here—" he announced in the voice, as the door opened and a fat g man was ushered into the room. Miss Violet always keep her curclosed, Mr. Shuman?" he asked.

Only when the sun was strong. She opened them before the proper . The English like air." The young looked with horror at the body on divan. "I insist—"

My position as investigating officer." Chafik, "puts me in the unique po-n of doing all the insisting." His face suddenly hardened, and he t on in a voice like a blade, "How had Violet Shaw been your mis-?"

human flushed. "You treat me with- courtesy."

I am here to solve a crime. I have ime to be nice to you." The Inspec- balanced himself on his toes like a er. "When did you first meet Miss w?"

Two weeks ago." The young man's n face was now pasty.

You knew she had been the mistress Mohammed Dejani?"

I knew there was another man," Shu- said. "She needed protection and ed to me."

Such women as Miss Violet," said fik softly, "prefer the protection of an who is foolish and still rich, to of a man who is still foolish but not . Doubtless you insisted she should see Mr. Dejani again."

She gave me her promise—"

And that was why you were suspi- us when you saw her on the water t tonight?"

he young man interlaced his pudgy ers. "Naturally I was surprised. I expected to meet her tonight, but telephoned about five o'clock to say had a violent headache and could go out."

You state you saw the lady at eight nty. Was she far from you?"

On the opposite side of the road, near Lido Café—"

You recognized her face?"

human hesitated. "I knew her by dress."

"I am pleased with your answer." Chafik made a little bow. "The river promenade is poorly lighted and the moon did not rise until nine o'clock. It would have been scarcely possible to distinguish faces. Was she unusually dressed?"

"She was always distinctive. Also it would be sufficient to pick her out by reason of the absence of a robe. The English do not hide their charms in the way of our women."

Chafik said, "Let us look for the dress that Miss Violet wore." He went to the bedroom and opened the closets. There were many dresses on the hangers, but Shuman pointed unhesitatingly at one. It was a dazzling print, a pattern of huge orange and blue flowers on a white ground, fussy with cape sleeves and bows.

The Inspector winced. "This is indeed distinctive. What did she wear on her head?"

"A blue kerchief tied under her chin. I had given it to her myself."

HOW TO
SPOIL YOUR HOLIDAY

When wandering o'er hill and dale,
Dear Nature Lover, do not fail
To snare your share of poison oak,
As firmly you prospect and poke
Among fierce vines for flowers, wild—
Said oak is likewise far from mild.

—Margaret Fishback

"Then you are prepared to swear the lady you saw was Miss Shaw?"

The young man said, "I cannot deny the evidence of my eyes."

Inspector Chafik opened a packet of Ghazi cigarettes. "Please smoke," he said. "It steadies the nerves, and I may have to give you a shock. But first look around and tell me what is missing."

Shuman obeyed. Then he pointed to the table at the head of the divan, and said, "There was something there. A bronze nude fitted with a clock—"

"The clock was doubtless set in the navel. Such an *objet d'art* belongs here." Chafik looked at the garish room with amusement, then turned quickly on the young man. "Miss Violet argued with somebody before she died. That person may have been you."

"She was dead when I came here!"

"I am a weaver," said Chafik. "I use facts as threads. It is a fact you came to this house in a suspicious mood. It is a fact that suspicion is the seed of dissension. Anger may have caused you to seize the statuette with the novelty navel and strike the lady."

"She was already dead—"

"Mr. Shuman, you saw the lady alive at eight twenty and dead at about eight fifty. It is a ten-minute walk from the Lido Café to this house. Miss Violet took time to change from her distinctive dress to her equally distinctive wrapper. She was also embroiled in argument with the killer. This person could scarcely have left before you arrived."

"I thought I heard the back door close as I entered—"

"You did not mention this in your statement to my assistant. Amended evidence is open to doubt."

The young man made a babbling sound.

"Please sit," Chafik said, not unkindly. "The design I have shown you is ugly, but you should not be frightened by it. The weave is loose and certain threads have been discarded. As a craftsman I do not like it. I had expected a different design."

He turned to Sergeant Abdullah, who had just entered. The sergeant announced, "Sir, I have completed the inquiries. The other suspect was a passenger on the train. I have telephoned the police at Hilla to remove him at that junction and return him here."

"Excellent! But it was tactless to say 'other suspect.' Mr. Shuman was already upset. It would be well for him to go home and spend what is left of the night in prayer." When the man had gone stumbling out, Chafik asked Abdullah, "What of the second inquiry?"

"Sir, I have a boatman who took a lady from the Rafidain Wharf and landed her at Nathir-al-Ni'am Street at the hour you foretold. Although she was clad in an enveloping robe, he recognized her by her voice. She was Madame Dejani."

The Inspector turned the signet ring on the little finger of his left hand. "What else did the boatman say?"

"Sir, he said Madame Dejani dropped a bulky object into the river on the way across. He condoned with her on the accident and offered to get his son to dive. She replied that the object had no value, but was obviously upset."

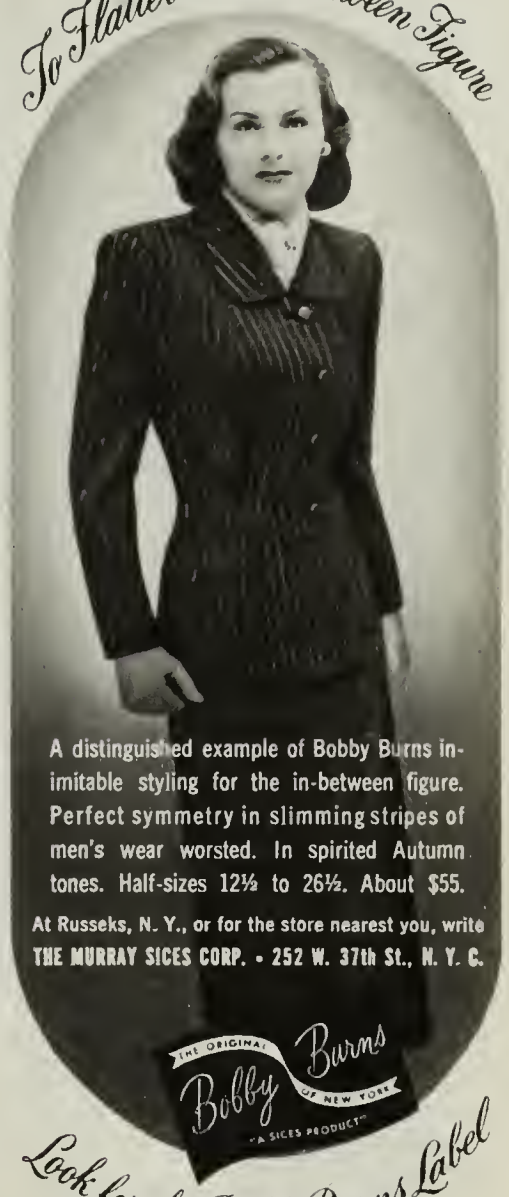
Chafik looked down at the ring. "How very unfortunate Mr. Shuman saw Miss Violet after the train left for Basra!" he announced in a bitter voice.

AT NOON on the following day, Chafik entered his house on the Street of the Scatterer of Blessings and sank into a chair in the living room. With the gesture of a man breaking lifetime habits, he pulled down his tie and opened the collar of his shirt.

His wife, who had appeared with a glass of cooling sherbet, knelt to remove his shoes and replace them with slippers. She gave no greeting, and the little man remarked, "Although you are silent your thoughts are noisy."

Leila said, "Your men came and took away Madame Dejani. The face of Sergeant Abdullah was that of a judge. She has been arrested?"

"Detained." Chafik briefly closed his eyes, and when he opened them again they were dark with shadows. "Do you think this gives me pleasure?" he asked. "I am a hunter of men. Sometimes I detest myself so much it surprises me my body does not shrivel—"



Leila said, "Please, my man, do not speak harshly of yourself. You are just. Without doubt facts forced you to detain our neighbor."

"The facts are a key, a certain bulky object, and the evidence of two witnesses. The key was in the bag of Madame Dejani and fitted the door of Miss Shaw's house. Such a key had been given to Mr. Dejani."

"His wife may have found it and kept it, not knowing what it was."

Chafik said harshly, "She used it last

NEW SULFA DRUG PREPARATION FOR ATHLETE'S FOOT

Relieves Itching, Stops Cause of Infection, Heals Red, Raw, Cracked, Peeling Skin.

Beware of Athlete's Foot! At first sign of itching, tiny blisters, cracked or peeling skin between toes or on feet, use Dr. Scholl's Sulfa Solvex. This wonder-working powder contains the miracle drug, Sulfathiazole. Relieves itching at once; kills deep-seated fungi on contact; aids rapid healing; helps prevent reinfection. Only 60c at Drug, Shoe, Dept. Stores.

Dr. Scholl's SULFA SOLVEX

night. I know she took a taxi from the railroad station to Mamoun Avenue, a twenty-five-minute journey. From there it is an average fifteen-minute walk to the house. The place is secluded. There are no neighbors. It can be reached by a path across wasteland. Furthermore, the night was dark until the moon rose and a woman wearing a chuddar would have been as a shadow. But it is established by fact Mrs. Dejani was there. At approximately ten minutes past nine she appeared at the Rafidain Wharf, an easy eighteen-minute walk from Miss Shaw's house. She engaged a boatman, and on the way across the river dropped an object into the water. The boatman, who thought it an accident, offered to have it retrieved, but was refused. He remembered the spot, which is where the current swings. We dredged the thing up."

"What was it?"

CHAFIK raised his clasped hands to his mouth, and looked beyond her with shadowed eyes. "A heavy bronze statue with an inset clock. The base matches the wounds in Miss Shaw's head," he said. "The evidence is damning. We know that Miss Shaw was out until eight twenty. She was seen by a witness. When she returned she found Mrs. Dejani. One can understand the conversation between them was not pleasant—"

"Our neighbor is a calm person."

"When a woman becomes jealous she becomes primitive. Madame Dejani afterward fled from the house concealing the weapon under her robe. We have found stains on the inside of the robe. She left by the back door as the witness who found the body entered by the front. I am afraid she is guilty."

"Surely she did not confess?"

"She said nothing. I begged her to defend herself, but she only shook her head. She has a singularly sweet face and great strength of character. How unlike Mr. Dejani."

"He did go to Basra?"

"We took him off the train at Hilla. He is a very weak man. He admits he saw Miss Shaw yesterday and was given his congé. She had taken another lover. When I confronted him with the weapon and the evidence, he wept. I had a desire to beat him."

The little man rose and began to pace the room. "I have woven a pattern with threads of facts, but two threads remain unused. They are frayed. But they are threads." He rearranged the collection of clay animals from Sulaimaniya on the mantel shelf. "Why," he demanded in a hollow voice, "were the curtains drawn in Miss Shaw's room when the evening air would have refreshed it? Why did she change into a wrapper; how was there time since the two women had to talk, and Madame Dejani to commit her deed of violence? This period is barely twenty minutes."

"Why worry yourself about unimportant details?" Leila gave a sly look.

"No detail is unimportant." Her husband spoke sharply. "You should know me, that I must get everything exact." He looked at her suspiciously. "I think you know me quite well," he said dryly.

"Then I will correct you about Madame Dejani." Leila lighted a gold-tipped Egyptian cigarette. "You see her as a woman so jealous of her husband's mistress that she killed her. Yet there had been other mistresses, and they did not rouse this primitive jealousy of which you so glibly speak."

"Glib—I?" Chafik was shocked.

"I have noted," said his wife, looking down her long thin nose, "that men are more prone to insane jealousy than women. Our weakness is an overwillingness to sacrifice ourselves to our men. It is so with Madame Dejani. She has given everything to her husband. When he gambles away his money, she sells her jewels so that he may gamble again. She treats him as a doting mother treats an erring child."

"Almost you make me believe it is not in character for a woman to kill her husband's mistress."

Leila said, "It is not in the character of Madame Dejani." She walked gracefully to the window and rearranged the curtains to cut off a red-hot spear of sunlight. She said over her shoulder, "Your unused fact about the curtains is peculiar. It was so hot last night that nobody would have left them drawn, even in a house not secluded."

The Inspector lifted a hand for silence. He was now huddled in his chair, and although the temperature of the rooms was over ninety, he shivered. Presently he announced, "It is unsatisfactory. The weave cannot be finished when there are still unused threads."

Leila said nothing.

"If Shuman had not seen Miss Violet—" Chafik began. The sentence was left dangling, and he sat up. His eyes glowed as he fixed them on his wife. "Will you be shameless for a good cause?"

"Shameless?" She was shocked and bewildered.

"I intend to make an experiment." The announcement was made in the voice of a martinet, and Leila thought: Now he is the Inspector of the Criminal Investigation Department—

THE river boardwalk leading from Saa'dun Square was a pleasant spot on a hot summer's night. The numerous cafés along the Tigris were strung with lights which twinkled like fireflies among the palms. Boats glided near the walled bank, and the music of flutes and Rababbas was added to the chatter of the young Baghdadis who crowded the walk.

Near the Lido Café, where the crowd was dense, Inspector Chafik walked with Daoud Shuman. The fat young man resembled a sleeper roused from a bad nightmare. "I still cannot believe your news," he said.

Chafik said sympathetically, "It must be a great relief. You were certainly in an unpleasant position. Circumstantial evidence is often damning, and last night I almost arrested you."

"I am sorry that Madame Dejani—"

"Let us forget the unfortunate lady." The Inspector made a sweeping gesture. "How pleasant it is after the heat of the day," he continued. "Baghdad has a certain magic at this hour. Almost one expects to meet Haroun al-Rashid. It was about here where you saw Miss Violet last night?"

"Just across the road—"

"Excuse me if I again ask you if you are certain it was she."

"Inspector, I could not be more certain. I—" Daoud Shuman came to a halt. The color which had returned to his flabby cheeks drained. His mouth opened. He clutched at his companion's arm and stuttered, "The Merciful One defend us! I see her—"

The lights of the near-by café were shaded by the fronds of the palms, which moved in the breeze and sent changing patterns of shadow across the road. A woman, colorful as a butterfly in a dress patterned with blue and orange flowers, came briefly into the light. She wore a bright blue kerchief over her head and walked with a swaying motion of shapely hips. As the shadows flickered, she appeared to dissolve into the darkness.

Shuman shouted, "But she is dead!" He put his hands to his pounding heart, and his fat body wrinkled like the fabric of a collapsing balloon. A man stepped swiftly behind him and gave the timely support of strong arms.

"Bunny! Chateau Rochefort, 1927, the year I was born. I wonder if it's the same month!"

COLLIER'S JOHN MILLIGAN

"Soothe him, my dear Abdullah," said Chafik. "When he recovers from his shock, bring him to my office."

The Inspector parted the gathering crowd with an imperious gesture. A sleek black car slid out of the night, and as he opened the door the woman in the bright, cheap dress scurried across the road. She huddled on the back seat of the car and Chafik heard her sob as he joined her.

"The shame of it!" came the voice of his wife. "Oh, to parade myself in that woman's dress. I feel unclean—"

He took her hand. "May I be forgiven—" he began, humbly.

Leila said, "I am all over blushes. To think I showed myself with face uncovered. The looks of the men made me feel naked." Her imprisoned hand fluttered and then was still. "It was a successful experiment?"

"The new design is complete." Her husband's voice was hard.

THEY brought Dejani's wife into the Inspector's office at C.I.D. headquarters on Al-Rashid Street. Madame Chafik, now decently swathed in a chuddar, went to the woman and led her to a chair. A protesting voice outside the room was heard to say, "I demand a doctor. I am ill," and Mr. Dejani entered. He was a tall man, slightly stooped, with a wide, loose mouth and unstill hands. He did not look at his wife as he sat down.

Daoud Shuman came in propelled by Sergeant Abdullah. The fat young man was still trembling and looked anxiously at the two women, whose faces were hidden by the folds of their robes.

The little man behind the big c

R ARMY AND YOUR AIR FORCE SERVE THE NATION AND MANKIND IN WAR AND PEACE

Collier's believes...

...GERMAN RECOVERY IS A "MUST"

FOLLOWING months of discussion after the crack-up of the Big Four London talks on Germany last winter, six nations recently got together on a plan for western Germany.

The nations: Belgium, Britain, France, Holland, Luxembourg, the United States.

The plan: roughly, to give western Germany a federal government of its own, under close Western Power supervision; to allow the area to recover economically as fast as possible; to tie the iron, coal and steel output of the Ruhr into the Marshall Plan, the Ruhr itself being under joint six-power control with some German participation; to keep adequate occupation forces in the Reich until peace is deemed secured.

Thus the Morgenthau plan to pauperize Germany forever goes out, and a realistic scheme takes its place.

The United States, it seems to us, should insist on the new plan's being carried through over all obstacles. We're well aware of various objections to it, but think the chances must be taken.

It is possible, as the French De Gaulle faction fears, that Germany may revive militarily via a revived Ruhr. Another clear possibility is a great, final clash between the Western Powers and the Iron Curtain countries for control of all Germany.

But what matters most to Americans is something else than these items. What grinds Americans is the fact that for more than three years we have been financing a German poorhouse, to the tune of millions a week. This bids fair to go on indefinitely, unless western Germany is somehow pulled together, braced up and allowed to become again the workshop of Europe.

The six-power plan offers the best hope we know of for achieving that result in the shortest possible time.

We'll just have to take our chances, it seems to us, on Russian stubbornness and Communist villainy, on the nightmarish things seen by French politicians, and on the misgivings of various Americans who are still in vengeful mood regarding Germany. The main thing is to get this Old Man of the Sea off the U.S. taxpayers' back, and to get him off in a hurry.

●

. . . WE DON'T KNOW OUR OWN STRENGTH: James A. Farley the other day made what seemed to us a remarkable speech, at a sales executives' convention in New York. The address had to do with American goods as they turn up in other parts of the world, and how they impress the people who see them or use them. Mr. Farley should know about this, of course, since he gets around the map quite a bit as a supersalesman for that soft drink.

What he said in substance was that our products, from tractors and automobiles to beverages, are flowing out over much of the world in enormous quantities . . . that their quality is uniformly high . . . that almost everybody with money to spend in other countries would rather buy American goods than those from any other nation, because (and here is the pay-off line) "American goods abroad everywhere carry with them a feeling of integrity and of good faith."

We take for granted in this country such things as uniform quality at given prices; trade-marks and brand names designating products which will invariably be as advertised, no matter where you buy them; and so on. Few of us realize that those things do not obtain in many other countries. "Let the buyer beware" is still the ruling word in numerous foreign markets, and if you get stung on some purchase it's just your tough luck.

To find that in one country, at least, goods are honestly made, honestly branded and honestly marketed is a tremendous and an exciting discovery to many a foreigner. It is almost certain, too, to make him admire that country, despite the world-wide Communist campaign of anti-U.S. vilifica and here, it seems, is one element in our nati strength of which most of us are unaware. Let' come aware of it swiftly—and determine to onto it.

●

. . . HERE'S A BOOK THAT SHOULD SELL: W waiting patiently for a book of memoirs t written by some big shot in the late war, and taining a number of passages to this effect:

"I realize that more than a few people beli was a very wise and farseeing character in the conflict. Matter of fact, I wasn't.

"True, I was able to meet some emergencies th the proper action or almost so; but that was m luck. I was shot with luck at my birth—why, I know—and in simple honesty I must attribute tually all of my 'achievements' to that stark, plicable fact.

"I didn't win the Battle of the Blowout, his ri- ans to the contrary. That classic engagement won by a combination of my luck and the eve ing courage of the U.S. fighting man.

"When I made mistakes in the heat of the flict, I didn't have the guts to admit them out —though I told myself that I was keeping about them for the sake of the men's morale. press was very kind in this respect, and co up for me more than once—on the plausible as I see it now, questionable ground that the p on the home front couldn't take the truth whe truth would hurt.

"In short, I was just a human being, strug along from day to day, and any resemblanc tween me and Superman is purely coincidental

As stated, we're waiting patiently for a written in that vein, and have a hunch the buying public would eat it up. But we fear wait a long, weary time, if not forever.

Color by TECHNICOLOR

Original Screen Play by WILLIAM LUDWIG

Suggested by the Ian Maclaren Sketches "Doctor of the Old School"

Directed by .....FRED M. WILCOX

Produced by.....ROBERT SISK

When "The Green Years" appeared on the screen a few years ago it was hard to imagine there could be another tale so wonderful in sentiment, a love story so tender. M-G-M found such a narrative in "Hills of Home" and has now dramatized it magnificently in Technicolor.

The story was fashioned from the well-known sketches by Ian Maclaren. William Ludwig did a screen play that really tugs at the heart, and the director Fred M. Wilcox wielded his megaphone superbly. Robert Sisk, the producer, had the guiding hand in the production.

It has been cast with skill. No one but Edmund Gwenn could play so brilliantly the beloved Dr. MacLure who shared the joys and heartaches of his people. It is another Academy Award performance, equal to his well-remembered "Miracle on 34th Street".

Only Lassie could portray so intelligently the dog who at first outrages the Scottish homeland with his cowardice and ineptness in the stern tasks of the hillside. His attachment for the old doctor leads to what in human terms, would be called regeneration.

For the character of the Highland youth whose courage overcame great obstacles—the natural selection was Tom Drake, young hero of "The Green Years". His sweetheart, and most attractive, is talented Janet Leigh.

You will want to visit the "Hills of Home" because, as Tom Drake whispers to his sweetheart in the picture: "The very hills of the Glen are special hills. The sweetest hills of all. The hills of home."

M-G-M is proud of this motion picture and rightly so. It lifts the screen a notch. It is important because it is good.

THE WEEK'S MAI

UNWANTED

DEAR EDITOR: When I read W. B. Cou
ney's article Unwanted in this week's C
lier's (July 17th) it made me proud to
on his team fighting un-American "Am
cans." Courtney starts his article wit
statement to the effect that the first bo
load of DPs came over on the Mayflo
in 1620. I as a Jew am glad no "patriot
Indians objected to that landing becaus
the son of an emigrant wouldn't have b
able to send four sons to the war zones
that those early Pilgrim Fathers' philo
phy could remain a working sensi
democratic force. What philosophy
these objectors using? Certainly not t
of the Sermon on the Mount.

GEORGE BARKIN, Brookline, M

. . . Never in my life have I read s
hearts-and-flowers drivel. Comparing
DPs to the Pilgrims, indeed! Did the
dians publish heart-rending accounts
the persecuted Pilgrims in England
pass laws and raise subscriptions to b
them over? Did the fugitives arrive
ocean steamers, nourished on fresh fo
attended by ships' doctors, and a safe
rival guaranteed? Did they land in a co
try complete with Social Security, vacci
pasteurized milk and oil burners? I
pig's eye they did!

My heart bleeds for the DPs. It bl
for everyone who is unhappy and
rooted. But let's be realistic. Life is
certain and insecure for us all. A se
life is unnatural.

Let the DPs work out their own dest
Let one of their leaders come forth
a plan for resettlement in Africa, such
Liberia. Or maybe even Alaska. Let t
build their own heritage as our foun
fathers did. Let them become grea
their own way.

RUTH BINGHAM DE LAU
Hamden, C

. . . It is to be hoped the article will ar
interest enough so that Congress will
ther a reorganization of the IRO to m
it more efficient.

Humanely, giving these Unwante
chance—a new lease on life—would b
inestimable value not only to them b
us as a nation. We would demonstra
the world our greatness as a democ
nation by truly being a haven for the
pressed peoples of the world and
merely talking about it.

KEEP UP WITH THE WORLD

BY FRELING FOSTER

Of all wild animals, members of the deer family undoubtedly possess the most highly developed homing instinct, an outstanding example of which concerns a number of Scottish stags that were shipped from Scotland to New Zealand a short time ago. Soon after their arrival, several escaped from their new quarters and, days later, were found far out at sea swimming courageously toward home, 13,000 miles away across both the Pacific and Atlantic oceans.

One of the most impressive hoaxes of all time was perpetrated in London in 1704 by a French adventurer known as "George Psalmanazar." Posing as an educated native of Formosa, which neither he nor any Englishman had ever visited, the impostor ingeniously invented and wrote several books about his country's strange language, religion, manners, customs, geography and history. So complete and convincing were these works that Psalmanazar was accepted and lionized by British society until he revealed the deception nearly 30 years later. The books had created such faith in the man that few of his contemporaries believed his confession.

In 1912 in New York, fire insurance was still issued with little or no investigation, and arson, therefore, was so common that members of the city's fire department decided to publicize the situation dramatically. So they rented a cheap bare room, furnished it with a chair and curtains costing $4, and then one of the firemen, dressed in plain clothes, got the articles insured for $127,500, or nearly 32,000 times their actual value.

Special issues of postage stamps, when produced in small numbers as collectors' items, are so profitable that, in Liechtenstein, the income from their sale constitutes about one quarter of the country's total revenue.

Although the Marquess of was one of Britain's busiest stat for 56 years before his death in he also managed to achieve the tation of being the greatest hu all time. Between 1867 and when his secretary kept an exa ord of his hunting expeditio Marquess is credited with killin 728 animals, including tigers, buffaloes and rhinoceroses, an age of 216 a week.

Among the scores of glorify tles used by the native princes dia and Pakistan, a unique "Sawai" which is employed Maharaja of Jaipur, Sawai Ma Bahadur. As the word mean and a quarter," his subjects c him 25 per cent better than a nary monarch, a fact constan pressed upon them by his roya each of which carries a quarte duplicate directly beneath it.

A device that enables person talking over the telephone, to s other on a television scree around the instrument was set demonstrated between two buildings in New York duri summer of 1930. But as it is to to be practicable, no attempt t it for general use has ever bee

Reading from left to right: Ross, Ben Roth, Salo and Roir in an antic

THE cartoons on pp. 34, 50, 53 and 70, labeled Ross, Salo, Roir and Ben Roth, are the work of four brothers—the prolific and genial Roth brothers. There is one Roth sister. She doesn't draw.

Born in Austria, the Roths survived World War I and its aftermuss, then immigrated to the Bronx in 1922, bringing two earthly possessions—a sense of humor and drawing talent. Collectively the brothers worked their way through the New York public schools and into art schools, slinging vegetable crates in markets, running errands and freight elevators, and doing this and that.

Brother Ben started the boys on the road to riches. One day he submitted a "rough" to Collier's which promptly "okayed it." Before collapsing from excitement, Ben carefully informed the brothers—who promptly dashed off a few thousand roughs. Al, then known as New York's Leading Freight Elevator Cartoonist, from his habit of decorating elevator walls, made the second sale—for $15. He signed the cartoon Ross.

After that it was only a matter of tramping a few hundred thousand miles between cartoon editors, toting hundreds of thousands of roughs, and the Roths—now known professionally as Salo, Roir, Ross and Ben Roth—were operating humming cartoon factories. Today they average from 25 to 50 roughs a week. Combined, they can easily fill your magazine with laughter—selling gags by the piece, package or pound.

The brothers all married the same year—1937—and are busy raising more little cartoonists. "Let's see now," we thought we heard a non-Roth cartoonist once mutter, "four times eight to the thirtieth generation divided by 22 cartoon markets @ $25 a gag equals—"

MARQUIS CHILDS, the distinguished writing and radio man responsible for the political scoop on p. 14—Why Ike Said No—was lecturing a journalism class at Columbia this year when the new Columbia prexy, General Ike himself, walked in. Mark asked Ike to explain his secrets of working with the wartime press.

The general obliged by recounting how in North Africa he'd calle American correspondents tog unexpectedly for an off-the-reco nouncement: the date of the im ing Sicily invasion, about six off. The general asked for ab secrecy. What followed was e what Eisenhower had anticipatec newsmen were so overwhelme responsibility they didn't dare t about any phase of the war in j after that except in a sort of coc time they asked the general ne put such a burden on them They'd rather not know.

"That basically was how the eral did it," sums up Mr. Childs craftily found responsibility w best honor system with newsme

WE ASKED Jack Finney copped the first of our ne Story $1,000 Awards with his hil whodunit rib, It Wouldn't Be (p. 20), how he'd done it. "I a finish a mystery," he admitted, " confused as to just who done why, and not even too sure wh actly, the corpse was. Then m picks up the same story, and minutes later, about page 36, sh briefly, 'The daughter—obviou moment she strolled in the gra bor that butter wouldn't melt mouth.'

"This sort of thing encourag to get my little burlesque off m before Hercule Poirot drove m well-padded cell."

When asked about his plans f future of the Star Award mone Finney said he hoped to take a order course which advertises low That Man! You, Too, Ca Private Eye!"

REPLACE YOUR PRESENT THERMOSTAT WITH THE NEW HONEYWELL

PLUG IN

Chronotherm

ELECTRIC CLOCK THERMOSTAT

No more getting up an hour too early in a cold house to push up the thermostat! Nor do you have to remember to lower it at night to save expensive fuel. Chronotherm, Honeywell's marvelous new electric clock thermostat, will do all that for you—automatically. It will save you about 150 hours of precious sleep each heating season.

Furthermore, Chronotherm can save 10% or more of your winter's fuel bill. For example, if your average fuel cost is $150.00 it can save at least $15.00; if it is $200.00, you can save $20.00 or more. In other words, Chronotherm soon pays for itself and goes on paying dividends year after year.

Best of all, you can now save all installation expense. The new "Plug-In" Chronotherm can be connected in place of your present hand-operated thermostat, in just a few minutes.

And here's another big plus. Chronotherm is also an attractive and useful electric clock.

Don't wait until cold weather comes to get Chronotherm on the job.

Phone your heating, service or appliance dealer today for prompt delivery

NEW "PLUG-IN" MODEL

- ★ You can connect it yourself in just a few minutes
- ★ Save installation expense
- ★ Take it with you if you move
- ★ Save 10% or more of your fuel

FOR YOUR NEW HEATING PLANT

Whether you build or modernize your home, your heating plant should be controlled by Chronotherm, to insure maximum comfort, convenience and fuel economy.

ECOND MAN ON THE TICKET

BY EDWIN LANHAM

vernor Warburton told his beautiful young secretary that there was nothing in his past to prevent him from becoming Vice-President. But a shington gossip columnist found something—something that would smear like mud. Beginning a new serial of love and political intrigue

HE expression on Governor Willis G. Warburton's full, relaxed face was familiar. I had seen it the night he tried to conceal his pride and satisfaction as he read aloud a telegram from his opponent in the gubernatorial contest, ceding his election, and again the afternoon a three-year-old bearing the War- on colors nosed out the favorite to win the President's Handicap, $50,000 added, k in the days when the Governor owned a small racing stable. This time I thought ew what it meant; it meant that the Governor had a full house, at least. My hand a nine-high straight.

Even though I was sure I would take a beating this time, I did not mind. It was d to see the Governor enjoying himself; it was good to see the lines of strain in ace relax. Campaigning is hard on the most durable candidate, even for the sec- man on the ticket, and Governor Warburton had campaigned with an indefati- le sense of responsibility to his country and his party. I was aboard his special because I wanted to see him in Washington, Vice-President of the United States. as there to help all I could, even when it involved bucking a full house with a -high straight.

Bill Evers, the Governor's press secretary, had dropped out when the Governor ed, and the other three players, all newspapermen assigned to cover the Warbur- campaign, had failed to improve their hands on the draw. I was left there with a straight, facing the Governor's pat hand and looking into his pleased, amused eyes.

"Roy," he said, "this is going to cost you."

He said it like a man with a bludgeon, and a casual observer would never have

Clyde McDonald was just leaving the table when I looked in. Lucy gave me the high sign—but big

guessed there was a ten-cent limit. At worst the hand could cost me hardly more than half a dollar, but the Governor had drawn his heavy eyebrows down over his blue eyes, he had set his square jaw, and looked as hard and overbearing as he could. Of course I knew Willis Warburton. I had known him for ten years, from the time I broke in as a reporter covering the Statehouse, when he was highway commissioner. So I was sure that if I were so rash as to continue the betting he would simply grin and show his hand, if he knew he had me beat.

"I'm raising you one dime, Roy," the Governor said.

The three reporters grouped around the table in the Governor's private car grinned because of his sonorous tone, like a carnival barker. They liked the Governor, and enjoyed these casual games of poker almost as much as he did, although later, they would probably continue the game at considerably higher stakes in the press car. They knew the Governor needed to relax

The Governor put his dime on the table. "It's up to you, Boswell."

He often called me that, because I had whipped out a campaign biography entitled Second Man on the Ticket: The Career of Willis G. Warburton. There was a pile of copies on a table in the private car, and the only resentment I had ever held for the Governor was because he had never read one, on the grounds that that sort of thing embarrassed him. He had helped little in the preparation of it, and Bill Evers and I had pieced the facts together from newspaper clippings and talks with relatives.

In the past few years I had written a couple of biographies, thoroughly researched and documented, which had been well received by the critics. I never asked the Governor if he had read them, but I knew he had, and thought well of them, and he called me Boswell as a sort of appreciation of my risking what reputation I to write a campaign brochure.

I looked again at my nine- straight, squirmed again. "Oh, h I said. "I fold."

The Governor's bushy eyebr went up and he pursed his lips. "W Roy," he said, with fatherly reb "You shouldn't have done that. I h nothing." He faced his cards, sho two pairs. The other players lau and the Governor said, "First ti ever bluffed anybody with a ten- bet." He grinned at me.

"Next time I'll call with this said, and took my Win With War ton campaign button from my l and dropped it on the table. " think its chances are worth a d Governor?"

"No comment," the Governor "Whose deal?"

Bill Evers reached for the cards his shuffle was interrupted by L Strawn, the Governor's personal retary, who came in from her offi the car ahead and laid a telegra the table at Bill's elbow. Lucy warm brown hair and warm gray and she walked with a quick, min step that caught the eye and he usually a little longer than good n ners allowed.

"This came at that tank-town we just made, Bill," she said.

BILL picked up the telegram read it with a worried expres He usually looked worried. The d of a press secretary are varied an remitting, and I doubt if Bill had a night through since he took ove job when Warburton first ran for ernor. He was a serious, ner young man who stuttered a little he was excited. Anything unexp had a way of throwing him off ance, with the result he walked a tightrope as press secretary to a didate for the Vice-Presidency, somehow at the same time he al managed to keep his center of gr low enough to stabilize his head.

"Fellows," Bill said, with an happy frown. "I guess we'd b postpone proceedings here. S thing important has come up."

"Yes, sure," the reporters They all stood up, nodded to the ernor, grinned at Lucy Strawn filed out.

"Bill," the Governor began, lea back in his chair and smiling pati "What's exercising you now?"

"Listen to this," Bill said, and the telegram aloud: "Boarding a Marketville stop please arrang commodations."

"Yes?" the Governor said.

Bill said with emphasis, "It's s 'Clyde McDonald.' "

"McDonald?" said the Gove "Clyde McDonald? Oh, you that fellow from Washington?"

"Hatchet-man McDonald," said. "What does *he* want?"

"No doubt we'll find out," Governor Warburton, and s wearily. "Did you break up the just for that?"

"I did," Bill said firmly. "And won't be any more poker games

The Governor laughed toler "Bill, you're always issuing thes retarial commands, with a sn your ink-stained fingers. May why?"

Bill stuttered a little, it wa gauge of his excitement. "G- ernor, don't you know who McDonald is?"

"A newspaperman," the Gov said. "Just another columnist."

(Continued on page 30)

He gave Lucy Strawn a speculative glance as she bent to put the cards away. She straightened, and met his eyes

Kansas legislators give Attorney General Arn (left) only three men to patrol the state's 80,000 bootlegger-infested square miles. When desperate, Arn calls on Lou Richter, State Bureau of Investigation chief, for help

KANSAS STAGGERS TO THE POLLS

BY COLLIE SMALL

Stop us if you've heard this one: In Kansas you call up your bootlegger and after having a few you trudge to the polls and vote dry. But maybe this time—Oh, yeah?

SOME years ago, in front of the railroad station in Wichita, Kansans raised a shining monu-t to the memory of Carrie Na-. While it lasted it was customary passers-by to pause for a draught e cool water that gushed from the tain and to reflect with varying ees of despondency on the great ades that have kept Kansas dry las, that is only the way it *used* to The weary traveler no longer is to lose himself in quiet medita-at that shrine of temperance. In spring of 1946, the monument was cked down by a beer truck. Whether it was the will of the gods or a simple case of erratic driving that dislodged the tombstonelike chunk of granite will not be established until November, when Kansas votes again on whether to go wet or stay dry. On Election Day, Kansans will pull the levers that elect the governor, a senator, the usual complement of congressmen, and any number of local officials, each of whom will have sworn to uphold the duties of his office as they have never been upheld before. But the real issue, to be fought to the death, is prohibition.

This is a perennial issue, and while it in no way affects the availability of spirituous liquors in Kansas, there being plenty for everyone, it is a problem which Kansans enjoy grappling with periodically just for the moral exercise.

The last time the state voted on prohibition, in 1934, the late William Allen White, the Emporia editor, predicted that most Kansans would stagger to the polls and vote dry. He was right. When it was all over, the dry forces had won by 89,000 votes and to celebrate the victory a good portion of them toasted the cause with homemade Kansas Deep Shaft.

What will happen this November is beyond the ken of ordinary mortals who are still baffled by the paradox in 1934. One theory is that Kansans operate on the selfless principle that each of them is the only person in Kansas who can be trusted with liquor. The average Kansan is sure it is best that he keep it away from his benighted neighbor, who drinks from a pail. Another, more plausible, theory is that the voice of retiring Senator Arthur Capper, a lifelong "teetotaler," is still powerful enough through his many newspapers and farm journals to blow the Wets down.

Whatever the reason, the arrangement to date has been a convenient one, everything considered. The Drys

WHY IKE SAID NO

BY MARQUIS W. CHILDS

THIS is the story behind Dwight Eisenhower's "No." It is set down as I saw it at close range.

A year ago the Eisenhower boom began to take form. The general got the feeling that he was being stalked by a possessive demon that he could not shake off. As Chief of Staff he was trying to carry through the enormously difficult task of changing the Army from a wartime to a peacetime basis. To his office in the Pentagon Building, with the row of windows looking across to the distant dome of the Capitol, came many visitors.

Among them were old friends who had been with him through the campaigns of Africa and Europe. They would ask about his current problems. But invariably sooner or later they would begin to hint about politics and the Presidency.

"The thing that gets me down," Eisenhower often said at that time, "is that my oldest frien behave like this. They just can't seem to believe when I say I don't want it. They kind of sm and—"

The hinting and the smiling and the direct qu tioning increased. To everyone who inquired, harassed Chief of Staff repeated a statement ma in his home town of Abilene, Kansas, shortly af his home-coming in 1945:

PORTRAIT BY ROBERT S. SLOAN

"In the strongest language you can command, ou may say that I have no political ambitions at l. Make it even stronger than that if you can. I'd ke to go further than Sherman in expressing my- lf on that subject." (General William Tecumseh herman in 1884, when offered the Republican omination, said: "If nominated, I will not accept. elected, I will not serve.")

In the months to come, Eisenhower considered sing the same language. But the second sentence emed to him to violate his own sense of a sol- er's duty. After all, as many of them were to re- ind him in a great outpouring of letters, millions f young men had been drafted to serve under his mmand. What he felt most strongly was that ere should be no limit on the duty of any citizen, d particularly of any soldier, to serve his coun- y in any way he could.

But in political-minded Washington, where am- tion and a yen for power are second nature, the eptical smiles grew broader. They refused to be- ve that Ike really meant it.

Last December the general and Mrs. Eisenhower ere invited to a dinner at the smart 1925 F Street lub. It was organized by the club's sponsor, Mrs. aura Curtis Gross, for a group of Pennsylvania oliticians celebrating the election to Congress of epresentative Franklin H. Lichtenwalter, Speaker f the House of Representatives in the Pennsylva- a State Legislature. Lichtenwalter had defeated a .I.O. candidate running on the Democratic ticket, nd the Pennsylvania Republicans wanted to let e world know about their victory. They did just at—but not quite as planned.

Among Those Present at the Party

Significantly enough, in the light of later politi- l developments, the faction behind Lichtenwalter as headed by Pennsylvania's venerable Joseph R. rundy and his right-hand man, G. Mason Owlett. make the dinner really an occasion, invitations ere sent to all Republican bigwigs in Washing- n, including the candidates then under iscussion. And surprisingly enough ost of them came. Present were Sena- r Arthur H. Vandenberg of Michi- n and Senator Robert A. Taft of hio as well as a stable full of dark orses. It was a gay party with no hold- g back on the cocktails and the wine.

When the men were alone for coffee nd brandy, the conversation immedi- tely turned to politics. With the facil- y and the warmth that are so much a art of him, Eisenhower began to talk bout the plight of the country. Soon ost of the others in the room were stening. He talked about how in the ispute between labor and manage- ent both sides were simply thinking f themselves and not of the country. he threat of inflation was conse- uently real and terrible. Because anagement was a more cohesive roup, perhaps it could take the lead forgoing higher profits to set an ex- mple and call a halt to the inflationary spiral. hus the general held forth.

To the politicians present this sounded like the lk of a candidate. Apparently they could not redit Ike with holding a sincere conviction. A few ghts later a radio commentator took to the air ith a disputed version of what Eisenhower had id.

According to this commentator, "General Eisen- ower, who has been mentioned as a possible Presi- ential candidate, propounded his views on how to re the domestic inflation threat, and his proposal as that the government call in the big industrial aders of the nation, and put the pressure on them agree to reduce all prices for a period of two or ree years, so as to eliminate all profits whatso- ver. . . . When it was suggested that maybe the lea would not appeal to them, the general is re- orted to have suggested that the solution, then, ould be for Congress to enact a 100 per cent tax n corporation profits, and use the proceeds for a rogram of subsidies, to bring the prices down by rce of government."

Someone had decided to spike the general's can- idacy by making him out to be irresponsible and a angerous radical. Immediately a public row was n over what the general did, or did not, say. The only two newspapermen at the party, Frank R. Kent of the Baltimore Sun and Arthur Krock of the New York Times, both refuted the commentator's version.

What the public did not know, as the ensuing tempest raged, was that one of the guests came to Eisenhower with a remarkable offer. Senator Vandenberg went over to the Pentagon to tell the general how indignant he was at what had happened.

"I am going to make an affidavit stating what you actually said as I heard it. And I'm going to make that affidavit public," the senator said.

Eisenhower was smarting at what he considered a gross violation of the ordinary rules of hospitality. He had persistently refused to comment on the controversy in spite of a hundred queries put to him. Expressing his deep gratitude to Vandenberg, he said:

"I don't want you to do it. I don't care what they say. Just let it pass. They won't believe anyway that I don't want it."

This incident did two things: First, it strengthened the general's ties with Vandenberg, for whom he already had a great admiration. Second, it helped to convince him that the professional politicians in the Republican party wanted none of him and would do everything in their power to block him.

But with the year's end, events began to move swiftly and the boom for the general filled the political horizon. State organizations of Eisenhower-for-President were being formed. Offices opened to receive contributions from those who wanted to promote the campaign.

When the general realized that sincere people, perhaps thousands of them, would put up cash in his interest, he decided to act. With his friend, Major General Floyd Parks, then head of Army public relations, he discussed how best to put his refusal. It was at this time that a prominent Republican came to him with a proposal.

"What if I brought a half-dozen leaders of the party, including maybe even a man talked of as a candidate, would that influence you?" the visitor asked.

"That's not hard to answer," Eisenhower replied, "because I know it couldn't happen. I know that the people who run your party don't want me."

It was decided finally to put the refusal in the form of a letter to one of Eisenhower's most impassioned promoters. Leonard V. Finder, publisher of the Manchester Union-Leader at Manchester, New Hampshire, had written to say a slate of delegates pledged to Eisenhower would be entered for the Presidential primary to be held in New Hampshire on March 9th. Finder enclosed a front-page editorial urging election of the Eisenhower delegates.

For three days, spent mostly in the privacy of his quarters at Fort Myer, General Ike sweated out his reply to Finder. He wanted to make his refusal clear beyond any doubt, but he also wanted to be certain that he did not shirk duty as he conceived it. With the advice of Parks and two or three others the letter was gone over and over. When the last comma was in place, it was released by Parks with a significant memorandum which said that it was being made public "because General Eisenhower hopes through this means to inform every interested person or group that he is not in politics and that he would refuse nomination even if offered."

Each sentence of that now historic document had been carefully weighed and measured. Nevertheless, certain passages were charged with more meaning than others. One is the expression of "my conviction that unless an individual feels some inner compulsion and special qualifications to enter the political arena—which I do not—a refusal to do so involves no violation of the highest standards of devotion to duty." Another is:

"Politics is a profession; a serious, complicated and, in its true sense, a noble one. In the American scene, I see no dearth of men fitted by training, talent and integrity for national leadership. On the other hand, nothing in the international or domestic situation especially qualifies for the most important office in the world a man whose adult years have been spent in the country's military forces. At least this is true in my case."

Disclaimed "Miracle Man" Abilities

In the immediate aftermath of his refusal the general felt a vast sense of relief.

"They were attributing powers to me that no man could have," he said. "They were trying to make a miracle man out of me. That's what it came down to. Well, I'm not that and I just won't have it."

For a time, at least, the letter took Eisenhower's name out of the political headlines. He was preparing to make the change from military to civilian life. A great many offers had come to him. Some were from business firms offering front jobs with large salaries.

The general was finally prevailed upon to accept the presidency of Columbia University at a salary much lower than some of the fancy figures held out by business. He was deeply interested in education and he felt that such a position, in the nature of a public service, was in the tradition of his career. But promptly a political interpretation was put on it. He was taking this opportunity, it was said, to build a bridge from the Chief of Staff's office to the White House.

At this time Eisenhower was also preparing to write his memoirs. He obtained a stipulation from the United States Treasury that since this was his lifework, the fruit of his entire career, he would be taxed not as though this were income but as though it were a capital gain. This meant the general could keep a much greater part of the proceeds.

So Eisenhower was sitting pretty. He finished dictating his life story and got ready to go away on that long-promised vacation. But the political hex kept bobbing up. Rumor got around that he would be the guest of George E. Allen on a golfing holiday in Georgia. Known as the White House court jester, Allen is a shrewd Mississippian whose friendship with Presidents Roosevelt and Truman helped him to climb the business-government ladder. One of Ike's friends came to him and urged him not to vacation with Allen.

"I don't care what they'll think," the general said with considerable heat. "George Allen is a friend of mine and I'm not interested in his politics."

As a matter of fact Eisenhower was the guest not of Allen but of William E. Robinson of the Herald Tribune. But news photographs showing Allen and the general together in golfing togs may have helped to get the Eisenhower boom moving in another direction.

A combination of circumstances had sent President Truman's rating in the polls tumbling toward the cellar. At the same time his civil-rights program alienated Southern politicians who began to look for some way to sidetrack the President. A popular candidate was the first necessity of all the dissident elements. This was the genesis of the Democratic boom for Eisenhower. And this one was even greater than the Republican balloon that had been punctured in January.

Eisenhower was hardly established in his spacious office in Columbia University's Low Memorial Library before a stream of Democratic politicians began to come to see him. At least eight senators and a half-dozen *(Continued on page 76)*

Julius Caesar, great general, smart man, refused the crown only three times. Dwight Eisenhower, smart man, great general, turned it down at least six times. Here's the story, told completely for the first time. And told with authority, by one of Eisenhower's good friends

SOMEONE TO WATCH OVER

Katie

BY W. L. KNICKMEYER

For all Sam cared, his ex-wife could lead her own life. But he drew the line at wolves like Sweetie Pie Venner, seven times married

IT WAS Friday night, the apartment was quiet, I had the whole week end free for work, and I was busy. I'd just diagrammed the molecule we were working on at the lab—one of the hydrocarbons, a tricky one—and was staring at it when the buzzer went bzzt. I sat there. After a minute it went bzzzzz-bzt. I turned around and looked at the door.

"Busy!" I yelled. "Go away!"

The buzzer said bzzzzzz—without stopping. Somebody banged on the door. Somebody began kicking the door. Somebody wanted to come in.

I listened to it for a while. By this time, any normal person would have gone away. There was only one answer. And there was no use trying to dodge. I was on the fourteenth floor, and she'd look in all the closets first thing. I put down my pencil, went to the door and opened it.

"What the hell do you want?" I said. "I thought you were in Reno?"

Katie looked up at me. She had a little hat cocked up on top of her black hair, a red dress, a pair of little black shoes. She was being a sweet, wistful, appealing little girl.

She said, "Darling," and waved her lashes. "I'm back. Are you glad to see me?"

"No."

"I came straight to you, Sam. You were the first person I thought of." She waved her lashes. "Aren't you going to ask me in?"

Without a tommy gun, how could I stop her? I opened the door wide and stepped back. Katie glanced over her shoulder, said, "All right, boys," and came in. The doorman came in behind her, then the elevator boy, then a cabdriver. They were loaded with luggage and pets.

"Just put it anywhere," Katie said.

I swallowed. I said, "Wait. Listen. Aren't we divorced? I thought—"

Katie looked surprised. "Why, of course we are, darling."

"But you can't just move in on me! Dammit, Kate, it's indecent!"

She waved her hand at me, frowning. "Don't be Victorian, darling. Where else would I go at this hour?"

All the hotels in town had gone out of business, of course.

"I don't care where you go. I've got work to do. Go to the Y.W. Go to the Travelers Aid. Go to—"

"Hush, darling." She wasn't even listening. She fished money out of her bag, tipped everybody and chased them out. Then she turned to me and took off her hat. She smiled. "It's just for a few days, darling. Just until I can get settled somewhere. You know I loathe hotels."

She hadn't changed. She was the same old Katie. A grown woman, an actress, with a career and everything. She made more money in a week than I did in six months, but she still needed somebody to take care of her. A couple of guys in white uniforms, say.

"Okay," I said. "I'll pack a bag and go over to—"

I stopped. She had that look in her eye. She put her hands on her hips and stared at m

"You'll do nothing of the kind," she said. "Do be ridiculous, Sam. There's plenty of room he for both of us. We're not children, you know."

That was what bothered me. We'd been marri two years, we couldn't get along together, we agreed to break it up. But that didn't change l ology.

I said, "One or the other of us has got to go."

Katie looked at me for a minute, and decided meant it. "All right, then. If that's the way y feel about it." She came close and patted my che "Dear Sam," she said. "You were always quaint."

Katie came in, followed by the doorman, the elevator boy, the cab driver. They were loaded. "Put it anywhere," Katie said

Katie, anybody with a grain of sense was t. I gave her a cigarette, lighted one for my- nd walked up and down. The week end was I couldn't work with Katie in town. On the or off, Katie had to have an audience.

topped walking and looked at her. She was sit- n her favorite chair, running a comb through air. For a minute, seeing her like that, I got a ry feeling. The soft kind. Like a kitten. It was. oad we hadn't got along better.

ook," I said. "I'm sorry. I'm glad to see you, urse." She looked up and smiled at me, the eal smile, and I looked away quick. I said, "Did ave a good trip?"

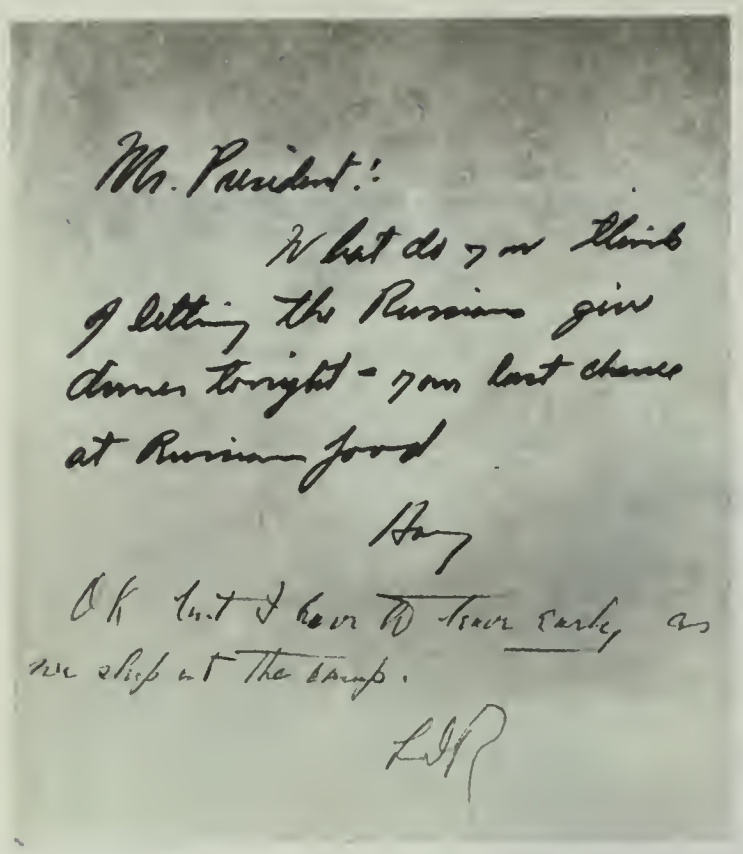
"Oh, marvelous!" She sat up with the comb in her hand and her hair hanging all on one side. There were a couple of hairpins in her mouth. She took them out; her eyes were dreamy.

"Harold Venner," she said. "The third."

I said, "Huh?"

"On the train, coming back. He's really charming, Sam."

You could meet anybody on a train. That was what they ran them for. I said, "Uh." Then it hit me. "Venner!" I said. "Sweetie Pie Venner?"



She got a little pink. "It's not his fault if the tabloids—"

"They just print what happens. You're not goir to fall for a guy like that, Katie! My God, he's been married eight times already!"

"Seven," she said. "And he's a fine, charming, intelligent, cultured gentleman. And it's none of your business, anyway."

Romeo with bags under his eyes. Adonis with a hang-over. I didn't know him personally, but I learned to read in the first grade. Pick up any newspaper. Venner in an airplane, with a babe. Venner on his yacht, with a babe. Venner at the Stork Club, El Morocco or Coney Island. With babes.

I said, "Katie, listen. You're needling me, aren't you? You're not serious?" *(Continued on page 53)*

Hopkins scribbled this note during the last Teheran session, as the Allies continued to argue over Germany's partition. Roosevelt and his party left that night to return to Cairo

The Secret Papers of
HARRY L. HOPKINS

Roosevelt springs the United Nations idea on Stalin, and the Big Three plan the future of the world. Here's how the Allied leaders talked turkey at Teheran. Here's how Stalin the Stubborn listened, asked questions—and expressed his views at one of history's most perilous crossroads

PART XIV—THREE TITANS SPIN THE GLOBE

THE Second Plenary Session of the Teheran Conference was scheduled for Monday afternoon, November 29th. Roosevelt lunched quietly with his own household. His son Elliott had arrived that morning from Egypt, his plane having been delayed by engine trouble.

After lunch the President had a short session with the Joint Chiefs of Staff, who reported their conclusions on the southern France operation, and presented memoranda they had prepared for the President to discuss with Stalin. At 2:45 Stalin arrived. Roosevelt said he wished to lend Stalin a report from a U.S. Army officer who had been with Tito in Yugoslavia and had the highest respect for the work being done there by the Partisan forces. Stalin thanked the President.

Roosevelt then gave Stalin three memorandums:

1) A request for permission for U.S. bombers from Britain to use Russian air bases for refueling, rearmament and emergency repair in the proposed "shuttle bombing" of Germany.

2) A request that *(Continued on page 70)*

ACME

COLLIER'S

SHORT SHORT

BOY'S BEST FRIEND

BY ROBERT CARSON

The poor child was dying of boredom. So each week Mrs. Donniger gave him a dollar and let him pick his horses

VAUDEVILLE died like a dog, but Terry & Alfredo (they were billed that way) went ht on living. Living and dancing. ey did ballroom stuff. When five- lay was gone, Terry & Alfredo ted at night clubs and supper oms and private entertainments m Portland, Oregon to Portland, aine, and from Mexico to Mani- a.

Terry was the former Theresa Mul- ny. She had a creamy skin and tural red hair and a slim figure. redo was the former Al Sullivan, of Boston Sullivans. He was a black hman who managed to look some- at Latin under colored spots.

The then Miss Mulcahy had met in the early thirties, when she was horine and he was a chorus boy a weak and trembling Broadway sical. Even before the show closed, ich was pretty quickly, they were in e and married and dancing madly a phonograph in a tiny apartment. They stayed in love, even with the d of life they had to lead. Terry s the serious one; she wanted to out of show business eventually start a dancing school. Alfredo s as happy-go-lucky as real Latins reputed to be. He was satisfied h music and traveling, and he liked ocial glass with his friends and an asional small wager on the ponies. Sometimes Terry was irritable and atient with him, but she did real- they were very happy; Alfredo tinually brought her flowers and danced with no other girls.

It was Terry who bought the modest use outside of the city as a home e. It was Terry who had Stephen, ugh Alfredo pointed out to her t having a baby involved the risk missing good engagements, los- your life, or even losing your ure.

Stephen grew up a quiet, good boy. was serious and intent, and had h marks in school. When Terry Alfredo were away on their trips e of Alfredo's old aunts, a Mrs. nniger, stayed in the country and tched over Stephen with loving e. She was the widow of a trainer breeder of horses, and thoroughly iable.

In Stephen's twelfth year he con- cted rheumatic fever and it affected heart. The doctor ordered him to for three months. Terry & Alfredo were beside themselves. They had an offer to go away on a tour, and because of Stephen's illness, they needed the money. At last, with lamentations, they left him in Mrs. Donniger's hands and went dancing across the continent. When the tour was over, they rushed to the bedside of their son.

Putting aside a Racing Form that he was reading, Stephen greeted them gladly. He was feeling much better, being in bed wasn't too dreadful, and he was having quite a bit of fun. Yesterday, for instance, he had hit four winners.

"Four winners!" Terry said, and grew pale and tottered. "Stephen, what are you saying?"

"Just that," Stephen said. "One paid eighty-eight dollars to win, Mother."

Neither Terry nor Alfredo could think of much to say until they talked to Mrs. Donniger later. The good old lady was astounded at their excitement. She explained that the poor child was dying of boredom lying in there, so she'd thought up a little game for him. Each week she gave him a dollar in dimes and let him pick his horses. He could bet as much or as little as he wanted each day. If he lost his dollar early in the week, he received no more money until the next week.

Mrs. Donniger wished Mr. Donniger were alive to see the kid picking them—it was wonderful!

"I pay track odds, of course," Mrs. Donniger said, "and Stephen is into me for sixty-two dollars already. But I imagine his streak will break pretty soon— Is something the matter?"

AS SOON as she was gone, Terry dissolved into tears and sought Alfredo's arms. She said brokenly that the bar sinister had finally turned up —the sins of the parents were being visited upon the children. Stephen was going to be a lousy little racetrack bum. This was the end. And so forth.

"Oh, I don't know," Alfredo replied, in a suspiciously cheerful voice. "Give him a little more rope. All horse players go broke. On the other hand, if his streak should hold—" He stopped and gulped.

"Al, I warn you—don't go betting on any of those nags," Terry said. "I'll have you for contributing to the delinquency of a minor—I'll kill you or leave you! Why, you'd be an unnatural father!"

"All right, all right," Alfredo said, and gulped again.

Later on, he visited privately with Stephen. The child casually mentioned a horse named Fussbudget running that afternoon at Jamaica.

"I know that dog," Alfredo said. "He'll run out, son."

"No, he'll win," Stephen said. "I can hear it in my head."

"Ah—?" Alfredo said. "I dare you to put all your dough on him."

Stephen agreed to that. Moving with the absorption of a mongoose retreating from a cobra, Alfredo sought a cigar stand and put two on Fussbudget's nose. Not long after, Fussbudget came in and paid forty-five sixty to win. Though Stephen had him across the board, it took Alfredo's winnings and all the other money in the house to pay the kid track odds on the barrelhead.

A pale Terry & Alfredo regarded each other after dinner. "Where is this going to end?" Terry said.

"End?" Alfredo said. "Either in the poorhouse or on Park Avenue. If he stays hot, we'll be rich!"

"Oh, no, you don't!" Terry said. "You're not going to use your own flesh and blood for a tipster! I'll divorce you and take him away!"

"Go ahead, divorce me!" Alfredo said. "I'll fight you for custody in every court in the land!"

"Remember," Terry said, rising from the table, "a boy's best friend is his mother." That night Terry slept in the guest room. Alone for the first time since his marriage, Alfredo couldn't sleep thinking of horses.

The atmosphere was tense the following day when Alfredo took Stephen to the doctor for a checkup. During the ride on the train, Stephen mentioned a horse running at Tropical Park named Night Out that he liked. On some flimsy pretext, Alfredo made a detour to Third Avenue and placed a wager. When he had a moment with the doctor, he tipped him on Night Out and kiddingly said the medico could use it in lieu of a fee. The doctor said he might look into it. Before they went home, Night Out was back eating his oats and had paid a hundred-and-two fifty to win.

Alfredo couldn't keep the news. His wife listened to him coldly.

"Suppose I bought you a mink coat?" Alfredo said winningly. "Would you see the light, angel?"

"A mink coat," Terry said. "I'd feed it back to you skin by skin."

She was out buying groceries the next afternoon when the doctor phoned Alfredo that the electrocardiogram on Stephen was fine and that he could get up and return to school. He also said he certainly appreciated that tip on Night Out and to forget any bill his nurse might send. Alfredo hung up and stood with perspiration forming on his brow. He was thinking of horses, and sleeping alone all the time. He went in to see his son and heir.

TERRY returned and found them gravely listening to the race results. Shutting off the radio, Alfredo told her the good news about Stephen. Terry wept and clutched her child to her bosom; and Alfredo had to wipe his own eyes. He got up.

"Well, I have to do some things," he remarked. "I'm sorry for the bad day at the track, Stevie."

"That's all right," Stephen said. "I'm sick of playing that game anyhow. It's for kids who stay in bed. If I bring anybody home from school, you won't mention it, will you? It might sound kind of silly to them."

"I guess it might," Alfredo said. "Now, I'll clam up. And—and I might buy you a bicycle, Stevie."

"Oh, gee," Stephen said, "that'd be wonderful, Dad!"

Terry followed Alfredo from the room and closed the door. He was mopping his forehead.

"How did you do it?" she asked. Her eyes were shining mistily.

"I touted him off his noises," Alfredo said, "and got him to shoot his roll on a couple of mine." He looked momentarily anguished. "He thought his father was his best friend and couldn't be wrong. I said he couldn't play any more now that he was going back to school. I—I had to do it for you. My feet get so cold at night."

"His father is his best friend," Terry said, "and he couldn't be wrong—Ah, Al!"

"I'll tell you something funny," Alfredo said. "The horses his noises gave him didn't come in either. His streak was over—I'm glad I did it."

Then he took her in his arms, and Terry & Alfredo danced rather happily. ★★★

WINNER OF THIS WEEK'S $1,000 FICTION AWARD

Collier's

☆

STAR STORY

The editors of COLLIER'S have awarded Star Rating to this story because they believe it especially worthy of your attention. Each week Collier's editors will select for award of the Star Rating one short story. To the author of each STAR STORY a special bonus of $1,000 over and above the established price of the story will be paid.

The purpose of the COLLIER'S STAR STORY weekly award is to attract to our pages stories of exceptional dramatic impact and popular quality—and so to bring you even more enjoyable reading.

Don't miss the coming parade of COLLIER'S STAR STORIES. They will reflect more brilliantly than ever COLLIER'S leadership in the publication of memorable fiction. They will be characterized by literary merit, varied appeal, originality and vigor.

Next Week

COLLIER'S STAR STORY will be—

COLLECTOR'S ITEM

By Roald Dahl

For the best in fiction read COLLIER'S

"SUPPOSE you found this guy dead," said Charley. He stood beside the lieutenant's desk, hands in pockets, rocking gently on his feet, a lean young man, with an intelligent face. "Murdered. Shot and poisoned in his library."

"The library?"

"*His* library; big estate in England."

The lieutenant swung his swivel chair toward the window behind him. The morning light cut across one shoulder onto a face made thin by years of insufficient sleep and grooved from decades of worry. "Out of our jurisdiction," he said.

"You investigate anyway," Charley said cheerfully, "and find that the dead guy's wife is a homicidal maniac, that her husband kicked her out into a blizzard on Christmas Eve, after squandering her fortune on another woman, and that she happens to own the Webley-Vebley 12-12 pistol which fired the bullet found in his brain."

"Someday," said the lieutenant, "you'll be too smart for your own good. Whatever you're up to or after, I have a feeling, amounting to a conviction that the answer is going to be no. I never heard of a Webley-Vebley."

"Annie would not be surprised." Charley took a paper clip from the desk and, lowering his head, began carefully bending it straight. "Furthermore, the dead man's wife had run a full-page ad in the local newspaper threatening to kill him, she was alone with him during the last ten minutes of his life, and in her handbag are three African darts each tipped with a poison which kills instantly by turning the blood into putty. You suspect anybody?"

The lieutenant shrugged. "Looks like maybe the wife did it."

"Typical police stupidity." Charley tossed the paper clip at the polished spittoon on the floor and it hit with a ping, then rattled inside. "Annie has often pointed out to me that we constantly leap to conclusions on just such flimsy evidence."

The lieutenant leaned forward, hands clasped, forearms on the desk. "Okay," he said coldly, "just who is this Annie?"

"Annie is a brain. Of frightening power. A marvel at murder. But a brain bounded on the north by gorgeous brown hair, on the south by a magnificent coast line, and—"

"Spare me," said the lieutenant. "I am an old, old man. Just how does this mighty brain work?"

"While we absurd police, satisfied with our ridiculous evidence, are lounging around the station house or stealing fruit from innocent peddlers, Annie is finding the more subtle clues which blundering police methods invariably miss. And she discovers presently what she suspected all along." Charley hitched his chair closer to the lieutenant's desk. "The wife is innocent. The murdered man's aunt, who raised him from childhood, sacrificed everything to put him through college, and who has been completely paralyzed for thirty-five years except for her ears which she can still wiggle slightly—"

"She did it?"

"Exactly. The rare Webley-Vebley is the only known pistol with a trigger so sensitive it can be fired by a flick of the ear."

The lieutenant leaned back in his chair, and gazed at the ceiling for a considerable time. "Colhaus," he said finally. "You know Colhaus in the Twentieth Precinct? He has a daughter—"

"No," said Charley, "Annie. I am not interested in anyone's daughter but Annie. You may not understand—"

"I might," said the lieutenant. "Unlikely as it may seem, I was young once. The remedy in a case like yours—I should say, the cure—is to marry the girl."

"I can't." Charley's smile disappeared, and his face looked thinner. "In spite of some success during six years as a member of Homicide, Annie regards me as only a reasonably well-qualified mope in the field of murder investigation. From her experience," he said bitterly, "covering hundreds of cases, she has formed a very low opinion of police and their methods."

THE lieutenant gestured with his thumb toward a huge oak-framed display cabinet which hung on the wall opposite. Its green felt surface, under the glass, was paved with dozens of overlapping photographs and deadly mementos: cruelly sharp photos of bodies in every state of violent death, sullen-faced men and women, struggling or passive in the arms of the police, actual pistols and blackjacks wired in place.

"You were with me on those," said the lieutenant. "Some of them. You did good work; sometimes. *Tell* her about them."

"I did."

"And?"

"Crude and slipshod work. We often arrested and convicted the first guy we suspected. Sometimes, in fact, the only suspect. And often we obviously the obvious suspect. Do you realize what that means?"

"Tell me."

"They were innocent."

The lieutenant smiled bleakly. "Yes? What about the Crowley case? Clear-cut."

"It was," said Charley gravely, "but it took two weeks to break. Perhaps you thought that was fun. Tell me. You sometimes stop to eat, on a case? Even sleep?"

"Yes."

"Fool. There is no time for anything but driving. Naturally you are pitifully slow."

"This Annie is faster?"

"She often solves cases a full forty-eight hours before Perry Mason."

The lieutenant sighed. "Just what did you have in mind?" he said.

"Well, sir." Charley selected another paper clip. "Singlehanded I have been unable to convince Annie that the murders of fiction, filled with brilliant deductions and subtle clues, have nothing to do with the facts of life. I have told her about real cases. They are dull. No African darts. No guns concealed in the wall which fire when the first footstep contracts the woodwork. *(Continued on page*

e! Marvelous!" said the lieutenant, glancing at Annie. "Annie
h given us enough to work on, the rest will be strictly routine"

CARELESSNESS . . . THE CHILD KILLER

BY HARRY HENDERSON AND SAM SHAW

INTERNATIONAL

In California's San Fernando Valley, Sunday's fun at Hansen Dam turns to tragedy. Mrs. John Thomas (striped blouse) is told the bodies of both her children have been found

THE day was bright and sunny. Mabel, u stairs, could hear Ed, her husband, telli the boys that they'd leave as soon as th mother came down. "You boys get the lunch o to the car," he was saying, and she smiled to h self. Though the children were only four and t and a half years old, they loved to help. She w starting downstairs when Bobbie's choked-o scream made her dash for the garage with terr squeezing her heart. Ed, tears running down l white face, was trying to pull Bobbie out from u der the car. Little Carl, dazed and uncomprehen ing, was slowly picking up the spilled picnic bask

Their grief and what occasioned it is an old sto to the police. Ed had climbed in the car and waite When the children didn't show up, he decided th had been detained by their mother and that h better bring the car out. When he started backi Bobbie had just stepped directly behind the car. was that simple.

This tragedy is repeated up and down Ameri with minor variations, a lot more often than yo think possible. A recent study by safety experts automobile fatalities among children from one four years old proved that. It showed that 10 p cent of these children were killed in drivewa And usually by a mother or father, who simp backed over his own child. Nearly all of th accidents could have been avoided if the pare had made a policy of backing the car into t garage, instead of driving it in frontward. F most of them this had been too much trouble.

This is one of the remarkable things abo America—the casualness with which we kill ch dren. Every day 39 youngsters under fifteen ye of age meet with a violent, sudden death somewh in the United States. That's almost one every minutes.

What does 39 a day add up to in a year? J about 14,500—all hopelessly, irrevocably dead.

These children were killed by what we call "ac dents." Nobody's fault. You could say that th innocent dead children are sacrifices to our mech nized high-speed way of life, not much differ from the innocent children sacrificed by ignora primitive peoples to appease their gods.

You could also say that what killed our childr was the carelessness and stupidity of adults, es cially of parents. You might think it almost imp sible for a father to put his kids in the back seat his sedan without pushing down the door lock. this happens constantly from Maine to Californ And, just as constantly, it would seem, the w pressure yanks open the door and hurls the ch out on the highway.

This happened recently to a Middle Weste who ran back to find his three-year-old son, unc scious, his head bleeding profusely. The fat propped up the child tenderly on the seat beside h and started to drive at 60 miles an hour to a hos tal. But at an intersection a car pulled out in fr of him. He jammed on his brakes. That did

He didn't hit the other car. He didn't even sk

Very day we Americans kill 39 of our
ildren. We drown them, we crush
em, we scald them to death. THESE
CCIDENTS CAN BE PREVENTED

drowned in the Johnstown flood, one of the nation's greatest disasters. But these children were drowned by negligence and stupidity—not water.

Negligence can cause drowning even when there's hardly enough water to do the job. Several hundred mothers this past year left their babies in a few inches of water in the bathtub to answer the phone—and came back to find them dead.

In a large Southern city one child was drowned when it crawled up on a chair—as it frequently did—in order to peer into its mother's washing machine and watch the plungers beat the foamy water. It amused the child and the mother—until one day the mother left the room for only a few minutes. The child leaned too far forward and tumbled in, her cries lost in the throb of the machine, her head battered by the plungers. She was dead before her mother got back. Note this: This accident actually began the first time that the mother permitted the little girl to climb the chair and stand peering into the machine. After that, it was simply a question of time and negligence.

Pediatricians say the main cause of accidents among preschool children is imitation, trying to do what they see grownups do.

Hundreds of youngsters drown each summer while swimming. The American Red Cross, which has been tabulating and analyzing swimming drownings for years, can tell you who is going to drown, where and why. "It's this way," said one of the chief lifeguard instructors. "About 80,000,000 go to the beaches and pools every year. Actually, half of these people can't swim a stroke and have sense enough not to go near the water. We don't have to worry about them.

"But the other half—they all think they can swim. Actually only 10 per cent, just one out of 10, of them, really can swim. The rest can swim a little, but they are not as good as they think they are—and they do the drowning. Most of them are young boys, twelve to fourteen, trying to show off." Most drownings occur in water from seven to nine feet deep and within 10 yards of safety!

Newspaper files bear out these findings. The words "drowned while attempting to swim to . . ." occur again and again. The object to which the victim was trying to swim—a float, a boat, the opposite shore—was always too far, and the swimmer overestimated his skill and his strength.

The lives of many of these young swimmers would have been saved if they had been taught that they weren't really *(Continued on page 66)*

INTERNATIONAL

Rescuers bring in body of Mrs. Thomas' 9-year-old son. He and Patricia, aged 7, wandered from a family picnic and drowned fifteen feet from shore. They were not found till Monday

: just drove his son's already battered head into
e dashboard clock. At 60 miles an hour, which
s the speed the child's body continued to travel
en the brakes were jammed on, his head was
rled into the dashboard at a speed of 88 feet per
ond.

This man might have saved his child's life if he
d laid him down. But his real mistake was speed-
. The accident record books are full of cases of
otionally upset people crashing while en route
or from other wrecks.

Today, carelessness, stupidity and negligence on
part of adults have reached the point where
ccidents" are the chief cause of death among
ildren. They outrank all diseases. To quote Pedi-
ics, the medical journal of doctors specializing
child care, "Accidents not only kill more chil-
en but also, in the ages of one to fourteen inclu-
e, accidents take as many lives as pneumonia,
rrhea and enteritis, measles, diphtheria, menin-
is, poliomyelitis, whooping cough and scarlet
/er combined."

Children are scalded to death, blown to bits by
r souvenirs, electrocuted by frayed wires, poi-
ned, burned, suffocated and killed by animals.
e two most frequent causes of death, automo-
es and drownings, claim their highest toll in the
mmer months. Together, they are responsible for
arly half the deaths of children in accidents.

Tots Drown in Very Shallow Water

Take drowning. It is a simple case of suffoca-
n in water or some other fluid. Children have
owned in rain barrels, watering troughs, aquari-
ns and oilcans. Two years ago, a two-year-old
owned in a mudhole on his father's farm. He
ndered off by himself, stepped into the mudhole,
nk up to his knees and couldn't step out. Even-
ally he lost his balance, fell forward on his face—
d drowned in less than an inch of water.

Each year many children drown in those pretty
h ponds that have become fashionable on subur-
n lawns. Though such ponds are only a few
ches deep, they are certain death for unsupervised
ddlers. In one tragic case two small boys, one
ur years old and the other two, were drowned
multaneously. They had been left alone by the
allow pool, to play with their sailboats. The
unger child's boat sailed toward the center of
e pond, and he reached for it. As he toppled in,
e other child grabbed him. Their heads struck,
ocking them both unconscious. They drowned im-
ediately. That's how the coroner reconstructed it.

In Dayton, Ohio, a father whose son was a polio
ctim, remembered that Franklin D. Roosevelt
d swum to strengthen his weakened leg muscles.
he took the boy swimming in deep water. The
n was quickly exhausted and the father, an in-
pert swimmer himself, could not save him.

Altogether about 2,200 children drown each year,
ost of them during the 90-day period from June
rough August. Just about that many people

Rain in August

BY ANTHONY STEVEN

You could say Monsieur Noé was crazy—and you could hope to Heaven you were right

IF I had not heard Professor Berthot's series of lectures on comparative psychology, I do not pretend that I would be questioning, even at this late stage, the popular explanation of Monsieur Noé's strange state of mind.

I am the village schoolmaster in a southern region of Algeria, and last year I attended a teachers' summer course at the *école normale* in Bouzarea. It was here that the Professor lectured.

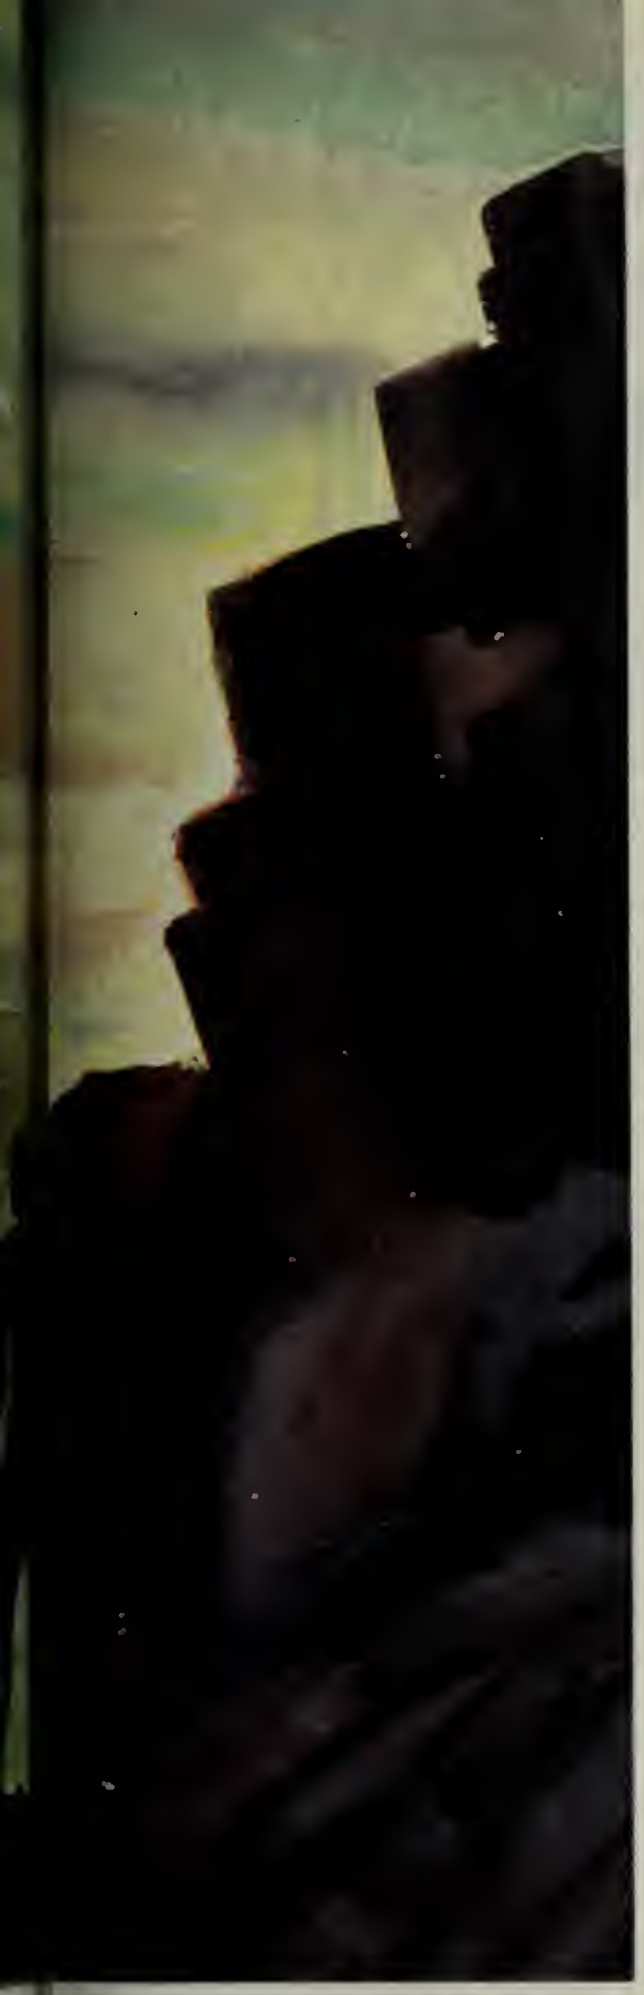
So deeply did he impress me, that I have since devoted a great deal of my spare time to the study of this absorbing subject, and it is because of the extensive reading I have done that I am able to advance an altogether more plausible interpretation of the happenings of the past few months.

I have said nothing to my friends. They have never heard of Professor Berthot, and they would imagine me to be talking through my hat. Yet it is the Noé affair which tonight has brought them all together, has made them gather here in this room.

From my corner table in the Bar Pigalle I can watch them without fear of interruption, except perhaps from Simone, and at the moment she is helping Madame Ramera behind the zinc-topped counter.

There is certainly a large crowd. They have been drinking steadily for an hour or more, and now the rising hum of their conversation does much to drown the drumming of the rain on the tin roof.

If I were to ask any one of them his opinion—even the Notary, whose broad back is toward me, or the Curé, whose face shows like a rosy moon above the former's shoulder—it would be indistinguishable from that of his companions.



"But, my poor friend, it is as plain as the nose on your face! Aristide Noé has the desert madness."

As an explanation, this sounds rational enough. Our village lies close to the desert, and in summer the intense heat has been known to make qu normal people behave in the most peculiar fashic If they are badly affected, we say that they ha "desert madness"—although it would probably more accurate to describe them as suffering fron nervous breakdown.

Yet however likely such a thing may seem at fi sight, I am certain in my own mind that this is what has happened to Aristide Noé. To begin wi the facts hardly fit. He came to the region a gr many years ago, and it is difficult to imagine h succumbing to its rigors at this stage. Furthermo the first evidence we have of his derangement da from the cool of the year—a point which see conveniently to have escaped people's notice.

The answer lies elsewhere, and, in a manner speaking, I came to suspect this before the qu tion ever posed itself.

After my return from the *école normale*,

dy of my fellow creatures exercised an increas-
g fascination over me. I amused myself by trying
classify the people I knew, and I admit to deriv-
g a certain amount of private pleasure from decid-
g that whereas old Monsieur So-and-so showed
me of the tendencies of a schizophrenic, the el-
rly spinster who lived in the cottage opposite him
as very obviously a hypochondriac.

In this game, which was no more than a harmless
tlet for my new enthusiasm, none roused my
riosity so violently nor eluded my diagnosis so
mpletely as Monsieur Noé. If I succeeded in de-
cting neurotic symptoms among my acquaint-
nces, I was quite unable to pin him down. I told
yself that it was because I saw too little of him.
He lives in a remote farmstead some miles from
e village. There, with his old woman, his three
llow-skinned, ill-favored sons, and a handful of
lf-starved Berber tribesmen, he raises sheep which

are marketed in the coastal towns far away across the mountains to the north.

Visitors have never been encouraged, and all we ever see of the family is when one of them drives down to the village in a dilapidated Peugeot to buy stores and collect the mail. That has normally been once a week. Latterly, their visits have been less frequent.

My interest in the old man was instinctive, and at the start had nothing to do with his odd Biblical name, the dreary wilderness in which he preferred to seclude himself, nor even the animosity he plainly bore the world at large.

Nothing happened to justify my interest until the arrival of the timber in January. I remember the event with great clearness, although at the time I did not recognize its significance.

IT WAS New Year's Day, and my thirtieth birthday. I had to buy stamps. The air blew cool and sweet as I crossed the square, and above me the palm fronds moved lazily against the silver-blue of the sky. By the fountain some children were playing hopscotch. Old Madame Baudin sat in her customary place at the entrance to the post office, knitting busily. She is very deaf now, and so she lets her niece, Simone, do most of the work; but as I passed, she lowered her needles for an instant. In that way she salutes her friends.

I pushed my way through the bead curtain into the dim interior. Simone, who not only registers the mail and sells the stamps, but has to operate the switchboard for all incoming and outgoing calls, was taking a telegram. I rested my elbows on the counter.

"Oui . . . oui, d'accord. Oui, monsieur . . . entendu."

The earphones were perched on her honey-colored hair. I could see the movement of her slender wrist as she wrote down the message in her large childish hand. When it was finished, she read it back. It was to Monsieur Noé. I could not avoid overhearing.

"Timber arrives Aumale railhead Monday, third January," ran the telegram. "Arrange collection." There was some name in signature, but I have forgotten what it was.

"That's strange," I said. Simone pulled off the earphones and turned toward me. There was a mischievous smile on her face.

"What's strange?"

"Old Noé wanting timber."

"You had no business to listen in."

"I know I hadn't, but it's strange, just the same."

The Noés are a miserly family, and timber is a costly item.

"Perhaps he wants to build a hencoop."

"Or a cage for those three apes," I suggested unkindly.

Simone gave me a reproving look.

"The Noé boys aren't so bad."

"How do you know?" I demanded jealously. She leaned across the counter and kissed me softly on the mouth.

"Happy birthday," said Simone. . . .

Three days later the timber started to pass through the village on its way to the Noé farm.

The lorries bringing it from Aumale, thirty miles to the north of us, were laden with heavy beams and stacked high with lengths of planking. It took them several journeys, over a space of days, to complete the job. So much timber must have been worth a fortune.

For weeks afterward we wondered what old Noé could be up to. One or two enthusiastic spies made their way to a point overlooking the farmstead. They could only report that the timber had been laid on a small plateau behind the main group of buildings; there was no activity so far to suggest for what purpose it was to be used.

The days went by, and the sun rose higher and higher in the sky. People's minds turned in upon themselves. Curiosity in the Noé project waned. Nobody could muster the energy to go spying any more. We drank or we smoked kef or we made love. If we had to, we worked.

One evening in July, I was sitting in the Bar Pigalle, playing dominoes with Louis Masson. It was breathlessly hot. Madame Ramera, who has run the bar since her husband's death, stood watching us, her hands on her hips. The cotton frock she wore clung damply to her great shapeless body. The glossy black hair was scraped back from her handsome head and pinned in a knot on the nape of her neck. She has fine dark eyes, and a smile of quite dazzling whiteness.

"I hear you were thrown out of the Tendre Logis last night," she said to Louis.

"I was drunk," he replied simply. "One of the girls complained. You know what old Madame Ruad is!"

Madame Ramera chuckled. Louis is a nice, gay lad of whom she approves. He works as a lineman with the telegraphic service and is billeted in the village.

"Well, she did quite right," declared Madame Ramera firmly. "If *she* didn't take care of her girls, I'd like to know who would."

Louis appealed to me, a grin on his snub-nosed face. "Just listen to her! You can agree with everything she says, and she still wants to start an argument."

Madame Ramera laughed. It was deep and pleasant to hear. A few years ago, before her figure went, she must have been quite a girl.

Jean Nattier, from the *gendarmerie*, strolled in.

"By the way," he called to Louis, "Simone would like to see you. The line's down somewhere between here and Aumale."

This was bad news for Louis. The thought of having to check the line northward for fifteen miles or so in the broiling weather we were enduring just then was enough to make a man weep.

"Let's go and have a word with Simone," I suggested.

It was like an oven in the square. An Arab, muffled up in his burnoose, lay dozing on the steps of the fountain. Near by a stray cur was investigating an unemptied refuse bin. Ticks, horribly bloated, hung like white grapes from its ears.

In the post office it was less oppressive. Simone looked at Louis with sympathy in her gray eyes. The line *was* down.

"Look," I told Louis, "don't go out today. There's a chance the damage is the Aumale end, and they'll send someone out to patch it up. If it isn't fixed by the morning, you can get away to an early start while it's still cool."

The idea appealed to Louis.

"I might even come along with you."

"Yes, but I've only got a motorbicycle," he protested.

Simone supported me.

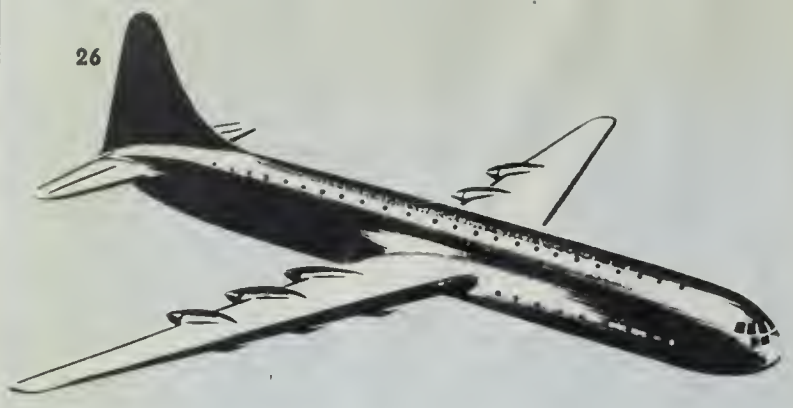
"It's a fine idea!" she cried. "You can ride pillion and watch the cable for a break while Louis drives."

And so it was agreed.

NEXT morning the line was still dead, and Louis and I were away before sunup. It was deliciously fresh. My head felt clear for the first time in weeks.

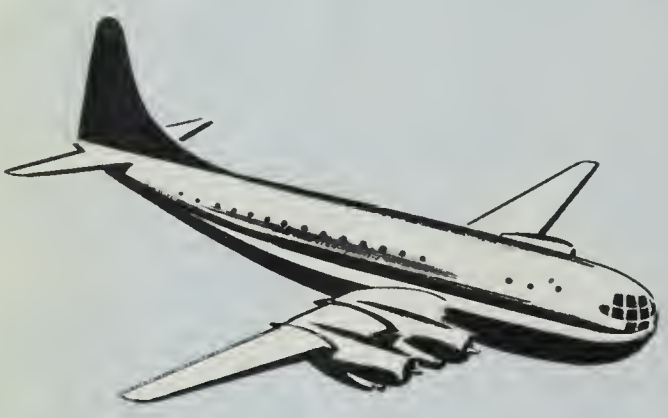
The sound of the engine shattered the sleeping street, and the houses fell away like pale ghosts in the dawn. We rode northward through a land sun-charred and dreary. No green of any kind relieved the eye. Here and there, formations of lava and sandstone stuck like white and red bones through the seared skin of soil.

Our pace was leisurely, and I do not suppose we had covered more than six miles when I spotted the break. In fact, it was not a break but a cut. The work of Bedouins, Louis said. It was a habit they had. The penalty if they are caught is severe, but if they need the wire—to make a bangle for a wife or to repair some object—they do not hesitate to cut it from the line.



Louis wasted no time. He wanted to complete the job before it got hot. I watched him idly for a moment or two, for there was nothing I could do to help. I looked around in the rising dawn and decided to take a stroll.

It was only then that I realized where I was. If I climbed to the top of the hill at the base of which we now were, I would get a clear view of the Noe farmstead. The going looked rough, but there was not more than half a mile to cover.



Remembering the timber, all my old curiosity flared up again. When I told Louis, now perched comfortably at the top of a telegraph pole, where I was going, he only grunted in reply. He was holding a pair of pliers between his teeth.

I had been climbing for ten minutes or so, when the light strengthened, and I saw the sun pushing upward like a hot coin beyond the rim of a table-topped mountain. The eastern flanks of the giant boulders through which I now picked a path were washed in rosy light, but westward their shadows raced opaque and blue. *(Continued on page 62)*

AIR TRANSPORT
THE ANSWER TO
AIR POWER

BY W. B. COURTNEY

In another war airheads will be more important than beachheads. Neither one will work unless we can keep it adequately supplied. The successful combat air force will require a huge transport fleet for air lift

THERE are a lot of your definite tax dollars being spent for aircraft, and a lot of vague figures about those aircraft are being shuffled around in headlines from Washington, in these days of lusty young air power when all our eyes are looking upward with apprehension.

It's hard to keep track of either the dollars or the latest figures. But it might be well to try to poke behind the hosannahs and handouts and hogwash in search of the answer most of us are sweating to know.

Will our umpty billions preserve us from a spot of shoveling in Uncle Joe's salt mines?

They might. Then again—well, you learn such funny things. Like:

1. We have not one, but TWO Air Forces. The Navy, and the Air Force proper. Each is independent. Neither is on speaking terms with the other. Each has its own notion of how to safeguard you and muck up the enemy.

2. A 70-Group Air Force isn't a new idea. General Spaatz recommended it in 1945 (See Collier's, December 8, 1945) as the absolute minimum for safety in the postwar years all of us then figured would be ducky with sweetness and light.

3. The 70-Group Air Force is still only an illusion on paper and in administration pigeonholes. Full and honest steps have not been taken for its planned completion by 1952.

4. Much of the recent hoop-la, which *seemingly* created a 70-Group Air Force, was a political *Schlummerlied:* a lullaby crooned reassuringly from Capitol Hill by the November-rememberers, while they swapped low punches with the White House, made Universal Military Training vanish up their sleeves, and pulled a rabbity Draft bill out of their hats.

5. The 70-Group Air Force does *not* restore health to America's waning aviation industry.

6. A 70-Group Air Force will *not* make it okay for us to relax, in confidence that those "Red so-and-sos can't hurt us!"

Because in the global-warfare realities of today, there is no magic in mere numbers—"55-Group Air Force"—"66-Group"—"70-Group"—unless the most intense and intelligent proportionate attention is also given to just *two* background elements.

From the lessons of the last war, and the already clearly focused problems of the next one, those two elements now stand out as beyond question the most vital and decisive elements of modern war.

Neither element is glamorous; nor a headline grabber. Yet both are the utter marrow of victory.

The first element is TIME.

The second element is TRANSPORTATION.

Time does not yet imply a one-shot war. The Atom Bomb, or any other scalp-curler now fected, cannot guarantee a first-round knocko a powerful nation. Time remains a bedrock ment for staving off defeat until triumph ca sculptured. Its solemn warning for us is that nomic and scientific compulsions will unstu cushion of the months and years the United S has always had tucked in the seat of its britch soften initial falls. No man can forecast with titude—war is too full of imponderables, inclu weather and luck. But General Eisenhower suggested that the first 60 days of another war well reveal its final verdict. One thing is ce The Time element nowadays simply means *next* time there will be *no* time to switch our strength into fighting strength.

Transportation, in military science, is c "Logistics," and covers the whole flowing bus pattern of war. Its magnitude can be judged the last war: Of the total war cost of $350 bil $250 billions went for supplies. Logistics un ably is the biceps, legs, bones, muscles and lif of any nation's war body.

Logistical operation, moreover, is incompa more difficult, complex and mathematically e ing than peacetime transportation.

Logistics in a global brawl, as one between sia and the United States would be, entails digious movements of hordes of men, arman equipment, food, building materials, machiner other supplies through a variety of climates over enormous distances.

That is why objective military students b that Logistics—and not the Atom Bomb c dustrial development—offers the principal that Russia cannot with optimism undertake bal war for some years to come.

Russia has, with German and Czech tech help, and with forced labor of several million held Austrian, German, Italian and Japanese oners of war, fetched up her industrial poten to where it is no longer inferior to ours in qua Her pools of natural resources and man greatly surpass ours. But the Soviet Union c yet draw conclusive profit from those facto from the Atom Bomb if she has it, because hamstrung by Logistics.

Only her airways are modern. All her su means—rails, highways, motive equipment general transport experience—are a century b ours. It is to them, not to the consuming adv of actual war, that her production and res must be drained.

Russia thus poses a sharp illustration meaning of Time element; an even sharper the Transportation element. *(Continued on pa*

DRAWINGS BY JO KOTULA

An Affair OF STATE

BY PAT FRANK

The final installment and the end of a bitter struggle for Jeff Baker. Suspected of treason and forced to resign from the State Department, he is faced with the question of what to do about the girl who loves him

The Story: Determined to help keep his country out of war, ex-Army officer JEFF BAKER joins the State Department early in 1949. SUSAN PICKETT, whom he loves, promises to wait for him when he is sent to Budapest. There Jeff works on top-secret Atlantis Project, an attempt to build a secret underground organization that will operate in Europe in event of war. Jeff meets LEONIDES LASENKO, a Russian who was a good friend of his in Italy in World War II. Leonides tells Jeff of a counterrevolutionary group in Russia, and enlists Jeff's cooperation. The jeep which Jeff drives is booby-trapped and explodes with Jeff and RIKKI TELREDY, a beautiful dancer, in it. Jeff's reaction to the blast is a recurrence of battle fatigue. Susan Pickett writes Jeff and tells him to give up his efforts for peace. Shortly afterward, Jeff meets Leonides again and the Russian tells Jeff that the Atlantis Project is known to Moscow and that any Hungarian seen associating with American agents will be killed. When Jeff recommends that Atlantis Project be abandoned, he is confined to his apartment by ADMIRAL BLANKENHORN, chief of America's Budapest mission. MAJOR L'ENGLE, the mission doctor, is sent back to the States because he has befriended Jeff. Jeff gives L'Engle a letter to his old friend HORACE LOCKE containing the intelligence concerning the counterrevolution. Locke is a veteran State Department official. Leonides' underground activities are discovered by the Russians and he has to desert the Russian army; Jeff gives him money to make his way to a secret Radio Free Russia station in the British zone. The admiral cables a request to the Secretary of State for Jeff's resignation, and sends a Security officer, WILLIAM QUIGLEY, back to report personally to MATSON, head of the Balkans Division. Quigley takes another letter from Jeff to Horace Locke. The cable requesting the resignation of Jeff Baker reaches the Secretary of State late at night. He initials the cable with his okay.

THE cable reached Budapest Tuesday morning, addressed BLANKENHORN FOR BAKER, but it was almost midnight before Jeff Baker sat down to type his answer. It had taken him that long to make up his mind. Some decisions, even of life and death—such as whether to cross the street—are made in an instant. Others bear a clear sign saying "crossroads" and require thought and calculation.

The request for his resignation had hardly surprised him, but he was startled by the detail in which his sins were listed. The cable was like an indictment drawn up by a prosecuting attorney not quite sure of his case, who seeks to base an edifice of guilt upon many thin laths of accusation. It was not at all like a cable from the Secretary of State, and yet the Secretary's name was signed to it, and it could be assumed that such a cable would at least be seen by the Secretary, and initialed, before dispatching. But there was no way to be sure, for all cables from the department bear the Secretary's name, whether they concern the drafting of a new treaty or the disposition of an old steamer trunk.

(Continued on page 43)

"What happens to us, Jeff?" He knew what he had to say. It was the only thing. "I'm afraid this is our last time together, Susan"

ILLUSTRATED BY MILTON WOLSKY

Through his spotting-scope Wayne Moore can dope the wind by figuring how fast it blows through a heat mirage

STRAIGHT SHOOTER

BY BILL FAY

WAYNE MOORE'S auto repair shop sits in a valley near Washington, Pennsylvania. Across the creek—some 300 yards from the shop—there's a dead tree overgrown with brush. The groundhogs who live in that thicket are not very smart. If they were, they would have moved a long time ago.

Moore is the national small-bore rifle champion. Every time he crawls out from under a car he looks out the back window at that dead tree. When he sees a blur of groundhog, business halts for target practice.

"I don't hit every shot," Wayne admits, "but I get one now and then. After lunch I fire a practice round with the .22-caliber I use in competition. Have a target set up a hundred yards down the hill. Between the groundhogs and the target, I keep my shooting eye."

Moore is forty-one. He surprised everybody by winning the nationals on his first attempt in 1946—with a borrowed gun. He retained the title last August with a record 3,194 x 3,200. It was the first time a winner repeated on the new firing line at Camp Perry, Ohio.

Wayne's a friendly, modest fellow with tremendous shoulders.

"I developed the shoulders going around on crutches as a kid," he recalls. "Hurt my left knee in a sand-lot football game. Tuberculosis of the bone set in and the leg was finally amputated, but the injury never handicapped my shooting. We fire the nationals prone and I'm just as comfortable as the next shooter. My brother Chuck is a one-legged shooter, too, but it's never bothered him in competition."

Chuck lost his right leg in a railroad accident. The four Moores—Wayne, Chuck, cousin Bob and Bertie (Bob's wife)—captured the national any-sight team title last August with 1,591 x 1,600. They followed Wayne's simple shooting formula: Make 'em or miss 'em quick.

"At Camp Perry," Wayne says, "you get 20 minutes for 20 shots. I run mine off in eight to 10 minutes."

Wayne can shoot bang-bang fashion because he has a fast system for doping the wind. "Ever notice how a sidewalk shimmers in the summer?" he asks. "That's warm air rising. Same thing happens when you look along the ground at a target a hundred yards away. The warm air makes a mirage in front of the target, sort of a steamy, colorless vapor. You watch the mirage through your spotting-scope (telescope) and dope the wind by figuring how fast it blows the mirage along."

Wayne tries to pump two or three shots into the target before the wind changes. "You keep adjusting your sights to compensate for the wind," he says.

Oddly enough, national champion Moore hasn't been able to win the Pennsylvania title. "Been runner-up four times," he says, "but that's a tough tournament. Pennsylvania's got more good shots than any other state." National Rifle Association statistics confirm Wayne's claim: 107 of the nation's 460 master riflemen live in Pennsylvania.

Wayne plans to retire from national competition this year.

"Takes too much time," he explains. "Besides, hunting and fishing with my kids is more fun."

Wayne has three sons—Dave, sixteen, Gary, twelve, and Dick, ten. Dave got his first buck last winter.

WATCH THOSE SPARES

Buddy Bomar became a champion bowler in his spare time.

"At least once a week I go out to the alleys early," Buddy explains. "I give a boy a couple dollars for setting up the 7-8-9-10 pins. Then I spend a couple hours pickin' them off. Those are the positions you shoot at all the time in matches—no matter what other pins stand."

Bomar rolled five games in an exhibition recently. He missed six spares—and lost $2,000 in prize money.

"Not what you'd call spare change," Buddy cracks.

"Always remember to concentrat on those spares," Buddy says. "Yo lose them through carelessness an lack of practice, and no number o strikes can offset them."

GOLF'S BROTHER ACT

It's been a long time, nearly sixt years, since Michael Turnesa em grated from Italy and settled in Elms ford, New York. Michael might hav taken any of a hundred jobs, but h went to work at the country club. Si sons of groundskeeper Turnesa—Phi Frank, Joe, Mike, Jr., Doug and Ju —caddied up into pro jobs.

Joe made Turnesa a headline nam by finishing second to Bobby Jones i the 1926 National Open. The ne year Joe was second to Walter Hage in the P.G.A. Then the six Turnesa held a meeting to make plans for th seventh Turnesa—13-year-old Willi

"Six pros are enough for one fan ily," Joe declared. "Willie should b an amateur."

"Right," Phil agreed. "Willie shou go to college, too."

Both motions were carried unan mously. Phil, Frank, Joe, Mike, Ju Doug and Jim started the savings a count that put Willie through Ho Cross. The investment paid off. Will won the National Amateur in 19 and the British Amateur in 1947. No he's president of a firm that manufa tures fire extinguishers.

Meanwhile the six profession Turnesas were breaking the cour record for hard luck. Jim whippe Jug McSpaden, Byron Nelson ar Ben Hogan in the 1942 P.G.A., b lost to Sam Snead in the final roun Mike gained the P.G.A. finals at S Louis last May and Hogan beat hi

"This," Mike told Frank, "ought clinch our hard-luck title." But Mi spoke too soon. Three weeks lat Jim broke the National Open reco with 280—and finished third. Hog and Demaret had given the record worse beating.

Another generation of Turnesas on the fairway. Sixteen-year-old Di (Joe's son) scored a promising 77 the Long Island Open. Mike's boy four. Willie's son Charles is thr Little Mike and Little Charles are ta ing putting lessons from Big Mi who's about the best putter arour

When Papa Turnesa joined his golfing Turnesas at their last reunic he remarked: "Sometimes I wonc what would have happened to t family if I'd gone to work in a boi factory."

CITATION'S TRAVELING COMPANI

Ben and Jimmy Jones, the Calun Farm trainers, never miss a raci trick. Example: Good Ending, an u tried two-year-old, slipped betwe the horse car and the loading platfo at Hialeah. The fall scraped his l and side.

Nothing serious, but Ben a Jimmy feared the accident mi make Good Ending train-shy. Jim proposed the remedy: "The Ar sends pilots right back up in the after a crash. Let's give Good E ing lots of traveling."

After that, Good Ending visi half a dozen race tracks as Citatio traveling companion. He didn't st once. Maybe it was a waste of tr fare. Maybe not. If the story Good Ending has a happy ending n year—say at the Kentucky Derb it will be another triumph for Joneses and their thorough train methods. ★

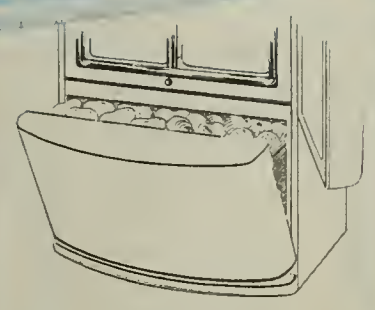
ICE'S ADVENTURES
IN PHILCOLAND

"How WONDERful!" cried Alice.

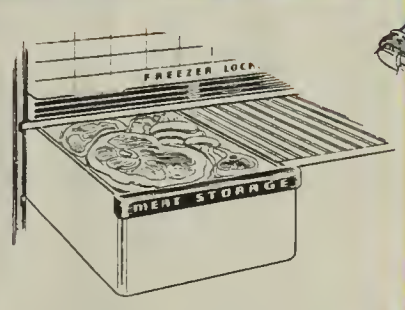
"Adjust the shelves to suit yourself!"



This *Shelf-Adjustability*
Made Alice stop and stare.
For Philco *Shelf-Control*, in truth,
Is quite beyond compare.
You shift the shelves to suit yourself,
And find, to your surprise,
You have *more room* for foods without
Regard to shape or size.
It's one of *many* features
In the line for 'Forty-eight.
Go see them at your dealer's now,
And you'll agree: "*They're great!*"

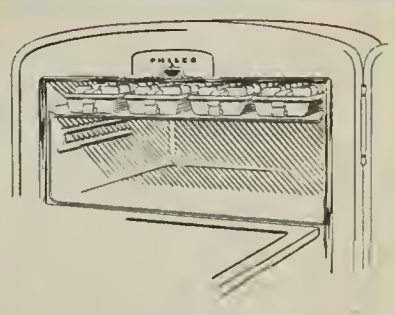
PHILCO

Famous for Quality the World Over



it's a WONDERful Refrigerator!

"You can say that again!"



TWO CRISPER DRAWERS
Deep, glass-covered drawers with stainless-steel slides keep vegetables and fruits fresh and crisp in moist cold.

VEGETABLE BIN
Big, unrefrigerated storage-space for vegetables, cereals, crackers, and the like. More evidence of Philco convenience.

MEAT STORAGE
Deep drawer directly under the Freezer Locker for roasts, chops, and other meats. Keeps them cold, fresh, ready to use.

GIANT FREEZER LOCKER
A huge, clear space for frozen foods. Ice trays on a separate, super-fast freezing shelf. More room than ever!

THE NEW IMPROVED SANKA COFFEE

—the "drink-it-and-sleep" coffee—now has a new, marvelous flavor to delight lovers of fine coffee! It has a truly wonderful taste—yet it's still 97% caffein-free!

FINER FLAVOR

in Sanka Coffee is due to a brand-new flavor-saving process . . . a miracle method of taking the caffein out of the coffee.

Try Sanka Coffee today. See for yourself what a great flavor-improvement has been made. Sanka comes in two forms: Ground for drip or percolator; Instant Sanka, made instantly in the cup. Products of General Foods.

SECOND MAN ON THE TICKET

Continued from page 12

"With a big syndicate," Bill said. "With another million readers. With a weekly radio broadcast and a few million ears flapping when he talks. You can't have him writing and talking about poker games with the press aboard your special train. For undisclosed stakes, he'd have it."

"He'd do that, would he?"

"That's his technique," Bill said. "In the old days they called a newspaperman who performed when the boss blew the whistle a trained seal. Nowadays it's performing weasels we got."

The Governor sighed. "All right, Bill, no more poker games, if you say so."

STILL frowning, Bill said, "The games aren't important. What worries me, Governor, is why he's coming aboard in the first place:"

"There's some importance to a Vice-Presidential campaign, Bill," the Governor said mildly.

"Now you know what I mean, Governor," Bill said. "Clyde McDonald thinks he's considerably more important than any Vice-President that ever lived. If he left Washington to board a campaign train, it would normally be the Presidential candidate's train, and the other party's candidate, at that. So why does he suddenly descend on us?"

"Let him come," the Governor said. "My life is an open book." He grinned and pointed at the copies of Second Man on the Ticket, stacked on a table. "There it is."

"*You* never opened it, Governor," I said.

"It wasn't necessary, Boswell," he said. "I'm familiar with your prose style." He turned again to Bill Evers. "Now, why don't you stop worrying for the rest of the day, at least until Mr. McDonald comes aboard? And, Roy, maybe you and I had better get busy outlining that speech for Hydetown."

I said, "Okay," and got up. Lucy Strawn began putting away the cards, but Bill Evers stood by the window, looking thoughtful and depressed. He said over his shoulder, "I wonder if that's it. You suppose he's here because of Hydetown?"

"It will be a big celebration," Lucy said.

He tapped his fingers impatiently on the windowpane. "Maybe that's it. Vice-Presidential candidate visits his old home town for the first time in thirty years. Big reception. Big clambake. Yes, I suppose that might interest Clyde McDonald. Maybe he thinks he can dig up some dirt in Hydetown."

"After thirty years?" I said.

Bill turned slowly from the window. "Governor, of course there isn't any dirt in Hydetown, is there?"

"It's farm country," the Governor said quietly. "Best dirt in that part of the state."

"I only asked," Bill said. "I knew I didn't need to. Sorry, Governor."

"Forget it," the Governor said. "If I were a sensitive man, I wouldn't be in politics."

"Still," Bill said, "I'm going to find out just what he's after. I'll get it out of him somehow." He gave Lucy Strawn a speculative glance as she bent to put the cards away. She straightened, turned, and met his eyes. She stood quite still for a moment, looking at him.

"If you were only blond," Bill said. "He goes for fluffy blondes."

"Who doesn't?" Lucy said, and smiled. "But how many blondes can type? I can type, and I can be a little fluffy, if I have to. Maybe he will want some typing done."

"It's a thought for today," Bill said.

"You'll do *my* typing, Lucy," Governor Warburton said severely. "B don't like plots. If you want to k why he's here, ask him straight out

"Whatever you say, Governor," Evers said.

"And quit asking for trouble," Governor said. "Come on, Roy, let about that speech."

The reason I was aboard the trai to write the Governor's speeches. tomarily he outlined in a general what he wanted to say and I knocke a fast draft of it. Then he went to with a pencil and I did a rewrite, the pencil came out again before he gav script to Lucy for typing.

His rise in politics was largely d his singular directness, a refreshing ity among politicians. He had been on a Hyde County farm, but had m out of the state as a young man an become a contractor in a small M Western city that had begun to ex soon after the turn of the century. Governor had made a fortune i early days when automobiles made roads necessary, and his start in po had been as highway commissione that post he had uncovered graft in way construction and his hard-fist vestigation had led to his nominatio election as governor.

Other facets of his career wer sort that endeared him to uncritica ers of a leisurely, gregarious life, bu necessarily to the voters at large. H an astute poker player, and he coul his liquor manfully. He was an imp of the breed, and had once raced a string of horses. As governor, he ha through a bill legalizing pari-mutue ting, and the race tracks had returr the state, bringing revenues that h him to abolish a two per cent sales t stituted by his predecessor. These among the qualities that recomm the Governor to me, but I had la emphasis on them in the biography

Instead I had stressed the hardh businessman, the progressive repre tive of American industry, the ma would do his part toward balanci budget and putting the nation on a financial basis and even, if the ec were propitious, reducing taxes a or two. Naturally, Bill Evers ha wanted Clyde McDonald sending ports of poker games in the Gov private car.

THE Governor led the way to t servation platform, sat down a his feet on the railing. He was a bi with only a slight overlay of fat, his movements and his postures was no self-consciousness at all.

"Roy," he said, "I'm a senti man."

"Okay," I said. "We'll have so bies for you to kiss next stop."

The Governor rewarded me wit tient smile. "I've been thinking Hydetown," he said. "Like the la never forgets her first lover, I g man never forgets his boyhood ho will always be the best little town country for me."

I had looked it up and I said, "P tion 3,220. Rotary meets on W day."

"Population was about twelve h when I left there," he said. "I don any Rotary Club, but there was a Fellows Hall, of course, and a co pool parlors. I suppose it was pri even in those days, but it was friendly town, and I liked it. I have a couple of good friends in town, but I lost track, and you I'm wondering if they'll be at the when this train rolls in. It will m feel pretty good if they are."

"The whole town will be at the

ernor," I said. "The county chair- out there, a fellow named John M , has been working overtime."

h, I know Johnny Mills," the Gov- said. "We were boys together. He d the record catfish out of the river summer. He's one of the two I was ng about."

ou'll see him at the station," I said. s in charge of the reception. He and mayor, a fellow named Melvin r. I guess you know him, too."

e Governor chuckled. "I guess that Mel Fisher up, Roy, arranging a tion in my honor."

le's not one of those pals of yours, "

lardly," the Governor said. "In l we called him Meathead Fisher. ever called him anything but Meat- Everything he did went wrong. I guess you know my wife came Hydetown, too."

overnor," I said, "I wrote a book. u take the time to read it you'll find ow much I *do* know."

ll read it one of these days, Roy," promised. "After the campaign. nwhile, I'll tell you something that's n your book. I cleared out of Hyde- because I wanted to make some ey in a hurry, and Melvin Fisher was eason for that hurry. His father left tidy pile, by Hydetown standards, c was carpeting Ruth's front porch American Beauty roses, long stem. l to get out and hustle, and as soon ad train fare to Hydetown and dou- re back and something left over for ture I went back there and poked d among the roses and I found and married her."

uth told me she never intended arry anyone but you, Governor," I

Vell, maybe so," the Governor said, grinned. "But Melvin Fisher had ht a ring and a dress suit and had d out the preacher. I'd like to have his face that night when he came nd with his bouquet of American ties. We were already on the train en. And now here I am, thirty years going back to the old home town as ndidate for Vice-President of the ed States, and Melvin Fisher is r of the town and has to give me a welcome at the station. Poor old thead."

took his feet off the railing and ed his hands between his knees. er mind all that," he said. "Let's usy on that speech. Roy, I have thoughts on foreign policy that probably bring us some urgent tele- s from the national chairman."

hen the Governor started work on thing, he liked to see it through, t meant intensive work for me. I had eck some statistics, then I roughed out the speech, and when he had corrected it after dinner I completed the rewrite. It was late by the time I had finished, and I shared a nightcap with Bill Evers, who was waiting for Clyde McDonald to come aboard at Marketville. Bill looked gloomy.

"I met that guy McDonald at a governors' conference," he told me. "Roy, he's the kind you've got to watch every minute. You say something casual and innocent and he'll put a twist on it that will curl your hair. I'm worried."

"I think the Governor can take care of himself, Bill," I said.

"Sure he can—in a clean, open fight. But you know how he is. He's apt to take a guy at face value, until proved otherwise. Part of his appeal is that he tends to think the best of everyone, and you know it. He'll talk free and easy and Clyde McDonald will find something to pounce on."

"Bill," I said, and put down my glass. "He's just a columnist. The records show that the newspapers don't have much influence on an election. Lay off, or you'll make the Governor jittery, too."

"I guess so," he said. "Okay."

I WENT to bed. I was berthed four cars ahead of the Governor's private car, and the walk to the drawing room I shared with Bill Evers was as familiar as a stroll around the block.

In a sense the campaign train was like a neighborly street. Just ahead of the Governor's private car was a car for the office staff.

Then came the press car, a former club car stripped inside and fitted with a typewriter shelf on each side, running the length of the car, at which were typewriters and metal chairs for the correspondents to write their stories. There was a small bar at one end of the car and as I passed through I saw four men sitting near it in an intent group—the poker game was still in progress.

We had left a lot of track behind us since the campaign started, and most of those aboard the train were regulars. We knew each other well, and we shared a communal life, with an odd sense of suspension in time as we moved in a unit across vast stretches of the country.

Occasionally a national committeeman or the governor of the state through which we were passing rode a way with us, but in general our party was the Governor and Bill Evers and Lucy Strawn and the office staff and, up ahead, the newspapermen assigned to the Warburton campaign.

Until the telegram came, Bill and everyone else on the train had looked forward to the Hydetown reception as a break in the campaign. It was the halfway mark, and the campaign had been building up to it. Of course it meant a

I've discovered the longer, finer cigarette

PALL MALL

PALL MALLS are *good* to look at—*good* to feel—*good* to taste and *good* to smoke. PALL MALL's greater length of traditionally fine tobacco filters the smoke of this *longer, finer* cigarette—gives you that smoothness, mildness and satisfaction that no other cigarette offers you.

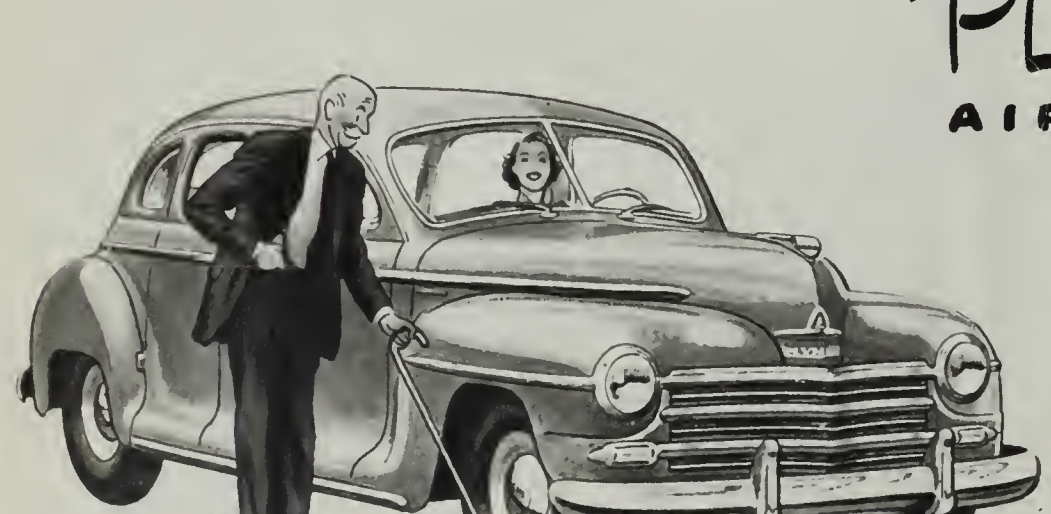
PALL MALL—the *longer, finer* cigarette in the distinguished red package.

OUTSTANDING

-and they are mild!

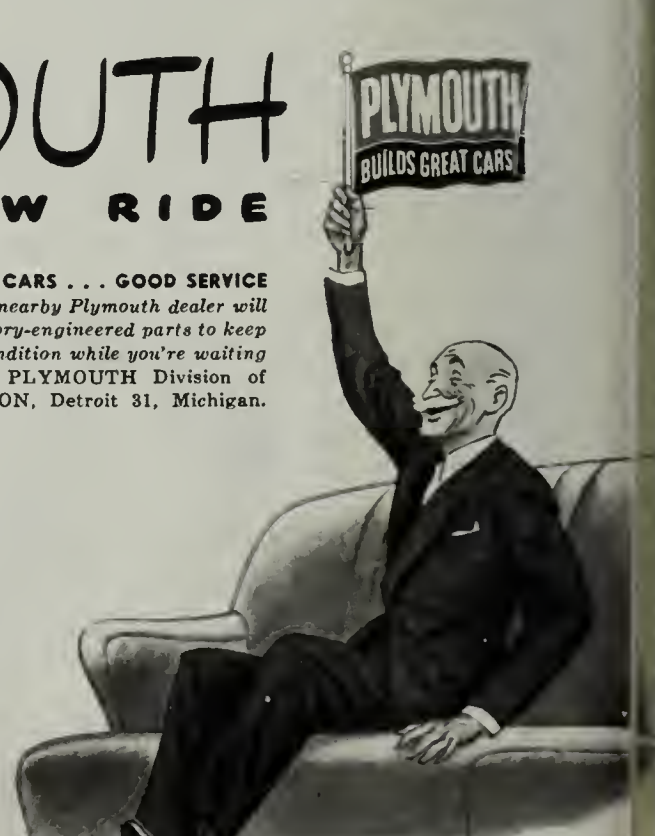
"Grandpa refused to budge until - - -"

"Next to talking politics, Grandpa likes comfort. We couldn't pry him away from that easy chair of his. Then we got the new Plymouth and I started raving about that wonderful Air Pillow Ride. 'Air Pillow—what?' snorted Grandpa. And then I began to coax.



"It wasn't easy, but Grandpa finally agreed to take a ride. He was plenty wary when he first sat down on the rear seat. 'Relax, Grandpa,' I told him. 'You're sitting on millions of tiny air pillows. Yes, that seat cushion is made of Airfoam, the wonderful new cushioning material you get in Special De Luxe Plymouths at such slight extra cost.'

"Grandpa soon got the idea. He stretched out his long legs and settled himself deep in that soft, buoyant cushion. Then he smiled as only Grandpa can smile when he's really comfortable. 'You're not only riding on air—the Plymouth is, too,' I told him. 'We have those sensational new bigger and fatter Super-Cushion Tires. And they come as standard equipment at no extra cost.'



"Grandpa was really talking a blue streak by the time we got back home. He got out and took a good long look at those new tires. 'Biggest I ever saw on a car,' he said. 'And they sure do soak up the bumps. That's the most comfortable ride I ever did have. Air Pillow Ride—indeed. Darned if these Plymouth people haven't put my easy chair on wheels!' "

lot of work for all of us, but it represented a sort of hump. Once we were over it, we felt that we would be coasting on through to Election Day.

Mulling it over in my berth, I was not particularly concerned by Clyde McDonald's activities, and I doubted if there was anything sinister in his covering the Warburton campaign. After all, Ego, the national picture magazine, was sending a reporter and a photographer to Hydetown to cover it, and all the news services and the larger metropolitan papers would be represented. And the Governor was expected to make an important speech. There was reason enough for Clyde McDonald to stir out of Washington.

WHEN the train stopped at midnight at Marketville, and McDonald came aboard, I was asleep. I did not see him until morning, when I went to the dining car for breakfast. I had slept late, and there were only a few in the car. As I came in, the first thing I noticed was a man with his nose buried deep in a book. It was the book that caught my eye. I could see the title on the jacket: Second Man on the Ticket, by Roy Mason, and when I looked at the man who was reading it I recognized him from the photograph that appeared at the head of his daily column as Clyde McDonald.

He was a fat man with crew-cut red hair, and appeared indolent until you saw his sharp, bright eyes, and seemed genial until you heard his biting phrases. He had a quick, acidulous wit and an affected, tough-guy way of talking out of the side of his mouth.

I stopped at the table and said, "You're Clyde McDonald, aren't you?"

He glanced up and said, "Yeah. Take a chair."

I sat down opposite him and he closed the book. "Which side of this zoo you on?" he asked. "Looking in or looking out?"

"I work for the Governor," I said.

"Looking out," he said. "I'm looking in."

"My name is Roy Mason," I said, and picked up the menu.

"Oh, yes," said McDonald. "The eminent biographer, I presume. I've been reading your latest achievement."

"So I noticed," I said.

"It's a work of art," he said. "Congratulations."

I gave my order to the waiter and sat looking out the window, feeling fidgety. I'm always nervous before I have my first cigarette in the morning, but I make it a rule never to smoke before breakfast.

"Yes, sir," said Clyde McDonald. "Willis G. Warburton, the business genius. The farm boy who made good. The two-fisted investigator. The family man. The balancer of budgets and issues. You almost made me forget I lost my shirt on one of his dogs one day out at Jamaica."

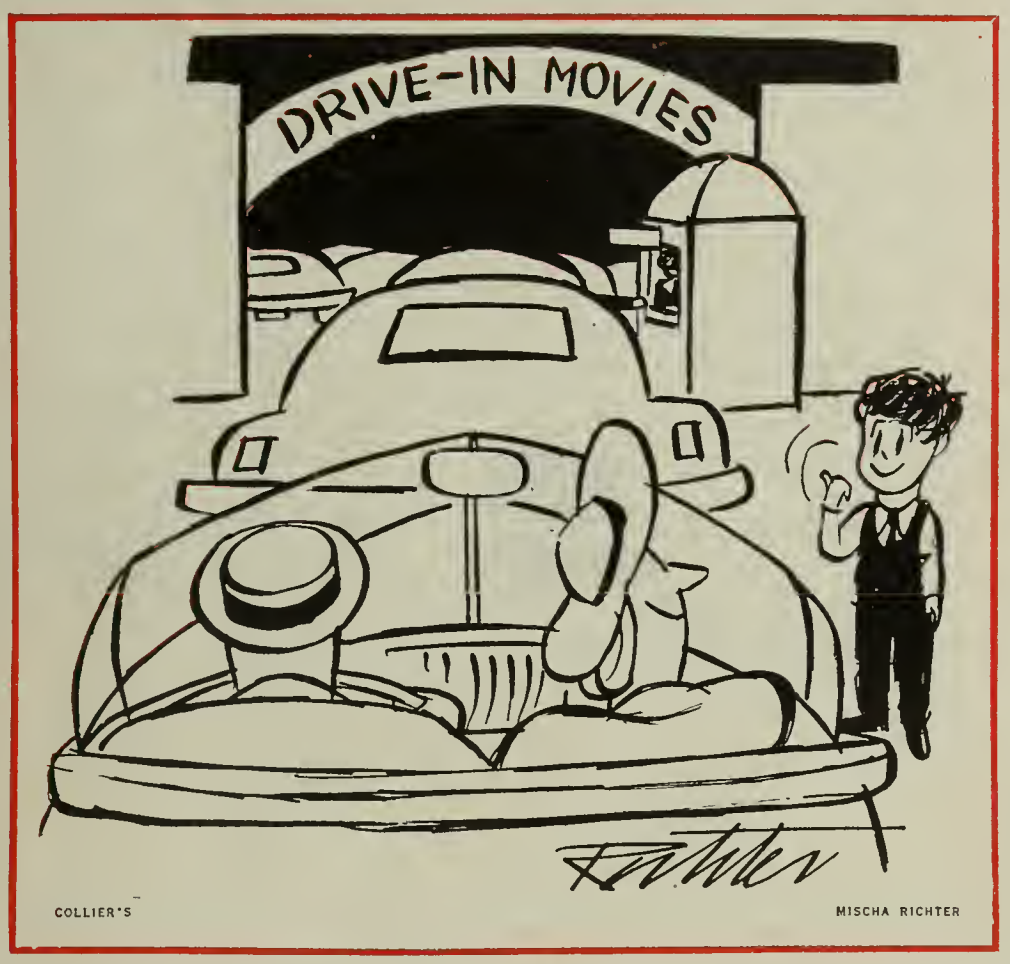
"He had a couple of pretty good horses at one time," I said.

"That so?" McDonald grinned. "You name 'em any place in the book? I didn't notice it."

"You'll find 'em in one of your old Racing Forms," I said. "That isn't a book about horse racing."

"One lucky thing," McDonald said. "I guess not many of those delegates at the convention go to the track much."

"Andrew Jackson used to race horses," I said. "And, Mr. McDonald, the Governor hasn't run an entry in ten years. He raced horses in the first place because an old friend made him a present of a yearling."



"Oh, indeed," McDonald said. "You got that in here, haven't you?" He flipped the pages of the book. "Yep, here it is: *No account of Governor Warburton's activities is complete without mention of his brief experience in raising thoroughbred horses. Having received a very fine yearling as a present from a friend, the Governor many years ago established a modest farm for breeding horses. Some of the animals bred at the Governor's farm were entered in races at various tracks throughout the country and acquitted themselves well. The pressure of his administrative duties forced Governor Warburton to abandon his experiment in hippology some years ago.*" Clyde McDonald gave me a beatific smile. "Beautiful," he said.

The waiter put my breakfast in front of me, and I drank coffee. McDonald closed the book and gave its cover a little pat, like an old friend. "What's on the schedule of the Great Hippologist today?" he asked.

I winced and said, "Mr. Evers can give you the schedule."

He nodded. "Maybe that's what I got here." He took a sheaf of mimeographed pages from his pocket.

"Yes, this is it. Twelve fifteen, arrive at Milltown. Members of the party will be ready to leave the train upon arrival.

Members of the press and photographers will kindly handle own typewriters, cameras, et cetera, et cetera. Reception committee to meet the Governor will include et cetera, et cetera. Entire party will proceed to Milltown Hotel et cetera, et cetera. Ah, here we are. Governor Warburton's schedule: 1 P.M., press conference at Milltown Hotel. Two o'clock, luncheon, et cetera. Three o'clock, conference with veterans' organizations. Three fifteen, conference with leaders of textile industry. Four, conference with et cetera, et cetera, et cetera— Hey, no speech?"

"Not today," a smooth voice said. "Just et cetera today."

WE BOTH looked up. Lucy Strawn stood in the aisle, smiling. She said, "Is this chair taken?"

I got up to pull it out for her, and began introductions, but she cut me off. "We met last night," she said, and sat down. "What's for breakfast? I think I'll try some of that et cetera." She turned to the waiter. "Et cetera," she said. "Sunny side up."

"Yes, miss," the waiter said.

Clyde McDonald grinned. "When you get hold of something," he said, "you don't turn loose, do you?"

Lucy tapped the book on the table with her finger tips and said, "Doing your homework?"

"Research," he said. "Research on the life and times of the Great Hippologist."

"The what?"

"Ask your friend Mr. Mason," Clyde said, with a malicious grin.

I knew it would be in his column next day, and I knew that he, too, was one of those who never turned loose once they got hold of something. Every mention of Governor Warburton's name in his column henceforth would probably carry the bracket (The Great Hippologist).

"What is this Great Hippologist business?" Lucy asked. "What's a hippologist?"

"A hippologist is a man interested in the study of horses," I explained. "Mr. McDonald thinks it's a cute name."

Lucy surveyed Clyde McDonald. "A cute name for you would be the Great Hippopotamus," she said.

"It's redundant," he said, unperturbed. "But, I suppose, not inaccurate." He looked down smugly at his paunch.

"What happens in Milltown, if there's no speech?" Clyde McDonald asked. "We just sit around and wait for the train to pull out?"

"There's a press conference," Lucy said.

"Yeah, I know those press conferences," he said. "Yokels from the local press sit around bug-eyed while the great man sounds off about nothing at all. No, thanks. But I tell you what. Maybe *you* ought to hold a little conference with the press, Miss Strawn."

"Me?" said Lucy. "Why me?"

"At some nice bar," he said.

Lucy's bright gray eyes flicked to mine for an instant, then she shrugged. "I'm afraid I have nothing for the press today."

"The press has a nice cocktail and a good lunch for you, though," McDonald said. "I'll be in the lobby of the hotel at one o'clock. Okay?"

I tried to shake my head at Lucy; and I'm afraid I made it rather obvious, but apparently McDonald did not notice, nor Lucy for that matter. She smiled at him and said, "All right. If I can get away."

"Make the effort, will you?" he said. "You know, you might talk me into supporting your boss for Vice-President."

I had finished my coffee, and I set the cup in the saucer with a jar and got up. McDonald gave me a short nod of dismissal, and Lucy did not glance up at all. But if she wanted to pal around with a redheaded goat with a crew haircut, that was strictly her concern, and possibly, I thought, she might do the Governor some good.

I found Bill Evers dictating answers to a sheaf of telegrams in the office car. I slid onto the seat beside him and said, "This looks like insubordination."

"What do you mean?"

"You sicked Lucy Strawn onto Clyde McDonald," I said. "Didn't you?"

"Of course not," he said. "I just told her to butter him up a little."

"It's okay with me," I said. "But it will irritate the Governor."

"Then he'll have to be irritated," Bill said. "We've got to protect him, Roy. That's our job."

"Yes," I said.

"You write the speeches," Bill said. "I'll take care of what goes on behind the scenes."

I went back to the Governor's car and looked over the speech, which had been stenciled for the mimeograph machine. The Governor was alone on the observation platform, smoking a cigar. His wife had left the train on his orders a week before because she was showing the strain of being a candidate's wife, and he looked rather forlorn out there alone, but I did not go out. He had little enough time to himself, and today would be a busy day in Milltown. For me it was an easy day, since there was no speech subject to last-minute changes.

WHEN the train stopped at the Milltown station at noon I dropped off at the dining car and took a taxi to the hotel, avoiding the official reception.

Milltown was like any other small city—no place to be left to one's own resources before nightfall. There were no sights to see, particularly after a dozen such stops in a dozen such towns, which seemed all to be exactly alike, so the natural place to lay your hat was on a bar stool. I went to the hotel bar, and later Bill Evers joined me. We had lunch together, and at four o'clock went up to the Governor's suite for the conference with local party leaders. We listened to the reports, and while Bill made notes I saw to it that every politician's hand held a well-filled glass.

After the last party stalwart had been shooed from the suite nearly an hour later, the Governor said, "Roy, pour me a stiff one, will you? I've still got that reception to go through."

"You can get a good night's sleep tonight, Governor," Bill said. "After we get aboard again at six o'clock there's no stop until we make New Orleans at noon tomorrow."

"Bill, you're the one in need of rest," the Governor said. "Worry about yourself for a change. I'm all right. And say, I want to get some telegrams off. Where's Lucy?"

"Lucy?" Bill said. "Oh, Lucy's got a slight headache, Governor."

Lucy, I supposed, had kept her date with Clyde McDonald. If there was anyone who could get anything out of him, Lucy was the girl. She was a little too cocksure for my taste, and there was a wise, brittle quality that showed me she had been around.

Somehow I never have been attracted to sophisticated women; they tend to make a man feel that he has lost the initiative, and if a man loses the initiative he's apt to feel that he is simply being used as a prop to play dolly. Lucy made me feel somewhat that way. She was always smiling in a rather secret amused way and making the sort of cracks that a high school boy gets from his sister in college.

Bill Evers returned with a stenographer, a little fussed because she had never taken dictation from the Governor before, and as Bill and I went into the next room with our drinks he whispered to me, "They had lunch down in the grill, Roy, and I guess they're still there. He was leaving the table for a minute when I looked in, and Lucy gave me the high sign."

I put my glass down and said, "I don't

like the idea of using Lucy for that kind of thing." I said it with sudden irritation that made me realize I was pretty tired; the strain of the trip was telling on me. "I agree with the Governor on that," I said.

"Lucy loves it," Bill said. "That's her element, boy. She's playing *femme fatale* all over the Milltown Hotel Grill. Drinking B and B and dropping her eyelids last time I saw her."

I poured myself another drink, and before I had finished the last of it Bill consulted his watch and called out, "Five minutes to go, Governor. You're due at the reception in five minutes."

We heard the Governor's groan. Bill said, "Drink up, Roy. You're coming, too."

"Oh, no!"

"Oh, yes," Bill said. "We've got to stand by him and hustle him out of there as soon as we can. Drink up, and get your hat."

I WENT to the reception, in a room of blue draperies and plaster cupids called the Tuileries Ballroom. I stood against the wall, near the Governor. Photographers made pictures and the men and women of Milltown important enough to make the "distinguished guests" listing in next day's edition of the local papers filed by to shake the Governor's hand. The Governor carried that sort of thing off well. His hand had flesh enough to withstand the punishment, and he could put his smile on and leave it there hour after hour when he had to. On occasions such as this it was obligatory.

The reception lasted until ten minutes to six, and afterward there was a rush. The cars were waiting in front of the hotel, with a police escort, and there was a desperate scramble as reporters and photographers found places, carrying their portables and cameras. Bill and I squeezed into the Governor's car with the Governor and the state chairman of the party.

There was a crowd at the station, with a police line holding it back, and we were hurried through to the train. Bill Evers pried the state chairman loose at the steps and the Governor escaped into his car. When we followed him a moment later he showed a tired grin and said, "Bill, tear another day off the calendar. Then you can order me some hot soup and crackers. I'm going straight to bed."

"That's a good thought, Governor," Bill said. "Everything went okay?"

"Of course it did," the Governor said.

"A guy at the press conference wanted to know why your wife wasn't along," Bill said. "He's from the opposition paper. I told him she was joining us at Hydetown. Governor, she's sure to be there, isn't she?"

"Now you know she is, Bill," he said.

"Yes, sure," Bill said. "I knew that. I was just—"

"Just worrying," the Governor said. "As usual. Now how about—"

"Soup and crackers," Bill broke in. "Coming right up."

As we left the car, Bill said, "I hope that's not a bad sign, just eating soup and crackers. I hope he's not sick."

"He never looked better," I said.

"Still," said Bill, "I'll have the chef put a couple of chops on the tray."

But before we reached the dining room we met Lucy Strawn, weaving toward us through the office car. There was a light in her eyes and a quiet, smug smile on her face.

"Gentlemen," she said, and her voice was fuzzy. "I got the papers."

"I've seen the papers," Bill said impatiently. "Lucy, are you tight?"

"Not newspapers," Lucy said. "I mean the papers."

"What papers?"

"*The* papers," she said importantly. "Don't you ever go to the theater. The papers, man, the papers!"

"You mean from Clyde McDonald?"

"From none other," said Lucy.

"Where are they?" Bill said.

"Honey," Lucy said, "I wasn't so stupid as to filch them, but I have them by heart." She pressed a hand dramatically at her bosom. "It was a telegram."

"Well?" Bill said.

"He had it in his inside pocket, along with a bill from the National Press Club and the summons and complaint of his latest libel suit and the various other memorabilia such characters pack about with them. When he took them out of his pocket, I got a look."

"Congratulations," I said, unable to conceal my disapproval. "You don't look a bit disheveled."

Lucy gave me a level look.

"Pay no attention to him, Lucy," Bill said.

Lucy didn't. She went on talking, looking only at Bill. "He's one of those men who keeps his wallet well tamped down," Lucy said. "To get his wallet out he had to take out a wad of papers. When he paid for the lunch I knocked the papers onto the floor and had a look at the telegram. This is what it said, Bill:

"Young man, I haven't lived in Hydetown for thirty years," the Governor said, and smiled. "The only girl I had any trouble with was Ruth, and that trouble ended when I married her."

"I don't like it," Bill said. "I don't like it at all. What *could* it be?"

"There couldn't be anything," the Governor said. "Nothing important, anyhow."

"Can you think of anything *unimportant* then, Governor?" Bill asked. "It doesn't take much for McDonald to go to work on."

"Not even anything unimportant, Bill."

Bill dropped into a chair. "Frankly, this worries me. You can't think of anything, Governor. But why should the guy send a telegram like that? *Why?*" He looked up. "Governor, you got any *friends* in Hydetown?"

"I think so," the Governor said. "Johnny Mills, the present county chairman, was my friend. I know of nothing to change him."

"I'll send him a wire," said Bill.

The Governor sat up straighter.

COLLIER'S "I like to hear Preston tell his joke. He enjoys it so much" AL ROSS

"Come to Hydetown with Governor Warburton and you'll have a juicy item for your column."

"So that's why he's here," Bill said. "Who sent that telegram?"

"The name signed to it was Melvin Fisher, whoever he is."

"I know who he is," I said. "Meathead Fisher. He's the mayor of Hydetown."

"Come on," Bill said.

He started with loping strides toward the Governor's car. Lucy gave me a look, and followed. I was not sure what the look meant, but I did not like it.

GOVERNOR WARBURTON was sitting in darkness, with his legs stretched out. Bill turned on a wall light and said, "Sorry to disturb you, Governor, but we've got the dope on Clyde McDonald. Lucy, tell him about the telegram."

Lucy told him, and the Governor listened with no change of expression. He made no comment.

"Governor," said Bill, "what do you think?"

"I don't think there's much juice for an item in Hydetown," the Governor said. "I wouldn't worry, Bill."

"Do you have any enemies there?"

"I suppose so," the Governor said. "Melvin Fisher, the fellow who sent the telegram, is no friend of mine. But he's got nothing on me, Bill."

Bill moved his hands uneasily, said, "I don't suppose there was any g-girl trouble—anything like that?"

"You'll do nothing of the sort," he said sharply. "You'd only stir up trouble, doing that, when there isn't any trouble to begin with. Just let it ride, Bill."

Bill was on his feet again, walking up and down, shaking his head. "No," he said. "We've got to find out. Governor, I'll take a plane to Hydetown."

"I can't do without you, Bill," the Governor said. "I need you here."

"Somebody has to go," Bill said. "We can't just let it ride." He looked at me, considered, then gave his head a decided shake. "No. Roy's not tough enough for the job."

Lucy Strawn smiled. "Maybe that's why he's just the man to do it," she said.

I didn't like her characterization of me, nor the cozy tone she used, but before I could protest, her smile widened and she said, "On the surface, that is, Roy. You're actually a stinker underneath." She turned to the Governor. "Don't you think he'd be good?"

The Governor grinned. "Yes, Lucy, I do think so. How about it, Roy? You want to run over to Hydetown and talk to Johnny Mills?"

"But, Governor, how about your speeches?" I said. "We've got to get those speeches lined up."

"Roy, before you came along I made quite a few speeches on my own," the Governor said.

"Now, Governor, I didn't mean—"

"I know what you meant, Roy," he said softly. "You've been a tremendous help to me and I'm grateful right down to my bones. But maybe Bill is right. Maybe you can be more help to me in Hydetown right now than here?"

"Well, naturally I'll go, Governor," I said. "If that's what you want."

"I wish you would, Roy."

"All right, then," Bill Evers said dubiously. "But, Roy, you've got to play 'em close to your chest. Don't let on why you're there, except to Mr. Mills."

"Of course not," I said.

"Also," the Governor put in, "Roy's our man because he's been to Hydetown. He knows the place."

"Why, I've never been to Hydetown, Governor," I said.

He looked at me. His eyes were tired. "Oh, I thought maybe you went there when you were writing me up, Roy."

"There wasn't time," I said. "It was a rush job, you know, and Bill and I just talked to everyone we could and looked up the newspaper files."

"It's a nice town," the Governor said. "You'll like it. Bill, how about my soup and crackers?"

Bill Evers looked stricken. "Coming up, Governor. Coming up right away."

"Good," the Governor said.

Bill took my arm and propelled me out of the car. On the platform he said, "Roy, get your suitcase packed. I'll check on the nearest airport and we'll stop the train at that town, wherever it is. You be ready."

"Don't worry. I'll be ready."

"Well, Operative Y," Lucy said. "Best wishes from Operative X."

"Operative Sex, don't you mean?" I said stiffly, and went on through into the car. Behind me, in the vestibule, Lucy Strawn laughed softly.

THE plane set me down at an airport forty miles from Hydetown at half past four in the morning, as a seeping, orange dawn began to outline the low, regular hills of that Southern country. There was no bus for a couple of hours, but I found a taxi to run me over to Hydetown.

Anyone who has driven from New York to Florida by the inland route has passed through Hydetown, but the odds are that not one in ten thousand stopped there, unless the car had a flat. The highway narrows to the main street of the town, and there are two traffic lights, entering and leaving Hydetown. The buildings along the main street are solid, two-story red brick with flat roofs forming exact planes on opposite sides of the street.

I drove into Hydetown about half past five, and there was not another car parked or moving on the street, not a door opened yet. I carried my bag into the Fisher Arms Hotel.

The lobby was small, and crowded with leather chairs comfortably grouped so that drummers could sit and gaze out huge plate-glass windows at the street. The office was enclosed by a waist-high railing and counter, but the two chairs behind the railing were unoccupied. No one was about.

I put my bag by the window and dropped into one of the big leather chairs. I had not had breakfast, and did not light a cigarette, and I had that gloomy depression that comes on a man who has risen much too early and faces a long and unaccustomed day. I had not been to bed at all, and had slept only a little on the plane.

A truck passed through and dropped off a bundle of newspapers at the drug store across the street, and a pedestrian or so appeared, off to early jobs. I sat by the window and watched the town come awake, and I had heard the rattle of dishes for some time before the sound communicated anything. Then I jumped up, picked up my bag, and hurried to the dining room on the other side of the lobby.

A scrubbed-looking waitress was setting the tables. She glanced up and gave me a steady, incurious look, then went o

about her task. I smiled and approached her.

"Good morning," I said. "How about some breakfast?"

"Grits ain't ready yet," she said.

"Scrambled eggs, bacon, toast and coffee," I said, and sat down.

"I'm sorry, sir, you'll have to wait," she said. "The grits ain't ready yet."

"I don't want grits," I said.

She gave me a strange look. "Don't you want your grits this morning?"

"No grits," I said, and she had given me an idea of the cosmopolitan quality of Hydetown. "Just scrambled eggs and bacon, if you can manage it."

"Sure," she said. "I can get *that* for you right away."

So this was Hydetown, I thought, and wished that Clyde McDonald was with me to see it. The Governor had been right when he said there was not much juice for an item in Hydetown. The town looked squeezed dry as pulp, and the waitress had summed it up. The grits ain't ready yet.

WHILE I ate breakfast the hotel began to stir. Before I had finished, three other early morning risers came in for breakfast. By then the grits was ready, and each had a two-inch-by-four rectangle of it, soaked in butter, alongside his fried eggs. I paid my check and carried my bag to the lobby.

An old man was behind the railing now, chewing a toothpick. Although he had not been among the breakfasters in the dining room, he had apparently had his grits. I put my bag down and said, "How about a room?"

"How long you aim to stay?"

"Just overnight, I think."

He nodded. "We're pretty busy. All filled up this week for the big shindig. But I got a room for tonight. Sign here."

He pushed the register toward me and said as I signed my name, "You only going to use one bed, ain't you?"

"Yes." My eyebrows went up at that.

"Three beds in the room," he said. "Sometimes you get these truckers late at night. One will sign up and the others sneak in somehow. That will be two fifty." As I reached for my wallet he glanced at my signature and said, "I bet you're the fellow wrote that book about Willie Warburton."

"That's right," I said.

"Thought it was the name," he went on. "I knew Willie Warburton when he was a boy. I always had my money on Willie."

"That so?" I said, and added tentatively, "I think he'll win."

"That he will," the old man said. "He sure will. I got my money on him this time too."

I followed him up to the third floor past alarmingly large signs pointing out the fire escapes, and I was glad when I entered the room to see that it was only a short drop to the adjoining roof. The windows gave on the long plane of rooftops, and beyond them I could see trees and a scattering of frame houses. The town seemed shabby and forlorn in the early morning sunlight, and the big room, with its three iron beds, depressed me. But I was tired, and I opened my suitcase for the first time since I had dropped off the Governor's campaign train, took out my pajamas, drew the shades, and went to bed. . . .

It was nearly noon when I awakened. I looked for the room telephone, to call John Mills, but there was none, so I shaved and dressed and went down to the lobby. I crossed to the telephone booth and picked up the directory, and as I was looking up the number a rasping voice said, "I guess you're Mr. Roy Mason."

I turned. A lean man with gray hair and a leathery brown skin was looking me over. Spectacles were pinched on a long, thin nose, and his black bow tie and dark suit gave him a deaconish air.

"I'm Melvin Fisher," he said. "

book. I slammed the door shut and gave John Mills's number to the operator.

"Mason, did you say?" said John Mills. "You the fellow wrote that book?"

I winced and said I was, and he said, "My office is just down the street from the hotel, two doors after the bank."

I knew they were watching me as I left the booth and walked through the lobby to the street. There was much more life in Hydetown now, but if you analyzed it you saw that a large percentage of it was due to traffic passing through town on the highway. Two doors below the bank I saw a window lettered *John Mills, Real Estate and Insurance,* and a solid man with a rosy face pleasantly creased from an uncritical outlook on life was waiting in the doorway.

"Mr. Mason?" he said, and put out his hand. "Come in, come in. What do you hear from Willie Warburton?"

"Left him last night," I said. "He's making a great campaign."

"You bet he is," said John Mills. "I've been following it in the papers. That boy can sure make a speech. I suppose he sent you on to see how everything is shaping up here for Warburton Day?"

"In a way," I said, "yes."

"The whole county will be here," he said. "Just about. It will be a day, all right. Got two bands lined up. The American Legion band and the high school band from the county seat."

I SAT down and said, "I wonder if you have a copy of a paper that carries Clyde McDonald's column."

"Got it right here," he said, and passed me a newspaper folded to the column. I read it through quickly. It reprinted my paragraph from the book and made malicious sport of our efforts to play down the adventures of Willis G. (The Great Hippologist) Warburton at the race tracks.

"This man McDonald is out to get something on the Governor," I said.

"Oh, don't let that Great Hippologist stuff worry you." John Mills waved a hand. "People are more broad-minded than they used to be, and for that matter, we never made any bones about horse racing hereabouts. When we were boys racing quarter horses was a great sport. I remember Willie was in pretty good demand for those races when he was a kid. He was a good rider."

Now I knew what the old man at the hotel had been talking about, when he said he always had his money on Willie. I groaned and said, "You mean to say he was a jockey, Mr. Mills?"

"Why, I wouldn't call him that. He was just a kid in overalls who could stick to a horse's back for a quarter of a mile. Willie used to ride bareback and barefoot, and he could get a lot out of a horse. Why, say, I rode a few races myself, but I was never as good as Willie."

I dropped the newspaper containing McDonald's column into the wastebasket. "Mr. Mills," I said. "I'll tell you why I'm here. Clyde McDonald is on the track of some sort of information discreditable to the Governor and he expects to find it here in Hydetown."

"Discreditable?" said John Mills.

"All I know about it is that Melvin Fisher sent McDonald a telegram telling him that if he came to the reception for the Governor in Hydetown he'd have something juicy for his column."

"Meathead Fisher sent the telegram?"

"Yes."

He frowned. "That I don't like. Mel Fisher is a pretty cagey customer. He doesn't go off half-cocked." He shook his head. "But damn it, if there was anything against Willie Warburton in this town I'd know about it."

"And you haven't any idea?"

"No idea at all." He leaned back in his chair and gazed out at the steady stream of traffic. Thoughtfully, he said, "I don't suppose it could have anything to do with Hattie Perkins."

"Hattie Perkins?" I said wea
girl?"

He grinned at me. "I guess sl
girl once, but it was before my ti

i?" He smiled. "Not in this . Mason. But come on, I'll run o see Miss Hattie."

r was parked at the curb, and had hung a Back Soon sign on his door, we drove out to Miss Harriet Perkins' home, a half mile from the center of town. On the way he said, "I'm thinking you're right. We're off the track. It couldn't have anything to do with Miss Hattie. But I'd sure like to know what Mel Fisher has got under his hat."

Miss Perkins lived in the sort of white cottage with green blinds and rambler roses that I might well have described in the book, so hackneyed was my literary vein, and so trite was the cottage. There was even a girl among the roses, under a trellis, a girl with honey-colored hair and deep blue eyes and a trace of freckles.

John Mills called to her, "Hi, Ginny. Miss Hattie around?"

"She's out back, John," the girl said.

"Ginny," he said, "let me make you acquainted with Mr. Mason. Ginny is Miss Hattie's grandniece, Mr. Mason. Miss Virginia Perkins."

I said, "How do you do?" and I thought that for the first time in years I was looking at something original, a product without make-up or artifice, a raw material that required no processing.

"My friend wants to talk to Miss Hattie," John said.

She looked at me. "Then you'd better take it off," she said. Her voice was low and very clear, with no sorghum in the Southern accent.

"Take what off?" I asked blankly.

"The button," she said. "The campaign button. She'd throw a fit if she saw that Warburton button."

"Better take it off, Mr. Mason," John Mills said.

"Mason?" the girl said. "Did you say Mr. Mason, John?"

"That's right. Roy Mason."

"The fellow who—"

"Yes, I wrote the book," I interrupted.

"Oh, well," Ginny Perkins said, and spread her hands. "Then I'm afraid Aunt Hattie won't want to see *you*."

THE WEEK'S MAIL

Continued from page 4

ALFRED & THE WOO WOO KID

DEAR THE WEEK'S MAIL: Gotta disagree with Marge and Charlie who likened Humfreville's "Alfred" to a furriner, Stalin's boy Vassily (The Week's Mail, July 17th).

Alfred is all American. When he first appeared I was making some pictures with Hugh Herbert—the Woo Woo kid. The resemblance, not only facially but in manner and idea, of Alfred and Hugh struck me so forcibly I tried several times to get the Great Minds to combine them in a picture.

Unfortunately I was unable to suggest how to tie Alfred in with sex or gun totin' or drayma in the raw, so the idea went by the boards.

The Russians have screamed they beat Edison to the punch on electric light, Franklin on electricity, Marconi on wireless, and Kellogg on Bran Flakes. But they can't claim they beat Humfreville to Alfred. PAUL GERARD SMITH, Astoria, L. I.

OUR EDITORIAL-MINDED READERS

DEAR EDITOR: You've got a fine magazine. Keep up the good work and you'll have the best. But—

Why not more sports fiction? Your writers failed you? Speaking of sports tell Bill Fay that he's doing a good job on his sports.

I think you ought to have two Alfred cartoons each week.

Hey! Why not some comic covers, funny things do happen—why not snap a picture?

I think you need some more fiction and short stories. How about making Keep Up With the World longer? It's very interesting. Sporting Odds is very good, too; it should be lengthened.

DICK FITZGERALD, Lake George, N. Y.

HOW TO ESCAPE FROM A WIFE

GENTLEMEN: Re How to Catch a Husband (July 3d) on rounding up vagabond husbands: Why bring 'em back alive?

One wonders how many of the three thousand admittedly recalcitrant husbands might have gone on to become something really worth while in this world if your Investigator George Lamb, dean of America's husband chasers, had left them alone to work out a decent salvation.

The writer has had a lot of experience along the lines mentioned, having lived out one divorce, alimony, etc., and is seriously considering giving up a $40.000 business and a $20,000 home, etc., in return for a scribbled note on the theme so ably quoted by the dapper George Lamb. "I'm getting out now while I still have some youth left, to see and do all the things I've always wanted."

I'm forty-six years old and thank God that's just the way I feel.

NAME WITHHELD ON REQUEST,
Port Jefferson Station, N. Y.

WEAKENDER

EDITOR COLLIER'S: Just a note of appreciation of your short short by William Chadwick (Laughter Must Be Shared, July 17th). "A single hour in an evening of spring is worth a fortune of gold—laughter is the balm which eases the pain of life." I have felt that but could not express it. Please publish a paragraph containing this Chinese motto also: "After three days a guest stinks." I'm sorry to be so outspoken but we of California are constant hostesses—we love them for three days, but that's enough.

Wish your magazine was published twice a week.

A CONSTANT READER. Long Beach, Cal.

Maybe we're just Confuciused but we thought it was Franklin who sounded off about guests.

HE-MAN COVER BOYS

EDITOR COLLIER'S: Hooray for the co on the July 17th Collier's—I mean picture of Mr. Stan Robins. He isn't sho ing every tooth in his head like some the pictured gals, but has a human and morous expression.

Wish we could have some more man" covers. How about it, gals? Ple don't publish my name. My husba wouldn't like it. H. F., Santa Rosa, C

. . . I was particularly intrigued by July 17th cover. I presume that the ba ground was composed of authentic lobs pots, the salty-looking gent with the bus eyebrows is undoubtedly the lobster fi erman, and the girl adds the cheeseca but where, oh, where, do they catch th lobsters already boiled?

A. C. SMITH, Plainfield, N

We quote The Week's Work of July 17 "The 'fresh-caught' lobsters are red . because they are boiled right in the tory on the dock for immediate can —so please don't write in. . . ."

SALT VS. KEROSENE

EDITORS: Re Ted Shane's Inhuman ture (July 10th), not every skin is rug enough to stand repeated applications kerosene against redbugs. Rub a m tened salt or saturated salt solution to points of attack. So quick, so soothin this innocent remedy that getting a c of redbugs is almost a pleasure.

HERMAN KURZ, Botan
Florida State Univ., Tallaha

. . . Bugs, bugs, marching up and d again
From head to foot of poor old Shane.
So what? The hungry bugs must eat or
They cannot order ham on rye.
So cut the cackle—toughen up
And learn to take it like a pup,
Vent not your spleen on growing thi
Most all God's creatures got wings
stings!!!

IRON PANTS

DEAR SIR: Re the Joan of Arc article (26th), actually, Arrowsmith Tool & Company of Los Angeles produced armor used by the entire cast, excep that of Ingrid Bergman, instead of speedboat manufacturer as stated in article.

Of particular interest is the mat used for this armor. Dow magnes .064" in thickness, was employed e sively. Magnesium, in weight, is app mately two thirds that of alumi with greater strength characteristics application of one of our newest m for an ancient usage.

PAUL R. BURT, Chief Engi
Los Angeles,

TYKE

DEAR EDITOR: Is the tyke with the s gle hold on his baby brother (July 3d little angel who got the gun for Ch mas? (Cover, Dec. 27th.)

MRS. FERN SMITH, Boscobel, is

No—he's a bottle-scarred veteran o peace—fattening baby brother for a ble next Christmas gun cover.

AN AFFAIR OF STATE

Continued from page 27

n this night, candles lighted his room. Whether there was a power failure, or government was conserving electric- or whether the lights were out in this or of Budapest alone he did not w, and it was useless to inquire of dame Angell or Sandor. He had ced candlesticks at each end of the g Italian desk, so that they framed his table. The warm, flickering shadows lded the imperfections of the furnish-, rounded the angular chairs. The m had been his home for almost four ths. Now, whatever his decision, e ties would be torn up.

EFORE him was this implacable sheet of flimsy—a notice of eviction, ificate of failure, diploma of disgrace. other paraphrased copies of the cable ld have been made, so that by now ryone in the legation would know. le suspected this was why through the le day he had received no phone calls no visitors. News of the cable would e seeped to the British and the French, even the Hungarians, during the ktail hour at the Park Club. The ca-

From Installment XV of THE SECRET PAPERS OF HARRY L. HOPKINS: The Combined Chiefs of Staff met at Malta to decide between the Eisenhower and the British final knockout blow against Germany. "The arguments reached such a point that Marshall, ordinarily one of the most restrained and soft-spoken of men, announced that if the British plan were approved by the Prime Minister and President, he would recommend to Eisenhower that he had no choice but to ask to be relieved of his command."

had come in a code which the Ger- ns had broken in 1941 but which was used for matters classified as less secret because it was economical. probably the Russians would read the le too.

he paraphrase read: "Most disturb- information has reached the depart- nt concerning your conduct, which ears to border on treason, in the lapest mission. Specifically you are rged with the following violations of e Department regulations:

1. Without authority engaging in dip- atic negotiations with an official of a eign power.

2. Endangering United States policy indiscreet utterances to an official of a eign power.

3. Deliberately disobeying warnings to associate with representatives of power.

4. Refusal to obey direct orders of erior.

5. Conduct unbecoming of an officer he Foreign Service.

6. Purloining narcotic drugs from the sion dispensary.

Since all these charges have been stantiated the department regrets re- ring your immediate resignation. wever, in view of your inexperience, your previous record in the armed ces, the department will permit you resign without prejudice. In accord- e with regulations governing such es, passage will be furnished to your me station."

he last paragraph was the key, of rse. It was an invitation to go quietly, hout a fight.

All he had to do was write and sign a simple note of resignation and that would end it. It would sponge off the first thirty years of his life. No public stain would remain. He could go home and marry Susan. He could get a job and start over. If necessary, he could refer without shame to his short diplomatic career. It might even carry an aura of distinction. He could say, "Oh, yes, I was third secretary in the legation at Budapest. Had to give it up. Not enough money in it."

Yet he could not bring himself to write his resignation. All day he had known he would not write a resignation. He could go home and get a job, but never again for his government, for in the files would be this unchallenged cable. This was peculiarly important to him. All his life a career in the department had represented honor, respectability and security.

And he couldn't let down Leonides.

He could use his hearing to tell his story. Perhaps he would be believed in Washington, even if unbelieved in Budapest. There would be the unpleasant taint of a department trial. It would undoubtedly leak to the press. To have a hundred people in Washington and Budapest know of these accusations was one thing. To have a hundred million people know was quite something else. If there was a departmental trial, and he was not believed and fired from the department, his name would be damaged beyond his own lifetime.

Yet it was necessary that he fight. There was nothing else to do. The blank paper was already in his typewriter. While it seemed improbable that the Secretary would ever see the letter, he typed it in the traditional form.

"To the Secretary of State,
"Sir:

"I have the honor to report receipt of your coded cable 49122692, classified confidential. Despite this cable I find I cannot resign from the Foreign Service of the United States. I will be happy to answer the charges contained in this cable at any time, according to your convenience."

He signed his full name at the bottom, boldly, Jefferson Wilson Baker.

ON THAT Tuesday morning Horace Locke had found a young woman outside his office door. She said, "You're Mr. Locke, aren't you? My name's Susan Pickett. I wonder whether you could see me, Mr. Locke?"

"Certainly. Come in." This girl seemed tense and agitated, and he wondered what she could want.

He drew up the one chair he hoped was comfortable, and held its back for her in a courtly manner long out of fashion. "Now, Miss Pickett?" he inquired.

"Mr. Locke," she began, "I understand you're a friend of Jeff Baker's."

"More precisely, I was his father's friend," Horace Locke said.

"Oh. Maybe I shouldn't have come."

"Don't mistake me," said Horace Locke. "I'm very fond of Jeff Baker—very much interested in him. Have been all his life. Are you his friend too?"

She said, "I love him. Mr. Locke, he is in very serious trouble."

Now his thin, sensitive hands were on the desk, and he was looking at her differently than he had before, and all his instincts were alert and wary. "How do you know that?" he demanded.

She took a cigarette from her bag and tapped it on her thumbnail, and he noticed that her nails were well shaped, but stubby from typing. She put the cigarette back in her bag. "I work in the department," she said. "Secretarial. I take the nine-o'clock conference."

"This matter of Jeff's didn't come up at the conference, did it?"

"No. If it had, I couldn't talk about it. I have a friend named Gertrude Kerns. She works in Balkans. We always have coffee together in the cafeteria after I've typed the agenda. This morning she told me Jeff was being recalled. He has been asked to resign. They sent a cable last night. She knows I know Jeff."

"So quick," exclaimed Horace Locke. "So damnably quick!" Matson hadn't wasted an hour.

Susan didn't seem to hear him. "I didn't know what to do. I told her I had a pain in my stomach and it might be appendicitis. I told her please to go to the Undersecretary's office and tell them I felt sick and couldn't take the conference. I went up to Code and Cipher and got a paraphrase of the cable. I suppose I'll get in trouble. I don't care. Here it is." She handed it across the desk.

Horace Locke read it, and read it again. "I'll handle this. I'll handle it and let you know. Now get this paraphrase back to Code and Cipher and forget it."

"All right. I thank you so much, Mr. Locke. I feel better now."

Horace Locke said, "I have very little influence. I can only do what I can. It may be too late already."

"I don't think so," she said.

She rose, and he rose and opened the door for her. As she left he could not help but put his arm around her shoulder. She needed reassurance. She didn't have to sham her inner sickness.

Now the time had come for Horace Locke to act. There was no use appealing to Matson now. Matson had committed himself. Only the Secretary of State could save Jeff Baker. He dialed 3071.

A pleasant voice sang, "Office of the Secretary of State."

"This is Horace Locke, in the department. I must speak with the Secretary."

"Is he expecting your call, Mr. Locke?"

"No. But it's very important."

"I'm sorry, Mr. Locke, but I don't seem to place you."

"I'm Adviser to the Diplomatic Monuments and Memorials Commission." He tried to make it sound important.

"Well, may I suggest you send the Secretary a memo, Mr. Locke. You know he's terribly busy."

"This is really urgent, and really important," Locke said.

THE girl hestitated, and then said, "Well, in that case I suggest you dial one of the Secretary's executive assistants. Their branch is 2881."

"Very well," said Horace Locke.

He dialed 2881. He didn't know any of the assistants. They were all younger. But he knew their names. He asked for Mr. Partridge. He told Mr. Partridge he had to see the Secretary immediately, on a matter of vital importance.

"Couldn't you come over and talk to me?" Partridge asked. "You know how it is, Mr. Locke. The Secretary is snowed under."

"I'll have to see the Secretary himself," Locke insisted. "This is extremely serious, and extremely confidential."

"Couldn't you give me some idea what it's about? After all, that's all I do from seven in the morning until midnight—handle stuff that is serious and confidential."

"No, Mr. Partridge," Locke said. "I can't tell you. It must go to the Secretary, and to him alone."

"Well, I'm sorry that you feel that way, Mr. Locke. I can't do anything for you. I suggest that you dictate a memo."

Horace Locke put down the telephone. He chuckled. He couldn't dictate memos. He didn't even have a stenographer. He tried to think of a way to get to the Secretary. He was still thinking at lunch.

Early in the afternoon he looked out of the window. Across the street photographers were knotting at the entrance to the executive office of the White House. The President must be better. He saw a limousine swing through the White House grounds. It was a Rolls-Royce and that would mean the British ambassador. He watched other limousines stop. He could see the Secretary's car at the West Executive Avenue entrance.

He had to see the Secretary, if he was to help Baker.

Horace Locke put on his hat and coat and walked downstairs.

He walked through the door of the West Executive Avenue entrance. The guard nodded. He was an old guard, who had always been at this entrance to Old State. "Nasty out, today, isn't it, Mr. Locke?" he said.

"Yes. It's foul." He went outside into the drizzle, and felt in his inside coat pocket to be sure he had Baker's letter.

IN NEW STATE he walked confidently to the Secretary's suite. Now that he had made up his mind, it would not be too difficult. In the outer office a receptionist asked his name, and he told her and she asked whether he had an appointment. "No, but the Secretary will want to see me," he said.

She seemed puzzled by his answer. She said, "I'll send in your name, and you can wait."

That was all he wanted, a chance to wait. He took a chair in the anteroom where he could watch the door through which the Secretary must pass.

After he had been waiting for a half hour he sensed, by the activity, that the Secretary would soon be back. But yet another thirty minutes passed, and the Secretary did not arrive.

Then Susan Pickett came in. She had a notebook and pencils in her hand. He saw her as soon as she walked in from the hallway and he lifted his head suddenly so that she noticed him and came over to him. She said, "Oh, you've got an appointment. That's fine."

He rose, and winced. The chill drizzle had loaded his joints with aches and stiffness. "No, I haven't an appointment," he whispered. "I'm just waiting for him to come back."

"Oh, he's back!" the girl said. "He's been back, Mr. Locke. He comes up in his private elevator on the other side of the building and goes directly into the inner office. He doesn't use this entrance."

Horace Locke realized suddenly how he had lost touch with what went on inside the department.

"Golly, Mr. Locke, you could wait here all day and you'd never see him." Susan said. He could see that she too was shaken and worried. He knew that she had depended on him, that she had faith in his ability to help Jeff Baker, and now that faith was gone.

"I'm going in to see him in a minute," Susan said. "I have to see him every day at this time. Would it do any good if I told him you were here?"

Horace Locke considered this. "I'm afraid not," he said.

She said, "What would happen if you went in with me?" Her eyes, which had been so dull, now suddenly were alight.

"What do you mean?"

"I could take you in with me, just as I'd been sent out to get you. I go in and out so much nobody notices."

Horace Locke knew he was going to perform what for him was a desperate act. In his whole life he had never entered an office, a drawing room, or any gathering where by any chance he might be unwelcome. He said, "I will go in with you."

She caught her breath. "I don't suppose the world will come to an end if we do," she said. She smiled.

So together they walked into the Secretary's office. They walked past the receptionist, and the uniformed guard at the double doors, and through the secretarial office inside, and into the Secretary's presence.

The Secretary was alone. His shoulders were bowed over his desk and his glasses had slipped down the bridge of

...ose. His eyes, as always, were ...ed to the pile of red-tabbed papers ...e him. He looked up over his spec..., started to speak to Susan and saw ...ce Locke. The Secretary did not ... disturbed, but he did seem puzzled.

"...ood afternoon, Mr. Secretary," ...ce Locke said. He was at ease again.

"...ell, hello, Locke—Horace," the ...tary said. "Good to see you. How've ...been?"

"...ine, thank you, Mr. Secretary." He ... what would be passing through the ...tary's head. The Secretary would ...inking he must have some appoint... with Locke, and yet he would be ... certain he didn't, and he wouldn't ... to be rude, and so he would wait ...ind out, from the conversation what ...s all about.

...race Locke plunged: "Mr. Secre... I don't have any appointment, but I ...o see you. First I want to apologize ...he intrusion, but after we've talked ...ure you'll agree it was necessary."

...e Secretary took off his glasses and ...hem on the desk. "Well, what is it, ...ce? I assume it must be of surpass...mportance. You know how unusual ...s."

"... is an affair of state, Mr. Secretary." ...words rolled out rounder and big...n this office than if said anywhere ... For them both it had a special ...ing. An affair of state was a mat... the national safety.

"...r. Secretary," Susan asked in a ... voice, "do you want me to come ... later?"

"...o, Mrs. Pickett, I want you to stay ...make notes. All right, Horace, go ...d."

...race Locke brought out Jeff's let... "Mr. Secretary," he said, "I have ...ed two letters safe hand from Buda... They were sent to me out of chan... a third secretary, who because of ...long association with his family ...ed me implicitly. It was the opinion ...is third secretary, in which I concur, ... the matter was of a nature so secret ... the information could not pass ...gh ordinary channels. The letters ...ern this third secretary's liaison with ...ssian officer who claims to be a ...r of a revolutionary group which intends to fight and, if possible, overthrow the present Soviet regime."

Horace Locke paused. But he could see in the Secretary's face that this was fresh intelligence. "Sit down, Horace," the Secretary said, "and let me see those letters."

Horace Locke sat down. He knew now that he had his chance. He decided it would be best to read the letters, because he knew that the Secretary's eyes were always tired from too much reading, and he would grasp it more quickly, and perhaps more completely, if the letters were read. "I think we can save time if I read them," Locke said.

"Yes, do. Go ahead," the Secretary agreed. He turned to Susan. "You'll take all this, please, Mrs. Pickett."

When it was all finished the Secretary said, "I suppose, Horace, that you know I signed a cable last night asking that boy to resign?"

"Yes, Mr. Secretary."

The Secretary tapped a pen on his desk, as if rapping out points in his reasoning. "There is a very weak point in Baker's story. There is no corroboration. There is no corroboration from anywhere in the world. Perhaps Baker himself can furnish that corroboration. We will see. He will have a hearing."

"Thank you, Mr. Secretary," Horace Locke said.

The Secretary rose and held out his hand. "Thank you, Horace. I'll take care of this now. I'm going to check with our people in Vienna. And I'm bringing Baker home."

As Horace Locke left the office he heard the Secretary speak into the interphone: "Have Mr. Matson up here at once."

JEFF slept late Wednesday morning. When he awoke he smoked a cigarette in bed and considered what he must do next. He decided he must present his answer to the cable to Morgan Collingwood. That was correct protocol. Collingwood would take it in to the admiral, and the admiral would snort at it, and then order it transmitted to Washington.

After that it would be Washington's move. His refusal to resign would go to the Balkans desk. Undoubtedly Matson

IRWIN CAPLAN

SPORTING ODDS

While trying to qualify for the National Amateur golf championship, Jerry Dimmick of Dansville, New York, put his second shot 18 feet from the cup on a 430-yard hole, and scored an eight without ever getting off the green. This was the horrible sequence: His first putt slid three feet beyond the cup. The next one "rimmed" and hung on the cup's far side. Reaching over to tap it in, he stabbed at it in such a way that the ball popped back over the cup and hung on the lip again. Simultaneously, the ball touched his toe for a two-stroke penalty. That was seven—and he was down in eight. Dimmick, incidentally, was a one-handicap star at the time.

—Jack M. Tucker

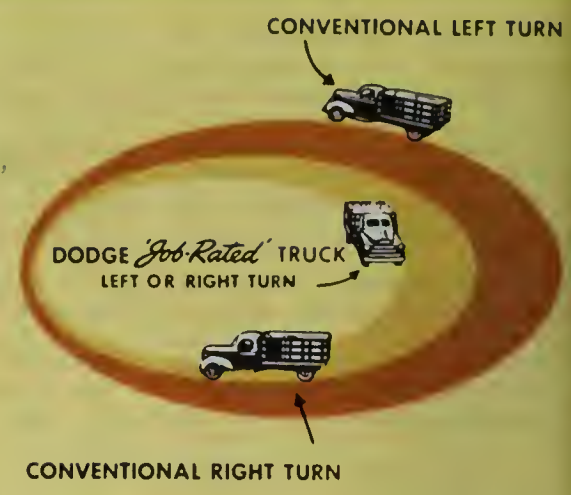
*TRADE MARK REG U. S. PAT. OFF.

Only Dodge gives you all these features



BETTER WEIGHT DISTRIBUTION

By moving the front axle back under the frame, and moving the engine forward, more of the load is carried on the front axle. Thus, Dodge "*Job-Rated*" trucks have *much* better weight distribution, and enable you to haul *more payload*.

MORE COMFORT AND SAFETY

1. Plenty of headroom. **2.** Steering wheel, right in the driver's lap. **3.** Natural back support, adjustable for maximum comfort. **4.** Proper leg support, under the knees where you need it. **5.** Chair-height seats, just like you have at home. **6.** 7-inch seat adjustment, with convenient hand control. **7.** "Air-O-Ride" cushions, adjustable to weight of driver and road conditions.

SHORTER TURNING DIAMETERS

You can turn in much smaller circles, both right and left. This is because Dodge "*Job-Rated*" trucks have a new type of "cross-steering," plus shorter wheelbases and wider tread front axles. You enjoy an entirely new ease of steering and handling.

WITH THE TRUCK THAT'S "Job-Rated" TO FIT YOUR JOB!

A truck that *fits your job* saves money . . . and longer. It's easy to see *why*.

If your truck is too *big*, you waste gas and oil carr around unnecessary weight. If it's too *small*, breakdo run up excessive maintenance costs.

There's no need to drive expensive "misfits." Go to nearest Dodge dealer. Tell him *what* you haul, how r it *weighs*, and where you haul it. He will then re mend a Dodge "*Job-Rated*" truck specifically engine and built . . . to fit *your* job.

Such a truck will have "*Job-Rated*" power . . . the one of seven great *truck* engines. It will have ex the *right* clutch, transmission, rear axle . . . and other unit . . . to haul *your* loads over *your* roads.

In all, there are 248 basic "*Job-Rated*" chassis and models. They are engineered and built for gross ve weights up to 23,000 pounds, and for gross tractor-t weights up to 40,000 pounds. Each is "*Job-Rated* fo maximum economy, and typical Dodge dependabili .

ıld send another cable, ordering him
ıe to face a departmental trial. They
bably wouldn't bother to bring him
ıe by air. They'd furnish the most
ınvenient transportation available—
to Vienna, trains to Genoa, and then
Army transport or freighter to New-
t News. It would take weeks.
He showered and dressed automati-
y while his mind retraced all the argu-
ıts of the day before and reached the
ıe conclusion.

MADAME ANGELL brought his hot water, and he was drinking his k coffee when the phone rang. It was ncy Todd. "So you're finally there," d said. "I tried to get you all last t. What's the matter with your ne?"

I don't know," Jeff said. "I didn't e lights last night either, so I guess es were down somewhere. What'd you t?"

Oh, I just wanted to offer liquid cour- and consolation. Now it may be erent. You just got another cable. little mouse told me."

I'll be right down," Jeff said.

eff folded his reply to the first cable an envelope, and put it in his pocket the cable itself. Then he walked to legation, and went to the message ter. Quincy Todd was waiting there, with him was Marge Collins, from ptography. She looked pleased. ncy said, "I think she's got good news you, Jeff, but she won't tell me."

he had an envelope in her hand. "I'll you this cable," she said, "but first have to give me back the paraphrase got yesterday."

Why?" he asked. "It's mine, isn't it?"

Not any more."

eff brought the sheet of flimsy out of coat pocket and handed it to her, and gave him the envelope.

eff opened it. It was another cable, lressed as before. It read: "DEPART-NT'S 49122692 CLASSIFIED CONFIDEN-L IS TO BE DISREGARDED AND ORIGINAL ALL COPIES AND PARAPHRASES RE-VED FROM FILES AND DESTROYED. BA-R IS TO RETURN TO WASHINGTON ON ST PLANE AVAILABLE AND REPORT IM-DIATELY TO THE SECRETARY OF STATE."

Quincy Todd, who unashamedly had n reading over his shoulder, slammed n on the back and said, "Saved! I ught they'd hang you."

"They may hang me yet," Jeff said. He stn't let his hopes run away with his mmon sense. "That means tomorrow's ne, doesn't it?" he said.

"Yes, tomorrow's plane," Quincy dd said. "You'd better stick around legation, because the admiral will be nting to talk to you."

"You think so?"

Todd smiled. "I certainly do." . . .

The admiral had him at his table at ch. The admiral was affable and pleas- and very nearly apologetic. Jeff felt t the admiral must believe he had werful friends in Washington.

Actually the admiral was congratulat- himself on passing the buck to the partment. Something was going on k in Washington that he didn't under-nd, and it was best that he stay out of Whatever happened, the Navy would pleased that he had not involved him-in a State Department affair. . . .

eff saw Keller that evening. "When u see the Secretary," Fred cautioned n, "simply present the facts as you ow them. Don't be frightened. The cretary's very decent, very humane."

"I met him once before," Jeff said, hen I took my orals. He was swell. I nder if he remembers me?"

"He never forgets anyone," Keller said. "His memory is phenomenal. He sops knowledge, and facts, and he never rgets any of it."

"I think he liked me," Jeff said. "I'm t sure."

Keller thought this over. "I don't be-lieve it's going to matter whether he liked you or not. In a matter of this kind he'll consider only the cold facts. But at least you know you're going to get a square shake. That's the important thing."

That night he went to the Arizona with Keller and Todd, and they watched Rikki Telredy dance. She smiled at them from the stage, but when the show was over she didn't go to their table. She had drinks with some Russian colonels, and chatted at a table occupied by Polish diplomats, and finally left with a Hungarian drama critic. Keller said Rikki was a smart girl—very smart. Keller said to Jeff, "She'll still be here when you come back."

"Do you really think I'll be coming back?" Jeff asked.

"I think you'll be coming back," Keller said. . . .

Thursday morning Quincy Todd helped him pack. When they were finished Todd asked Jeff about the maps

"Dry enough for you?"

that covered an enormous footage of wall. They were beautiful maps. They were Army Air Force aeronautical charts of the Mediterranean and the Adriatic, of the Straits and the Baltic, of inner Europe and the Danube. Jeff said, "I think I'll leave them here for a while."

"I like your confidence," Quincy said.

"Oh, I'm not so confident," Jeff said. "I'm just tired of taking 'em down and putting 'em up."

Jeff left on the evening plane.

WHEN Jeff arrived in Washington he called the Secretary's office from the airport. The girl said, "Oh, Mr. Baker. I've a message for you. The Secretary left instructions he'd see you at eleven. Can you make it?"

Jeff looked at his watch. He had thirty minutes. "I can make it."

He checked his bags and went to the washroom and washed his face and combed his hair. He was glad he'd had the foresight to shave on the plane, but there was nothing he could do about his suit.

He got in a cab and said, "New State," and looked again at his watch.

He reached New State and walked to the elevators, and his elevator was crowded and stopped at every floor. Everyone in the elevator looked so neat and freshly cleaned.

He got off at the fifth floor and gave his name to the receptionist, and he could tell he was expected, for she said, "Just a moment, Mr. Baker." She lifted her phone and said, "Mr. Baker is here," and another girl came out and said, "The Secretary will see you now, Mr. Baker." It was happening too fast.

He followed the girl through the secretarial office, and there were four other girls sitting there typing, and one of them was Susan. Her back was turned toward him and he wanted to yell at her.

The Secretary got up when he came in and extended his hand, and said, "I'm glad to see you again, Baker," and he sounded as if he really were glad to see him. "Just sit down," the Secretary said. He told the girl, "No calls."

The girl left, and he was alone with the Secretary.

There was a cable file at the edge of the desk, and now the Secretary drew it to him. "Good trip?" he asked.

"Yes, sir," Jeff said. "I slept all the way across."

"I never seem to have time to sleep on a plane," the Secretary said. "Every trip I make I tell myself I'm going to take a rest, and sleep all the way, but it never turns out like that."

The Secretary glanced at the top papers in the file. "Now, Baker," he said. "To save time I'll tell you what I've done, and then when I'm finished you can add anything you want.

"In the first place I've talked to Matson and Quigley and Locke, and they've told me all they know of this matter. I want to apologize to you for one thing, Baker. I wouldn't have initialed the cable requesting your resignation had I known at the time what I know now. I'm not blaming Mr. Matson for this. It is nobody's fault but my own. However, that doesn't mean that I may not request your resignation at the end of this interview."

"I see, sir," Jeff said.

"After learning all I could in Washington I cabled our embassy in Moscow, our occupation headquarters in Vienna, and the British in Klagenfurt. I requested any information that would corroborate your story." The Secretary took three priority cable forms from the file.

"Briefly," the Secretary went on, "Moscow has never heard of any organized revolutionary movement in the Red Army or the Soviet diplomatic corps. Neither has Vienna. I am taking into account the probability that they might be the last to hear. But the important reply came from the British zone in Austria. They are certain that nobody answering the description of Leonides Lasenko has crossed into their zone. They know nothing of any underground transmitters operating in the Hochschwab."

"Oh, that's too bad," Jeff said. He wasn't thinking of himself. He was thinking of Leonides.

"I do have one small fact to back your story," the Secretary said. "It is a fact that the Russian naval attaché, Yassovsky, was recalled to Moscow and has since disappeared. But that happens to a lot of Russians. So you can understand, Baker, the position I am in. If your story about Major Lasenko and his underground was provable, then I would naturally believe your story about the penetration of Atlantis Project."

"I understand, sir," Jeff said.

The Secretary lifted his head so that Jeff could see how grave and serious were the eyes behind the spectacles. He said, "I hope your story is true, Baker."

"It is, sir."

"Can you show me any proof—any small proof?"

Jeff shook his head. "This proof doesn't exist, sir. I can only give you my word and my judgment."

"And your judgment is immature."

"I don't think it's so immature," Jeff said. "I think men my age grow up awfully fast."

The Secretary leaned back in his chair, and examined this statement. "In most cases that's true," he said. "But I'm not sure in your case. You see, Baker, your reaction to that explosion indicates that you might be a psycho. Now understand that I am sympathetic with men who suffered battle fatigue, but I must take this into account."

"I know it, Mr. Secretary," Jeff said.

JEFF knew that the cards had fallen against him. He had not been fully prepared for the worst, the worst was happening, and yet he found he could maintain his nerve, his calm, and his courage. He said, "Mr. Secretary, I suppose you will want my resignation."

"I think that would be best for us," the Secretary said.

"But before I give you my resignation, Mr. Secretary, there is something I must submit. Please, Mr. Secretary, do not allow the Atlantis Project to continue. Because if you do, Mr. Secretary, it will cost lives. Some of our friends in Budapest will surely die."

The Secretary rose. "I'm going to accept your suggestion," he said, "but I'm also going to accept your resignation. Good luck, Baker."

"Goodby, Mr. Secretary."

As he walked out of the Secretary's office he was aware that the traffic of the State Department had congested in the outer offices while he had been inside. He realized that this matter which for him meant his whole life and his whole world was only twenty minutes out of one day for the Secretary of State.

In the outer office Susan was still at her desk, and now she was watching for him. He tried to smile at her, and she tried to smile back. She said, across the room, "I'm off at five."

He said, "I'll see you at five."

He didn't think that anybody noticed. He hoped not. He didn't want to embarrass her. He realized that henceforth his association with her would embarrass her in the department.

He went back to the airport and got his bags and dumped them in Stud Beecham's apartment. He could tell by the neatness that Stud was off somewhere on a field trip, and the maid had finally caught up with the disorder. He was glad Stud was away.

He bathed, and sent out a suit to be pressed, and made a peanut-butter and jelly sandwich and washed it down with milk, and then he sat down at Stud's desk and wrote his resignation.

"To the Secretary of State
"Sir:

"Pursuant to our conversation of even date I have the honor to inform you that I am resigning from the Foreign Service of the United States."

Once again he signed his full name, Jefferson Wilson Baker. . . .

He was waiting at the Virginia Avenue entrance of New State when she came out. She came directly to him, her steps never hesitating, and she put her arms around his neck and they kissed right there at the corner of Twenty-first Street and Virginia Avenue Northwest.

That night he took her down to the

water front for lobster. He took her to Hall's. She had suggested that they eat at her apartment, but he didn't want to do that.

There was an hour spent in explanation of what he had done, and what she had done. And then there was the critical moment when she asked:

"Jeff, what about us? Where do we go from here?"

"Let's go to the Footlight Club," he evaded.

"You know that's not what I mean."

"I know."

"What happens to us, Jeff—you and me?"

He knew what he had to say, because it was the only thing to say. "I'm afraid this is our last time together."

"Jeff!"

"That's the way it's got to be, Susan. If we were married you'd have to quit your job. That isn't possible. It isn't possible because neither of us has any money, and it isn't possible because you like your job and I haven't any right to pull you out of your job."

She leaned across the table and took his hand in both her hands, and held it tight. "That's not necessary, Jeff. You're not thinking straight."

"Yes I am thinking straight."

"No, you're not. You're not in the department now. I can marry you. And I want to marry you, Jeff."

He tried to pull his hand away but she clung to him. "It wouldn't work that way, Susan. You marry me and you know what'd happen?"

"No."

"You'd find yourself transferred to being stenographer on the Costa Rica desk. You wouldn't take the nine-o'clock conference any more. They don't want women in sensitive jobs whose husbands leave the department with a mark on them."

"You haven't any mark, Jeff."

"Yes I have. Nobody will say so, and nobody will speak of it, but I have."

The grip on his hand relaxed, and he drew it away. "My darling," she said, "my Jeff. I don't care if I have to work on the Costa Rica desk, or even if they put me in the Hemp and Flax Policy Board."

He shook his head. "You think you wouldn't care, but you would. Just as I am going to care. There will be no moment when I will not wish I were back in the department. I'll get a job all right, and I'll make enough money, and outwardly there won't be any blemish on me. But inside I'll never feel right."

She saw she was defeated. She lowered her head so he could not see the defeat in her eyes. "Pay the check," she said quietly, "and take me home."

ONE night late in January, 1950, at eleven o'clock Central European time, and five in the afternoon Eastern standard time, a new short-wave radio station went on the air in Europe. It called itself RFR—Radio Free Russia—and it pirated a wave length in the 11-megacycle band, right next to Radio Moscow.

Madame Angell was among the first to hear it in Budapest.

She didn't remember when she had been so excited, and yet there was no one to tell except Sandor, the building superintendent and elevator operator, who naturally wouldn't believe her. She put on her tattered and stained wrapper and rushed out into the hallway.

The room that had been occupied by Mr. Baker was still vacant. Mr. Todd had paid the rent for January, as if he expected Mr. Baker to come back. She entered this vacant room. She hadn't made a thorough inspection of the room since Mr. Baker left.

It was peculiar that he hadn't bothered to take down his maps. She examined the maps carefully, and she recognized that they were very good maps. How wonderful it would be if she herself had those maps! She looked in the bureau drawers. There was half a chocolate bar under a newspaper. She took a bite, and put the remaining fragment in the pocket of her wrapper. She had a premonition that Mr. Baker was coming back.

She scurried out of the room and back into her own apartment, and listened again to this fascinating new station that was Russian and yet was not Russian.

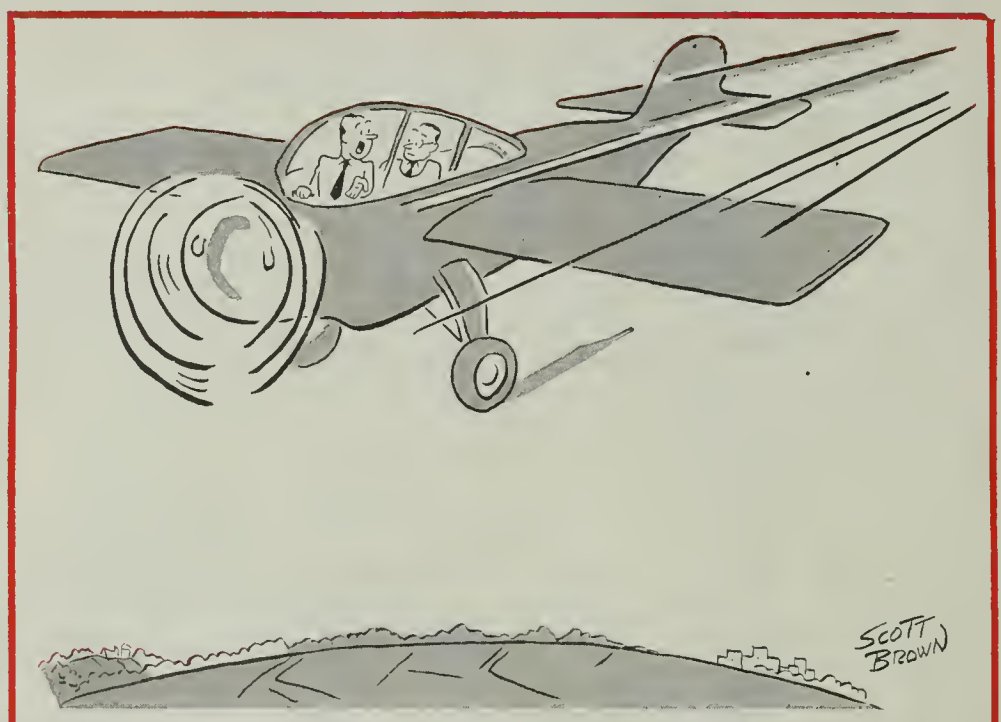
IN THE American legation on the Szabadszag-tér a bilingual monitor was taking it off the air. He soon knew it was important enough to be recorded, and switched on the recording machine.

In Klagenfurt the monitors of the British Political Warfare Executive were listening. The signal of RFR was very strong in Klagenfurt, and the chief monitor ordered that other stations in the British zone of Austria tune it in, and obtain a triangulation, for he suspected that the transmitter was very close.

It was heard in London. A complete text was recorded, quickly transcribed and sent to Whitehall, with a copy to Washington.

It was even heard in Washington. Out on the Maryland capes the monitors of Central Intelligence Agency, dialing for Radio Moscow, had picked up this RFR instead, and they recorded it, and prepared to send a special bulletin to the War, Navy, Air and State departments.

Radio Moscow was the first to react to the new transmitter. At two in the morning, in a Hindu broadcast to India, Moscow said: "The desperate Anglo-American political warfare offensive has just tried an infamous trick. Using a British station in the British zone of Austria they now pretend to be the mouthpiece of a Russian counterrevolutionary movement."



Admiral Blankenhorn heard of it at breakfast. When his Filipino mess boy brought breakfast to the admiral's bedroom he also brought a summary of the night's news and the monitoring report.

On this day there was a special box drawn on top of the monitoring report, headed "BULLETIN." It read:

"A new short-wave station with a very strong signal came on the air last night with news and propaganda especially directed to Russian troops in the occupied areas. Its call letters are RFR—for Radio Free Russia. It also calls itself 'the station of the Second Russian Revolution.' This new station claims to represent a group of Soviet military men and government people. It says that an underground battle against the present regime has been going on.

"A portion of the broadcast was devoted to a memorial to those men, who, this station claims, have already died for the Second Russian Revolution. It mentioned twenty or more names, but of special interest to this post were the names of Yassovsky, former naval attaché, and a Major Leonides Lasenko, who had been stationed in Budapest. According to the broadcast Yassovsky was murdered after torture at a Black Sea naval base, and Lasenko was shot to death while trying to cross the border into the British zone of Austria. Also named as a hero was an unidentified gypsy girl who supposedly gave her life trying to lead Lasenko to safety. The broadcast listed many famous Russian leaders now confined in concentration camps . . ."

The admiral thought it over very carefully and he drafted a cable to the Secretary of State:

COLLIER'S "This little job of mine doesn't go faster than sound, it just sounds faster than it goes" SCOTT BROWN

"I have always had greatest confidence in Jefferson W. Baker and for this reason felt that his story, improbable as it may have seemed at the time, be brought to your personal attention.

"In view of today's developments I feel that Budapest is the logical place in which to initiate liaison with the Russian group fighting against the present Soviet regime. I also feel that Baker, working under Keller's direction, would be the logical man to undertake such liaison."

JEFF BAKER read the news in The Post. He had gone around the corner to the little breakfast shop on Connecticut Avenue, and he'd bought a Post on the way so he could go through the help-wanted ads.

He sat down on a stool in the breakfast shop and ordered pineapple juice and a ham and egg sandwich, but first black coffee. He would drink this first coffee, and then he'd read and eat, and then he'd have another coffee, as was his custom. He opened The Post and looked at the front-page headlines.

FREE RUSSIA RADIO
TAKES AIR; PLEDGES
ANTI-STALIN ACTION

He glanced at it twice before he realized what it was. Then he raced through the story and came to the paragraph about Leonides being killed, and he couldn't eat any more.

The waitress said, "Whatsa matter, bad egg?"

He said, "Oh, no. The egg's all right." He wanted to get out of there. He wanted to be by himself. He left a dollar on the counter, which was more than his usual payment and tip, and left. He went back to the apartment on Riggs Court. He full length on the bed, face down with feet hanging over the end and cried.

Jeff's mind distorted the first im of the news, the way minds will w emotion elbows out cold logic. His thought was that with Leonides dead never be able to prove what he had t Then he began to understand that broadcast itself was proof.

He had a tendency to feel elated. had a bloated "I told you so" feeling. tried to fight down this feeling, but he he must talk to someone. Stud had left for the office. It was not yet o'clock, so Susan would still be in conference. He hadn't seen Susan. he wanted to see her.

There was Horace Locke. He di the State Department, and asked Locke's extension, and Locke answ He said, "Hello, this is Jeff Baker. Locke, did you see the story about Russian broadcast—I mean about l like I told you?"

"I saw it." Horace Locke said cal

"Well, what do you think about

"I think this is an excellent time you to contain yourself. You were r But it is not enough that you be r You must accept your rightness g fully and diplomatically."

"Yes, sir," Jeff said. He thoug over, and he understood what He Locke meant. . . .

THE Secretary of State learned o Free Russia station, and of Mosc reaction, at the nine-o'clock confer Usually the Secretary plucked his morning news out of Art Godf broadcast. But on this morning he slept and missed Godfrey.

The news was on the top of the retary's nine-o'clock conference file. ally the monitoring reports were o bottom, for they were considered o importance than the spot news, an cables from London, Berlin, Rome, and Moscow. But on this day the who arranged his file—Mrs. Pickett- somehow managed the file so tha monitoring reports met his eye first.

The Secretary looked at this thing digested it. All its potentialities we stantly clear to him. He knew that some of his advisers had said coul happen had happened nevertheless sought a parallel in history, and fou easily. People had said the Jap would never surrender, that the nese were monolithic and would fanatically to the last man. But Z rias and Mashbir had contended wise. They'd said the Japanese human beings, and being human, h love of death. The Russians too wer man.

The Secretary's thought changed politics to people. He said, "W Jeff Baker?"

Everybody was silent. Nobody

"What happened to Baker?" the S tary demanded.

Nobody said anything except th who took the nine-o'clock confe and all she said was, "I know whe is, Mr. Secretary."

"I'd like to see him," the Secr said

"I think I'll be able to find him," Pickett said.

The Secretary said, "Thanks, Pickett." His eyes were bothering again. He frowned and took o glasses and laid them across his "When you locate him, Mrs. Picke like to see him."

"At what time, sir?"

"At Mr. Baker's convenience."

Susan realized then that the Secr who often awed and sometimes f ened her, was a humble man.

She called Jeff and told him wh Secretary had said. Jeff said he was ing right over.

He caught a cab to New State. he walked through the doors he had

was almost a feeling of exaltation. This building belonged to him. He was part of it. It was, in a sense, his home.

Susan was waiting in the anteroom. She looked awfully young and crisp and gay against the background of worried and tense people who ferried the world's troubles through this room. Alone of all those in the anteroom it seemed that only she and Jeff smiled. They stood apart from the others and she took his arm and whispered, "He gave orders that he'd see you as soon as you came in."

He saw the receptionist eying him expectantly. "Wait for me, Susan," he whispered. He walked to the receptionist's desk. "I'm Mr. Baker," he said.

She lifted the phone and spoke into it, and said, "Yes, Mr. Baker, you're to go right in."

JEFF once again walked into the office of the Secretary of State. The Secretary rose, as before, and held out his hand, but the greeting was different from the last time and the Secretary himself seemed different. His shoulders did not appear so stooped. The Secretary said, "You heard the news, of course?"

"Yes, sir."

"Baker, in the first place, I want to apologize."

"An apology isn't necessary, sir. It was perfectly understandable."

The Secretary smiled and shook his head. "When you make a mistake in my job," he said, "it's always a beaut. It is impossible for the Secretary of State to make a small error, because of the very magnitude of the material that crosses his desk. It has to be a big one—and in this case a very unfair one. So all I can do is apologize, and request you to rejoin the department."

"Of course, sir, I want to."

"It was too bad about Lasenko," the Secretary said, watching Jeff's face.

"He was a good man," Jeff said.

"There must be hundreds—perhaps thousands of Lasenkos," the Secretary said. "Russians who are good men, decent and honorable and intelligent men who like ourselves want peace."

"I think there must be, sir."

"That's a big job for you, Baker."

"That's to be my job?" Jeff said.

"That's it. You're going back to Budapest, Baker."

"How soon, sir?" Jeff asked.

"Right away. In a few days if you're equipped."

Jeff thought it over. "Mr. Secretary," he said, "of course I'll go, but it certainly is going to complicate things."

The Secretary tapped his fingers on the desk. The longer he was Secretary of State the more he was aware of the personal element that influenced his department. Only a few days before, he had been informed by Quigley, of Security, that an indiscretion on the part of Matson, and his immediate family, had compromised the Atlantis Project would have to relieve Matson.

Now a personal element entered new development. It would be a gi course. It would be that fine young Pickett. "I suppose you've got here," the Secretary said.

"Yes, sir. I want to marry he And if I go back to Budapest we c

"She's in the department?"

"Yes, sir."

The Secretary nodded. He had right. "You know the regulations a man and wife working in the d ment," he said. "You know we make exceptions, Baker."

"I know it, sir."

"You're a Class Five, aren't you? new job you're going to take s carry a Class Four rating. Tha much as I can give you, at your age

"That's nice of you, sir."

"But a Class Four doesn't enough salary to support a wife—n these days. There are good reason we don't want our young men to r Baker, believe it or not. We don't them harassed by money troubles want their minds free for their You've plenty of time to marry, girl will wait."

Jeff considered this. "I'd like t to her about it," he said.

"You'll let her decide?"

"Yes, I'll let her decide."

"That's agreeable to me," said th retary. He had great confidence i Pickett, the girl of the nine-o'cloc ference.

IT WAS a week before Jeff flew to Budapest. It was as before, that Horace Locke was at Nation port, along with Susan. Locke did much. He contrived to make hims conspicuous, and when they kis was looking the other way.

The loud-speaker called the Sh Prague, Vienna, Budapest fligh they walked to the gate together, had before, and he held her in his and she said, "It won't seem lik a long time, now, Jeff, because we what's going to happen at the end

"Two and a half years," he said

"Maybe there'll be a break. you'll be called back to report in or so. Then we'd have another w two together."

"Yes, maybe."

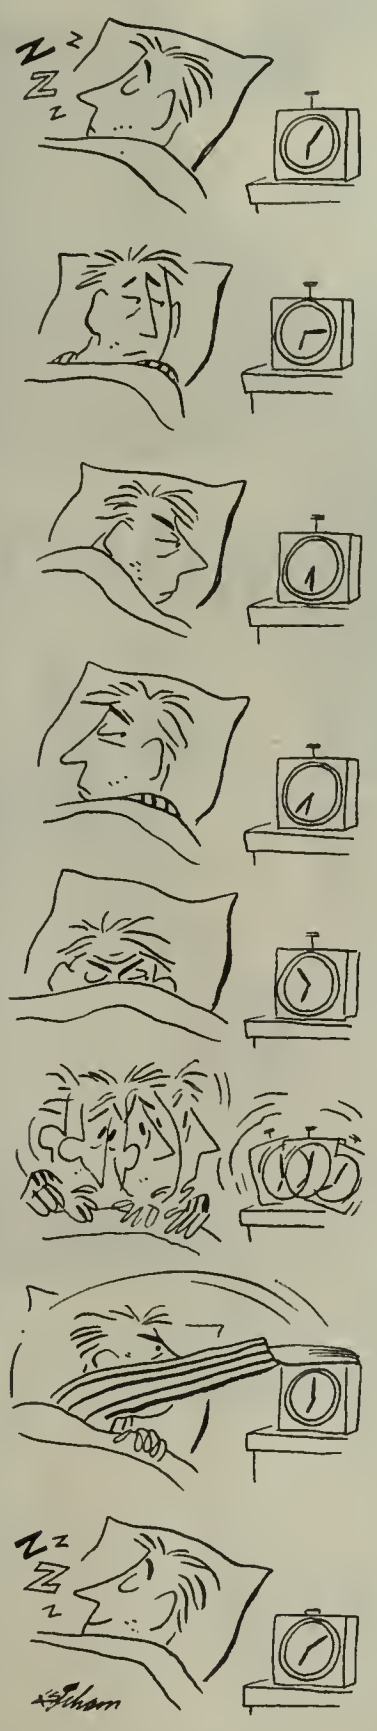
"And when you come back yo Class Three, certainly. Maybe Two. Your next trip out, that'll honeymoon."

"I wonder where we'll be going

"I wonder?" she said. "Mayb wonderful place. Maybe Rio, Rome."

"Maybe some awful place like gascar," he said, but neither of th lieved that.

THE END



COLLIER'S "I wouldn't take this lying down if I could get up"

How to Wake Up Quietly

BY GURNEY WILLIAMS

CCORDING to figures handed to me yesterday afternoon by my research staff, there are more clocks per capita in the United than there is sleep. This disclosure me awake all last night, and this ng I hit upon a plan that will enable e to get more and at the same will double the of alarm clocks. proposal is revo- ary and if you sounds fantas- ou couldn't be correct.

idea is simply n addition to the ntional alarm we need one to s when to go to s things are now, one-way propo- a problem of ing an alarm in the morning

eedn't point out arious methods ploy to wake up, long as you've with me this far, ht as well. You e gently aroused melodious chime or you can be l from the arms urphy by a clang- ell or raucous r. You can even gadget that turns bedside radio at rechosen time so an be awakened heery announcer ly with a re- that Russia has ed a bomb on ensack.

e only man I who owned one ese radio gim- used it just once. a plastic-button nan named Fret- er (it's a name e not apt to re- er and he'd just barrassed if you His favorite early ing program was r Godfrey, and rst morning this came on at 6:30 retlammer's bed- , Arthur Godfrey elected (as he times does) to some extra sleep. akened by God- substitute, Fret- ner listened for a ent, thought it n all-night disk jockey and snuggled into the sack. He woke up again 47, having missed an appointment the button buyer for a shirt manu- rer. This cost him an order for ,000 buttons and a commission would have reduced his mortgage derably.

turally, it's none of my business her you prefer to begin the day a bell, buzzer, dance band, shaving-cream commercial or an unmechanical and nonelectronic kick in the slats. Personally, for reasons known only to the person who gave me the clock, I depend on a loud buzzing job to start me on my way five days a week at 7 A.M. Sometimes, instead of jumping out of bed I just jump. Things have reached the stage where I dread the slight click that presages the bedlam. Long ago I began to anticipate the uproar and I often wake up at 6:15 and periodically watch the progress of the minute hand, meanwhile catching cat naps.

Cartoonist Hank Ketcham has depicted this vividly in his illustration and I get the willies every time I look at the pictures. Frequently I manage to shut off the alarm a split second before it goes to work. At other times I'm not so fortunate. This includes members of my household and the old lady across the road who has complained to the police on three separate occasions.

But back to my plan. We don't need more or different noises to wake us up; we need them to get us to sleep earlier. If you're the type who likes to hit the hay at 9:30 or 10:00 (and can thus be aroused by a minimum of din nine hours later) you require a firm reminder to lock up and call it a day. So I suggest to clockmakers a decorative living-room number equipped with an 85-decibel fire bell that would ring automatically for five full minutes and would have no lever whatever by which it could be shut off. If this would not break up a bridge game, ruin radio and television shows and also discourage Mabel and Sam Creebler from hanging around any longer, then my name is Fretlammer.

The whole thing comes down to the matter of getting people used to going to bed as regularly as they get up. The clock itself would of course be called the Beddy-by and would be attractively boxed for quick sale.

One more thing: I wish you people would stop roaring into my driveway at all hours on the assumption we're still up just because we forgot to turn off the cellar light. Do you think we like to play gin rummy in the furnace room at midnight or what? ★★★

What are you angling for?

Some men think anything smaller than a marlin isn't worth going after. Others fish for rainbow trout—and some don't fish at all!

Preferences in *whiskey*, like preferences in fishing, are largely colored by personal tastes. No whiskey seems "best" to *everybody*. That's why, in urging you to try Hunter's delicately *different* flavor, we don't predict it will necessarily become *your* favorite.

But by all means *try* Hunter! For thousands of men who have tried Hunter once, have liked it instantly—and today prefer it to all others.

tie got up out of the chair. "And tand there and make snide remarks Harold! Well, I'm going to have with him tomorrow. I'm going to m as much as I please."

was boiling. She was shooting s. Her hands trembled and her eyes l at me. "I wouldn't stay in your partment if you begged me!" she "Just sit here with your nasty ed little old bugs! Why don't you y a molecule?"

ade one last try. "Molecules aren't " I said. "The molecule is—"

opped. Katie had picked up a ciga- box from the telephone table. She g her arm back and heaved. It was d throw: the box hit the wall two to my left.

ou stick!" Katie cried. "You lump! —oh, you *chemist!*"

e turned and ran out of the apart- , and slammed the door. After a minutes the elevator boy, the door- and a taxi driver came in. They red up Katie's luggage and took it . When they'd gone I went over egan picking up cigarettes.

was just like old times.

idn't get any work done that night. at the desk. I sat on the couch. I d at a magazine. I listened to the . No good. I thought about going d but I knew it was no use. I dn't be able to sleep. All I could do hink about Katie.

tie was lovely. Katie was a fine when she wasn't throwing her tem- ment around. Katie, according to ritics, was a great dramatic actress. trouble was, she didn't have good . She needed somebody to keep her e. She was on the rebound from , and anything could happen.

course, it was none of my business, enner was all wrong for her. Katie to act sophisticated; she thought was a woman of the world. I knew r. Under the surface she was just a nice kid. If she tangled with a guy like Sweetie Pie Venner, she'd get hurt.

Well, I'd warned her. What else could I do? I wasn't her big brother. I wasn't even her husband any more. I was just a chemist, a guy she used to know.

I lighted a cigarette and decided it was her own funeral. I lighted another and decided to go to bed and forget it.

I lighted the third one. I decided to look into this Venner business, find out what was going on and maybe take a poke at Sweetie Pie's nose. After that I got a beer out of the refrigerator, drank it and went to bed. I slept fine. . . .

The next morning I found out from the doorman where Katie'd gone. I did

"It's a wooden token—when you get ten of them, he gives you a dime"

a few errands, bought a green necktie with yellow spirals in it and cashed a check. By noon I was sitting in a cab, parked where I could see the entrance of her hotel.

After a while Katie came out. The doorman put her into a cab and I touched my driver's shoulder.

"That's it," I said. "Follow that one."

The driver said, "Okay, Mac." We started. The driver looked at me in his mirror. "Sharp-looking babe, Mac. She your wife?"

"She used to be." I was watching the other cab. "Don't lose him."

"Relax, Mac. I won't lose him. They're going to the Colony."

"How do you know?"

He shrugged. "I got a intuition. Three'll get you five."

"I'll take that," I said.

At the Colony I gave him his three dollars.

"How's to wait around?" I said. "I can use you all afternoon."

"You're wasting your money, Mac. That babe's all right."

I looked at him. He was a skinny little Joe with a sharp nose. "Never mind your intuitions. All I want you for is to drive the cab."

He shrugged again. "It's your money. I was just doing you a kindness."

By six o'clock I was ready to agree with him. At the Colony she met Sweetie Pie and they had lunch. Then a trip to Radio City, a visit to the Bronx Zoo, stopoffs for a drink here and a drink there. All strictly on the up and up. They talked, they laughed, they ate popcorn, and that was all.

"You see, Mac?" the driver said. We'd pulled up around the corner from the hotel and I paid off. I paid plenty. The driver shook his head. "You wasted your money," he said.

"Oh, shut up."

"That little lady is a little lady, Mac."

I didn't say anything.

"But any time you want to do this again, ask your doorman for Moe."

I said, "Okay, Mac," and walked away.

It didn't add up right. Something smelled. It wasn't the kind of an afternoon a guy like Venner would think up. Of course I didn't know what they'd talked about; I hadn't been able to get close enough to hear. Maybe it wasn't as innocent as it looked. I got the number of Katie's room, went up and knocked.

"Come in."

She'd taken off her hat and was fluffing up her hair. She swung around from the mirror and stared at me. "Well," she said. There was something in her voice. "I hope you enjoyed your afternoon."

I said, "Uh."

She was still staring at me, "I never saw such a ridiculous exhibition in all my life. Next time, why don't you hire a real detective?"

I blinked. I stared back at her. "You mean you saw me?"

She used the nasty laugh I'd heard her practicing last spring for Women In The House. "Saw you?" she said. "It was all I could do to keep you from falling into my soup. I only hope Harold didn't notice."

I had my balance back by that time. "He didn't," I said. "He was too busy looking into your beautiful eyes."

She laughed again. This was the one verging on hysteria, from The Dark Is Ours. "Really, Sam! It's a little late for the jealous-husband act, isn't it?"

"Jealous?" I had a laugh, too. A scornful one. "I'm just trying to keep you out of trouble. I don't want you to do anything silly." I explained: "I feel sort of responsible for you—"

She looked at me. Her lips came together in a straight line. There were pink spots in her cheeks and sparks in her eyes. The drafts were wide open again. "Responsible! You!" Her hands clenched and opened and clenched. Sweetie Pie would have said she was magnificent. Me, I looked to see what she could reach when she got to that stage.

It was going to be another cigarette box. I hoped this one was empty.

"Well," I said, "somebody's got to look after you."

Her eyes blazed. "Thank you very much," she said. "You're so thoughtful. So kind. I don't know how I managed, before I met you. I'll tell you one thing, Sam Blaine. You needn't put yourself out any more. I'll make other arrangements."

She took a quick step toward the table where the cigarette box was, and I got set to dodge in case her aim was getting better. But it wasn't the box. Instead, she picked up the phone. She dialed fast, and waited. Then she said:

"Mr. Venner, please— Hello, Harold? Darling, this is Katie. About tomorrow —I've changed my mind. Where do you want me to meet you?"

THAT was a rugged night. I went to dinner at a little joint where I always ate when Katie was out of town. Then I went to a movie. I sat through it twice, but that's all I know about it. And then I went home and to bed. I lay on my back. I lay on the left side, and on the right side and on my belly.

I've changed my mind, she'd said. Where do you want me to meet you?

And called him darling!

It was four o'clock by the time I got to sleep, and when I woke up it was noon. I wondered where Katie was. I wondered what she was doing. Well, she was over twenty-one, wasn't she? I put on my new necktie, went out to breakfast, came back and looked at the phone.

Maybe she'd called while I was out. Maybe she'd been in an accident. She'd been good and mad, and when Katie was mad anything could happen. I looked at the phone. She wasn't my wife any more. She had a right to run her own life. Sweetie Pie or not, it wasn't my affair. I looked at the phone.

At three o'clock I started looking at the Vs in the directory. I found his number and dialed. A man's voice answered.

I said, "Is Mr. Venner in?"

"No, sir, I'm sorry. Who shall I say called?"

I thought quick. "I'm his lawyer," I said. "I have to get in touch with him right away. It's urgent. One of his wives—" I let it fade off.

The butler, or whoever, giggled. "He said something about meeting a young lady. You could probably find him on his cruiser—the Lorelei, you know." He giggled again. "That's where he usually takes them."

I held onto the phone hard. My voice came out sounding like somebody else. Somebody who spent his time sitting on a lily pad. "Tell me," I said. "Where does he keep this Lorelei?" . . .

The air was fresh and warm. The water was blue, with white boats scattered around on it. I looked at the harbor,

Rutland Roof Coating makes old roofs good as new for years to come—at small cost.

For over 20 years Rutland "No-Tar-In" Roof Coating has been saving property owners many dollars on roofing costs. Rutland gives long service, because it has a high content of genuine asphalt and asbestos. This forms a heavy, tough film that seals every pin hole—doesn't crawl, crack or peel.

Rutland Roof Coating is easily applied with a stiff brush. Ideal for all roofs except shingles. Costs only about 2½¢ a square foot.

For badly worn spots, around chimneys, flashings, etc., first apply Rutland No. 4 Roof Cement. This is a heavy mixture of asphalt and asbestos that can be pushed into small crevices or applied as thick coat with knife or trowel.

and the ride out in the cab hadn't done me a bit of good: I was still mad.

At Sweetie Pie, just because he was Sweetie Pie. At Katie, for being such a dope. But mostly at myself. It was my fault. If I hadn't got her sore yesterday this wouldn't have happened. If I'd just let it alone, it would have died out by itself. But no. I had to be a detective.

I got out of the cab and told Moe to wait. He didn't look happy.

"I don't get it, Mac. Other dames, okay. But not that one. I bet you got a wrong tip."

"Three'll get you five," I said.

He shook his head. "I don't gamble on dames, Mac. I'd've swore this one was a lady, but I guess even ladies is just dames at heart."

I WENT down to the dock. There was a shiny little speedboat tied up; a character with a wrinkled leather puss and an Adam's apple was sitting in it.

"I've got to get out to the Lorelei," I said. "Can you take me?"

He looked up and grinned. "Sure," he said. "That's what I'm here for. Hop in, Reverend."

He was a character, all right. Plain Mac wasn't good enough for him.

I said, "Never mind the dialogue. Just get me out to the Lorelei, and do it damned fast."

He blinked twice, swallowed once, said, "Yes, *sir!*" and gunned the motor.

I stayed mad all the way out to the Lorelei. She was a slick white cabin cruiser. We came alongside and I stood up. Venner leaned over the side with his hand out and a big grin on his face. He kind of blinked at my necktie.

"Come aboard," he said, like he was glad to see me. "You're just in time."

I didn't say anything. I didn't take his hand. I climbed up onto the deck and all I had time for was one glimpse of Katie with her eyes wide and her mouth open. Then I hit him.

I heard the splash, but I didn't wait to see it. I turned to Katie, still mad.

"Sam!" she cried. She had a funny look in her eyes, but I was in no mood for soft answers.

"Shut up," I said. "You can talk anytime. Right now, you're going back to town. Where you belong."

I put her into the speedboat. The character at the wheel gave me a funny look but he didn't say anything. He spun the wheel and opened the throttle.

I remembered Sweetie Pie, making like a fish. I said, "Wait a minute. Maybe we ought to pull him out. I don't want the guy to drown."

The character turned his head. "Nah," he said. "That's Charley's work. Venner pays him extra for it. Two more times, and Charley can buy his own boat he's been wanting." . . .

Katie kept still all the way back. What she was thinking I didn't know. I stared at the back of Moe's neck until we stopped in front of the hotel. Katie waited, still without talking, while I paid the fare. Moe looked at me. It was another funny look. Maybe that necktie was stronger than I'd thought.

"Mac," he said, "maybe you know what you're doing. But I got a intuition that the little lady is mad."

He was wasting his time in a cab. He should have been playing the horses for a living.

Katie and I went up in the elevator, without talking. She opened the door and we went in. Katie took off her hat. She looked at me. She still had the look.

I stared back at her. "You see what happens to little girls? Didn't anybody ever warn you about strange men?"

I was feeling pretty good. I'd saved Katie. It would be a long time before Sweetie Pie made another pass at her.

I grinned at her. "It's a good thing I checked up. Don't you even recognize a pass when somebody makes one?"

"Pass," she said. "Pass?" She sort of choked on it. She said, "You mean thought—" She choked again. She w acting. "You idiot!" she cried. "He going to marry me!"

"Huh?"

"We were waiting for the min Harold said he'd been married in a p on a train and on the Queen Mary never on his own boat. He wanted time to be different."

I chewed on it for a while. The acter on the speedboat, calling me erend. Sweetie Pie, with a big sm welcome. Waiting for the minister at once I started to laugh. I cou help it. Katie stood there blazing

"I suppose you think it's funn break up a wedding! To spoil my

I said, "Oh, cut it out, Katie. Ma did make a mistake. But you're we of it. You saved a trip to Reno."

She stamped a foot on the floo seen her throw temperament befor this one was special. "You don't about me at all! You and your cules! Can't you ever mind your business?"

I began to tighten up inside. spoiled my whole week end. I done a lick of work, I'd been chasi over hell in a taxicab—and now sh bawling me out. I got a little bit m

"Next time," I said, "I'll let you the guy. It would serve him right. you, too."

She looked at me with her open. Then she cried, "Don't yo at me! You're not my husband!"

That much I'd read in the newsp I got a little madder. I said, "I'l and you'll listen. I've put up with little tricks for a long time, an tired of it. Temperament—phooey you've got is a bad temper."

She opened her mouth and clo again. She said, "You!" She s again. She sputtered like the Fou July. Then she stopped. Her eyes here, there, and stopped on the ci box. She took a step toward it.

I was damned if I'd pick up all cigarettes. I moved fast and got first. I put my hand on her wris tried to pull away from me. Sh to kick my shins. And then—

SO HELP me, I don't know how pened. I didn't know I was go do it. My arm seemed to work al self. It was just reflex. I let her h right in the eye. She wobbled a and I caught her and held her.

"Katie," I said. " Kate, honey.

Her eyes were wide and blue, kind of light shining in them. She up into my face. "Sam," she mur "You never hit me before. You even got mad when I threw thi thought you just didn't care."

I couldn't think of anything to

"Sam," she said, "why didn't it a year ago? I'd never have di you—"

She cried, "Oh, darling, I h-happy! You *do* love me, after

She had real tears on her face, a was going to have a real mouse eye, but I'd never seen her more ful. She was magnificent.

I kissed her a couple of ti patted her hair. I waited for her crying. Then I said, "Well, it eight o'clock, and I've got work But I'll have a beer with you firs room service, will you?"

She stared at me for a minute. dered if we were going to have to it again. Then, finally, she smiled darling," she said.

I listened to her ordering be sandwiches, and I went over to t ror. I needed somebody to win had work to do, all right, but i have much to do with chemistry. a little job of selling. Object, mony.

I didn't think it would be hard

a peacetime sense, balance includes redness, which is a method of buy- ime. Preparedness has both politi- d military pockets. The Marshall s an example of political buying of For it is in Europe, where she has enefit of modern Western Logistics ies, that Russia might any day le upon a *partial*, or interim war; is reasonably certain the United is not ready to counter with a , or global, war, that would in- the Soviet homeland's own un- red Logistics. Success in a war d to Europe would buy Russia to build and fashion her Logistics unlimited war later on. Conquest rope, moreover, would give her a orm advantage": enormously re- her military task for a global war. the strictly military sense, balance s each armed service is ready to do n specialized job—and only its own at once and with utmost efficiency. service is responsible for *all* the ons and functions within its own e. That is:

Air force to hunt and hit.
Land force to hammer and hold.
Sea force to heap and husband.

With Logistics force of every vehicular nature amply keyed to supply, they can move and support all three at their maximum ranges and speeds.

Our most shocking instance of unbalance for such a security deal is the existence of *two* Air Forces within the national armed establishment. The Finletter Report to the President spotlighted it by comment which can be summarized this way: Vested interests must be set aside; traditional divisions of appropriations must be ignored; every unnecessary activity must be abandoned. At this moment, the Navy hopes and prays to have approximately 14,500 planes to the Air Force's hoped-and-prayed-for approximately 20,000.

So far as Logistics is concerned, the existence of two whole and separate Air Forces is sinister to a properly balanced air power and national power.

So far as security is concerned, this could be fatal, come other D-Days—with the bickering over who goes where and when, and which does what; the beclouding of strategic issues and responsibilities, and the division and dispersal of available resources.

We have noted how clear it must be to all save ostriches, feathered or gold-braided, that Time *cannot* be wasted in war. We have noted that the mammoth task of Logistics includes the fateful obligation of insuring that Time is not wasted. With those musts in mind, we take a close look at the 70-Group Air Force itself.

The 70-Group Air Force is basically strategical in concept and make-up, with heavy emphasis on long-distance bombers and fighters. Its apparent purpose is to skin the enemy in his back yard, not our'n. By doing so, it would "buy" Time for us at home. But it is lollipop-wishing to expect that it could do so if its 600-mile-an-hour jet wallops have to depend mainly upon follow-up by 30-mile-an-hour land and 10-knot-an-hour sea Logistics.

Unless counterpoised by sufficient air Logistics, the 70-Group Air Force—no matter what its concept is—cannot be "strategical" but only "tactical" in effect; a hit-and-run air force, out from home base and back. No planes today have the range to do that *intercontinentally*. With balanced air Logistics, the Air Force could move out from home base, hit and hold to win.

Without companion Logistics, air force sacrifices another intrinsic profit of true air power: "shortest direct-route approaches." It's all very well to gab about "transpolar war," but we have no effective planes that could fly nonstop from Alaska to any one of every important target in Russia and return; and such routes directly across the Red heartland permit no setting up of help from surface Logistics.

No Air Force is stronger or faster than its slowest air Logistic plane!

That axiom jumps into air power truth from land and sea power records of numerous battles lost and victories that could not be kept because "the reinforcements and supplies didn't come up in time."

If, as seems generally agreed, air will be the deciding arm in future war, it becomes vital to balance our combat air force with air Logistics on the grand American scale. It becomes apparent, that, to make our hopes for security and peace stick, the desperately urgent need of the United States today is a sky full of merchant planes—a great *"American National Air Fleet."*

Latent surface Logistics strength—railroads, highways, inland waterways,

Evelyn Neblett's smile wins a campus beauty crown!

Evelyn Neblett, California Coed, captured Los Angeles City College's most coveted beauty crown when she was voted Homecoming Queen last year. But she had been an acknowledged campus beauty since her freshman year . . . the year her smile was introduced to her classmates on their college magazine cover.

Now the Los Angeles-born cover girl is a student at the University of Southern California. And though her smile is sparkling in a new setting, her choice of tooth paste is the same as ever—Evelyn's winning smile is a Pepsodent Smile! She says, "Pepsodent makes my teeth shine!"

The smile that wins is the Pepsodent Smile!

ANOTHER FINE LEVER BROTHERS PRODUCT

Evelyn Neblett knows it, people all over America agree—the smile that wins is the Pepsodent Smile! Pepsodent with Irium is their 3-to-1 favorite for brighter smiles.

Wins 3 to 1 Over Any Other Tooth Paste—families from coast to coast recently compared delicious New Pepsodent with the tooth paste they were using at home. By an average of 3 to 1, they said New Pepsodent tastes better, makes breath cleaner and teeth brighter than any other tooth paste they tried. *For the safety of your smile use Pepsodent twice a day—see your dentist twice a year!*

Do you have a winning smile? If Pepsodent Tooth Paste has helped your smile and career—send your picture and story to Pepsodent, 141 W. Jackson Blvd., Chicago 4, Ill. If used in our advertising you will receive professional model fees.

ocean shipping—has always been a matter of concern to world powers as kernel components of their total national fighting strength. Government agencies have been created to foster and finance them, even in the happy years free of alarms.

Incredibly, the dawning place, the surpassing value, of latent air Logistics strength as a kernel component of total national strength in this new age has roused in the United States no indications of official imagination or awareness.

In World War II air Logistics got its first real tryout. It turned into a "sell-out." This is history that you have not been completely told.

New Strategy for Remote Areas

The astounding feats of Air Transport Command, Troop Carrier Command and Naval Air Transport Service are, in general, well known. Contributions by air Logistics are not so well known. They played a small part, if measured in comparative tonnages; a huge part, if measured in brilliant specialization, in vistas opened and possibilities revealed. But for ATC and NATS the war could not have been so truly global in character. The holding of strategically invaluable distant theaters and cutoff areas which could not otherwise have been maintained was made possible by air Logistics.

For American hearts, the greatest achievement of air Logistics was the use of its speed to reduce the death rate among battle-wounded American boys. Nearly all blood plasma was air-borne. Thousands of casualties were flown home for that extra chance hospitalization in the United States could give them. When Patton's armored thrust toward Germany stalled for want of gas, it was amateur Logistics by Jim Doolittle's 8th Air Force—whose Liberators and Flying Fortresses temporarily became Flying Tankers—that cranked him up again. Ditto at the Battle of the Bulge: Doolittle's fliers kept the defenders of Bastogne eating and shooting until ground Logistics regained contact.

Air Logistics nurtured the "underground" from the Philippines to the Balkans and Europe. Without air supply of arms, food, contact and reinforcements, the French Maquis, for instance, could not have endured. Together with the British, Doolittle's airmen saved Holland from going over the final edge of starvation when the Germans withdrew; and there were no surface means in being.

On various occasions the supreme command called upon "air lift" to rectify tactical ground mistakes, as well as to carry out last-minute battle-plan changes. Political mistakes and switches, too. At this writing, air Logistics—and air Logistics alone—is saving the American Occupation Force in Berlin from hardship, hunger and humiliation.

All that is past and present. Multiply it a hundredfold for the air Logistics picture of the next war.

Some airmen *do not* believe that "air lift" can bear the whole Logistics burden of war. Or that with engines, fuels and craft now known it would ever be able to do so. The picture could alter overnight, with discovery of efficient synthetic fuels or conversion of atomic energy to motive power. But, as of the present day, not enough oil exists in the entire world to provide gas for air fleets huge enough to lift more than a part of the Logistics of global war. That part must be exploited to the last ounce and mile if the speed and power of the combat air force are to count.

Sane airmen *do not* believe that air power combat and logistical can, as of now or within the near future, of itself seize, garrison, supply, occupy and govern a hostile nation. But sane airmen *do* believe that air force *properly balanced with air Logistics* can, as of now and the near future, seize, garrison, supply, defend and progressively advance li zones or theaters called airheads.

Airheads! The new operational that replaces beachheads in militar portance.

Airheads belong as naturally to land mass air-age warfare as beach did to overseas expeditions of st warfare. *Airhead* simply describes hop by which a full military offens kangarooed into enemy land m *Airhead* means taking utmost adv of air power's value for "vertical ing" without intermediate sloggin slugging. *Airhead* means applicati our whole military teamwork in strength in massive strides which ar ited only by the optimum range of bat air force, backed in pace b logistical force with full mainte load. You've got to occupy *in* what you knock out, to grasp vi You can't just smack 'em down come home and wait for a letter "Uncle!"

Airheads will differ from beac operations in many particulars. A is lodgment *within* a hostile con not on its shore. Caterpillar l gears, and certain other measure make airfields unnecessary. Any prairie will do; sparsely populate remote places are best, cutting surface Logistics available to loc position. Our Far West betwee Rockies and Sierras or just east Rockies, and the heartland of the Union from the Urals east throu beria, are favorable airhead r They undoubtedly would be atte objectives—because airhead is a two can play.

Airhead Logistics include "lif thundering clouds of paratrooper Marines of the Air Ocean. G "Jake" Devers and other promine diers have predicted that eventua ground combat divisions must b borne. Today, we haven't enough Troop Carrier Command's st plane, the Fairchild Flying Box lift one division.

From her own and satellite p tion Russia is calculated to have for 25 air-borne divisions. In S land three years ago she neg purchase of silk and accessori manufacture of *7,000,000 para* For carnivals, or Workers' Parks?

Pattern of Airhead Invasio

Airhead Logistics will be enorm were beachhead surface Logistic the first-day Normandy landin used *4,000* ships. First-day airhea cedure will be: air smash and c flood of paratroops; setting up of stant inflow of transport and planes with supplies, equipment inforcements. If successfully c dated the airhead becomes a b the next forward leap. Effective range at present, all factors weig 1,000 to 1,500 miles.

Strategists are convinced that a would be the chief feature of a between the United States and The latter, with neither a navy merchant marine big enough to tr even a small beachhead operation launch the invasion forces of inte nental war *only* by air Logistic us, airheads would be the only way to get at her without bank ourselves of blood and resources. beachheads in Siberia—and wh you? Still closer to home than sia's hard inner guts. Try it fr rope—but remember Napoleo Hitler. Russia, better than any la tion on earth, is protected by ge from sea or land war. An old-fa invasion of Russia would frame beyond our man-power and strength.

But airheads will be technica humanly impossible for the best a

sport and cargo planes—or lose all
es of our combat air strength in the
ents of Time and Transportation.
o do that, every civil air line would
to be robbed of all its planes and
t of its flight and executive person-
instead of a just war-reserve propor-
. It would be worse than last time.
r Pearl Harbor the services com-
deered half the commercial air fleet
anic—then left many planes sitting
for months because they had neither
s nor facilities to operate them, while
ial and business travelers essential
e domestic war effort tore their hair
priorities.
ith many manufacturers and air-line
rators in the red for millions, it is
to hope that the Logistics air fleet
security requires will grow up nor-
ly, and in safe time, from private
tion industry enterprise.
eventy-group procurement, for all
illions, does not restore sound health
e aviation industry at large. Its spe-
zed demands give fat to some, lean
thers; although, since in this age it is
gnized as the most vital industrial
potential, its general well-being is
datory. It does not stabilize avia-
's labor problem, because its year-
ear allocations prevent long-range
loyment planning. Uncertain how
their jobs would last, thousands of
led workers and engineers who be-
e fixed in other lines after V-E Day
not return to aviation.
nother serious reason why private
rprise won't conjure up the merchant
fleet we need is that labor, material
development costs have strato-
ered. Don Douglas' original DC-3—
ld airways standard for years—took
than $400,000 to develop. It was
ed at $125,000. His present DC-6 cost
millions in development; you'd have
plunk down $820,000 to buy one.
uglas, who should know (his firm has
lt 13,000 air liners—more than all
er domestic and foreign manufac-
rs together), frankly told the Presi-
t's Air Policy Commission: "I do not know any air-line operator that I could sell another plane to, even if he were loaded with cash today."

That hints of other grave angles; our airways have fallen as far behind modern air travel as back-country "thank-you-ma'am" roads are behind modern automobile travel.

So, creation of a Merchant Fleet of the Air of 10,000 planes would cost a vat of wampum—even for these days, when billions are jabbered about as casually as hundreds used to be. It would mean more airports, and the swiftest possible tripling of the capacity of the Civil Airways, now traffic-choked by the existing 1,000-plane scheduled air-line fleet and miscellaneous private and commercial planes and armed services aircraft. It would mean intensification of federal research to improve all-weather travel and landing aids. The lag in these brings revenue losses to operators, and the delays, cancellations and uncertainties of air travel which so often make you wish you'd gone afoot in the first place. It would mean shortages in things affecting your household: aluminum, electric power, gasoline.

The Menace of Obsolescence

Because of the giddy pace of aeronautical science, obsolescence must also be reckoned with. Not without reason has the crack been made that when our 70-Group Air Force is completed, in 1953, it will be "the best obsolete air force in the world." That's equally true, however, of any nation. The big gamble is that any day one single innovation—atomic motive power, say—can junk all the billions of dollars' worth of military and commercial air power we possess.

On the other and sunnier hand, however, there are a score of ways in which the bulk of such a merchant plane fleet would be put to work and prove stimulating to the general economy. As the Maritime Commission charters ships to private operators, air-fleet planes could be leased to civil air lines—our own, and those of friendly nations. They could be chartered to those pioneer cargo operators now struggling for an air hold, compelled as they say, to "fly freight in Pullman" (converted air liners) because few distinctive cargo-type planes are available.

In land and sea power ages, "great" nations became and remained so only when their aggressive stature was balanced and fortified by shipping and transportation strength. Enterprise, trade, production, science—plus mobility.

When the age of the new power—air power—broke, its leadership initially fell to us by right of invention and vision and swiftest development.

It is tragedy or lunacy or sluggishness, then—take your pick—for our generals and admirals and politicians, for all of us, to ignore the unavoidable carry-over into air power of that historical lesson of balance.

Destiny has put us into the One World's first division. And now we've got to pick up the bat and face the pitcher—or get out of the big league. Here is what you should bear in mind while you're picking up your favorite wagon tongue—the bases are already loaded with three runners:

First: If the United States is to remain a democracy, it cannot ever maintain in peacetime a full wartime strength.

Second: If the United States is to remain a democracy, it cannot ever fail to maintain in peacetime a stand-by combat strength and a ready Logistics strength husky enough to hold the dike in emergency until we can bring up our full wartime strength.

Third: If there is another war, never before or never afterward will there be so much biting truth in the old folk saying that *"Time* will tell."

THE END

IT WOULDN'T BE FAIR

Continued from page 20

No hypodermic needles which inject a chemical freezing the blood to dry ice and causing the veins to explode. We don't even seem to find any footprints. So what does that mean? The answer is obvious to Annie. We are missing something. We are trampling countless delicate clues under our big, flat feet. Convicting innocent men on obvious, ridiculous clues, while fiends, ingenious beyond our poor capacity to imagine, are lounging around the city laughing at us. Lieutenant, a man has to have respect from his wife."

"So?"

"So I thought, sir, we'd take Annie along on the next case. Show her a real murder—"

"No." The lieutenant stood up, walked out from behind his desk, and gestured at the walls of his office. "This is not a book from the rental library," he said, "with every killing an excursion trip." With his other hand he gestured at the window toward the police garage three stories below where a motorcycle idled, its vibrations gently rattling the window pane. "This is Centre Street Police Headquarters; *real* police with work to do, not a picnic for amateur mystery-story—Charley, you know better."

Charley stood up and took his hat from the lieutenant's desk. "I guess so. It's too bad, though; Della Street goes everywhere with Perry Mason."

"Colhaus—"

"No," said Charley, "Annie." He put on his hat and stood for a moment, looking at the floor. "I rather expected this. Which brings me to my final hope." He reached inside his suit coat and brought out a bright green-jacketed book which he had held concealed under his arm. "I would like you to read this. The thrilling adventures of Hercule Poirot."

"Why?" the lieutenant demanded.

"It's a very fascinating story. And I would like you to finish it"—he hesitated—"before you come with me to Annie's tomorrow night."

The lieutenant stared at Charley, his eyes narrowed. "Someday," he said, "you will be too smart for—"

"It's my only hope." Charley opened the door and began backing out. "My only chance is that your gray hairs and ancient wisdom will succeed where I have failed"—the door was closing—"in persuading Annie that the police are as competent, in a much duller way, as Agatha Christie."

ANNIE'S living room, Charley had often noticed, was feminine and suited her perfectly. But he was not prepared, the following evening, for what it did to the lieutenant. The lieutenant—surrounded by dainty, soft-glowing lamps, pastel-tinted slip covers, bright modern paintings—looked as out of place as a bishop in a pool hall.

But Annie was superb. She sat gracefully curled in a corner of the davenport, her hair, as always, even more gloriously brunette than Charley remembered. Her softly tanned face was eager, smiling and alive. Her large, blue, and beautiful eyes were animated. She seemed confident.

"The lieutenant read Hercule Poirot," Charley announced. "Loved it."

"Oh?" Annie looked interested; she smiled. "Did you figure it out?"

"No," said the lieutenant.

"You mean, not till the end."

"I mean," said the lieutenant—he took a swallow of his drink—"that I never *did* get it. I read the book. I finished it. Read the last chapter twice. And I still don't know who killed Aaron DeCourcey."

"But, Lieutenant. It *said*. It said *Robert* did it; Robert, the adopted son. He confessed."

"I know. We get those confessions all the time; they don't mean a thing." The lieutenant paused, took a thoughtful sip of his drink, then spoke decisively. "I think maybe this Lacy guy did it: Lacy Spreckles."

"But—"

"It figures," said the lieutenant. "He hated the guy, he bought the gun, he had a fake alibi, he needed the money, he was about to be written out of the will, he said he'd do it, nobody else was—"

Annie recovered her voice. "But, Lieutenant! He *couldn't* have done it! Don't you remember? About the sundial?"

"Look, young lady; we had a case two months ago—"

"Oh, those. Lieutenant, don't you remember?" said Annie pleadingly. "He and Lady Gwen were in the garden—"

"Sure, I remember! But I didn't get it."

"But it's so *simple*." She forgave him with a smile. "He and Lady Gwen noticed on the sundial in the garden that it was exactly three thirty. She remarked on it, remember? *Then* they figured out that that was *sun* time, two minutes slower than *real* time, so it was *actually* three thirty-*two*, don't you see? But then *Hercule* figured out that the sundial was over three hundred years old and during that time the revolution of the earth changed or something—"

"That's the part I didn't get."

"Well, neither did I, exactly. But anyway, the revolution changed the earth's relation to the sun, so the sundial was really *correct*, don't you see? It really *was* three thirty, so Lacy couldn't *possibly* have done it."

"I thought," said Charley tactfully, "that it could have been Lady Jane."

"No." Annie reached out to tuck Charley's tie neatly inside his coat. "It couldn't have been her, either. Remember she was in the drawing room talking to Blake? The brother-in-law? And he noticed how the sun glinted on her hair bringing out the delicate tones of red and gold? Remember?"

"I guess so," said Charley.

"Well," said Annie happily, "don't you see then? It was cloudy all day."

"Cloudy?"

"Oh, Charley!" She leaned forward impatiently and began ticking off points on her finger tips. "There was no sun all day except just *once*, for a second or so. So if Blake saw the sun on Lady Jane's hair, it *must* have been three thirty. Because that was the *only* time Lacy and Lady Gwen could have told time by the sundial in the garden!" Annie paused. "Lieutenant," she appealed, "*you* that, don't you?"

"I guess so," said the lieutenant strangled voice, "except— Well, m the sun was out some other time, And nobody noticed it."

Annie slumped back on the daven "Of course not," she said hopelessly

"But why?" said the lieutenant.

"Because! It just *couldn't*, that's

The lieutenant glanced at Ch "But why?" he said plaintively. " Just tell me WHY, that's all!"

"Lieutenant," said Annie with da ous calm, "don't be absurd. The *couldn't* because—why, it wouldn *fair!*"

THERE was a long silence d which the lieutenant worked fully at squeegeeing the moisture the side of his glass with a forefing

Finally Charley looked up and s "Maybe," he said pleasantly, "they mit murders differently in England

"Yes," said the lieutenant, "they rules." He turned to Annie. " young lady. In twenty years on the I have never had a single sundial i case I've ever been on or ever about. And the earth keeps right volving in the same old way. Th murders really happen, a guy knocked in the head, stabbed a knife, or shot with a gun. Onc while, poisoned. Whoever did it b and we go out and look for him find him. That's all there is to it times out of ten. Clues, yes. Ha find, sometimes? Certainly. But n cate subtle clues like sundials, a split-second alibis. Believe me, m are practically never committed an are never *never* solved the way yo about in detective stories." The li ant paused and took a long drink his empty glass.

"Your glass," said Annie tender empty." She stood up, gently disen his glass from the lieutenant's ne fingers, and left the room for the k

"Colhaus," said the lieutenant.

"No," said Charley, "Annie. think you've made a very strong i sion."

"I would like to make an even st one. I would like to show her righ with a personal demonstration, what murder is like."

Annie returned with the lieut drink, and curled up on the dav again. "As I understand you, Lieu any clue in a murder case less o than a bloodstained monkey w

with a full set of fingerprints, is hardly worth bothering about. Because—"

The lieutenant spoke, frowning and studying his glass. "This drink tastes funny," he said.

"Try some more," said Annie.

The lieutenant drank again. "Still tastes funny."

"I know," said Annie sweetly. "I put salt in it."

The lieutenant set his glass down, carefully. "Salt?" he asked, with deadly politeness. "Why?"

"To show you that if that salt," said Annie, "had been *tse-tsum,* you'd be dead right now! Within two seconds!"

"Look—"

"I'll get you some more," said Annie hastily.

"I don't *want* any more! Just what is this, anyway?"

"Well." Annie looked defensively from the lieutenant to Charley and back again. "You're both so smart that I just wanted to show you. There you'd be on the floor; dead. With *tse-tsum,* a rare jungle poison, analysis shows nothing but heart failure, so they couldn't prove a thing. Anyway, nobody'd suspect me because, as you just explained, murders are *never* committed this way."

"Yes?" said the lieutenant pleasantly. "And just where do you get this seesome? At your neighborhood druggist's?"

"You could get it," said Annie aloofly.

The lieutenant took a deep breath. He continued to inhale, through flared nostrils, as though he were planning to inflate a large balloon. His face changed from a rosy pink to a very attractive shade of orange, the color of a desert sunset. Then the telephone rang.

Annie walked, hastily, out to the hall and answered it.

"Annie's round," said Charley pleasantly, "on points."

"For you, Lieutenant," Annie called sweetly, and the lieutenant, exhaling as he went, came out and picked up the phone, while Annie tiptoed softly back to the davenport.

"Yeah," they heard him say, then silence. "Right away. Send a car. You got the address? Right," he said, then hung up and returned to the room. "Murder," he said softly, "*real* murder. You have never seen a murder, have you? Committed, not with seesome, but by blowing a guy's head off with a gun?"

"No," said Annie.

"Get your hat," said the lieutenant grimly, "and we'll drop in on a fresh, warm, and very real killing." He turned suddenly and looked at Charley, his eyes narrowing. "Say, if I thought you'd planned on something like this—"

"Absurd," said Charley. "Such a plan would be far too subtle for a flatfoot like me."

THE room in which the dead man lay was a hotel room, not cheap or small, but drab and sad under the mean light of the chandelier on its ceiling. It had one window, shiny black against the night, and was furnished with a dark rug, a bed, a desk, a chair, a bureau, a floor lamp.

But Charley, Annie and the lieutenant, standing in the doorway, saw none of these things. They saw only the man on his back on the floor, legs out straight, feet apart. One arm lay over his chest, limply, the other stretched out on the floor, away from the body, palm upward. There was no hair above his eyes; there was no head. The lieutenant gently pushed Annie into the room and closed the door behind them.

Four men, two kneeling at the dead man's side, the others rifling the drawers of the bureau, looked up, nodded at Charley and the lieutenant, glanced curiously at Annie, and resumed their work.

Charley turned to Annie who was still staring, eyes big, at the man on the floor. She was, Charley thought, remarkably pretty for a girl with a green complexion.

"Look," he said softly, "maybe it wasn't so smart bringing you here. I'll take you downstairs and you can—"

Annie turned haughtily. "I am quite all right," she said, apparently using someone else's voice. She stepped bravely closer to the dead man and, frowning a little, stared at his face with her eyes closed.

Charley stooped down, hands on knees, beside the medical examiner who was squatting at the dead man's side. "Identify him?" he said.

"Yeah. Lou knows him. Small-time racketeer; black market in the war, marijuana, loft robberies."

Charley stood up and joined Annie who was standing in a far corner of the room. Her face was now a comparatively healthy white. "Look, honey," he said gently, "the difference between a real murder investigation and the kind you read—"

Annie interrupted. She seemed excited. "The killer," she whispered, "is redheaded."

Charley looked at her for a moment. "Yeah?" he said.

Annie opened her bag and brought out a notebook. "Look at his fingernails."

CHARLEY looked. In the harsh light from the overhead chandelier he could see, caught in the nails of the dead man's outflung hand, a little fringe of short dark-red hairs. *Red hair*, Annie printed in her notebook.

Charley walked back to the medical examiner who was talking to the lieutenant. "That hair under his nails," he asked, "from the rug, isn't it?"

"Of course."

The lieutenant glanced curiously at Charley. "Annie?"

"Yeah."

The lieutenant stood up. "This is almost too easy."

"Wait." Charley remained motionless for a moment, thinking. "Maybe this is the way. I was simply going to explain our procedure, but she wants to be smart, let her have her head. Let's give her all the rope she needs."

The door of the room opened and the policeman on guard outside leaned in, a hand on the doorknob. A small worried man stepped past him into the room.

"Who are you?" said the lieutenant.

"Mr. Whiteman; Theodore Whiteman, the manager."

"Okay; wait."

Annie caught Charley's eye and Charley crossed the room, the lieutenant joining him. She whispered, "See the mud on his shoes?"

"Yes," said the lieutenant. "So what?"

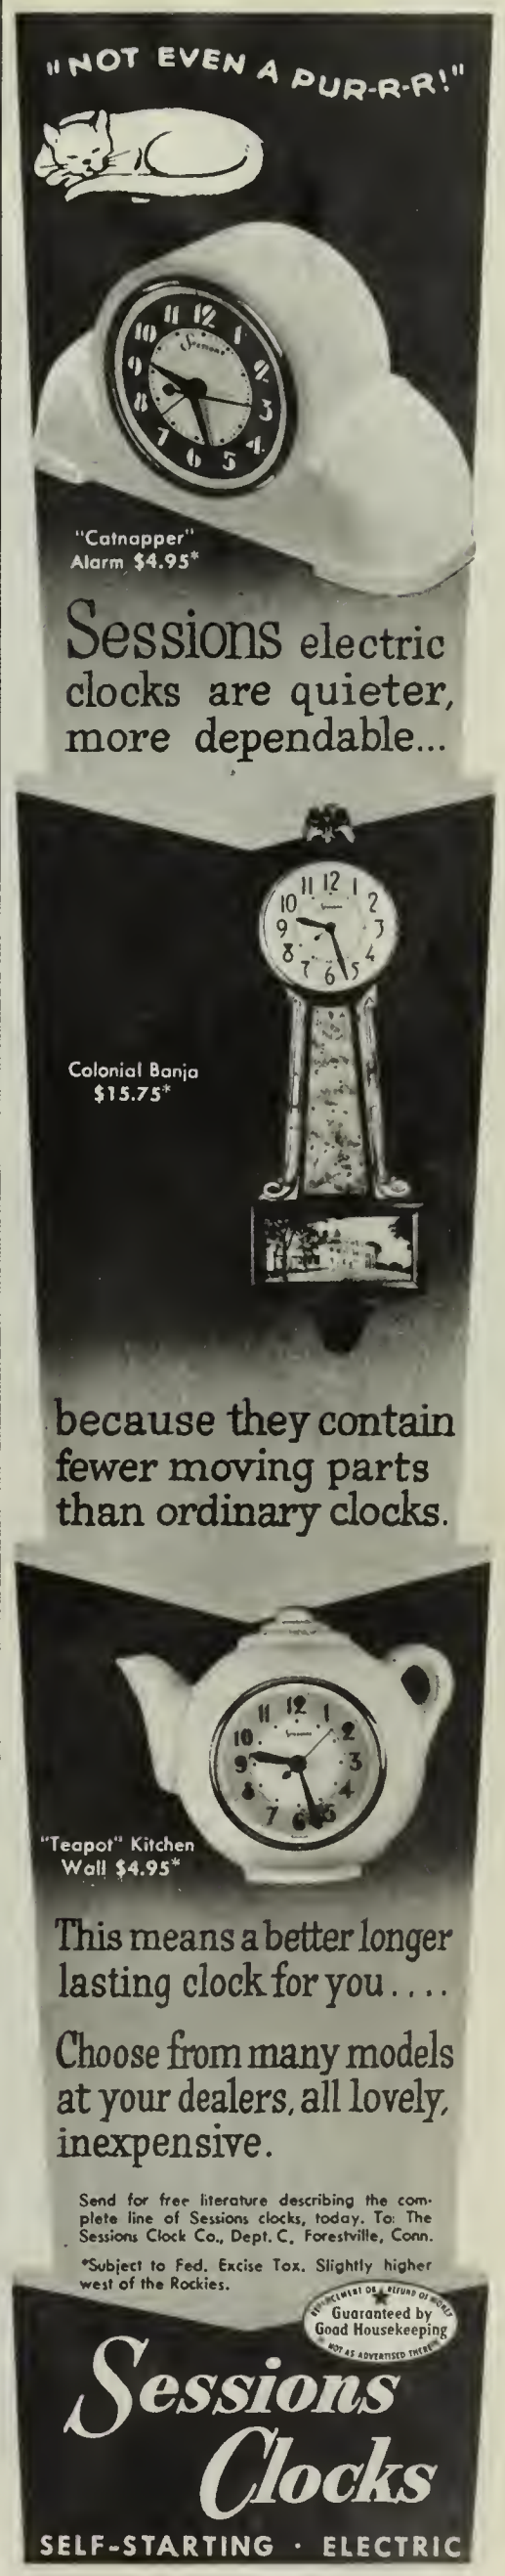
Annie looked at him contemptuously and produced her notebook. "There is only one place in the entire New York area where you will find soil of that peculiar red color. South Street"—she began writing in her notebook—"around the dock area at South Street."

"Very interesting," said the lieutenant gravely. "You'd say, then, that he's been in South Street lately? Maybe the murderer hangs out there, too."

"Very likely. And the murder was committed at seven fourteen."

The lieutenant's mouth opened suddenly, then closed again slowly. "You don't say," he said. "How—"

"His watch, of course. It stopped when he was killed."



The lieutenant nodded at Annie approvingly. "Good girl," he said. "Keep it up; keep your eyes open." He nodded at Charley and they walked toward the desk where one of the detectives was standing.

"What about that mud?" said Charley.

"Offhand," said the lieutenant, "I could name you fifty places around town where you'll find red soil."

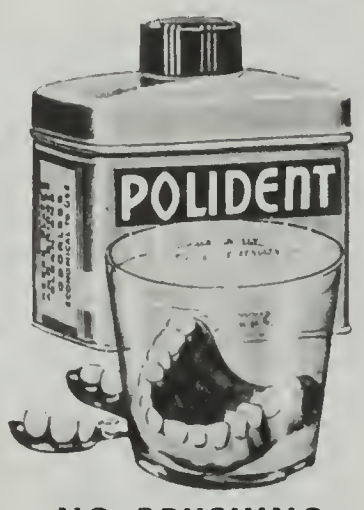
The detective at the desk looked up.

"How come the guy's watch stopped, Eddie?" said Charley.

I Wear False Teeth

yet my mouth feels fresh, clean and cool

No "DENTURE BREATH" for me*

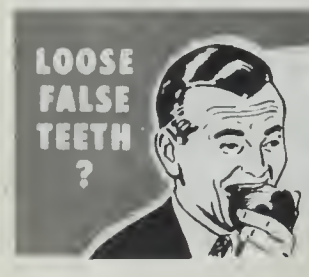


*"I soak my plates in Polident every day . . . to avoid Denture Breath. It's such a blessing to know that they are odor-free." *Mrs. J. R. S., Midland, Ark.*

WHEN plates taste bad—feel hot and heavy in your mouth, watch out for "Denture Breath", the oral disturbance that comes from improper cleansing. False teeth need the care of a special denture cleanser —POLIDENT. Safe, easy, quick, Polident leaves your plates feeling clean, cool and fresh. No fear of offensive "Denture Breath".

And remember, Polident keeps your false teeth more natural looking—free from offensive odor, too. For a smile that sparkles, for a mouth that feels cool, clean and fresh—soak your plates in Polident every day.

Polident comes in two sizes—regular and large economy size—available at all drug-stores. It costs only about a cent a day to use, so get a can of Polident tomorrow, sure.



NO BRUSHING

Soak plate or bridge daily—fifteen minutes or more—in a fresh, cleansing solution of Polident and water.

POLIDENT

The detective shrugged. "Wasn't wound. I tried it."

The lieutenant smiled happily at Charley. "Hello, Hercule," he said. He turned to the hotel manager. "Anyone come up here before?"

The manager shook his head. "Not that I know of. Or any of the help; I checked."

"Anyone call?"

"A man; about an hour ago."

"What'd he say?"

"He said, 'Eight-oh-nine in?' And I said, 'Just came in.' And he hung up. Didn't even say thanks."

THE lieutenant nodded as though this were what he'd expected. "You know the voice?"

"Never heard it before."

The lieutenant indicated the dead man with his foot. "You know this guy?"

"Yessir."

"How come?"

"He's stopped here before."

"Know anything about him?"

"Just that."

"You talk to him today?"

The manager nodded. "On the phone."

"When?"

"Seven thirty."

"What about?"

"He owed a phone bill from last time he was here. I asked him to pay."

"What'd you say?"

"I said, 'This is the manager. Glad you're with us again. There is a small bill—' Then he interrupted."

"What'd he say?"

"He said, 'Okay, Theo, later.' "

"Theo?"

"It's what people call me. He knew me."

The lieutenant looked at the manager for a moment, then turned away. "Stick around," he said. He beckoned to one of the detectives who crossed the room. "Lou? Charley?" the lieutenant said. "What do you think?"

Charley shrugged. "Routine," he said. "A small-timer down and out, who just got his hands on some cash. All his clothes are new. Right, Lou?"

The other detective nodded.

"So he's in the chips again," C continued, "and moves in out rain. But there's no money here, Right, Lou?"

Lou nodded again.

"So"- Charley shrugged once m "somebody dumped him for the n Maybe it was his money in th place."

The lieutenant glanced at Lou i ingly.

"Something like that," said "Yeah."

"Well, we'll pick him up, he there, sooner or later," said the li ant. "Teletype out?"

"Half an hour ago."

"Okay." The lieutenant nodde missing Lou, and turned to Charle might as well go."

They crossed the room to Annie Her eyes were fever bright. "Yo ticed, didn't you?" she whispered

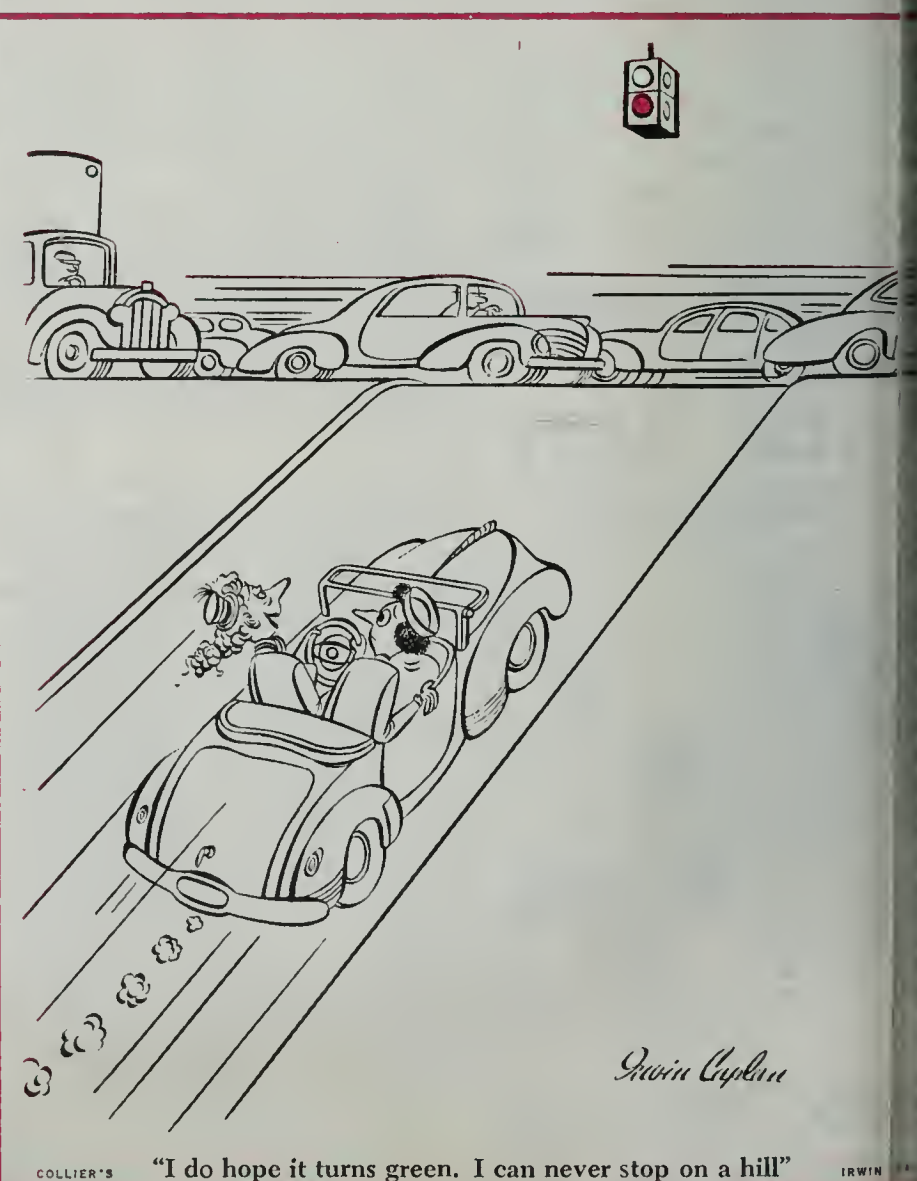
"Noticed?" said Charley.

"Oh, *Charley*—the hotel man! he phoned, he wasn't talking t dead man. He *couldn't* have been. seven *thirty* and the man was ki seven *fourteen!* Remember?"

Charley nodded dumbly.

"So he *must* have been talking *murderer.* The phone rang, an murderer answered it!"

"No," said the lieutenant.



"No?" said Annie challen "Why?"

"Well—" The lieutenant he "He said, 'Theo.' He said, 'Okay. later.' Not likely he'd know the l er's name or use it if he did."

Annie thought for several mo rubbing her front teeth nervously forefinger. "What a break!" s claimed. "Don't you see? The m lisped!"

Charley felt suddenly guilty. honey," he said contritely. He arm around her shoulder prote "Maybe I should tell you—"

"Oh, Charley!" she said. "Do *see?* Look. We know it was the m who answered the phone. We k

COLLIER'S "I do hope it turns green. I can never stop on a hill" IRWIN

dn't have said, 'Theo.' So what *did* that sounded like it? He must have 'Okay, thee you later!' Which is almost exactly like, 'Okay, Theo, ' The murderer lisped!"

Carley looked at Annie hopelessly, ce a mask of guilt and despair. He ed his mouth to speak, then closed it . He had waited, he realized, too It was impossible now, to explain— ever hoped even to speak to Annie

hat's more," said Annie, "he was six our inches tall and left-handed."

onderful," said the lieutenant. y—"

ook at the phone," said Annie y. She pointed to the desk. The e lay in its cradle, the mouthpiece e right. "A right-handed person re- s the phone exactly opposite from As for his height—"

e lieutenant took Charley's arm and crossed the room to the desk. "You his phone?" said the lieutenant qui- o the man at the desk.

e detective looked up. "Of course." ou left-handed?"

om Installment XV of THE ECRET PAPERS OF HARRY L. OPKINS: It was reported that senhower was so annoyed and orried by General Montgom- y's inactivity that he had ap- ealed to Churchill to go to ormandy to try "to persuade lonty to get on his bicycle and art moving."

e man glanced at the lieutenant curi- . "No. Why?"

low come you put the phone back hat?"

ey returned to Annie. "Marvelous," the lieutenant. He put his arm nd Annie's shoulder affectionately. azing," he said. "Great little help- you'll be for Charley." He looked harley solemnly. "Let's get out of ," he said. "Annie's given us enough ork on; the rest will be strictly rou- ."

ID it was. To Annie's outraged as- tonishment, during the next week, an hunt took place; no cordon of e was thrown round the city. Even e, no circular was issued containing ie's beautifully worked-out dossier e criminal. The police seemed com- ly uninterested in Annie's deduc- i.

harley tried to explain. They had rned to Annie's apartment from a ie, Sweet Murder, My Lovely, and sitting—several feet apart—on the nport.

n this kind of killing," Charley said ntly, "we *know* the kind of guy who t. And that's all we need. Because know he'll be picked up sooner or , somewhere for something. In a bling raid, or for petty larceny, jos- in a subway, whatever his racket is. every possible suspect is always tioned; about this crime and any oth- we've got."

nnie found this explanation less than factory. She sniffed; a sniff that was e to a snort. "It's like hunting for a elle in a haystack," she said, "blind- ed! And not even hunting! Just ing till it jabs you!"

So what? As long as you find the elle."

But when you have a *description,*" ie wailed, "practically an exact de- ption, and—" . . .

elations between Charley and Annie, e six days later when the killer was found, resembled in tenseness the high E string of an electric guitar connected by mistake to a power line. And the fact that he was caught precisely as Charley had predicted didn't help. The word came one evening at Annie's; Charley answered the phone. And when he returned, smiling for the first time in days, he could be pardoned, perhaps, for gloating a little.

"Grab your hat," he said, "we're going to headquarters! And I'll show you a killer caught by the cops without any help from Sam Spade, Inspector Chafik, or even Hercule Poirot!"

They waited, at headquarters, seated on yellow-wood folding chairs, in a small, unadorned, white-plastered room. The lieutenant, more worried and sleepless-appearing than ever, sat staring at his feet. Annie looked coldly ahead, while Charley waited happily, both watching the closed door of the room.

THE door opened. A man was urged forward by a policeman at his back. He stepped forward into the room, ducking his head as he passed through the doorway, then stood staring sullenly over their heads at the opposite wall. His clothes were unpressed and he wore a cap. He seemed about forty years old.

Annie brought out her notebook and ticked off an item with her pencil. "Six feet four," she said. "Right?"

The lieutenant did not look at Annie. "Four and a half," he said.

Annie leaned forward and whispered to the lieutenant. "His cap," she said. "Do you suppose—?"

The lieutenant spoke wearily. "Take off your cap."

The man raised his hand—his left hand—and Annie's pencil flicked once. He pulled off his cap. His hair was almost beautiful: thick and alive, deeply waved and red.

"Little darker than I thought," Annie murmured, and her pencil flicked once more. "Where was he found, Lieutenant?"

The lieutenant looked up again very, very wearily. "Where did they pick you up?" he said to the man.

The man looked at them all for a moment, then returned his gaze to the wall before him. "Thouth Thtreet," he said, and Annie's pencil flicked twice. . . .

During the ten-minute cab ride back to Annie's apartment, neither she nor Charley spoke; Charley because he was unable to, and Annie out of compassion. But when they stood at the street door of Annie's building, the cab still waiting at the curb, a voice, not his, came out of Charley's throat. "Tell me, just tell me this. Did it occur to you, even once, that it *could* have been somebody else? Say, a baldheaded guy, five feet two, who spoke with maybe a stutter? Did it ever enter your head that your clues *could* have been wrong? That it *could* have been somebody else? Did it ever—"

"No," Annie said, "of course not."

"But why?" Charley wailed. *"Why?* Will you please tell me WHY?"

Annie looked at him sadly, pityingly, and made the final effort of a person who knows it is doomed to failure. "The clues," she said gently, "couldn't be wrong." She opened the door. "They just *couldn't* because—Charley, don't you see? It wouldn't be *fair!*" . . .

Charley and Annie are married, now. They are very happy and contented—because they are not married to each other. Charley's wife thinks he is wonderful, a bulwark of law and order, but then she always did admire policemen—from her earliest memories of riding pickaback on the broad shoulders of her father Patrolman Colhaus. And Annie's husband—he thinks she is marvelous. He is a writer, a tweed-jacketed, pipe-smoking author of detective stories. And Annie, he says, gives him most of his best ideas.

THE END

You'll be admiring

moccosins as they travel to business as well as to sports. Stout, sturdy, serviceable, perfect with rough-textured suits. Two grand Rand variations of the popular moccosin vamp blucher shoes are: top, Autumn Grain with loop tie, Rawhide laces, overweight crepe sole and heel; bottom, with double sole, leather heel. RAIN IN AUGUST

Continued from page 25

When at length I reached the point from which I could overlook the farm, I had to shade my eyes against the sun in order to observe what was happening in the narrow valley below me.

A thin thread of smoke rose from the roof of the farm. I shifted my gaze to where the timber had been stacked. It had all but vanished. Where it had gone to was no mystery.

There was a slight ground mist, and the valley was still deep in shadow, and for these reasons I at first imagined the structure rising from the center of the plateau to be no more than a large barn.

As I watched, a brilliant shaft of light struck downward through a cleft in the hills, illuminating the whole area of the farmstead, and I could see clearly all that until now had been obscured from me. I remember crying out in astonishment. The building, instead of resting upon normal foundations, was encased by a formidable, bargelike hull.

Monsieur Noé had built an ark.

There was a queer feeling in my stomach. I sank down on my haunches, and lighted a cigarette.

But if there was a dreamlike unreality about the scene before me, it did not fade. Here, in this parched dust bowl a few miles north of the great desert, lapped by sunlight, was a boat straight out of the Old Testament.

I LIGHT another cigarette now, thinking of that moment. The queer feeling is there again, not as sharp or as shocking, but more pervasive. I look round at all my friends and neighbors with me in the Bar Pigalle and think of Matthew: *For as in those days which were before the flood they were eating and drinking. . . .*

Staring down at the ark below, I took a firm hold on my fancy. My studies have taught me the importance of the rational approach, but I never imagined that its employment could be at once so testing—and so rewarding. I experienced a deep thrill of triumph as I came to terms with this phenomenon. My instinct had not erred. Later, perhaps, others would pass judgment on Aristide Noé. For my part, I was content to draw my own conclusions.

One thing was evident. Beside the abnormality which gripped his mind, the symptoms of melancholia and hysteria which I had detected among my neighbors paled into insignificance.

He was a victim of paranoia in the grand tradition. On this score my months of study could leave me in no doubt. All my reading had failed to reveal so classical an example of a man suffering from delusions of grandeur—of the paranoiac's tendency to confuse his identity with that of some famous or notorious person. Yet I was left with the sensation that here was something larger than life. It was a minute or more before I could put my finger on what I am now certain was the reason for this.

A man in Aristide Noé's condition who attempts to establish his claim by his actions will quickly be confined to a mental institution. It is the law of a society which has the welfare of the majority at heart. But old Noé's physical isolation had insured him against interference.

There, in the morning brightness, I saw with cold detachment the logical sequence of events as they must have been: the first aberration (and the reasons for this, one could only guess) which had made society his enemy, and then, springing from this imbalance, the burning conviction that he was a man apart, an original, a tool of destiny. The odd coincidence of his name canalized the trend of his thoughts. He became Father Noé not only in name but in deed. Fact mounted upon fact. He had three sons. His only glimpse of the world beyond the valley was of our village. We *were* the world, and to his jaundiced eyes a conveniently wicked one. The voice of his dementia seemed to speak with the authority of God. Soon the deluge would come. It was time to build his ark.

I scrambled to my feet. The ark was built now. To get so much timber, I reflected, he must have raised a heavy mortgage on the farm.

"Poor devil," I muttered to myself, and then: "Poor devils." His family was in this, too. That was a point. Going back to fetch Louis, I wondered why they had co-operated. Or his Berber servants, for that matter. The ark was obviously the work of many hands. The answer, I decided, lay in the old man's fanaticism. He would not be the first to produce mass hysteria among his followers.

It was midday when Louis and I returned to the village. I had pretended to share his simple-minded astonishment, and I enjoyed hearing him retail our discovery to a skeptical audience at Madame Ramera's bar. In the end they believed us. It was the best story that had ever been told in the village. A party of spies who went out that evening confirmed what we had said.

Jean Nattier, pushing his kepi onto the back of his head with a characteristic gesture, made a solemn declaration.

"It only goes to show," said Jean. "Either you behave like human beings in a place like this, and obey the laws of nature, or you don't, and you go crazy."

This oracular pronouncement stuck. Nobody, with the exception of myself and—yes, just possibly—Madame Ramera, has bothered to question its validity since.

From that day onward, if a member of the Noé family showed his head in the village, he was pilloried unmercifully.

I kept my own counsel. I was of two minds as to whether I should writ Professor Berthot, but decided, ten rarily, against doing so. I was jealou my knowledge, and desperately kee see what would happen if Aristide were allowed to pursue his delusio their logical conclusion.

By August, as far as the village concerned, the joke was wearing thin. The only important thing in seemed to be how to keep cool and to avoid the slightest unnecessary l To hell with Monsieur Noé and his

long military car roared down the street in a cloud of dust. It pulled up, and a sharp-nosed, sour-faced officer in the uniform of the spahis clambered out.

"More trouble," muttered Jean bitterly, and went out to meet him.

Madame Ramera was polishing the glasses.

"It's all very simple," she told me. "The explanation stares him in the face."

I played the innocent. "Then he and I are equally shortsighted."

"Nonsense. It is the work of the Noés. They want to stock up their ark."

That Madame Ramera, who was a clear-thinking woman, should arrive at this conclusion, though for reasons other than my own, was not surprising. I said, still playing my game, "Then that makes them criminals as well as lunatics."

She gave me a level look.

"By their standards, they are neither lunatics nor criminals."

BEFORE I could be certain whether this remark was as profound as it at first appeared, Jean came back, and I heard the sound of the car departing. He sank onto a chair.

"Now it's horses."

"Horses?"

"A stallion and a brood mare. Vanished from the picket lines at Aumale last night. There's talk of their having been seen heading this way."

The idea that the Noés were somehow implicated began, from this stage, to take shape in the public imagination. But the theft of horses from Aumale was something too distant and impersonal to precipitate any communal action.

It was not until this morning, two days later, when the news broke that old Mahomet Ali's two Biskra camels had been stolen during the night, that there was something in the nature of an outcry.

When I stepped out into the street after breakfast, it was to encounter a Jean Nattier I scarcely recognized, so businesslike was the set of his face. He got off his bicycle.

"Where are you off to, Jean?"

"To Aristide Noé's place."

I experienced a pang of uneasiness. "Is it reasonable to go out there by yourself?"

His jaw jutted with a pugnacity so alien to his kindly face that I had difficulty in restraining a smile.

"Thank you," he replied curtly. "I do not anticipate trouble."

I wished him luck. Little puffs of white dust squirted up from beneath his tires as he pedaled away.

It was late this afternoon that I saw him again. He came up to my room and threw himself on my bed. He looked worn out. All the determination had been wiped from his face. I was not surprised. Quite apart from the fatigue of the journey, there was a terrible tension in the air. I was afraid the sirocco was going to blow up from the desert.

Jean needed the drink I gave him. He set down the tumbler and leaned toward me, laying a hairy hand on my forearm. It felt soft and moist. It was trembling.

"They're mad," he whispered, "Old Noé and his gang. They're insane."

I made no reply.

"Listen," he went on, "I went up there this morning. The old devil met me with a gun in his hands. I tried to get him to see reason. Never opened his trap. They locked me in an outhouse. I only broke out an hour ago."

"So!"

"I got back here as fast as I could. But that's not the point. You'll never believe me. The place is like a zoological garden. Never saw so many animals. All in pens. And what do you think? They were getting them into that damned houseboat of theirs!"

I knew then that the game had been played to the limit. Old Noé had taken his mania to the wilderness, but it had not prevented him from trespassing against society. With less reluctance than I would have imagined, I knew that it was time to intervene.

"We'll get the Notary and the Curé, and have a council of war," I said.

"That's a fine idea, old friend. This nonsense must stop." . . .

The council of war was a great success. Practically the whole village flocked to the Bar Pigalle. Madame Ramera did a roaring business. In the middle of it we heard a faint outcry down the village street, but nobody took any notice until Madame Ruad came bursting in at the door. She was a terrible sight. Her black hair was streaming, and the rouge stood out in patches on her cheeks.

"Ay-yi-yi!" she wailed. "Ay-yi-yi—!"

Louis Masson clapped a burly arm about her shoulders.

"Now, Ma," he said, "tell us what the trouble is."

"It is those wicked Noé boys!" screamed Madame Ruad, and at mention of the name everyone stopped talking. Madame Ruad struggled for breath.

"Never, never have they been to my house before, and now suddenly they are come, and they—whoosh! They are gone. In a car. But not alone. They have stolen my three best girls. Julie, and Lima and the Naïl child."

Far away came a noise like the rumble of artillery, and a sudden current of air went rippling over the striped awning outside the bar.

"That settles it!" boomed the Notary, gathering to himself the undisputed mantle of leadership. "Any man with a gun, fetch it and report back here. We will proceed at once to the Noé farm. This affair must be settled immediately."

For a moment nobody stirred. The hush that fell then will always remain in my memory because it was broken not by our own movements or our voices, but by a solemn din like drum taps on the awning. Then it sounded as though all the devils in hell were dancing on the tin roof of the bar.

Jean Nattier walked back from the open door.

"Well," he said, "we can't go out in this. We'll have to wait till the rain stops."

"Rain in August?" muttered the Notary stupidly. "It can't be. It never rains in August."

BUT that was three hours ago, and it is still raining. I have been to look at the sky. It is dark purple and yellowish. There is lightning playing on the mountains. A small river is running down the street. Nobody has been able to leave the bar, and now there is quite a party spirit. It is refreshingly cool. Simone has joined me at my table in the corner. She thinks that I am writing my school reports, but instead I have set down this account of Monsieur Noé's delusion. She touches my hand.

"Tomorrow," she smiles, "there will be green shoots everywhere. It will look like green mist on the sand. And then the day after, there will be little purple flowers. It is always like that after the first rains."

The Notary, his importance gone, has been drinking like a giant. His hand is on the Curé's shoulder.

"It never rains in August," he says. "In thirty years I have never known it to rain in August. The rains down here never start until the beginning of October."

The Curé looks toward the open door a little unhappily. A swarm of flies buzzes round the naked bulb which lights the room. Louis, who is comforting his old friend, Madame Ruad, glances across.

"If this goes on all night," he says, "we'll be under water tomorrow."

Madame Ramera rolls over to the Curé and fills his glass from the bottle.

"All night?" she bawls. "The last time this happened it went on for forty days and forty nights. Didn't it, Father?"

SUITED FOR THE CAMPUS

The Yale man doesn't dress like the California collegian. But there are basic rules that apply at either place and the freshman who wants to fit in should learn them

The man at the left is wearing gray flannel slacks, blucher-type shoes and a wool-and-fur-blend pull-over sweater, a combination that is popular everywhere. The dungaree-clad youth has an all-wool pull-over with ribbed crew neck, wide sleeves and V yoke in contrasting stripes. Girls like this sweater too. At the right is a double-breasted glen plaid suit with a striped broadcloth shirt, knit tie and snapbrim hat, a popular ensemble

SKIRT BY SUNCLOTHES

LIFE is stirring again along Fraternity Row all over the country, from Dartmouth to many-campused University of California. The old crowd is back, ar there are new faces—the freshmen, bewildered but ea:r to fit themselves into campus life.

An important part of being "in" at any college is di:sing like the upperclassmen. The second-year man k:ws how to do it. But the freshman is faced with a l:nite problem. For customs of dress vary in different re ons and in different colleges.

For instance, the graduating class at Princeton habitu- l affects a beer jacket. Informal daytime wear at Dart- uth during the winter months is regulation ski clothes. A i at certain Western colleges the men may wear high- led boots, faded blue denims and cowboy hats. So have to plan your wardrobe for the section and the ol you're attending.

Choosing what to wear for a college freshman looks fusing but actually it can be simplified. There are cer- basic dress rules to remember, and there is a basic ege wardrobe. Most important to recognize is that days of the rah-rah college boy are gone. Today's ege man dresses in good taste, almost always with an door flavor. He rarely goes to extremes.

The campus man has, in the past decade, evolved a c "uniform," which is accepted all over the country e sport jacket and slacks combination. Freshmen and erclassmen wear it to and from classes, for campus nging, evenings with the boys and informal dances. More important dates require a worsted suit, and for ange-over, the college-favored Shetland-type suit cut a center vent in the jacket. And for those extra- ial occasions when the best girl comes out for Home- ming Week, a dinner jacket is essential.

Raincoats and waterproof poplin jackets are favored al attire, even when skies are sunny. For the colder ther, alpaca or shearling-lined gabardine topcoats, er long or short, are useful.

The most popular shirts are Oxfords with button- n collars, in white or solid colors. All collegians like yle socks, but solid-color lisle hose and wool and l combinations are also in favor. The most-worn kwear are foulards, in large or small patterns.

All this wearing apparel is basic—worn at colleges over the country. There are regional differences. In East, suit and coat jackets are cut straight, with natu- shoulders, while in the West shoulders are wider and bodies of jackets are tapered. Again, sections of the ntry influence fabrics. Wearing apparel is made ter in weight and color for use at Southern colleges. That gives you a general idea of what you're up against ou're going to college for the first time. Probably the t advice is to concentrate on the basic items initially, n as you get onto the local fashions you can build up mplete wardrobe. ★★★

Above, left to right, are a single-breasted corduroy jacket with notched lapels; a Stonecutter cord of similar cut, with coconut-straw hat and gabardine slacks; and a poplin jacket with a zipper front

on the table!

CARELESSNESS . . . THE CHILD KILLER

Continued from page 23

"swimmers" until they could meet the American Red Cross requirements for a swimmer; and then helped to meet those requirements. The Red Cross says that a swimmer should be able to swim three different strokes, each for a hundred yards, and to be able to swim continuously for ten minutes. In many cities an ARC Learn to Swim program is paying off in lowered drowning fatalities.

By the end of August the danger of death by drowning is over for most of the country. That cannot be said for the automobile, the largest single instrument of death for children. Last year 12 children were killed each day by automobiles. Some of these deaths were accompanied by screeching brakes, by the crumpling of streamlined cowling like old tin, and by the rocketing of bodies inside overturning cars. In one such car the coroner wasn't sure whether the little girl had had her neck broken by the impact of her head against the roof or by her father's body as he was thrown on top of her.

But most of the ones who were killed by automobiles were crossing or playing in the street, or riding bicycles. They raced across intersections without looking, went against light signals.

Most Accidents Occur in Playtime

Relatively few children were killed going to or from school. It was after school, when they were playing, and on Saturdays and Sundays. Then they poured in hordes from behind parked cars. They followed that bouncing ball off the curb without looking, and died.

Some escaped miraculously. A driver in a Middle Western state saw approaching motorists signal him frantically, blowing their horns, pointing at the front of his car. He stopped. On his front bumper, suspended by her dress and her tiny arms, he found a four-year-old. There wasn't a scratch on her. She was too frightened to say how she got hooked on the bumper. All she could say was, "I was after a loaf of bread for my mommy." That could be the pitiful epitaph of many children.

The growing popularity of bicycles has added another traffic hazard. Each year thousands of novice riders are turned loose on our streets with no training in riding or traffic regulations—nothing more than the admonition, "Be careful." The result: Over 300 happy, bike-riding kids between five and fourteen years old were killed in collisions with cars last year. Another 16,000 were injured.

Some of these deaths were caused by reckless automobile drivers. But most of them were caused by reckless kids zigzagging through traffic, cutting in front of cars, ignoring traffic signals. The best thing for a motorist to do when he sees a bicycle approaching is to slow down, stay as far away as possible, and to use the utmost caution in passing.

Behind every child death in a traffic accident lies the carelessness and negligence of adults—parents, drivers, teachers, the community as a whole. Yet there is hope and there is a way to reduce this horrible death toll. Pneumonia, polio, diphtheria, and meningitis are on the road to defeat as child killers. They are being defeated by tremendous, unceasing campaigns to arouse public consciousness of the need to wipe out these dread diseases, backed up by relentless scientific work.

The same methods can be applied to the problem of accidents to children. We're on the track when we realize that accidents don't "just happen," when we realize that carelessness, negligence and stupidity are killing America's children —not "accidents"—and that we can help prevent these unnecessary deaths.

Progress has been made. In 1918 children were being killed at a rate of 20,000 a year. Today that figure has dropped to 14,000—despite tremendous increases in the number of automobiles and the speeds at which they are operated, despite the infinitely greater number of electrical and mechanical machines to which children are exposed. Safety experts believe that with our accumulated knowledge and experience we are now able to reduce children's accidents drastically.

Next month the U.S. Children's Bureau, the American Academy of Pediatrics, the National Safety Council will join with Metropolitan Life Insurance in a major campaign against children's accidents.

It can be done. Some towns have been operating successful traffic accident prevention programs for years. St. Joseph, Missouri, for instance, has not had a

child killed going to or from school in 20 years. A major reason for this is a school safety patrol of 270 boys and girls, well trained and so well organized that they are on the job the day school opens. They are kept interested through incentives, like badges and movie treats, supplied by the St. Joseph Safety Council and by the Automobile Club. Last year the American Legion outfitted the safety patrol with raincoats and white helmets.

The driving public is reached through special leaflets—in the form of traffic violation tickets—left on parked cars, and through the press and radio. At the beginning of every year the kids are shown a traffic safety film and each teacher averages an hour of safety teaching a week throughout the year. "Our program is continuous," says Walter D. Ladd, manager of the St. Joseph Safety Council. "We long ago realized that is the only kind of program that will succeed because you are always getting new children, new parents and new drivers."

A unique feature of St. Joseph's program is its bicycle clinics, held at the schools. There, bikes are inspected, riders are tested and instructed. Once a week the police department holds "bicycle court" to deal with violators of bike safety rules. These children are given tickets, just like grownup violators. Last year 775 youngsters reported to the court. That they learn their safety lesson may be seen in that only four were repeaters!

The program reaches every person in St. Joseph. The results speak for th selves: no children killed in 1941, 1 one in 1943; none in 1944, 1945; on 1946; none in 1947; one, thus far, in 1

The problem of protecting childre a large, busy industrial city might s almost impossible. Yet in Kansas Ci sprawling packing-house center 600,000 people, fatalities among sc children have been cut 68 per cent. through parent education, the acci deaths of children under four have cut 55 per cent. Today, after a 10- fight by the Safety Council, Kansas kids are being taught to drive as pa their training in high school. This reduce Kansas City's fatalities still ther. Altogether, over 75 children alive today because of Kansas City's gram.

Oklahoma City is another big in trial town which has done an outstan job in licking the problem of fatal b accidents. Most of the country cont to kill bike riders at a rate of 320 a Oklahoma City has 13,000 bikes and 000 cars—yet it is passing throug seventh consecutive year without a fatality!

It began early one day in August, Chief of Police Frank Smith answer accident call—a teen-age bike rider dead. The next day he answered an accident call on the other side of t There the chief found a ten-year-ol cyclist had been killed.

What the Records Revealed

Two kids on consecutive days wer much for Chief Smith. Back at h quarters he called for the records o cycle accidents. He discovered tha bike riders were killed the year befo 1940; three in 1939; two more in two more in 1937—two; two. Tha the basic pattern: two bike riders yearly.

The chief summoned his traffic and announced that this bicycle-k business had to stop—before two kids were killed! For five years b this, Oklahoma City had had a dinance requiring bicycle registratio spection and tagging. It had virt ended theft. Now Chief Smith call the firemen and policemen who di registration work. He explained the paign to end bike deaths, loaded with safety material, and sent ther to talk with each individual b owner.

In his traffic department Chief had a famous barbershop quarte Flatfoot Four, winners of the 194 tional championship. He gave th bike for safety demonstrations ar structions to sing a song of safety ery kid in Oklahoma City. The kids it, learned the safety songs—and ticed safety. The schools, parent-te associations, civic clubs, radio and picked it up and joined the effort t the lives of two children a year.

The program has never let up Oklahoma City hasn't had a child in a bicycle accident since it began year Oklahoma City was judged a ing the best traffic safety program class, was co-winner of the grand in the National Traffic Safety Cont

KANSAS STAGGERS TO THE POLLS

Continued from page 13

have their law and the Wets have their highballs. Kansas is surrounded by wet territory, although Oklahoma makes a stab at being dry. So far as the liquor traffic into Kansas is concerned, it's downhill all the way.

Most of the liquor flowing into Kansas comes from Missouri, but Nebraska, Louisiana, Colorado and Illinois, in that order, also contribute to what has been estimated as an annual $50,000,000 business. This estimate may be high, but there has been enough illegal liquor consumed in Kansas in recent years to produce at least 275 alcoholics, according to Alcoholics Anonymous. In Wichita alone, since 1934, more than 2,000 persons have been arrested for driving under the influence of exploding strawberry sodas.

Public Indignation Is Generous

Occasionally the police get fussy and arrest someone on his way home from Kansas City, Mo., with a "strip" for private consumption. (A "strip" is the technical designation for six pints or four "fifths.") This does not happen often, of course, but when it does, anguish spreads all over Kansas. Several months ago, an ex-G.I. had the bad luck to have his car confiscated, after a skirmish with police over four or five bottles of Christmas cheer he was hurrying home. His shocked fellow citizens promptly raised $1,500 by public subscription to help him buy a new car.

Although Mississippi and Oklahoma are dry, Kansas is the only one of the three states that has enlisted the aid of the Alcohol Tax Unit of the Bureau of Internal Revenue in its drive against professional whisky runners.

The longest tailing job performed by federal agents in recent memory involved several truckloads of Kansas-bound liquor that originated in Peoria, Illinois, not long ago. A.T.U. agents, tipped off by the bootlegger's Number One enemy (a rival bootlegger), patiently followed the liquor caravan through Wisconsin and Minnesota, into South Dakota, thence across Nebraska, and finally into Kansas. And there the startled drivers were arrested as they crossed the state line.

Although it has had other and even greater moments of success in intercepting illegal liquor shipments, the A.T.U. works under some formidable handicaps, among them the fact that it has no appropriation for automobiles even though its job is chasing bootleggers. To keep mobile, it must use confiscated automobiles. Kansas is obviously good hunting for the car-hungry A.T.U., and at the last count it had confiscated 545 cars in the state from persons guilty of transporting liquor illegally.

In Kansas, as elsewhere, an important prerequisite to comfortable drinking is peace of mind. Until recently, the A.T.U. notwithstanding, Kansans found no very great distractions in their quest for the fermented grape. Gaudy night clubs sold liquor openly. The bootlegging racket flourished. In general it was no harder to find a drink in Kansas than to get a sunburn in a summer wheatfield.

However, about two years ago, thirsty Kansans suffered a painful self-inflicted wound. They elected Mr. Edward F. Arn attorney general.

On the face of it, this was not a particularly reckless thing to do. Arn, a husky, affable young man just past forty, was a Navy veteran of the famous Task Force 58. While a moderate, he confessed that he enjoyed an occasional nip from the old goatskin himself.

When the votes were counted, however, Kansans were treated to an astonishing spectacle. There was the De leveled off in full flight, with the r attorney general in grim pursuit. W was worse, the attorney general seen to be gaining. He resigned from the peka Country Club because liquor wa evidence there, and even asked his frie not to serve liquor in his presence cause it compromised his principles.

He held innumerable conferences w law enforcement officials. A less de mined man would have let it go at t but Arn then did an unheard-of th He asked the state legislature for m investigators, inasmuch as his office side-wheeling along with only one lonely gentleman who was expected glehandedly to ferret out the bootleg in 105 Kansas counties.

"Ed," asked one of the members the Senate committee hearing Arn, " gonna use these men as liquor invest tors?"

"You're darn' right I am," snapped.

The senators fidgeted uncomforta Finally, in a burst of legislative whim they proposed that the investiga sought by Arn should be qualified yers willing to live on a salary of $2 a year. Arn roared like a bull at the gestion, and the senators subsided deep thought again. Eventually, by of compromise, they awarded Arn additional investigators at something proaching a living wage, thereby rai his field command to a magnificent t of three. This lonesome trio is now trolling the 80,000 square miles that c prise Kansas, trying vainly to enf the prohibition law.

Nevertheless, Arn's sudden onsla has thrown Kansas into consider confusion. While liquor is still eas get, the night clubs have curbed flagrant selling and one or two boo gers are even in jail.

Two prominent churchmen, or Catholic and the other a Protestant, advocated that Kansas would do to go wet and get it over with. A nur of prominent businessmen, who he fore have demonstrated an almost pa logical reluctance to stand up an counted when the liquor question w issue, have formed the Kansas L Control Council to fight for repeal.

Bootleggers Like the Dry Law

On the other hand, dry leaders complained that Arn's crusade is in ger of enforcing the dry laws righ of the books, and if this should ha it would be a pretty kettle of fish in —from the standpoint of Kansas l The bootleggers are also on the si the Drys. Not long ago a purvey spirits across the line in Colorado reported to have become down panic-stricken at the thought of K going legally wet. The result was he donated $25.000 to help keep it d

Arn, of course, is not so witless assume that he and his fiddlers thre a match for Kansas bootleggers. B is pretty sure he can make Kansan cide whether they want to abide b law and endure an occasional dry or change the law and live happily after. Arn is appealing to their p as well as their reason, and it is o question of time before they reac way or another. Posterity will the results of this sly campaign in vember.

Meanwhile, the bootleggers are ing on in the best traditions of the se

ho had been delegated to take care n.

e devices to which Kansas bootleg- esort distress the police. Many of ootleggers carry their merchandise ed to their waists and operate from corners. Others set up shop in au- iles parked outside night clubs. thers deliver by motorcycle. At the nt, most bootleggers do not con- it prudent to set up too permanent dquarters, what with the attorney l running wild. The favored ar- ment is to post a man at a telephone where to act as clearing agent. He all orders and passes them on to the t men when they call in. Thus, is no liquor to be found at the nerve of the operation.

ch of the "professional" liquor g into Kansas comes in on trucks ng false manifests, although fast s with oversize springs and a turtle- capacity of several dozen cases are occasionally. Bootleggers have l, however, that a coupé with that of a load in the back sags like a duck and is approximately as easy tch, so the trend is away from this f transport.

ually, the hot cargoes are parceled the local bootleggers at a rendez- somewhere in the quiet country- Haulers never let local distributors when or where they are coming, ar the latter will suffer last-minute of remorse and tip off the police. rtheless, police get most of their mation from disgruntled bootleg- who have been victimized in price or have suffered other indignities at ands of unprincipled competitors. e information police have on boot- g activities would fill a law-school ry. And yet there are compara- few arrests and even fewer ctions.

This naturally poses the ever-defiant question: Why?

Many Kansans, of course, are positive that the cops are in the pay of the racketeers, and there is no doubt that some racket money finds its way into strange bank accounts. The main reason, however, is even simpler: It is impossible to enforce a law if the people don't want it enforced, and at the last reading no vigilante committees had been formed by outraged citizens to run the bootleggers out of Kansas.

Court docket entries occasionally refer to a case made against an automobile or a truck when the vehicle has been abandoned with a load of liquor. The last case of this kind was brought in February when a small truck and 332 pints of whisky were named as respondents.

Generally, however, the victim—if there is a victim—is a human being, and the penalty for a first offense usually is $100 and thirty days in jail. Once in a great while, if the bootlegger has been particularly offensive, he will get the book. Not long ago, in Topeka, one gentleman was put away for thirty years as a persistent violator. This sort of thing, however, is extremely rare.

For convictions on liquor violations, county attorneys are rewarded with a fee of $25. It follows that an eager county attorney can compile a sizable bank account in the two years he is in office if he wants to put the pressure on.

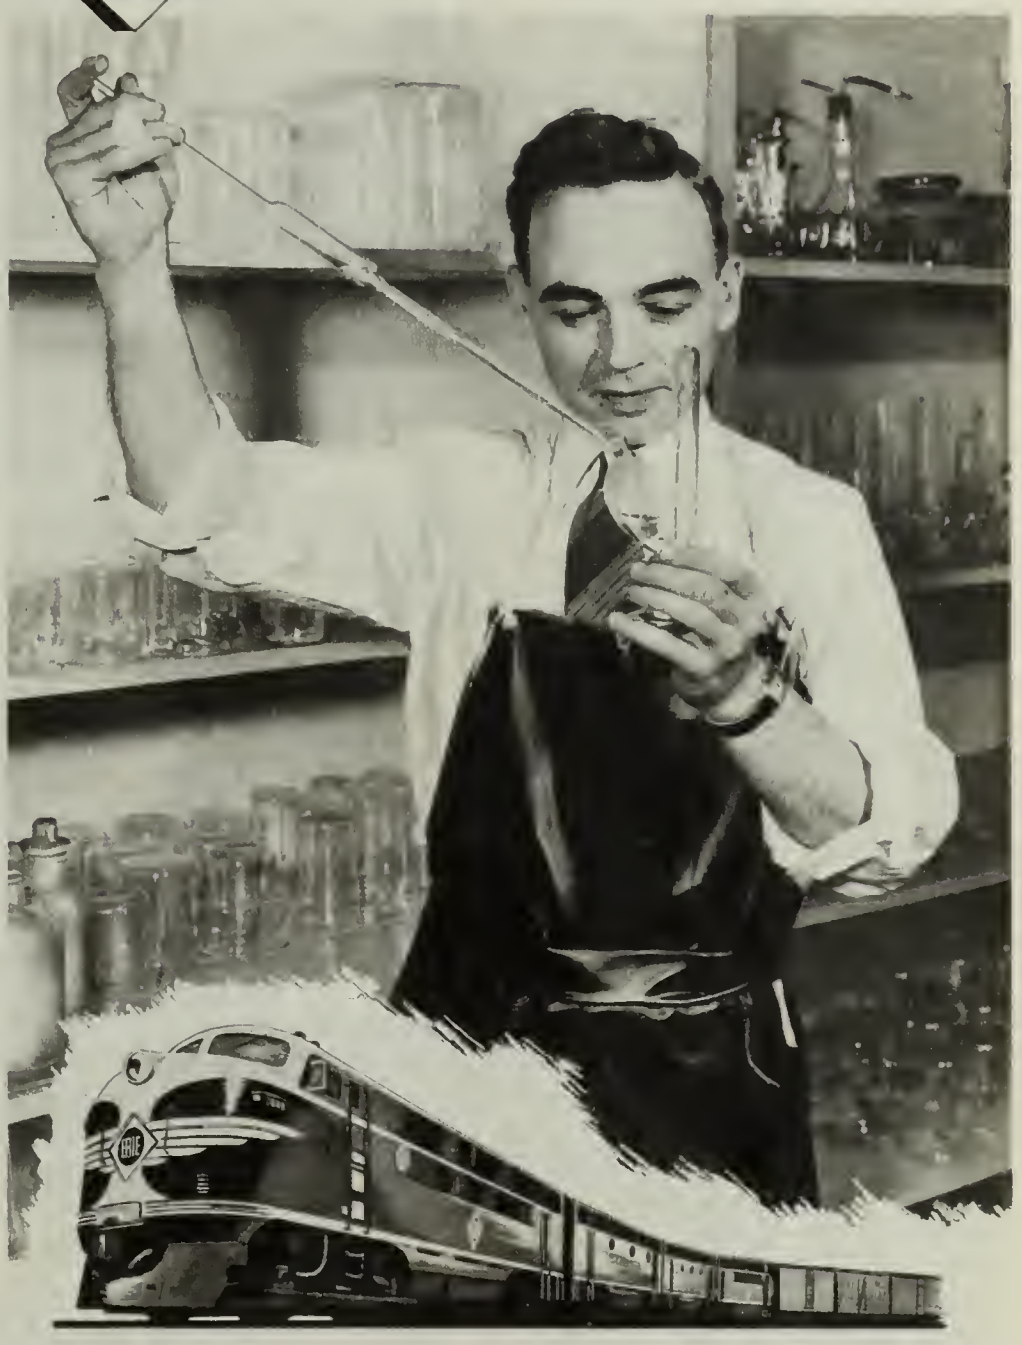
A Dilemma for Prosecutors

Mere possession of liquor is against the law in Kansas and a great many adult Kansans are guilty. But there are complications working against the county attorney. The chief one is that he is inviting trouble if he goes around raiding private homes. If he wants to be re-elected to political office—and presumably he does—he will be smart and go with the political winds.

In dealing with bootleggers proof of possession of intoxicating beverages is difficult to establish. Bootleggers go to great pains to disassociate themselves from the actual whisky. Many of them subsidize otherwise innocent families and leave their whisky with them, in return for which they pay the family's rent. One Topeka bootlegger lowered his contraband down stovepipes sunk into a plot of ground next door. He sat on his back steps and laughed until his sides hurt when the police tried to prove that the liquor belonged to him.

Some time ago, also in Topeka, a photographer embarrassed city officials by snapping a picture from the mayor's window. It showed a prominent bootlegging establishment across the way from the city hall. Topeka police felt that this was not sporting since enforcement of the prohibition law is virtually impossible anywhere in Kansas. But since the mayor's dignity had been considerably impaired they set out to get their man.

It was quite a task. The bootlegger, demonstrating commendable foresight, had set up operations in a room at the top of a narrow stairway, buttressed with an iron door. The police couldn't get leverage enough to batter the door down, and every time the man opened it after repeated pounding by the police, there was the smell of disinfectant, a pile of broken bottles, and no whisky.



The battle went on for weeks with the same monotonous results. Finally, a short time ago, the bootlegger packed up and left, taking his iron door with him.

"I guess," the sheriff said later, "we just pestered him out of there. I remember another case where a bootlegger went bankrupt replacing doors I knocked in."

In any case, the view from the mayor's office in Topeka is now purged of this discommodity. It is a small step but a firm one.

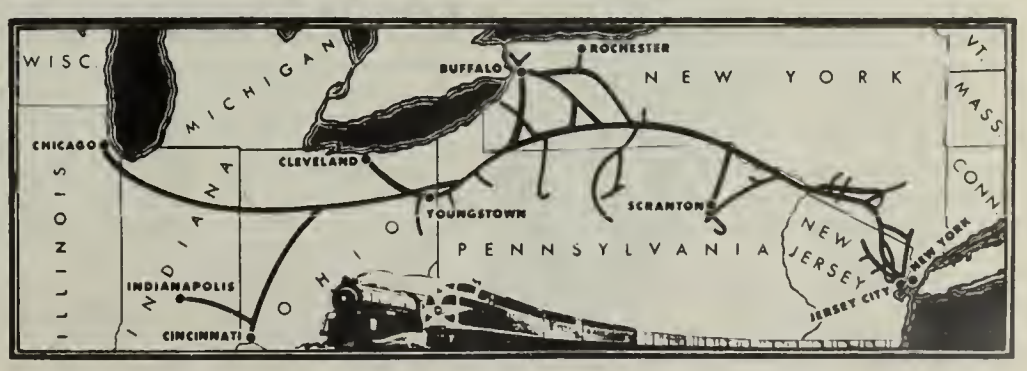
THE END

ERIE . . . Mark of PROGRESS in Railroading

How pure is pure water?

EVEN drinking water isn't pure enough chemically to meet Erie's standards for Diesel locomotive use.

Big engine radiators, and heating and air-conditioning systems for passenger trains must have water free from corrosive and scale forming elements. To get pure enough water, three large purification plants are operated by the Erie. Here impurities are removed at the rate of about 6 lbs. of solid matter per 1000 gallons.



Electronic analyzers constantly check the processed water. Other tests are made frequently by plant operators and traveling chemists as additional checks to insure purity.

This is but one example of laboratory control carried on by the Erie.

Examinations of materials now used and research to discover even better methods and equipment are constantly under way. Such a program is typical of *progress in railroading* — progress for continued improvement of transportation.

Serving the Heart of Industrial America

THE SECRET PAPERS OF HARRY L. HOPKINS

Continued from page 18

planning be started at once with a view to establishing bases for upward of 1,000 U.S. heavy bombers in the Siberian Maritime Provinces for an air offensive against Japan.

3) Requests for the exchange of information and for further preliminary planning for eventual operations against Japan. In this memorandum Roosevelt said:

Specifically, I have in mind the following items:

a. We would be glad to receive combat intelligence information concerning Japan.

b. Considering that the ports for your Far Eastern submarine and destroyer force might be threatened seriously by land or air attack, do you feel it desirable that the United States should expand base facilities sufficiently to provide for these forces in U.S. bases?

c. What direct or indirect assistance would you be able to give in the event of a U.S. attack against the northern Kuriles?

d. Could you indicate what ports, if any, our forces could use, and could you furnish data on these ports in regard to their naval use as well as port capacities for dispatch of cargo?

Stalin promised to study these documents. (He later agreed to the shuttle bombing not only from bases in the United Kingdom but from Italy as well; he explained that he must defer consideration of the requests relative to the Far East until after his return to Moscow.)

Plans for Future World Peace

Roosevelt asked Stalin if he cared to discuss the future peace of the world and Stalin said there was nothing to prevent them from discussing anything they pleased.

Roosevelt then gave Stalin an outline of his concept of an organization, based on the United Nations for the preservation of world peace. It was to consist of three main bodies:

First—an Assembly composed of all members of the United Nations which would meet in various places at stated times for the discussion of world problems and the making of recommendations for their solution. Stalin asked if this Assembly was to be world-wide in scope, or merely European, and Roosevelt said it should be world-wide.

Second—an Executive Committee which would consist of Russia, Britain, the United States and China, together with representatives of two European nations, one South American, one Middle Eastern, one Far Eastern and one British Dominion. This Executive Committee would deal with all nonmilitary questions—such as economy, food, health, etc.

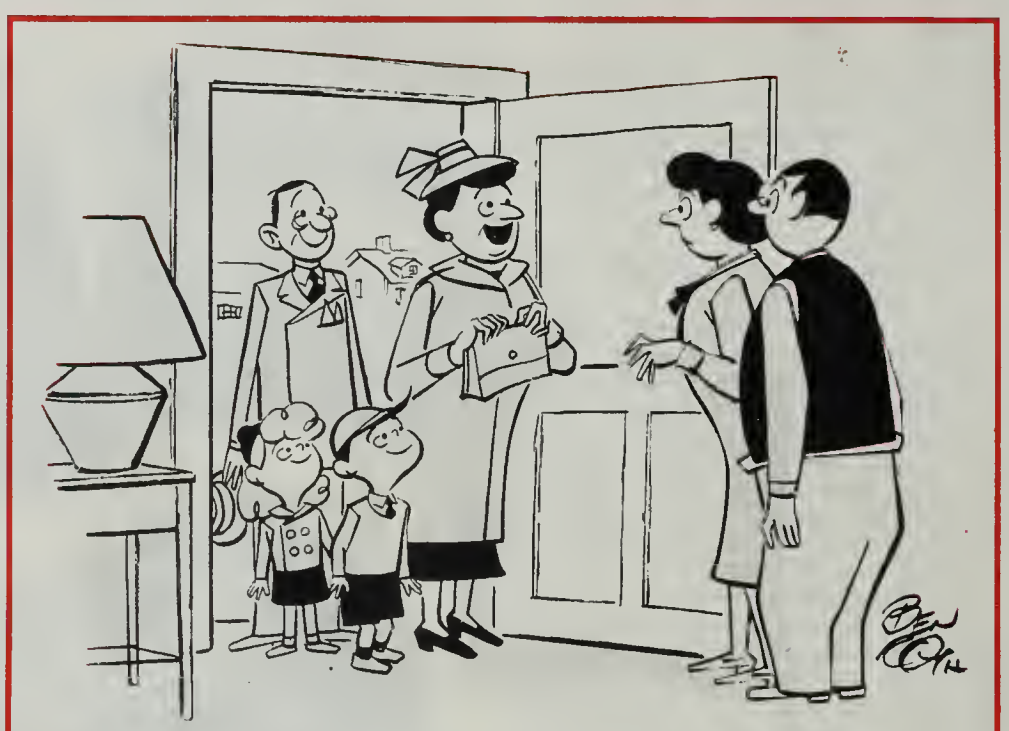
Stalin asked whether this committee would have the right to make decisions which would be binding on all the nations.

Roosevelt was indecisive in his answer to that one. He did not believe that the Congress would permit the United States to be bound by the decision of such a body. He said that the committee could make recommendations for settling disputes with the hope that the nations concerned would be guided thereby.

The third body, as set forth by Roosevelt, was what he termed "The Four Policemen"—the U.S.S.R., the U.S., the United Kingdom and China. This, as its name implied, would be the enforcing agency—with power to deal immediately with any threat to the peace or any sudden emergency. He cited the Italian attack on Ethiopia in 1935 as an example of the failure of the League of Nations to deal promptly and forcibly with an act of aggression. He said that had The Four Policemen existed at that time it would have been possible to close the Suez Canal and thereby prevent Mussolini from attacking Ethiopia.

Stalin expressed the opinion that this proposal for The Four Policemen would not be favorably received by the small nations of Europe. For one thing, he did not believe that China would be very powerful when the war ended—and, even if it were, European states would resent having China as an enforcement authority for themselves. He therefore suggested, as an alternative, that there be one committee for Europe and one for the Far East—the European committee to consist of Britain, Russia, the United States and possibly one other European nation.

Roosevelt said that this suggestion was somewhat similar to one made by Mr. Churchill for regional committees, one for Europe, one for the Far East, and one for the Americas. Again the President doubted that the Congress would agree to American participation in a purely European committee which might be able to compel the involvement of American troops in a European conflict. He said that only a crisis such as the present one could make the Congress agree to such a step—that it would not have been possible to send American troops to Europe in this war had it not been for the Japanese attack on Pearl Harbor.



Stalin said that if the President's suggestion for a world organization were carried out—particularly The Four Policemen part of it—this might require sending American troops overseas.

Roosevelt explained that he had only foreseen the sending of American naval and air forces to Europe and that any land armies needed in the event of a future threat would have to be provided by Britain and the Soviet Union.

He saw two possible kinds of threat—one minor, and one major—to world peace. The minor threat might arise from a revolution or civil war in a small country, or the kind of border disputes that sometimes arise between small neighboring states. This could be met by application of the quarantine method, the closing of limited frontiers and the imposition of embargoes.

The major threat would be provided by a gesture of aggression on the part of a large power; in this case The Four Policemen would send an ultimatum to the threatening nation and, if the demands were not immediately met, they would subject that nation to bombardment, and if necessary, invasion. (There is no indication that Roosevelt suggested what the procedure would be in case the aggressive nation happened to be one of The Four Policemen.)

Stalin then talked of the immediate problem of the future treatment of Germany. He said that he had discussed the question on the previous day with Mr. Churchill and considered that the Prime Minister was too hopeful in assuming that Germany could not rise again. It was Stalin's belief that Germany would be able to recover its power completely within fifteen or twenty years unless forcibly prevented from doing so, and therefore there must be more certain safeguards than those provided by the type of organization which the President had proposed.

COLLIER'S

"The children wanted to go to the zoo, but we told them they'd have just as much fun over here!"

BEN ROTH

Stalin said that the only way to provide insurance against another career of aggression by Germany was to gain and maintain United Nations control of physical strong points within Germany and along the borders of Germany and at strategic bases outside Germany. He mentioned Dakar specifically as one of such bases. He applied the same rules to the future containment of Japan, naming the islands in the vicinity of Japan as essential bases for the prevention of further aggression.

Peace Authority Must Be Strong

Stalin said that any organization or committee that might be set up for the preservation of peace must have the power not only to make decisions in times of emergency but to have continued occupation of the necessary bases against Germany and Japan.

Roosevelt observed that his agreement with Marshal Stalin on this was one hundred per cent. He said that although he was fully cognizant of the present weakness of China, he had insisted that the Chinese must participate in the four-power declaration at Moscow because he was thinking far into the future and believed that it was better to have the 400 million people of China as friends rather than as possible enemies.

There was then some discussion of the ability of the Germans to convert apparently peaceable industries secretly to wartime purposes. Stalin said that

Germans had shown great skill in s
deception, but Roosevelt believed tha
the world organization were sufficie
strong and effective it could detect s
tendencies and nip them in the bud.

It was now three thirty, and Stalin
Roosevelt moved over to the large c
ference room of the Russian emb
where Churchill, acting on behalf
King George VI, presented to the r
shal the "Sword of Stalingrad."

Stalin Asks the Vital Question

Following this impressive cerem
the 28 participants in the conference
down at the large round table and
to work on the Second Plenary Sess
It started with a review of the mor
staff session by Brooke, Marshall
Voroshilov, and then Stalin fired the
question:

"Who will command OVERLOR

Roosevelt replied that this had no
been decided. Stalin thereupon ma
clear that until a supreme comma
were named he could not believe in
reality of the operation. Roosevelt
have been sorely tempted at that mor
to name General Marshall as supr
commander and have done with it,
he did not do so, for reasons known
to himself. He said that the deci
taken at this conference would affec
choice of the particular officer, and
probably meant that he would ap
Marshall only if the command inv
all of western and southern Europ
stead of OVERLORD alone.

Churchill then launched forth
lengthy statement along familiar
He ranged from the Channel to sou

treme amiability prevailed through-

"Well, remember, he'll be your dog and you'll have to take care of him"

out lunch and a short plenary session in the afternoon and at dinner that evening (this was Churchill's sixty-ninth birthday party; Roosevelt's gift to him was a Kashan bowl which he had purchased that day at the local American Army PX).

During lunch the extremely important question of Russia's need for warm-water ports was brought up by Churchill, who said that his government not only recognized the legitimacy of this requirement but also hoped to see Russian fleets, both naval and merchant, on all the seas.

It was Roosevelt who mentioned the possibility that Russia might have access to the port of Dairen in Manchuria—and he did so for the first time here, at Teheran, and not at Yalta (when, according to legend, he was so enfeebled as to be *non compos mentis*). Stalin immediately expressed the opinion that the Chinese would object to this proposal, but Roosevelt said he thought they would agree to having Dairen made a free port under international guarantee.

It is my understanding that Roosevelt was not merely guessing about this—that he had, in fact, discussed this very point with Chiang Kai-shek in Cairo a few days previously.

While Stalin, Churchill and Roosevelt were having lunch that day, Eden, Molotov and Hopkins were meeting for lunch at the British legation. The main topics of conversation were the future United Nations strategic strong points about the world.

On the subject of strategic bases, Hopkins said:

"The location of these future strong points and what they will require in the way of land, sea and air forces will have to be worked out with a view as to who would be a potential future enemy. The President feels it essential to world peace that Russia, Great Britain and the United States work out this control question in a manner that will not start each of the three powers arming against the others.

"The question of building up bases in the Pacific should not be a difficult one. We Americans do not want sovereignty over any of the islands that are freed from the Japanese. The United Nations may exercise some sort of protective influence over them. As regards the Philippines, when they gain their independence we would still consider it advisable to have naval and air bases there under United States rather than United Nations control."

At the dinner that Tuesday evening, Churchill, proposing a toast to Stalin, said that the marshal was worthy to stand with the mightiest figures of Russian history and merited the title of "Stalin the Great."

In reply Marshal Stalin said that the honors which had been paid to him really belonged to the Russian people; that it was easy to be a hero or a great leader, if one had to do with people such as the Russians . . . He said that even persons of medium courage and even cowards became heroes in Russia. Those who do not, he said, are killed.

It was at this dinner that Stalin made his frequently quoted statement that without American production, the war would have been lost.

The Prime Minister Laughed, Too

Hopkins also made an after-dinner speech at Teheran, telling the Russians that he had made a long and thorough study of the British constitution, which is unwritten, and of the War Cabinet, whose authority and composition are not specifically defined. He said that as a result of this study he had learned that "the provisions of the British constitution and the powers of the War Cabinet are just whatever Winston Churchill wants them to be at any given moment." This observation was greeted with loud laughter, particularly from the Prime Minister himself.

At lunch on Wednesday, the final day, there was long discussion of the proposed meeting with the Turkish officials. Hopkins was firm in asserting that before any such meeting there must be detailed agreement as to exactly what form of military assistance should be promised the Turks if they were to enter the war. When Churchill mentioned the requirements for landing craft for an assault on the island of Rhodes in the month of March, Hopkins was so anxious to have the record straight that he wrote out his own version of his comments for inclusion in the minutes, as follows:

"Mr. Hopkins again pointed out that the United States Chief of Staff had not given consideration to the detailed requirements of the Turkish operation . . . It should be clearly understood that the American side believes that there are no landing craft available for an attack on Rhodes—and more important still that even if the landing craft were available, no decision has been reached as to whether or not the landing craft could not be used to better advantage in some other operation. Under any circumstances it should be clearly understood that no mention can be made to President Inonu, implied or otherwise, that an amphibious landing can be made on Rhodes."

During the afternoon, Roosevelt had a private talk with Stalin and Molotov for the purposes of putting them in possession of certain essential facts concerning American politics. It was a cause of wonderment to the President that the Russian leaders appeared to be so inadequately informed as to conditions in the United States or the character of public opinion. They had their full quota of diplomatic representatives and the members of numerous wartime missions to furnish intelligence.

It could only be assumed that, as was so often the case with the most extensive intelligence systems, Moscow believed and trusted those agents who reported what Moscow most wanted to hear—whereas those who sent in objective and sometimes discouraging reports which

approximated the truth were suspected of having been contaminated by their capitalistic environment and were transferred to less attractive posts. The Russians were not the only ones who erred in this respect: American representatives in Moscow whose reports were too favorable were suspected of having gone Communist, and the State Department was traditionally on the alert against any of its Foreign Service officers who displayed the slightest tendency to become pro-British.

Roosevelt felt it necessary to explain to Stalin that there were six or seven million Americans of Polish extraction, and others of Lithuanian, Latvian and Estonian origin, who had the same rights as anyone else and whose opinions must be respected. Stalin said that he understood this, but he subsequently suggested that some "propaganda work" should be done among these people.

Mapping a Dismembered Germany

Later, Churchill and Eden arrived for the final meeting. There was discussion of the division of the Italian fleet, on which agreement was immediate, and then one on the frontiers of Poland, in which Roosevelt did not take part; it ended with evolvement of a formula much like that which was eventually adopted. There was extensive discussion of the dismemberment of Germany. Roosevelt submitted a plan for five autonomous states: (1) Prussia (reduced), (2) Hannover and Northwest, (3) Saxony and Leipzig area, (4) Hesse-Darmstadt, Hesse-Cassel and the area south of the Rhine, (5) Bavaria, Baden and Württemberg—the Kiel Canal and Hamburg, and the Ruhr and the Saar, to be under United Nations control.

When Roosevelt offered this suggestion, Churchill exclaimed, "To use an American expression, the President has said a mouthful!" Churchill agreed that Prussia should be separated from the rest; he believed that the southern states should be detached to become part of a Danubian Confederation.

Stalin was not enthusiastic about either proposal, but said that of the t preferred Roosevelt's. He felt tha memberment meant dismembern that the Prussian officers and staffs s be eliminated but that otherwise h little difference between the peo one part of Germany and another. putting any parts of Germany i confederation, he said that, wh form it might take, if there were mans in it they would soon domi and the threat of a greater Ge would be revived.

He said that there would alway strong urge on the part of the Ge to unite and that the whole purp any international organization m to neutralize this tendency by ap economic and other measures incl if necessary, force. This discussion up nowhere; it was decided that th ject should be considered further European Advisory Commission i don.

COLLIER'S

OLDER THAN YOU THINK

BASEBALL—Credit for originating baseball is generally given to Abner Doubleday, who organized the first ball team more than a century ago. However, according to records in the New York Public Library, baseball was a popular game with children in England at least as far back as 1744. And it wasn't rounders or one old cat, either. A batter struck a ball and ran around the bases until he reached home, and the game was actually called baseball.

FOOTBALL—A London bibliophile owns a book printed in Florence, Italy, in 1580, which describes a ball-kicking game then popular. The rules given in the book closely resemble those of modern Rugby football.

BOXING—Archaeologists of the University of Pennsylvania Museum uncovered a Mesopotamian temple built 5,000 years ago and discovered a stone relief of two boxers. The athletes are shown standing on their toes, slugging it out, and their hands are covered with boxing gloves.

DICE—The Chicago Natural History Museum has on exhibit several pairs of dice which their scientists took from tombs of ancient Egyptians. Made of bone or soapstone, the antique dice are almost identical with modern ones in size, form and general appearance. But the honest archaeologists were horrified to discover that they were loaded to throw twos and fives most readily!

—W. E. Farbstein

te claims and requirements—such right of access to warm-water ports to be given full recognition, she prove tractable and co-operative ntaining the peace of the postwar

Suf- to say that during the talks Roose- requently betrayed a considerable nt of sympathy for the Turkish of view and even stated, on one on—and this is set forth in the sol- record—that it was quite under- able that these distinguished and le gentlemen should "not want to ght with their pants down."

he Strategic Picture Changes

ring the three days—Saturday, Sun- Monday, December 4–6—that the were in Cairo, conferences of tre- ous importance, immediate and nent, were being held by the Presi- Prime Minister and the Combined s of Staff. Roosevelt felt impelled ege on his own promise to Chiang ek, made ten days previously, that o powerful operations in southeast would go forward: Stalin's sudden oluntary statement at Teheran of a's intention to join in the war st Japan changed the whole stra- picture.

the same Sunday that Roosevelt this decision which exerted so con- able an effect on relations with —and perhaps on the whole course war not only in the Far East but in pe as well—he made the momentous on concerning the supreme com- for OVERLORD. He made it st the almost impassioned advice opkins and Stimson, against the known preference of both Stalin and Churchill, against his own proclaimed inclination to give to George Marshall the historic opportunity which he so greatly desired and so amply deserved.

Marshall has written me of this occasion:

"Harry Hopkins came to see me Saturday night (at Cairo) before dinner and told me the President was in some concern of mind over my appointment as supreme commander. I could not tell from the Hopkins' statement just what the President's point of view was and in my reply I merely endeavored to make it clear that I would go along wholeheartedly with whatever decision the President made. He need have no fears regarding my personal reaction . . .

"The next day the President had me call at his villa . . . I recalled saying that . . . the issue was too great for any personal feeling to be considered. I did not discuss the pros and cons of the matter. If I recall, the President stated in completing our conversation, 'I feel I could not sleep at night with you out of the country.'"

Roosevelt thereupon announced his selection of Eisenhower. It was one of the most difficult and one of the loneliest decisions he ever had to make. As events proved, not only in western Europe but in the whole superb direction of the war, it was surely one of the wisest.

From Cairo, Roosevelt flew back to Tunis, and, when he was met there by Eisenhower, said, "Well, Ike—you'd better start packing." Eisenhower at first thought that this meant confirmation of his assignment to Washington as Acting Chief of Staff.

On the subsequent flight to Malta and then to Sicily, Roosevelt talked at great length to Eisenhower about the prodigious difficulties that he would confront during the next few months at his new headquarters in London, where he would be surrounded by the majesty of the British government and the powerful personality of Winston Churchill, who still believed, in Roosevelt's opinion, that only through failure of a frontal attack across the Channel into France could the United Nations lose the war.

(Next week: The campaign known as Dewey vs. Fala. British-American Crisis over Greece.)

WHY IKE SAID NO

Continued from page 15

governors made the pilgrimage. They all said more or less the same thing: The times demanded a man of Eisenhower's great stature and popularity and he would therefore have to put aside his personal wishes and accept a draft. Eisenhower gave these callers no encouragement, pointing to what he had said in his letter.

One visitor was franker than the others. He came right out and said that he wanted the general at the head of the Democratic ticket because he knew that otherwise he would lose his own race. There was no kidding around about public duty and the call of honor.

"Thank God for one honest man," was Eisenhower's comment.

Opportunists and Idolaters

The entreaties and the pleas in behalf of duty and honor did not deceive him at all. The politicians wanted someone to come to their rescue. There were, of course, idolaters such as former Congressman Joseph E. Casey of Massachusetts who argued with the general out of deep and sincere conviction.

The earnest petitions from another source were considerably harder to answer. As Eisenhower's name crept into the political news again, thousands of veterans began to write to him. He has always believed in answering all his mail, but the volume became such that he could not cope with it. Partly, these were inspired letters from the left wing of the Democratic party which sought to use Eisenhower's name to remove Mr. Truman from consideration.

Aspects of the new Eisenhower boom were downright funny. Strong support for it came from Americans for Democratic Action, the liberal-labor group containing many of the surviving New Dealers. Labor leaders, including Philip Murray of the C.I.O., gave it their tacit support. Beside them were Southern diehards opposed to Mr. Truman because of his civil-rights program. It was surely the oddest combination that ever tried to get a band wagon in motion.

The liberal-labor crowd seemed to assume that Eisenhower's views on most subjects would coincide with their own. But when he talked about the highly controversial civil-rights program, the general made no effort to conceal his convictions. He held rather strongly to the State rights points of view. In his opinion any attempt to use the police power of the federal government to enforce an antilynch law would produce disastrous consequences. It would be an invasion of the right of the states.

There was no doubt about how Eisenhower stood on foreign policy. He believed in a responsible role in world affairs for the United States. This meant American aid for Europe. It meant an adequate military establishment with a temporary draft and universal military training. American strength, he said on several occasions, was essential to a stable and peaceful world.

As the Republican convention drew near, the consideration uppermost in the general's mind was that the convention might become deadlocked. And out of the deadlock might come victory for the nationalists and the isolationists in the party. Then he would not be able to take a detached and impartial view of the political scene. The future not merely of his own country but of western Europe and the whole concept of a free society would be threatened.

One morning he dropped in at the American Press Institute conducted by Columbia's School of Journalism. He sat silent while that veteran of so many political wars, James A. Farley, gave visiting editors his predictions of tics to come. In answer to a que from one of the editors, Farley said in his opinion Eisenhower could n drafted by the Democratic conve unless President Truman removed self from consideration. That, sai general afterward, was what he beli too.

Shortly after they moved int Morningside Drive, the large and r formidable official residence of Co bia's presidents, the Eisenhowers a television set installed. That set prolonged workout during the Rep can convention. All through the nig the nominating speeches the gener in front of the flickering screen. H until the very end when, before a most empty hall, a pitifully cont "demonstration" was put on for eral MacArthur.

The next day saw acceleration c Stop Dewey drive. The faster the D machine rolled, the more desperate the efforts of those who wanted to it to a standstill. The trouble was the candidates could not agree on ar to whom their combined strength be thrown. While it was never kno the crowds milling in the hotel lo nor to the thousands in the steamy vention hall, Eisenhower's name tossed into a really smoke-filled ro which the Stop Dewey forces sough a way out of their dilemma.

But the man in slacks and a sport seated before his television set about it. He knew it because the begun to make frantic efforts to touch with him, first by telephon then by emissary from Philade But Eisenhower resolutely refus talk with any Republican faction.

When Dewey had been nomi Eisenhower waited to see whom th vention would choose for Vice- dent. After Governor Warren's sele he felt that he could go out and golf, and he did just that. His pe choice was a Vandenberg-Stassen partly, of course, because of his ad tion for and close friendship wit senator. But the Dewey-Warren seemed to him to be adequate.

The Message That Wasn't Wri

What he would have done in the of victory by the nationalist-isola wing the general had not clearly mined. But he knew that such a tri would have made it impossible fo to stand aside from the political He had contemplated a statement might have been phrased like th will join with anyone who stands f principles of international co-opera believe in and who will oppose who seem determined to take our try back to isolation and unpre ness." Such a statement issued crucial period between the two co tions probably would have mea nomination of Eisenhower by the D crats.

What almost everyone refused lieve was that he really did not wa Presidential nomination of either Hardly was the Republican show boards before a Democratic boo going. There was nothing in the mysterious behind the clarion ca such oddly assorted figures as Go William Tuck of Virginia, former Frank Hague of New Jersey and Roosevelt of California.

On June 6th the Roper poll s that Eisenhower was the top cho voters in both parties over all othe didates. The general was pe aware of that and he laughed cynically about it when eager emi

eluctantly, through Columbia's pub-
relations office, Eisenhower again
ared that he "could not accept nomi-
on for any public office or participate in any partisan political contest." In writing his letter in January, he had debated long over whether "could not" or "would not" would be the stronger expression and he had decided finally in favor of "could not." This time, too, he sought to make his declaration as strong as possible and so he used "could not," meaning that it was impossible for him to accept.

Handicaps of a Military President

There had been no essential change in his thinking. On the positive side he hoped to use his influence entirely outside the sphere of politics. On the negative side he saw real handicaps for a military man in the White House in coming years. Tension with Russia is not likely to diminish. A military President might be inclined to lean over backward to avoid the appearance of imposing militarization. He would be under the suspicion of furthering the interests of the military. And thus he might fail to do all that was possible to keep the country in a state of preparedness.

For 36 hours after the statement was issued by Columbia University's public relations office, the general was happy in the belief that, as he put it, he was completely out of the woods on the most serious personal problem he had ever been called on to face. But then from several points in the country came friendly warnings that the boom had actually not been suppressed. Eisenhower was still vulnerable; and so he sent his letter to Senator Claude Pepper, saying that this time he "would not" accept nomination to any political office.

That was final. Yet there was a last gasp and a loud one. It was the continuous bellow of "We want Eisenhower" sent up by Marty Snyder, the general's former mess sergeant, outside the Bellevue-Stratford Hotel in Philadelphia. But inside the convention hall the chastened politicians had finally stopped pursuing their phantom candidate. The name of Eisenhower was not spoken during the proceedings.

As a political manifestation, the Eisenhower boom—or series of booms—made the general definitely unhappy. It seemed to him a sign of political weakness and atrophy. The attempt to draft a military hero was a confession that civilian leadership was lacking.

"There is no magic in any man or in any name," he said. "They are looking for some way out of problems that cannot be solved by magic."

THE END

"—And now we switch you to the Republican dinner at the Jefferson Hotel for an address by the Honorable—"

"President Truman will be introduced by the Honorable—"

COLLIER'S DAVE GERARD

Collier's believes...

...IN THE NEW ERA

FRANKLIN D. ROOSEVELT was never so dead as when the Democratic party deliberated, if that is the right word, at the Philadelphia Convention. The Democrats seemed to make a left turn because doubtless there was nowhere else for them to go. The cycle was completed. A new order impends.

Twenty years ago when Herbert C. Hoover routed the late Alfred E. Smith, many Democrats mourned that the Democratic party was extinct and that it could never be revived. Four years later, thanks to a dreadful depression and his own quick wits, Franklin Delano Roosevelt overwhelmed the recently triumphant Republicans. When the election returns were counted in November, 1932, longheaded observers with no stomach for any Roosevelt and few Democrats surmised that the Democrats were in to stay, for 16 to 20 years. They were prophets.

We are not now forecasting Harry S. Truman's defeat and Thomas E. Dewey's election. To publish such a judgment would be considered a partisan act. Collier's takes pride in avoiding partisanship. It is not partisanship, however, to point out that nothing that happened in either political convention at Philadelphia had much to do with anything closely associated with Franklin D. Roosevelt.

It is fair to say that despite frantic words and foolish boasts both parties outlined essentially conservative programs. The Democrats' great rift was over the civil-rights plank. The Republicans were out ahead with principles equally radical and at least as sincerely held. At Philadelphia, Southern opposition to President Truman's civil-rights proposals polled 263 votes. On that one principle, politically important especially in New York, New Jersey, Pennsylvania and Illinois with votes adding up to 268, although of course not unimportant elsewhere, the Democratic majority alienated the South.

We shall not hear the last of the civil-rights issue this year. Some Southerners will vote for Governor Dewey this year because they loathe President Truman's civil-rights program. That is one of the ironies of history.

Harry S. Truman is closer to the Southern tradition than is Thomas E. Dewey but that reality has not moderated Southern hostility to his position.

Rapid progress toward political and economic equality is now being made in the South and in the North, too, for that matter. The civil-rights amendments to the Constitution were adopted 80-odd years ago in the wake of the Civil War. Not even constitutions change men's customs, habits and ways of thought instantly, as we had the chance to learn when the Eighteenth Amendment made a rather ignoble experiment of prohibition. So equality in the political field and in the economic is not wholly accomplished. But we are moving and the very Southern states most hostile to President Truman's proposals have been conspicuous in the advance.

There are no essential differences between Republicans and Democrats on foreign policies. John Foster Dulles, Governor Dewey's adviser on foreign affairs, has been a collaborator with Secretary Marshall as he was with Secretary Byrnes, Secretary Stettinius and Secretary Hull. It is a happy circumstance that there are no divisions between the two parties. We have trouble enough trying to keep the peace with Russia without the confusion of differences of opinion among ourselves.

The sharp difference between Republicans and Democrats centers in their promises to labor. The Republicans stand by the Taft-Hartley law. The Democrats promise to repeal it. Actually it is unlikely that the Democrats will repeal it if they can and it is certain that the Republicans will modify it if amendments are clearly indicated by experience. Organized labor politically is opposed to the Taft-Hartley Act but members of labor unions favor most, if not all of the provisions of the law. So when any party comes to consider revision or repeal, very strong support for the essential provisions of the law will be provided both by labor and Democrats.

The great truth is that no political party is able to foresee in just what form the problems of the next four years will appear. So we shall have to do this year what we have generally done in the past. We shall decide between men rather than between widely opposed principles. Both Democrats and Republicans are Americans first and political partisans afterward. We can be very sure, howe that the issues of 1949 and thenceforth will no those which divided us in the 1930s or the 19 One era is dead and another era is beginning. won't find our new directions by looking b ward. . . .

..."SAVING" OFTEN MAKES WASTE: Exce from a wise speech delivered in Boston:

The employees should strive to make the earn of any business as large as possible. There can b greater mistake for the workingman than to restrict output of the individual. You must make the t earnings of the business . . . the largest possible . mean the aggregate fund available for paying w ingmen, capitalists and managers. Make this ag gate large and there will be plenty for all among wh it is to be divided. . . .

Any restriction upon the output of the individual duces the fund of profits available for distribution, sides demoralizing the man who is so restricted.

It follows also that differences in efficiency betw different individuals must be recognized and reward and that those who can work faster and better than others must not be retarded by the less efficient.

A limitation of the production of the individua pure waste. The business is merely rendered less pr able . . . Nor does the restriction of the output m more work for others. . . .

If you waste human effort you make the product more. If you raise prices without increasing inco you have simply limited the amount that will be bou You have not made more work for more people. have merely given people less for their money.

It's all true, all hard-boiled economic fact— all ignored or sought to be by-passed in many a bor organization today. And it was all said years ago—in February, 1905—by the late Louis Brandeis, great thinker, great jurist, and one of idols of many labor leaders and "liberals" n Wonder how these folks ever lost sight of that ticular Brandeis Boston speech.

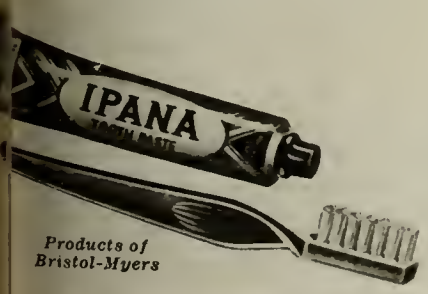
Even the Mickey Mouse balloon has a great big grin . . . when Pat and young Brucie spend an afternoon in the park. They're having a *wonderful* time . . . judging from their sparkling smiles! Smiles that Pat entrusts only to Ipana . . . because she knows that more dentists recommend and use Ipana than any other tooth paste (according to a recent nationwide survey). What's more, Ipana's exclusive formula actually stimulates gum circulation—and with gentle massage promotes the health of your gums!



g the pigeons ou Saturday morning hing Bruce really goes for. Every (evening, too!) the whole family Ipana's lively, refreshing flavor. na yourself . . . *you'll* love the way it our mouth fresher, your breath every time you use it!

Follow your dentist's advice about gum massage. Correct massage is so important to the health of your gums and the beauty of your smile that 9 out of 10 dentists recommend it regularly or in special cases, according to a recently completed national survey! *Help your dentist guard your smile of beauty.*

"Get set!" warns Bruce as the race starts. And the Buckalew family *is* all set, especially when it comes to sound dental care. For Pat knows that firm, healthy gums are important to sparkling teeth. If *your* gums flash a warning tinge of "pink," *see your dentist.* For home care, he may simply recommend "the helpful stimulation of Ipana and gentle massage."

Healthier gums, brighter teeth with Ipana and massage

P.S. For correct brushing, use the DOUBLE DUTY Tooth Brush with the *twist* in the handle. 1000 dentists helped design it!

THE WEEK'S MAIL

THE NUT THAT HOLDS THE STEERING WHEEL

THE EDITORS OF COLLIER'S: Re your editorial These Are the Worst Drivers (July 17th) I would like also to nominate for your "Hall of Infame" the truck driver who crawls up a hill at five miles an hour and then cuts loose down the other side; the goof who stops his car in the middle of a busy street while his wife "just pops in the store"; the jackass who tries to pass a string of cars ahead of him and, finding he can't, tries to get back into line; the guy who thinks the white line is put there so he can center his car on it; the other guy who follows you a foot or two behind your rear bumper; and the geni-ass who beats the stop light. I heartily endorse the old taxi driver's advice, "Drive as if everybody else was a damfool."

AUSTEN BOLAN, D. SC., Howells, N.

. . . The person who pulls to the middle of the road to turn right; the other car who pulls to the right-hand curb to turn left. M. R. FRANK, Akron, O.

. . . My candidates for bad drivers are not the slowpokes. How about the one who races you to a corner to make a right turn ahead of you?

R. C. WURTSMITH, Hermiston, O.

. . . I nominate (a) the yokel who zooms off a secondary road onto a first-class highway of heavy traffic, (b) the "Barney Oldfield" who doubles a hill on the same highway. PAUL H. FUQUA, Dallas, Tex.

. . . I'll nominate him who steps on the gas to keep us in our place when we wish to run around his snail-paced jalopy.

WALTER H. KELLEY, Altoona,

. . . I have witnessed several hundred accidents, either at the time, or within a few minutes. Not over a dozen could be blamed on the "snail drivers." Some were caused by blowouts, defective tie rods, spindle bolts, broken axles, etc. Blinding lights were the reason given for some. Defective brakes was another.

FRANK M. BOWERS, Kansas City,

. . . "Discourtesy" just about sums up the whole case against all reckless drivers.

E. G. LOUGHNER, Wilkinsburg,

. . . The male animal between the ages of 17 and 25 home from college on

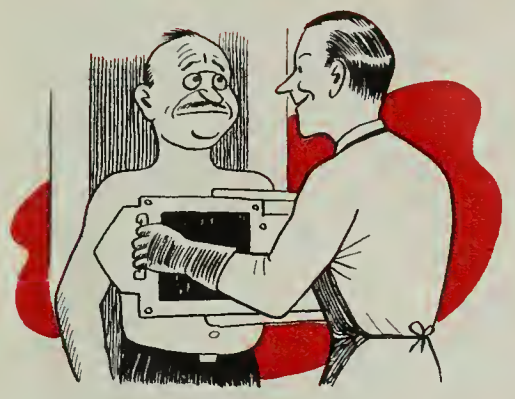
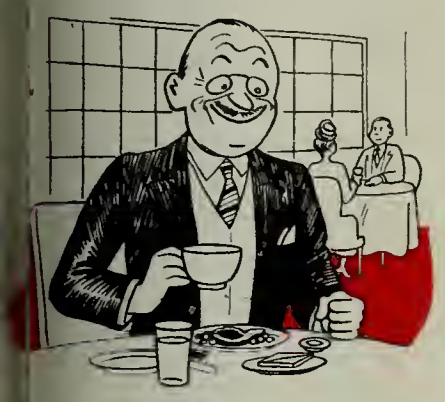
MEET A MAN WITH HIGH BLOOD PRESSURE

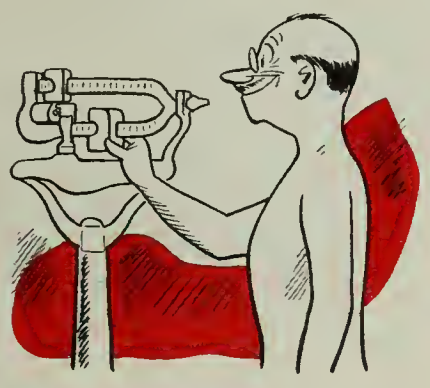


1. Everybody has blood pressure. It goes up every time your heart beats, down when your heart rests. The average *level* of your blood pressure goes up and down, too, depending on whether you are active or quiet, excited or calm.

e doctor discovered that the level s man's blood pressure stayed high of the time. He had high blood ure (hypertension).



3. His heart had to work harder to circulate his blood. This extra strain often enlarges the heart muscle. Arteries, brain and kidneys may also be affected.



4. However, after a complete medical examination, this man learned that, like most high blood pressure patients today, he could do a lot to help himself.

5. By taking his doctor's advice, he learned how to live with his ailment, to slow down at work and play, to get plenty of sleep and rest.

followed his doctor's instructions t diet, so that the food he ate t help his condition, and avoid ng an extra burden on his heart.

7. He brought his weight down to normal and kept it there. For blood pressure often rises and falls as weight goes up and down.

8. He learned to keep calm, to avoid worry and emotional strain, because nervous tension and hypertension often go hand in hand.

9. He sees his doctor for frequent check-ups. Under good medical care and with sensible living habits, he can look forward to many happy, useful years.

HOW MEDICAL SCIENCE COMBATS HIGH BLOOD PRESSURE

High blood pressure may clear up quickly ler a doctor's care. Sometimes, a period of e elapses before progress is made. There y be infections to eliminate, or the doctor y conclude that special diets, drugs or sur- y are needed.

Control of hypertension is easiest when it is covered early—and the surest way to do s is through periodic medical examinations. is is particularly important if you are middle- d or older, are overweight, or if there has r been high blood pressure in your family.

There is real hope that future advances of medical science will provide still more effective means of combating high blood pressure. Many continuing studies are being aided by the Life Insurance Medical Research Fund, supported by 148 Life Insurance Companies, which makes grants for special research in diseases of the heart and arteries, including high blood pressure.

For further helpful information about high blood pressure, send for your copy of Metropolitan's free booklet 108-C, "Your Heart."

THE NATIONAL JOY SMOKE

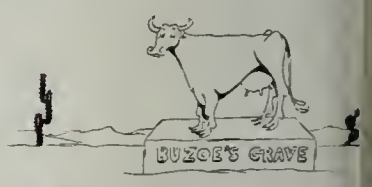
KEEP UP WITH THE WORL

BY FRELING FOSTER

Until a few years ago in the world's primitive-settlements, most of the motion pictures exhibited were not only very old but were also run at half speed to consume more time. Therefore, their numerous scratches and slow-moving figures created the impression among the natives that, in the land of the white man, it rained constantly and everyone was sick.

Perhaps the most spectacular drama presented on the American stage was The Miracle which played the Century Theatre in New York in 1924-1925 and then toured the country for four years. As the action took place in a cathedral with the audience as the congregation, the Century had to be changed into a Gothic edifice with pews, a great altar and stained-glass windows. This work took 11 months and cost, with the costumes for the 700 actors, over $500,000. So extensive was the show's equipment that, on the road, it required three weeks for installation and 204 freight cars for transportation.

Of the some 20 persons who attempted a death-defying stunt at Niagara Falls between 1859 and 1928, ten succeeded and lived. Two men passed through the rapids, one in a barrel and the other by swimming with a life preserver. Two men and one woman, Annie E. Taylor, went over the falls, one in a rubber ball and two in barrels. And four men and one woman, Maria Spelterini, walked and performed tricks on a 1,100-foot tightrope stretched from the American to the Canadian side 185 feet above the waters of the gorge.



Without knowing the origin or purpose of the custom, the inhabitants of a community on the Danish island of Jutland always bowed, until 15 years ago, to a white wall outside the door of their church when passing in and out. The mystery was solved by a Copenhagen historian who found, under the wall's coat of paint, a picture of the Madonna that had been obliterated soon after the Reformation. Thus, from habit alone, the people had continued to pay homage to the blank space for 12 generations.—*By Howard Lindsey, Ontario, Canada.*

One way a man's name may t tingly become a household wor lustrated by the case of Joe M Jestbook. Although this seriou lish actor was never known to w jest, his name was facetiously u the author of a collection of chea coarse witticisms, published a after his death in 1738. As a every corny joke has been refer as "a Joe Miller" for nearly tw turies.

As late as 1888, it was belie some persons in this country th could read and were amenable t gestions. In that year a man in wishing to get rid of the rodents basement, wrote them a lett placed it in one of their holes note not only asked them to but also thoughtfully recomme new home for them, at a certa dress down the street whe assured them they would find quarters and more food. And following day, according to his they actually did depart.

While accompanying a party veyors mapping the Gibson D Australia in 1876, Buzoe, the of the outfit, died and was where she fell. Feeling she was of the honor, her grieving marked the spot "Buzoe's Gra the chart they were making ar mained on maps of Australi lished as late as 1935.

Of the world's 163 rec breeds of purebred dogs, originated in the United Stat American foxhound, America spaniel, Amertoy, Boston Chesapeake Bay retriever, hound, spitz and Staffordshire Among the other breeds, 47 or in the British Isles, 23 in Fran Germany, eight in Italy, six ir and the remaining 54 in 25 oth tries.

PACK IT—washable, quick-drying nylon man's robe! So light it takes up little room—so long-wearing you'll be packing it for many trips to come! Because nylon can be "heat set," wrinkles and creases are no worry.

WORK WITH IT! In the water—out again—commercial laundry bags must be strong, light, extra long-wearing. And they are—made with nylon! Tough, elastic nylon fibers have a high tensile strength when wet, are unaffected by detergents.

WASH IT! Hang it up! Your nylon blouse is almost ready to wear again. For nylon is that fast-drying fiber! Needs oh so little ironing; can be set to hold its shape. Your blouse will keep its fresh, crisp and feminine look—wear and WEAR!

news about NYLON

it all started with a stocking

. . . a sheerer, lovelier, longer-wearing stocking than women had ever dreamed of!

Today you're choosing filmy nylon hose in fashion-right, costume-bright colors—sheer, resilient, surprisingly strong for their weight.

You're finding nylon nicer in sweaters, panties, slips, lace, gloves—you're benefiting from nylon's toughness and elasticity in countless industrial uses.

Du Pont makes the nylon fibers used in the products shown. The manufacturers of these products use nylon because nylon products can have these outstanding properties:

- √ STRENGTH
- √ LIGHTNESS
- √ ELASTICITY
- √ TOUGHNESS
- √ LONG WEAR
- √ EASY WASHING
- √ FAST DRYING
- √ FLAME RESISTANCE
- √ RESISTANCE TO MOTHS AND PERSPIRATION
- √ CAN BE "SET" TO HOLD SHAPE

THE Week's Work

Gordon Hillman want the theater, got then wanted to wr

AT SEVENTEEN, Gordon Malherbe Hillman was stage and movie struck. He didn't want to act—just sit rapturously in B-2 on the aisle forever. By some remarkable dispensation, at nineteen he found himself movie critic under the legendary H. T. (Hell-to-Pay) Parker on the Boston Transcript. "Then, for some reason not clear to me," says Mr. Hillman, "a couple of movie directors conceived the erroneous idea I'd be of assistance to them."

So Mr. Hillman did a turn in Hollywood—and disillusionment began to set in.

Returning to criticism (and sanity) again, Mr. Hillman got to know a lot of actors: another dream of seventeen come true. "But everyone knows what happens to people whose wishes come true," he says sadly. "I had wished to go to the theater constantly—and I did. Also to concert halls and the opera. I began to hate seats B-2 and B-4 on the aisle. I began to think Dorothy Parker had summed up the drama critic's life when she pithily wrote her whole life in one sentence: 'Baby Taking a Terrible Beating!' "

There was a gimmick, however. Fortunately Mr. Hillman had started writing stories between dream glances at Jeanne Eagels, and listening to Mr. Koussevitzky, Stravinsky *et al.* "Short stories got me out of B-2 and B-4," he says. "But there are shadows of actors I used to know in my story Broadway Doll (p. 18)."

Roald Dahl

ROALD DAHL, winner of this week's Star Story award (Collector's Item, p. 14), is a thirty-one-year-old English bachelor who lives on a farm between Oxford and London. Old MacDonald style, the farm contains one Jersey cow, 12 ducks, 16 greyhounds, two cairns, one long-haired dachsie, two canaries, one tame magpie and a ferret. The cow gives milk, the ducks lay eggs, the dogs catch rabbits, the canaries sing, the magpie steals and the ferret stinks.

Dahl is a one-man fiction factory, writes from 10 A.M. to 1 P.M. (blinds drawn and electric lights blazing), then from 8 P.M. to midnight. Afternoons he fusses with the greyhounds he has bred for rejection-slip days.

Dahl's ma and pa were Norwegian (he speaks the language fluently), and he was educated in England.

On leaving school at seventeen, Dahl went to Newfoundland, and walked, to his intense discomfort, the entire island from north to south with 110 pounds on his back. He was working in east Africa in '39 when the war came. Joining the R.A.F. fighter pilot, he fought in I Greece and Syria. Finally shot d he received a fractured ski smashed nose and spinal in These have necessitated two spinal operations—the last in '4

When he isn't working, he oc himself with books, model p gambling, fine music, fine pa and seems to get along fine.

RICHARD HARMEL'S Good News for Little W (p. 66) strikes right home. He h is married to a s shapely Little Woma should speak with a ity on fashions for things of five feet fiv under.

Mr. Harmel is a lander transplanted t York. The youngest yeoman before the w served five years i Navy, then willy found himself a fashi porter for both sexes the war. In time h came executive edit the stylish Glamour.

It was his investig as a style snoop that set Mr. H thinking of the problems of c for the pint-sized lovely. "Ther widespread ignorance among women when it came to kn about clothes especially design them," he reveals. "So I deci become a Moses in the wilderne lead the little ladies into the la glamour at no excessive cost."

WE ASKED Robert Zacks debuted in Collier's 18 n ago with a short short and now h fifth short short, The Unchain p. 62, how he did it. He repl and his charming wife Henna cooped up in thei New York apartmer rainy day, drearily ing of how nice vac were. Mr. Zacks her profile as she l through the window was immediately with the patience in i how little in a materi he'd given her in the years of marriage cad!).

Mr. and Mrs. Zacks

Whereupon Mr. says he searched his and Zang! the wri him screamed that a hung right before his nose. The Unchai the result, also a vacation wi proceeds, he reveals.

This week's cover: Cone of Co ment. The young man is G Stewart (Don) Brown, twelve, o Washington, D.C., and now Franciscan. Toni Frissell, a of the Browns, was in Wash making color shots of children. she got the picture. . . . TED SH

KO's PIC-TOUR OF THE MONTH

APPY HUDDLE. CARY GRANT, newcomer BETSY DRAKE and Director Don Hartman hold conference over script of RKO romantic omedy, based on Ladies' Home Journal serial, "Every Girl Should Be Married." FRANCHOT TONE and DIANA LYNN are also starred.

CAUTIOUS CARESS. Tough-guy DICK POWELL has his tender moments but JANE GREER isn't sure this is one of them. Scene from RKO's thundering *Station West* in which Dick plays a man with a mission, Jane a dance hall Queen who'd like to make him forget that mission.

OTHERN ACCENT. When "Judge" ALEXANDER KNOX wanders way from home in RKO's *The Judge Steps Out* everybody in town wonders why. ANN SOTHERN is the lovely lady involved in this very aucy tale of a man who dares do what most men only dream of doing.

NO MATCH for a savage with a knife is a guy with a gun pointed the wrong way. But ROBERT MITCHUM, here stalking hired killers in RKO's *Blood on The Moon*, has a sixth sense and uses it. Also starred in this lusty saga are BARBARA BEL GEDDES, ROBERT PRESTON.

Ann had given her solemn word that she would accompany Mrs. Ammerman to Europe. That was before she fell in love with a stubborn young man who was going the other way

BY LAURENCE CRITCHELL

I WAS painting in the park that day, she said, and you know how people always bother you when you paint in the park. Well, David came along and stood and watched me, only he didn't bother me, so after a while I looked up to see why.

He was a nice, clean-cut young man who wore a white shirt and a tie and a tweed coat, even though it was a warm day. He smiled at me, and he had just the right touch of shyness, as though afraid he might have embarrassed me. I liked the way he smiled, and I liked the even temper of his expression and the honesty of his eyes, but I was a little old-fashioned, having been brought up in a small town in Dutch Pennsylvania, so I said nothing. Besides, I was leaving the city at the end of the week and I didn't want any complications. I was going to Europe.

"That's good," he approved when I stepped back to look at what I had done.

"Thank you," I said, which was a difficult thing for me to say, because I wasn't at all sure that it was good.

I didn't know whether to fold up my easel and go away, so he'd understand that I wasn't painting just to make the acquaintance of strangers, or to finish what I had begun so that he'd go on talking to me. He had a very nice voice, quite low and humorous and sincere.

"I've always thought I'd like to be an artist," he said, sitting down on the grass. "Do you do it for a living?"

I pretended a vital concern with a very small part of the foreground of my painting, because inside of me there was a warning sensation of panic. "I used to work over there," I told him, waving a brush at the Corcoran Gallery on the other side of the mall. "But Friday was my last day. I'm going to Europe."

All he said was: "That's too bad." After a minute he got to his feet, and then I knew that I didn't want him to leave. "What do *you* do?" I asked.

"I'm a draftsman."

"But that's being an artist!" I objected, still paying very strict attention to the foreground of my canvas.

"Mechanical draftsmanship," he amended humorously. "The first requirement is a mathematical mind. The second requirement is *(Continued on page 68)*

"I'm stubborn," David said. "Sometimes I can't be reasoned with at all. I also enjoy an extra cup of coffee after supper. So you might just as well start the percolator now"

ILLUSTRATED BY BEN HUR BAZ

A Du Pont research team looks on as a test specimen is removed from a press which has transformed a white powder into a rigid solid. The next ep is to analyze its properties. Left to right are C. P. Anderson, Dr. William S. Calcott, Dr. Carl Irwin, Dr. Howard Parmelee and Dr. J. M. Hami

MIRACLES MADE TO ORDER

BY LESTER VELIE

Today's Thomas Edisons and George Westinghouses are teams of scientists and technicians. Through production-line methods they conjure brand-new materials out of the elements. Du Pont has more than 2,000 laboratory miracle makers

THE research boss whisked off his coat, yanked out and brandished his shirttail. It was a steaming summer day, and the shirt was clammy with perspiration.

"Look," he said, "no ugly creases." For all the heat, the cloth had resisted wrinkling, and the collar about the research man's wet neck was almost as smooth and fresh as if it had just come from the laundry.

"Last night," the research man said, "I rinsed this shirt in my bathroom sink. Been doing it for a year. This morning I put it on." He patted the silklike surface. "Needed only half the usual laundering. It's a traveling salesman's dream."

He itemized the fabric's other virtues: It won't weaken or become brittle in sunlight and it is so strong you can make awnings of it. Mold abhors it.

Still unnamed and in the testing stage, it is the latest miracle to issue from the laboratories of E. I. du Pont de Nemours & Company, Inc., which has a system for creating miracles

There is nothing secret about the system; it is simply research through teams who replace the lone Thomas Edisons and George Westingho es just as production-line workers ve replaced the lone worker. As Ai ri can as mass production, teamwor re search pays off with bull's-eyes— e products custom-built to suit sp ifi needs.

Du Pont's lab teams are mad u of 1,800 scientists plus a larger m ber of technicians. These range om test-tube watchers to men of g n who make the inspired guesses ha lead to a nylon or a neoprene. Sc eg ularly do these teams produce i u trial miracles that one third o D Pont sales today consist of pro ic that didn't exist or weren't made n commercial scale ten years ago.

Du Pont's teams chalked up th ir general purpose man-made ru be They found a way to mass-pr uce tetraethyl lead, thus making po b the high-octane gasolines that h pe London turn back the *Luft* ft They concocted a rat poison so p that one pound could kill 200,0 the pests. ext morning when he looked for
ats they were gone. They had es-
d from a room in which the win-
s and doors were locked! Calcott
realized he had reached the next to the last step in his progress toward death by lead poisoning—hallucinations

He knew then that his biggest problem was how to keep himself and his team alive. Twenty-five researchers came down with lead poisoning and were taken off the job. Each morning the men were asked: "How did you sleep last night?" Tossers and dreamers were summarily benched.

Calcott, nauseated and staggering, hung on. If the leader quit, everybody would quit. A hood was developed to shield the men from the lead ethyl vapors, with powerful fans to draw the vapors off. When the lead ethyl seeped through rubber gloves, a special research team tackled that problem and, after a month, came up with a lead ethyl-resistant glove. Other new safety measures were adopted.

Averting Danger of Explosion

To make a sodium-lead alloy without starting a fire, researchers introduced the sodium to the lead in a nitrogen-filled container. Then, through weeks of mathematical figuring and experiment, the team found the precise slow-motion timing for introducing ethyl chloride to sodium-lead alloy without causing an explosion. This was done in a unique autoclave (a container for reacting chemicals) equipped with a rotating shaft studded with blades like quills on a porcupine. This autoclave put on a continuous pyrotechnic display. Accumulating gases built up pressure against a safety vent and escaped through the plant chimney with a glorious burst of blue flame. All hands in the big Jackson Laboratory would rush outdoors, when the flames started, to watch the fireworks.

It took nine months of round-the-clock laboratory and pilot-plant research to tame lead ethyl. Even so, six men died of lead poisoning when mass production started in 1923. There have been no deaths or serious poisoning cases since. Frequent medical check-ups and almost complete automatic operation have taken care of that. Incidentally, there's less than a teaspoonful of lead ethyl per gallon of ethyl gasoline, and the public never comes in contact with lead ethyl.

Mass production of lead ethyl was a made-to-order miracle. But sometimes miracles pop by accident.

In 1925, Du Pont researchers hunting new dye chemicals concocted a compound known as alpha-naphthylthiourea. A flop in dyemaking, the compound was shelved. Twenty-one years later it was taken down from the shelf to become a rat killer, dubbed Antu, so deadly that eight ten-thousandths (.0008) of an ounce kills a brown rat. It happened this way:

A Du Pont chemist, working with a chemical known as phenylthiocarbamide, tasted a bit. "Whew, this is bitter!" he said. "Here, taste this," he said to a co-worker.

"I don't taste a thing," the man replied.

Puzzled, the chemist asked a half-dozen colleagues in the laboratory to taste the stuff. To his amazement, about half the researchers tasted the bitter phenylthiocarbamide (let's call it P.T.C.) and the others tasted nothing. Here was a biologic puzzler. Did human beings inhabit taste worlds of their own?

The chemist, Dr. A. L. Fox, loaded his pockets with crystals of P.T.C. and started testing all comers. At cocktail parties, conventions and schools

The bet itself was simple enough, but the stakes were insane

BY ROALD DAHL

IT WAS getting on toward six o'clock so I thought I'd buy myself a beer and go out and sit in a deck chair by the swimming pool and have a little evening sun.

I went to the bar and got the beer and carried it outside and wandered down the garden toward the pool.

It was a fine garden with lawns and beds of azaleas and tall coconut palms, and the wind was blowing strongly through the tops of the palm trees making the leaves hiss and crackle as though they were on fire. I could see the clusters of big brown nuts hanging down underneath the leaves.

There were plenty of deck chairs around the swimming pool and there were white tables and huge brightly colored umbrellas and sunburned men and women sitting around in bathing suits. In the pool itself there were three or four girls and about a dozen boys, all splashing about and making a lot of noise and throwing a large rubber ball at one another.

I stood watching them. The girls were English girls from the hotel. The boys I didn't know about, but they sounded American and I thought that they were probably naval cadets who'd come ashore from the U.S. naval training vessel which had arrived in harbor that morning.

I went over and sat down under a yellow umbrella where there were four empty seats. I poured my beer carefully, wiped the froth off my upper lip, settled back comfortably and lighted a cigarette.

It was very pleasant sitting there in the sunshine with my beer and my cigarette. It was pleasant to sit and watch the bathers splashing about in the water.

The American sailors were getting on nicely with the English girls. They'd reached the stage where they were diving under the water and tipping them up by their legs.

Just then I noticed a small, oldish man walking briskly around the edge of the pool. He was immaculately dressed in a white suit and he walked very quickly with little bouncing strides, pushing himself high up onto his toes with each step. He was one of those people who have springs in their legs. He had on a cream-colored Panama hat and he came bouncing along the side of the pool toward where I was sitting, looking at the chairs as he went.

He stopped beside me and he smiled and his teeth were white and slightly uneven and obviously expensive. His skin was rather dark and I figured that he was some sort of a South American.

"Excuse, pleess, but may I sit here?"

"Certainly," I said. "Go ahead."

He bobbed around to the back of the chair and inspected it to see that it was safe, then he sat down and crossed his legs. His white buckskin shoes had little holes punched all over them for ventilation.

"A fine evening," he said. "They are all evenings fine here in Jamaica."

"Yes," I answered. I didn't want to talk with him.

"Ha!" he said. "Who are all dese?" He pointed at the bathers. "Dese is no hotel people." He was a talker all right.

"I think they're American sailors," I told him. "They're Americans who are learning to be sailors."

"Americans? So dat's it. Well, I hate Americans. Dey make too much noise. You are not American, no?"

"No," I said. "I am not."

Suddenly one of the American cadets was standing in front of us. He was dripping wet from the pool and one of the English girls was standing there with him.

"Are these chairs taken?" he said.

"No," I answered.

"Mind if we sit down?"

"Go ahead."

"Thanks," he said. He had a towel in his hand and when he sat down he unrolled it and produced a pack of cigarettes and a lighter. He offered the cigarettes to the girl and she refused; then he offered them to me and I took one. The little man said, "Tank you, no, but I tink I have a cigar." He pulled out a crocodile case and got himself a cigar, then he produced a knife which had a small scissors in it and he snipped the end off the cigar.

"Here, let me give you a light." The American boy held up his lighter.

"Dat will not work in dis wind."

"Sure, it'll work. It always works."

THE little man removed his unlighted cigar from his mouth, cocked his head on one side and looked at the boy.

"All-ways?" he said slowly.

"Sure, it never fails. Not with me anyway."

"No?" The little man's head was still cocked over on one side and he was still watching the boy. "Well, well, so you say dis famous lighter it never fails. Iss dat you say?"

"Sure," said the boy. "That's right." He was about nineteen or twenty with a long freckled face and a rather sharp birdlike nose. His chest was not very sunburned and there were freckles on that, too, but he was nicely built and he looked well enough in his bathing shorts. He was holding the lighter in his right hand, ready to flip the wheel. "It never fails," he said. "Come on."

"One momint, pleess." The little man raised the hand which held the cigar. "Now juss one momint." He had a curiously soft, toneless voice and he kept looking at the boy all the time.

"Shall not perhaps make a little bet on dat?" He smiled at the boy. "Shall we not make a little bet on whether your lighter lights?"

"Sure, I'll bet," the boy said. "Why not?"

"You like to bet?"

"Sure, I'll always bet."

The little man paused and examined his cigar. He raised his eyebrows and he frowned and he kept on smiling. I suddenly found that I was leaning forward in my chair, listening rather tensely *(Continued on page 59)*

STATE DEPARTMENT QUARTERBACK

BY ROBERT S. ALLEN

© KARSH-OTTAWA

The late Russian Ambassador Oumansky said the last word on the hero of this article: "Bohlen is a faithful servant of the United States Department of State. That is very, very unfortunate"

YACHESLAV MOLOTOV, the Russian Foreign Minister, has always been a tough nut for diplomats of other countries to k, particularly for Americans who don't under- d his double-talk and are nonplused by the hness with which he delivers it.

ut there is one American diplomat who takes sharp-tongued Russian in stride. He is Charles tis Bohlen, better known as "Chip," counselor he State Department, chief department liaison er with Congress, and the President's personal rpreter and adviser on Russian affairs. On at t one occasion, although he didn't exactly make lotov like it, Bohlen set the Russian minister k on his diplomatic heels.

t a conference of Foreign Ministers in London, lotov outdid himself fighting against a proposal e by the United States. Despite his tough talk, lost the argument, principally because Chip len, as chief American adviser, provided infor- ion which effectively countered the Russian's rtions. As the ministers left the conference n Molotov snapped at Bohlen:

I had always heard that you Americans were d horse traders. Now I find you will not trade."

Your Excellency," said Bohlen, "we Americans traders. We will trade you goods. We will trade dollars. But we will *not* trade you principles."

Molotov glared for a moment, then turned and ed away. He said nothing, but it is conceivable he endorsed the classic remark of the late Rus- Ambassador Oumansky:

Bohlen is a faithful servant of the United States partment of State. That is very, very unfortu- ."

all our dealings with the Soviet Union, Bohlen America's ace in the hole; two Presidents and Secretaries of State have leaned heavily upon since 1942, when he was appointed personal rpreter to President Roosevelt. Although he's American as baseball, Bohlen is a recognized ld authority on Russia and the Russians. He ks and writes Russian about as well as he does lish. He is thoroughly conversant with Russian ory and customs. The details of Russian gov- ment are at his finger tips.

A Tense Situation at Lake Success

est of all, he has a thorough understanding of sian psychology. He can frequently tell what Soviet officials are going to do before they do He brilliantly displayed this faculty in March, 6, at a meeting of the United Nations Security ncil at Lake Success. The council was at log- eads over the dynamite-laden issue of Russian ps in Iran. The council chamber was jammed the atmosphere tense. Secretary of State es F. Byrnes was present, with Bohlen at his , as usual.

the middle of the session Andrei A. Gromyko, sullen-tempered Soviet delegate, rose and began peak. He delivered a long, involved and circui- harangue, typically Russian. Bohlen kept up unning translation into Byrnes' ear. Suddenly len whispered, "He's getting ready to take a k. . . . He's going to pull a walkout."

ohlen was correct. Soon thereafter Gromyko cluded, ". . . nor am I able to be present and I efore leave."

Whereupon the Russian picked up his papers and ked out.

t the age of forty-four Bohlen is one of the key er men of the State Department, and an in- singly important figure in American foreign re- ns. The three jobs he holds in the department are all major posts, and for an ordinary diplomat each would be a full-time and delicate position. But Bohlen absorbs work and responsibility with the same ease and nonchalant effectiveness that he does the bewildering mysteries and inconsistencies of the Russian mind and language. He possesses none of the popular attributes of the diplomat; cloak-and-dagger stuff would be as alien to him as to the man in the moon.

He doesn't even dress as a diplomat is supposed to dress. Nobody has ever seen him parading Washington streets in the traditional striped trousers, spats and black Homburg, and he doesn't carry a cane. He'd look good in these trappings; he's six feet tall and still slender. But he's more apt to lounge around in a brown suit, black shoes, striped socks and a blue tie; obviously color schemes have nothing to do with his choice of clothing. Moreover, his pants are apt to be a bit baggy at times. As one of his colleagues put it:

"Chip is unquestionably the most unpressed man in the Foreign Service."

Nothing ever ruffles Bohlen. He takes the most maddening irritations with an extraordinary calm and an amiable, "Oh, well, it's all in a day's work." After the most hectic session he will plop into an easy chair, stretch his long legs comfortably, light a cigarette and crack jokes. He habitually works with his feet on his desk, a position in which the average diplomat wouldn't be found dead.

Despite Bohlen's importance in the American government, very few of his countrymen would recognize his name. Even in gossip-ridden Washington where taxi drivers deliberate upon the weightiest affairs of state, the significance of his work is known only in the most recondite circles. But in the important chancelleries of the world he has a reputation that is little short of fabulous. Ernest Bevin, Foreign Minister of Great Britain, eloquently testified to this during a conference in Paris. At one point, proceedings became so inflamed that everything came to a dead stop, while the frayed and weary statesmen sat silent and glaring. Finally Secretary Byrnes had an idea.

"Perhaps there are too many people in this room," he said. "If there were just a few of us around the table, maybe we could get somewhere."

The thought struck a responsive chord. All the other Foreign Ministers voiced approval, including for a change, Molotov.

"That's fine," beamed Secretary Byrnes. "We'll hold a meeting limited to the Foreign Ministers and one interpreter each. There will be no advisers present."

But Bevin balked at this.

"No," he said stubbornly. "I've got to have an adviser. It's all right for you to say you don't need one. If I had a Chip Bohlen as my interpreter I wouldn't need one either."

Bohlen's career as a key figure in big-time diplomacy got off to a spectacular start in 1942, when Molotov came to Washington. President Roosevelt asked the State Department to provide him with a Russian interpreter.

At this fortuitous moment, Bohlen arrived in the U.S. on the S.S. Gripsholm, in an exchange of diplomatic personnel with Japan. He had been in Tokyo as the right-hand assistant to Ambassador Joseph C. Grew when war broke out. The day after Bohlen returned home he was ordered to report to Roosevelt.

Roosevelt and Secretary of State Cordell Hull were greatly pleased with Chip's work. He was rewarded by being selected as Hull's interpreter and adviser when the Secretary flew to Moscow some months later. Upon Bohlen's return from that historic conference, he was officially commended for his outstanding service. From that time on, he has played a leading behind-the-scenes role in every U.S. parley with the Russians.

Bohlen has been an active participant in some of the most momentous deliberations in contemporary history. He sat at Roosevelt's elbow throughout the fateful Teheran and Yalta talks, was at Truman's side at Potsdam, and labored and suffered with former Secretary James Byrnes and Secretary Marshall at the futile and agonizing Foreign Ministers conferences in London, Paris and Moscow.

Bohlen made his own decision, at the age of fourteen, to take up diplomacy as a career. On his mother's side there was a slight diplomatic tradition. Her father, James Eustis, had served several years as ambassador to France under President Grover Cleveland. But except for this purely political appointment, there was no diplomatic background in Bohlen's antecedents. Making statecraft a lifework was wholly his own idea.

Filling in the Family Background

Born in August, 1904, at Clayton, New York, a tiny resort on the shores of the St. Lawrence where his parents were vacationing, Bohlen was one of three children. A brother, Henry, died some years ago. A sister, Ellen, is a New Orleans antique dealer. The home residence of the family then was Aiken, South Carolina, where the father, Charles, Sr., was a well-known sportsman.

When Chip was twelve his family moved to Ipswich, Massachusetts, and he was sent to St. Paul's School for Boys at Concord, Massachusetts. At school, while not exactly a grind, young Bohlen evinced a greater interest in books, particularly biography and history, than in athletics. He was at St. Paul's when he decided to become a career diplomat.

Entering Harvard, he graduated in 1927, and then made a trip around the world, chiefly via tramp steamers. Early in 1929, he passed his State Department exams and became a fledgling diplomat. After a few months' indoctrination at a Foreign Service school, he was sent abroad on his first assignment, as a vice-consul in Prague. Czechoslovakia was then a free and thriving republic, but already the tragic shadows were beginning to form over Europe. Slow but persistent tensions were mounting ominously in the west and in the east. Conscious of these faint tremors, Bohlen decided to learn Russian and to become an expert on Soviet affairs.

He did very well as a young career man, and in 1931, he was moved up a notch. He became vice-consul in Paris, and was offered the opportunity to study a foreign language. He lost no time in making the most of it. He enrolled in the Institute of Oriental Languages and began his long grind to make himself a master of Russian.

And it was just that, a grind. Young Bohlen trudged daily to school and not to play. He seized every opportunity to hear, to speak and to write Russian. For this purpose, he became a regular attendant at a Russian church.

By the time be was graduated from the institute, two years later, he was thoroughly at home in his new language. Bohlen was now ready for a firsthand test of his skill. And again fate smiled on him.

The U.S. and the U.S.S.R. had recently established official relations. William C. Bullitt, then a warm Soviet admirer, had been named U.S. Ambassador to Moscow. When he asked the State Department for an assistant conversant with Russian, Bohlen was the immediate *(Continued on page 61)*

Broadway DOLL

In this story, the father was the older, but the daughter grew up first

SHE was glad Oliver Dale had come to the station with them because it was going to make things easier. For when you are leaving your father for the first time in your life, the last moments are apt to be pretty messy, particularly when you are only thirteen and your father is in the profession.

But here was Oliver, calm, plump, pink-cheeked, all of fourteen and with the infinitely knowing look of the theatrical child. Oliver was also in the money, which the Martins certainly weren't, for he was understudy for another juvenile who was playing a leprechaun in a long-run musical. So it was Oliver who guided Herbie and her through the echoing vastness of Grand Central.

"Track twenty-two," he said with immense wisdom. "Cleveland, Indianapolis, St. Louis."

"And not a good show town in the lot," Herbie put in gloomily.

Doll took a long look at Herbie because she wouldn't be seeing him again in a hurry. A tall man, her father, and eternally young with his bright gold hair with the thin streaks of dark in it, curling a trifle, and the chin that wasn't so firm as it might be. Herbie had on the glen plaid suit, which was not remarkable since it was the only suit he had; he was wearing one of his six surviving shirts and he was carrying his Malacca stick.

Oliver put his hands in his jacket pockets. "You got your money safe, Doll?"

"I've got it pinned to my pants."

"You got your ticket?" asked Herbie and you could tell he was an actor twenty yards away. If you were in the profession, you could also tell he was temporarily out of work.

Doll had her ticket in her hand. She also had a copy of Variety and a box of chocolates Oliver had bought her. She had on her plaid shirt that had been purchased at a bargain on Fourteenth Street, she had on a blue hat, and her tan coat, that had been only slightly secondhand, was over her arm.

She had braided her soft dark hair about her head instead of leaving it in pigtails and she hoped she didn't look as if she were on her way to Sing Sing but that was certainly how she felt. She was a thin, sober-looking child, too tall for her age, much too old for her age, and her dark, slightly slanted eyes, her small, eager face, her serious mouth, made her oddly appealing.

"Your left sock's coming down," Oliver said critically.

Herbie's voice was shaky. "It won't be long, Doll. Honest it won't. Maybe a month."

Herbie actually believed that. Herbie believed that in thirty days he'd be working and have enough money saved to bring her back from Uncle Kimball's and Aunt Mae's out in Illinois. Herbie was kidding himself and he always would.

He now achieved a slight swagger. "I'll bet it won't be bad out there, either. You know, I wouldn't be a bit surprised if you had a simply swell time."

Oliver arose. "Listen, darling, you'd better be getting on that train."

She'd be having the shakes now if she weren't careful, for her father was stooping down to kiss her. "Goodby, Dolly!"

Oliver simply shook hands. "Keep your tail up, kid!"

Herbie carelessly took a dollar from his pocket. "Here, porter, see my little girl safely aboard!"

He shouldn't have wasted all that money, Doll thought as she went doggedly through the gate. But then, as Oliver often said, Herbie *did* have a lot of ham in him. She sank down in her seat; somebody shouted, "Bo-oard!"; the station platform began sliding by. *And this was it.* This was the end of everything.

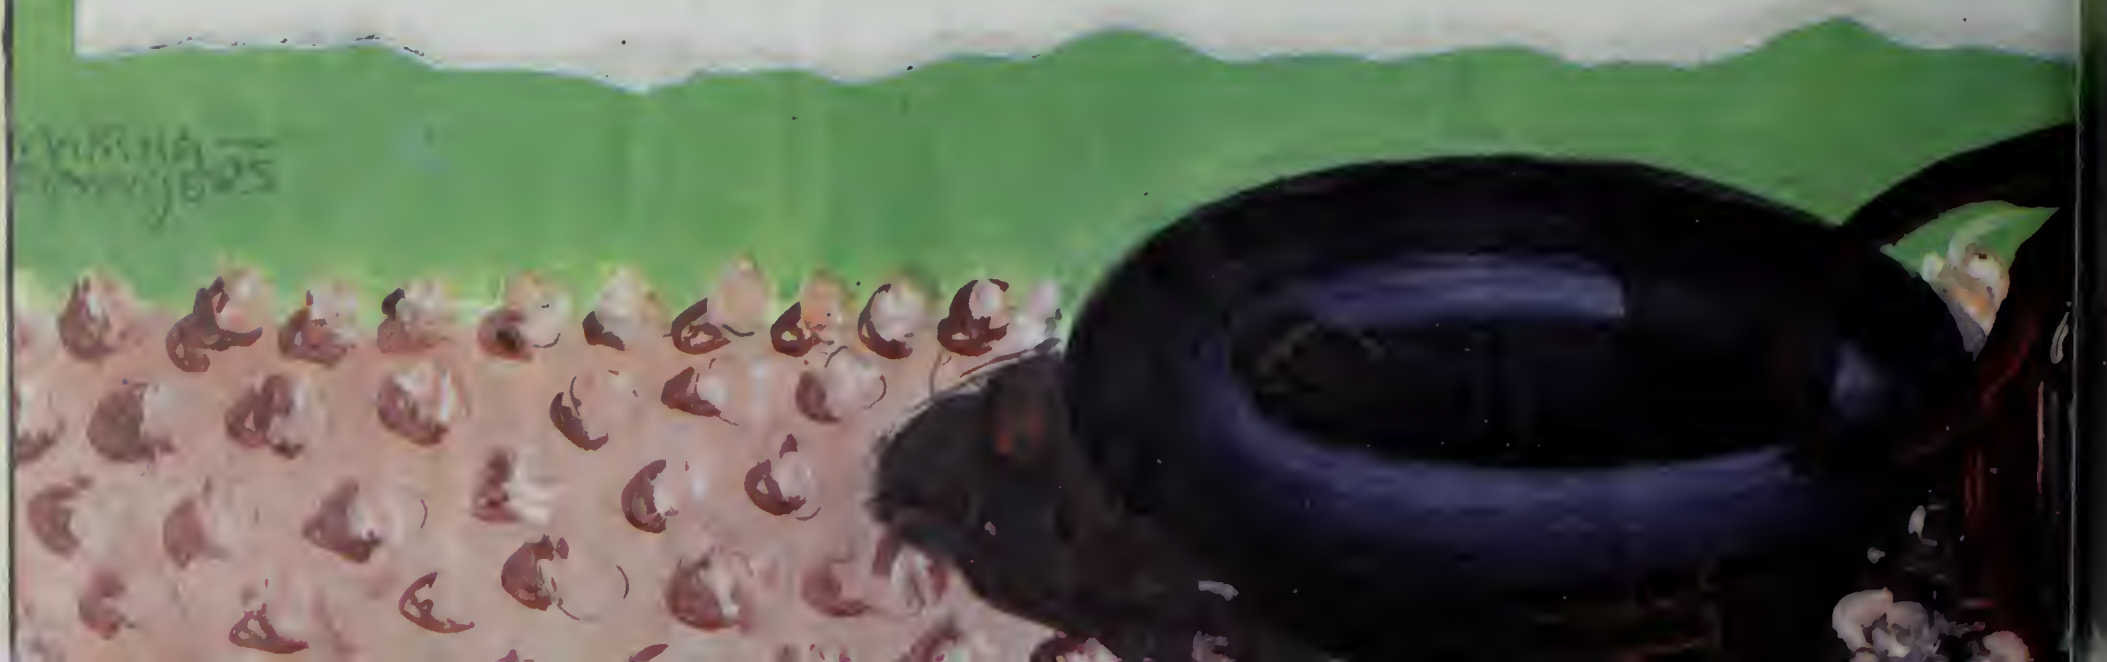
Doll was surely going to cry and Oliver always said that when you felt like that, you'd better start thinking like mad about something. Uncle Kimball and Aunt Mae. Aunt Mae was Doll's mother's sister and Mother had died five years ago. Mother had been an actress and she must have been pretty good because she was always working. They'd lived in the apartment up on Morningside and that had been quite nice.

Since then, things had been different. Herbie had a habit of getting into shows that looked wonderful in New Haven or Stamford and then took a terrible beating when they came to town. And then there'd be long, dry spells when he'd be doing nothing at all.

When they were in the money, they'd be living in those third-class hotels in the Forties that all look alike, inside and out. The next step was a tiny furnished apartment west of Broadway where at least there was a kitchenette to cook in. And finally, there was the furnished room where you really could get quite a good meal on an electric hot plate if you only knew how.

A life all ups and downs and a fine, free and easy life, too. Finest of all, right now in June with golden summertime glinting down the avenues. Hot, drowsy summer days when foolish people go out of town and the wise guys stay right where they are.

Plenty of splendid things to do, particularly if you have someone as sharp as Oliver to do them with, for the Staten Island ferry gave the best five-cent ocean voyage in the world. Or you can go swimming off the Palisades absolutely free.



But summer nights are better still—good and late when the shows are out—and you go sauntering up Broadway with Herbie and talking to whomever you meet. You stand on a street corner in your blue slacks with your shirttail out and everybody in the world comes along and stops to dish the dirt. Actors in jobs, actors out of jobs, the big blonde who had grown old in the chorus of Oklahoma!, agents, stage managers, theater treasurers, band boys, publicity men.

On such soft summer nights on Broadway, you always had a tense heady feeling that something wonderful was going to happen the next minute, the next day. Only it never did.

It certainly hadn't happened now, for the Martins were so down to rock bottom that though Doll wasn't very expensive to maintain she was still too much for Herbie to carry. So she was off to Illinois and Herbie was going to hole up for a while with Joe *(Continued on page 56)*

BROADWAY

THE WIN TO GO HOME

BY W. C. HEINZ

It seemed Johnny couldn't fight his way out of a wet paper bag—and Red Malone wasn't made of wet paper

ILLUSTRATED BY H. E. BISCHOFF

EDDIE stood on the ring apron, his ar resting on the upper rope, his hands fold in front of him. He watched the two fig ers, the colored boy and the white boy.

Eddie could remember Kid Bart all right. could remember him in maybe a half-dozen fig and the rest he had forgotten. He could rememt that, in his day, Kid Bart had been what they c a pretty good fighter. By that they always me that a guy fought most of the good fighters of time, and that most of them beat him after tou fights.

Remembering that, Eddie knew it is always d ferent in a fighter's home town. Especially if it i little town. After a while in a little town a guy known only by the guys he fought and not by wl he did with them. He has become a part of th records and so he has become a part of them, a that always makes a pretty good fighter a go fighter in his own town.

When the bell ended the round and the wh boy came back to him Eddie took out the wh boy's mouthpiece.

"Johnny," he said to the white boy. "You w only one more.

"Whatever you say, Eddie," Johnny answer breathing. He was a short stocky kid with li brown hair and a fresh complexion, but his musc were too bunchy and he could not be a good figh

"About like the last round," Eddie said. "J take it easy and I'll see you in back."

Then he turned and went down the steps a back through the crowd.

He went to one of the phone booths marked "Incoming Calls Only." He put a nickel in the phone and dialed.

Frank?" he said. "This is Eddie. You be in, Frank? In about a half hour?"

He heard Frank say yes.

I'll be over," he said.

He stepped out of the booth as the round was ending. He waited for Johnny to come through crowd, and he walked back with him through door and down the back hall and into the dressing room. He moved some stuff off the stool and Johnny sat down.

HE TOOK the gloves off and he cut the tape off Johnny's hands. "In about fifteen minutes, Johnny," he said, "you can go take your shower."

Eddie," Johnny asked, "what do you think?"

You did all right," Eddie said. "You didn't do bad."

The guy is tricky," Johnny said. "Don't you think?"

Yes," Eddie answered. "I guess so."

Eddie," Johnny asked, "am I looking any better? Do you think?"

Well," Eddie answered, working around, "you don't tell much. You know there's a lot to learn, and you know how it is."

I know," Johnny agreed.

You told me you're how old?"

Me?" Johnny said. "I'm twenty-three."

How long you been fighting?"

"Well, a year before the war. Then I was in the war, and after that you know."

"I'll tell you what," Eddie said. "I got some things to do. You take your shower now. Dry yourself good. I'll see you tomorrow."

"All right," Johnny said. "Thanks, Eddie."

When Eddie got to Frank's office Frank was alone. He took off his coat and hat and tossed them on a chair and he sat down, watching Frank at the desk.

"Eddie," Frank said, looking up. "How are you?"

"All right," Eddie answered. "I come from the gym."

"Oh?" Frank said.

"You want to know?"

"That bad?" Frank asked, looking at him.

"Worse," Eddie said. "A stiff, Frank. Let's face it."

"Well, that's why I asked you," Frank said. "That's why I asked you to take a look. You ought to know."

"It's up to you," Eddie told him, "but you ask me and I say you should send him home."

"Or turn him loose," Frank said.

"No," Eddie said. "You'll send him home."

"Oh, yes?"

"Yes," Eddie said, "because if you don't you know Lou John or somebody else will pick him up. You know this is a kid can't fight and will end up hurt."

"Well," Frank said, "he won't go home. I already talked with him."

"Why won't he?"

"Because of his old man."

"His old man's dead," Eddie objected.

"Which I know," Frank said, "but it makes no difference. His old man was a good fighter. He fought three world champions."

"Two of them carried him," Eddie said. "That much I know."

"There's no difference," Frank said. "In this kid's town Kid Bart was a good fighter. What difference does it make? What do they know? All they know is he fought three champions and this kid is supposed to be a good fighter, too. What difference does it make how good he really was?"

Eddie could see how Frank was disgusted. "Anyway, this kid will go home. I talked with this kid. Maybe I know him pretty good. Maybe he'll go home if we give him something to go home with."

"Something to go home with?" Frank asked. "What does he want, a mink coat?"

Eddie had to laugh. He had to laugh at Frank and at the picture in his mind of the kid in a mink coat.

"Eddie," Frank said, easing off. "I'm sorry. You gotta believe this. I lie awake nights over this thing. Here I am loused up with a lousy fighter who can't fight, and I spend more time worrying about him than I do worrying about the guys I've got who can fight maybe at least a little."

"Why?" Eddie asked.

"Why?" Frank said. "Why are *you* so concerned?"

"The same reason."

"I don't know what you're talking about."

"Sure you do," Eddie told him. "You know this is a nice clean kid who does everything you tell him and never gives you any mouth. You know this is a kid like you'd like your own kid to be, but you know he's no good for our business because he can't fight."

"How do you know that?"

"I know it because this is a homesick kid, if you want to know."

He watched Frank light a cigarette. He could see Frank was not any happier.

"It's so easy," Frank said. "All we have to do is get him a good win to go home. All I have to do is get a heavy who can box and hit. Can't you see I'm all set?"

Let him stew a little, Eddie thought. Sometimes it does a little good. "I can tell you something," Eddie said. "Yesterday I run into Pinky Joe. Pinky is looking for something easy. Pinky wants to throw his guy something soft before he turns him loose for the summer. You know, a little vacation money. He wants your kid in the semifinal at the Garden on the 19th when he's got his other guy on top."

"Red Malone's a good fighter."

"Red Malone's a real good fighter," Eddie told him. "In a couple of years, living right, he'll be the middleweight champion of the world. Only right now he's a manufactured fighter."

"Meaning what?"

"Meaning that I see things," Eddie said. "I see that all he knows is what Pinky taught him."

"Isn't that plenty?"

"This is a manufactured fighter," Eddie said. "This is a fighter moves this way and that way and when you do this he does that because Pinky has him doing it over and over."

"Is that bad?"

"It's not bad," Eddie said, "but do you know that your kid, who doesn't do anything the way he's supposed to, who can't do anything the way he's supposed to, maybe is just the kid to lick this guy, not next year but on the 19th?"

"Look," Frank said. "I pay you to tell me what you think, but, Eddie, I can't go for this. This one is crazy. This kid has no business in with Malone."

"Maybe."

"When this match gets out I'll look like an idiot."

"We'll look like twin idiots."

"Why, it would be 10 to 1," Frank said.

"It would be 20 to 1."

"Then I don't see it."

"Oh, you see it all right," Eddie said. "You know that you have to take it, too, because if this kid doesn't get this win now, he probably never gets it and he's a bum getting banged around, and then the chances are he never goes home."

"This whole thing makes me sick," Frank said.

When Eddie went out he knew he had Frank in his pocket. When he got home his wife told him that Frank had called to tell him he had talked with Pinky Joe and that he was taking the fight with Malone.

IF EDDIE stayed awake that night it wasn't for long. There was nothing to stay awake over. Malone was a tough kid out of Troy and Pinky was bringing him along slowly because he knew he was going the whole way and there was no hurry. He would make it, too, because he had the build and he could hit with both hands and Pinky had him boxing out in front of himself real nice. Combinations, under and over, almost anything you want, including that name and the red hair and a bright green robe.

Had Eddie had a good kid going against Malone, though, he would have played it over and over for most of the night. In his mind he would have seen Malone moving and he would have seen his own kid moving and he would have played it like a chess game. Eventually he would have moved his own kid inside Malone's move, and he would have knocked out Malone.

That is what he would have done if he had had a good kid going. With a kid like this there was nothing, though, and all you had on your side was maybe condition. This was a strong kid and that was all you had, that and the chance that Pinky might like this so much that maybe he would bring his guy in cold. . . .

When Eddie got to the gym the fighter was waiting. He was in his ring things, sitting on the table, and he had started to wrap his own hands.

"Wait a minute," Eddie said. "I get paid for that."

"I'm fighting Red Malone," Johnny told him.

"I know," Eddie said.

"It's a break," Johnny said. "Don't you think?"

"Yes," Eddie agreed. "I think."

"I've never seen him," Johnny said, "but I know he's a good fighter."

"He can fight," Eddie agreed.

Johnny did not say anything. He was watching Eddie as Eddie finished with the tape and started on the other hand, double over the knuckles and then around the hand and down.

"This is the fight you wanted," Eddie told him, "if you know what I mean."

"If I know what you mean?" Johnny asked.

"If you know what we were talking about the other day."

"Oh," Johnny said. "I know. You don't have to worry, Eddie. I'll go with what I said."

"I'm not worrying," Eddie said, "but if you win, what will you do when you go back home?"

"What will I do?" Johnny *(Continued on page 72)*

A right, overhand, hit Malone, and it looked as if he might go. The crowd was hollering. The kid was excited—too excited—tearing in, overanxious

Wilhelmina, Queen of the Netherlands

VERY TIRED LADY

BY QUENTIN REYNOLDS

MYNHEER FRANS VAN HEUVEN owns a pleasant tavern just outside of Haarlem. The tavern has been in his family now for three generations and Mynheer van Heuven said, a little sadly, that he himself was going to retire in September and turn the tavern over to his son, Johannes. He lowered his huge body into a large chair, put his big right hand around the tall, white-collared glass of beer that stood on the table, and sighed ponderously.

"We will retire together, the queen and I," he said, nodding his enormous white-thatched head slowly. "I will tell you a little story about her. Her mother, Queen Emma, was making a public appearance on a holiday and the streets of Amsterdam were packed with people. Wilhelmina was with her mother. Oh, she was about fourte this, you know, was in the last century. She at the great crowds of cheering people a peered up at her mother and asked, 'Do people belong to me?' and the queen mothe her gravely, 'No, my child. You belong to

Mynheer van Heuven took a deep dra beer, wiped the foam from his heavy wh

:he with the back of his sleeve, and chuckled. hat was more than fifty years ago and I am sure : still remembers it. She never forgot for a mo- nt that she belonged to us."

Queen Wilhelmina of Holland, who has reigned 50 years, will relinquish the royal crown to her ughter Juliana this month, and those like Myn- r Frans van Heuven, who have grown old with , are saddened by the thought. Virtually every- e in Holland feels a close kinship to the sixty- ht-year-old monarch, and when her abdication omes final they feel that it will mark the end of era during which Holland proved her greatness. The future is uncertain and dark, for today Hol- d is almost bankrupt economically. But the past y years have been, for the most part, glorious. lland emerged from the war badly hurt and ed with weariness, but she took a deep breath d set about the difficult task of rehabilitation. e abdication of Queen Wilhelmina will make this more difficult, for she was the one person in lland in whom all political parties had th. At the moment, Wilhelmina occu- s the same place in the affections of the ople as did Queen Victoria during the sing years of her reign.

But Wilhelmina is tired, not only physi- ly tired, but tired in spirit. The long rs of responsibility, culminating in the adful burden of having to lead her peo- from her London headquarters during war, have taken their toll. Ministers ming from her palace at The Hague ke their heads sorrowfully.

"The queen is weary," they say. "After minutes she begins to nod. Her great ality has left her. She is wise to turn r affairs of state to Juliana, for she has ined Juliana, and the princess is young d full of energy. But we will miss her dom."

The people of Holland always had great pect for their queen, but it was not until war years that this respect matured into venera- n. She always worked hard at the business of ng a royal sovereign; but until the war she was er actually close to the people. Significant is fact that she never was given a nickname the people of the country. She has been merely e queen" ever since that September day in 8, when she rode from the Paleis op de Dam in sterdam to the near-by Nieuwe Kerk to be wned. She was eighteen then. She gave her ndship to few.

Her daughter Juliana was never allowed to for- that she would be queen herself one day, and queen was meticulous in seeing that her edu- ion and even her relaxations were all designed qualify her for the royal position she will soon upy.

When the Germans entered Holland she hurried London to set up her government-in-exile. She ered her ministers to accompany her and from ndon she ruled with the same vigor and intelli- ce she had shown in her palace office at The gue. It was not easy, for the constitution of Hol- d clearly defines the duties of the sovereign and as clearly defines the prerogatives of the parlia- nt. Wilhelmina found herself in London with- a parliament. All her life she has had an almost stic reverence for the constitution, but circum- nces had virtually made her a sovereign with tatorial powers.

She soon fired her prime minister, Jonkheer de er. De Geer had been an advocate of appease- nt, and now that Holland was occupied he was a n believer in the Pétain policy of collaboration. lhelmina dismissed him and went to the radio tell her people at home the reason why.

By now the Germans in Holland had begun a tematic campaign of propaganda against the en. She and her ministers had shown them- es to be cowards, they declared, by running to ndon. The bewildered people, miserable under ill-fitting Nazi yoke, didn't know what to be- e, but when the queen, in her strong vibrant ce, told them that she had dismissed De Geer ause he was unworthy to represent them, they k heart. Her judgment on De Geer was correct. made his way back to Holland and became one he Nazi puppets.

Henceforth Wilhelmina made periodic broadcasts to her people and they listened, eagerly drawing strength to survive and even to resist, from the calm voice. When the Germans began to bomb London her ministers tried to persuade her to move to the country, but the doughty sovereign refused to do it. One night a bomb fell in front of the modest house she occupied near Victoria Station. It killed two guards and damaged the house badly. She still refused to move, and the story traveled quickly to Holland, giving new heart to the people. This was the queen who the Germans said was a coward. The stolid Hollanders chuckled proudly and looked upon their conquerors with contempt. The resistance movement in Holland grew.

In London, Wilhelmina had picked for her prime minister the law professor and Minister of Justice Pieter S. Gerbrandy. Today Gerbrandy is leader of the opposition in parliament, a Dutch equivalent of Winston Churchill. Stocky, paunchy Gerbrandy has the incredibly light blue eyes you see so often in Holland and he has a drooping walrus mustache, white, except where it is stained yellow by nicotine, for Professor Gerbrandy is a confirmed cigar smoker. Today he lives comfortably in a charming house at 113 Kanaalweg in The Hague, and he often talks of the tortuous but, in a way, glorious days in London.

This month Holland's beloved Queen Wilhelmina will turn over the reign of her country to Princess Juliana. Wilhelmina has reigned well for 50 years. Now the burden of rehabilitation in the war-torn Netherlands is too great for her waning strength

"We discovered a new Wilhelmina," he told me as we sat in his spacious living room. "She had always worked hard, but in London she drove herself furiously. Often I would meet her at eight in the morning to find that she had already been at her desk for two hours. When we would decide on a policy her first question always was, 'Is it constitutional?' To her the constitution represents the people and never once would she sign a decree unless she was sure that it was the will of the people.

"Some people found the queen difficult." Gerbrandy's blue eyes twinkled. "Conferences with her were never routine affairs during which she automatically approved the suggestions of her ministers. She would listen and then ask questions. If you didn't know your subject thoroughly—yes—the queen could be difficult. She was intolerant of stupidity and of carelessness.

"Things were bad then, very bad, but she never lost faith in the final outcome even when the rest of us could not see the way to victory. I will tell you something about the queen. She had one great love —her country—and never in her fifty years of rule did she ever do anything that she did not firmly believe to be best for Holland and the people of Holland. She was the greatest patriot of her age, and no one ever served her country with a greater integrity and honesty of purpose than she showed."

Gerbrandy suddenly stopped and bent over to pat his black sheep dog. He was silent for a moment. When he raised his head his eyes had lost their twinkle.

"Those terrible years took their toll," he said sadly. "I saw her yesterday and—but never mind. She is tired, so tired. Well, she has earned a rest."

Once the resistance movement was well organized in Holland, lines of communication were established between the underground fighters and Wilhelmina's London headquarters. The underground established a newspaper that was distributed clandestinely, and the queen wrote many articles imploring her people to have faith in the eventual outcome of the war and to have the courage to resist and die if need be. These messages were not idle rhetoric; the people knew that she, too, was ready and willing to die if need be. After the bombing of her home the queen sent Juliana and her children to Canada to live.

Juliana objected, but no one in 50 years was ever able to stand up against the will of the queen if she thought her decision to be one which would further the interests of the people. Were she killed it wouldn't matter, she confided to her ministers, but Juliana must be saved at all costs to carry on the royal tradition. Without the monarchy Holland would not be Holland, she told them, and she was right.

Had the queen and Princess Juliana both been killed, a not unlikely contingency in the days of nightly bombing, it would have stunned the people of Holland into a numbed atrophy. Resistance would have ceased because the will to fight would have died. And so Juliana and her children were hustled off to Canada, and with that worry off her mind Wilhelmina intensified her activities, keeping to a schedule that often made hollow-eyed wrecks of her younger but less durable ministers. She, for instance, read and often criticized every issue of the underground paper which arrived every day in microscopic film.

And she insisted upon receiving every underground member who had found it necessary to flee from Holland. As the Germans redoubled their efforts to break the spirit of these stubborn, unyielding Hollanders by executing hundreds of resistance fighters for acts of sabotage, the exodus to England increased.

Wilhelmina saw every one of them. She founded a club for them in London called "Het Engelandvaarders" (The men who have come to England) and she supported this not out of state funds but out of her personal exchequer. Here they could relax and drink their beloved Holland gin (which is of course not gin at all) that somehow or other she managed to get from Holland.

More than once I visited this club during the war years. It was always filled with lean, hard-sinewed young men whose eyes still mirrored the horror they had seen. A great many of them were incorporated in the Dutch navy and in the Dutch air force still fighting on from Britain. When they raised their glasses, as often as not they would murmur, "To the queen," and some of the dark shadows would leave their eyes.

Once in London I called to see one of her ministers. I saw him at the queen's house. She was away inspecting air force units in the north of England. When our talk was over he showed me the queen's office. It was the office of a busy executive, but on the desk were two autographed pictures—only two. One was of King Leopold of Belgium and the other was of Franklin D. Roosevelt. Wilhelmina had just returned from her first trip to the United States. She had addressed a joint session of Congress, the first reigning queen to have that distinction, and while in Washington she had been a guest of the White House. She had always liked and admired Leopold; now she had come under the spell of the President's charm and personality.

"She talks about Roosevelt incessantly," the minister told me, smiling. "Oh, she admired him greatly, but there is one thing that puzzled her. She said they would talk seriously about the problems confronting the Allies in general and the Dutch in particular, and then he would suddenly stop and ask for his grandchild. The little boy would come in and climb all over the President and he would laugh and enjoy himself. The queen could not understand how a man who in effect was leading the whole war effort against Germany could suddenly break off and play with a five-year-old youngster."

Occasionally the queen, impressed by one of the resistance men who had escaped, would make him a member of her household. One of these she picked was Gerard Rutten, who in civilian life had been a writer and a photographer. I found Rutten living in the Het Gooi district, in quiet, charming Bussum, which is between *(Continued on page 54)*

e Story: Candidate for Vice-President GOVERNOR WILLIS G. ARBURTON and his campaign biographer ROY MASON are in- lved in a game of penny ante aboard the Warburton campaign in when bad news comes. BILL EVERS, Warburton's press le, announces that CLYDE MCDONALD, a Washington news- per columnist with a reputation for stirring up trouble, will ard their train at the next stop. Evers thinks that McDonald after something. The next morning Roy Mason has breakfast th Clyde McDonald and LUCY STRAWN, the governor's secre- y. McDonald turns out to be personally unpleasant and kes a date with Lucy for lunch, much to Roy's anger and gust. Lucy finds out, however, that McDonald has received elegram from an old enemy of Warburton's, MELVIN FISHER Hydetown (the governor's boyhood home) that says: If you me to Hydetown I will give you a juicy item for your column. y Mason flies ahead of the campaign train to Hydetown. There contacts JOHN MILLS, an old friend of the governor's, who ls him that the "dirt" might have something to do with War- rton's old schoolteacher, HATTIE PERKINS, who is the only per- n in Hydetown who has announced that she will not attend giant Win With Warburton celebration in honor of the gov- or. When Mills takes Roy Mason to see Hattie Perkins, they et a beautiful young girl, Hattie's grandniece GINNY. Mills roduces Roy to Ginny, and Ginny asks if he is the one who ote the Warburton campaign biography. Roy tells her yes, d Ginny says, "Oh, then, I'm afraid Aunt Hattie won't see you."

II

GINNY, that's just why we're here," John Mills said quickly. "Because of that button and the man whose picture you see on it. Mr. Mason wants to plain to Miss Hattie just how he came to write that book d why he wrote what he wrote in it."

"Does he?" said Ginny, giving me a steady look.

"I wish you'd ask Miss Perkins if she'll see me," I said. 'm very sorry there's been a misunderstanding, and I'd e to apologize, and clear it up, if I can."

She looked at me doubtfully. "I'll see," she said. "You it here with Mr. Mills and I'll talk to Aunt Hattie."

I watched her walk around the side of the house, gave y head a shake and said, "It's a surprise, turning up a auty like her in a little town like this."

"Ginny?" John Mills said, with an air of surprise. "Yes, guess she's pretty good-looking at that."

"I suppose you never noticed it before."

"Oh, yes," he said. "Everybody notices Ginny. But it ems just last week that she was rolling a hoop."

Ginny returned within a minute, spreading her hands cefully and smiling at me. "I'm so sorry," she said. "Aunt ttie says no, very emphatically no."

I frowned. "If I could only explain to her."

The girl shook her head, and her blond hair moved along r shoulders. "Aunt Hattie said, Mr. Mason, that she did t wish to see you, or any other emissary from Willis G. arburton, now or at any time."

"If she said that, Mr. Mason, Miss Hattie means it," hn Mills said, and shrugged. "All right if I walk around d say hello to her, Ginny?"

Ginny smiled. "I'm sure she'd never close the door to you, John. But I wouldn't mention Mr. Warburton, if I were you."

I dropped onto a bench under the trellis of roses and gazed unhappily at my feet. I heard John's step on the gravel as he went away, and then Virginia Perkins said softly, "It's too bad, Mr. Mason, but Aunt Hattie has a real mad on Willis G. Warburton. I don't think there's anything you can do."

"I'd like to find out why," I said.

"I'm afraid it's the book you wrote."

"Did you read it? I never wrote a more harmless little paragraph."

"I'll tell you what she said," said Ginny. " 'So he thinks Miss Hattie is dead, does he? So he thinks he can say what he pleases, does he? Well, he'll find out.' "

"But it's not the Governor's fault," I protested. "I wrote the book. He didn't write the book. He didn't even okay it. He's never even read it himself."

She said softly, "You've written a lot of books, haven't you?"

I LOOKED up into her blue eyes, became aware that I was sitting and she was not, and quickly stood up. "Yes," I said. "A couple."

"I haven't read the others," she said. "I just read this one. I can see you're awfully devoted to Mr. Warburton."

"I am," I said.

"I suppose you've been with him a long, long time."

"Just this campaign. But I've known him a good many years."

Her smile returned, provocative and lingering. "I imagine you'll be going to Washington, too, with him. I suppose you'll be in his Cabinet, or something."

"The Vice-President doesn't have a cabinet, Miss Perkins," I said. "My one hope is that he *will* go to Washington."

"I'm anxious to meet him," she said. "Aunt Hattie isn't going to the reception, but I certainly am. I wouldn't miss it for anything. He's very handsome in his pictures, and even on that button. Is he coming to the dance, too?"

"I guess so," I said. "Is there a dance?"

"At the high-school gymnasium. I guess the whole county will be there. They're running special busses and it's a school holiday and all that. I hope he does come to the dance."

"If I should ask you for a dance, Miss Perkins," I said, "I hope you won't turn me down."

"Why, Mr. Mason, I'll save one for you," she said. "I surely will. I just hope you can find me in all that crowd."

"I'll find you," I said. "Depend on that."

It occurred to me that my tone had been somewhat fervent, and I was embarrassed. I suppose being brought up in New York City had something to do with it. When I was a kid I lacked that casual, graceful life of a small town. At least I had always supposed it was casual and graceful, and moving to a small Middle Western city had not cured me o the notion.

When I was a boy I used to dream of sleigh rides and hay rides and coon hunts and the sort of thing writers put in books when they're short on plot. *(Continued on page 40)*

IS YOUR CHILD IN A CLASSROOM CRISIS?

PHOTOGRAPH FOR COLLIER'S BY HANS KNOPF

BY HOYT AND

ALICE BARNETT

IF YOU are the parents of a youngster sc uled to enter first grade this fall, there serious question you should ask yours right now:

Is my child ready for school?

Not: Is he old enough, in chronological ye But: Has he developed the mental age, the phy co-ordination, and the social maturity to en him to keep up with the work of his class?

This year that class will be larger, more c crowded, than it has ever been before in the tory of our school system. The children who be in it were born during the war. Their e years were, in many cases, spent in child-care ters while their mothers worked and their fat fought. After the shooting stopped, the turmo unadjusted homes, the shifting from place to p lack of adequate living space, and the task of le ing to share a mother with a long-absent father produced children who need the very best of demic care. They have special need to feel se to feel accepted by and the equal of their grou they are not to become delinquency problems.

The first-grade teacher, from Maine to Cal nia, will be faced this year with a class swolle twice its normal size. She probably isn't g to have time to give extra help to those young who are not ready to do first-grade work—w is, primarily, learning to read. Tests have pr that if the average age of that class is six and a approximately 50 per cent of the children will mally still lack the eye co-ordination necessar reading. If your child is one of these, he will n able to keep up with the class; he will feel more more inadequate as the year goes on, and he become a problem like Carl.

Carl entered first grade at the chronological of six years six months. But—and this is no for many young children—his muscular co- nation and his mental and social maturity were equally developed. Tests established the fact his mental and social age was only a little over

Carl's parents were told that he should not school for at least another year, and possibly since he could not yet focus his eyes on nea objects and therefore could not learn to read. the parents insisted that the school system a their son.

Forced to study despite the inability of an in ture child to focus his eyes on a book, Carl paired his vision and had to start wearing gla Of course he failed to pass at the end of the

When he repeated the grade, he began dev ing many bad habits, including a sarcastic ma (which marks all insecure boys). He was small, physically, to gain recognition by fightin he began to steal small articles from stores give them to his classmates to gain their appr

By the time Carl was ten, his eyes had ma and he did better work in school. But he was h capped by the many bad habits and attitudes h

Before being assigned to a classroom, this is having his physical and mental capabi graded to assure him of a successful start in s

Will your child be forced to meet unfair competition? That is what starts a child on the road to delinquency. And it's not the school which is to blame: It's the parents

quired, primarily because he entered first grade ore he had achieved "reading readiness."

Few parents have ever heard of "reading readi-ss," and it does have a rather academic sound. ere's nothing "academic" about its meaning, wever. It means the difference between a well-usted, successful child and a heartbreaking mis-

California schools have gone into the matter austively. School authorities there say flatly t the entrance of children who have not matured this point before starting first grade is one of the jor causes for serious academic and social mal-justment.

Reading readiness can be determined scientifi-ly. As youngsters approach the six- to eight-year iod, changes take place in their bodies and rvous systems—affecting particularly ir ability to focus eyes on near-by ob-ts—that ready them for the task of rning to read. Some children reach s maturity at the age of five, others at en or eight; but it is not directly meas-able by chronological age.

Remember, all young children are owing in three ways—physically, men-ly and socially, and at three differing es of speed. By tests, 41 per cent of ldren between the *mental* age of six rs and six years five months make sat-actory reading progress, while 87 per nt of those between seven years six nths and seven years eleven months ogress satisfactorily.

A child who has not yet reached read-; readiness may be sent to kindergarten thout danger, as he is not exposed there competition he cannot meet. But often hild who enters kindergarten at the age four years six months (minimum age quirement in many states) will not be dy for first-grade work a year later.

Many school systems now test all children about enter first grade for reading readiness. But many re schools do not have the personnel necessary giving an elaborate series of scientific tests such the Stanford-Binet, the Kohs Block Design, the troit Word Recognition and the Vineland Social turity tests. To give these requires training ich the average parent would not have, cer-nly. So the California Principals' Association, y Section, has designed a reading readiness test ich any mother can give her child.

Designed especially to determine physical, men-, emotional and social maturity, it is authorita-e when honestly given. And they warn that of : four, physical development *as it pertains to the es* is vital. No child should be asked to study un-he is able to focus on near-by objects, such as jects pictured in a book held in the hand.

PHYSICAL MATURITY

1. Can he control his eye movements?
2. Can he see likenesses and differences, in simple diagram form?
3. Can he listen?
4. Can he distinguish similar sounds and classify them?
5. Can he sit still for short periods?
6. Can he speak plainly, or does he use many "baby talk" words?
7. Does he have sufficient control of his large muscles to use color crayons and keep reasonably close to the outlines of large figures?

MENTAL MATURITY

1. Can he relate events in sequence?
2. Can he stay on the subject, or does he wander to another in a very short time?
3. Can he memorize simple rhymes?
4. Can he remember directions?
5. Can he answer questions intelligently?
6. Can he anticipate events in stories?
7. Can he express his thoughts?
8. Can he give thoughtful attention?
9. Does he want to know the meaning of words?
10. Does he like to hear and tell stories?
11. Does he know about a good many common things?
12. Is he curious about new things?

EMOTIONAL MATURITY

1. Is he happy in a school environment?
2. Is he self-confident?
3. Does he talk freely?
4. Is he willing to take turns with others in the use of toys and playground equipment?
5. Is he courteous and thoughtful?

SOCIAL MATURITY

1. Does he assume his share of responsibility when he gets into trouble?
2. Is he friendly?
3. Is he co-operative?
4. Does he respect the rights of others?
5. Does he protect his rights by an appeal to fair play, by relying upon constituted authority for justice, or does he rely immediately upon his own force?

When your child can pass these tests he is ready to enter first grade—*and not before.*

In California, where intensive work has been done to establish the reading readiness of all first-graders, educators have found that their most difficult task is to educate the parents. Mothers who declare vehemently that they know their child much better than any teacher or psychologist possibly could, and that he is *much* brighter than the children he plays with, can make real trouble for a teacher.

If little Jane is two inches shorter than a girl of the same age down the street, parents think nothing of it. But let the teacher try to tell them that Jane isn't ready for first grade when her playmate is, and the teacher is called unfair and prejudiced. And as the teacher has a living to earn, she is often forced to accept a child against her trained judgment.

Too many parents are like Henry's mother. Henry's intelligence quotient of 103 was normal, his physical development was normal—except for his eye co-ordination. But to Henry's mother, Henry was not merely normal, he was a genius and must enter first grade rather than waste a year in kindergarten. The teacher did her best—but Henry entered first grade.

When the child found he could not meet the competition of his classmates, he became inattentive, critical and sarcastic. He couldn't achieve recognition for his work, so he picked fights on the playground to get the notice he craved.

Now, at the age of nine years six months—when he would ordinarily be in the third grade—Henry is one of the problem children in a "special" second grade. Especially trained teachers work with him, trying to break down the bad habits he developed while he was beyond his physical and mental depth in first grade. They may succeed, and they may not. It is very difficult to correct mental blocks and rejection of learning habits.

Dolly was another child whose mother insisted that she enter first grade, when tests showed her mental age was only five years six months. Faced with work beyond her physical, mental, emotional and social level, Dolly developed a mental block and for the next year and a half she did not speak one word in class. Her progress was seriously retarded by the severe strain placed on her nervous system by competitive conditions beyond her capacity.

Some mothers undoubtedly insist that their child enter the school system at the earliest legal age, no matter how immature he may be, because they are eager to gain a few free hours each day by shifting their responsibility to an overworked teacher. But many others, convinced their children are unusually bright, are sincere in rejecting school advice to keep an immature child in the safe atmosphere of home until he is ready to meet competition. These are the mothers who, when told their child has not passed first-grade work and should repeat the year, protest so vehemently that the teacher is forced to promote him. Whereupon the patterns of being inadequate, feeling stupid and outside the group become intensified as he vainly attempts second-grade work.

One solution of this problem would be, of course, to establish at least three first grades and the same number of second grades, so that children at the same stage of development could be grouped together. This experiment has been tried successfully in some California schools, but it met with tremendous opposition from parents who would not have their child placed with a "slow" group.

Where this system has been instituted and accepted by parents educated to realize that it is normal for reading readiness to vary, the dividends have been large. Children are kept in equivalent mental-age groups, and the teacher is able to make each child feel that he is part of the group.

You, as a parent, cannot do anything immediate about the overcrowding that will handicap your child during his first school years. But you can save him the strain of competition for which he is not ready. You can realize that a young child may have an intelligence quotient well above 100, and yet have a mental and social age less than his chronological number of years. If the only solution is to have a child already started in the school system repeat kindergarten or first grade, accept it. His failure to keep pace is less important than the damage that can result if your injured pride causes you to nag or otherwise punish him, for you may destroy his vital sense of security.

Should this occur, you have added to his defeat, since the broad-scale purpose of the first grade is to give a child a feeling of security in a scholastic environment. You can do much to save him from his classroom crisis by giving him a feeling of security and a sense of achievement. Otherwise, he is likely to become a problem in maladjustment. ★★★

Mrs. Alice Spurgin Barnett, coauthor of this article, has devoted most of the past two decades to education and research in social problems.

The most insidious difficulty the authors encountered in gathering material was fear—fear in the teachers that they would be penalized if they criticized the system.

"They felt, as I did too often in the ten years I taught, that silence was golden—especially at contract time," Mrs. Barnett said. "For this reason we have not quoted the many teachers, principals and superintendents we interviewed."

THE SECRET PAPERS OF HARRY L. HOPKINS

BY ROBERT E. SHERWOOD

PART XV—RISING TIDE OF DISSENSION

At home, Roosevelt fights Dewey in the bitter fourth term "whispering campaign." Abroad, the Allies jockey desperately for the rail as the war sweeps into the homestretch

The 1944 Presidential campaign was bitter. F.D.R. was politically never wilier. A reference to his Scotty—Fala—gave him the opportunity to divert the popular attention. His supporters began calling it a contest between Dewey and Fala. Collier's presents the high lights of that campaign as they are recorded. And this, dear readers, is an entirely different campaign

ON JULY 4, 1944, Hopkins left the hospital in White Sulphur Springs and flew back to Washington to continue his convalescence in his new Georgetown home. During the next three weeks he went to the White House very occasionally to see the President, but he was incapable of doing much work.

On June 28th, the Republicans had nominated Thomas E. Dewey as their candidate for President. On July 11th, Roosevelt announced that he would run for a fourth term if nominated by the Democratic National Convention, which was to be held in Chicago during the week of July 19th. While the convention was in progress, Roosevelt traveled to San Diego and there embarked for Pearl Harbor to meet with Admiral Nimitz and General MacArthur for the determining of future strategy in the war in the Pacific.

On July 19th, Churchill cabled Hopkins explaining his concern about the forthcoming southern France operation (ANVIL). Churchill was still arguing doggedly for the application of Anglo-American forces to the Balkans. At this late stage, the Prime Minister may have been concerned by the smashing Russian advances. The Russians had already entered Rumania and reached the eastern tip of Czechoslovakia and there appeared to be nothing that could stop them from pushing on to the borders of Greece and Turkey.

Churchill emphasized the need for another major conference.

Hopkins wrote to the President saying that his talks with Beaverbrook had "indicated to me how difficult it is to hold a formal economic conference with Great Britain on any single subject at this particular time. Max . . . claims he senses a good deal of hostility . . . One of our present difficulties is that everybody thinks the war is over. I hope if you decide to speak on the radio from Seattle, that you will scotch this . . ."

The "hostility" sensed by Beaverbrook was attributable to the sentiment, widely expressed in Washington at that time, that while the American forces in France were dashing ahead at devil-may-care speed and with thrilling success, the British under Field Marshal Montgomery on the Allied left flank seemed to be "dragging their feet." It was reported that Eisenhower was so annoyed and w ried about this that he had even pealed to the Prime Minister to the 21st Army Group Headquar near Caen in Normandy to try persuade Monty to get on his bic and start moving."

The Hopkins papers are very complete at this point for, altho he was given access to all the ca that passed through the White Ho to and from the President on the cific trip, he no longer had any responsibility for them.

Warns of Diplomatic Pitfalls

On June 26th, he cabled Roose "Having given considerable thou to the forthcoming conference, I that while it would have been adv tageous for you to have gone aln anywhere for a meeting with Chu ill and Uncle Joe together, it seem me that . . . the world would cons a conference between you Churchill somewhere in Europe o England as a political meeting wh had left Russia out in the cold. may well want to take up various portant matters with Churchill s in which case it would be much be to have him come to you instead you going to him, and the sooner better. As to Uncle Joe, he obvio wants to postpone his next mee with you until after Germ collapses."

On August 6th, Churchill sent H kins a long cable in which he plained his grief, in the midst victory, that there still should be ferences of opinion between the A on strategy. This was barely a w before the embarkation of the tro for the landing in southern Fra

Roosevelt, MacArthur and Nimitz meet at Pearl Harbor (July, 1944) to plan the next Pacific move. The Navy wanted ground forces landed on Formosa. M Arthur urged liberation of the Philippines. Roosevelt's ultimate decision in favor of the Philippines was criticized by enemies as being pre-election strat

Quality BUILDS Quality

THAT'S THE INTERNATIONAL WAY

from raw materials to finished trucks

International Truck quality begins long before truck building starts. It begins with control of the raw materials that produce rugged truck strength and power.

Quality Builds Quality! That rule governs the selection and approval of every material and part used in every International Truck. Here's one example:

■ International Harvester's own ships bring iron ore from Minnesota's Mesabe Range down the lakes.

■ These ships also transport coal from International Harvester's mines in Kentucky. The coal is loaded at the lake port of Sandusky, Ohio.

■ Ore and coal are brought to International Harvester's steel mill in Chicago, where *Quality* steel, including one of a special type developed by International Harvester's technicians, is made to rigid specifications for International Trucks and International Engines.

Yes, *Quality Builds Quality*. Note with what success:

For 16 years more new heavy-duty International Trucks have been bought by American commerce and industry than any other make.

but Churchill was still attempting to prevent this operation from taking place. This time, however, he did not urge that the ten divisions for ANVIL should be sent into the Balkans; he recommended strongly that they join with the OVERLORD forces in the region of Saint-Nazaire.

Hopkins replied to Churchill that while he had not heard from the President concerning the proposed change in ANVIL plans, he felt sure that the answer would be in the negative. He expressed his own view that "it would be a great mistake to change the strategy now; it would delay the sure liberation of France rather than aid it . . ."

Various communications passed between Hopkins and Churchill preparatory to the conference, to be held in Quebec in September. Through all these communications Hopkins spoke as one who would of course be present at the conference—as he had been present at every major conference thus far in the war—but on August 28th he sent the following cable:

"Dear Winston: Although I am now feeling much better I still must take things easy and I therefore feel that I should not run the risk of a setback in health by attempting to fight the battle of Quebec on the Plains of Abraham where better men than I have been killed."

Hopkins' excuse was hardly convincing, for if he had ever given any thought to his own survival, he would probably have spent the entire war in bed, subsisting on liver extract and amino-acid powder. The fact of the matter was—and this was later confirmed by Hopkins to Churchill directly—that a distinct change had come about in the character of his relationship with the President. Roosevelt's need for Hopkins' counsel and even more for his companionship was no longer so great that the President was willing to defy the criticism which invariably arose in the hostile press whenever Hopkins took Hull's place at an important conference.

Poor Health Too Great a Handicap

There was no open breach between them. There was simply an admission that while the friendship continued and Hopkins would still be useful in various ways, he was no longer physically fit to share the burden of responsibility for the big decisions of the war. The trouble was that he had been out of commission too long, and Roosevelt had of necessity lost confidence in his ability to stand up under the strain.

The physical setting of the second Quebec Conference was familiar, but the atmosphere was utterly new. There was, in short, a general belief among the higher authorities assembled there that German surrender could come within a matter of weeks or even days. The Allies were well prepared for war to the death in Europe, but they were very ill prepared for the cataclysm of sudden total victory.

It will be remembered that when the question of the future treatment of Germany had come up for discussion among the Big Three at Teheran, it had been decided to refer this explosive subject to the Russian-British-American Advisory Committee in London. There it had remained through many long months of inconclusive "exchanges of views" on all manner of subjects, beginning with the primary one as to which nation would occupy which zone.

It was felt that some specific directive must be issued to General Eisenhower and various proposals were made—the most famous or most notorious of them being "the Morgenthau Plan." There is no doubt that Hopkins, as a member of the President's Special Cabinet Committee, joined with Hull and Stimson in opposition to the plan, and I can confirm from my personal knowledge Stimson's statement that Roosevelt subsequently made no secret of his regret that he had ever agreed to initial the proposal.

Indeed, on October 20th, six weeks after the Quebec Conference, Roosevelt gave demonstration of his reaction to the episode by dismissing *all* specific planning for the treatment of Germany; he said, in a memorandum to Hull, "I dislike making detailed plans for a country which we do not yet occupy," adding that the details were "dependent on what we and the Allies find when we get into Germany—and we are not there yet."

Roosevelt gave evidence of the extent to which Hopkins' position had changed at that time. In a memorandum, also addressed to Hull, on the progress of the Quebec Conference, he wrote: "We have discussed the question of the scope and scale of mutual Lend-Lease aid between the United States and the British Empire after the defeat of Germany and during the war with Japan. We have agreed that a temporary joint committee shall be set up to consider this question. Among American membership would be Stettinius, Morgenthau and Crowley."

In neglecting to appoint Hopkins even to membership in a committee for consideration of the subject which, for more than three and a half years, had been Hopkins' particular province, Roosevelt was undoubtedly influenced by political considerations. Unpleasant suggestions had reached the President's ears that Hopkins was too thoroughly under the domination of the British, or of the Russians or the Chinese, to be a reliable representative of American interests in these important negotiations relative to postwar material and economic aid. Of course, similarly dark intimations about Hopkins had been reaching Roosevelt ever since the earliest days of the feud with Harold Ickes in 1933, and Roosevelt had paid no heed to them; but he paid heed to them now.

I had been overseas in the European and Mediterranean Theaters since early in February, 1944, so I knew very little directly of what was going on in the White House. On September 12th, Hopkins sent me a message saying that the President wanted me to come back. On arrival, I learned from Hopkins, Rosenman, Pa Watson and Steve Early that there was some cause for alarm about the forthcoming political campaign. There appeared to be a considerable amount of lethargy among the voters which could result in a small registration and an even smaller turnout on Election Day.

It was obvious that if large masses of people were so sure the President could not lose they would feel no need to register and vote, the President could be defeated. Dewey was traveling up and down the country making carefully planned speeches which were well calculated to mobilize the maximum Republican vote but at the same time to create no particular excitement. He did not attack the conduct of the war. He did not attack Roosevelt's social objectives. He repeatedly described the present Administration as a group of "tired old men," and this was not easily refuted, for those in highest authority were unquestionably tired and were getting no younger day by day.

Dewey also referred repeatedly to the recurrent and unseemly cat-and-dog fights that broke into the public prints with disagreeable frequency. Here again he was on sure ground: There had been another final bust-up in the War Production Board which resulted in the resignation of Charles E. Wilson due to a series of press attacks which, he said, had been instigated by Donald Nelson (Roosevelt sent Nelson to China on an apparently meaningless mission and appointed Julius Krug as Acting Chairman of WPB).

Later, during October, the long-suppressed enmities between Stilwell and Chiang Kai-shek and Chennault burst out in violent explosion and Roosevelt was compelled to issue orders for the recall of Stilwell who had become, and deservedly, a popular hero to the American people.

There was a great deal of extremely ugly whispering about the state of Roosevelt's health. When he had made his acceptance speech from a cabin on a cruiser just before his departure for the Pacific tour in July, a photograph had been taken in which he appeared haggard, glassy-eyed and querulous—and this photograph had been given very wide advertisement in the pamphlets with which the Republicans were flooding the country.

On his return from the Pacific trip, Roosevelt had made a nation-wide broadcast from the Bremerton Navy Yard at Seattle; when he delivered this speech he wore his leg braces for, I believe, the first time since he had returned from Cairo and Teheran and he was in such pain that he had to support himself by holding on to the lectern with t tremendous strength of his arm hands, which made it extremely di for him to turn the pages of his re copy and made the speech sound ing and uncertain to listeners accus to the calm, confident and cheerf surance that he always conveyed.

It was a significant fact that, aft speech, the public opinion polls ind a sudden and ominous slump for R velt and a consequent rise in D stock.

When I first went in to see the dent after my return from Europe, shocked by his appearance. I had that he had lost a lot of weight, bu unprepared for the almost ravag pearance of his face. He had his c and his shirt collar seemed severa too large for his emaciated neck. seemed to be more full of good l and of fight than ever. He asked had listened to any of Dewey's sp and when I said I had not yet h pleasure, he said, "You ought t him. He plays the part of the racket-buster in one of those ga movies. He talks to the people as were the jury and I were the vill trial for his life."

Fala Figures in Campaign Spe

Then Roosevelt said, "I'm go give a speech to Dan Tobin's boy Saturday night and I expect to hav of fun with that one." He handed sheet of paper, saying it was a par he had dictated for use in this s

It read as follows: "The Repu leaders have not been content to personal attacks upon me—or m —or my sons—they now include m dog, Fala. Unlike the members family, Fala resents this. Wh learned that the Republican writers had concocted a story tha left him behind on an Aleutian and had sent a destroyer back to fi —at a cost to the taxpayer of t three or twenty million dolla Scotch soul was furious. He has n the same dog since. I am accusto hearing malicious falsehoods abo self but I think I have a right to ob libelous statements about my dog.

This paragraph may be said t set the very keynote for the 194 paign; as someone observed at th "From now on the American peo consider this as a contest of Dewey Fala."

The Teamsters speech—or speech about Fala," as it was son known—accomplished its object. put the needed excitement into th paign, it stimulated the overco Democrats with a will to rush fo register and vote, and above all rupted Dewey's carefully cul self-assurance and caused him t swinging wildly against the mos dodger of them all.

More and more Dewey felt imp appeal to the prejudices of his im audiences in order to get applau seemed to forget that these au were recruited by the local Rep machine and were composed lar people who would still have been determined to vote against R even if the Republican candida been named Tommy Manville ins Tom Dewey.

In bidding for their cheers, a their hoots and catcalls whenev kins or Ickes or Frances Perki mentioned, Dewey ignored th mass of undecided voters who w tening over the radio and wh they might be tired of the Roose ministration and ready to conce it was "time for a change," did n that change to involve a recessio kind of "normalcy" which follo first World War.

kins heard from General Marshall the amazing story of how someone, apparently in the armed services, had imparted to Dewey the fact that the United States had broken the Japanese codes before Pearl Harbor, and of Marshall's urgent message to Dewey that the revelation of this fact would be calamitous. Hopkins later wrote of this:

Later that day I repeated this conversation to the President. The President was surprised at the action Marshall had taken but expressed no criticism of that action. He merely stated that he felt confident that Governor Dewey would not, for political purposes, give secret and vital information to the enemy. His only further comments were: "My opponent must be pretty desperate if he is even thinking of using material like this which would be bound to react against him." The President wondered what officer or government official had been so faithless to his country as to give Governor Dewey the information. To the best of my knowledge the government never discovered who gave Governor Dewey this military information.

Rosenman and I had some talks with various Democratic political leaders, who seemed to be greatly alarmed that Dewey was making dangerous progress in his campaign to hang the Communist label on the Roosevelt Administration. There were charges that Roosevelt had secretly begun to sell out to Uncle Joe Stalin at Teheran and that after the war he would complete the process of delivering the American free enterprise system over to Communist control. When we reported these conversations to the President he did not seem greatly disturbed.

He said in his Boston speech: "When any political candidate stands up and says, solemnly, that there is danger that the government of the United States—your government—could be sold out to the Communists—then I say that candidate reveals a shocking lack of trust in America. He reveals a shocking lack of faith in Democracy—in the spiritual strength of our people."

Roosevelt himself was at his most unsolemn in this speech. He poured his own brand of ridicule on his opponent. He said, "Everybody knows that I was reluctant to run for the Presidency again this year. But since the campaign has developed I tell you frankly that I have become most anxious to win." Merriman Smith, the United Press White House correspondent, has written that Roosevelt's attitude toward Dewey was one of "unvarnished contempt"—and I can only add that Smith is a notoriously accurate reporter.

Hopkins later wrote: "The President told me he meant it when he said that this was the meanest campaign of his life. He said he thought they hit him below the belt several times and that it was done quite deliberately and very viciously. He was particularly resentful about the whispering campaign which he believes was a highly organized affair."

Beginnings of Dissension

It is not improbable that one of the factors in restoring Hopkins to his former position with Roosevelt was the Morgenthau Plan episode. Hopkins would have been quick to detect the dangerous implications in the Morgenthau Plan, and Roosevelt realized this and was sorry that he had not taken Hopkins with him to Quebec.

Of far greater importance, however, was an incident early in October in connection with a cable to Churchill which had consequences of very considerable importance. The background of this was as follows:

By October 1st, the Russians had reached the frontiers of Greece and Turkey. British forces had landed in Greece. The question of control over southeastern Europe now presented a problem of pressing urgency and Churchill was naturally so concerned about it that he felt that another Big Three conference must be held without a moment's delay.

Obviously, it was difficult for Roosevelt to embark on a long journey in the midst of a political campaign, but Churchill took the unassailable position that the advancing Russians were not going to wait until the returns were in from South Dakota and Oregon, and he suggested that he and Eden should proceed to Moscow immediately and try to arrive at an understanding in respect to "spheres of influence" in the Balkan area. Hopkins believed that if such a conference were to be held with no American representative present, it would be generally assumed that Churchill had been authorized to speak for Roosevelt.

While Hopkins well knew that there was nothing Roosevelt could do to prevent Churchill and Stalin from discussing any subjects that they pleased, he believed it to be of utmost importance that Roosevelt should make it entirely clear that no decision they might reach would be considered as valid by the United States until these matters could be discussed and settled by the three nations in conference together.

On October 3d Hopkins learned that Roosevelt was dispatching a cable to Churchill with the implication that he was content to let the Prime Minister speak for the United States. The cable was already going out over the wires of the Map Room. Hopkins thereupon took one of the quick and arbitrary actions, far beyond the scope of his own authority, which had gained for him the admiration and affection of Roosevelt ever since the beginnings of the New Deal: He gave orders to the officers on duty in the Map Room that transmission of the President's message to Churchill was to be stopped.

He then went straight to Roosevelt's bedroom—the President was shaving at the time—and told what he had done and the reasons why he had done it. Roosevelt had been thinking about other matters when that cable was drafted, and had been persuaded that the safest course for him to take was to avoid all semblance of American participation or even interest in the Moscow meetings by sending vague messages to Churchill and to Stalin as well. He now listened very attentively to Hopkins and came to the conclusion that a serious mistake had almost been made. He and Hopkins drafted a cable to Harriman instructing him to deliver the following message to Marshal Stalin immediately:

"It had been my hope that no important meeting would be held until you and Mr. Churchill and I could get together but I understand the Prime Minister's wish to confer with you now. There is in this global war literally no question, either military or political, in which the United States is not interested. It is my firm conviction that the solution to still unsolved questions can be found only by the three of us together. Therefore, while I appreciate the necessity for the present meeting, I choose to consider your forthcoming talks with Mr. Churchill merely as preliminary to a conference of the three of us which can take place, so far as I am concerned, any time after our national election.

"Therefore, I am suggesting that Mr. Harriman be present at your forthcoming meetings with Mr. Churchill as an observer for me, if you and Mr. Churchill approve. Of course Mr. Harriman c not commit this government relati any important matters which, very rally, may be discussed by you an Prime Minister . . ."

Roosevelt then instructed Harrim bear in mind the important fact that could be *"no subjects that I can antic that might be discussed between S and the Prime Minister in which I wi be greatly concerned. It is importan I retain complete freedom of action this conference is over."* (The italic mine.) Roosevelt further instructed riman to keep Hull and himself info throughout the conversations an come home immediately after to make a full report.

From Installment XVI of THE SECRET PAPERS OF HARRY L. HOPKINS: At the formal dinner after the opening of the Yalta Conference, when the subject of American public opinion came up, Vishinsky remarked to Bohlen (U.S. State Dept.) that "the American people should learn to obey their leaders." Bohlen suggested that Vishinsky visit the U.S. and try to tell that to the people. Vishinsky remarked that "he would be glad to do so."

A False Impression Is Correcte

Stalin expressed his appreciation President's message, saying that he previously been under the impre that Churchill would be authoriz speak for Roosevelt as well as for self.

Two days before this cable was Cordell Hull left his office in the Department for the last time. Hull very sick man and his life depend the relinquishing of all the respon ties of his office. Roosevelt had pers him to postpone announcement resignation until after Election Da obvious reasons, and Hull did so. question as to who should succee was a matter for long and prayerfu sideration in the White House.

When it was finally decided that tinius should be promoted from U secretary to the senior Cabinet post was no doubt in anyone's mind that kins was largely responsible. As the informed Marquis Childs wrote, " of his enemies who took satisfacti counting Hopkins out at the time illness after the Teheran Conferenc have to guess again. His influence Administration is perhaps greater t ever was."

One of the first public actions tak Stettinius incurred the furious ar hemently expressed wrath of W Churchill. During November ther political crises in three countries gium, Italy and Greece, in all of the Allied military forces were pre nantly British. It seemed that I was backing the more conservati ments in these countries as oppo the liberals or leftists who had be most aggressive in resistance to the and Fascists. It appeared that C ill's well-known predilection for tutional monarchy was dictating p which were against the people's w

In Greece, from which the Ge had been ejected only within the pa weeks, it was the belief of Am observers that there was little p enthusiasm for the return of George. The situation in all three tries was immeasurably complica the fact that battle fronts existed i (in the case of Belgium, they we beyond her frontiers) so that all we itary zones of communication whe and order must be enforced by wh instruments were at hand for th pose; but American liberal opinic already heard too much of this ex tion in connection with the various porary expediency" arrangement

When Stettinius announced hi appointments on the Assistant Se level, anguished cries were raised t State Department had been shak only to emerge more reactionar ever. Hopkins was given a large of responsibility for the new a ments and suddenly found himself unaccustomed position of being cized as a convert to Toryism.

At this same time, in late Nov the crisis became acute in Italy. attempt to form a new Cabinet, Carlo Sforza was a leading spok

"Hm-m-m... so

Mrs. Blandings Builds a Dream Kitchen...eh?"

Hm-m-m. After learning the hard way how to build a house, I'm glad Mrs. Blandings took over the job of planning the kitchen. Let's see how she made out ...

Cary Grant and Myrna Loy as Mr. and Mrs. Blandings in R.K.O.'s Mr. Blandings Builds His Dream House—*a Selznick release*

1. **Mr. Blandings**: Hello, Dear, what are you dreaming up for dinner in this bright little workshop?

Mrs. Blandings: See for yourself, Nosey. But the best part of the dream is the way my *"Unseen Friend"* lends a hand.

Mr. B: Your *"Unseen Friend?"* Who do you mean ... anybody *I* know?

Mrs. B: Of course it is. Our *"Unseen Friend"* is *Nickel*—the wonderful metal that's in these shining Stainless Steel pots and pans... and in the Inconel cooking surfaces of the electric range.

Mr. B: Well, "live and learn," I always say... Will wonders never cease?

Mrs. B: Not with our *"Unseen Friend"* around.

r. Blandings: Well, tell me where your metallic *Friend* is contraption?

ndings: That's not a contraption, Stupid ... that's a clothes r. It will keep your precious shirts so white they'll make ok like you've been under a sun lamp! And no rust stains.

But *where* does our *"Friend"* come in?

The Nickel is in the basement... in the Monel water tank. Monel is rust-proof, you know... keeps the water n and free of rust you can drink it.

By all means let's drink a glass to your invisible crony!

3. **Mr. Blandings**: Now don't tell me... I suppose your little pal is lurking in this gadget too? By the way, Dear, what is it... a spare bathtub?

Mrs. Blandings: Don't be silly... that's the electric dishwasher ... and will *you* be glad next time I want you to dry the dishes! Because, after they're washed clean with really hot water, they *dry themselves* ... while *you* read your paper.

Mr. B: And I suppose our *"Unseen Friend"* Nickel is ready to leap into action at the drop of a plate. But, say, tell me one thing. Why do they call it *"Your Unseen Friend"?*

Mrs. B: Because it lends a friendly hand in so many things we use every day.

INCO: *Thats' right, Mr. Blandings, over a hundred things right here in your own kitchen! But the Nickel is usually combined with other metals, so you very seldom really see it...*

Mr. and Mrs. B. together: And *that's* why Nickel is called *"Your Unseen Friend"!*

The interesting story of Nickel, from ancient discovery to modern-day use, is told in an illustrated 60-page booklet, "The Romance of Nickel." Write for your free copy today. Address Dept. 202X.

of the parties to the left. Sforza was well known and greatly respected in the United States, where he had spent many years of exile, as an unflagging enemy of Fascism. He had strongly opposed the retention of the House of Savoy in the new Italy and had criticized State Department policy on numerous occasions.

(The State Department's memorandum on the proposed plan for Allied military government in Italy had provided that "Italian political leaders in exile should have no part in the operations or administration." This dictum, which would seem to have applied primarily to Sforza, was amended by Roosevelt and Hopkins to provide that such exiled leaders should have no part in the operation "in its initial stages," with the rest of the remarks struck out.)

The British embassy in Rome intervened in the Cabinet crisis to the extent of letting it be known that His Majesty's government would not give its approval to any Italian Cabinet in which Sforza held a prominent post. With this, the American liberal hue and cry became really intense and it was assumed that the British government was making these antidemocratic moves with the blessings of the United States government. Stettinius was now beginning to realize how Hull had felt under comparable fire. Roosevelt was away in Warm Springs for a rest and was not, I believe, paying a great deal of attention to the situation.

Outlining U.S. Policy for Italy

On December 5th, Stettinius issued a public statement saying:

The position of this government has consistently been that the composition of the Italian government is purely an Italian affair except in the case of appointments where important military factors are concerned. This government has not in any way intimated to the Italian government that there would be any opposition on its part to Count Sforza. Since Italy is an area of combined responsibility, we have reaffirmed to both the British and Italian governments that we expected the Italians to work out their problems of government along democratic lines without influence from outside.

He added, "This policy would apply in an even more pronounced degree with regard to governments of the United Nations in their liberated territories." This last was sharply aggravating to Churchill, for it applied obviously to Belgium and even more so to Greece, which was by now becoming the hottest spot of all. The embattled Prime Minister thereupon dispatched a cable to Roosevelt which may well have been the most violent outburst of rage in all of their historic correspondence. Churchill said he would undoubtedly have to make a statement to the House of Commons in view of the Stettinius statement and he would try to keep his remarks free from the "acerbity" that the new Secretary of State had displayed in his public language.

It is quite possible that Churchill would have been compelled to discuss these subjects before the House even if Stettinius had said nothing, for a debate was precipitated by an amendment regretting British intervention in Greece and in other parts of liberated Europe. During this debate, Churchill made several references directly and indirectly to American opinion. He said:

"Poor old England! We have to assume the burden of the most thankless tasks, and in undertaking them to be scoffed at, criticized and opposed from every quarter; but at least we know where we are making for, know the end of the road, know what is our objective . . .

"We have not attempted to put our veto on the appointment of Count Sforza. If tomorrow the Italians were to make him Prime Minister or Foreign Secretary, we have no power to stop it, except with the agreement of the Allies. All that we should have to say about it is that we do not trust the man, we do not think he is a true and trustworthy man, nor do we put the slightest confidence in any government of which he is a dominating member. I think we should have to put a great deal of responsibility for what might happen on those who called him to power."

The situation in Greece was indeed ugly. American public opinion was not too well informed as to the merits of this complicated situation; all that was apparent on the surface was that British troops, engaged in the task of "liberation," were killing Greek patriots who had fought the Nazis, and it was even possible that the British were using American Lend-Lease weapons for this purpose.

Although there were no American troops involved, units of the Mediterranean Fleet of the U.S. Navy had been operating under British command, aiding in the transport service to Greece. This led to an incident which Hopkins described as follows:

COLLIER'S "George, you've hardly touched your food" VIRGIL PARTCH

On Saturday night, December 9, 1944, at about 7 P.M. the White House operator told me that "John Martin" was calling me on the overseas phone. This is the name the Prime Minister uses in his telephone calls.

The connection was very bad and I could not, therefore, know what the Prime Minister was talking about. He sounded as though he were very angry and stirred up about something and wanted me to do something about it. I got the words "Greece" and "Halifax" . . .

I then tried to get Halifax on the phone but could not reach him.

On Sunday morning I went to the Map Room and saw in the morning news summary a sentence that Admiral King had ordered Admiral Hewitt, our American commander of the Mediterranean Fleet, not to permit any American LSTs to be used to transfer supplies to Greece. King's actual cable was not available.

I went to see Admiral Leahy about this and told him that I thought . . . King was getting into the political arena and that we would undoubtedly hear from the British about it. I told him, furthermore, that I felt that, while we should keep our troops out of Greece and let the British do the policing, withdrawing the LSTs was like walking out on a member of your family who is in trouble . . . I told him I thought Admiral King should withdraw his order and, if Admiral King or the Joint Chiefs of Staff thought that such an order should be issued, the recommendation should be made to the President and that he should make the decision because it was in the political sphere . . .

While I was with Leahy he telephoned Admiral King and . . . suggested . . . that he withdraw the order. King readily agreed and did so.

Churchill expressed his warm appreciation of Hopkins' timely and effective action and said that he had canceled the message that he had prepared for dispatch to the President.

A Typical Churchill Gesture

It remained for Churchill to take the one dramatic and thoroughly characteristic action which could convert criticism into applause. With fine contempt for his advanced age (he had now passed his seventieth birthday) and for the risks both political and physical that were involved, he suddenly boarded an airplane and flew to Athens on Christmas Day, taking Eden with him. He thereby brought an end to hostilities and established a temporary regency under Archbishop Damaskinos, obtaining from King George the assurance that he would not attempt to return to the country "unless summoned by a free and fair expression of the national will." That ended the Greek crisis for the time being.

Hopkins wrote the following on the genesis of the Yalta Conference:

As early as the middle of September, 1944, the President was contemplating a second conference with Stalin and Churchill . . .

By this time we had agreed upon our full-out and final assault on the German citadel and yet there were no firm agreements as to what was to be done with Germany once she was defeated . . .

On the political side there was no agreement as to reparations against Germany . . . there was no agreement as to zones; nothing as to whether or not we were going to encourage or discourage a central German government or, indeed in what way the Allies were going to utilize German machinery . . . The earmarks of trouble in Poland were already obvious . . . Our whole policy toward the Far East needed a thoroughgoing understanding, particularly so far as the Soviet Union was concerned . . . France wanted to have a full part in world affairs and the decision on this point, if not made at an early date, wo cause endless troubles.

Furthermore, there was the ha over of the Dumbarton Oaks Un Nations Conference. The voting cedure had not been settled . . . I the President . . . that there was n chance of getting Stalin out of Ru . . . in the light of the military situa on Germany's eastern front and th he did not look out we would wind with a lot of . . . irritating cables l and forth getting exactly nowhere that we might as well make up our m first as last to go to some conve point in Russia—preferably in Crimea . . .

As soon as the election had t place I saw Gromyko, the Russian bassador, and told him that we wa to arrange the conference. Gron said that he knew Stalin was prep for the conference but that he dou that he could leave Russia . . . I a Gromyko whether there was any p in the Crimea at which it was fit to a conference and he said he was there was. A couple of weeks late President got a message from S saying he understood the President willing to go to the Crimea and sug ing Yalta as a desirable place.

All of the President's close adv were opposed to his going to Ru most did not like or trust the Rus anyway and could not understand the President of the United States sh cart himself all over the world to Stalin. This argument carried no w with me. The all-important thing to get the meeting . . .

On Sunday, January 21st, Ho took off for London in The Sacred It had been decided that he should two or three days with Churchill attempt to promote a more am mood prior to the gathering at Yal

Hopkins wrote no notes durin short stay in London, but he rep later that his host was no less "volc than he had expected.

Hopkins was joined in Naples by tinius and they flew together to Ma await the President's arrival. Hopk now was quite ill.

Chiefs of Staff in Hot Disput

The Combined Chiefs of Staf been meeting at Malta—and had engaged in the most violent dispu the entire war. The point at issue w selection of a strategic plan for th knockout blow against Germany. plan was advanced by the British C another by Eisenhower; the latter w present, but he was vehemently sented by Walter Bedell Smith.

The arguments reached such a that Marshall, ordinarily one of th restrained and soft-spoken of me nounced that if the British plan approved by the Prime Ministe President, he would recommend to hower that he had no choice but to be relieved of his command. The was settled by the Combined Ch Eisenhower's favor without need f erence to higher authority, and th was followed which ended three m later in junction with the Russia Germany's surrender.

On February 2d, Roosevelt arri the Grand Harbor of Valletta Quincy.

The night of February 2d–3d busy one at the Luqa airfield at which had been for so many y prime target for German and bombs. Transport planes were off at ten-minute intervals from P.M. to dawn to carry some 700 including the President and the Minister, 1400 miles across the and Anatolia and the Black Sea airfield in the Crimea.

The friendship of Louise Brough and Margaret Osborne DuPont is almost unprecedented for women tennis rivals. They are companions off the court and h dominated the women's doubles since 1942. These pictures show Louise, left, and Margaret, right, at Wimbledon, where Louise won the women's sin

THE RACKET SISTERS

BY BILL FAY

DARKNESS halted the semi-final match between Louise Brough and Nancye Bolton of Australia at Forest Hills last September. The replay of the incomplete third set was scheduled for the following morning—with the winner to meet Margaret Osborne DuPont for the national championship in the afternoon.

The decision produced a laundry crisis. When Louise awoke next morning, she discovered her tennis wardrobe had dwindled to two dresses—both of them wrinkled and unpressed. "I'll be darned if I feel like starting the day over a hot ironing board," Louise complained.

"Take a shower," roommate Margaret Osborne DuPont ordered. "I'll run an iron over them. It'll even things up for this afternoon."

So Margaret pressed Louise's dresses, and Louise beat Nancye Bolton, and then Louise beat Margaret for the title. Louise also ate most of Margaret's raisins (tucked away in a small bag beneath the umpire's chair), but Louise didn't say a word to Margaret all afternoon—not even thanks for the raisins.

"We never speak on court," Louise explains, "and we were so tired after the last point we just shook hands—didn't have a chance to talk things over until we went back to the room for a shower before dinner."

Louise and Margaret started taking in each other's washing and ironing, and winning tennis titles, in 1942 when Sarah Cooke (Margaret's partner) retired temporarily. They've dominated women's doubles ever since while battling for the big prize—the world's No. 1 singles ranking. This year, Louise came through, winning the women's singles at Wimbledon. Then she and Margaret took the women's doubles. Oddly enough, despite their competition in the singles, they've remained friends—an almost unprecedented accomplishment for feminine tennis rivals. In a similar situation, Helen Wills and Helen Jacobs got along like Westbrook Pegler and Henry Wallace.

"For one thing," Margaret says, "we never practice together. That restricts our competition to tournaments and we've just about broken even in 30 matches over six years. If we played two or three times a week, we might get on each other's nerves. Another thing, we both concentrate well, which means, in a sense, that we play the ball rather than each other."

"That's right," Louise agrees. "When I'm hitting well, I'm concentrating on the ball—how it's spinning and what angle it's coming from—not on who's hitting it. Our singles matches are almost impersonal. The doubles are something else. We often talk things over and give ourselves pep talks on big points."

The friendship carries over to their families. Margaret lived in San Francisco and spent many winter week ends with the Brough family in Beverly Hills. When Louise and Margaret battled last September, Louise's mother and grandmother followe match on the radio.

During the decisive third se neighbor who stopped by sugge

"Maybe we ought to say a prayer for Louise."

"We will not," Grandm Brough declared. "When Mar plays Louise, we're neutral."

BASEBALL'S PREP SCHOOL

The first American Legion bas tournament—held during the convention at Philadelphia—wa most the last. The final-round ponents, from Springfield, Ohi Dorado, Kansas; Pocatello, Id and Yonkers, New York, could find hotel space. Finally, tourna chairman Dan Sowers lodged youngsters in Marine barracks.

Yonkers won the title before 9 empty seats in Municipal Stadiun we ever hold another tournam Sowers declared, "the finals wor a part of the convention. The

gates don't seem to be baseball-minded."

Tom Shibe, then president of the Athletics, gave a dinner for the winning team. Commissioner Landis attended. So did John Heydler, president of the National League. Sowers cornered them and said, "This could be a great tournament for the kids and for baseball, but we need help. How about it?"

Nothing happened. There was no tournament in 1927. Finally, late in December, Sowers received a telegram from Landis: PLEASE ATTEND MAJOR LEAGUE EXECUTIVE COUNCIL MEETING FEB. 14TH.

At the meeting, Sowers outlined the Legion program in a five-minute chat with Landis, Heydler, Ernest Barnard and Leslie O'Connor. When Dan finished, Barnard said, "Mr. Commissioner, I move we underwrite this program for this year to the extent of $50,000."

Heydler said, "Mr. Commissioner, I second the motion."

Landis said, "In all of which the commissioner concurs."

That's all there was to it. That $50,000 was the best investment major-league baseball ever made. Sowers estimates more than 1,000,000 youngsters tried out for the 13,000 teams which competed in the 1948 tournament. "That means," Dan says, "that more youngsters in the 12- to 17-year age bracket are playing ball every year. It's reflected in major-league box scores. We had 113 Legion graduates in the American League last year and 91 in the National. Pretty soon, 90 per cent of your big leaguers will be Legion graduates."

The list of major-league legionnaires reads like Baseball's Who's Who: Ted Williams, Hal Newhouser, Bob Feller, Pee Wee Reese, Dom DiMaggio, Lou Boudreau, Joe Gordon, Ferris Fain, Buddy Rosar, Bob Dillinger, George Kell, Harry Brecheen, Warren Spahn, Johnny VanderMeer, Phil Cavarretta, Bobby Doerr, Wally Westlake, Harry Walker, Ralph Kiner.

Judge Landis really started something with seven words: "In all of which the commissioner concurs."

CHESTY PEPPER

Pepper Martin, the old St. Louis Cardinal who played third base with his chest, joined the faculty of Branch Rickey's Brooklyn baseball college at Vero Beach, Florida, last spring. Pepper's roommate was Carl Voyles, coach of Rickey's pro football team in the All America Conference.

"We've got a couple hundred kids down here," Voyles told Pepper. "Some of them will never make the grade in baseball, but they've played college football. I'm going to look them over—might be able to use them in the fall."

"Count me in," Pepper declared used to play some football."

Carl thought the 44-year-old M was joking, but Pepper was serious. ing the touch scrimmage after ba practice, Pepper grabbed a pass an away from the 20-year-old safety

"Where did you play football?" V asked.

"Carver Chiropractic College," per replied. "It was in Oklahoma You didn't have to go there to pla the team. I didn't go there."

"Any other experience?"

"A season at halfback for Ho Oklahoma, an all-Indian team. Cou wasn't no Indian."

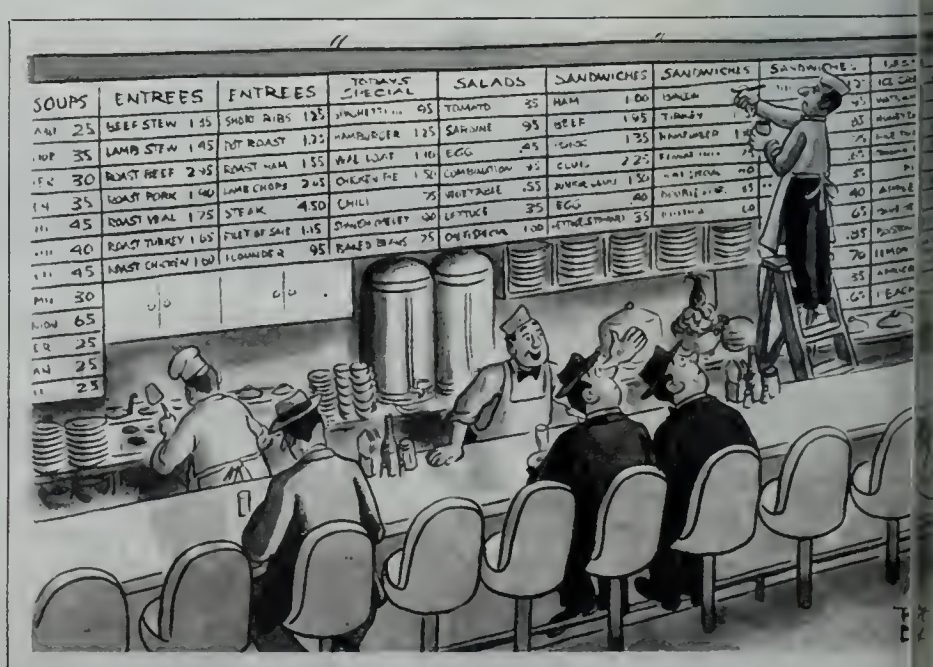
Next morning, Voyles tested Pep place-kicking on the local high-s field. Pepper booted 14 straight— ing back gradually from the 10-yar and didn't miss until he was on th

Impressed, Voyles went to Ricke said, "I'd like to put Pepper on the ball team—just to kick extra point

"You can have him," Rickey said keep him out of the scrimmages. S body might run into his chest an hurt."

Rickey was thinking back to the when Pepper was the roughest and t est of the Cardinals' Gashouse Gang body ever broke up more double with less finesse than Pepper. H knocked down the shortstop or th ond baseman—whichever was un enough to be making the pivot throw

"So that was it," Rickey mused. the years I was general manager Louis I wondered where Pepper le that battering-ram base-running nique. I checked his record all th back to Greenville in the East League and never found out. A the time Pepper was practicing the field blocking he learned at dea Carver Chiropractic."



THIRD-HOLE ASSIST

Fred Daly of Council Bluffs got a spectacular start in the recent amateur golf tournament. Fred's te on the 188-yard third hole at O stopped 18 inches from the pin. A walked toward the green, a wil from the fifth fairway landed on h —and sent it rolling into the cup hole in one!

THERE'S GOLD IN THAT LEAD

KINGS—OR BETTER

ntlemen: It was with pain and shock t I read Igor Cassini's Royalty under raps (July 24th).
Mr. Cassini obviously suffers from an dequate comprehension of the figures, ts and fancies which have so gloriously petuated the institution of monarchy roughout the world, through centuries storm and strife.
A loyal subject to the crown,
James von Reinhold Jamesson, Ft. Lauderdale, Fla.

. Glad to see the system of royalty de-. I'm all for removing the kings and eens from playing-card decks and subtuting Mr. & Mrs. Commoner. . . .
Fred Brady, Utica, N. Y.

. I wish the out-of-work kings and eens would come to this country and en schools to train servants and teach anners to boorish Americans. . . .
Jack van Nurk, Boston, Mass.

. Kings out of work? When did they er? George Rade, Stamford, Conn.

THE SIN IN SYNTAX

ear Sir: Mr. James C. Prindiville, Sah, Oregon, is irked because, he says, of grammatical error." (The Week's Mail, ly 24th.) May I inquire since when has error in grammar become grammatical?
Donald Davis, Washington, D. C.

d Reader Prindiville mean an ungramatical accuracy?

CLAMOCRACY

itor Collier's: The editorial We Need bor Statesmen (July 17th) offers an active idea but it is much like wishing dry water or cool heat.
The labor leader, like Ol' Man River, nts no taters; he has only discontent to l, can follow but one course. Ultitely, the labor leader will find his ignoend in the wreckage of the American tem.
There is no longer anyone in our govnment with the guts to say no to a powful labor leader.
If we ever were a democracy that day is st. Clamocracy is a better word; the der and more obnoxious the clamor set by a self-serving group the greater is certainty it will be given what it deands. This extends beyond the labor oup to include farmers, veterans and hers.
G. E. Johnson, Greensboro, N. C.

COMES THE REVOLUTION

ntlemen: We are in grave danger of outright dictatorship under a Lewis, a bin, a Murray, a Green, or whoever. bor has the strength. Pogroms of the d world were child's play compared to what we are in for, once the pent-up hatreds are unleashed, in this land "where it couldn't happen."
G. P. Stokes, Corona, Cal.

HOPKINS

Dear Editor: We happen to read so many accusations, unfounded ones, against that dead man in Hyde Park that we sometimes wonder the sunspots are not called his fault. When reading The Secret Papers of Harry L. Hopkins in Collier's I have a feeling that they are a good antidote for those accusations.
Dr. Julius Heine, Philadelphia, Pa.

THE MAN'S BUGS!

Dear Sirs: I pasted a copy of Ted Shane's advice on summer pests, etc. (Inhuman Nature, July 10th) in my valise before going on vacation and submit my report. On arrival at Lake Wogapotapeechie I sprayed DDT on the window screens as directed. The mosquitoes were so big they swarmed in and ate out the screens, drank up all the DDT and read the article to see what to look out for. The DDT began to take effect, and the next thing I knew they had found my stock of fly swatters and chased me out of the place with them. . . .

Shane's poison-ivy remedies sounded like so much hogwash (which I have also tried for ivy without result) so I took my hikes on stilts for the entire two weeks. Luckily the vacation ended just in time. Ivy was climbing up the stilts, on which termites were working too. They'd have gotten me in a day or two.

One day a flock of chiggers drove me back to my room to read the article's advice about them. The mosquitoes had finished the article. I draw no conclusions but the next day there were a lot of dead mosquitoes around the room.
Robert Q. Lewis, New York, N. Y.

MALE FANCY

Dear Editor: My husband thinks people who write letters to the editor are "crackpots."
Rosemary Davis, San Bruno, Cal.

Ah! A weak male, eh?

BOYS AND GIRLS TOGETHER

Dear Sir: I wish to corroborate what Ashton Reid (Hero on Horseback, July 24th) has to say about children using Roy Rogers as an example.

Last week, our neighborhood children, 12 in all, age range from 3 to 12, put on their annual back-yard show. Their stellar attraction—Roy Rogers and Trigger. The show was a big success. The children raised $4.00, which they donated to the Crusade for Children.

I'm enclosing a snapshot of their star. What a contrast to your picture illustrating the article in your magazine!
Mrs. Esther G. Sanders, Fresno, Cal.

Cast: Ty Jacobson, 10, as Roy; Susan and Robert Hurley, Jr, 8 and 9, as Trigger.

The New Tie Shape Welcomed by Millions

THE "Wembley Square"

No wonder men welcomed it heartily. This really new shape, in woven woolen neckwear, freshens up—smartens up—your complete attire. The "Wembley Square" makes you feel you're ahead of style—gives you that new Bold Look. Wembley pioneered it—and gives you the bold plaids, checks and stripes precisely right for square-shape ties.

SECOND MAN ON THE TICKET

Continued from page 25

I had always felt that I was missing something you couldn't find on the IRT or the el or at the local Loew's. I had always thought that there was something rather special about small-town life and small-town girls.

"I'm sorry you're unwelcome to Aunt Hattie," the girl said. "I just don't dare ask you to lunch. But, anyhow, I'll be seeing you at the dance."

John Mills returned then. He met my eyes, shrugged. "No use, Mr. Mason. She just won't talk to you."

"There are ways to get around Aunt Hattie," Ginny Perkins said. "You can't just meet her head on. The thing to do is to meet her casually, when she doesn't know who you are, and then work into it."

"Sure," said John Mills. "But where is he going to meet her casually?"

"Oh, anyplace," said Ginny. "In church, or at the drugstore, or maybe at the bingo game at the firehouse tonight. Aunt Hattie and I are going."

I looked into her blue eyes. "Bingo?" I said. "That's for me. I'll be there."

"But remember," she said, "if you do come, don't wear that button."

I walked to the car with John Mills, and as we drove away Ginny Perkins was standing by the garden gate.

"Well," said John Mills. "I couldn't get anywhere with Miss Hattie myself."

"That's too bad," I said. "But there's no juicy item in Miss Hattie."

"I'm not so sure," he said.

"What do you mean by that?" I asked.

"I couldn't get anything out of her," he said. "But I did make mention of the big blowout Wednesday. You know, this town is going to be crowded, Mr. Mason. The chamber of commerce has asked the homeowners to let out their spare rooms, and most of 'em are doing it, even Miss Hattie. You know who came around to see her about taking somebody in?"

"Who?"

"Melvin Fisher," John Mills said, and pressed his lips together. "And you know who that somebody is?"

I groaned. "You don't mean Clyde McDonald?"

"That's right," he said. "Clyde McDonald."

AS I set off to the bingo game at the firehouse that night to worm myself into Miss Harriet Perkins' good graces, there was a telegram in my pocket from Bill Evers that said: Awaiting word. I had not answered it, for how could I?

There was no mistaking the firehouse. It was on a side street, opening off the highway, and floodlights shone on the red apparatus drawn up outside the door, polished bright for the occasion. A big sign said: Bingo Tonight. Benefit Hydetown Vol. F.D.

Ginny had left her handbag on the wooden bench beside her to hold a seat. I approached and said, "Excuse me, miss. Is this seat taken?"

"Yes," a voice said quickly. "You can see it's taken."

It was my first sight of Harriet Perkins, and I was surprised by what I saw. I had expected a tiny, brittle woman, but Miss Hattie was quite fat, with that shapeless, voluminous obesity which disguises almost all trace of the human figure. Her face was thinner than would be expected, and her nose sharp.

"Aunt Hattie, I doubt if Mr. Mills is coming," Ginny Perkins said, and picked up her handbag. She said to me, "We were saving this seat for a friend, but you may as well sit here until he comes."

I said, "Thank you, miss," and stepped over the bench to sit beside her. A fireman appeared at my elbow and said, "How many? Dime apiece. Three for a quarter."

"I'll take three," I said. I pulled out a handful of change, paid him a quarter, and dropped the change in a pile on the table.

"I hope I have some luck tonight," Miss Hattie's thin voice said, in a whispering tone that excluded me. "Every time they have something I want I don't have any luck."

"You'll have luck, Aunt Hattie," the girl said. "I just know you'll win that reading lamp."

On a table against the wall the prizes were arrayed, in different categories. If you won a game of bingo you received a ticket. Some prizes were awarded for one ticket, but others required two, and even three. I spotted the reading lamp in the three-ticket category.

The wheel was spinning, and I dropped a kidney bean on two of my cards on the first number called. Miss Hattie's fingers

kept rolling a bean over and over and she stared fixedly at her card. I said conversationally, "Pretty good crowd tonight."

"Sh," said Miss Hattie, and Ginny's elbow nudged my ribs.

I sat silent, trying to think of a conversational gambit and keep track of my three cards at the same time, and suddenly Ginny called out, "Bingo!"

Miss Hattie turned her head quickly and said, "Oh, fine."

"Not me," said Ginny. "Him."

I looked at my card and saw I had bingo. A fireman attendant took the card, called the numbers aloud for checking, and gave me a winner's ticket.

"I only had two numbers covered," Miss Hattie said. "That's lucky, winning the first time."

"I guess this is my lucky night," I said. "I was taking a walk and saw the firehouse all lighted up, so I stopped in. Glad I did."

"Visiting our town?" Miss Hattie asked.

"Just passing through," I said. "It's a nice town."

"Selling?"

"Yes," I said. "Yes, indeed."

Miss Hattie nodded, as if she had me pigeonholed in a commonplace corner, then she said quickly, "Sh. Here we go again."

We all bent to our cards as a fireman spun the wheel and called the numbers. This time I kept careful track and the same card won a second time. I shouted, "Bingo!"

Miss Hattie turned her head, and the lines around her eyes had tightened up. She shifted her bulk on the hard bench and said, "My goodness."

The fireman checked the card, gave me another ticket.

"I never saw such luck," said Miss Hattie, wooden-faced. "I was about to go bingo myself."

"You were awfully close," Ginny said.

"I must have the lucky card," I said. "I won each time with the same card." I dropped it in front of Miss Hattie. "Want to trade?"

"Oh, no, I couldn't do that."

"Go ahead," I said. "I've won twice already. That's enough for me."

Miss Hattie passed her card over and took mine, saying, "Well, that's mighty nice of you. It is, indeed. You know what I'm going to do, Ginny? I'm going to make a little mark on the back of this one, so we can find it next time."

She marked an X on the back of the card and reversed it hastily when the man began calling numbers again. She immediately snatched a bean and whispered excitedly, "I've got that number!"

"That *is* the lucky card, Aunt Hattie," Ginny said.

"In the N," the fireman called. "N-ber 37."

Miss Hattie squealed. "N-37. I that, too."

I also had the number, and put d bean.

"In the N," the fireman called. "N-ber 96."

"N-96," Miss Hattie cried. "I'v N-96!" She gave me a quick smile.

The next number was G-24, wh had, then I-9, and I also had that Two more numbers were called b Miss Hattie put another bean o card. She was exultant; she needed one number to win.

The next number was B-8. I put a on the number and saw I had a li beans across the top of the card. bingo. I sat looking at the row of as the next number was called, t friendly voice said over my sho "Say, you've got bingo. Speak up.

I looked up into the eyes of th man, sighed, and called out, "Bing

Miss Hattie let a bean fall fro hand, and I actually heard the when it struck the tabletop. It w card I had won with, the card traded her. I was unable to meet he

"Well," Miss Hattie said in a st tone. "That's remarkable. I never of anybody winning three times."

"It was your card," I said. "Yo it, really. Won't you take the ticke

"Certainly not," she said firmly.

"I feel awful about this," I said. already won twice. Please take it."

"No, I couldn't," Miss Hattie

THERE was a dead silence, which the attendant collected f next game. Miss Hattie sat stiffly, ing at her card, and I knew how s like a man at the track who had touted off the favorite and watch first choice win going away.

The first number called appear two of my cards, but I did not co spaces with beans; I was afraid I win again. When someone on t side of the firehouse had bingo, I up my three tickets, went to the table, and claimed the reading la

Miss Hattie was watching me. V turned, with the lamp in my hands her drop her eyes swiftly to her card. I went back to my seat and until the end of the game, then I c my throat and said, "There's not over there I can put in my suitcas I'm leaving town in the morni would be a great favor to me, ma you would allow me to make you ent of this lamp."

Miss Hattie gave me a pale, rel smile. "That's very kind of you, couldn't take it. I really couldn't."

"I won't be able to get a good sleep if you don't," I said.

"No, really," Miss Hattie said diminished emphasis.

"Why don't you take it, A Ginny said.

I set the lamp on the table in f Miss Hattie. "I'm just going t away and leave it there if you d said.

She still hesitated, but she was ing. "All right, but I'm going to p for it. You played three times, you, and three cards each time. seventy-five cents."

"Now, please," I said. "I had s five cents' worth of fun out of it."

But she fished in her handb brought out a half dollar and a She held the coins out to me, but my head.

"But I insist this time," Miss said. Her smile was warm. "I ab insist." She reached over and d the coins on the table with my

Truck Drivers Are Taught . . .

"A ROLLING BALL IS ALWAYS FOLLOWED BY A RUNNING CHILD!"

We make it our business to develop

THE SAFEST DRIVERS IN THE WORLD

TODAY, trucks are hauling more than ever before in history. Getting the freight through on time—helping to keep the cost of living down—their drivers watching out for the safety of others on the streets and highways. Always on the *alert.* Quick on the trigger for the moment of *danger.*

. . . a car dashing out of a side street.
. . . a child running from behind a parked car.
. . . a car rounding a blind curve on the wrong side of the road.

Since trucks must roll, we make it our business to develop the safest drivers in the world. Your "Big Brothers" of the highways follow the golden rule . . . they think of *you* first. They know, through years of experience, SAFETY IS NO ACCIDENT!

ot yet," I said, and took her hand, e was about to rise. She sat down and whispered, "Aunt Hattie might out and see us."

"It's dark out here," I said. "She couldn't see."

She raised her face and light from the window illuminated it. Her lips were parted slightly as she gazed up at the stars, and they were parted in a little gasp when I kissed her. But she remained quite still, her eyes closed and her lips warm against mine. Then her hands came up from her lap and held my arms, and she turned her head away.

"Ginny," I whispered, "you're beautiful."

"My goodness," Ginny said. "Mr. Mason, I only met you this afternoon."

"You were beautiful this afternoon, too," I said.

"Now, Mr. Mason," her soft voice said. "Just because I'm a girl from a quiet little town, and you've been around everywhere and all that, don't think I haven't been to the movies, at least. I know all about city slickers."

SPORTING ODDS

Shortly before the end of the 1919 season in a game between the Washington Senators and the Chicago White Sox, the Senators' catcher, Gharrity, came to bat with two out and a fast runner, Ellerbe, on second. Gharrity smacked a clean home run well into the left-field stands. At the crack of the bat Ellerbe streaked for third and rounded it for home. Seeing Ellerbe's needless haste, the Senator third-base coach held out a pair of restraining arms for Ellerbe to slow up and go in easy. Misunderstanding the signal Ellerbe wheeled and raced back to second base, at which point the astonished Gharrity loped past him on his way home. Gharrity was out for passing a runner, the side was retired and Gharrity's otherwise legitimate home run was voided.

"I've always had a yen for small-town girls," I said. "I've always had a yen to live in a small town myself."

"You'd find it pretty dull," she said. "There's nothing to do. Take tonight. Bingo! My gosh, what an exciting evening."

"I thought it was fun," I said.

She shrugged. "And the biggest thing since I can remember will be Warburton Day."

My worries returned. "Ginny, if we only knew what to expect, so that we could be prepared. Can't you give me a hint what your aunt has on her mind."

"So that's it," Ginny said.

"That's what?"

"A kiss in the starlight, under the rose trellis," Ginny said. "Small-town girl melts and tells all. Was that it, Mr. Mason?"

"Definitely not," I said, and tried to kiss her.

But she drew away, saying, "But I'm not telling all. I'm not telling anything."

"Ginny," I said, "that wasn't why I kissed you. It never entered my head. Believe me." I took one of her hands. "The starlight and the roses are pretty powerful, but I'm the one who melted." I got my arm around her and this time she did not resist. What I had said was not far from the truth; I was pretty well melted. It was a long, exciting moment under the rose trellis, and was interrupted when the light in the upstairs bedroom went off and Ginny jumped to her feet and moved quickly away, toward the door. I followed.

Under the overhang of the eaves she turned and whispered, "If she looked out the window she could see us there."

"But she can't see us here."

"Now that's enough," Ginny whispered. "There are lots of stars and lots of roses and I might melt after all. Good night, Mr. Mason."

"Wait," I said.

But she had opened the door and light came brightly through. "Are you really leaving in the morning?" she asked.

"Yes."

"But you're coming back Wednesday, aren't you?"

"I'll see you at the dance."

I saw a faint smile on her lips. "Do you know Clyde McDonald?"

"Yes."

"He's going to stay with us Wednesday night," she said.

"Ginny," I said, "what are you getting at?"

"Getting at?" Her blue eyes opened wide. "What do you mean?"

"Clyde McDonald as a topic of conversation simply isn't on the agenda for tonight," I said.

"I was only curious," she said. "After all, he's staying here Wednesday night. Is he good-looking?"

I shrugged. "They say he goes for blondes."

Ginny laughed, said, "Good night, Mr. Mason," and closed the door.

I stood a moment in the darkness, looking at the closed door, then I walked slowly back to the hotel. I thought that Ginny Perkins was a little arch, and that possibly she worked overtime at being girlish, but these were the sort of critical reservations a man makes when he is interested in a girl; they were faults that would change with time. . . .

The plane came in low, cleared a roof just west of the administration building of the Municipal Airport, and braked on the runway in late morning sunlight. It had been another night with practically no sleep, another night of taxi rides and waits and plane changes that had brought me to Jackson, Mississippi, where Governor Warburton's campaign train was due at half past ten.

I had checked the Governor's schedule the night before in Hydetown and decided to meet the train in Jackson and give a full report, and I was weary and depressed as I took a taxi from the airport to the Union Station. The clock hands in the station stood at well past eleven o'clock when I arrived, and the lack of crowd showed that Governor Warburton must already have come through, but I went into the station to investigate.

The special train had not yet been shunted to a siding. I walked back to the Governor's private car and swung aboard. I found no one there, and went on to the work car ahead, where I heard the clatter of typewriters and the thumping noise of the mimeographing machine. As I entered the car a sprightly voice said, "Well, Kit Carson, what's doing up ahead? Any Indian signs?" Lucy Strawn sat at her desk by the window, with sunlight on her warm brown hair.

"There haven't been any Indian signs since the invention of indoor plumbing," I said. "Where's everybody?"

"Everybody's at the hotel," Lucy said. "But here's anybody. What did you find out?"

I leaned against her desk. "Nothing."

"Nothing at all?" Lucy frowned. "Look, Roy, this is serious."

"I took it seriously," I said. "What I mean is I didn't find anything that made any sense, only that the Governor's old schoolteacher has graded him pretty low. She's not coming to the reception."

"Why not?"

"I don't know why not. Bill over at the hotel, too?"

"Yes."

"I think I'd better go over," I said. "Where's the hotel?"

"I'll show you," Lucy said. "I want to be in on this."

THE hotel was on Capitol Street, only a short distance away. As we walked there Lucy said, "Mr. McDonald has been very much with us. It's been gay. Oh, so gay. Lunch, dinner, breakfast. I've been getting quite a rush from the fat boy."

"He's a lonely man," I said. "It must be pretty lonely to be a man nobody trusts."

She gave me a quick look. "Roy—" she began.

"Yes?"

"Never mind."

"Never mind what?"

"Nothing," Lucy said. "Except I'm kind of cute. Do you think I appeal only to lonely men?"

"I didn't mean anything like that," I said. "Don't go feminine on me, please. Did you get anything out of McDonald?"

"Yes," said Lucy. "Lunch, dinner, Manhattans, Daiquiris, sidecars, pousse-cafés, an earful of petty bias and a tummyful of Clyde McDonald."

We had reached the hotel, and Lucy led the way to the elevators. The Governor's suite was high up in the hotel, and the windows overlooked the town and the Capitol. It was a clean, tidy town, as shiny as a Sunday morning.

Governor Warburton was relaxed in an easy chair, reading a newspaper, and Bill Evers was on the telephone. When I entered with Lucy, the Governor put down his newspaper and Bill dropped the telephone on its cradle in the middle of a sentence and shouted, "Damn it, where

have you been? Why didn't you answer my wire?"

"I'm answering it in person," I said.

"Roy, have you seen the papers?" the Governor said. "That New Orleans speech last night went over big."

I pulled up a chair. "Governor, what do you remember about an old lady named Harriet Perkins?"

"Miss Hattie?" the Governor said. "Why, she taught school. Why?"

"It's all over town that she's not coming to your reception," I said, and hesitated an instant. "I'm afraid it's my fault."

BILL EVERS jerked his head nervously, and excitement made him stutter. "Wh-what in hell have you done now, Roy?"

"It's your fault, too," I said.

"M-my fault? I don't know the lady. What are you talking about?"

"You helped me with that part of the book," I said.

"The book?" Bill Evers groaned. "That damned book again."

"There's something in it that offended her, Governor," I said.

"Where is it," the Governor broke in. "Bill, let me see one of those books."

"Page 76," I said dismally.

"Let me see it," Governor Warburton said, and took the book from Bill's hands. Bill had opened it to page 76, and read the paragraph over the Governor's shoulder. Bill finished first, and gave me a blank look. "I don't see anything wrong with that."

"Neither do I," I said.

But Governor Warburton's eyes had widened. "Dammit, I never got the highest marks in my class. I never walked two miles to school and back every day. And when she kept me after school—Oh, my God!"

We all stared at the Governor. He dropped the book to his lap and said, "That sheepskin coat!"

"Governor," Bill said, "what's a sheepskin coat got to do with it?"

"That must be it," the Governor said, and picked up the book from his lap.

"Let's have it, Governor," Bill said.

The Governor looked at him and understood, as I did, that Bill's worry and his affection for the Governor had brought the harsh tone into his voice. The Governor smiled and said, "It's nothing very damning, Bill, but I imagine it could be made to look so by a man like Clyde McDonald. You see, when I was a boy I wanted a sheepskin coat and I saved up the money to buy it from the mail-order house. It cost fifteen dollars and ninety-five cents, postpaid, and it was a beauty. I couldn't wait to go coon hunting in that sheepskin coat, and I was down at the post office every day, asking if it had come yet. I carried the money around in my pocket, tied up with cotton string and weighted to my jackknife."

Governor Warburton leaned back in his chair. "I was going to school with Miss Hattie in those days, and we had a little fund, our school did. It was Miss Hattie's idea that the best way to keep us out of trouble on Halloween was to have a party at the school, and she got the parents and the kids to kick in a fund for the expenses. She made me treasurer, and I had charge of the money—"

"Governor," Bill broke in.

"Just be patient," the Governor said. "I'll give you the whole story, as it happened, and let me say I was acutely aware of my responsibility for that school fund. I kept it in a cigar box, and I kept the box under my mattress, and not a day went by that I didn't look in it to see if the money was safe. But, you see, they had a county fair about that time and—did I ever tell you this, Bill? I used to ride a little when I was a kid. Racing quarter horses was the sport back in Hyde County."

"You mean you rode in *races*, Governor?" Bill said hollowly.

"Well—uh—can you fold a letter, put it in an envelope, seal the envelope, stamp it—that sort of thing . . . ?"

COLLIER'S

JEFFERSON MACHAMER

"All us kids rode in those days, Bill," the Governor went on. "At the Hyde County Fair, I was up on a paint horse named Spot, and he was fast. He was very fast. I had ridden Spot before, and I didn't think there was a horse in the county that could beat him at a quarter of a mile. Of course a difference of opinion makes a horse race, and you know how it is at a county fair. It's a pretty exciting thing, and when a kid is mingling with adults, and talking horses with them on equal terms, it goes to his head. Well, I imagine you've guessed what happened. I bet fifteen dollars on Spot to win the race. Fifteen against ten."

"The school money, Governor?" Bill asked weakly.

"Not the school money," the Governor said. "The sheepskin coat money, Bill."

Lucy Strawn sighed and murmured. "Poor old Spot, he didn't come through."

"He cast a shoe," the Governor said. "He would have won, but he cast a shoe and Johnny Mills beat me out. So I went home with ninety-five cents in my pocket and my father was waiting for me with a big grin on his face and he said, 'Willie, I've got a surprise for you. Here's your sheepskin coat.' It was a surprise, all right. He had been down to the post office and the package was there, C.O.D., and he had paid the money and brought the coat home. He gave it to me and he said, "You owe me fifteen dollars and ninety-five cents, Willie."

"Lucy," Bill Evers said. "Pour me a drink. There's a bottle in the bathroom."

"Since you and Roy worked up that book, you know something about my father," the Governor said. "He was a very strict man, and I didn't have the courage to tell him what had happened. I went up to my room and got out the cigar box. I took out fifteen dollars and added it to the ninety-five cents I had left and gave it to my father, and I thought I could work like the devil and fill that box up again before Halloween. I had ten days to do it. I sawed wood and I did every kind of job a boy is capable of, but I couldn't get enough work. I sold the coat to Meathead Fisher, and he beat me down to six dollars for it, but Halloween got closer and closer and I was still short, so I went to Miss Hattie and told her the story."

Lucy Strawn brought Bill Evers his drink, and he took two prodigious gulps. Lucy said softly, "Gee, Governor, you were only a kid. You got caught in the middle. What's wrong with that? You paid the money back, didn't you?"

"Yes," the Governor said. "I brought the box to Miss Hattie, and she ma[de] the difference, and for a couple of m[onths] I stayed after school every day an[d] ried wood and ashes and washed [the] boards and cleaned erasers and did [any] other job Miss Hattie could think o[f] she had imagination. I worked the n[ine] out, and she never said anything ab[out] to anybody. It was just between [me] Hattie and myself."

"But now," I said miserably. "[Now] she's threatening to tell."

"Roy," the Governor said, "it [was] your fault, but you couldn't have c[hosen] worse words to put in that book if [you'd] been Clyde McDonald himself. I[n the] first place, my marks were poor. [In] second place, what she kept me [after] school for was not, in her view, a 'j[ust a] juvenile misdemeanor,' as you cal[l it]. In the third place, she never pre[dicted] great things for me. She predicte[d] I'd end up in reform school."

"So she's planning to tell the [town] when it will hurt the most," Bil[l] "How the candidate for Vice-Pre[sident] of the United States, the sound bu[siness] man, the sober budget balancer, th[e] est administrator, dipped into [the] entrusted to his care and bet it on a [sure] race.

"Now, Bill," the Governor bro[ke in]. "It wasn't that way. It—"

"It will be that way to Clyde M[c]ald," Bill Evers said. "That's wh[at I'm] thinking of. It will be a field d[ay] him. Governor Willis G. (The Gre[at H]pologist) Warburton's boyhood [is] teacher refuses to come to the re[ception] for the Governor because she thin[ks he's] crooked and a liar to boot."

THE Governor winced, but d[id not] protest, and an uneasy silen[ce] scended on the room. Bill finish[ed his] drink and said, "The worst thin[g that] ever happened to us was whe[n Roy] Mason learned to read and write."

"Now that's enough," Governo[r War]burton said sharply. "It's not Roy [Mason's] The fault is all mine. I should ha[ve read] the book."

"Okay," Bill Evers said. "Sorry."

"What's done is done," the G[overnor] said. "Between us, Roy and I ha[ve] ated a nasty little situation. Th[e ques]tion is, what can be done about i[t]."

Bill looked up. "You got a [thing] on *her*, Governor?"

"On Miss Hattie?" The G[overnor] smiled. "Of course not."

"We've got to dig something u[p]," Bill said. "There must be some dir[t] where."

e Governor shook his head. "You're

ostly a train ride, then the Birming- speech tomorrow night. Next stop, town."

hat's what I'm thinking," said the rnor. "Next stop, Hydetown." He glanced at me. "Roy, how was the plane service to Hydetown?"

"Not good, Governor."

"Plane crowded?"

"Not very."

"Then I suppose we could get accommodations without too much trouble?"

"We?" said Bill.

"I was thinking I might make a quick trip to Hydetown and talk to Miss Hattie," the Governor said.

"You mean leave the *train?*" Bill demanded.

"Why not?" the Governor said mildly. "There's nothing on the schedule tomorrow but a train ride. I'll be in Birmingham for my speech tomorrow night, Bill."

"And how do you think you're going to get to Birmingham, Governor?"

"Fly."

"No," Bill said. "Positively no. You'd be recognized on the plane. It would start a raft of rumors."

"I'll take that chance," the Governor said. "I have to." He looked at his watch. "It's about time to call on the Governor of Mississippi. Bill, you work out the details. Get the plane tickets. Roy, you'll come with me."

"If anybody goes, I'm going," Bill said.

"You'll be needed on the train."

"But, Governor, how about your Birmingham speech? You haven't prepared your Birmingham speech."

The Governor hesitated a moment. "I'll take Lucy along," he said. "I'll dictate it to her on the plane."

"Not Lucy," Bill said. "McDonald will wonder what happened to her. She can't go."

"Then I'll speak off the cuff in Birmingham," the Governor said. "I've done it before. Now look, here, Bill, get John Mills on the telephone and ask him to meet us at the airport and drive us to Miss Hattie's house."

"Governor," Bill began. "You can't—"

"Those are orders, Bill," the Governor broke in. "Get busy on it."

Bill scowled, and pressed his lips together, and blew out a hissing breath of protest, but he was on the telephone calling the airport when I left the Governor's suite. I had a good lunch at a café on Capitol Street and walked to the train. I was tired, and was on my way to my drawing room when I met Clyde McDonald in the aisle. His eyes opened wide.

"Say," he said, "I thought you were in Hydetown."

"Now right in here . . . Are you familiar with those air jets in the fun houses of amusement parks?" HANK KETCHAM

"I just got back," I said wearily, and it was an instant before I realized what his words meant. I looked at him sharply and said, "What gave you the idea I was in Hydetown?"

A grin spread on Clyde McDonald's fat, malicious face. "Grapevine," he said.

I frowned. It was not like Lucy Strawn to be indiscreet, and I was choosing the words I would say to her as McDonald pushed on past me. I hesitated a moment, then followed and saw him getting his suitcase out of his drawing room.

"Going somewhere?" I asked.

"I'm dropping off here in Jackson," he said.

"Back to Washington?" I asked.

"Maybe."

"We thought you'd be staying with us until we got to Hydetown," I said.

"Nope."

"I'm sorry if we've bored you," I said. "I'm afraid there's not much news in this campaign. Your kind of news I mean."

"I don't wait for news to come to me," Clyde said, and gave me a one-sided grin. "I go after my news."

"Have a good trip," I said, and turned into my own drawing room. I waited there, watching out the window, until I saw him get off the train, suitcase in hand, then I went down to the platform and followed him. He went into the station, bought a ticket, and moved toward a gate. A chalked notice stated the train would leave at two eighteen. I looked up the two eighteen in the timetable. It was not a Washington train. I was sure then where Clyde McDonald was bound. He was going to Hydetown, and he had undoubtedly received a telegram from Melvin Fisher. That was how he knew I had been to Hydetown.

I telephoned the Governor's suite at the hotel, and Lucy Strawn answered. She told me that Bill and the Governor had gone on to the Governor's mansion for lunch, and I said, "How about your luncheon date?"

"I'm waiting," she said. "Why?"

"It will be a long wait," I said. "Clyde just got on a train for Hydetown."

"He did?" Lucy cried. "That's swell. Then I can go with you and the Governor, after all."

"No. Bill told you—"

"Bill told me to keep an eye on Clyde McDonald, didn't he?" She laughed.

"It's up to the Governor," I said. "If he wants you, okay. But listen, Clyde is on his way, and we'd better get there first."

"Roy," Lucy said, "the plane leaves at seven o'clock, and I'm planning to get three tickets."

"All right," I said. "Wake me in time, if you can."

LUCY STRAWN awakened me. She pushed the door of my drawing room open an inch or so and I heard her urgent whisper, "Snap out of it, Roy. It's late."

My window curtain was nearly closed, but through the gap at the bottom I could see that it was dusk outside.

"Plane leaves in half an hour," Lucy whispered.

I dressed and packed my suitcase, but did not take time to shave. I lugged the suitcase to the Governor's car, and found Lucy waiting with a portable typewriter, a small overnight case and a Gladstone bag belonging to the Governor.

"Where's the Governor?" I asked.

"Come on," said Lucy, and picked up her overnight case. I grunted and reached for the portable and the Governor's bag. She led the way to the station platform and I followed her in silence through the waiting room to a cab. Once inside it I said, "Don't be so damned conspiratorial. Where's the Governor?"

"We're picking him up," Lucy said. "Just relax, Roy."

The cab moved along Capitol Street and I heard sirens, saw a car go by under

Enjoying Life . . .

IN THOSE DAYS TOO!

The living room has always been the center for friendly family gatherings. In the modern living room the gramophone, stereoscope and pianola of other days have been replaced by home movies, television, radio-phonographs . . . Yes, times have changed but the preference for Miller High Life by those who know fine beer continues . . . Now as then—Enjoy Life with Miller High Life.

GEORGE PRICE

Five firemen dressed in tuxedos, patent-leather pumps, boiled shirts and black ties responded to an alarm.—News Item

TAKE A LETTER

Mrs. Osgood N. Fletch,
17 Russell Street,
Ardmore, Okla.

My dear Mrs. Fletch:

I want to offer my sincerest apologies for the way we fellows busted in on your formal dinner party last Tuesday evening. As I said to Ralph if you never ask us out to your place again it's our own fault.

Fred is ashamed of himself for breaking down the front door with an ax instead of ringing the bell and waiting for the butler, but Fred gets excited and impatient whenever he smells smoke. He didn't even wait to scrape the mud off his boots, and, to make matters worse, he rushed into the dining room without even saying good evening and started playing that soda-acid extinguisher all around as if he owned the place.

I really laced into Carl—he's the one with the dirty fingernails—for the way he slung that lovely girl in the low-cut evening dress over his shoulder as if she had been a bag of cement. I made it clear to him that a gentleman always offers a lady his arm. Not when her dress is on fire, he said. That was bad enough, but when he got her outside he didn't even offer her a chair or a cigarette. He just dumped her plop on the lawn and turned the hose on her. I'm afraid Carl just has no manners.

Jim Osborn says if he embarrassed you by calling your attention to the hot sparks in your bureau drawer he's terribly sorry. Also, he's no end upset because he entered your bedroom window without knocking. He says he would have removed his helmet but some pretty heavy pieces of plaster were falling from the ceiling. However, I did take him to task for flicking cigarette ashes on your living-room carpet.

I hope you will excuse me for the rude manner in which I ducked out early through a side window. I screamed good night to you but I doubt if you were able to hear me over the shouts of the men, the breaking of glass and the splash of the hose. I looked so darn' shabby alongside of the other guests in my red shirt, old sweater, rubber boots and raincoat that I decided to go home, shave, wash up and get into my tux. When I returned I found that the party had broken up, so I just left my card and some flowers on that charred mahogany table in the front yard, nibbled on some hot hors d'oeuvres I found in the flower bed next to the front porch and departed.

Yours truly,
Jack Cluett, Engine Co. 385

"Havelock Ellis?" said Lucy. "That has-been!"

I gave her a look, and she grinned and turned to the window. The plane was taking off. It cleared a blinking light and began a slow, banking turn. The lights of Jackson appeared to our left.

The plane droned on northeastward. I dozed a while, and did not come awake until the lights of Atlanta showed below. The plane landed at the airport and we waited in our seats. Two passengers left the plane, and several more came aboard.

In the air again, I promptly fell asleep, and when I awakened, my head was on Lucy's shoulder. I sat up and she gave me the wise smile a sleeper on a public conveyance usually receives from his companion on awakening, the sort of smile that makes him wonder what he has said in his sleep.

Lucy asked, "What color is her hair?"

"Whose hair?"

"Don't blush again."

"I never blushed in my life," I said.

"Or shaved, either," said Lucy. "And incidentally, you snore. I suppose she's a blonde."

"As a matter of fact, she is," I said. "Her name is Ginny Perkins and she's a pretty sweet, natural kid. So don't make any cracks to her."

Lucy quite needlessly smoothed a seam in her gray tailored skirt; her fingers plucked at a thread I could not see. "You know, Roy," she said, "we kid around a lot, and all that, but sometimes you disturb me. You say things that make me wonder."

"Wonder what?"

"What you really think of me."

I was surprised and said, "I didn't think my opinion would carry any weight with you, one way or the other. But, as a matter of fact, I think you're pretty fine."

"Well, thanks," said Lucy.

"You know your job, and you can do it without asking a lot of questions," I said. "That's a pretty rare quality."

"At least I got my bait back," Lucy said wryly. "But I think I'd prefer my qualities well-done, not rare. How about my legs? They're done to a turn, aren't they?"

"They are," I said.

"And my hair is nice," she said.

"It's plenty nice," I said.

"Well?" said Lucy.

"Well what?"

"Well and good," she said. "Well and good. And the hell with you, anyhow."

THE plane was banking, and I saw the lights of an airport down below. The hostess passed smiling along the aisle, reminding us to buckle our safety belts.

"Lucy," I said, "you're a very handsome girl, but I didn't think it was necessary for me to tell you that. You're pretty well aware of it already. It shows in everything you do."

"It does?" she said tightly. "How?"

"Well, in the way you walk," I said. "That little wiggle."

"I don't wiggle!"

"Yes," I said. "You wiggle. And it shows in that smile of yours. It's sort of contented. When you smile at a guy you make him think he's just a mirror reflecting it back at you."

"You heel," said Lucy.

"And it shows in the way you pat your hair and look at your nails and lift your right shoulder," I went on. "It shows all over you."

"Mr. Mason," she said. "You say the nicest things."

"You asked me," I said. "I wasn't criticizing. It's usually that way with your type. Girls who have been around are always pretty sure of themselves."

"Been—around?" Lucy said.

"You know what I mean," I said. "Sophisticated. You're not denying you're sophisticated, are you?"

"I have an overlay of sophistication," Lucy said. "But it's wearing pretty thin right now. In just about a minute it will

crack and the primitive woman will break through and gouge out your eyes."

She was actually, and quite inexplicably, angry. I suppose few people are interested in a frank appraisal of their personalities, but there had been plenty of give-and-take between Lucy and myself. Her reaction puzzled me.

The plane bumped on the runway, and Lucy, somewhat flushed, unbuckled her belt in silence. The plane taxied up to the apron, and as soon as the door was opened Lucy went ahead of me down the steps. I followed her into the administration building, without a backward glance for Governor Warburton.

In the waiting room, smoking a cigar, was John Mills. He moved his head slightly, a nod toward the door, and Lucy and I went on out and waited to claim the luggage. A moment later Governor Warburton came through the door and moved on past us into the darkness.

By the time we had retrieved our luggage, John Mills had come out and we saw his solid figure at the edge of the circle of light. We took our bags and Lucy's portable and followed him into the parking area.

WE WERE on a three-lane highway, driving very fast through the night. John Mills said, "It was a surprise when I got that phone call to meet you here, Willie. At first I thought it was a gag. What's the trouble, anyhow?"

"I guess you're the cause of all the trouble, John."

"Me?"

"When you beat me in a horse race," the Governor said. "That time Spot cast a shoe. Remember?"

"Do I remember!" cried John Mills. "It was the only time I ever did take a race off you."

Governor Warburton began explaining to his friend just what the situation was, and I leaned back on the seat beside Lucy and lighted cigarettes for each of us. She took hers without a word.

"We'll be about an hour on the road," I said. "Lucy, you and I always ride each other. I never guessed you were sensitive."

"I'm not sensitive," she said. "No more than anybody." She took a deep drag of the cigarette. "But, Roy, enough is enough. You'd praise a cook for dishing a good dinner. You'd compliment a bootblack for a high shine. Sometimes you ought to praise a girl for—for—"

"For what?"

"For being a girl," said Lucy. "Isn't that enough?"

"It is," I said. "You bet it is." I squeezed her hand. "And you're plenty of girl, Lucy."

The Governor turned his head. "Roy, John and I have been talking it over. Now, it's pretty late. It will be touching midnight when we get to Hydetown."

"Ginny Perkins," John Mills said. "She's our problem."

"We don't want the word to get out that I paid a midnight call on Miss Hattie," the Governor said. He grinned at me. "You and the girl got along pretty well, didn't you, Roy?"

"Passably," I said.

"Roy," the Governor said. "What do you think? Think you can get her out of the house?"

"You can use this car," John Mills said. "There's a roadhouse out on the highway, the Route One Casino."

"I'll try, Governor," I said.

The headlights picked up a sign that said: HYDETOWN: *Rotary Meets Wednesday*. John Mills said, "I'll stop a way down the street, and we'll get out there. Then you drive on up to the house, Mr. Mason."

He turned the car to the curb and stopped by a sycamore tree. "We'll wait here," he said. "You take the car, Mr. Mason, and as soon as we see you drive away with Ginny, we'll hustle up there."

"One more thing, Roy," the Governor said. "Bill Evers and I mapped this thing out. If we *are* seen here, we call up the hotel. There's a photographer there from Ego Magazine, to make a big layout on Warburton Day. If we're seen we call him and pretend it was a prearranged stunt, a sentimental call on my old schoolma'am."

"Okay," I said, and got in behind the wheel. I drove away, leaving them grouped under the sycamore tree, and stopped in front of Miss Hattie's white cottage a hundred yards farther on. A porch light was burning, and most of the downstairs lights were on. I went through the gate in the picket fence and up to the door.

I knocked, and heard slow steps approaching. The door came open a few inches and I stood facing Miss Harriet Perkins. The lines around her eyes tightened and she said stiffly, "So it's you. I suppose you've come for your reading lamp?"

"The lamp was a present for you."

"I don't accept bribes, young man," Miss Hattie said crisply. "Come in and get it."

The lamp was on a hall table, the cord wrapped around its stem. Miss Hattie picked it up and held it out to me.

"Just take it along, young man," she said, in a tone of dismissal.

"Of course," I said. "But now that I'm here, may I speak to Ginny a moment?"

"Virginia's not here," Miss Hattie said.

"Do you know where I can find her?"

"At the depot," Miss Hattie said, with a shrug of her vast shoulders. "She went down to the depot. Good night, Mr. Mason."

I BACKED away from her and she closed the door firmly in my face. I ran quickly down to the sidewalk, and in the light of a corner street lamp, made a beckoning gesture. I saw the three of them hurrying toward me.

"Ginny's not here," I said. "She's down at the depot."

"That's bad," said Governor Warburton. "We'll have to work fast. John, what time does that train get in?"

"What train?"

"I don't know what train, except Clyde McDonald will be on it, coming here from Mississippi."

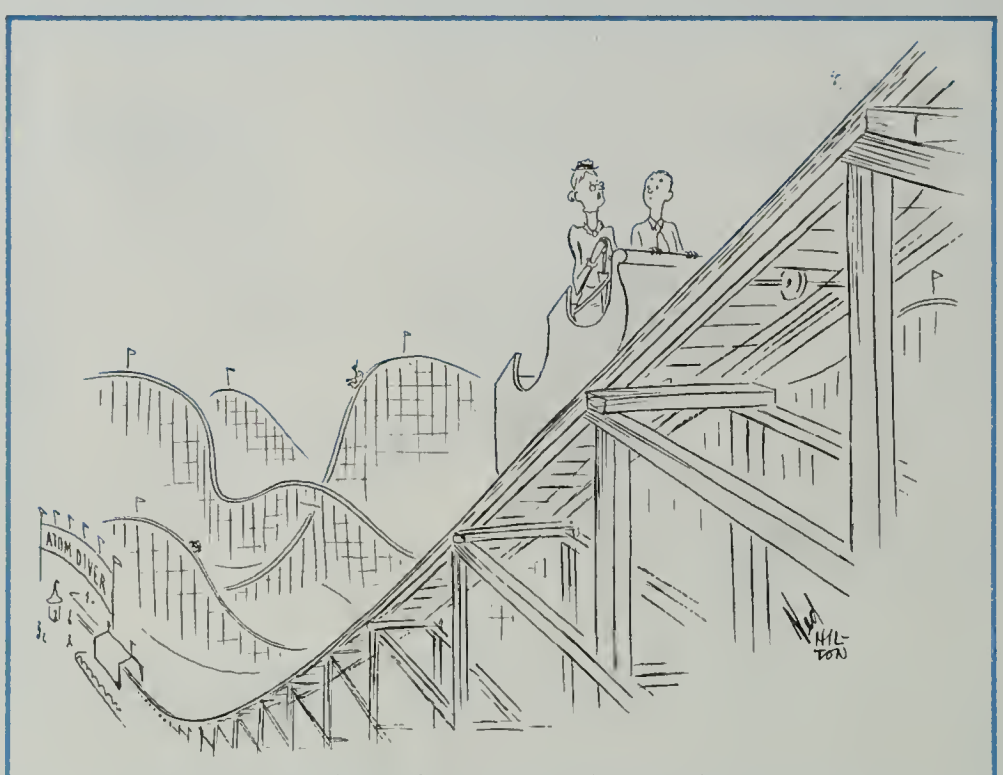
"I see," John Mills said. "I guess that would be the 12:02." He looked at his watch. "It's one minute to midnight now."

"Then let's go," the Governor said, and moved along the walk to the cottage. He knocked hard at the door.

A voice inside said, "I said *good night*, Mr. Mason."

"Miss Hattie, this isn't Mr. Mason," the Governor said. "Get out your peachtree switch. This is Willie Warburton."

There was silence, then the Governor went on, "You always used to listen to my side of the story, Miss Hattie. I hope you'll listen now."



Slowly the door was opened and we saw Miss Hattie's pale eyes, opened very wide. "So it's you, Willie," she said.

"I made a long trip here to talk to you," the Governor said. "Miss Hattie, it's like the old days. Here I am in trouble again, and nobody's fault but my own." His smile was rueful, and all the frank Warburton charm was in it. "May I come in?"

"I'm surprised at myself," Miss Hattie said. "But, yes, I'll let you come in. Come in, Willie."

"This is my secretary, Miss Strawn," the Governor said. "And my assistant, Mr. Mason."

"I know Mr. Mason," Miss Hattie said. She moved ahead of us into the living room and lowered her shapeless bulk into a chair. I noticed a footstool and moved it toward her.

COLLIER'S "Well, what's so exciting about this?" NED HILTON

"Miss Hattie," the Governor's gentle voice said, "I came to ask you to listen to my speech in Hydetown Wednesday." He held up his hand. "Now wait a minute. First, I want you to know what I'm going to say in that speech. I want you up on that platform with me when I say, 'Ladies and gentlemen, this is my old schoolteacher, Miss Hattie Perkins. I guess I was the worst boy in her class. My marks were as bad as anybody's and I was a lazy, shiftless kid before Miss Hattie got hold of me."

"Willie, you weren't as bad as that," Miss Hattie said. "I've had worse boys than you."

"I was bad enough," the Governor said. "And let me tell you this, old dear. Mr. Mason put that paragraph in his book without consulting me. I never read the book. I never knew what he said. Bad as I was as a boy, Miss Hattie, I think you'll believe me when I say I wouldn't have made any false claims for myself."

"That's true," Miss Hattie conceded.

"I hope I never will," the Governor went on. "Miss Hattie, it hurt me deep when I heard you weren't turning out on Wednesday. I couldn't understand it then, because I hadn't read that book. But when I get up on that platform I'll tell the facts, and if you say so, I'll tell the story of that sheepskin coat."

"What sheepskin coat?" Miss Hattie asked. Then she nodded. "Oh, you mean—"

"Yes," the Governor said. "I mean the horse race at the Hyde County F

looked into Melvin Fisher's sour, s
cious eyes. A step behind him was

...ow, Wide and Handsome!

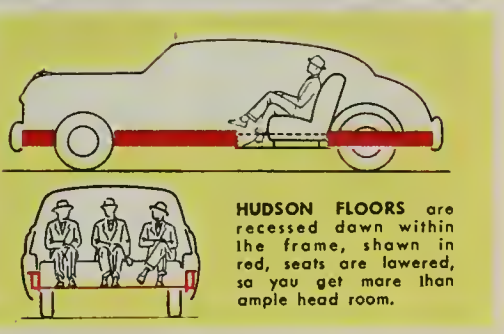
...con's new "step down" principle — one of the great forward moves in automobile design — ...s you beauty, roominess, comfort, riding qualities and safety obtainable in no other motor car!

...AT advances don't come often in the automobile ...orld, but when they do, it is certainly to your ...tage to investigate!

... America knows, there's a distinguished air of ...lined beauty about the New Hudson. This graceful ...f low-built line is instantly recognizable because it ... not through compromise, but develops *naturally* ... a recessed floor which is the key to a basically ...nd exclusive design principle.

...this new design principle, space under the floor ...n frame members that is usually wasted is brought ...e car and made available for passenger use. The ...Hudson is the only car you step down into. This ... a "step-down" zone in an exclusive, all steel ...ilt body-and-frame* permits Hudson to build the *car on the highway* — only five feet from ground ... — while maintaining more than adequate interior ...oom!

...lon't think "low, wide and handsome" tells the ... story of this new design principle. Far from it!



...xample, Hudson has a hug-the-road way of going ...ss-winds and on every conceivable kind of highway. When you see how this car takes even the sharpest curves, it will spoil you for any other type of automobile! This remarkable ride is largely due to the fact that Hudson's new design provides the lowest center of gravity in any American stock car — yet road clearance is ample!

You sense this delightful conformity to the road the minute you begin to ride; and this stability, plus the protection of riding encircled by a sturdy box-section steel frame, gives you a grand feeling of safe well-being!

Many other important advantages stem from Hudson's new design. Among them is an abundance of usable space — not only *more* head room, but *roomier* seats than in any other mass-produced car built today! This is because you "step down" onto floors that are recessed down within the frame — seats can thus be lowered and brought into proper relationship with the new, lower top.

We cordially invite you to investigate and drive this remarkable car. The nearest Hudson dealer will show it to you; and in addition, he will supply you with a complimentary copy of a new booklet, "The Importance of Stepping Down," which explains the many sensational advantages of Hudson's new design principle. Hudson Motor Car Company, Detroit 14.

*Trade-mark and patents pending

HUDSON FLOORS are recessed down within the frame, shown in red, seats are lowered, so you get more than ample head room.

YOU RIDE DOWN within a base frame (shown in red above) and rear seats are positioned ahead of the rear wheels so that full body width becomes available for wonderfully roomy seats—four inches wider than the car is high! Box-section steel girders encircle and protect the passenger compartment.

Hudson Commodore Six-Passenger Club Coupe, typical of the roomy, luxurious interiors in all New Hudsons.

YOU ARE INVITED to try automatic gear shifting in forward speeds as provided by Hudson's Drive-Master transmission—by far the easiest of all ways to drive. You can accelerate as long and as fast as you like in pick-up gear, then lift your toe momentarily, and you're in high. The shift into high comes *only* when you are ready—you're in control, but Drive-Master transmission does all the work! Pushbutton control on the instrument panel provides instant change to conventional driving if ever desired. Drive-Master transmission is optional on all New Hudsons at extra cost.

...e only car you step down into

Hudson

McDonald, carrying a suitcase. He saw me and put it down with a thump.

"Where in hell did *you* come from?" he said, his surprise so real that he forgot to slide the words out of the corner of his mouth in his customary tough-guy enunciation.

A soft voice said, "Why, Mr. Mason!" and I met Ginny's bright blue eyes.

"Hello," I said, and added unconvincingly. "I came to get this." I held up my hands. All the time I had been clutching the reading lamp I had won at the bingo game in the firehouse.

"At midnight?" Ginny said.

"Ginny, I came to see you," I said. "I was in town unexpectedly, and Mr. Mills drove me over."

"Unexpectedly is right," Clyde said.

"I'd ask you to come in, Mr. Mason," said Ginny. "But you're already in, aren't you? Does Aunt Hattie know that?"

"Of course I know it," Miss Hattie said sharply, and rose from her chair. "Mr. Mason, if your offer still holds good, I'd love to keep that lamp."

"I'd love for you to keep it," I said.

MELVIN FISHER stepped forward. "Miss Hattie, I want to introduce your house guest, Mr. Clyde McDonald, of Washington, D.C."

Clyde produced a big grin and approached her, holding out his hand. Miss Hattie took it, murmuring, "I'll show you to your room. Please come upstairs with me."

She went on to the staircase and Clyde McDonald said to me, over his shoulder, "You get around, Roy."

"And you're a long way from Washingt[illegible]," I said.

"I guess for the same reason," said Clyde. "From all I hear."

I could not help grinning. "My reason was this reading lamp," I said.

"You'll find your room at the head of the stairs, Mr. McDonald," Miss Hattie said. "First door on your left."

"Yes," he said, and picked up his suitcase. "I'm coming."

Melvin Fisher had stood by with a puzzled air, and John Mills had said nothing. The two men eyed each other, and Fisher commented, "Up late, ain't you, John?"

"That I am," John said. "I wouldn't want to close my eyes, a night like this."

Melvin Fisher grunted, and gave Ginny Perkins a meaning look. "I'll be going now," he said. "See you in the morning."

"Yes," she said, "in the morning."

"I'll give you a lift, Roy," John Mills said. "If you're ready to go."

"Coming," I said.

"Aunt Hattie's getting your money, Mr. Mason," Ginny said. "You really must take it."

"I'll be waiting in the car," John Mills said, and went quickly out. I saw that he wanted to keep an eye on Melvin Fisher, and he was curious, as I was, about the Governor and Lucy Strawn.

Miss Hattie called from upstairs, "Ginny, will you take this, please."

Ginny went up to meet her great-aunt, and returned with the seventy-five cents. She said as she gave it to me, "What strange alchemy did you use to win Miss Hattie over?"

"Someday I'll tell you the whole story." I said. "I can't now." I edged toward the door, and she followed me.

"Yes," she said, "you're unpredictable. Barging in at midnight to claim your reading lamp."

"Ginny, you know the lamp was an excuse," I said. "I barged in to see *you*."

"I wonder," she said.

I looked into her bright, observant eyes. We were standing close together and I smelled her perfume. Her blond hair brushed against my cheek. I caught her suddenly and kissed her hard.

She moved back, whispered, "Good night."

"Good night, honey." I said. I h[illegible] a great sigh, and went down to the [illegible]

"Now what?" said John Mills.

"Drive around the block," I sugg[illegible] "Stop under that same sycamore tre[illegible]

We went around the block a[illegible] stopped the car under the sycamo[illegible] turned off the lights. An instant[illegible] two dark figures emerged fro[illegible] bushes. I had the door open, and [illegible] and the Governor jumped in. The G[illegible] nor said tensely, "Get going, Joh[illegible]

No one spoke again until we we[illegible] blocks away, then the Governor [illegible] mightily and said, "Well, we're [illegible] that. Let's head for the airport."

John Mills turned onto the hi[illegible] and the car moved swiftly westwa[illegible] low cloudbank hid the stars, and [illegible] ning flashed up ahead. John Mil[illegible] casually, "Looks like we might [illegible] rain. We need rain around here."

"I don't recall a year when this c[illegible] didn't need rain," the Governor [illegible] "It's as dry as my throat."

John grinned. "Got a little som[illegible] there in the glove compartment. [illegible] to get it out, Roy?"

It was a pint of excellent rye. I [illegible] it back to the Governor and he [illegible] sighed, and returned the bottle t[illegible] "Roy, pass the bottle to poor old [illegible]

"Not now," John said. Lig[illegible] lighted his face as he spoke, and [illegible] was a tremendous clap of thunder

"It will be a storm, all right," [illegible] said. "Hope it's all clear on Wedn[illegible] Willie."

"If I bring a little rain to [illegible] County," the Governor said, "that[illegible] ter than a speech, isn't it?"

A few miles later the storm [illegible] and we were startled by the viole[illegible] it. Rain splattered on the highv[illegible] driving salvos, and John Mills slow[illegible] car and bent his head nearer the [illegible] shield. The rain drummed on the [illegible] the car. John drove still more slo[illegible] looked worried.

We approached the lights of th[illegible] filmed by rain, and John turned o[illegible] a black-top road to the airport [illegible] storm was at its height when he dr[illegible] to the administration buildin[illegible] stopped.

"You people wait here," he sai[illegible] go in and take a look."

WE SAT silent in the rain. [illegible] been thinking, and I said o[illegible] shoulder, "I guess we can depe[illegible] Ginny to keep her mouth shut. W[illegible] have to worry about her."

"What's that again?" the Gov[illegible] sharp voice cried.

Lucy Strawn drew in a deep [illegible] "Oh, Lord," she said. "Roy, c[illegible] mean to say that blond you-all k[illegible]

"Yes, I guess she knows," I saic[illegible] she wouldn't tell, Lucy."

"Oh, wouldn't she!" Lucy cri[illegible]

"No," I said lamely. "She told [illegible] wouldn't tell if Miss Hattie didn[illegible] we know Miss Hattie won't."

John Mills threw the car doo[illegible] and leaned in. Rain dripped fr[illegible] brim of his hat and his wear[illegible] looked like hollows in his head.

"No flights tonight, Willie," h[illegible]

Lucy Strawn said, "Oh, Goverr[illegible] a helpless, sympathetic tone, and [illegible] nor Warburton hunched his big [illegible] ders and stared glumly at the [illegible] rain.

"So here we are, Willie," Joh[illegible] said. "Looks like the best way to [illegible] there is under sail."

I said to John Mills, "How l[illegible] you suppose it will last?"

John moved his solid should[illegible] pressively. "You've got to wait [illegible] kind of thing to blow itself out o[illegible] Roy. You're looking at a gale, I[illegible]

"Then how about trains?"

"I don't like to take a train," G[illegible] Warburton said. "Somebody mig[illegible] me on a long train trip."

John Mills shrugged again. "I'n[illegible]

have to take Mr. Hobson's horse, nor, the one nearest the door. the only choice you've got. Just obson's choice."

started the car and drove away the airport, steering cautiously gh the gale. We could see only a et ahead in the stormy night, and plashed mightily against the wind-

overnor," I said, "you'll get there ht. Don't worry about it."

re," John Mills said. "We'll get iere, Willie."

parked the car at the station and I with him to inquire about trains. ulletin board showed that nearly train was marked late.

n Mills returned with a timetable. there's a train at eight in the morn- Atlanta, and he can change there irmingham train. Let's see, gets to a at 4:00 P.M., if it's on time." He l his finger back along the column e. "Yep, that's the best he can do. ne can get a train out of there and, ce—he can make Birmingham at Roy, what time is the speech?"

ght o'clock," I said dismally.

n Mills stuffed the timetable in his t and walked in silence across the g room. Back in the car he said , "Willie, it's Mr. Hobson's slow- rse, I'm afraid. You can get to ngham about half past eight to- if the trains run on time, that is."

Governor put his nose close to the looking at the storm. I switched on dio and tuned in a news program. ard a voice saying: "The Weather u sees no immediate letup in the which is lashing the East Coast ull gale force from Hatteras south ksonville. At Charleston the wind ty was clocked at 73 miles per hour, ort of hurricane force . . ."

llie," John Mills said, "I think what need is a little sleep. Maybe I'd run you all back to my house and vait out the storm."

Governor shook his head. "I think t to stick close to the airport, John, ait for a break."

aybe so," John said. "Well, sup- ve see if we can stay at the hotel."

hotel," the Governor said. "Night have sharp eyes."

n shrugged and rested his elbows steering wheel. "Then I reckon e sit."

a time we sat, and no one spoke. stened to the whistle of the wind ne driving splatter of the rain. At ucy said softly, "On the way in, I d an auto court."

The Governor swung around. "Why, yes. John, don't you think we could make it in one of those places without being recognized?"

"In this storm, I believe we could," John said. "Not much to offer here in the way of tourist camps, though. We're off the main highway south, Willie."

"Let's see what we can do, anyhow."

"Okay." John started the car again, and back to the street. He knew where to go. On the highway just outside town, in a grove of trees, was a cluster of green and white cabins, linked by a circular dirt road. The office was part of a small general store facing on the highway, and there were no lights. I got out in the rain and knocked, while John sounded the horn.

AT LAST a light went on upstairs. An old man came to view, wearing a tattered bathrobe. He peered at me through the glass, then opened the door a little.

"Got any cabins?" I asked.

"How many?"

"Three men and a young lady. We'll need two cabins."

"Okay. I got two. That will come to three dollars apiece."

I opened my wallet and brought out a ten-dollar bill and a five. He took the bills and said, "Three bucks more."

"You said three dollars apiece. That makes twelve dollars."

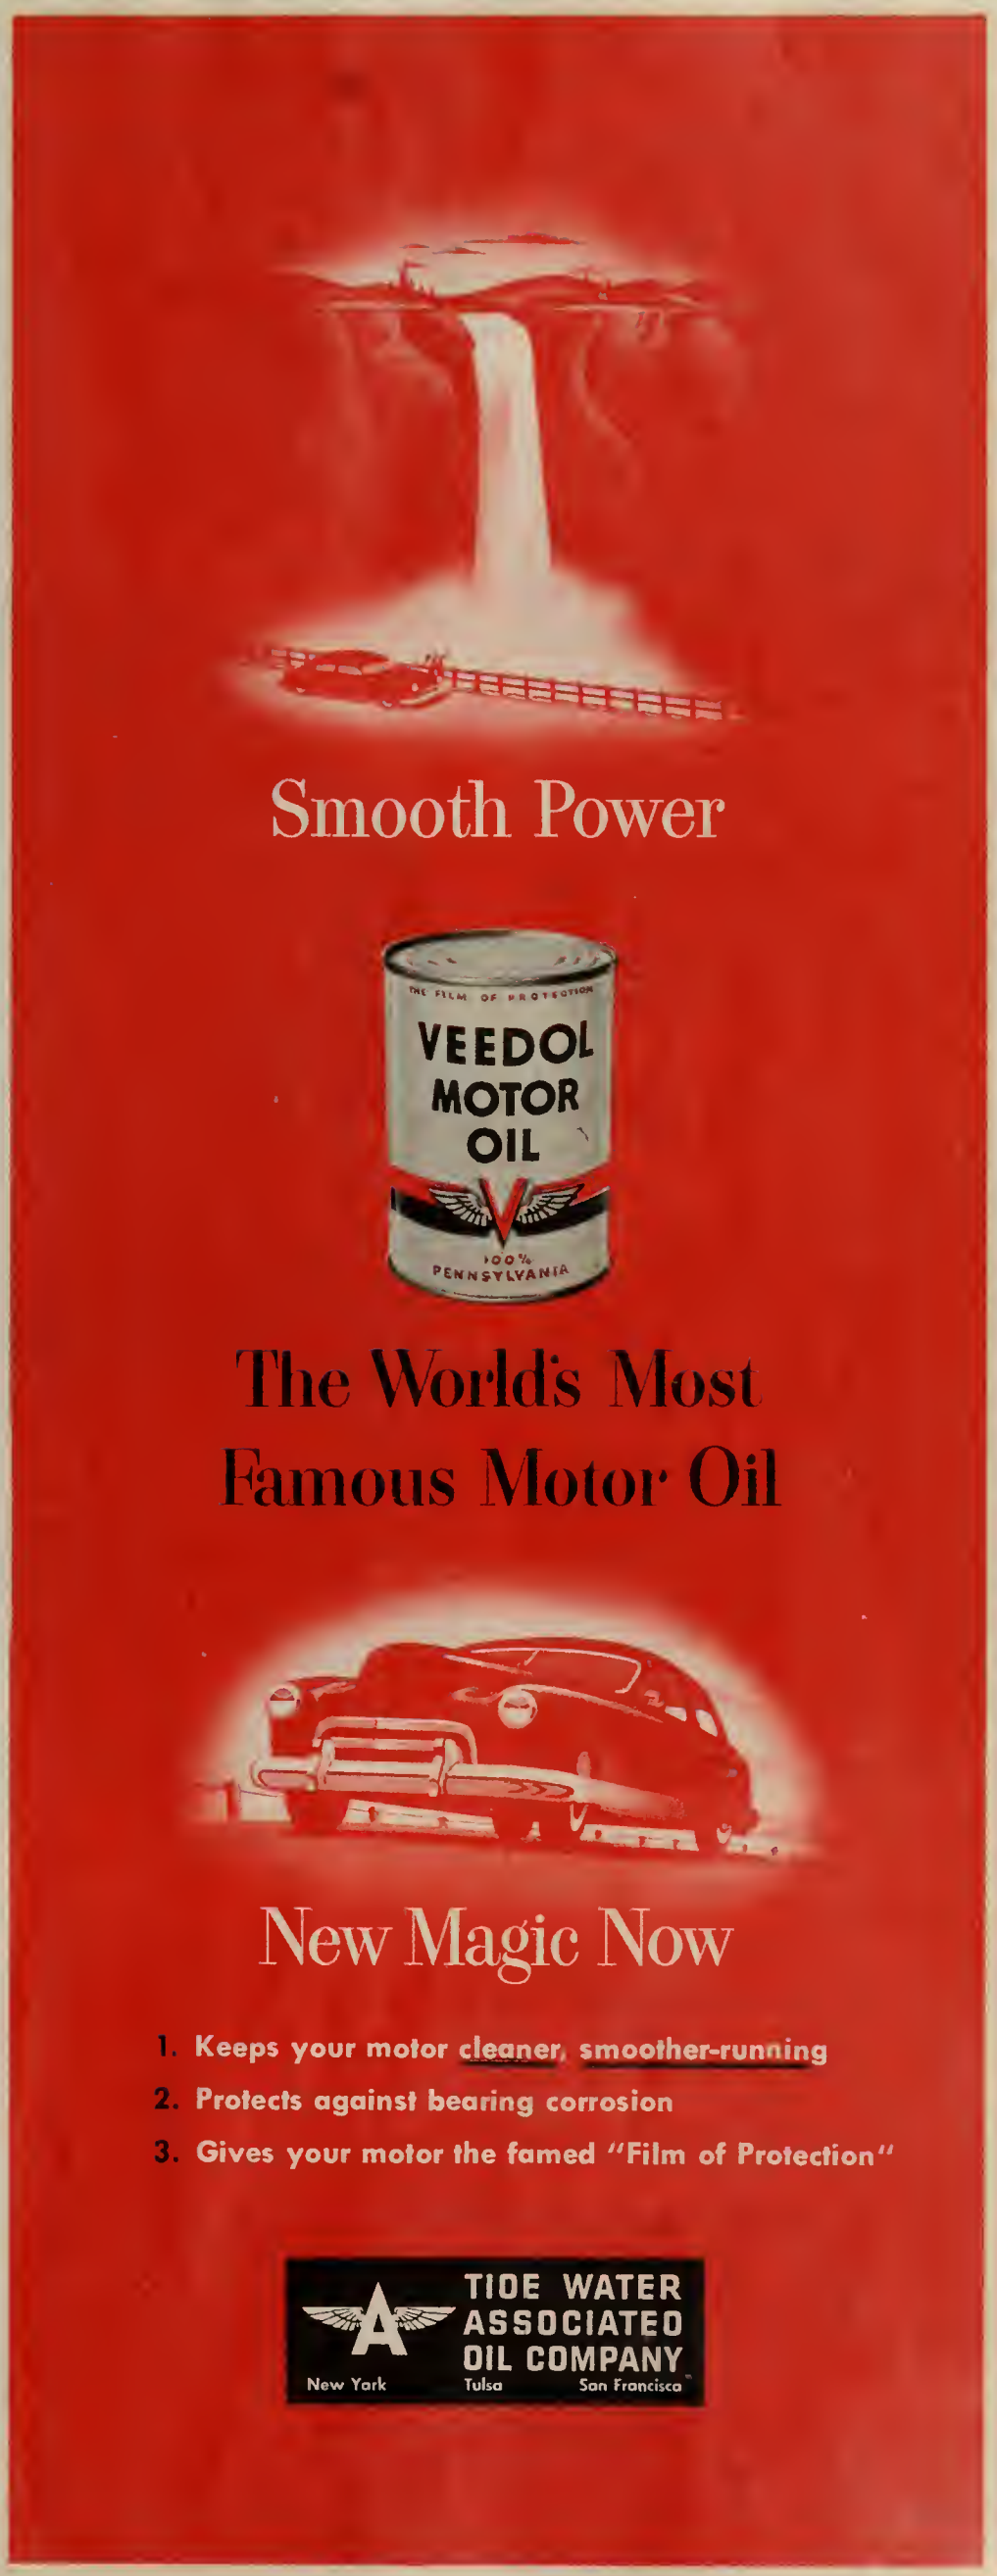
"Six beds," he said. "I charge by the beds. If you don't want the cabins, say so."

I paid him three dollars more. He gave me two keys and said, "Nine and ten. Drive on back."

I hurried back to the car and told John the numbers of the cabins. The headlights picked up number nine first, and I got out and opened the door of a garage shed adjoining the cabin. John drove in, and we entered the cabin through a door opening from the garage.

Governor Warburton produced a big grin, like a man without a care. "Fit for a Cabinet meeting," he said, and looked at the three iron beds, the washbasin with its rivulets of rust.

"At least," said John Mills, "nobody would look for you in a joint like this, Willie."



Lucy said, "Got a match, Roy?"

I found a match and offered her a cigarette, but she shook her head and knelt by the gas stove. She struck the match and turned on the gas, and we watched the match burn slowly out. Lucy looked up unhappily at me and said, "No gas!"

I brought out the bottle and there was a stiff drink apiece. I found two smoky-

"Just a little snack for me, please—I had an unusually big lunch in town today" CHARLES STRAUSS

looking tumblers above the washbasin and poured the first two drinks for Lucy and the Governor.

"This will warm you up, Lucy," he said. "Drink it down."

I pulled on my coat and hat. The Governor asked, "What's on your mind, Roy?"

"He stuck us eighteen dollars for these two cabins," I said. "I'm going to see to it we get some heat."

I went out by the garage and splashed through the puddles to the office. I knocked hard, and at last the old man came groping down the stairs.

"You again?" he said.

"We need heat," I said. "The gas doesn't turn on."

He rubbed his chin and said, "Sorry, we're out of gas. Feller was going to come out and fill my tank today, but he didn't show up."

I looked into his pale, crafty eyes, and shrugged. We could not go to a hotel, but not for the reason he thought. As I started out again, I noticed a wall telephone, and made a mental note of the number.

I WENT to the garage and tried the radio again. The report was the same: no indication of diminution of the gale. A freighter was in trouble off Charleston and tides were doing damage along the coast.

Back in the cabin, I gave the news with a shake of my head and said, "Governor, I think we'd better send Bill Evers a telegram."

"Saying what, Roy?"

"Telling him to telephone us here," I said. "There's a telephone out front and I took the number. I'll wire him to call that number and ask for the man in cabin nine."

"That's cryptic enough to give poor Bill the blind staggers," the Governor said, and gave me a keen glance. "You don't think we're going to make the grade, do you, Roy?"

"I was just out in that storm, Governor," I said. "No, I don't."

"Western Union is at the station," John said. "Take the car, Roy."

"All right."

Lucy looked up. "I'm going, too," she said. "There's a heater in that car."

She snuggled up beside me on the front seat, and wrapped the blanket she had brought with her around her legs. The storm had not abated in the least and I drove cautiously to the station and sent the telegram to Bill Evers. On the way back to the tourist court Lucy said, "Roy, there's a dog wagon. How about some coffee?"

I stopped the car and we dashed through the rain. It was steamy and warm in the diner. Lucy slid onto a stool, rubbed her hands briskly and said, "Ask the man if the coffee's hot."

"Hot coffee," the counterman said. "Yes, ma'am."

When the counterman had moved away Lucy said, "We're finished, Roy. The Governor is cooked. How can we explain a thing like this?"

"We can pull that one about a sentimental visit to his old schoolteacher," I said.

"Oh, no we can't," said Lucy. "Not with Clyde McDonald on the job, we can't."

"The storm will break," I said.

"You know damned well it won't," Lucy said. The warmth in the diner, and the hot coffee had done her good. Her eyes had brightened and the familiar starchiness had returned to her manner. "Come on, let's take the Governor some coffee."

Carrying the sandwiches and two quart containers of coffee, I led her in a race to the car. We drove back through the storm and I berthed the car in the garage. As we entered the cabin John Mills asked, "Get it off, all right?"

"Yes," I said. "I sent it to Meridian. The train isn't due there until nine in the morning, so we won't hear from Bill until after nine."

Governor Warburton said without much conviction, "By nine we'll be out of here. We'll be on the way. How does the storm look?"

"How does it sound, Governor?" I said.

He listened to the roar of the wind, shook his head. He ate his sandwich in silence, and for the first time the strain began to show on his face.

Dawn unveiled herself like a reluctant woman in a frigid bathroom, and was showered by the tempest. We saw the branches of trees lashed about and the great sheets of gale-blown rain. The Governor went to a window and stood looking for a long time at the storm.

"Do you think it's fair to ask me to wait, Emily? . . . That means four years of medical school, one year as an intern, two years' postgraduate work in surgery . . . and maybe another year before you get your license to practice"

COLLIER'S — MARTHA BLANCHARD

"I don't know what to do," the Governor said. "I don't see how I'm going to explain my presence here in a third-class tourist court when I ought to be in Birmingham." He shrugged. "Roy, when Bill calls I guess we'd better have him issue a story that I'm deathly ill, or something like that. That I'm aboard the train, too ill to see anyone."

"That means no speech," I said. "That means no Hydetown reception. But I guess it's the only way out, Governor."

"Willie, why don't you come back with me to Hydetown?" John Mills suggested. "Put out a story that you dropped into the old home town as a surprise, a day ahead of schedule."

"And passed up my Birmingham speech for that?" the Governor said, and shook his head. "That won't hold water, John."

"Can't the local radio station pipe your speech to Birmingham, Willie? You got radio time anyhow, haven't you?"

The Governor groaned. "National radio time! Eight to eight thirty."

"Then you can make your speech from Hydetown, Willie."

"Yes," the Governor said. "But what's the explanation?"

"The hell with an explanation," said John Mills.

"There has to be an explanation that will satisfy Clyde McDonald," the Governor said. "That's as tough as explaining a night out to your wife."

I sat up straight. "Governor, where *is* your wife?"

He looked surprised. "Why, Roy, she stopped off for a rest. You know that."

"Yes, but where is she?"

"She's due in Hydetown a day ahead of Warburton Day."

I jumped to my feet. "I've got it, Governor, I've got it!"

They both looked at me, without much hope. I said, "John, you know a doctor you can trust?"

"Sure," John said. "Doc Arnold."

"Then he's our man," I said.

"Our man for what, Roy?" the Governor asked.

Our voices had risen, and Lucy Strawn was awake. She sat up and pushed the blanket back.

"John and I will meet Ruth when she gets off that train," I said. "She was exposed in the gale. She's got double pneumonia. We rush her to John's house and call Dr. Arnold in. We stick her in an oxygen tent. We tip off the reporters that you're rushing across country to her bedside, then John drives over here and picks you up and you dash to the hushed house, give the boys a pale, tired smile, and hurry in to stand by your stricken spouse."

Governor Warburton inhaled audibly, looked at John Mills, and said softly, "That might do."

"It's a wonderful idea," Lucy said. "Then we can arrange for you to make that Birmingham speech by radio f John's house," I said. "It will be h interest stuff, too. The Governor le his wife's bedside to meet his camp obligations."

"Set the microphones up right in house!" Lucy cried.

"It might do," the Governor "Roy, I think it will have to do. I say I like it. I'll feel like a charlatan, I don't see any other avenue. Yes, t our program. We'll do it."

I looked at my watch; it was past s o'clock. "Take us a long time to get t in this storm," I said. "John, we'd b start."

"Okay, Roy," John said. "Willie, stick tight here. Don't even put nose out."

"How about that telephone call f Bill?" the Governor asked. "Som will have to take that call, and I'll b only man in cabin nine."

"I'll send Bill another telegram," I "I'll have him call John's house in H town."

"Yes, good," the Governor said.

"So we're set," I said. "Except for thing. Except Ruth had better be on train!"

"She'll be on it," said John M "There's a women's committee to her at the depot. My wife is chairma it."

I groaned. "She'll probably ge looking healthy as a horse."

John frowned. "That's a fact. See Roy, I could put you aboard that next stop up the line. If we hurry can make it. But we've sure got to h It's thirty miles beyond Hydetown."

We started for the door, but Strawn cried, "Hey, you can't leav here. You can't leave the Gove checked in at an auto court with a even if she is his secretary." She gri at Governor Warburton. "Particu if she's his secretary, I guess."

The Governor nodded. "That's Lucy, you'd better go along. I'll out here." He put out his hand. " that was quick thinking. Good work good luck."

WE GOT in the car and backed of the garage, leaving Gove Willis G. Warburton, candidate for President of the United States, wra up in a blanket on a sagging iron b a battered cabin of a godforsaken to camp on the outskirts of nowhere. all said a silent prayer.

In that gale John Mills could not faster than thirty miles an hour. I puted the distance. Forty miles to H town, another thirty miles to the where I was to board the train. Se miles at thirty miles an hour was over two hours, and it was already n eight o'clock. The train was due at town at 9:25. according to John's r lection. That left us considerably than two hours for the trip.

"John, we'll never make it at this r I said.

"Can't go any faster, Roy. Can't

"Maybe Roy had better drive," suggested.

John pulled to the side of the roa I took the wheel. I was as cautious a as he, but I was younger and my ref were more elastic, so that I pushe car up to forty-five and was prob averaging forty. It was a strain, t to see the road through the rain, a hold the car on it against the m wind.

As we entered Hydetown, John p out his watch and said, "Five to Roy."

"That leaves us thirty minutes," I "And thirty miles to go."

"We won't make it," John said gl

I put on the brakes and mad abrupt, skidding turn. "I'll drop yo here at the station, John, and you wait. Lucy and I will go on."

Continued from page 23

Amsterdam and Utrecht. Bright rambler roses climbed up the brown brick house, meeting the red tiles of the roof. It was a peaceful setting in which to find one of Holland's renowned resistance fighters. We drank tea (tea, more than gin or beer, seems to be the national drink in Holland) and Rutten stretched out his long legs and talked of his queen.

"None of us will ever forget her concern for us in London," he said thoughtfully. "You know, we had always respected the queen, but now there was a new warmth about her, and we found that usually she knew more about what was going on in Holland than we did. We found too that she was living on the same rations the Germans forced us to live on in Holland."

She made Rutten one of her aides. He accompanied her on her return to Holland in March, 1945. Three quarters of the country was still occupied by the Germans, but she insisted upon returning for a short visit. She went to the completely destroyed village of Eede-Aardenburg and immediately began to discuss the rebuilding of Holland with the small group of ministers who had come with her. She remained on Dutch soil ten days and then went back to London to complete plans for the rehabilitation of her country.

Seeking a Vote of Confidence

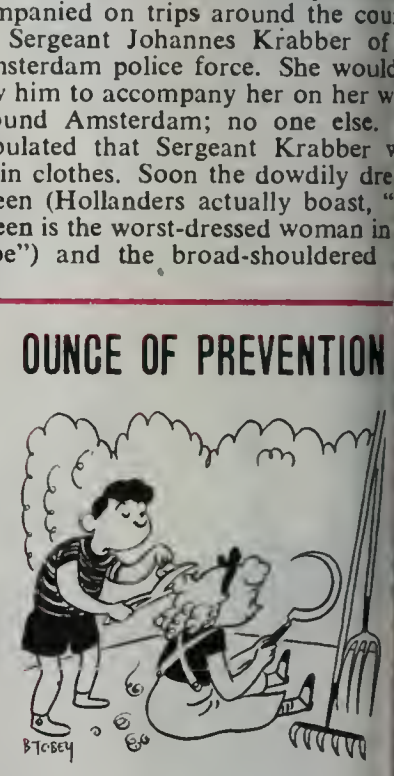
She returned again on May third of the same year (one day before the Germans capitulated) and she has been in active charge of rehabilitation ever since. The first thing she did was to ask parliament to consider the decrees she had issued during the war and to ratify those it approved of. In effect, she was asking the people for a vote of confidence. Had she by act or spirit violated the constitution during those years when circumstances made her rule alone, without parliament? This is what she was asking the people.

The parliament ratified every one of her decrees. Then she got down to the serious business of rebuilding stricken, ravished Holland.

"I would go on tours of inspection with her," Rutten said, smiling. "Believe me, these were not routine affairs. In one village the *Bürgermeister* showed the queen how the damaged church was being rebuilt. He was very proud of that until the queen asked him sharply what he had done about rebuilding the damaged homes. 'Nothing,' the *Bürgermeister* said in amazement. 'We thought it necessary first to rebuild the church.' The queen looked at him and said, 'Homes are more important than churches at the moment.'"

For 50 years she had spent most of her time at The Hague. The housing problem in Holland was acute; so acute that virtually every family that owned a house had to take another family in to share it. Wilhelmina owned two palaces in The Hague but she refused to live in either. She moved to an unpretentious eight-room house on the Nieuwe Parklaan (New Park Lane), half a mile from the traditional palace of the House of Orange. As always, she would share the discomforts of her people.

It took weeks for her ministers to convince her that this was an unpractical solution to the housing problem. The little red brick house bulged under the presence of ministers, visitors and secretaries (she staggered her secretaries in ten-hour shifts). Finally an ingenious minister told her that although the people could not occupy her palace they could occupy the house on Nieuwe Parklaan and that she would actually help the housing shortage if she moved back to one of the palaces. Reluctantly she did so.



During her long reign Wilhelmina never spent more than one month a year in Amsterdam. Now she took an absorbing interest in the big city, the commercial and cultural center of Holland. She began to spend four months there each year. She developed a habit of almost daily walks, which presented a bit of a problem to Holland's police force. Amsterdam is the only city in Holland where the Communists are strong, and the police were understandably apprehensive for her safety.

For 20 years she had always been accompanied on trips around the country by Sergeant Johannes Krabber of the Amsterdam police force. She would allow him to accompany her on her walks around Amsterdam; no one else. She stipulated that Sergeant Krabber wear plain clothes. Soon the dowdily dressed queen (Hollanders actually boast, "Our queen is the worst-dressed woman in Europe") and the broad-shouldered pound, six-foot, seven-inch police became familiar figures on the streets of Amsterdam.

"Worried about her safety?" Sergeant Krabber blinked his pale eyes in astonishment when I asked him. "Of course not. No one in Holland would possibly wish harm to Her Majesty. She went everywhere and never was even the unkind look given her. She was always stopping to talk to people. She would purposely went to the poorer sections to see the people if the meat and bread rationing was sufficient for them and the children.

"Sometimes she would go to the Concertgebouw, a theater which puts on old plays the people like. She didn't watch the actors; she watched the audience. Always she was interested in her people. Only a few weeks ago we took her grandchildren to the circus. The children loved it and the queen loved the enjoyment of it. The queen never

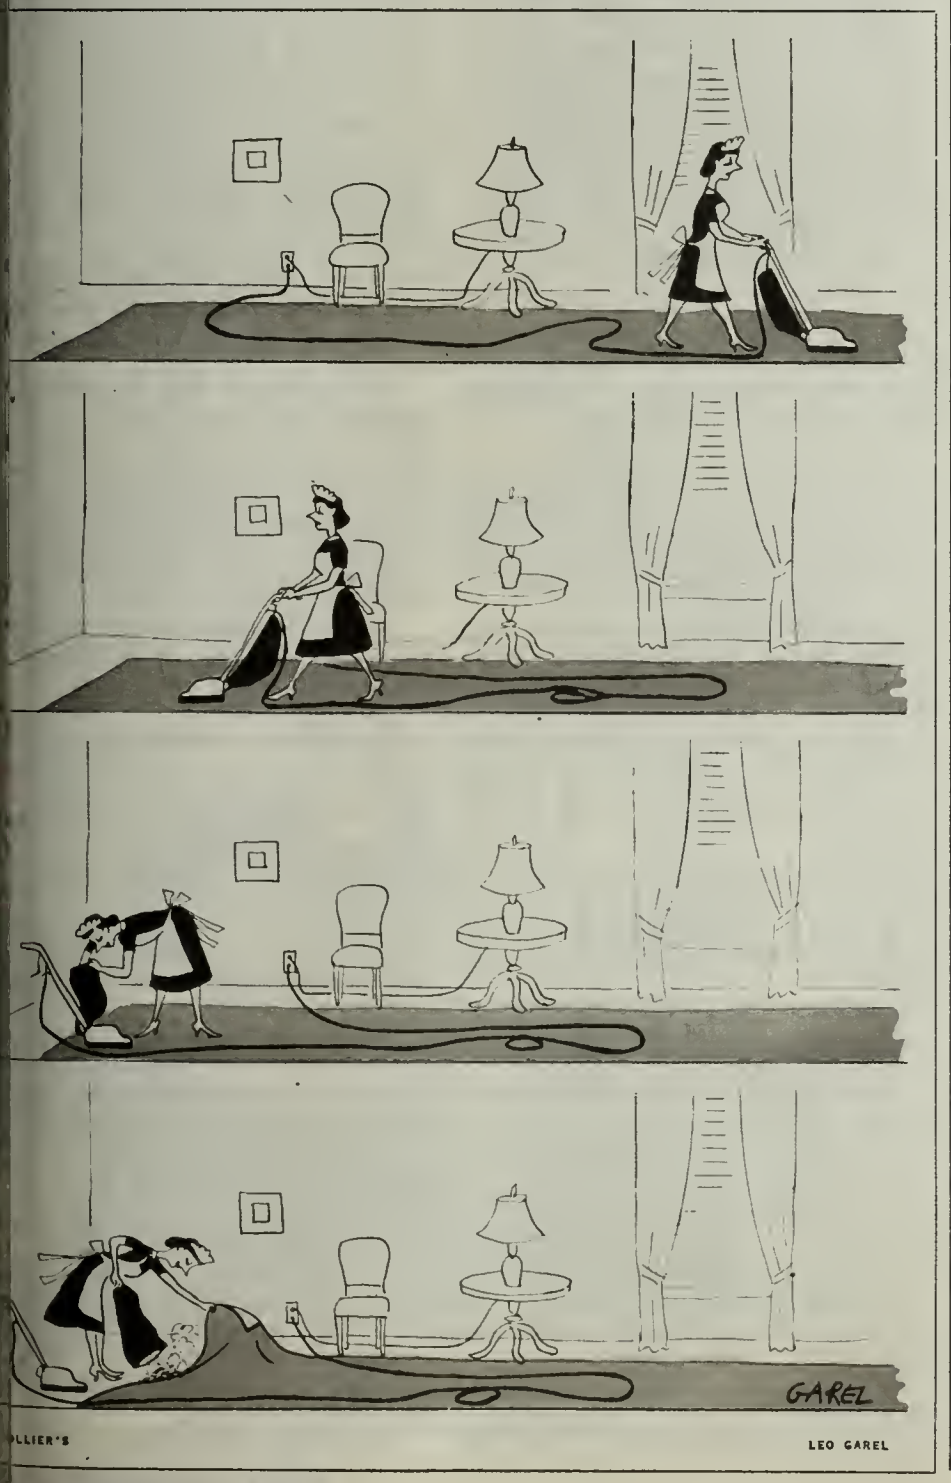
e day she exploded an ecclesiastical
ll as political bombshell by asking
y Catholic priests and twenty Cal-
ministers to have tea with her. In
nd most clergymen are unabash-
avowed politicians. The Catholic
, for instance, is the most powerful
in parliament—31 per cent of the
ment are Catholic party representa-

e priests and the ministers glared
e another—and an hour later were
to outdo one another with con-
ive suggestions designed to pull Hol-
out of the economic and political
into which the war had plunged her.

Nor was Wilhelmina afraid of the word "Communist." There was a left-wing group of artists and writers in Amsterdam and she asked them to tea one day.



One of her ministers had the temerity to object and she said to him coldly, "Remember, these men are Dutchmen just as we are."

Jan Reyndorp, a young artist, told me of that historic tea. "She was amazing," he said with reluctant admiration.

"There we were, all avowed enemies of the monarchist system. We were Communists and proud of it. She talked to us and reminded us that we were young; we were the ones who would have to rebuild Holland. She told us that she didn't care what our political affiliations were—that was something she had never interfered with—but she did care about Holland and did want us to realize that this was the time to build and not destroy. We, the young men of Holland, had to do this. She and other leaders of her age were too old and too tired. Well, Mynheer, within half an hour she had us convinced that even though she was a product of a system we did not like she was a great patriot and a great woman."

That is Wilhelmina of Holland, the last, perhaps, of her kind. She leaves Juliana with a terrific burden but she is calmly confident that Juliana, whom she trained as Queen Emma trained *her*, will have the strength and integrity to carry it. Today Wilhelmina can look any fellow Hollander in the eye and say with clear conscience, "I have done my best for Holland." And there is not a living Hollander who could disagree with her.

BROADWAY DOLL

Continued from page 18

Edwards in Joe's room on 112th Street.

The train was going at quite a respectable speed now and she sat up and began to look about. A small darkish man was slumped down beside her with a fluff of hair under his lower lip. Yes, a black instrument case in the rack overhead and a lot more of odd shapes and sizes in the racks near by.

"What band are you boys with?" Doll said comfortably.

"Dave Blanchard's." He nodded at the copy of Variety in her lap. "You in the profession?"

Doll felt entirely at ease. "No, but my father is. I'm going out to visit my aunt in Illinois."

The small man said, "Those peasants'll drive you nuts." He went on to say that his name was Steve and that the band was on its way to play a lousy date in a lousy hotel in Cleveland. He suddenly straightened up. "Come on back to the diner, kid, and tie it on."

Doll hesitated, "I'm pretty short."

"So what? Come on, baby. We got paid yesterday."

She had a most enjoyable dinner with three of the band boys who told her what sort of a guy Dave Blanchard was and how he'd flown out to Cleveland while they rode the cushions in a lousy day coach. She was doing fine and she still had her five dollars.

THE brakeman snatched up her suitcase. "Come on, sis! This's Millfort." It was a squat, dingy station.

The brakeman said. "This is her, Ace," and handed her suitcase to a tall, lean old man whose hair was gray.

"Well, Dolly Martin!" said the lean old man.

"Are *you* my Uncle Kimball?"

"Nope. I'm Kim's father." He cupped his hands to shout, "Hey, Kim!"

Uncle Kimball, a round, worried-looking man with a round face and big, round, rimmed glasses. Uncle Kimball much more embarrassed than she.

"Well, well, Dolly!" He evidently couldn't make up his mind whether he should kiss her or not. "Mae meant to come meet you but she couldn't."

His father said calmly, "Did you have a good breakfast, Dolly?"

"Yes, sir. A traveling man bought it for me. He told me about his nerves. And last night the band boys gave me my dinner."

Uncle Kim looked quite shocked but his father said in a slow drawl, "Did all right for yourself, didn't you? Don't call me 'sir.' I'm not that old. I'll answer to 'Ace.' "

"All right, Ace."

The old man's eyes flickered with amusement. "Named me that when I was a river pilot."

Doll gave a little gasp. "Like Mark Twain?"

"Not much. River's not what it used to be. How do you know about Mark Twain?"

"In New York, you can get books out of the public library for free."

"That so?" The old man stood very straight and must have been six feet tall. "S'pose we mosey along uptown?"

They went down a wide, dusty street, a little like the Bronx but not much. Low brick buildings on either side and a hound dog asleep on the sidewalk. Big signs over small restaurants that said "HOT CAT."

Ace saw her alarmed look. "Fried catfish, honey."

A different air, a different feel to everything and even the wind was slow and warm and lazy. Not a bit like the Bronx now: tall old trees against bright blue sky and roses blooming.

A woman like a plump brown bird came running down a red brick walk in front of a big yellow house. "Dolly! Dolly Martin!"

Aunt Mae hugging and kissing her: Aunt Mae with her apron still on and her soft brown hair hanging down in strings. "I guess you're just about starved to death, Dolly."

Sitting in the dark dining room with more dishes set before her than you'd ever see in the Automat or Childs' or Schrafft's. Fried chicken, an orange-colored yam split in half and drenched with butter, black-eyed peas.

"Have some hot cakes, honey," said Aunt Mae.

Across from her, Uncle Kim put down his fork in awe. "Good Godfrey, Mae, the child'll stuff herself to death."

"Don't mind him, honey. You just go on and eat."

She reached for her glass of milk and it was almost cream.

Ace sat back smiling. "Whoa there, Doll. Don't have to tank up against time. There'll be more tomorrow."

Her eyes went wide. "You mean you eat like this *every* day?"

Upstairs at last and a long, bright bedroom with a cool green paper and dark green blinds. A big four-poster bed, a green and white bureau, a dressing table with an enormous mirror—

From Installment XVI of THE SECRET PAPERS OF HARRY L. HOPKINS: At Yalta, "Stalin confessed to Hopkins that he became pretty fed up with hearing about American and British public opinion. He obviously believed that Roosevelt and Churchill kept referring to it merely as a device to justify their own personal opinions and prejudices. The Russians never did succeed in understanding that public opinion could be a determining factor even with the powerful heads of state."

"It's simply swell, Aunt Mae!"

Aunt Mae's eyes were brown velvet if you looked at them closely. "Do you want me to help you unpack, Doll?"

She looked at the suitcase and was ashamed. "There—there isn't much to unpack, Aunt Mae."

All alone now and she went to look out the window. A squat brick fire station across the street and the firemen sitting out in front in their shirt sleeves.

She knew what Herbie would say if he could see that. Herbie would say, "I told you it was a hick town!" Well, maybe it was but it was still pretty nice.

NICE, too, in the evening on the front porch with all the stars shining out of the hot dark and that strong, sweet smell was something they called honeysuckle.

Aunt Mae: "Nine o'clock. Doll. Don't you think you'd better go to bed?"

"Now? My gosh, it's awfully early."

Uncle Kim: "What time do you go to bed in New York, Doll?"

"Well, in the summer, maybe midnight—or later if it's terribly hot."

Uncle Kim looked as if he were about to say something and then didn't. No one said anything at all and the whole night was so silent it made your nerves jump.

"Gosh, is it always so quiet?"

A deep bass bellow lifted every hair on her head. *"What's that?"*

Ace began to chuckle. "Steamboat on the Ohio."

She lay back, laughing, for even if Ace were old, he and she understood e other. Her head drooped forward a she couldn't help it. "I guess you're rig Aunt Mae. I guess I'd better go to be She rose, yawning. "I'm pretty v tired out." . . .

Doll had on her blue slacks with shirttail hanging out and her face sho She'd already seen the wonderful st and was now running the vacuum.

"You don't have to help me, Do Aunt Mae said.

"But I like helping you, Aunt Ma

"You certainly do know how to cle Doll. I wouldn't have thought yo done much of it in New York."

"Well, Herbie's a man and men are sort of sloppy."

"I know. You like things neat."

Yes, Doll did. She'd never seen a thing as spotless as Aunt Mae's ho

AUNT MAE said, "Sharon Fletch having a birthday party this af noon and her mother's invited you come."

She said doubtfully, "Is it just c dren?"

"Yes, dear. You'll have a lovely t and you'd better wear your best dre

"I've only three dresses and I d believe any of them is best."

Well, the party was simply terri She didn't know who anybody was she hadn't the remotest idea what t were all chattering about. The flutte little woman was Sharon's mother she was mostly in the next room wh there were going to be refreshm sometime. The tall angular woman her was Miss Jimpson who had com to help and Miss Jimpson looked like the aunt in a Tom show.

When it came to the children, I simply gave up. There were so man them and they all knew one another, although they must be her own age, were so *young*. She was an utter sider and she'd better shut her h She could feel the stiff little smile on face and they'd turned the phonog on and she danced with one boy a another.

The tallest one with the plump, satisfied, self-assured face cut in, Doll's mind said acidly, "Here's a lug!" He held her close, his chee hers and he kept crooning to the m

"You going to high school in the f he asked.

"Well, I don't know if I'll be then."

"We've got a good gang. We're p careful who we take in. You have in a town like this."

Doll wondered why.

"I'm on the football team and pretty fair if I do say so." Doll h the least idea that all the boys a party were fascinated by her and a girls were jealous.

He held her closer still. "Say, y a smooth dancer."

"I'm not very good. I was goi Ben White's dancing school but w falling of the room rent so I had to s

"You got what?"

"We ran out of money."

His face told her that had been a take. Maybe out here it was a dis not to have money. It certainly w in show business. She didn't notic large blond girl glaring at her, a she'd been told that the blond gir her present partner were going tog it wouldn't have meant anything.

He began doing tricky steps. "I to that sweet sax! That's Benny N band. Gee, what a guy! I heard hi in St. Louis and I stood there so cl the platform I could have touched Was that something?"

Doll knew what Benny Nolan

ou bobby-soxers who stood around
d ared at him. "Benny's nice, only

door slammed and Doll's eyes
went wide. "Gosh, you didn't have to stand up for me, Aunt Mae."

"I certainly did. Why, you're one of the family, Doll."

Ace fondled his pipe. "Been wonderin' what you were goin' to say to that hellcat, only you didn't."

"Just that Connie's a"—she sought about for a word that would be suitable for their ears—"a little tramp."

"Oh, dear," said Aunt Mae. "She shouldn't know about things like that."

"Might's well know 'em sooner as later." Ace put the pipe in his mouth.

The next afternoon everything went suddenly flat and stale. For the novelty'd worn off now and Millfort was only a stupid, dusty little place. She went walking downtown through the heat and there was no stir, no excitement; nothing to see, nothing to do.

She stopped before the Bijou Theater and it was only a little hole in the wall.

"Hello, Broadway!"

She turned and the short, pudgy, red-cheeked man was smiling at her. "Pete Thurston. I'm manager of this flea bag. Come on in. How's the Big Town, sweetheart?"

Someone different, someone straight off Forty-second Street. He led her inside and it felt like a theater, it smelled like a theater.

"Want to see the show, Broadway?"

"It's a turkey, isn't it?"

"I'll say it is. It stinks the whole theater up."

"You got a pretty good house," she said professionally. "Much paper in it?"

"Nope. Mostly kids."

"Bobby-soxers?"

Pete shuddered. "Bubble-gummers. Come on up to the office."

A nice, small, cluttered, dusty, familiar place. Old copies of Variety and Billboard, press sheets, tattered stills, a typewriter with gray lint hanging from its undercarriage. She slouched happily in one chair, her feet in another. "How come you're in this hick town, Pete?"

He spoke to her as if she were his own age and she was used to that. "Well, I'll tell you, Broadway. I was working for Loew's. Neighborhood house over on the West Side. And I had a big bust-up. Nervous breakdown. The doctor said I had to keep nice and quiet. So they shot me out here."

"That's pretty tough going, Pete."

"Oh, it's not so bad when you get used to it. They tell me your father's an actor. How's he doing?"

"He isn't doing anything right now."

Pete nodded. "How'd he like to try the clam chowder circuit? Friend of mine's got a straw hat theater down on the Cape. I might shoot him a line. Not much dough but it's better than nothing."

Well, it wouldn't do any harm to try. "If you'd put in a word for Herbie, Pete, that would be swell."

"Glad to." His eyes grew hungry. "Tell me all about the Big Town!" . . .

It was ten days later when the letter from Oliver came. "—Herbie's got a job with a straw hat down on the Cape. I hear Rose Leonard's up there, too. You remember Rose—"

Doll stood there and bit her lip. She wasn't surprised that Oliver had written before Herbie did because Herbie always had a hard time with letters. Yes, she remembered Rose Leonard; a tall, rangy girl who thought she looked like Katharine Hepburn.

She had some luck in getting small parts and she was dead sure she was going to see her name up in lights. Rose was dead sure about everything. Rose was always right and people who didn't agree with her were wrong. Rose was coldly ambitious and though she wasn't a tramp or a heel, you had the feeling she was hard as nails inside.

It was silly, of course, but as Doll stood there, she had a dim feeling of disaster. When you started having the horrors, the thing to do was to go for a good long walk.

She went down Washington Street and the great trees, dusty with summer, almost met in arches overhead. Redbirds flashed against the blue glare of sky and it was steaming, sticky hot. She stopped by the tall green hedge.

THERE was a boy sitting just inside, deep in the shade of the sycamores. He was stretched out limp in a long wicker chair with an open book on his lap and his long face was very pale with the fair hair falling over his forehead. He might have been about twelve, and some quality about his eyes, a quick, sensitive keenness, reminded her of Oliver.

She pulled a handkerchief from the pocket of her shorts. "Whew, it's hot!"

He had a soft smile like Oliver's too. "It's cooler here in the shade. Come on in."

She sat gratefully down in the grass beside him and he was too old for his age as Oliver was. "You're the girl from New York, aren't you? I'm David Graham. I've been sick."

"You don't look very rugged, David."

He took up the book. "I've been reading David Copperfield."

Doll's eyes lighted up. "Where've you got to, now?"

"David's just coming to the old boat."

"Gosh! That's the very best of all."

His hands moved wearily. "Only I get so tired I have to stop."

"I'll read to you if you want, David."

Half an hour later, she'd put the volume down and they were so intent on each other they didn't see the tall, slim woman in shirt and jodhpurs come quietly across the grass.

"And you didn't have anything to eat *at all?*" David was saying.

"Well, not till I walked all the way up to 112th Street to borrow a buck from Joe Edwards."

"Company, David?" asked the tall woman.

"Yes, Mum. This is Dolly Martin and she's been telling me the most wonderful stories about New York."

Mrs. Graham was like something you sometimes see on the stage—maybe a little like Ina Claire—cool and quiet but with a radiance you sense even before she begins to speak. She held out her hand. "I'm glad you came, Dolly. David needs some company. Tired, David?"

"No, Mum. Dolly doesn't tire any-

trade mark on stem

Picture shows briar bush. Bushes grow 4 to 7 ft. high. Before we start to cut a Kaywoodie Pipe, Nature has been at work 40 to 250 years forming the brier burl, at the base of the bush. These burls are the only portion used.

Many men enjoy having a collection of Kaywoodie Pipes because each one has its own individual natural grain, and its own character. There are shapes of Kaywoodie Pipes well-suited to your daily work and hours of leisure. All Kaywoodie Pipes have the Kaywoodie fitment shown below. It keeps the smoke clean and dry, without clogging. Synchro-Stem permits easy cleaning, does not bind or stick; and the deep mounting adds to the life of the pipe. Send for illustrated pamphlet. Kaywoodie Company, New York and London. 630 Fifth Avenue, N. Y. 20. Established 1851.

Low cost family meal - and easy to make

SPAM

'N' HOT POTATO SALAD

SLICE half a whole SPAM. • Dice the rest. **BROWN** SPAM lightly in 2 tbsp. hot fat. Remove. • Combine the diced SPAM with 4 cups boiled, cubed potatoes, 1 onion chopped, ½ cup sliced radishes. • **HEAT** to boiling point ⅔ cup your favorite French dressing, pour over SPAM-potato mixture and blend well. • **TOP** with SPAM slices and garnish with onion rings and curly endive. • Six generous servings.

HEARTY BREAKFAST—scrambled eggs and fried SPAM. Hits the spot for lunch or dinner, too. Or serve SPAM with eggs any style—fried, boiled, shirred, or an omelet.

QUICK LUNCH. Split a bun, toast it if you like. Fry SPAM crisp and golden for one half, hot baked beans for the other. Good for husbands home for lunch.

No wonder SPAM's good flavor can't be equalled—from the very first it's been made with juicy pork shoulder and genuine Hormel Ham. There's only one SPAM!

COLD OR HOT
SPAM® HITS THE SPOT!

one." He looked up like a very small boy who wants something badly. "Mum. The Bijou's showing Great Expectations next week. I don't suppose I could go, could I?"

"No, I don't suppose you could. There'll be a big crowd and you're still pretty weak. You'd better come in the house now and Dolly'll want a cool drink."

IT WAS a wonderful house inside and she was all alone with Mrs. Graham, and a Negro man in a white coat was actually bringing her a tall, frosted glass and a plate of cookies.

"I'll have a drink with you, Dolly." Even if Mrs. Graham's eyes were deep violet and her hair bright gold, she somehow made you feel right at home with her. "You see, David is a long time getting well and he frets about it. And when we have some of the other children over, they stay forever or are too noisy."

Doll nodded. "Sure, I know. When Jimmy Huston was sick, I used to stay with him when his father and mother had to go to the studio."

"Are those the Hustons we hear on the radio?"

"Yes. They had a tough time at first but they're in the money now."

Mrs. Graham smiled. "You know a lot about the world, don't you, Dolly? A lot more than I do." She held out her hand. "Come again, Dolly. Come often."

She went slowly down the walk and some odd words Ace had used came into her head. "Quality folks." Well, Mrs. Graham and David were. She'd never known any before. . . .

She came back up the walk at a hard run that next morning. She burst into the dining room and the sun was slanting there through the green blinds. Mrs. Graham was such a lady that she didn't even look surprised.

"Look, Mrs. Graham, David could come down to see Great Expectations if there wasn't any crowd, couldn't he?"

David's face lighted up and even Mrs. Graham's soft voice sounded excited. "Why, what do you mean, Dolly?"

"Pete's running it off this morning so he can time it. There won't be anybody there but him and you and David and maybe me. You can have the whole house to yourself."

"Mum!" David's voice was bright.

Mrs. Graham was very quick. "You're sure we wouldn't be a bother? And would we have to hurry?"

"Gosh, no. Pete'll hold it till you get there. Take your time."

Mrs. Graham stood up. "Dolly, you must be a magician. I never felt so much like royalty in all my life."

Pete certainly did it up in style. Pete was out on the sidewalk waiting to swing the car door open. Pete said, "Good morning, Mrs. Graham. Good morning, David. I hope you'll like our little entertainment."

Pete ushering them into the empty theater. Pete putting David on the aisle. Pete called, "House lights!" and it all went dark. He called, "All right, Chad. Let her roll."

She could sense how excited David was and it was the right sort of excitement too: the kind you feel on an opening night when a show comes in cold and suddenly turns into a blazing success. She could feel his fingers touch hers and that was nice.

Well, holding hands like a bobby-soxer! How Oliver would grin if he could see her now. . . .

June slipping into July, July into early August. David was all well and growing very brown and they went swimming in the river.

She was weeding in the garden now and Aunt Mae slammed open the screen door.

"Special-delivery letter for you, Doll!"

Herbie's writing in a big scrawl and then she suddenly had to sit down on the back steps. Herbie married. H married to Rose.

"Why, what's the matter, Doll?"

Doll felt as if she'd been beaten. bie'd been going to send for her, thing, as soon as he got into the m He hadn't. He'd married Rose inste

Aunt Mae took the letter from

Herbie had written: "It'll pro take us some time to get organized we get back to New York in the But when we do, you bet we'll sen you P.D.Q. You'll love Rose, baby. will be a second mother to you. . . ."

Aunt Mae said, "That woman d sound good to me." She said, "I want to, Doll, you just stay right her be our little girl."

She looked up. "Gee, you're Aunt Mae. You're awfully nice." Aunt Mae couldn't help her now. M nobody could. "I got to go downto got to talk to someone."

You feel lost when you've a counted on someone and now can more. When it's someone you've it's worse. It gives you a nasty, sweetish feeling.

For nothing would ever be the in the Big Town again. Nothing the same between her and her f Rose and she would never get o matter how hard they tried.

The old Herbie'd be gone, too, a had the dismal sense that maybe t never been an old Herbie, a fond siderate father. Maybe that had al in her mind.

BUT here was the pudgy little standing in front of his t "Pete, can I talk to you, please?"

He took one look at her face. " come up to the office, Broadway."

She sat down, handed him the His eyes skimmed over it in a

"I feel terrible, Pete."

"I know." He went over to th dow. "I didn't tell you but when l here, I was married. Bee was c out too when I got settled. She She divorced me and got marr someone else."

Her eyes went dark. "But, Pet ple don't do things like that!"

"You know darned well the Broadway."

Yes, they did. Herbie had.

"I nearly went nuts," Pete was "but after a while I started thinkin never would have fitted in out he we'd both been miserable. You v cry, Broadway?"

"Only kids cry, Pete."

Pete's voice, very level: "You'v lot of good friends, Broadway."

Yes, she had. Pete, himself. Aun Ace, Uncle Kim, David, Mrs. G And they all had one thing in c that Herbie hadn't: some hard c honor. They'd keep their promise

"Can you take a tough one, way? I don't think your father wa back too much. Not right now."

Yes, that was it. That was wha you bitter sick in your heart.

"Maybe you've had about eno show business, Broadway."

There were two worlds before h she'd have to choose: the shiny exciting one that was the Big Tow all its trumpets blowing: the neat quiet-to-dullness one that was Au and Ace and Uncle Kim.

There was a third world, too: David and Mrs. Graham, and t the best of all. Could she ever them? Could she ever be what Ac "quality folks"? Probably not. could try.

"You know, Broadway," Pete ing, "when things get different, can't go back and make them they were before."

"No," she said, and even if she long time, she'd never feel as ol did now. "No. You can't ever g

he way he held his hands the wind
get to it at all.
uld I have a light, too?" I said.

"Gee, I'm sorry," he said. "I forgot you didn't have one."

He stood up, came across to my chair, bent down, cupped his hands, flipped the lighter and lighted mine too. He sat down again and now, as he sat there, I could see a small tension beginning to build up inside him. He placed his hands upon his bare knees and he started tap-tap-tapping with his fingers against his kneecaps.

Then he began tapping with one of his feet as well and he sat there, half naked in his deck chair, watching the bathers in the pool and it was obvious that the tension was building up within him.

WHEN finally he turned again to the little man, he tried to make his voice sound very casual.

"Now just let me check up on this bet of yours," he said. "You say we go up to your room and if I make this lighter light ten times running I win a Cadillac. If it misses just once then I forfeit the little finger of my left hand. Is that right?"

"Certainly. Dat is de bet. But I tink you are afraid."

"What do we do if I lose? Do I have to hold my finger out while you chop it off?"

"Oh, no! Dat would be no good. En you might be tempted to refuse to hold it out. What I should do I should tie one of your hands to de table before we started and I should stand dere with a knife ready to go chop de momint your lighter missed."

"What year is the Cadillac?" the boy asked.

"Excuse. I not understand."

"What year—how old is the Cadillac?"

"Ah! How old? Yes. It is last year. Nineteen forty-seven. Quite new car. But I see you not betting man. Americans never are."

The boy paused for just a moment and he glanced first at the English girl, then at me. "Yes," he said sharply. "I'll bet you."

"Good!" The little man clapped his hands together quietly, once. "Fine," he said. "We do it now. And you, sir," he turned to me, "you would perhaps be good enough to, what you call it, to—to referee." He had pale, almost colorless eyes with tiny bright black pupils.

"Well," I said. "I think it's a crazy bet. I don't think I like it very much."

"Nor do I," said the English girl. It was the first time she'd spoken. "I think it's a stupid, ridiculous bet."

"Are you serious about cutting off this boy's finger if he loses?" I said.

"Certainly I am. Also about giving him de Cadillac if he win. Come now. We go to my room."

He stood up. "You like to put on some clothes first?" he said.

"No," the boy answered. "I'll come like this." Then he turned to me. "I'd consider it a favor if you'd come along and referee."

"All right," I said. "I'll come along, but I don't like the bet."

"You come too," he said to the girl. "You come and watch."

The little man led the way back through the garden to the hotel. He was animated now, and excited, and that seemed to make him bounce up higher than ever on his toes as he walked along.

"I live in annex," he said as he bounced along. "You like to see car first? Iss just here."

He took us a little farther on to where we could see the front driveway of the hotel and he stopped and pointed to a sleek, pale-green Cadillac parked close by.

"Dere she iss. De green one. You like?"

No smudge, no blur . . . when you

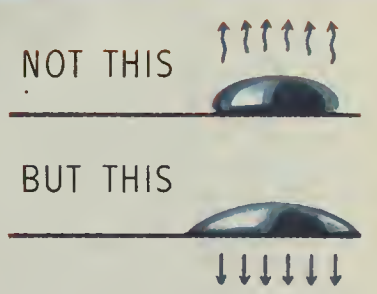
to this . . .

Parker "51" the world's most wanted pen



For new writing speed, pleasure, and distinction—catch onto this *dry writing.*

Just fill the Parker "51" Pen with Superchrome . . . the ink made for it alone.

Presto—each stroke dries almost instantly! For Superchrome has a special chemical formula it took 17 years to achieve. You need no blotter.

In addition, all 5 Superchrome colors are up to 60% more brilliant than ordinary inks—and 11 times more resistant to fading, on the average, than Government standards require.

Try this dry writing combination—"51" Pen and Superchrome—at your Parker dealer's today. The Parker Pen Company, Janesville, Wis., U.S.A., and Toronto, Can.

Superchrome dries up to 3 times faster than ordinary inks. That's because it dries by vertical penetration—not by evaporation.

Speed Sweep + Arbitrin

Speed Sweep, the brush with the steel back, is designed for cleaner, faster, easier sweeping and to outlast ordinary brushes 3 to 1. Arbitrin sweeping fluid, sprayed on the floor before sweeping, eliminates sweeping compound, disinfects and deodorizes. These and other advantages (16 in all) have proved the perfect answer to effective, low cost floor sanitation in factories, offices, schools, stores, etc. Write for complete facts.

MILWAUKEE DUSTLESS BRUSH CO.
530 N. 22nd St. • Milwaukee 3, Wis.

"Say, that's a nice car," the boy said.

"All right. Now we go up and see if you can win her."

We followed him into the annex and up one flight of stairs. He unlocked his door and we all trooped into what was a large, pleasant double bedroom. There was a woman's dressing gown lying across the bottom of one of the beds.

"First," he said, "we 'ave a little Martini."

The drinks were on a small table in the far corner, all ready to be mixed, and there was a shaker and ice and plenty of glasses. He began to make the Martini, but meanwhile he'd rung the bell and now there was a knock on the door and a colored maid came in.

"Ah!" he said, putting down the bottle of gin. "Ah, yes now!" he said, taking a wallet from his pocket and pulling out a pound note. "You will do something for me now, pleess." He gave the maid the pound.

"You keep dat," he said. "And now, we are going to play a little game in here and I want you to go off and find for me two—no tree tings. I want some nails; I want a hammer, and I want a chopping knife, a butcher's chopping knife which you can borrow from de kitchen. You can get, yes?"

"A chopping knife!" The maid opened her eyes wide and clasped her hands in front of her. "You mean a real chopping knife?"

"Yes, yes, of course. Come on now, pleess. You can find dose tings surely for me."

"Yes, sir, I'll try, sir. Surely I'll try to get them." And she went.

THE little man mixed the Martinis, poured them and handed them round. We stood there and sipped them, the boy with the long freckled face and the pointed nose, bare-bodied except for a pair of faded brown bathing shorts; the English girl, a large-boned, fair-haired, attractive girl wearing a pale blue bathing suit, who watched the boy over the top of her glass all the time; the little man, the little man with the colorless eyes, rather old but very full of bounce, standing there in his immaculate white suit drinking his Martini and looking at the girl in her pale blue bathing dress. I didn't know what to make of it all. The man seemed serious about the bet and he seemed serious about the business of cutting off the finger. But hell, what if the boy lost and he really did it? Then we'd have to take the boy to the hospital in the Cadillac that he hadn't won. That would be a fine thing. Now wouldn't that be a really fine thing? It would be a damn' silly unnecessary thing; but then, who the hell was I to interfere?

"Don't you think this is rather a silly bet?" I said.

"I think it's a fine bet," the boy answered.

"I think it's a stupid, ridiculous bet," the girl said. "What'll happen if you lose?"

"It won't matter. Come to think of it, I can't remember ever in my life having had any use for the little finger on my left hand. Here he is." The boy took hold of the finger. "Here he is and he hasn't ever done a thing for me yet. So why shouldn't I bet him. I think it's a fine bet."

The little man smiled and picked up the shaker and refilled our glasses.

"Before we begin," he said, "I will present to de—to de referee de key of de car." He produced a car key from his pocket and gave it to me. "De papers," he said, "de owning papers and insurance are in de pocket of de car."

Then the colored maid came in again. In one hand she carried a small chopper, the kind used by butchers for chopping meat bones, and in the other a hammer and a bag of nails.

"Ah, fine! You get dem all. Tank you, tank you. Now you can go." The little man waited until the maid had closed the door, then he put the implements on one of the beds and said, "Now we prepare ourselves, yes?" And to the boy "Help me, pleess, with dis table. We carry it out a little."

It was the usual kind of hotel writing desk, just a plain rectangular table about four feet by three with a blotting pad, ink, pens and paper. They carried it out into the room away from the wall, and the little man removed the writing things.

"And now," he said, "a chair." He picked up a chair and placed it beside the table. He was very brisk and very animated.

He was like a person organizing games at a children's party. "And now de nails. I must put in de nails." He fetched the nails and he began to hammer them into the top of the table.

WE STOOD there, the boy, the girl and I, holding Martinis in our hands, watching the little man at work. We watched him hammer two nails into the table, about six inches apart. He didn't hammer them right home; he allowed a small part of each one to stick up. Then he tested them for firmness with his fingers.

He's done this before, I thought. It's routine. Anyone can see this is a routine and that he's done it before.

"And now," he said, "all we want is some string." He found some string. "All right, at last we are ready. Will you pleess to sit here at de table," he said to the boy.

The boy put his glass away and sat down.

"Now place de left hand between dese two nails. De nails are only so I can tie your hand in place. All right, good. Now I tie your hand secure to de table, so."

He wound the string around the boy's wrist, then several times around the wide part of the hand, then he fastened it tight to the nails. He made a good job of it and when he'd finished there wasn't any question about the boy being able to draw his hand away. But he could move his fingers.

"Now pleess, clench de fist, all except for de little finger. You must leave de little finger sticking out, lying on de table."

"Excell-ent! Excell-ent! Now we are ready. Wid your right hand you manipulate de lighter. But one momint, pleess."

He skipped over to the bed and picked up the chopper. He came back and stood beside the table with the chopper in his hand.

"We all are ready?" he said. "Mister referee, you must say to begin."

The English girl was standing there in her pale blue bathing costume right behind the boy's chair. She was just standing there, not saying anything. The boy was sitting quite still, holding the lighter in his right hand, looking at the chopper. The little man was looking at me.

"Are you ready?" I asked the boy.

"I'm ready."

"And you?" to the little man.

"Quite ready," he said and he lifted the chopper up in the air and held it there, about two feet above the boy's finger, ready to chop. The boy watched it, but he didn't flinch and his mouth didn't move at all. He merely raised his eyebrows and frowned.

"All right," I said. "Go ahead."

The boy said, "Will you please count aloud the number of times I light it."

"Yes," I said. "I'll do that."

With his thumb he raised the top of the lighter, and again with the thumb he gave the wheel a sharp flick. The flint sparked and the wick caught fire and burned with a small yellow flame.

"One!" I called.

He didn't blow the flame out; he closed the top of the lighter on it and he waited for perhaps five seconds before opening it again.

He flicked the wheel very strongly and once more there was a small flame b ing on the wick.

"Two!"

No one said anything. The boy his eyes on the lighter. The little held the chopper up in the air and he was watching the lighter.

"Three!"

"Four!"

"Five!"

"Six!"

"Seven!" Obviously it was one those lighters which worked. The gave a big spark and the wick was right length. I watched the thumb s ping the top down on to the flame. T a pause. Then the thumb raising the once more. This was an all-thumb op tion. The thumb did everything. I t a breath, ready to say eight. The th flicked the wheel. The flint sparked. little flame appeared.

"Eight!" I said and as I said it the opened. We all turned and we sa woman standing in the doorway, a sr black-haired woman, rather old, stood there for about two seconds rushed forward shouting, "Carlos! los!" She grabbed his wrist, took chopper from him, threw it on the took hold of the little man by the la of his white suit and began shaking very vigorously, talking to him fast loud and fiercely all the time in s Spanish-sounding language. She sh him so fast you couldn't see him more. He became a faint, misty, qui moving outline, like the spokes of a t ing wheel.

Hell, I thought, if he gets that for n longer something's going to come l inside him. This is a fierce woma thought, this is a very fierce woman. then she slowed down and the little came into view again and she ha him across the room and pushed backward onto one of the beds. H on the edge of it blinking his eyes testing his head to see if it would still on his neck.

"I am so sorry," the woman said am so terribly sorry that this should pen." She spoke almost perfect En

"It is too bad," she went on. "I pose it is really my fault. For ten mi I leave him alone to go and have my washed and I come back and he is again." She looked sorry and deeply cerned.

THE boy was untying his hand the table. The English girl a stood there and said nothing.

"He is a menace," the woman "Down where we live at home he taken altogether forty-seven fingers different people—he has a collecti and he has lost eleven cars. In the they threatened to have him put somewhere. That's why I brought up here."

"We were only having a little mumbled the little man from the be

"I suppose he bet you a car," woman said.

"Yes," the boy answered. "A C lac."

"He has no car. It's mine. And makes it worse," she said, "that he s bet you when he had nothing to bet I am ashamed and very sorry abo all." She seemed an awfully nice wo

"Well," I said, "then here's the k your car." I put it on the table.

"We were only having a little mumbled the little man.

"He hasn't anything left to bet v the woman said. "He hasn't a thi the world. Not a thing. I won it all him. It took a little time and it was work but I won it all in the end." looked up at the boy and she smil slow sad smile, and she came ove put out a hand to take the key fro table.

I can see it now, that hand of h had only one finger on it, and a thu

STATE DEPARTMENT QUARTERBACK

Continued from page 17

. It was a wonderful break for nd for his country.

T two years he spent in Moscow not enabled him to perfect himself in ussian language, but also to ac- an extensive firsthand understand- f the people and their Bolshevik He traveled about the vast land en and as widely as he could, and where he went he learned some- His zeal was so earnest that other ers of the embassy's staff would ly ask him how he was making out "postgrad course."

Not Too Busy to Fall in Love

zealous as Bohlen was in perfect- mself in Russian, Moscow wasn't ork and study. He met his wife Another young career man of the as Charles W. Thayer, now chief Broadcasting Division of the de- ent's Voice of America. Thayer sister, Avis, who visited in the er of 1934. Blond, and blue-eyed, d Bohlen fell in love over a bowl sht. When Bohlen was transferred ashington the following year, the ing he did was to visit Avis at her in Villanova, Pennsylvania. They narried several months later.

ing the next two years they lived rmal, happily busy life of a young Department couple in the capital. in 1937, Bohlen was sent travel- gain. Except for a few fleeting one of which was to see his new ter, he wasn't home again until n 1942. He spent the intervening working hard and brilliantly in n, Moscow, Brussels and Tokyo. sident Truman found Bohlen an able authority on Russia, as his essor had. Chip spent many hours he President, often at night, prep- him on Russia and its Bolshevik Later he sat at his side through- e Potsdam conversations. But this here was one difference from the parleys—Bohlen not only inter- , but he also counseled and guided esident.

It was at Potsdam that he encountered his first real stumper as an interpreter. At one protracted session, Truman suddenly remarked, "Seventh inning! Everybody take a stretch."

Stalin's interpreter looked blank. Bohlen knit his brows in perplexity.

"What's the matter, Chip?" Truman smiled. "Can't you boys interpret that in Russian?"

"Frankly, Mr. President, we can't. It's got me. The Russians don't know anything about baseball, and I don't know just where to begin."

"Oh, you can explain it all right," Truman laughed. "Tell them about baseball. I'm sure the premier will be interested."

Bohlen adjusted himself in his chair, devoted a few moments to deep thought, and then began to spout Russian. Stalin listened intently. When Bohlen finished, the Red ruler smiled and said, *"Khorosho."*

Bohlen smiled in return, the assembly relaxed, and everyone rose for a brief respite.

Later, the President asked Bohlen what he had said.

"I explained that you had used a popular American expression that was a part of our national sport. That it was the custom in our country during a baseball game to stand up and stretch at a certain point that we call the seventh inning. I also explained that when you suggested a seventh-inning stretch, you had felt that everyone might be a little fatigued and would like a brief intermission."

"And what did Stalin say?"

"*Khorosho.* It means okay."

Secretary Byrnes also quickly came to have a high regard for Bohlen's worth as a sound adviser and a speedy and resourceful interpreter. Bohlen and Benjamin V. Cohen, his predecessor as counselor of the State Department, constituted Byrnes' "brain trust" at the London and Moscow Foreign Ministers conferences. Besides teaching his South Carolina-tongued chief how to say *nyet* (no) and *ya soglasnan* (I agree), Bohlen also provided him with a steady flow of arguments and advice in the bitter and acrid deliberations.

Bohlen gave Secretary Marshall the same sort of service at the next Moscow conference, and the new Secretary quickly showed his appreciation of Chip's services. When Cohen followed Secretary Byrnes into retirement, Secretary Marshall immediately appointed Bohlen to the post of counselor of the State Department. He is one of the youngest men ever to hold this important job.

Recently, in recognition of his little-known but outstanding work as liaison official with Congress, Bohlen was promoted to the top Foreign Service rank of permanent minister.

The $13,500 salary which the new job carried with it was not the least of the satisfactions that went with the promotion. It is $1,500 more than Bohlen's previous salary, and the raise was a big help. Living on a government salary is no simple matter in Washington these days for a top State Department official with two growing children. The Bohlens go in for no social splurging; they can't afford it. They live modestly in a frame house in the Georgetown section of the capital. Bohlen's chief recreation is romping with his children; "Roughly, of course," says Mrs. Bohlen.

But a certain amount of entertaining is an inescapable part of Bohlen's job. There are lunches and occasional dinners to be given, and innumerable incidentals, all adding up to a formidable sum at the end of the month. And unfortunately Uncle Sam is sternly pinch-penny when it comes to providing expense money for his career employees.

His Typical Working Day

Bohlen's ability to perform fabulous quantities of work is a never-ending source of awe and amazement to his intimates. An ordinary day for him will include reading and disposing of huge masses of official correspondence and reports, conferences with Secretary Marshall and other State executives, long discussions with Senator Arthur Vandenberg, chairman of the Foreign Relations Committee, and other Congressional leaders on international problems and legislation, plus innumerable telephone calls to and from officials of other government agencies. It's a rare evening that he is home before seven-thirty.

In all of his extraordinary career, and despite his reputation in international governing circles, Bohlen has hit the spotlight just once. When he was in Moscow with Secretary Marshall he was given the job of handling the American press. This was a tough chore, because the Secretary had decided on an iron-clad policy of secrecy. Consequently the American correspondents got very little news. One day, when he said regretfully that he had no news, he was surprised to see that they reacted very cheerfully.

"Well," said Henry C. Cassidy, an Associated Press correspondent, "if you haven't any news for us, we have some for you. Your wife had a baby in Washington today!"

And that night one of the radio reporters broadcast to the United States:

"There is only one important item of news to report from Moscow tonight. Secretary Marshall's brilliant adviser became the father of a boy—Charles Eustis Bohlen, Jr."

The correspondent said that this was the first time anybody had ever seen Chip Bohlen lose his aplomb. He was really fussed.

THE END

"All your lights were out, so we knew you must be home looking at television"

SHORT SHORT

"Here's the one," he said. "I'll mak the sacrifice just to give you a goo time. A private cottage on Cape Co

THE UNCHAINED

BY ROBERT ZACKS

HE LAY on the couch and watched the profile of her face as she stared out of the window at the gray, rainy day.

He knew; he read all the signs with the skill of a man who knows and loves a woman: the tired lines beginning to etch her smooth brow, the unconsciously clenched fists, the vague sadness trembling at her lips.

He watched quietly and steadily, knowing that as soon as he spoke, she would turn, the sadness in her face giving way to something else. He thought a moment, then smiled at his thought. He weighed the worth of it, then slowly got up and went over to the desk near her and opened a drawer and took out a batch of thick folders and booklets. Thoughtfully, he sat down and opened one, discarded it, opened another.

"Let's go away," he said eagerly. "Here's a nice country lodge. The de luxe cottages are—"

"No," she said, a faint smile on her lips. "I don't want to."

"Handball," he said, reading, his eyes lighting up a little. "Tennis, boating. Sounds all right." He looked at her coaxingly. "You need a change, baby. I think we'd better go."

She shook her head. Her blond hair swished in front of her face, momentarily hiding her profile.

He said meditatively, "Well, I guess I'm being selfish. After all, you don't play handball. Let's see here." He dug into the pile of vacation booklets and came up with a blue one. "Here's the one for you. I'll make the sacrifice. Just to give you a good time. A private cottage on Cape Cod. Rugged stuff. Big waves lashing big black boulders. Spray. You could be lying on warm, white sand in that nonexistent, practically, bathing suit, and I'll do some surf fishing—"

She turned her head and looked at him, a flicker of interest in her eyes. Her fists, he noted, were still clenched, but not as tightly now.

"On the other hand," he said, calmly, flicking the blue folder aside, "there's this boat deal here. Very unusual. Sail on a real sailing ship—up the Maine coast. Moves by wind in the sails," he explained.

She laughed a little. "No," she said. "Really?"

"Thought you might not know," he said humbly. "Sorry."

Reluctantly she went over and sat down beside him. "Let's see it," she said. He suddenly put on a sad face.

"Well, okay," he said doubtfully. "But I just remembered: I get seasick. I get it really bad—even on ferryboats."

She looked annoyed and pressed her lips together. "What else is there?" She leaned her soft shoulder against his, looking.

"Well, here's a tramp steamer—"

"I'm no tramp."

He looked at her sternly. "Only by the grace of God, me and a marriage license. We are all God's creatures, after all."

"Look at this," she said, pulling out a giant, slick sheet folded three ways, covered with pictures. "Visit the Grand Canyon and Yellowstone Park. Scenes of wild scenic beauty, tame bears. They eat out of your hand—"

"Or your hand itself if it has the right flavor."

She ignored him. "There are auto camps along a route that is full of historic trails and places." Her brown eyes were shining now. "You know, I think we'll do that. Take the car and throw the luggage in back and just take off."

"Well, I don't know," he said cautiously. "The car needs a piston job. Don't think it could take some of those hills."

For a moment the joy in her eyes faded and he said recklessly, "Ah, what the devil! So we'll have new pistons put in. Maybe we'll even buy a new car. Maybe." He leaned over the map of the route; she leaned anxiously over his shoulder. "Let's plan this out."

THEY were moving along the Santa Fe Trail, wondering about the quality of the food in eating places along the way when he looked up at her. "I forgot about the apartment. It's a shame to leave a gorgeous place like this unused."

"We could sublet," she said thoughtfully.

He frowned. "I don't like the idea of strangers making themselves at home among all our antiques. Probably find cigarette holes in the couch. I was thinking we could give it to some nice young couple who haven't been able to get married because they can't find a place to live. They would treat the place right. And appreciate it."

"That's a very nice thought," she said softly. She looked at him with such a shimmering radiance in her face, such a glow of contentment in her eyes, that he caught his breath. With a flickering motion he tossed the pile of travel folders aside and reached out for her.

"Come here, baby."

She went into his arms. And after a while she sighed and rubbed her cheek against his. Then she looked over his shoulder at the travel folders scattered about.

They were all around the little furnished room. The blue one was under the lumpy double bed; the one with the sailing ship was on th rickety wooden chair; some of th others had landed on the frayed an sagging easy chair. And one—th one they hadn't read yet tonight- had landed on the battered dresse next to the small but lovely bouqu of roses he had brought home th night before. Somehow the stror crimson of the roses was the only in portant thing in the room.

"Let me go," she said softly.

He leaned back on the couch on again and watched her as she pick up the folders; they were very wor I'd better send for new ones, h thought.

Suddenly he said, "We've enou for a movie. Let's—"

He stopped.

She was looking at the last folde the one beside the roses; it was h favorite, the one she always saved f last, the one which showed the spa kling green swimming pool in t desert, with a background of sno covered mountains. Her eyes we shining and she was fully in the moo of their game, the game that, for little while, wiped away from co sciousness the problems of too-hi food costs and swollen rent expens that gobbled up their joint earnin with giant bites.

"I think we'll go here," she sa blithely. "I think I'll go for a plun in the pool after dinner. Then we dance under the stars. And tomorro we'll climb a mountain—maybe trout fishing up there."

For a long moment his ey searched hers soberly, and he saw the look she returned an acknowled ment of what they had in each oth Then he grinned, and as he prepar to join her for a plunge in the po he thought: *I swear to you you'll it someday, darling. I swear it.* ★★

Beer belongs...enjoy it

In this home-loving land of ours . . . in this America of kindliness, of friendship, of good-humored tolerance . . . perhaps no beverages are more "at home" on more occasions than good American beer and ale.

For beer is the kind of beverage Americans like. It belongs—to pleasant living, to good fellowship, to sensible moderation. And our right to enjoy it, this too belongs—to our own American heritage of personal freedom.

BEER AND ALE—AMERICA'S BEVERAGES OF MODERATION

UNITED STATES BREWERS FOUNDATION

MIRACLES MADE TO ORDER

Continued from page 13

he tried to learn whether any rules for taste patterns existed; whether these were passed on from parents to children; whether American Indians, Negroes and Chinese were tasters and nontasters alike.

To see if rats, too, were divided into tasters and nontasters, Dr. Curt P. Richter of Johns Hopkins Hospital at Baltimore wrote for some P.T.C. crystals. He knew that rats have their own peculiar ability to select nourishing foods and reject poisons. Confronted with P.T.C., nonpoisonous to human beings in the taste tests, the rats shunned it. But Dr. Richter forced several rodents to eat a little. They died. The poison would kill the rats, but how could they be induced to eat it? Dr. Richter asked Du Pont for chemicals that were related to P.T.C. but which might not be objectionable to rats. Back came 24 compounds, brothers and cousins of P.T.C. The fifteenth tried was Antu. The rats ate it and died. Dr. Richter found that one-half part Antu per one-million parts of rat was sufficient to kill.

To a miracle-by-accident Du Pont is also indebted for a new plastic so tough it withstands great temperatures and corrosive acids that destroy all metals. In an age of superheated jet-propulsion engines and Diesels, Du Pont's new plastic toughie is being welcomed with open arms. Yet no research team set out to create this rugged industrial material.

The Mystery of a Vanished Gas

It came about when a chemist, looking for new refrigerants, found a gas he could not use. The gas was tetrafluoroethylene, a cousin of "Freon." Since chemists are reluctant to throw things away at Du Pont, the gas was sealed in a cylinder and stored in a warehouse. There it lay for a year when the chemist, Dr. Roy Plunkett, opened the cylinder valve to take some out. The gas was gone. Dr. Plunkett dug up his refrigerant research notebook and hauled the cylinder to a scale. It weighed no less than it did when it was sealed. The gaseous stuff must still be inside.

The chemist hacked the cylinder open and found his gas had turned into a solid mass (polymerized). To this stuff he gave the routine works. He boiled it in hydrofluoric and fuming nitric acid, and finally, aqua regia, which chews up even platinum and gold. The stuff remained intact. He applied heat until the material glowed red. But it didn't start deteriorating until it reached a temperature at which some metals are long molten. The new material, a plastic, was dubbed Teflon, and Du Pont is busy meeting industrial demand.

Du Pont is grateful for miracles-by-accident. But such miracles are regarded only as extra dividends on the investment of planned plodding. More often, the pay-off is on brains, stubbornness and sweat.

All through one Christmas Eve several years ago, two Du Pont research directors toiled on an urgent task posed by the company's top brass: Choose new fields for the Grasselli Chemicals Department to go into. Grasselli is one of Du Pont's ten industrial departments—each of which is the size of a substantial corporation.

"We don't expect your new program to make any money for five years," the brass had told the research directors. "But after that you'll have to stand on your own feet." As a Christmas present for their company, the men came up with a research plan that embarked Du Pont on one of the most exciting molecule hunts in its history: the search for new chemicals to solve old biological problems—chemicals to conquer plant and animal pests, weeds and rats and plant virus diseases, chemicals to fight disease in domestic animals.

The Grasselli Department equipped itself with biologists, additional chemists and engineers, and went to work.

First fruit of the heightened search for chemical pest controls was a new, super pesticide, known as Methoxy DDT which takes up where the original DDT left off. Du Pont researchers hold that the first DDT was only a curtain raiser on the pesticides yet to come. It lacks a quick paralytic effect on bugs. It can hurt human beings if mishandled and it can stunt the growth of tender plants such as melons, cucumbers, squash.

A Du Pont team of entomologists (insect experts), plant pathologists (authorities on plant diseases) and chemists plodded through 500 blood brothers of DDT to create Methoxy DDT. This is a killer that paralyzes the fly on touch. Yet it is one fiftieth as poisonous to warm-blooded animals as DDT. Sprayed on cows, or sheep, DDT could accumulate in their fat and so reach the dinner table. Methoxy DDT, according to researchers, does not accumulate in the fat of animals. Nor will it harm tender plants.

Next, Du Pont's pest stalkers went after weeds. Several years ago American and British scientists found that chemicals similar to plant hormone had the power to keep fruit glued to trees until ripe for plucking. Fruit growers threw their hats in the air. But the scientists were still unsatisfied.

A Weed Killer Is Discovered

In the hunt for more effective compounds Du Pont chemists came upon a synthetic hormone, or auxin, that wasn't much good at gluing apples to trees. But it was terrific at killing dandelions, plantain and other broad-leaved weeds. Dosed with the new synthetic hormone, the weeds burst into abnormal growth then crumpled as if from exhaustion and died. The weed killer was 2,4-D (dichlorophenoxyacetic acid).

Like its fellow pesticide DDT, 2,4-D is regarded by Du Pont researchers merely as a curtain raiser on the unfolding drama of pest killing. They are in full cry after weed killers that will do a specific job: destroy unwanted plant life but spare the wanted.

To kill a plant fungus or virus but spare the crop itself requires testing thousands of chemicals by teams of chemists and biologists. The biologists are needed to determine how the fungus killer will affect the crop's seeds and the seeds of those seeds. But after an effective chemical slayer has been found the hunt may have to start all over again. Animals and plants have a way of building resistance to poisons. Flies are already showing resistance to DDT, and even certain slime bacteria become hardened to enemy chemicals.

Yet scientists are laboriously adding to the number of specifics. One new type kills early and late blight on potatoes. Another, a relative of 2,4-D kills trees for papermaking. Girdle the tree with a bandage soaked in this chemical. The tree not only dies but does so most economically Its bark loosens and falls, saving mechanical bark removal. It dries up and is lighter and less costly to haul.

Specific pesticides that will kill only the pests they're aimed at are among the miracles now on order at Du Pont. The perfect fiber that can be woven into the perfect cloth is another.

Ever since the gloomy genius, Wallace Carothers, extracted from coal, air and water the epochal combination of chemicals that yielded nylon fiber, researchers at Du Pont and elsewhere have taken a questioning attitude toward many of the fibers that nature makes.

Cotton? Good for many uses. But nature made it primarily to carry seed, not to produce cloth, they say. Wool? Good, but it shrinks, and moths love it.

The scientists want to engineer fibers for specific purposes: to provide warmth in winter yet be cool in summer, to be light in weight, not to shrink (as wool does) when washed. They think it should be possible to engineer a fiber that can be laundered without ironing, and, for good measure, will resist moths, summer showers and fire.

How do you achieve such a miraculous fiber? At Du Pont it's being sought through a marathon elimination contest.

Nylon, a stretchable plastic, is a member of a family that embraces many thousand varieties of related giant molecules known as polyamides. When Carothers discovered the first nylon, Du Pont set aside a team of chemists, and from the first nylon's cousins and its uncles and its aunts the chemists—a two years—selected "Fiber No. 66," present nylon.

But the hunt for another No. 66, other basic synthetic fiber, has ne slackened. The most promising covery is the fiber mentioned at the ginning of this article which weaves i cloth that resists wrinkling and can ironed with half the time and half effort needed for ordinary fabrics. make the grade, the new fiber must commodate itself to high-speed a matic looms, must have the right amo of curl (or the weave will fall ap must have the right amount of slip drag to stay on the spindle, and must uniformly. It must pass all of these many other tests or be elimina Among fibers, many are culled but are woven.

Nylon has been described by scien as one of the top chemical discoverie the twentieth century; in other word big-league miracle. But Du Pont searchers, working with fibers, h sprung a host of lesser miracles too.

Error Leads to Solving a Proble

There was the problem, for insta of taking the luster out of the e shiny rayon. Researcher William Hy tried dumping kerosene into the ra viscose batch, because he misread a man scientific paper and so thought was the way to do it. It worked! See a less messy and less volatile oil, he tried Nujol, which eliminated the sl He finally solved the problem by usi combination of mineral oil and p pigments.

Men who can keep a company grea conjuring up vast new markets from contents of a test tube are assets t prized above rubies. Recruiting assets is a serious business at Du P

Yearly, five talent scouts comb universities for technologists who play a team game. First question scouts ask concerns itself with the spective rookie's class standing. Do know his stuff? Does he think indep ently and originally? The candid personality gets a good going-over. dominant, quiet, affable, colorless, n tive, strong, commonplace? Is his awkward, ordinary or confident? Ca carry the ball in a conversation?

Likely prospects are invited to laboratories where they are sh around and interviewed by the lab tory director. If the impression he m during his visit jibes with the scout port, the prospect is offered a job.

In a chemical age in which man already unlocked so many of nat secrets, what is there left for tean searchers to discover?

"Plenty," say Du Pont's veterans "Every time we go through a new there are a half dozen more in the d dor to be opened," says Dr. William Charch, the coinventor of moisture Cellophane.

Motorists are waiting for the pe lubricating oil. Already greatly impr by the chemists, oil still wears ou cause it's unstable to heat and air. perfect lubricating oil will last for won't sludge, won't freeze and have changed during cold weather. H wives are waiting for soapless soa the form of cakes that will wash ir and hard water alike. Farmers waiting for new pesticides, and f weavers for dyes that are more fas more brilliant.

That is why the midnight oil—n Pont invention—burns in the comp laboratories.

The customers are waiting.

THE END

COLLIER'S "Well, by golly, we made our 650 miles today!" DON TOBIN

This kind of magic is easy!

NOTHING in your hands! Nothing up your sleeves! But look...

...out of your *present income* grows a wonderful future. There's a home in the country, college for your children, travel and fun for the whole family, even a comfortable retirement income for yourself.

And this is no trick, no illusion. *It really can happen!* It is happening right now for millions of wise Americans who are buying U. S. Savings Bonds *automatically* on the Payroll Savings Plan.

Here's how the magic works. All you do is sign up for the Payroll Plan. Then regularly, automatically, part of everything you earn is used to purchase Savings Bonds.

And magically, week after week, these *automatic savings* pile up the money *you'll need* to pay for the future *you want!*

Don't forget that every dollar you put into Savings Bonds is a "money-making dollar"—that $75 Bond you buy today will be worth $100 in just 10 years. And these Bonds play a big part in helping keep our country financially sound and strong, too.

They're always available at any bank or post office. But the surest way—the easiest way—to build financial security for your future is to buy them *automatically* on the Payroll Plan.

If you're not on a payroll, and have a checking account, you can still enjoy the magic of automatic saving with the Bond-A-Month Plan. Ask about it at your bank.

AUTOMATIC SAVING IS SURE SAVING—U.S. SAVINGS BONDS

U.S. SECURITY LOAN

Good News FOR LITTLE WOMEN . . . .

Y RICHARD P. HARMEL

The woman of five feet five and under, be she slim or plump, young or middle-aged, can find ready-made dresses designed to flatter and fit her

OR the first time, the little woman—who has been there all the time—is getting a real break. With the perfect-fit clothes she can today, she can be a fashion figure on Main t just as her taller sister has been. For the on industry has finally recognized the glam- potential in a market which comprises 40,- 00 customers.

e dress industry was first stunned into action years ago when the Bureau of Home Eco- s in Washington exploded the myth that most rican women were both lissome and divinely ive feet seven and over. Their statistics proved 78 per cent of the wearers of feminine clothing five feet five and *under*. Dress manufacturers, had been living in a dream world peopled by on magazine illustrations, rushed to their de- g tables to plot a revolution.

a result, a large and flourishing business has developed to cater to this cross section of ica. Three hundred and seventy manufac- in the nation today, whose business totals ns, are producing smart dresses especially de- d for the smaller woman. She can now step into ionable frock costing $250, or an eight-dollar n dress. And either one will fit the first time. rmerly, the cost of alterations was a serious for the shorter woman who was able to find style only in the misses line. The longer di- ions of these dresses or other apparel would to be scaled down to the shorter proportions little lady. In many cases this meant rebuild- lothes so that she would have a proper fitting, ll as a stylish wardrobe. Just to give you an idea of the work required, the essential alterations include narrowing the shoulders, shortening waists and skirts and for the half-size figure, additional fullness is sometimes required in the bust and hips. But this extra expense is a vanishing problem now that misses ready-to-wear is no longer complacent in its style supremacy.

Now it doesn't make any difference whether the five-foot-five woman is slim or plump, young or middle-aged. She can choose her wardrobe from attractive styles made in correct proportions.

For many years manufacturers of half sizes have been thwarted in their efforts to produce a line of fashionable garments, by the hostile attitude of both the wearer and the retailer. A stigma of dowdiness attached itself to half sizes in the early days of ready-to-wear. The department stores would stock only the utility, house-dress type of garment in the half sizes. The specialty shops that cater to the more fashion-conscious had a few half sizes discreetly among the misses dresses. They wouldn't risk offending those small, not-thin women who insisted on identifying themselves with the tall, thin fashion model.

The vanity of the shorter woman sent her to the misses department regardless of what might have been available in the half-size dresses. Any attempt on the part of manufacturers to create a line of fashionable half-size dresses was fruitless and ruinous. The stores would not buy them. This brought the styling of half sizes to a standstill year after year, and deepened the little woman's objection to them. Whatever the price, whatever the trouble, whatever the alteration, the little woman was going to look like the ads. Of course, she never did. The mayhem she committed on the dress in trying to get it to fit distorted the original proportions and destroyed whatever charm or style it had.

The slimmer sister in the little-woman family hasn't raised quite the same problem. There was no stigma of "mama" dress styling to overcome. The development of brief sizes for the slender girl five feet five and under gained impetus when the Army, Navy and Marines, in clothing their women's corps, released statistics that showed that 85 per cent of the uniform needs were for the short, slender woman.

This was no market to ignore. By the end of the war there were several firms devoting all their production to the little, slender woman.

Ostensibly the dresses were misses sizes 10-20 but, as in the half sizes, the proportions of length and the shoulder width were scaled down. The expansion for the bust, waist and hips was of course unnecessary for the slender woman. To distinguish them from the misses sizes, these dresses were given such names as "Miss Brief," "Petites," "Pettisize" and similar variations.

The manufacturers of both the half sizes and brief sizes no longer need apologize for their products nor seek for markets. Extensive promotion campaigns have finally induced the customer to accept herself for what she is and make the best of it, literally, with clothes designed to her needs. Department stores and more and more specialty shops have established departments for half and brief sizes. The little woman has come into her own in the fashion world. ★★★

that you mustn't express your personality or attempt to be original." He paused and looked at my canvas. "Like that elm tree of yours, for instance."

"You don't like my elm tree?" I asked as I added a wholly unnecessary bush.

"It's a remarkable tree," he stated. "Original."

He had such a droll turn to his voice that I had to laugh, and when I turned to look at him and we both laughed I suddenly felt that I would have to sit down. So we sat down.

"My name is David Croce," he said.

"I really—" I began.

"Oh, go on," he urged. "It's Sunday."

"No," I told him. "It's Taylor. Ann Taylor."

We laughed again, and I could feel my heart pounding a little and was sorry, because I wanted to be glad that I was going to Europe.

"You see, on Sundays I can be Original," he went on gravely. "I can Express My Personality. I can do all the things I can't do on weekdays. So I walk around and look at things and think. I don't suppose you've ever noticed, for instance, that there's a difference in the way little boys and little girls ride tricycles?"

"No," I admitted. "I haven't."

"Well," he said humorously, "little boys sometimes ride around and around in circles. But little girls never do. Never."

"How strange," I mused, because it *was* strange. "How do you account for it?"

He grinned at me and I felt my heart skip a beat. "Little girls always think they know where they're going," he said.

WE WERE both silent. After a while he asked me about Europe, and I told him how I had always wanted to go there, and how an old woman had advertised for a companion and was sailing on the Queen Mary for Southampton at the end of the week, and I was going to be paid all my expenses and a salary in the bargain, and we'd go to England and France and Belgium and Holland and Denmark and Norway and Sweden.

"I'm leaving myself," he said thoughtfully when I had finished.

"Where?" I asked, because I thought it would be wonderful to meet him again on the French Riviera.

"Sweetwater, Missouri," he said proudly. "Home."

He looked so comical as he said this that I had to laugh, although I was sorry, too. And then I was afraid I had hurt his feelings, because I was going to places that were so much more exciting, so I told him that I was from Lancaster in Dutch Pennsylvania and had come to Washington during the war and hoped to go back to Lancaster after I returned from Europe.

"How long are you going to be away?" he asked.

"About a year."

He said nothing for a moment and then he jumped to his feet. "Come on," he said. "We'll go canoeing."

"I couldn't possibly do that," I told him, just as my mother had instructed me to do. . . .

So we had the most wonderful afternoon. We rented a canoe above the Key Bridge and paddled upstream for a couple of miles and then turned around and drifted with the current, close under the trees at the shore. It was a drowsy autumn afternoon, with leaves drifting down in the green shadows of the sunlight and the city only the faintest suspicion of a murmur in the remote distance.

"Sweetwater," I mused, trailing my hand in the cool stream. "It's a beautiful name. I can picture it quite clearly. There's a village blacksmith, and a carriage store, and an old barbershop that still has mugs with the customers' names on them—and hitching posts and great elm trees around the village square. The main street isn't paved and in summer it's sort of ocher colored except when it gets wet, and then it turns burnt umber. It's very dusty sometimes, if it hasn't rained enough. And there's a big river just outside the town, and the kids go down there barefoot in the summertime to fish with bamboo poles—"

"I don't think you have quite the picture, exactly," he said, and he was so serious about it that I almost burst out laughing. "There does happen to be a blacksmith, but he works for one of the with eyes so warm that I was glad a man can't guess what a woman is thinking.

"Will they pay you more money?" I asked.

"Now you're the little girl going in a straight line on her tricycle," he grinned. "No, I'm chasing my tail. They'll pay me what I'm making here. A little less, if anything."

"But you'll have Sweetwater. Is that it?"

"I'll have Sweetwater. And the elm trees. And the village barber and the hitching posts."

We both laughed.

All that afternoon I wondered why it was that a man or woman could live for

"Take my advice, dearie. The only pictures that wolf can get you into is his home movie"

COLLIER'S — WILLIAM VON RIEGEN

garages. And in the business center we have a five-and-dime and—"

"No five-and-dime," I told him firmly. "No business center. Just a feed and grain store, and maybe a sort of general emporium where they sell coal oil and bottled pop. And lots of white wood houses set back behind gardens and picket fences. And gaslight in the street lamps at night."

"Very well," he grinned. "But the Sweetwater Chamber of Commerce isn't going to like it."

"Why are you going back?" I asked him.

"You won't believe this," he chuckled. "But they're going to build a new power plant in Sweetwater. And they wrote to offer me a job."

"Not a power plant," I corrected him. "A small new movie house. For silent films, of course."

"Of course," he nodded, looking at me years in a big city and not meet anyone they really wanted to know until the very moment they had made all their plans to leave. I was having a difficult time with my heart, which insisted upon pounding absurdly whenever he glanced at me, or laughed, or spoke. His voice—well, when he talked about the things that interested him, such as walking in the rain, and having a workshop where he could build things, and someday designing a house of his own, I felt as though I wanted to cry.

He went with me to my apartment on Wisconsin Avenue and met the two girls with whom I lived—Annie II as we called her, because I was also an Ann, and Grace Margolis, who worked for the Bureau of Engraving and Printing and strongly objected to anyone asking her, as people always did, if she could bring home samples. Annie II was a shrewd little blonde who helped the color of her hair along and knew exactly wha wanted in life, which was a millio lars. Grace was sleek and quiete very much the still-waters kind. told David about them both before so he behaved like a dream and t time he left they had served him te cookies and were wild about him— cially Grace, which surprised me a It was she and not Annie who cam the bedroom afterward and tried t sole me a little.

"You don't want to be a compan some old woman," she said gravely, ing me over. "Nature didn't intend

"I'm going to Europe," I said bornly, sitting up on the bed. "I'll have another chance. Ever."

"That's right," said Annie II fro next room. Annie was the one w ways knew the right thing to do, b she never let her heart rule her "He's nice, but he's just small After you've spent a year in Londo Paris you'll wonder why you ever him."

"That's right," I said firmly, dryi eyes. "I want to advance in life. I want to stand still." But even as I I remembered about the little girls cycles and my shoulders sagged. falling in love with him," I said abs

"You can't possibly fall in lov anyone in five hours," stated Anni pearing at the door with a dish hand. "That isn't love. That's bio

Grace got up and quietly moved from the room, closing the door b her. But I had made up my mind was going to do, and I simply put out of my thoughts—at least as we could. I was going to Europe. I w ing to drink *apéritifs* at the Café Paix, and go to services at Westm Abbey, and listen to the orators in Park, and ride a bicycle in Copen and eat *smörgåsbord* in Stockhol was my last chance—my only cha

Accordingly, I told Annie and that if David called they were to te that I was out, and not to tell *me* t had called; and though it was the h thing I had done in a long time, Grace that she could have him wanted him. It never occurred that David might not want Grac cause she is a very lovely girl.

I SPENT Monday and Tuesday l the clothes that Mrs. Ammerm suggested; and though I had or moment when the little old woma me promise that I wouldn't do young girl had done in years pa abandon her at the last minute, her my solemn and sacred promi closed the door on the last lin thoughts about Sweetwater and t trees.

That evening at about six o'clo vid came to the apartment.

I fled to the bedroom. When I his voice—"Is Ann there?"—my began to pound and my knees sh wanted to get out of the house; I to sail on the Queen Mary that ve ment—anything to escape from w did to me.

I heard Annie II say, "I'm a sorry. You have the worst luck you?" And I had to hold onto th spread to keep from jumping u shouting that it was all a mistake. held on, all right. I was going to E

After the front door closed, I the most extraordinary whispered ment going on between Annie and At last Grace opened the bedroo and said to me, "You can come o if you like."

ask them what it was all about, and then I looked around and there was David.

Annie glared at Grace. "You're a meddler," she said out loud.

"I'm no more a meddler than you are," Grace replied coolly. "It's perfectly obvious to me that we're both meddling." And she steered Annie firmly out of the room.

"Hello," said David.

"Hello," I said, standing quite still.

"I wasn't able to reach you by phone. I wanted you to have dinner with me. There's a little place—"

"No," I interrupted firmly. "I am not going to have dinner with you. I need all the time I can find to get ready to go to Europe."

"Is that final?" he asked.

"That's final," I replied.

He wrote something on a slip of paper. "That's the address," he said, giving it to me. "In case you change your mind, I'll be eating there alone."

"I won't change my mind," I told him.

Twelve minutes later I found him at a corner table of a small and quite undistinguished restaurant under a private house on Massachusetts Avenue. He explained with a grin that he liked the place for the same reason I liked Sweetwater: because of the gingham tablecloths and the wicker-covered bottles of Chianti with the candles in them, and the old Italian proprietor who knew a secret recipe for chicken *cacciatore*. I looked at the bare tables and the plain lamps and the bored waitress who filled our water glasses and said nothing at all.

"Are you really going to Europe?" he asked.

"I am," I replied flatly.

He seemed not to notice my bad humor. "On Friday?" he inquired.

"On Friday," I stated. "And what's more, I've given my sacred promise to Mrs. Ammerman."

HE SAID gently, "I'll make a bargain with you, Ann," and I could have cried when I heard him use my name the way he did. "We're agreed. You're going to Europe on Friday and I'm going back to Sweetwater on Saturday. So we're just a couple of ships passing in the night—courses set and helms locked. We can relax. We can take it for what it is—a little bit of unexpected good luck in the middle of a long journey." He smiled. "Do you know that verse by Robert Frost—

" 'The woods are lovely, dark and deep,
But I have promises to keep,
And miles to go before I sleep,
*And miles to go before I sleep?'"**

I nodded because I couldn't say anything.

"Shake?" he suggested.

We shook hands a little longer than was necessary; and then I took a deep breath and saw, quite clearly, all the gingham tablecloths and the bottles of Chianti with the candles in them, and the artists who were talking in dark corners about Matisse and Picasso and things like that. It was a very romantic restaurant.

David was a quite serious person underneath it all, of course, just as I was; and we happened to get to talking about the great mistake that most young people made, these days, of marrying before they knew each other very well.

He pointed out that when they dated they were both on their best behavior, so it was almost inevitable that when they got married they learned nothing about each other except the bad things; and I said that some kind of arrangement ought to be worked out where, if a couple happened to be getting serious about each other they could agree to make themselves behave exactly as they would if they were out with a member of their own family; and he and I agreed that perhaps a day of doing absolutely nothing except sitting around together and reading the paper or listening to the radio would do the trick.

So you see, we were both very sensible in our attitude, and that was why I wasn't afraid. I thought it was quite sophisticated of us to sit and talk like this, objectively, as if we were just old friends. David did too, because he pointed out that now he had all this and Sweetwater too. So we just laughed and talked, and afterward went for a walk along the main street, which was called Connecticut Avenue except that it had gaslights and elm trees; and when he said good night at the door of my apartment I knew that David had been right and young people should take whatever happiness came to them.

So he went away.

And I stood there behind the door, listening to him go. And life just drained out of me. I had to lean against the wall to stand up. The room was dark, the night was full of cold winds, and I was alone. I was more alone than I had ever been before in my life.

I stumbled into the bedroom and lay down on the bed fully clothed and stared up into the darkness. The bedroom was empty, too. Annie and Grace were asleep there, but for me the room was empty. The world was empty. Paris was empty; London was empty; Amsterdam was empty; and the Café de la Paix was bare and shuttered and silent. . . .

Next morning I had dark circles under my eyes. Grace pretended not to notice, but Annie looked at me shrewdly.

"You're still going to Europe, aren't you?" she asked, with a sharp glance at Grace.

"Yes, I am!" I screamed at her. "And keep quiet! I don't want to hear another word about it! I'm going to Europe—I'm sailing Friday—and that's the end of it! I've given my promise! And if that man comes around again—" I sank down on the bed and started to cry.

"If that man comes around again?" prompted Grace.

"L-l-let him in," I sobbed.

That afternoon I saw Mrs. Ammerman again, and she looked so pitiful and small and so much like my mother that I knew I could never, never go back on my promise. So when David came that evening, I stood up quite straight and looked him in the eye and said:

"I'm not coming out with you, David. I'm not going to do it again."

"That's all right," he said comfortably. "I just came to read the newspaper." And sitting down on the couch and taking off his shoes and loosening his necktie, propping his feet on the coffee table, opened the evening paper. "Do you sew?" he asked me.

I just stood there.

"Yes," said Grace. "She does."

"You might fix this coat, then," he said, taking it off. "There's a button gone."

"David, get out," I said.

"I'm stubborn," he said. "Some people I can't be reasoned with. I also enjoy an extra cup of coffee after supper. Maybe I might start the percolator."

"I don't use a percolator," I said. "I use powdered coffee."

He took out a small pad and made a note. "My 'Necessity for Adjustment' pad," he stated. "Very well then, powdered coffee."

SO HE stayed there all evening, and I were quite alone because made Annie go into the bedroom her and play cribbage. I sewed the on David's coat and fixed a tear lining, and we shared a little of the meat from the icebox; but then I out my paint box and fixed it for ing, because I was trembling all he looked so comfortable and hor sitting there on the couch with his off, and I was afraid that I was go break down again.

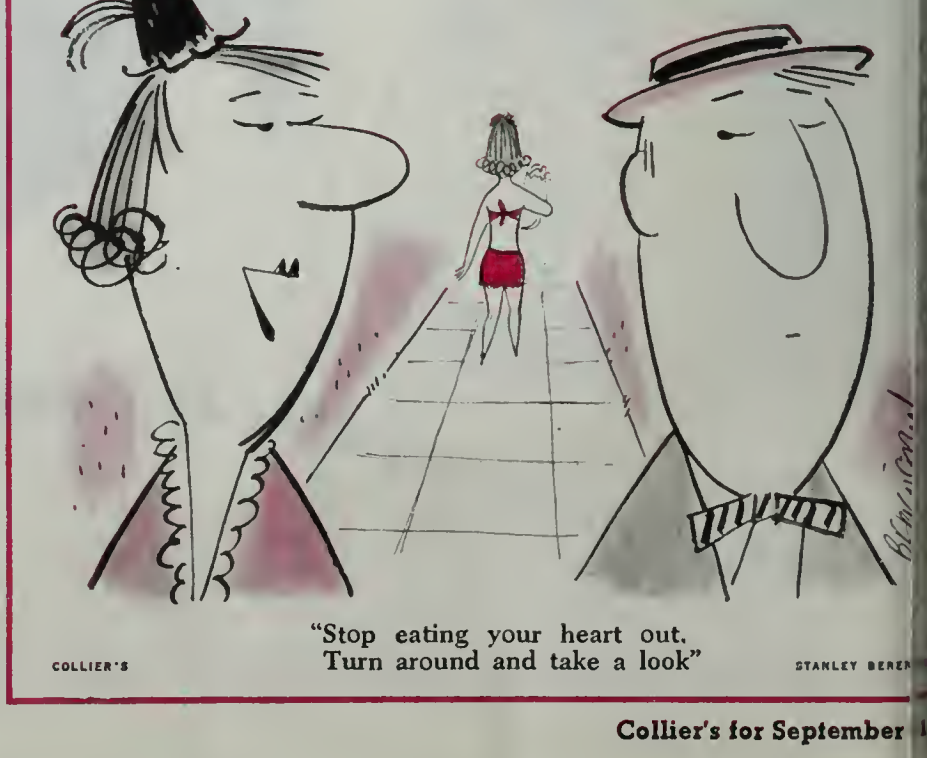
David finished the paper and ask if I played chess.

"No," I said. "Checkers."

He made a note. "Let's play ch then," he said calmly.

At eleven o'clock he rose to h announced that he was going t and started pounding the pillow shape on the couch. I fled to th room.

"He's going to sleep here!" I pered, wringing my hands.



"Goody," said Grace. "I'll loa my pink nightgown."

"You'll do nothing of the sort! claimed. "He's getting out. He's out this minute! I won't have it! ply won't have it! He's doing it d ately!" I crumpled up on the bed. *him to get out!*" I yelled. *"Out! Ou*

Next morning I had to get up a breakfast for him, because Gra dently had had a little talk with and now they both refused to bu went into the living room.

David was rubbing his head. Ann," he said drowsily. He was w my red polka-dot pajamas, which ridiculous on him because they w small. "I hope you didn't put make-up. Or brush your hair."

"It should be perfectly obvious that I didn't," I said furiously. it was your little scheme to find ou I was like when I wasn't trying to b

"Sorry, dear lady, but I neither write nor paint. You apparently have me confused with everybody else" GARDNER REA

s is it. And if you think it's going matters then you're mistaken. this is Thursday and I'm leaving ope tomorrow."

I'm leaving for work in an he said cheerfully. "You might note that I'm reasonably good- d in the morning. And now if ust step into that kitchen and p some scrambled eggs and ba- fruit juice and toast and jam and I'll give you back your pajamas." can get your breakfast at the drugstore," I told him flatly.

f hour later, when he had finished mbled eggs and bacon and fruit nd toast and jam and coffee, he at the door and, as I handed him kissed me. He took me by sur- f course.

you tonight," he grinned, and ne.

apsed.

T day I finished packing as if in a am. I walked to the paint store for bes of paint, and all I could think was ocher and burnt umber. I k at heart, because now I didn't go to Europe at all; I wanted to me and buy a percolator and ure that David never again went the proper buttons. I stopped in dhand bookstore and looked at a ook, How To Play Chess—and rned it face down on the counter lked out of the store in tears. I think about London and Paris Café de la Paix and the Champs , but all I could see was the deep f the elm trees in Sweetwater.

David returned to the apartment ening, carrying groceries under s, I ran to him before I thought. stopped short, but the next thing I was in his arms, and Grace, re- him of the groceries, went hur- nto the kitchen. She returned a inutes later, took another look nt back into the kitchen again.

k around, Ann," he said at last, y. "Stick around and give me a Sweetwater isn't so bad—"

ked up at him and for some rea- was quite blurred.

." I said brokenly. "With the es on the village square and the hite houses—"

eatures clouded a little. "It really ke that, Ann. But—"

, it is," I said, sitting down and clasping my hands in my lap. "That's the way it is. That's the way it is, and that's the way it'll go on being—when I'm walking on the Strand in London and on the Champs Élysées in Paris and on all the crazy, crooked streets of Amsterdam and Brussels and Copenhagen and Stockholm. There are elm trees on the main street of Sweetwater, Missouri, in the United States of America—elm trees and hitching posts and a barbershop with the names on the mugs—and little white houses with picket fences—"

I was crying.

"You really want to go, then," he said gently.

"No!" I cried. "No! But I've promised."

Grace beckoned to him from the kitchen, at the moment, so I was left alone; and after a while I straightened myself out, because it was the only thing to do. Annie came out and patted me a few times while I was drying my eyes—and then she stiffened. I looked around, and there were Grace and David putting on their coats and going to the front door together.

"You might at least wait until the body is cool," said Annie indignantly.

"Now look here—" Grace began.

"Ann—" said David. "I—"

"Please," I said wearily. "It's all right. I understand. I haven't any right—" And I sank down and began to cry again.

Annie gave me a sedative that night and I slept so deeply that by the time I awoke, Grace had gone to work. I knew she hated goodbys, and anyway I wasn't sure I could be nice to her, so it was just as well. There was something different about the apartment—a hurricane seemed to have struck it during the night; but I was too heartsick to care. Annie had stayed home from work to help me get my things into the taxicab. She was rather matter-of-fact about the whole business, and though I desperately wanted her to tell me that I was being a fool and that a promise to anybody wasn't half so important as a marriage, she made no comment at all. She just pecked me on the cheek, as though I were going around the corner, and said, "I'll see you, dearie." So I had to tell myself that there was a bigger thing in life than Love, and that was Honor; and I waved to Annie and put my shoulders back and clenched my teeth and drove off to Europe like Marie Antoinette on her way to the guillotine. . . .

Half an hour later I was back in the apartment. "Annie! Annie!" I screamed.

"All right," she said cheerfully from the kitchen. "Tell me all about it."

"Grace took my job! She—David—last night—they told Mrs. Ammerman—"

"Fancy," said Annie calmly, wiping a dish.

"And she can shop in New York—and—" I came to a stop and stared at Annie. "You *knew?*"

"She's been packing since midnight," said Annie dryly, glancing around at the apartment. "I just hope she doesn't come back with any samples, that's all—though I expect it'll be something with a title. What's David's telephone number?"

"Don't you dare!" I shouted. "He's the most unmitigated, presumptuous—"

"It's an extraordinary coincidence," said Annie cheerfully, opening the front door. "But here he is now."

I stared. David stepped forward.

"David, you keep away!" I shouted, stepping back. "It isn't going to do you a bit of good. Not a bit! I have my pride, David. You keep away, now!" I was stumbling backward. "Don't come any closer! I mean it now—don't come any clos—"

FIVE days later we were married. Grace sent us a radiogram from mid-ocean. She had, she said, met a wonderful man from Perth Amboy who was in the wholesale olive-oil business.

Annie cried. She said it was because she had to hurry up, now, and find a man with a million dollars.

For our wedding present David gave me two tickets to Sweetwater, Missouri.

On the train he and I talked for hours and hours, with a breathless excitement of mutuality as we discovered more and more things we shared in common. I was happier than I had ever thought possible, ever—ever.

But it was odd—there was one little shadow over David all during the journey. I couldn't tell what it was—a preoccupation on his part, a doubt, as though he had one big secret he wanted to tell me and couldn't find the courage. Twice—once over coffee in the dining car and again when we were buying magazines at a little country station—he opened his mouth to say something and then closed it again, as if his resolution had failed him. It worried me a little. But I didn't press him, because I knew he would find his own good time to tell me.

Then when we changed to a local train out of Kansas City to Sweetwater, the cloud settled over him so heavily that he was glum and silent.

"What is it, David?" I asked him as gently as I could.

"You'll see soon enough," he said gloomily.

As we were driving out of the station at Sweetwater, David made the taxi stop on the main street. Very gently he put me on the curb and circled his arm around my waist and said, "Look."

The main street of Sweetwater in the midmorning was busy with traffic. There was a business center; and shops and garages and a five-and-dime and a few scraggly trees, half dead with the fumes of exhausts. The road was paved and the sidewalks were of concrete and the street lamps were steel and electric. And I knew at once what it was that had been bothering David, and I turned and looked up at him with a little song of love and happiness in my heart, and the tears must have filled my eyes, because I could hardly see him—but I smiled and smiled and put my head on his chest, right there on the main street of Sweetwater, Missouri, in the United States of America, and—

"Darling," I said with all my heart and soul. "Aren't the elm trees *beautiful*—"

THE WIN TO GO HOME

Continued from page 21

asked. "I'll work in my dad's place."

"What kind of a place?"

"A bar and restaurant," Johnny said. "It's real nice, Eddie. It's called Kid Bart's. Everybody around there knew my dad. He opened it with the money he made fighting."

Eddie could tell that he meant it. He had finished with the left hand, the tape and all. He watched the fighter slide off the table, his robe dragging.

"Try those," he told him.

He watched the fighter flex his hands and then feel the one with the other.

"Please, Eddie," Johnny said. "Don't worry."

"I'm not worrying."

"It's like I told Mr. Burton," Johnny went on. "When he told me this morning I said: 'Mr. Burton, this is the fight I wanted. This is all I want. Believe me, Mr. Burton, I want to go home but I need this. If I win this you won't have any trouble with me and I promise I'll go home.' I have to win, Eddie."

"You got a chance. If you didn't Mr. Burton wouldn't put you in there."

"I just mean I guess this guy is a real good boxer."

"And can hit," Eddie said. "Not a bad hitter."

"I know," Johnny agreed. "I mean I don't care now. I mean if you and Mr. Burton think I've got a chance I think I've got one, too."

Eddie picked up the light bag and he gave it to the fighter. He picked up the gloves and the headgear and the pail.

"Well," he said, "do we go?"

THE night of the fight Frank brought the kid to the Garden and they were waiting there when Eddie came in. The side dressing rooms are big enough to dress a hockey squad and they were sitting side by side on one of the benches running along the long wall. There were a half-dozen other fighters in the room, this half of the preliminary card, and some sat alone and some were sitting with the guys who would work their corners.

"Eddie," Frank said, "we were waiting for you."

When Eddie walked up to the fighter he hit him, once easy, on the side of the head with the palm of his hand. He saw the fighter smile.

"How you feel?"

"Good," Johnny answered.

"He was telling me," Frank said, "how he's going to fight this guy. He told me what you showed him."

"That's right," Eddie told Frank.

He motioned with his hands. The fighter stood up and faced Eddie, his hands half up.

"Now like this," Eddie said and he moved in on the fighter. Moving in, his hands up and his head down, he put his head against the fighter's left shoulder and, spreading his legs, his hands moving lightly into and away from the fighter's body, he moved the fighter back with his head.

"You remember?" he told the fighter, straightening up. "Always inside. Give him no room. Keep hitting and keep your arms free and back him off with your head. Don't let him back you off. Back him off and, when he backs off, hit quick and move in again.

"So if you're getting tied up," he went on, "or if he hurts you, you do like I said. You don't back off. You remember that. Pull away and you're gone because this is a guy will take your head off outside. So you grab and when you grab you put your weight on. Then when you turn him—"

He reached out with his right hand and he took the fighter by his left elbow and he turned him so the fighter was turning away from Eddie and to his own right.

"—you turn him clockwise, like a clock, so he can't reach you with his right. Understand?"

The fighter nodded his head.

"And always, when you can, you keep hitting."

"I know," the fighter said, and Eddie could see that he felt better.

"So you might as well warm up a little," Eddie told him.

They watched, Frank and Eddie sitting on the bench, while the fighter moved around. They watched his awkward shuffling, moving around with two of the other fighters, wide-legged, throwing short punches, serious and moving around the room.

"All right," Eddie said, finally, raising his voice so the kid, moving around, could hear. The kid, hearing him, dropped his hands and walked toward them.

"You better go in now," Eddie told him.

"No," the kid objected, grinning. "It's all right. I'm not nervous."

"Go anyway," Eddie said.

They watched the kid go.

When the fighter came back Eddie got out a towel and wiped the fighter's face and his arms and his chest and back. Then he picked the robe up off the bench and held it up and the fighter got into it. Then he told the fighter just to walk around. While the fighter was walking Eddie could hear the crowd start hollering outside. He could see one of the commission deputies looking in the door.

"One more round," the guy said.

The fighter came over and sat down. Eddie put the gloves on, the left hand and then the right. Frank did not say anything, sitting there and watching, and Eddie's brother was standing by the door with the pail and Eddie worked easily, not making it seem that he was working fast.

"All right," the commission guy in the door said and he was looking at a piece of paper in his hand. "Semifinal. Is this Bartlett?"

"That's right," Eddie said.

The fighter stood up, looking at his gloves and banging them together. They walked out, the fighter first and Eddie behind him with Frank and then Eddie's brother. When they got to the top of the aisle Eddie held the fighter up and Frank put his hand on the fighter's shoulder and the fighter turned.

"Johnny," Frank said, taking the fighter's glove in both hands. "Good luck. Just do what Eddie tells you."

"I'll do it," Johnny said. "You have to worry, Mr. Burton."

"I don't have to worry?" Frank and he turned to Eddie. "He t I don't have to worry."

Eddie held the fighter there for ute. Then he saw the other guy into the ring. An Irishman with r a green bathrobe and a reputatio finisher. Eddie started his fighter the aisle.

"Just easy," Eddie said. "Ju now."

THE fighter was standing up, him, pulling on the ropes corner. "Just on top of him," Edd "Just in close all the time."

"I know," the fighter said, lool Eddie. "You don't have to worry."

Eddie heard the bell and saw turn and go out and, climbing do turned and looked just in time. the kid start to put out a left and Malone, straight up, throw that o No wasted time. A real good

As it was, it caught the kid high crowd sensed it now, right at th The right turned the kid halfwa where another right would hav him, the left turned him back grabbed Malone. Seeing him ta clean shots like that Eddie felt pity for the kid and he felt it now, ing the kid hang on.

Hanging on, the kid tried t Malone, but Malone pulled his le and hooked the kid short. The still in close, though, and he hit M couple of loose ones in the bo then Malone stepped back half a s the kid was on top of him and brought a left over that hit Mal the ear. Malone backed off.

Now they were in the center ring, the kid wide-footed, wide weaving, and Malone, in nice an circling, putting that left in and that one-two. This time it was lower and this time Eddie could kid's legs go. He felt very sorry kid. He could see the kid shake h grabbing for Malone and Malon to find room and then, out of a g saw the kid's left come over an Malone on the cheekbone.

He could hear the crowd roa ferent roar, with almost a laug could see Malone blink and stop, could see the red mark where th had hit the light skin. What know? he thought, but then Malone move in and bang one body. He saw him put the sam to the head. He saw the kid m

grab and Malone pulling his head back, disgusted, trying to push the kid off. He heard the bell sound.

"All right," he told him, when he had the kid back in the corner. "You're doing all right."

"He can hit. He hits hard."

"So you don't give him room," Eddie said. "You crowd him a little more and you back him off."

"I know," the kid answered.

When the round started Eddie saw Malone was up straight, confident again. Nice footwork. In and out. Now circling. The left going out and never missing. The kid taking it. Malone waiting, holding the right this time for a better opening. The crowd beginning to get on him, waiting with a bum like this, and then he let it go.

The kid had seen it, and when it hit him he was falling in. It turned him but when he turned he grabbed Malone's left arm and when he stumbled he pulled on the arm and when he tripped, Malone tripped, too, and the two of them went down.

Now the crowd laughed. Malone and the kid got up quickly and the referee was wiping off the kid's gloves and then Malone's. Eddie could see Malone was mad, being loused up by a bum like this, but the kid was coming right to him. Swinging now. A lot of them on Malone's arms. One high on the head, but trying hard and Malone, backing off, pulling his head away. Then the kid throwing a good right to the body and then putting his weight on, putting his head in and forcing Malone back. Then taking Malone's hook and still moving. Hitting back and this time the crowd roaring again. A hook to Malone's head and Malone blinking and a right high on Malone and Malone missing.

It's a funny thing, Eddie thought, watching. If the kid could fight at all Malone would have him out of there by now. A conventional fighter Malone would murder. This kid he can't figure. They didn't tell him about this kind. A manufactured fighter, all right. Can't get rid of a guy hitting him off balance, a guy hitting him with legs crossed, but a guy hitting all the time.

"Good," he said when the kid came back. "I think you got that round."

"I think so," the kid agreed. "He's not hurting now."

"So go to work," Eddie told him. "Go a full round. The other guy can't. On top of him and punch a whole round this time. Maybe you can end it."

WHEN they came out again Malone walked out and threw the right. Stop fooling around, Pinky must have said. No lead, just the right. That should have been it, Eddie thought, but the kid was coming in too fast and fell inside of it and now he was working good—or good for him. Inside, pressing, throwing at the body, getting some through. Not even feeling the punching he's taking himself, Eddie thought. Coming over with a hook to the head, and now the crowd roaring.

The hook had caught Malone trying to get away from the kid's lead. A right, overhand, hit Malone and now it looked like he might go. Now the crowd was hollering and the kid was excited, too excited, tearing in and overanxious. Missing the right that might have done it but throwing a left to bring himself back. Malone backing up, missing a punch, unable to throw another. The kid punching, not even hearing the bell and Eddie could see, when the referee jumped in and Malone turned, that his legs were gone, stumbling, trying to straighten up as he walked, trying to breathe, to his corner.

"Eddie," the kid was saying. "Eddie."

"You got him," Eddie said. He was afraid the kid might start crying.

"The same thing," he told him. "Go right to him. Go like it's the last minute. Hit him from anywhere. On top of him. Keep your arms moving. Don't let him grab."

He was still talking, a little excited himself, when the buzzer sounded and the kid jumped up. Eddie pulled him down.

"Easy," he said. "Not too fast."

He let the kid stand up, then. He picked up the stool and turned and looked at the other corner. He won't make it, he said to himself. He could see Pinky standing there, one arm on the rope, mad and looking at Malone. He could see the other second holding Malone's trunks out and Malone trying to get his air.

He heard the bell ring and he saw Pinky wave his arm out flat. He had to grab the kid by the shoulder as the kid started across. He saw the referee walk to Malone's corner.

"Easy," he said, pulling the kid back.

"Eddie," the kid said. "I stopped him."

"Easy," Eddie told him. "There are people here."

"Oh," the kid said, and Eddie wished he hadn't said it.

EDDIE put the stool under the kid. His brother put the robe over the kid's shoulder. Easy, as if it were part of a ritual, Eddie pushed the kid down. He could hear the announcer. Malone unable to answer the bell for the fourth round. The winner by a knockout, Johnny Bartlett. He heard the crowd roaring and he saw the kid jump up and turn to the crowd. Get all of it, he said to himself, because it has to go a long way.

"Go over," he said. "Don't hurry."

He watched the kid go over and bend over and shake hands with Malone.

When they walked down the aisle the crowd shouted to the kid. They called him by his first name. The fighter was grinning and turning and waving his hand, and in the hallway Frank was standing there and he came up and shook the kid's hand. The kid never even saw one of the guys in the main event push by.

"Fine," Eddie heard Frank saying. "Johnny, you did fine."

"Thanks, Mr. Burton," Johnny said. "You had to believe in me, though. You had to give me my chance." He turned, then, and looked at Eddie. "And you, too, Eddie," he said. "I mean, thanks."

"That's all right," Eddie said. "How do you like being a bartender?"

"I like it," Johnny laughed. "I like it."

"A bartender?" Frank asked. "What about a bartender?"

"Nothing," Eddie said. "Nothing." He put his hand on the fighter's shoulder. "You go with my brother. I'll be in."

Standing there Frank and Eddie watched Eddie's brother and the fighter go down the hall. The fighter was talking to Eddie's brother as they walked, and moving his hands as he talked.

"Eddie," Frank said, "you'll never know what a load this is off me. I was walking up and down here, and I was laughing out loud. When it happened I couldn't help myself, and I guess people thought I was crazy. So what do you think now?"

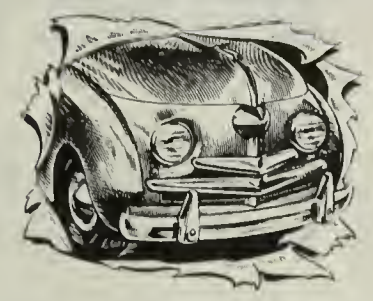
"What do you mean?"

"Chick wants to put this back in again in two weeks," Frank told him. "Could he lick this guy again?"

"No," Eddie said, looking at Frank. "Not if he fights him a hundred times, and the next time out Pinky will figure him and Malone will murder him. I guess you know that."

"It's fifteen hundred."

"He's your fighter," Eddie said. "Fifteen hundred is fifteen hundred."

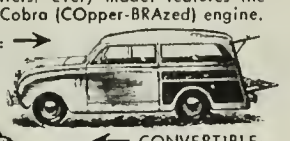


"So I can't make up my mind."

"It's your mind," Eddie said, and he started to turn.

"I can't make up my mind," Frank said. "Do I send him home tomorrow afternoon by train—or tomorrow night by plane?"

THE END



NOW CROSLEY HAS THE NEW LOOK

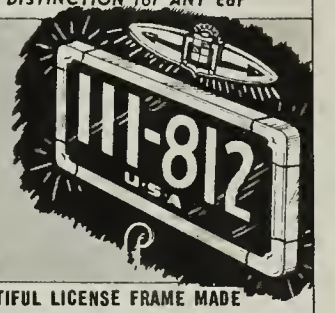
See the stand-out styling of the Crosley Station Wagon. All steel. Seats 4, or 2 with ¼-ton load. Priced $600 to $700 lower than any other station wagon, costs about ½ as much to operate. Also available as a panel delivery truck without rear side windows.

And all five Crosleys have the new look, massive radiator louvers and a gleaming spinner adapted from aircraft propellers. Every model features the startling 4-Cylinder Cobra (COpper-BRAzed) engine.

STATION WAGON: Goes everywhere smartly.

CONVERTIBLE: If you love sun and air.

SEDAN: Over 20,000 now on the road.



PICK-UP: Cuts service and delivery costs.

QUICK RELIEF FOR SUMMER TEETHING

EXPERIENCED Mothers know that summer teething must not be trifled with—that summer upsets due to teething may seriously interfere with Baby's progress.

Relieve your Baby's teething pains this summer by rubbing on Dr. Hand's Teething Lotion—the actual prescription of a famous Baby Specialist. It is effective and economical, and has been used and recommended by millions of Mothers. Your druggist has it.

DR. HAND'S TEETHING LOTION
Just rub it on the gums

Collier's believes...

...LABOR'S DOING BETTER THAN WELL

LABOR DAY, 1948, should be an occasion for considerable rejoicing, we'd say, by all but a handful of American workers. The handful who have less cause to rejoice are the labor leaders whose powers over their followers have been rather radically clipped by the Taft-Hartley Act.

For the rank and file of U.S. labor, it's bound to be a big day. Wages generally are high in this country, and may be going still higher. That is one reason for the current inflation, true; but it is by no means the only reason. Practically everybody who wants to work can get a job; we've passed the old 60,000,000-job goal by more than 1,000,000, and we still have a labor shortage.

Unions continue strong and influential—largely, we believe, because of the above-mentioned Taft-Hartley Act. For all the shrieks of various labor moguls about the "slave labor law," the fact is that this measure was designed chiefly to help organized labor accept the responsibilities commensurate with its present power.

Another big wave of strikes appears unlikely any time soon—for which we think labor as well as everybody else can well be thankful. We believe it is as true as ever that nobody really wins a strike, and that there are at least a half-dozen better ways to settle almost any labor dispute.

American workers can afford to give thanks, too, on this 1948 Labor Day, that Communist influence in most unions which have come under this particular blight is on the wane. Here we have special reason for rejoicing, inasmuch as the Communists' ambition, simply stated, is to acquire and maintain absolute slave-driver power over the workers of the United States.

Well, a happy Labor Day to you; and may all future Labor Days find U.S. labor, organized and unorganized, as well off as it is in 1948. Or better off.

. . . NOBODY'S PERSECUTING OUR REDS: When the Department of Justice finally procured indictments against 12 top U.S. Communists, the Reds and their stooges set up a series of frightful squawks about how they were being persecuted. Their constitutional rights, to hear them tell it, are being torn from them; Tom Clark, Attorney General, has started a "witch hunt"; Fascism will be upon us unless these persecutions are called off; and all this and that.

Of course, we feel that Clark opened up with his big guns at a bad time psychologically. Many Americans are bound to feel that the anti-Communist crusade was started partly because a Presidential campaign is on and the Administration wants to make some political hay at the expense of William Z. Foster and the other indicted Reds.

Nevertheless, we believe these prosecutions are necessary, and hope that this fight against Stalin's U.S. fifth column will be carried remorselessly through the last appellate court.

The word for the Reds' yells of persecution is "baloney." Nobody is persecuting these persons.

The federal grand jury which handed up the indictments after more than a year's investigating was convinced that there was evidence going to show these 12 men guilty of having taught the violent overthrow of the U.S. government—a violation of the Smith Act, which prohibits such teaching under maximum penalties of $10,000 and 10 years.

These defendants will suffer such penalties only if and after they are convicted in open jury trials, and have had such convictions carefully reviewed in higher courts. There is no more persecution in that than there is in the trial of some fellow accused of murder or arson or robbery.

Things wouldn't be handled in this fashion, either, if the Reds should get control of the United States. They will just kill or enslave everybody who disagrees with them out loud—without tr or after public "confessions" induced by nonpu torture. That is the way the opposition is ta care of in the Iron Curtain countries, and standard Communist procedure.

So let's pay no heed to the Reds' squawks al persecution; and let's have those trials as soo feasible.

. . . OUR DOCTORS CAN TAKE ANOTHER BOW: U.S. medical profession leads those of all othe tions, so far as we know; and we believe Amer doctors are entitled to take their latest bow on strength of the recent report of the Federal Sec Agency concerning life expectancies in this cou

Compiling various statistics, the FSA cam with the finding that white female babies bor the United States these days have average life pectancies of 70.3 years: the highest yet. For w males at birth, the prospects aren't quite so go 65.1.

Nonwhites are still further down on this sc 61 for females and 57.5 for males—but the fig indicate that this discrepancy is narrowing with sonable speed.

What the findings show chiefly is that in the 50 years the American medical profession has some terrific blows to the infectious diseases w used to kill a high percentage of babies and s children. Offhand, we can't think of a finer ach ment than that.

And now that we're becoming so long-live the average, and are defeating so many phy ailments, wouldn't it be swell if someone c work out a way to cut down drastically the age percentages of envy, hatred, malice and cussedness which afflict the human race?

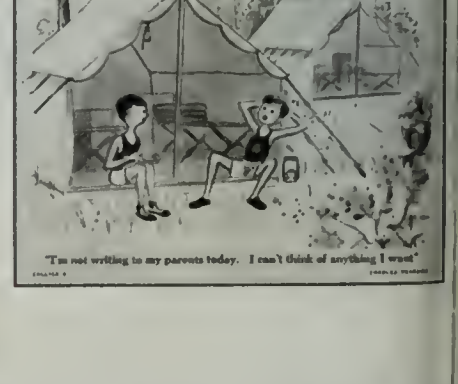
THE WEEK'S MAIL

THE UN IN UNITY

DEAR SIRS: This letter is written by an average American who one day forgot to duck while taking a pillbox in Germany, who remembers his pals, many of whom will never come back, and most of all, looks upon his country torn apart by disunity, greed and selfishness. Our American system with all its faults is the greatest system in the world today. Our Bill of Rights is the answer of all mankind.

We must have unity in America. A nation's strength should not be determined by its gold or size of its army, but by the way a nation takes care of its own, the old, the sick, the poor and its children. Let's pass housing bills no matter the cost, double old-age pensions; all who have the ability should go to college. Free medical attention for the poor. Bills passed giving millions in research for the cure and causes of diseases. These things will make America stronger, and their results would pierce the iron walls of Russia. Today Americans killed in action are returning home. Their bodies should be placed in parks of the towns and cities which were their homes. We then can always pay homage to our brave. Their being close to us should remind us that only in unity can we be free.



JUST AN EX-G.I. JOE
(Name withheld by request)

BOY'S LIFE

GENTLEMEN: In the July 24th issue you had a cartoon by Charles Pearson. The same day I received a letter from my son photostatic copy of which is enclosed

"Dear Mom & Pop: I'm probly being a pest to you. Because every time I write a letter I want something. But I would like a flashlight. I'm sorry I din't tell you before whan you wrote a letter & asked me. And would you PLEASE send some batteries too. You have been a great help to me Thanks Trilyons. It doesn't matter how

"B-B-But they won't let my Daddy drive anymore..."

t's a long walk from home, Bobby—when you're ised to riding. Guess you'll just have to start arlier, because your Dad had to surrender his icense plates yesterday. It was either that—or ost $11,000 in cash or security for his recent utomobile accident.

Most states now have financial responsibility ws which make nearly all motorists subject to uch drastic penalties in case of accident. Under hese laws you could lose your driver's license, our automobile registration, or be required to ut up cash or security in sums as high as $11,000. urthermore, you could lose this amount—or ore—as the result of a court judgment.

Insurance protection is your most practical solution!

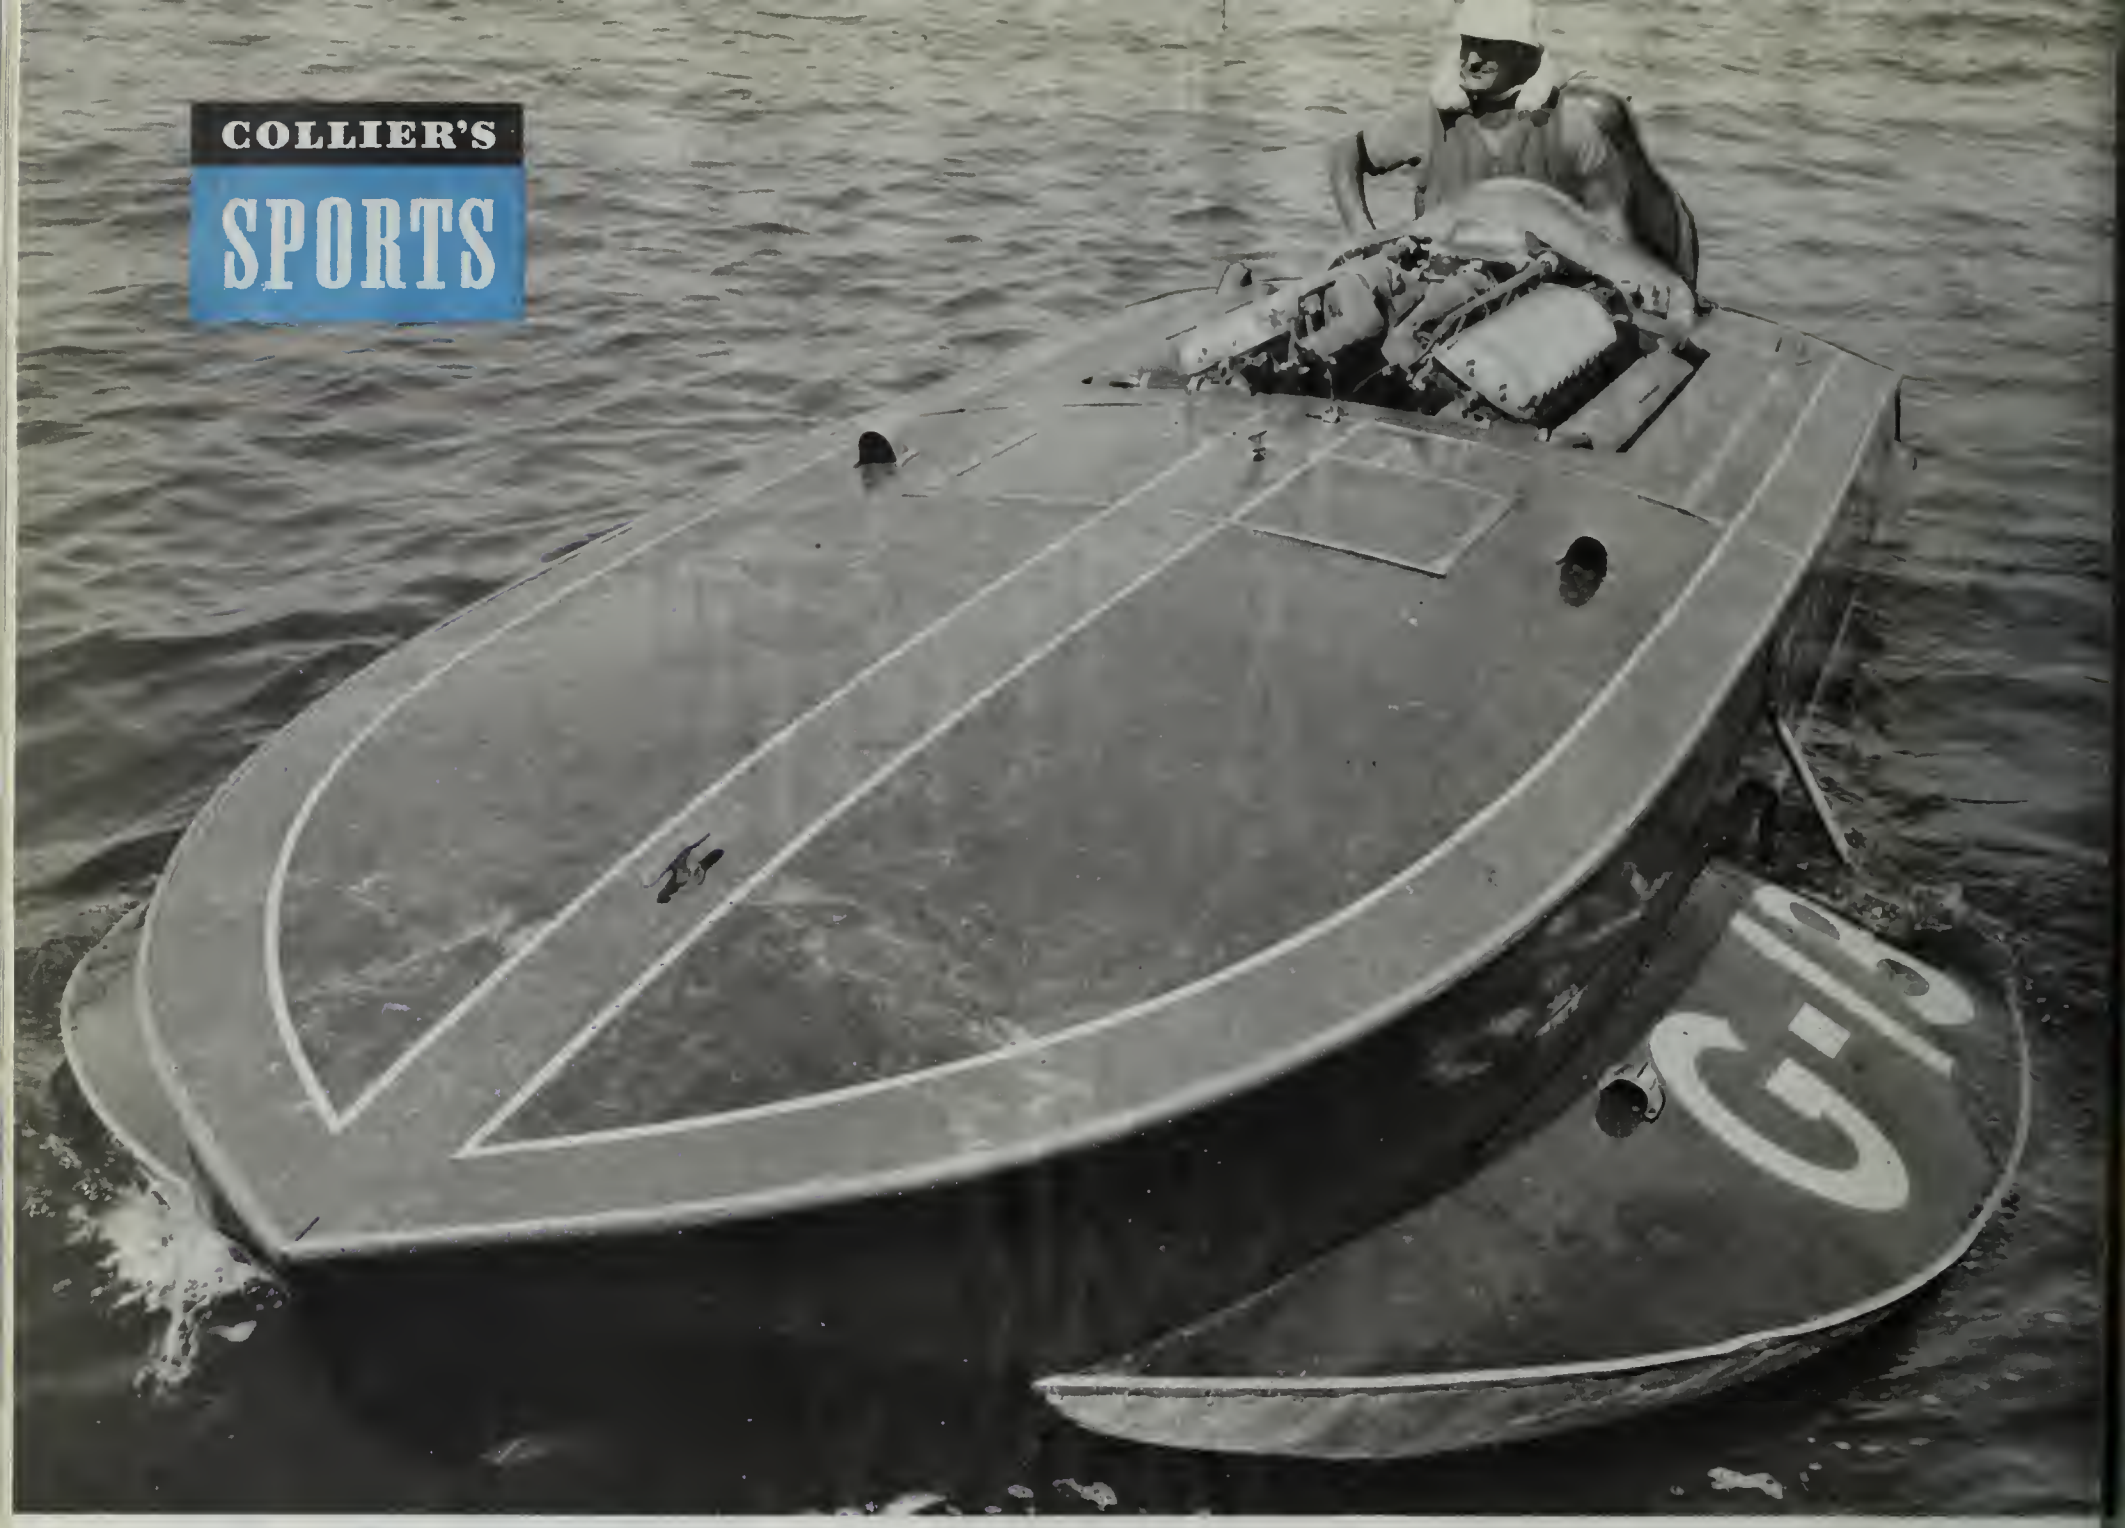
hese laws are complicated . . . vary from state to state . . . change from year to year. The average driver can't hope to be familiar with all of them. But—all these states will accept adequate automobile insurance as proof that you are financially responsible.

In *every* state you can, of course, be sued for damages, which might mean the loss of your home, your property, your savings. The most practical and economical way to comply with requirements of the law and protect yourself against shattering losses is to carry the right insurance.

Why it pays to insure with State Farm

1. *State Farm Mutual's rates are low*—because State Farm policyholders are "preferred risks" —people we *know* drive carefully.
2. *For your extra security,* State Farm gives *twice* as much public liability protection, *five times* as much property damage protection as is required by any state financial responsibility law.
3. *Sound management, financial stability* assure prompt payment of legitimate claims.
4. *State Farm Mutual is big*—the largest automobile insurance company in the world.
5. *7,500 representatives* at your service, coast to coast, in the U. S. and Canada.

Get the details from your State Farm representative today. If you are a responsible driver, you can qualify for membership in State Farm Mutual.



The states are cracking down!

The 40 states and the District of Columbia (shaded on map) have financial responsibility laws requiring you, under certain circumstances, to prove you can pay for injury to people or damage to property you do with your car. A similar law already has been passed by Pennsylvania but is not yet in effect.

Band leader Guy Lombardo tunes up the big 1,350-hp engine of Tempo VI, which holds the world's single-engine speedboat mark RALPH FO

RECORD BY LOMBARDO

BY BILL FAY

IT HAS been said that Guy Lombardo, who allegedly plays the sweetest music this side of heaven, took up speedboat racing—a thunderous avocation—to escape the wail of his saccharine saxophones. Lombardo denies it.

"My dad owned an outboard in Canada," Guy insists. "That was long before we organized the band. I started racing big boats when we played the Cleveland Yacht Club 20 years ago. Got the bug then."

Lombardo holds the world record for single-engine boats—118.2 miles per hour—but something always happens when the maestro tries to exceed 124.9—the unlimited mark Gar Wood established on four motors. Guy's frustration of last June 27th is typical.

At three o'clock in the morning, Guy hopped off the bandstand at Virginia Beach. He taxied to the airport and flew to Middle River, Maryland.

At seven o'clock he warmed up Tempo VI. At eight o'clock, mist settled over the river. At nine o'clock, Guy told mechanic Tony Orth, "Better call it off. We can't play this record by ear."

At one o'clock the mist lifted. Lombardo captured the Glenn L. Martin hydroplane free-for-all. At four o'clock, Lombardo was back with the band—playing a reception for the governor of Virginia.

Guy's racing record was a model of consistency for more than a decade. From 1935 to 1946, he didn't win anything. He tinkered with all kinds of boats—even installed experimental exhaust stacks that resembled saxophones—but couldn't develop winning speed. Some people were unkind enough to compare his driving with brother Carmen's singing.

But not Joe Taggart, the Ohio ice-cream dealer, who owned the 225-class record holder, Tommyann III. Joe claimed there was nothing wrong with Lombardo's driving that a championship boat couldn't cure. At the 1946 Turkey Lake, Ohio, races, Joe suggested, "Let's switch today, Guy. You race Tommyann." Guy did—and won.

Vastly encouraged, Guy deserted the 70-mile-an-hour 225s, bought Zalmon Simmons' hydroplane, My Sin, rechristened it Tempo VI, and won the Gold Cup. Since then he's been battling Danny Foster, the reformed P-38 pilot, for the top spot in power-boat racing, and the sweetest music this side of heaven has been the roar of the 1,350 horses in the hull of Tempo VI.

COLLIER'S ALL-AMERICA

After Notre Dame overpowered Army last November, Coach Frank Leahy held a press conference, and somebody asked, "Wasn't George Connor terrific? Did you ever see anybody play a better game at tackle?"

"Well," Leahy answered, "I'm confident George played a splendid game, but I won't be able to answer that question until Monday morning when I look over the game movies."

"You mean," the reporter persisted, "you couldn't watch Connor from the bench?"

Leahy shook his head. "That's the worst seat in the stadium. On the field you get a worm's-eye view—a tangle of arms and legs. We have a spotter who phones down information from the press box, and I question the players as they come off the field, but when it comes to analyzing mistakes and commenting on individual performances—well, I can't do that until I play the films over a few times."

Leahy spends at least one hour every day at the movies. "Our players also review their work by watching themselves on the screen," Frank says. "It saves the coaches a lot of work because the players are their own severest critics. After all, you can't argue with a camera. It's the only impersonal, infallible observer in the stadium."

Now let's talk about football fans and All-America teams. Collier's originated the All-America in 1[illegible] when Caspar Whitney picked the first one for this magazine. Whitney was succeeded by Walter Camp, and Camp by Grantland Rice.

At first, the selection of the All-America was comparatively simple because football was an eastern seaboard sport. Each year the task became more difficult as good teams and good players multiplied. Now the

KEEP UP WITH THE WORLD

BY FRELING FOSTER

Probably no monarch ever lived in greater fear of assassination than Abdul Hamid II, Sultan of Turkey from 1876 to 1909, when he was deposed and exiled. His Yildiz Palace in Constantinople was heavily guarded and he held no interviews with outsiders except from behind a fine screen on a balcony so he could not be seen. His private rooms contained alarm systems, concealed revolvers, trap doors and mirrors set at angles as well as life-sized models of himself, standing at windows, sitting in chairs and reclining on lounges, which he hoped would receive any knives or bullets intended for him.

One of the cleverest spies in the first World War was a German who had a unique system of transmitting information to Berlin from his hotel room in Stockholm. Being instructed to watch the man, Allied counter-espionage agents took an adjoining room, shadowed him day and night, tapped his telephone and read his mail for weeks without finding any evidence. Finally, they discovered he was sending messages to a confederate in the other adjoining room by singing loudly in his bath every morning such seemingly innocent gibberish as "do-do day-did do-do dum-dee," which meant Ajax in the message, "Ajax sails five Monday."

A jockey has many ways of favoring his horse in a race. For example, he rides over the animal's forelegs, or just above its center of gravity, where he interferes least with its movements and equilibrium; and frequently has his right stirrup two or three inches shorter than the left so his body easily follows that of the horse on the turns. Another way is to make up additional weight assigned his mount by using a heavier saddle instead of adding dead weight (lead sheets) to a light saddle, which is pound for pound the greater handicap.

The use of the Lohengrin Wedding March, also known as Here Comes the Bride, is frowned upon in church nuptials by millions of Christians. They consider it sensuous as well as secular because it is not the music in the opera that is played as the bride walks to the altar of the church, but the song that is sung several hours later at the castle as the bride and groom enter the bridal chamber.—*By Ellen Lauck, Chevy Chase, Md.*

Holding a skunk off the ground by his tail does not, as is widely believed, render him completely incapable of ejecting his intensely offensive secretion. While the position does prevent him from firing his fluid in normal volume with his customary force and accuracy, it does not prevent him from doing plenty of damage.

Owing to a strange meteorological condition that prevailed over the Atlantic Ocean for several days in 1940, the television programs put on the air by the B.B.C. in London were picked up clearly by the NBC in New York, having traveled 3,500 miles or about 75 times their normal distance —*By Frank Walsh, Long Island City, New York.*

In 1882, the London Zoo announced that its famous elephant Jumbo, which it had owned for 15 years, had been sold to Barnum and would be taken to America. Immediately, a great storm of protest swept over England and a campaign was started to keep the animal there. Mass meetings were held, signs were erected, editorials were published, even a song was popularized in this effort which proved to be in vain. When Jumbo sailed, he received not only thousands of farewell messages but also hundreds of gifts including many dolls, games and books from friends who, in their sorrow, had forgotten that such things are useless to an elephant.

A fine car made even finer

PONTIAC

lways an exceptional car!

Year after year, Pontiac is a *fine* car made *finer*. Constant effort is applied in behalf of Pontiac beauty, Pontiac performance, Pontiac safety, Pontiac economy and Pontiac dependability—*all* the things you want most in a car.

The result—this year or any year—is an *exceptional* automobile excelling in all the things that make for basically better, more convenient, more economical motoring.

An outstanding example of Pontiac progress is the availability of GM Hydra-Matic Drive* on all 1948 Pontiac models.

Pontiac is the lowest-priced car in America offering you this proved achievement in easier, finer automobile performance.

Pontiac's *exceptional* record is your best assurance that you will be very happy if you choose a Pontiac for your next new car. Regardless of when you get it, it will be a wise choice—for Pontiac is *always* an exceptional car.

*Models Illustrated: De Luxe Streamliner 4-Door Sedan and the De Luxe Torpedo Convertible. *GM Hydra-Matic Drive and white sidewall tires optional at additional cost.*

HELP AMERICA PRODUCE FOR PEACE — TURN IN SCRAP IRON AND STEEL

TIAC MOTOR DIVISION of GENERAL MOTORS CORPORATION

Look!

A new-and-beautiful alarm clock!

Listen!

A new-and-pleasing alarm!

By General Electric, as you might expect! This latest star in the alarm clock firmament will shine in any company . . . in any room.

Its softly gleaming tapered case is of ivory plastic, contrasting handsomely with the glittering gold-colored "frame" around the face.

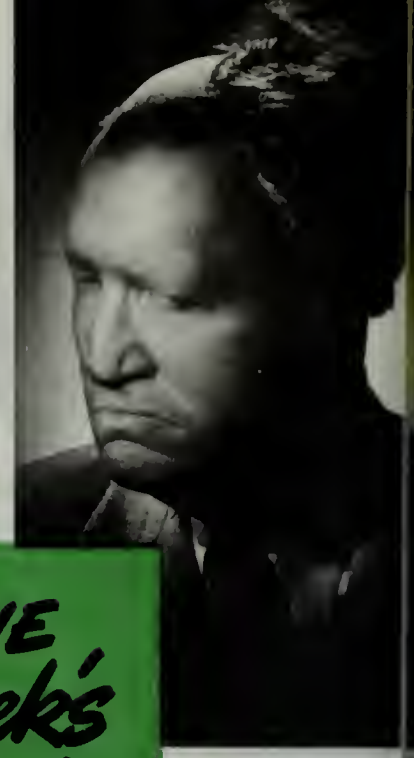
The dial is *unusually* distinctive. Mahogany numbers and luminous hour dots harmonize with their rich ivory background. Hands are luminous for time-telling in the dark. There's even a silvery second hand!

The bell in this General Electric Bell Alarm will wake you—*positively*—without assaulting your ear drums. It's authoritative yet melodious! General Electric Company, Bridgeport 2, Connecticut.

ALL the BIG G-E advantages!

In addition to beauty and a new alarm, this handsome clock has ALL the big General Electric advantages:

Self-starting . . . no winding.
Quiet . . . no disturbing ticktock.
Dependable . . . wakes you on time, every time.
Accurate . . . electrically checked by your electric utility to correspond with official Naval Observatory time.



Why wind a clock today? Get a General Electric Clock and forget it!

RUGE . . .

AND FIEND

THE Week's Work

ON July 31st we presented a dossier of Mr. Fred Balk, the cartoonist with Okay and Nokay sides. Mr. John A. Ruge, responsible for the cartoon spread: Class of '49 (p. 24) and assisted by a sheer stocking, offers his own Jekyll-Hyde character:

The Awful Truth About Ruge

Born: Faribault, Minn. (pop. 14,527) Oct. 2, '15.
Major Childhood Event: At 2, house burned down. Had nothing to do with it. Sister saved him. Art survived.
Early Movement: To New York at 10, via Philadelphia. Had rather forget latter—no Sunday baseball then.
Life in Art: Started drawing in kindergarten, so in time illogically attended the Art Students League, studying anatomy, painting. Latter messy. Sold first cartoon to Collier's—third year of Art School.
Remarks at Time: I can't believe it!
Remarks 11 Successful Years Later: I still can't believe it!
Influence of Hitler On: Greeted by F.D.R. in 1942, he was invited to Camp Upton and was given abuse, a set of form-fitting (somebody else's form) clothes, his basic training and latrines to clean. Stood guard over 3,000 pairs of woolen underwear, till transferred to *Yank*, later to Pacific as combat-artist-correspondent. Attacked Saipan, Iwo, Okinawa, Tokyo with pen and sketch pad. On carrier Ticonderoga off Tokyo in A.M. war ended.
Black Mark on War Record: Lived secretly with *Yank* staff in private house in Tokyo. Against regulations to even enter Jap homes. House only 300 yards American Embassy. MacArthur never knew.
Postwar Record: Work, work, work. Play, play, play. Likes golf, but golf doesn't like him.
Occupational Hazard: The Man with the Martini. He backs cartoonists against walls and blurts out: "Say, you oughta meet ... He's a riot . . . keep you in gag fo... next six months."
Person Cartoonist Never Hop... Meet: Joe.
Hobbies: Photography and bein... married—both of which keep ... broke.

Whene'er he eats, from morn till night.
In other words, to keep your man
You've got to give him food that's grand.
Just give your husband "MONARCH" food
To keep him in a loving mood.

There are five hundred foods and more,
That you can buy in nearby store.
They proudly wear the "MONARCH" brand;
Their quality - it's simply grand.
Its daily use is your best plan
To help you *firmly* hold your man.

Here Luke and Lucy help a friend
Pack "MONARCH" foods, from end to end
Of kitchen sheives, because - you see -
She knows that real economy
Lies in the use of food - by test -
Five generations have proved BEST.

She proudly serves her family
With foods of highest quality.
And at her table treats each guest,
With MONARCH FINER FOODS - the best.
If you've not tried them yet please do,
Then you are sure to like them, too.

REID MURDOCH, A DIVISION OF CONSOLIDATED GROCERS CORPORATION, CHICAGO, ILL.

Dear Smith-Corona,

Please add these keys to your typewriter...

...this because work is such smooth sailing.

...a jack-rabbit to sugges your speed, or should I say a whippet ?

...a feather for your light, soft touch that never shocks my fingers.

...you'll get the idea of the elephant since everyone knows how strong and rugged you are.

...and a trophy 'cause you help me to turn out more work with less effort.

Typewriter of the experts

THE Smith-Corona is the "Typewriter of the Experts." Professional typists, court stenographers and other people who make their living with a typewriter, select Smith-Corona . . . because its *easy action, floating shift* and *automatic margin-set* speed up output, lessen fatigue . . . because its *mechanical precision* turns out cleaner, neater work . . . because its *durability* and *dependability* mean less frequent servicing, lower upkeep cost.

Smith-Corona *Office Typewriters*

L C SMITH & CORONA TYPEWRITERS INC SYRACUSE 1 N Y *Canadian factory and offices, Toronto, Ontario. Makers of famous Smith-Corona Portable Typewriters, Adding Machines, Vivid Duplicators, Ribbons*

These weird glass coils are an artist's conception of tomorrow's farm machinery, in which water plant life will be harnessed to produce the world's food

BREAD WITHIN THE WATERS

BY LESTER VELIE

Every five years Mother Earth has 100,000,000 more mouths to feed. Come wars, pestilence and famine, this is Nature's will. Man in his ignorance has flogged the land within an ounce of its life. But now the wonders of the fissioned atom fetch plant food from the seas. Here's your farm of tomorrow

THE time is the Year X, perhaps five years from now, perhaps 25. The place is the Texas shore line of the Gulf of Mexico. But could be the Pacific beaches of southern Cali- rnia or the shores of one of the Great Lakes. Or e sands beside the Sea of Galilee.

For miles—as far as the eye can see—twist fat ils of glass pipe, two and three feet thick. Green- -yellow fluid courses sluggishly through the nsparent mains, giving the appearance of a ali surrealist landscape. Great pumping stations t the shore. The coils lead inland and terminate a huddle of other plants from which a mile-long in of tank cars—the only sign of human life—is t gliding away.

This is the farm of the future—based on solid coveries already made at the University of Cali- rnia and by the Carnegie Institution at Palo to.

In the farm of the future of Year X, man has come a long way from the wooden stick with which he scratched the earth in the days of Moses or even from the power plows that churned up vast acres in the days of Franklin Roosevelt. Now he has learned how to grow food in water in such abundance that, for the first time in history, there is enough for everybody, and hunger is banished from the earth.

Man has learned to train a wide variety of plants to produce, to order, fats, starches, sugars, vitamins —all the vital elements he needs. He has done this by wresting from Nature her best-kept secret: how a blade of grass or stalk of wheat creates its own food and, indirectly, *(Continued on page 66)*

Pardon My Symptoms

BY NARD JONES

There wasn't much the matter with Hazel. Just the kind of heart trouble that no doctor could cure—unless his name was d

HIS Aunt Libby said it was too bad Ed Ferguson wasn't a doctor instead of assistant postmaster of Maple Corners. She also said it was a pity he couldn't get away from Umatima County.

All the doctors in the county—and we have quite a few—were right with Libby on that last.

You see, Ed is related to a tremendous lot of folks. That would be okay with the local knife-and-pill brotherhood if he weren't always telling his relatives what their symptoms meant. A thing like this can be very upsetting to a regular doctor, especially when his diagnosis does not agree with Ed's.

But Ed only means to be helpful, and his heart is as big as his interest in medicine, which is certainly considerable. Ed is tall and gangling, with very disconcerting blue eyes, unruly tow hair, and freckles, so help me. He arouses the mother instinct in a girl, and then before she knows it she is not feeling the least bit motherly. Ed is not aware of this awful talent. We have been engaged since he got out of the Navy, so I should know. Maybe the reason he never discovered his wattage is because he is so concentrated on medicine in his off hours from the post office. Aunt Libby always said his concentration would make him a great doctor, if he had the chance. I agreed, but privately sometimes I wished he could move his concentration around a little more handily.

One day old Doc Gibbons wheeled up to me on the main street and said, "Hazel, if that damned nosy boy friend of yours don't stop his medical kibitzing, I am going to have the law on him. And stuff in your shirttails. You're getting too ol to leave your shirttails hanging out."

Doc Gibbons talks that way to me becaus he has known me all my life. It always seemed t that more than doctoring people, he spent his going around badgering and scolding them.

I stuffed in my shirttails. "What's Ed done n I asked, as if I didn't know.

"Don't you gallivant around with him Sunday when he makes his visits to his co relatives? Wasn't you with him at old lady Mu son's last Sunday?" I admitted it. "I thought Doc Gibbons spluttered. "And didn't he tel she had gall-bladder trouble?"

"I wouldn't know," I said. "I just go in and my respects and then I wander outside to lo the brood sow or something."

ILLUSTRATED BY JIM DWYER

They began shaking each other silly. The barker yelled down: "Gentlemen! Come up into the arena"

"Old lady Murchison ain't got any more gall-ladder trouble than I have!" Doc Gibbons houted, right out in front of the feed store.

"Ed said you looked a little like you might have. Gall-bladder trouble, I mean." I shouldn't have aid it. He got so flushed up I thought he was go-ng to have a stroke. I know the symptoms. I have arned a good deal from Ed, naturally.

"I am going to write Washington," Doc Gibbons aid. "I'll have Ed Ferguson fired from the post ffice and maybe then he will go away from Maple orners and Umatima County."

THE threat didn't worry me. Nobody can fire Ed from the post office, as there is no assistant ostmaster officially. Ed is hired by Jake Bulfinch, e appointed postmaster, out of Jake's own pay. ake has been postmaster since before I remember, hen the Republicans were in. It doesn't seem to ake any difference to Jake who's in and who's ut. But he likes to hunt and fish, so he hired an assistant. And I knew he wouldn't fire Ed because in the first place Ed is his nephew.

In the second place, Ed saved Jake Bulfinch a trip out to Mayo's. None of the docs had been able to figure out why Jake had fainting spells and they were all set to ship him out to the clinic when Ed came along and said it was the fumes from the kerosene stove in the post office. He fixed the leaks in the stove and, sure enough, Jake didn't have any more fainting spells. I don't mind telling you he was right about Annie's gall bladder, too!

In my opinion it was the U.S. Navy that got Ed interested in medicine. Ed happened to get on one of those little ships that don't have a doctor. They are supposed to have a pharmacist's mate which, as Ed explains it to me, is not the wife of a druggist. Anyhow, here was this little ship in Seattle with orders to sail immediately for the South Pacific, and no pharmacist's mate. So the skipper gave a big thick book to Ferguson, Edwin B., seaman 2/c, and showed him the medical stores. "Ferguson," he said, "you are the ship's doctor." By the time he got back to Maple Corners he could recite whole chapters of that book practically word for word.

So I knew that Ed wasn't too happy in the post office, although he never came out and said as much. He said he was happy just to be back from the South Pacific alive. But I knew well enough that he felt responsible for Aunt Libby. She sort of depended on the money he paid for board and room. I love Libby as if she were a favorite aunt of my own, but I thought maybe Ed ought to find another boarder for her. So when he said the post office and the town looked pretty good to him, after the Navy, I said, "How about me?" and batted my eyelashes.

"You look good, too," he said. "Slight hypertension, but nothing serious."

"Do I seem healthy enough to get married, maybe?"

Ed said yes, and he *(Continued on page 53)*

CARELESSNESS...THE CHILD KILLER

So you're busy with your chores, lady. The baby will have to amuse himself around the house until you're through. Listen, thousands of kids left alone like that died horribly in American homes last year. Want to know what to do? Well, read this—The second of two articles on this subject

INTERNATIONAL

Trouble lies in wait for children in thousands of seemingly harmless things around the house. This boy managed to screw a steel nut firmly on his thumb. It took a dentist's drill to get it off

II

THE young couple drove up to their apar ment-house door with a sigh of relief. Tl long, 500-mile drive back from vacatic had been tiring, and for the last hour their tw year-old daughter had been fretting. They enter their fourth floor apartment, and quickly thre open the windows to air the stifling rooms. Tl young woman placed her baby on the living-roo floor and hurried to get the child's supper read The father went down for another load from tl car.

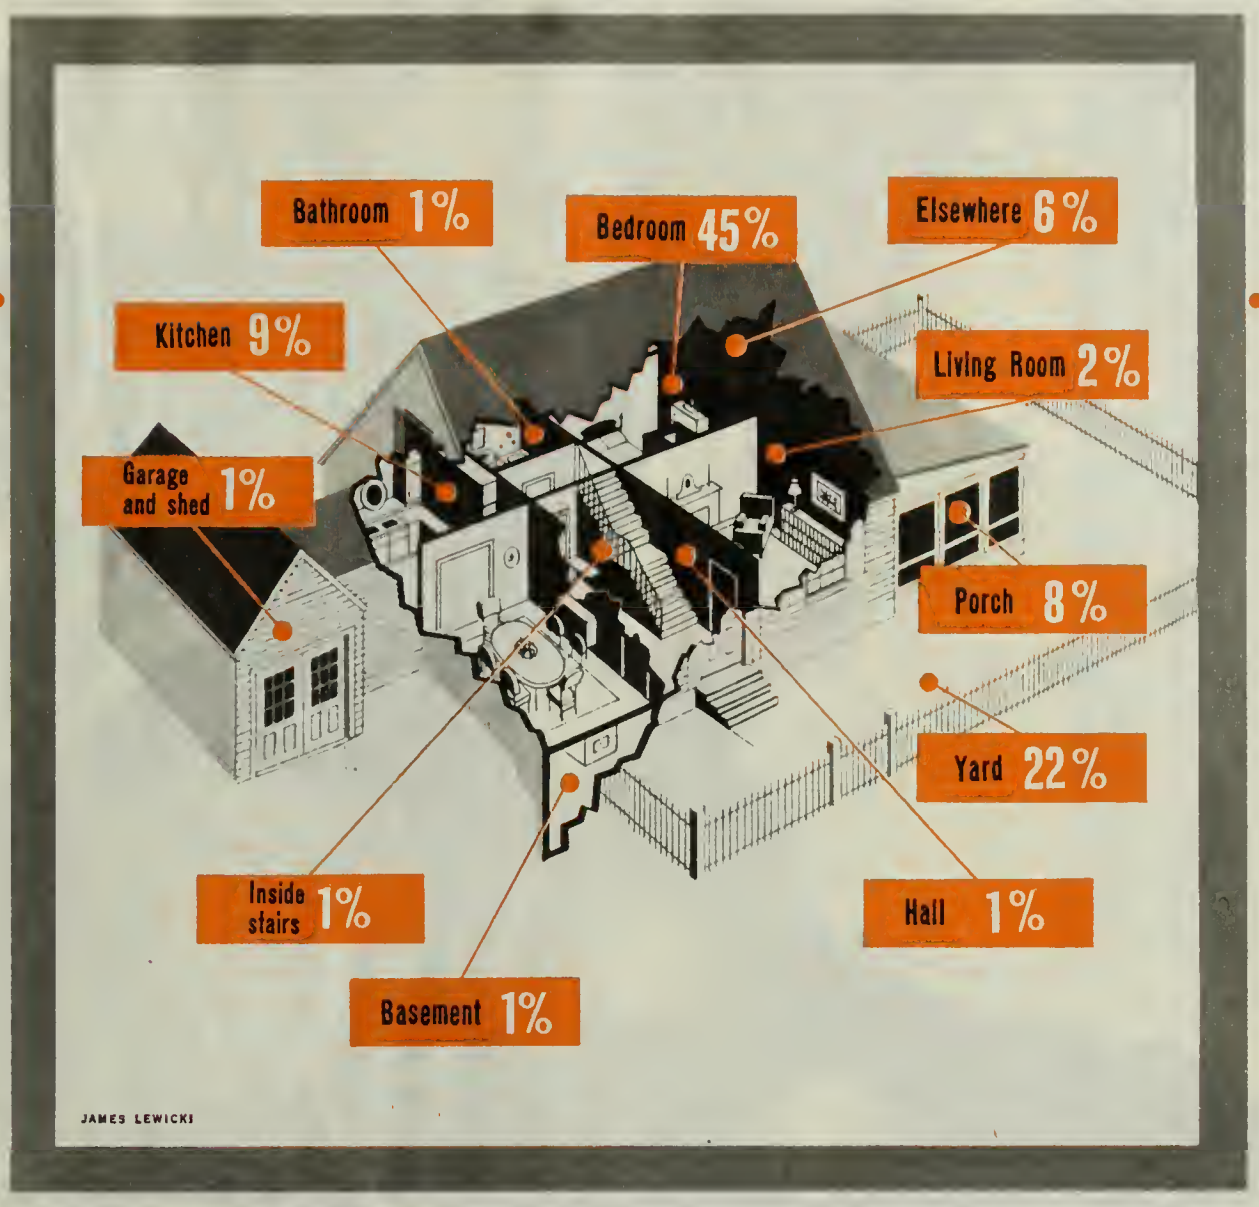
All the window sills were well above the chilc head, and there was no furniture near them. Y when the mother came in with her supper, the bal was on the pavement four stories below, dead. T late, the heartbroken parents realized that wh made the accident possible was the fact that t rugs were at the cleaners. Even a baby could sli a heavy chair across the slippery floor to the wi dow, climb into it, and roll out over the sill.

But what really made the accident possible w not the slippery floor. It was the parents' disrega of a primary rule of home-accident prevention.

Never leave a child alone in a room with an op window.

Of the 39 children who die every day in ac dents, more than half are killed in their own hom —the very place where they should be safest. L year 7,400 children were killed at home. And nea every one of these deaths could have been p vented.

This slaughter of the innocents will stop wh parents can be brought to realize that the killer almost always, their own negligence. To alert th to the need of protecting their children, the Ch dren's Bureau of the Federal Security Agency, t American Academy of Pediatrics, and the Natio Safety Council are this month co-operating w the Metropolitan Life Insurance Company launching one of the first big national campai to reduce children's accidents.



As reported in Collier's two weeks ago, ac dents are the chief killers of children today, s passing the combined death rate of pneumor diphtheria, polio, meningitis and several other d eases. Children's accidents have become a natio problem. The fact that most children are killed their own homes is a terrible reflection on the ca lessness of American parents. But it shows us where one big safety job must be done.

Some of the accidents which befall children and around the home are fantastic. In New Y an 11-year-old boy was killed in the kind of an ac dent that makes your hair stand on end. He a his friends were playing baseball in their own all way with a broken bat held together with adhes tape. One of the players swung at the ball a missed. The broken sliver was hurled from the with tremendous force. It went whirling thro the air, the sharp end catching the boy in the thr severing his jugular vein. He died before he co reach the hospital.

Yet, this shocking "freak" accident could h been prevented. Almost any broken toy is a d gerous toy. Parents should inspect their childr toys frequently and dispose of any which have come broken and dangerous.

Death lies in wait for small children in thousa of seemingly harmless objects. Take "pull to for instance. Millions of children enjoy play with these brightly colored blocks of wood wh pulled along behind them, provide healthy e cise for the child. But recently, in an upper N York State town, a mother allowed her son to t his pull toy to bed with him. In the morning found him dead. During the night he had so how wrapped the long string of his toy about neck, and then in his struggles to get free strangled himself.

BY HARRY HENDERSON AND SAM SHAW

The places in your home most dangerous for youngsters are spotlighted here. The figures are from a National Safety Council analysis of nearly 1,000 fatal accidents to children

Several hundred children die of strangulation in similar accidents each year, some before their parents' eyes. One mother wondered why her three-year-old son was mumbling his prayers instead of sing-songing them as he usually did. Tired from a long day, she did not immediately investigate. A second later he began to gasp for breath. Almost before she could understand what was happening, he was dead. He had swallowed a quarter, given to him to play with. Of course, he was told not to put it in his mouth.

As his grief-stricken parents now know, you cannot trust any child with small objects, or depend on him completely to heed your warnings.

This Boy Took His Toy Rabbit to Bed

Despite the warnings of doctors, safety experts and nurses, parents still permit children to take toys to bed with them. A West Coast mother, for instance, finally gave in to her little two-year-old son's demands that his favorite plaything, a cotton-stuffed rag rabbit, be allowed to sleep with him. She left the child happily asleep, the rabbit in his arms.

Two hours later she went into the room to get a coat hanger and turned on the light. She saw her little boy lying on his back, his eyes wide open, his body stiff, a fluff of cotton between his clenched teeth. The bed was littered with scraps of cotton . . . and his rabbit, its back ripped open, lay near by.

Quickly throwing a blanket over the unconscious child, she ran with him to a neighbor across the street. By that time he had turned blue, and his hands and feet were ice cold. The neighbor pried open the child's mouth and began pulling out cotton while his wife telephoned for the emergency squad and the distraught mother began artificial respiration. The emergency squad administered oxygen. At the hospital still more cotton was plucked from the child's throat. Continued oxygen treatment kept him alive until all the cotton was out and he had resumed normal breathing.

Both of these accidents happened because the parents did not foresee danger, and because they did not realize that a young child may not cry out even if he is able to. That is why, long ago, doctors formulated the rule: *Never allow any unnecessary object in a child's bed.* Yet three children a day die in accidents similar to these. Nearly all of them are under five years of age.

Most children who are killed at home die from burns. Altogether, more than 2,400 children die from burns each year—the majority of them, according to insurance statistics, in fires which consumed their homes. In too many cases the parents had gone out and left small children alone.

The safest safety match is dangerous in the hands of a child. Matches should be kept in a metal container out of the reach of small children. Older youngsters must be constantly educated to the danger matches represent.

Not long ago, in an eastern city, a thirteen-year-old boy, whose safety education had been neglected, found a box of matches. He immediately began striking them, throwing them away. His three-year-old sister, fascinated, followed him. He tried dropping them into milk bottles, drain pipes, tin cans. Finally, in the garage, he got one into a nearly empty gasoline can. The explosion killed both him and his baby sister. His parents found the trail of burned matchsticks afterward. Not only had they neglected their son's safety education, but they had, in leaving a nearly empty gasoline can around, literally provided him with the means of blowing himself and his sister up.

Two of the most dangerous periods for home fires are Halloween and Christmas. At these times children are apt to be dressed in inflammable costumes —and near candles, fireplaces, bonfires. *In some cases where death has resulted, Halloween victims had been given the matches by their parents.* A handful of matches given a boy dressed in an inflammable clown suit burst into flame in his pockets. Before his panic-stricken parents could get the flames out, he was so severely burned that he died a few hours later.

A New Jersey child, dressed in a grass hula skirt, caught fire and only the quick, courageous action of his mother, who beat out the flames with her hands, saved his life But a Holyoke, Massachusetts, child, also wearing a grass skirt, was not so fortunate. She caught fire and died from her burns when a wisp of her skirt poked through the grinning face of a candle-lit pumpkin.

Both Halloween and Christmas are coming up. You can help your children celebrate these holidays safely by making sure their costumes are not inflammable, by keeping matches out of their hands, by supervising them carefully around open flames, and by placing candles—if you absolutely must have them—out of their reach.

A Caution Against Scalding Accidents

Hundreds of children are scalded to death by hot liquids. One Metropolitan Life Insurance Company study of 100 fatal burns among children under five showed that 56 of them resulted from mothers having left hot soup, coffee, or boiling water where the child could tip the pot over. One simple movement would have saved many of these lives—turning the handles of all pots on the stove to the inside.

Pediatricians say that one of the main reasons for children's accidents is their love of imitation. They try to do what their parents do, and the little girl who reaches up and grasps a steaming pot by its handle is merely trying to do what she has seen her mother do hundreds of times.

More than 500 children are killed yearly in falls. A study at Chicago's big Cook County Hospital of hospitalized accident cases showed that 60 per cent of children's nonfatal accidents are caused by falls particularly on slippery floors and on stairs. Youngsters tumble frequently because their muscles lack co-ordination, sometimes because their eyesight isn't good. But nearly all their fatal falls were fatal because some parent neglected adequate safeguards. Some children plummeted from windows because their parents thought fly screens were sufficient guard, or that the child couldn't climb up onto the sill.

Most frequently, children fall at night when, half-awake, they get up and go to the bathroom in the dark. Half-opened doors or badly placed furniture can be skull-crushers then.

In one case last year a five-year-old boy woke up and called for a glass of water. His mother went to the kitchen for it. While she was there, he called out again asking, "Mommy, can I get in your bed?" She answered, "Go ahead."

A few moments later she returned with the water. The child wasn't in her bed. She went to his room, but he wasn't there, either. Alarmed, she turned on the lights and roused the family. They found him half an hour later, his head crushed. Half-asleep he had walked into a wide-open air-shaft window and had fallen three stories.

The price of a night light is ten cents. The price of a safe steel window guard is a couple of dollars. And the price of a child's life is beyond any man's purse.

Frequently fatal falls are not the children's doing. The person holding them fell and landed on top of them, fracturing their skulls, breaking their necks or their backs, crushing their ribs. Many of these accidents would have been prevented by adequate handrails and nonskid treads on the stairs, and by keeping stairways free of obstructions. Tragically often, the adult who falls with a child is a grandparent, because as we grow older our missteps become more numerous and more dangerous. They are one of the principal causes of death among people over sixty-five. Elderly persons should avoid carrying children up or down stairs or across slippery floors.

Each year we electrocute nearly as many innocent children as we do murderers. Sometimes the amount of negligence required to do the job is staggering. In many cases, children are killed by wires on which the *(Continued on page 57)*

The Gir

...who was Nobody's Daughter

BY MARGARET CHASE

The warm and exciting story of an orphan who pulled another woman's family together by main strength—of back, and of character

September 1

Dear Miss Pupke:

The place you got me is swell, and Mrs. Iredale is my ideal woman. I am not homesick for the Industrial Home for Orphan Girls. Don't forget I am now grown up, I am seventeen years old. I think I have stopped growing too. It is possible I am not quite so clumsy. Mrs. Iredale was so pleased when I lifted up her bureau and carried it across the room without marking the waxed floor. The drawers all fell out at once though.

I have a feller. He delivers the groceries from our store and has asked me to go to the movies on Thursday. He has pretty curly hair and pretty eyelashes and pretty white teeth. His name is Skibby. I do not understand the look in his eye, but this is the first time I ever got asked for a date. Frank the garbage man says Skibby is a juvenile delinquent, but Frank is just jealous. He wants me to meet his son Rocky, an unmarried cop. Juvenile delinquents do not worry me. I have seen plenty of them at the Home.

Mrs. Iredale is pretty and full of fun and a great athlete. The Mister says nothing and is very sallow but he must be a nice guy because he gives the baby her bottle every morning and plays with her although he takes no breakfast himself, just has a tablespoon of rye whisky. The baby is two. Her name is Cherry. She cannot pronounce my name right. She calls me Moosie. To show you how nice the Iredales are, they don't.

Besides the baby, the Iredales have one other child, a little boy called Stupy, but he must have another name. He stays in the basement mostly and saws or makes lead soldiers or something.

The kitchen has a beautiful big window over the sink so I can look out and see the grass and the trees, and the garbage wagon moving up the alley, and Cherry yelling in her play pen.

Over the kitchen is a storage space where they keep attic kind of things. It is reached by a trap door in the kitchen ceiling that you yank down by a chain. Yesterday Stupy says to me, "Ever play basketball?"

"Certainly. I jumped center at the Industrial Home for six years."

"See if you can reach that chain."

So I sprang up and yanked the chain good, and about a thousand tennis balls pelted me on the head. Stupy and I like to died laughing.

Our setup is like this, and Mrs. Iredale says it shows what a good executive she is because it works out so well, with only a cook—that's me—and a laundress, and a nurse girl. The laundress is very intellectual and a beautiful ironer. She is a small sad-looking colored woman named Jinkie and she knows a great deal about the Bible especially Ezekiel.

Mondays she washes and Tuesdays she irons. Wednesdays she takes care of Cherry because that is the nurse girl's day off. Thursdays she does the cooking because I am off. Fridays she scrubs the bathrooms and the windows and does the Missis' silk stuff. Saturdays she stays home for some reason, she has quite a few children of her own, and then she comes on Sundays when I get off at four o'clock and she makes the supper and goes home. So you see Mrs. Iredale is a good executive and leaves no time when she might have to do anything herself except there is the risk of Sunday evening—but the Mister can take hold then.

The nurse girl is Jinkie's daughter Joe Ella. She is very pretty and laughs and is absent-minded and reads Stupy's funny books all the time even when she is bathing the baby. So you see she is intellectual too.

The Missis is delicate. I carry a breakfast tray up to her every morning at nine o'clock and the last thing at night I turn down her bed and lay out her nightgown. She had an operation so she is not strong, and she hates whisky.

I have made lots of good things to eat. Stupy loves them. I burned my arm on an apple pie that turned over when I took it out of the oven, and I knelt on a sliver of glass that I was sweeping up because the Mister dropped a highball in the pantry, and I cut my knee. Nevertheless I still think everything out in the world is more beautiful than a dream, and more exciting.

Miss Pupke, I hung over my dresser the motto of the Industrial Home for Orphan Girls that you gave me, framed. *Every Tub Must Stand Upon Its Own Bottom* John Bunyan, but if you would not be hurt I would like to replace it with a new one I am lettering: *"Moonlight and Roses and Dreams."* I changed my name to De Lucie. That's French. So I will now sign myself, with love,

De Lucie (Lucy) Weed

September 7

Dear Miss Pupke:

I was reading in the paper I wrap the garbage in, and I saw the Missis' name. The Missis is a swell golf player and it said she was runner-up in a tournament and had eighty. It didn't say what of. What is running up? I asked Jinkie but she did not help much. She said it was eighty strokes and that golf is mentioned in Proverbs where it says, "A fool's lips enter into contention, and his mouth calleth for strokes."

Some days Mrs. Iredale plays tennis after she plays golf. I had a little run-in with Jinkie. She said the Missis isn't as delicate as she thinks she is but she has west-side malaria. I says, "What is west-side malaria?" She says, "She can eat and she can sleep but she can't work." So I says, "Shame on you, Jinkie. The Missis had an operation and she ain't strong yet," and Jinkie says, "She had her tonsils out five years ago." That's no way to criticize a beautiful mother like Mrs. Iredale and a good executive.

This morning I was fixing some waffles for Stupy when the Mister came shooting into the pantry like always for his tablespoon of rye whisky. "Try a bite of these, Pa," says Stupy. "They're swell." Stupy eats with me in the breakfast nook in the big bay window in the kitchen. It's like two pews opposite each other with a long table in between.

"Okay," says the Mister taking a bite. "Hey these are darn' good, De Lucie. Got one for me?" I quick gave him a nice hot waffle and a cup of coffee I had just made for myself and he ate right there with Stupy and forgot to drink his tablespoon.

Stupy was scrabbling *(Continued on page 62)*

The trap door flew open. Tennis balls

HOW TO GET WHISTLED AT

BY RUTH CARSON

ANN DELAFIELD is a woman with a Cause. That Cause is, we rejoice to report, to make more women beautiful—or at least easier to look at. To date she has succeeded with nearly half a million, via her famous DuBarry Success School in New York. And her Home Success Course goes by mail to women in every state of the Union and many foreign countries.

"One woman in every hundred in the United States between the ages of sixteen and sixty has taken this course," she says triumphantly. "One in every twelve has inquired about it."

Miss Delafield is a tall, slim, green-eyed brunette, given to wearing jersey dresses that mold her fine figure, and startling, feathered hats for drama. She is, according to her own analysis, just a teacher of physical education. "I want to make the world a lovelier place to live in," she says, batting her green eyes at you. "I am also a dietitian, but I am not a beautician. I don't even know what that means."

This attitude is not applauded by those competitors in the beauty business who merely sell powders and creams on the principle that beauty is only skin deep. Delafield tells you a body's insides might have something to do with handsome exteriors.

She now has 350 perspiring hopefuls crowding four floors of her salon every day. We've been looking at them each laboring through a six-week stint of exercising, dieting, and reclining every now and then with feet higher than head—a position which Delafield calls the Beauty Angle. She has an annual crop of about 45,000 women doing the same thing in their own homes. "The Beauty Angle combats the force of gravity," she points out earnestly, "sending blood in greater amounts to nourish your face and scalp. It is the only hope for men, to save their hair."

In the course of this performance her disciples, both salon and mail-order, are also slathering on their persons large quantities of Hudnut's beauty preparations.

Competitors have seen enough of Delafield's routine to install charm schools of their own, to instruct in the ways of beauty and the use of *their* cosmetics. Nor have they ignored her spectacular Before and After ads, showing on the one hand a dumpy fat woman and on the other a six-weeks-later slim beauty, complete with ecstatic testimonial.

Scoffers suggest camera angle tricks and worse. Miss Delafield answers happily that her advertising for the home course has been accepted for publication in the Journal of the American Medical Association by Dr. Morris Fishbein, editor of the Journal.

The converts have filled 120 active file drawers and 700 storage cartons in her offices with a remarkable correspondence. You read a batch and begin to suspect that Miss Delafield has probably repaired more broken hearts than Dorothy Dix. Thousands of records set forth personal woes, from wandering husbands to sore feet. The woes off their chest, they burst into raptures of gratitude and joy, with occasional spurts of poetry. Even the sour notes have a readable lilt. One smart girl answered Miss Delafield's come-on letter which starts: "How long is it since you have had a compliment?"

"How long, Miss Delafield, since I have had a compliment?" she hurried to reply by return mail. "One hour, Miss Delafield, one hour."

Miss Delafield herself is blessed with a natur[al] fine figure, a smooth complexion and wavy bro[wn] hair, which she wears in a glossy braid across [the] top of her head. She prefers to belittle her n[at]ural gifts.

"I am the ugliest white woman alive without [my] make-up. You know, I have no eyebrows," [she] confided to us, leaning across the small oval des[k] her small blue-green office, and lifting a brief [veil] so we could examine a remarkably natural-look[ing] pencil job. "They grow in low and scraggly, [like] John L. Lewis', so I pluck them right out. And [my] nose is too long. See what I do about that?" [She] adjusted the veil, the lower edge coming well ab[ove] the tip of the offending nose. "That shortens it. Never wear a veil over the tip if your nose is [too] long. And here's another trick—I always do [this] before I allow a photographer to take my pictu[re]." She smudged a little rouge under the tip of the [nose] in question. "See how that shortens it?"

Miss Delafield keeps her five-foot-eight figur[e at] 128 pounds, and never looks hungry, by using a [diet] that she calls Eating for Beauty. Eat *raw*, eat *a-line*, she entreats her pupils. She sets an exam[ple] by eating three different kinds of fruit for br[eak]fast, a raw fruit or vegetable salad for lunch, [more] fruits, vegetables, and broiled fish, meat or [veal] for supper. She prefers fruit juice to water. W[hen] driven to water, she'll have it only bottled or bo[iled]. She hasn't had a cold in seventeen years, [Miss] Delafield claims. A cold, to her mind, is proof [of] wrong living. "No wonder," she tells her pu[pils], "winter is the season for colds. Look how you [stuff] yourselves at Thanksgiving, Christmas and [New] Year's, just fixing a fine breeding ground for ger[ms]."

Success pupils have no long skirts with which to hide a false move from eagle-eyed dancing instructor Herbert Lee. Step-perfect graduates have poise and confidence

These girls are being taught by Mrs. Dorothy Newton the [art] using make-up to enhance their own particular type and per[son]

It's Ann Delafield's work to make women more soothing to the eye—sometimes a tough job. But she's always the optimist. Maybe she'll begin on men next

PHOTOGRAPHS FOR COLLIER'S BY SHARLAND

Besides keeping herself a fine physical example, Miss Delafield works very hard at her clothes. Her formula for dramatic effect is to stick to basic black dresses, which she generally designs herself, and to change hats frequently, to suit various occasions. She keeps a wardrobe of hats in her office for this purpose. She was wearing the third shift of the day one afternoon we saw her. It was a small white creation with bristling white feathers, which she considers fine for photography *and* lectures.

She had just been wearing, for a tough business session, a concoction dripping with roses and swathed in veiling. "I don't think a woman should look hard-boiled at a hard-boiled business session, do you?" Earlier that morning she had put on a sternly tailored job for the immediate purpose of dismissing three Success School pupils. "One was a scout from a rival concern. The other two weren't working hard enough."

Such calculated personal dramatics and unrelenting self-discipline lead her enemies to declare that Delafield is cold and inhuman. But she is so accustomed by now to looking on herself as one of her own best advertisements for the Cause of Beauty, that she is never tempted to let down. Also, she thoroughly enjoys the admiration her appearance always arouses, and she especially likes the guesswork it starts about her age. She looks to be a young forty, is probably in her early fifties, and is delighted with the common rumor that she is at least sixty.

Speculation about her personal life is stimulated further by the fact that Delafield likes to mind her own affairs, and let other people mind theirs.

"I hate particularly," *(Continued on page 60)*

HE HAD NO

BY MICHAEL FESSIER

That look in his eye, Janice decided, was not the calm, impersonal glance of the professional artist. She waited, without apprehension, for the worst

RESERVATIONS

Chris Crummit had a way with women but his wife wasn't worried. He couldn't get away with running away because he was the helpless type

WHEREAS most men considered Jane Crummit a model wife, most women —even some of her best friends—considered her pretty much of a female jerk and more than somewhat nonunion. Besides being a companion, helpmeet, housekeeper, cook and potential mother of Chris Crummit's children, Jane was also general manager, bookkeeper, collector of fees, and bargaining agent for his business, which consisted of painting portraits and magazine illustrations.

Women resented her all-around proficiency and indefatigable energy; they realized that, compared to Jane, they themselves were mere slugs, drones, fifth wheels on the marital gocart. Too often had Jane's friends seen their husbands look long and critically at them, then over at Jane, functioning as bartender and life of the party, and then assume the yearning, poignant expressions of hungry kids gazing into a bakeshop window.

Jane, of course, was not conscious of this. When one has a husband who cannot even be trusted to the extent of wearing matching socks, one is too busy to concern herself with the opinions of less occupied females.

Contrary to popular opinion, Jane had never been one of Chris's models. He had met her at a week-end house party, the host of which had inconsiderately fallen off a horse and broken his arm, thus presenting the problem of who was to fashion the cocktails. Jane had made her first favorable impression on Chris by taking over and maintaining a shakerful of delightful drinks for the duration of the party. This impression was enhanced by the way she relieved him of the onerous task of keeping score for a gin-rummy session. Love came to him on a blue Monday morning.

Chris had overslept and he had an important appointment in the city. The host and hostess were sleeping and there was no one of whom he could ask the time of the next train to the city. Finally Jane came down, looking much more like five o'clock of a Saturday afternoon in May than nine o'clock of a Monday morning in March.

"Why don't you look at the timetable?" she asked.

"Are you crazy?" he snorted. "As if anyone could actually read timetables! The only reason they're printed is that most railroad presidents start out as conductors, and by the time they get to the top they hate people."

Much to Chris's amazement Jane could read a timetable. What's more she drove him to the station with five minutes to spare before train time. Chris, who had never caught a train in his life, without first having approximated the record for the hundred-yard dash, was overwhelmed. Just before departure time, he kissed Jane and then got on the train, having left his overcoat in the waiting room.

Only once—and that was at the beginning of their married life—did Jane ever question Chris's way of living. "Don't you ever do anything for yourself?" she asked, more out of curiosity than resentment.

"Not if I can help it," he said languidly. "I'm the artistic type."

Jane soon came to understand what being the artistic type meant as far as Chris was concerned. It meant that he was lazy, irresponsible, untrustworthy and, by most standards, no confounded good, excepting as a painter of pictures and a potential father of her children. This, to Jane, was sufficient. . . .

For three years Jane had been happy and contented and she thought that Chris was likewise happy and contented.

She did not know about Chris's new model. Jane never went to the studio, but managed all business affairs from an office in their home, which was by now in a suburban town midway between Pasadena and Glendale, California.

Chris's new model was Janice Mason and at first she meant no more to him than an apple, three bananas and an orange reposing in a bowl might mean to a still-life painter—assuming the still-life painter had no immediate need for sustenance. Chris painted Janice for months before he began to feel a need for her.

DESIRE came to Chris one day while he was painting a version of Janice posed in a bathing suit slightly larger than a watch fob and made out of material that stopped just this side of being Cellophane. He ceased painting and stared at her, his brush falling from his hand. That look in his eye, Janice decided, was not the calm, impersonal glance of the professional artist. A tingling sensation traversed her bare spine and she waited, entirely without apprehension, for the worst.

Chris rose and walked up to Janice while she wondered if she shouldn't scream, just a little bit and not too loud. She closed her eyes and debated the question. *Maybe,* she thought, *at the first touch.* But Chris didn't touch. He was staring at a small, lazy curl of blond hair at the base of her neck. Considering the visual feast offered by the over-all Janice, Chris's localized interest might have seemed to many people abstemious. But Chris was no anatomical gourmand. He was a gourmet and it took little to please him. But that little had to be good. The curl at the base of Janice's neck was perfection.

Chris told her in glowing terms what he thought of the curl on her neck. At first Janice was miffed at having this inconsiderable bit of her bountiful charms singled out for approbation. But, she decided, everything has to start somewhere. . . .

During succeeding weeks, Janice posed in four different costumes which, if all sewed together, would not have covered her grandmother's blush at seeing one of them. During that time Chris had eyes only for the curl. Finally there came a day when he kissed it. He contented himself with a repetition of this aesthetic salute to beauty for such a long period that Janice started looking at him with slanted eyes and a dubious expression. Then Chris kissed her lips and that brought out the gourmand in him.

From then on, Chris was like the man who starts by sniffing the bouquet of rare old brandy and then decides he won't be happy until he's drained the bottle.

Finally, and with considerable trepidation, Chris made the proposition which Janice had so long awaited.

"Darling," he said, "darling Janice—I—that is—"

"Yes, Chris," said Janice, closing her eyes. "Yes, dear heart. Yes."

Chris sighed with relief. This hadn't been as difficult as he expected. Obviously he had a way with women.

They talked the thing over in a sensible, modern, enlightened manner. There would be a marriage, of course, after the divorce; and meanwhile hardly any conventions would be fractured—excepting of course the one concerning breaking up the home and heart of a trusting wife. But neither of them gave much thought to Jane at the time. When they did get around to thinking about her, Chris realized that off-the-reservation romance was not all moonlight and roses. How to break the news to Jane?

"I've got it," he told Janice happily. "Suppose you just drop around and have a little chat with her? You know, tell her that neither of us is to blame; we just lost our hearts and all that. Tell her I'm very fond of her and she'll always be a sister to me—et cetera."

"The burglar seldom brings the burglary to the attention of the householder," said Janice. "And your wife is liable to consider me a burglar. No, no, darling. By the time I got to the et cetera part of the speech I'd likely be all over bumps and abrasions. I bruise easily, my own."

Chris couldn't help but feel that this attitude on Janice's part was a trifle unreasonable. After all, an elopement such as this should be a cooperative affair; all the unpleasant details shouldn't be left to just one of the parties involved. He spent a week trying to screw up his courage to tell Jane and then—and it was just like Jane—she, herself, provided a solution for the problem. . . .

Chris returned home one night to find her packing a bag. She informed him that a sister was having a baby in San Diego and that she was going there for a day or so.

"Fine, fine," said Chris happily. "Your sister's a nice kid. She deserves a baby. Nothing's too good for her. I hope it's a big one. Oh, by the way, dear, Tom Clark phoned me from Marina —you know, that little resort on the coast near San Francisco? Well, he said the fishing's great and he invited me up for a while. I think I'll go."

"Well, it'd be good for you," said Jane. "Of course, when Tom Clark claims he's fishing he's lying in his teeth. The nearest that lad'll ever get to open water is the soda in his highball. Still, maybe even a good binge might snap you out of the depressed mood you've been in recently."

"I am no longer depressed," said Chris and went into the parlor.

How wonderfully simple it had turned out to be. With Jane gone all he had to do was write a note explaining everything to her, pack his bag and—

That reminded him.

"Oh, by the way, hon," he called. "While you're at it will you be a good girl and pack my bag? And, please, for Pete's sake, put in plenty of socks this time."

JANE was gone and Chris was finishing his farewell note to her. It read in part: ". . . and I hope this will not hurt you too much. As a matter of fact, if I thought it would, I wouldn't do it. But you're so self-sufficient and understanding and all.

"Yours, and still with love,

"Chris

"P.S. I'm running low on shirts. Will you have the shirt people ship me up a dozen white ones and be sure to make the collars a half size larger?"

It was time for him to pick up Janice at her home and then they'd be on their way to Marina on the coast. He had selected this little town for his adventure because Tom Clark's letter had put the name into his head and he could think of no other resort. It did not occur to him that his friend would still be there and might see him and Janice and ask questions.

He went to the phone *(Continued on page 76)*

"Gadfrey—have I got an Astronomy class! Three Varsity football players, a basketball center; one boy whose father studied Astronomy; at least four girls who are interested in the three football players. I have five repeaters; a veteran who wants to go into the roofing business, and who thinks Astronomy will help him, and two young females who think the subject is SIMPLY fascinating"

"'. . . and with the storming of Sugarloaf Hill the tide of battle turned. It wa dent to all that the back of the Japanese resistance on Okinawa was broken. I fighting American troops surged down to Shuri Castle, and then on south crushing enemy attempts at consolidation . . .' Gee! It didn't seem quite easy, did it, fellows?"

The Class of '49

In the hallowed halls of higher learning, next year's grads will soon begin making the grades. This preview is by Cartoonist John Ruge

"Sally's taking notes for me in Math; Doreen's doing both our book reviews, and Alice is giving me a carbon of her History outline. Otherwise I'd feel terribly guilty about cutting classes."

"Just think, darling: One day we'll have a lab of our own. Guinea pigs f and white mice for you."

The Shanahan Strad

My earliest memories go back to the first time Uncle Mike let me look at his fiddle. He said solemnly, "Now you've seen a Strad"

BY PAUL JONES

COLLIER'S
SHORT SHORT

LL my life, until I went away to college, and even afterward, there was never a when my Uncle Mike's fidlost its place as the recognized sure of the household. Most ilies have something like that; be it's a sword or a picture or ld Toby jug. Whatever it is, it ds as a symbol. As long as it's in its place, the e is secure.

ne of my earliest memories goes back to the time Uncle Mike let me look at his fiddle. He ied the worn black case and there it lay in its of rich, glowing green velvet.

Now you can say you've seen a Strad," he told olemnly, and made me look through the f-holes he faded label: *"Antonius Stradivarius Cremensis Facibat—Anno 17."*

t's a wonderful instrument," he said, and tuckt under his chin, he played a few bars of Garry n. Then he shut his Strad up in its case again, put it back in its accustomed shrine on the top e china closet in the dining room.

ncle Mike was not really a musician. He was rk in the Water Bureau, a quiet, elderly man he sort a neighborhood like ours mentioned respect. He played his fiddle only in the eves, at the dances the Irish are always having, or in those days.

was no genius of the violin, and he did not of himself in that way. It was his father who given him the Strad, and it was understood his father had it from *his* father, and so on, to the day when an earlier Michael had ght the fiddle from Italy to Cork.

mother was Uncle Mike's sister. She was a erful woman, but always expecting the worst ppen. She said she knew she looked on the side too much, but she couldn't help it, be- my father was too optimistic, and somebody o keep things in balance. He was a baker, a good hard-working German-American baker. he was a journeyman, but he couldn't rest unhad his own shop, and after he had his own he always kept an eye out for a bigger place.

t was one thing that used to worry my mother. as afraid my father would get carried away is big ideas, run into debt, and ruin his famn her eyes it was not only shameful but terangerous to owe anybody any money.

biggest venture was when he opened the on Essex Avenue. The front was a fancy y and the back was fitted out as an ice-cream , with mirrors and marble-topped tables and ddle fans swung from the ceiling. My father xcited when he first told my mother about it, tle by little his enthusiasm faded as a certain ame over her face.

ell you, Mary, there's no risk whatever," said ther. "It's only a matter of your signature on an application."

"How much is the loan?"

"Three thousand dollars. I can pay that back in two years without any trouble. The place is a gold mine, I tell you."

"But if it's a mortgage," she wailed, "they could turn us into the street. We'd be beggars, Carl."

We were all sitting in the dining room, after an early supper. I was doing my homework at one end of the table; my Uncle Mike was on my left, with the evening paper and the heel of a glass of porter. Now my Uncle Mike took his glasses off and folded his paper. "Just a minute," he said. "There's nothing worse than a quarrel where two good people each have a piece of the truth and can't let it go. I was thinking maybe I have the answer for it."

He got up and took down the fiddle from its place on top of the china closet. "I've read where a Stradivarius violin has sold for as much as five thousand dollars. Take it out and sell it, Carl."

"Oh, Michael!" my mother said.

"I don't like to do it, Mike," said my father.

"If you hurry," Uncle Mike told him, "you'll catch old Ehret before he closes." His hands trembled a little as he put on his glasses and unfolded the paper again, but his voice was perfectly steady. "I'm too old to be playing that thing anyhow."

So my father went out, with the violin case under his arm, and we sat there waiting for him to come back. Gustav Ehret's musical instrument shop was only three blocks away.

I remember I had a problem to do about how many rolls of wallpaper would paper a certain room, and it wouldn't work out to an even answer. Uncle Mike kept on reading the news to himself, and my mother resumed her darning. But she still had a shaky, uncertain look.

THEN we heard my father come in the front door. His step was quick and he was whistling, so we knew everything was all right. But when he came into the dining room, he still had the violin case and the first thing he did was to put it back on top of the china closet.

"There," he said, "that looks better."

"You didn't sell it?" said Uncle Mike.

"It came to me as I put my hand on the knob of Gus Ehret's door," my father explained. "Why should we sell it? Up there where it is, it's just as if we had a strongbox with fifty new one-hundred-dollar bills. And if we have that, a three-thousand-dollar loan needn't worry us, eh, Mary? Not when we can pay it off any time, if we have to, just by walking three blocks to Gus Ehret's!"

My mother was radiant. "I'm so pleased, Carl."

"A very sensible idea," my Uncle Mike decided judicially. "And I want you all to take notice that I'm leaving the violin to young Michael here in my will. He's never been able to get the hang of playing it, but it'll buy him a college education."

There was never any trouble about the loan, even though my father took five years to pay it off instead of two. While I went to high school I helped out in the afternoons, but it was taken for granted that I would go on to college.

My Uncle Mike died in his sleep the summer I graduated from high, and so his violin passed to me, as he had said it should. I planned to go to engineering school. The family income couldn't stretch that far, but there was always the fiddle case on the china closet to remind me that there was nothing to worry about.

"Don't they have some scheme where you can work your way through?" my father asked me, one night when we were kneading dough.

They did have a student assistance plan, I told him.

"I think that would be best," he said abruptly. "I put two hundred dollars in an envelope under the ties in your bureau drawer. That ought to get you started. Your mother thinks a great deal of that violin."

That was true. She did. But she didn't worry so much any more, except about my going to college in another city. And it was really my mother who insisted that I oughtn't to overtax my strength by studying and working at the same time. The violin was mine, she said, and Uncle Mike had meant it as a gift to pay for my college education.

The day before I was to leave, while she and my father were busy in the store, I took the violin over to Ehret's. The old man came out of his back room, blinking like an owl, and I opened the case and showed him what I had. "How much is it worth?"

He picked up the fiddle and held it close to his thick glasses. "Twenty-five, fifty dollars. Depends on who wants it."

"But it's a Stradivarius," I said.

"It's got a Strad label in it," he said gently. "Lots of fiddles have that. Not genuine. Never was genuine. This violin is maybe a hundred years old, but it is not, excuse me, a first-class violin." He peered at me curiously. "I have seen this instrument before. Aren't you Carl Engler's boy?"

"Yes," I said shortly. I didn't sell it, of course. I took it back home with me, and put it up in my room.

At supper, my last supper before leaving, my mother's eyes drifted to the top of the china closet and she caught her breath. "The violin," she said, putting her hand to her heart. "Did you sell it?"

My father looked worried, until I shook my head. "It's with my suitcases upstairs," I told her. "I want to keep it in my room at college. It'll be something to remind me of home."

Mother looked pleased and gratified. "Besides," I went on, "that way you won't have to worry about me, if anything happens and I need money. It will be just as if I had a fiddle case full of bank notes. Won't it, Pop?"

"It will, son, it will," my father said, avoiding my eye. ★★★

ILLUSTRATED BY STANLEY DERSH

RIFLE-ARM SAMMY

After eleven rugged years of rough, tough professional football Sammy Baugh still manages to pitch strikes all over the gridiron

BY FRANK L. DENNIS

WHEN Sammy Baugh came to the Washington Redskins of the National Professional Football League as a rookie in 1937, he already had a nation-wide reputation. Everybody who had followed his career at Texas Christian University knew him as "Slingin' Sam," the greatest forward passer in college football.

Ray Flaherty was head coach of the Redskins at the time, and he was noted for the thoroughness with which he punctured inflated egos. He thought that the tall quiet Texan might need a bit of taking down, so when Baugh came on the field for his first practice with the Redskins, Flaherty looked him over, handed him a football, and said:

"They tell me you're quite a passer."

"I reckon I can throw a little," said Baugh.

"Let's see it," said Flaherty. "Hit that receiver in the eye."

Slingin' Sam cocked an eye at an end who was racing down the field.

"Which eye?" he drawled.

This story is probably fiction, but anyone who has ever seen Sammy Baugh in action will not find it difficult to believe. It may be that a better forward passer will show up sometime in the dim and distant future, but nobody better than Slingin' Sam is operating as of now. In 1947, his eleventh year in the rough, tough competition of professional football, Baugh completed 210 of 354 passes, each of these figures being a National League record. His percentage of completions was 59.3, his percentage of interceptions was 4.2, and he threw 25 touchdown passes. In addition, the Washington Touchdown Club voted him the league's most valuable player.

A few students of football statistics claim that some of Baugh's records are not all that they seem to be, and that his passing suffers in comparison with that of the great Sid Luckman of the Chicago Bears. Baugh completes more passes during a season than Luckman does, but the critics claim that Sammy "throws a lot of short ones, while Luckman throws for distance every time." Turk Edwards, a great lineman in his day and now head coach of the Redskins, says that all this is nonsense; that the short passes, and the remarkable accuracy with which Baugh throws them, are proof of Sammy's superior skill.

"You can't afford to let some guys throw short passes," says Edwards. "A short pass has got to be absolutely accurate because if it's intercepted it can mean a touchdown against you. But Sammy can throw so hard and so straight that you can't make him throw anywhere he wants to. At ten yards, even if Sammy's receiver is only half a step from the defender, the pass will be completed."

Steve Owen, head coach of the New York Giants, whose team has often suffered from Baugh's wizardry with a football, agrees with Edwards, but says there is more to Baugh's skill than just speed and accuracy.

"Sammy's like a great baseball pitcher," Owen says. "He throws several kinds of passes at different speeds, and he'll hit the mark while he's falling down or throwing off balance."

There's one football player, a big tackle who used to play with the Giants, who believe anything you want to say about Baugh's accuracy. This tackle was a rookie a few years ago, and he was mighty rough and tough. He still is, for that matter, but he's smarter now. In one game he broke through the Washington line time after time and pushed his left fist into Sammy's face, even though the throw had been made. He was clever with his illegal roughing, and the officials didn't notice what he was doing.

When Baugh politely asked him to stop, he laughed and promptly did it again. This time he almost tore Sammy's head off. So on the next play Baugh held his throw for a moment, and as the big tackle came rushing in, Sammy let him have the ball smack between the eyes. The rookie was knocked cold and left the game for a while. Thereafter he bothered Slingin' Sam no more. The throw, incidentally, was ruled an incompleted pass. When the big tackle heard the ruling he roared, "What d'ya mean incompleted? Look at my eyes if you don't think he completed it!"

Baugh employs no magic formula in performing his extraordinary feats with football.

"Of course," he says, "there are some things a passer must know. For instance, I hold the ball differently in wet and dry weather. When the ball is dry I throw it with the laces at the heel of my thumb. When it's wet I have the laces at my finger tips. I think any boy who really wants to can become a good forward passer, but even a naturally good passer should work at it as much as possible. I used to practice all the time whenever I could get someone to catch my throws. I still work hard at passing. It is mighty easy to go stale.

"But I don't think anybody can be very good at football unless he really likes to play. There have been guys in this league who had a lot of mechanical ability, in addition to size and strength, but they didn't like to play very much. They didn't stay up long. Of course, sometimes we get the wrong impression about a guy; we may think he doesn't like to play when actually he's crazy about it. We thought that once about Dave Smuckler, who was a whiz of a running back at Temple University and later signed with the Philadelphia Eagles. We all noticed that Smuckler always went to the bench after a couple of plays, so we sent a scout to find out why. The scout reported that Smuckler really didn't like to play football, and, moreover, had a yellow streak.

" 'You guys just rack Smuckler up the first few times he runs with the ball,' the scout said, 'and he'll get out of there quick.' So when we played Philadelphia, the first time Smuckler carried the ball, we went right after him. So what happened? He bounced three or four of our guys on their heads and gained 25 yards. On the next play he went around the other end, stomped all over Wee Willie Wilkin, one of the great tackles of all time, knocked down Ernie Pinckert, our hardest tackler, and ran over me as if I weren't there at all. He sailed over the goal line, threw the ball down, and ran over to the Philadelphia bench and sat down, without even looking back.

PHOTOGRAPH FOR COLLIER'S BY ERNEST KLEINBERG

"Jeff Coongate!" said Steve dazedly. "It's you!" "Yes, son. What's so strange about that?" Steve laughed in a kind of nervous relief

THE ONE-EYED POACHER AND THE LONG NIGHT

BY EDMUND WARE

ILLUSTRATED BY PAUL HAMLIN

oongate—famed for his illicit prowess with rod and gun—takes off from hunting a very big moose to bag some very bad men

's for September 11, 1948

IN THE morning, some hours after the second jug had fallen, Uncle Jeff Coongate opened his one eye, sniffed, and, through the stronger fumes of rum, detected the odor of sweet grass. It reminded the old poacher of Indians weaving baskets in the sun. Next, he thought fondly of Tom Compus Mentis, who was still asleep beside him in the spare room in Zack Bourne's cabin on Mopang Lake. Finally, with a wave of grief, Uncle Jeff recalled his tragedy: Zibe, his beloved dog, was dead.

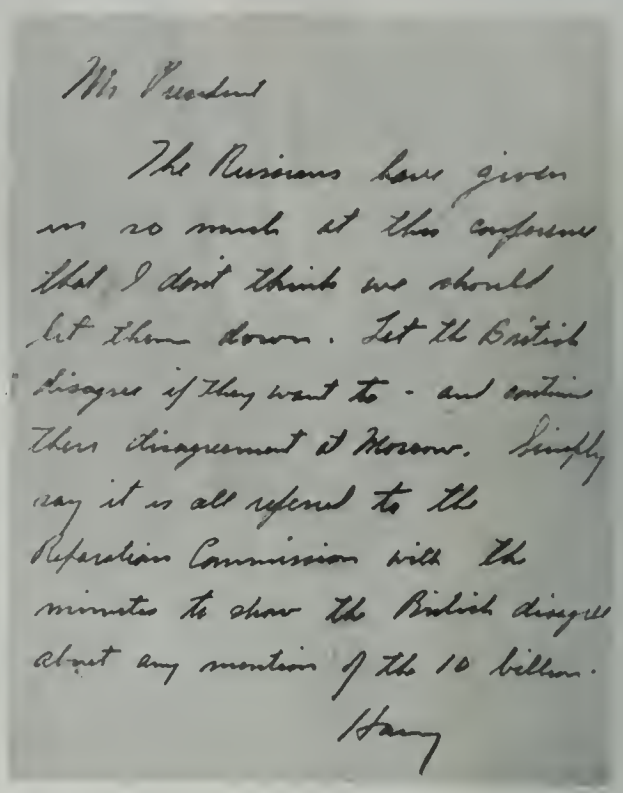
It was Tom Compus Mentis, the gentle and ancient Indian, who, on the day before, had brought Zibe home to Jeff. With the crippled hound lying in the bow of his canoe, old Tom had traveled the twenty-nine miles from Hedron Lake to Mopang in seven hours. It was a feat of loyalty and endurance which revealed a long and dignified friendship.

Zibe had been shot in the spine. His hindquarters were paralyzed, and as the old woodsman gathered him in his arms, he had whimpered, and pressed his fevered muzzle to Uncle Jeff's neck.

"Zibe," Jeff whispered, "Zibe—what hellbird done this to you?"

"Red Hackett," said Tom Compus Mentis. "I find tracks. And empty shell—.351 auto."

The one-eyed poacher carried Zibe into Zack Bourne's cabin, and the Indian stayed in the doorway. Zack, Jeff Coongate's lifelong comrade in enterprise against the game laws, looked once at Zibe's wound, and shook his head in sorrow.



"It's mortal," he said. "Poor ole Zibe—best hound ever run a moose to water."

Zack's wife, the devout and tremulous Sarah, began to cry. She had never truly loved Jeff's hound, fearing him as a primordial and fiercely roaming adventurer, like his master. But Sarah was so tenderhearted that she was touched by any misfortune. *(Continued on page 48)*

THE SECRET PAPERS OF HARRY L. HOPKINS

The Big Three meet at Yalta and reach agreement—for the last time

BY ROBERT E. SHERWOOD

Mr President

The Russians have given us so much at this conference that I don't think we should let them down. Let the British disagree if they want to - and continue their disagreement at Moscow. Simply say it is all referred to the Reparation Commission with the minutes to show the British disagree about any mention of the 10 billion.

Harry

At Yalta, Stalin again demanded German reparations. Hopkins sent F.D.R. this note suggesting he pass the buck to the Reparations Commission

U.S. ARMY SIGNAL CORPS

Yalta, February, 1945. The end of the European war—and victory—is almost within sight. And each man's face shows the strain of the terrific load of responsibility he has had to shoulder for many years. It is the last time that the Big Three are to be together. President Roosevelt has barely two months to live

PART XVI—TRIUMPH, DISILLUSIONMENT AND DEATH

THE accommodations at Yalta were unexceptionable for those on the Very Important Person level. However, this was war-ravaged territory and space was so limited that 16 U.S. Army colonels had to share one bedroom. Hopkins had a bedroom to himself in the Livadia Palace where Roosevelt was staying, and he left his bed only to go down to the Grand Ballroom for the full-dress meetings. He was so ill that at one point Dr. McIntire wanted him to be moved to the Navy communications ship, U.S.S. Catoctin.

Hopkins attended none of the big dinners at Yalta, so that his condition at least became no worse and he was able to stick it out to the end. James F. Byrnes has written, "Members of our delegation frequently held meetings there (in Hopkins' bedroom) because Dr. McIntire insisted he remain in bed."

The President and the Prime Minister arrived at Yalta on Saturday, February 3d. Stalin and his party arrived early Sunday morning and he and Molotov came to call on Roosevelt at four o'clock that afternoon.

After thanking his hosts for all the arrangements that had been made to promote the comfort and convenience of the guests, Roosevelt remarked on the destruction that he had seen here in the Crimea and Stalin told him that it was nothing as compared with the Ukraine, for in the Crimea the Germans had been given little time to carry out plans of demolition, whereas in the Ukraine they had destroyed everything with sadistic calculation and method. Stalin then asked how things were going on the western front; Roosevelt told him that General Marshall would later give a detailed outline of the situation, but he could say now that the main drive of the Anglo-American forces would begin in about a month's time. Stalin was gratified to hear this.

A few minutes before five, they moved down to the Grand Ballroom for the first formal conference. Hopkins felt too ill to come to this meeting—which must have meant that he was very sick indeed.

At the start of the meeting, Marshal Stalin suggested that President Roosevelt should again preside. The discussion, which lasted for nearly the

ACME

The big conference table at the Palace in Yalta. Churchill (back to camera, lower right) and Stalin asked Roosevelt to preside, as he had at Teheran. The President looks tired and ill. Yet those there testified that whenever the Big Three failed to reach agreement, it was always Roosevelt who found a meeting point

hours, dealt almost entirely with the military situation.

Roosevelt was host at the dinner which followed his meeting. The Filipino mess men were on duty, but the food was strictly Russian. Charles Bohlen young State Department career man who had also acted as Roosevelt's interpreter to the Russians at Teheran) stated that "very good humor" prevailed throughout the meal, but he added a bit of conversation on the side between himself and Vishinsky which sounded mildly caustic. Vishinsky said that the Soviet Union would never agree to the right of small nations to judge the acts of the great powers, and when Bohlen ventured the opinion that the American people were not likely to approve of any denial of the small nations' rights, Vishinsky said that the American people should learn to obey their leaders. Bohlen suggested that it might be a good idea for Vishinsky to visit the United States and try to tell that to the people, and Vishinsky remarked that he would be glad to do so.

Another interesting fragment of that dinner conversation was Churchill's remark that although he was constantly being "beaten up" as a reactionary, he was the only representative there who could be thrown out at any time by the universal suffrage of his own people and that personally he gloried in that danger.

When Stalin observed ironically that the Prime Minister seemed to fear these elections, the Prime Minister retorted that he not only did not fear them but that he was proud of the right of the British people to change their government at any time they saw fit.

Referring to the rights of the small nations, he quoted: "The eagle should permit the small birds to sing and care not wherefor they sang."

The second formal meeting was held at four the following afternoon and the conference really got down to business. Hopkins dragged himself out of bed for it and attended all the main meetings thereafter. Hopkins was too ill to write extended memorandums at Yalta as he had done at other conferences, but Byrnes has provided a lucid account of the conference in his book, Speaking Frankly. I do not believe that Byrnes has placed enough emphasis on the background of the highly controversial voting formula in the United Nations Council.

Time and again, through all the conversations with the Western Allies, Stalin had stated his firm conviction that in the real world of power policies there was only the Big Three—that France and China had no claim to recognition as major powers, and that the rest of the United Nations consisted of small countries which should be content to do as they were told. Stalin liked to use Albania as the symbol of the small nations, asking, "Will Albania have a vote equal to that of the U.S.A., or the U.K., or the U.S.S.R.?"

Of all the "surrenders" to the Russians that Roosevelt is supposed to have made at Yalta—and the more kindly critics attribute these not to deliberate betrayal but to the fact that he was a dying man—those most often cited and emphasized relate to the establishment of the veto power in the Security Council of the United Nations and to the granting to the Soviet Union of three votes in the General Assembly. However, the basic issue of the veto and the American policy in respect to it had been determined long before Yalta and the Russian demand for additional votes was strongly supported by Churchill and Eden.

The principle of the veto was stated by the United States government and the British government in their separate "Tentative Proposals for a General International Organization" as drafted in July, 1944, prior to the Dumbarton Oaks Conference. There was complete agreement that in matters which might affect world peace the veto could be exercised by any one of the four (or, if France were included, five) major powers.

The Unyielding Attitude of Mr. Gromyko

The arguments with the Russians that arose at Dumbarton Oaks and resulted in failure to agree on a voting formula for the Security Council were concerned not with the principle of the veto but with the precise extent to which any power should be denied the right to vote on a dispute in which it was a participant. Various compromise proposals on this had been made by Stettinius and Cadogan, but Gromyko was unbudgeable. When Stettinius expressed the fear that this unyielding attitude might break up the world organization even before it started, Gromyko said flatly that no world organization would exist in which a major power was denied the right to vote in any dispute, whether it was a participant therein or not.

It was at this time (Dumbarton Oaks) that the question of more votes than one was first raised. Stalin said, in a cable to Roosevelt: "You, of course, know that the Ukraine and Byelorussia, which are constituent parts of the Soviet Union, are greater in population and in political importance than certain other countries which we all agree should belong to the number of initiators of the establishment of the International Organization. Therefore, I hope to have an opportunity to explain to you the political importance of this question which has been brought up by the Soviet delegation at Dumbarton Oaks."

On December 5, 1944, the United States government prepared a new compromise proposal on the voting formula which was forwarded to the British and Russian governments and which was again presented by Stettinius when this general subject first came up for discussion at Yalta. Agreement on it was reached with, it would appear, no argument at all.

There certainly wasn't any evidence on the record of opposition by Churchill, who was always at all these meetings a zealous and unflagging champion of the rights of small nations. Indeed, the British had been heartily in favor of the veto as a means of preventing any encroachments on their own imperial interests. The United States had favored it as a form of insurance against the commitment by the United Nations Council of American forces to action in all sorts of possible wars in all parts of the world—and Roosevelt, with the memory of Woodrow Wilson always alive in him, was particularly conscious of the importance of this point when the United Nations Charter would eventually be submitted for ratification by the Senate.

According to the December 5th compromise formula, the main concession to Russia provided that a major power could by its veto prevent the council from taking action, such as application of sanctions or of war itself, against said power. What Russia yielded in this compromise was this: A major power could not by its veto prevent the council from considering and thereby advertising the involvement of said power in any dispute. The British and Americans at Yalta did not consider this a negligible concession, for it represented a considerable relaxing of the rigid position taken by Gromyko at Dumbarton Oaks.

It was at the fourth formal meeting on February 7th at Yalta that the Russians made their request for two or possibly three additional votes in the United Nations Assembly. This was when Churchill spoke up strongly in support of the Russian proposals and he was undoubtedly influenced by British imperial interests particularly in connection with the Indian problem.

When it was Roosevelt's turn to express his views, he embarked on a long speech in which he employed his familiar tactics for attempting to dodge an immediate issue by maneuvering the conversation into the realms of irrelevancy. Evidently Stalin began to betray signs of impatience as Roosevelt's vagrant remarks were translated to him, for Hopkins scribbled the following note: "Mr. President—I think you should try to get this referred to the Foreign Ministers before there is trouble."

At the fifth formal meeting on the following day, February 8th, Eden reported that the Foreign Secretaries' meeting had considered this matter and decided that only those *(Continued on page 71)*

"I'm getting a mouse," Clyde said. "I can feel it. Let me have your compact, Ginny." He took it from her

Continuing a story of love and political intrigue

SECOND MAN ON THE TICKET

BY EDWIN LANHAM

ILLUSTRATED BY MARIO COOPER

The Story: The scandalmongering Washington newspaper columnist, CLYDE MCDONALD, boards the GOVERNOR WILLIS G. WARBURTON Vice-Presidential campaign train, and LUCY STRAWN, Warburton's secretary, learns that someone in Hydetown has promised to give McDonald a juicy item for his column. ROY MASON, Warburton's campaign biographer, is sent there by plane. In Hydetown, Roy learns from JOHN MILLS that Warburton's old schoolteacher HATTIE PERKINS is the only person in Hydetown who is not going to attend the forthcoming Win With Warburton celebration. Her grandniece, a beautiful girl named GINNY, arranges an accidental meeting between Hattie and Roy. But Hattie discovers who Roy is and will not speak to him. When Roy returns to the train, Governor Warburton tells them how he once borrowed school money for his personal needs. Warburton's press aide, BILL EVERS, says that Clyde McDonald must not find this out; and Warburton plans to leave the campaign train and fly to Hydetown secretly and rejoin the train before it gets there. Before the governor can do this, however, Clyde McDonald leaves the train for Hydetown. Warburton flies there with Roy and Lucy Strawn. As Warburton is talking to Hattie, footsteps are heard outside on the porch and he and Lucy run out the back door as Clyde McDonald and Ginny Perkins come in. Roy manages an explanation, and he and John Mills leave and pick up Warburton and Lucy Strawn. It is raining, and when they reach the airport, all flights are canceled. Warburton cannot rejoin the train. But Roy says that he will drive ahead and meet the train that Warburton's wife RUTH is coming to Hydetown on, and that he will get Ruth to pretend that she is sick; therefore, if the governor shows up in Hydetown unexpectedly no one will think anything of it.

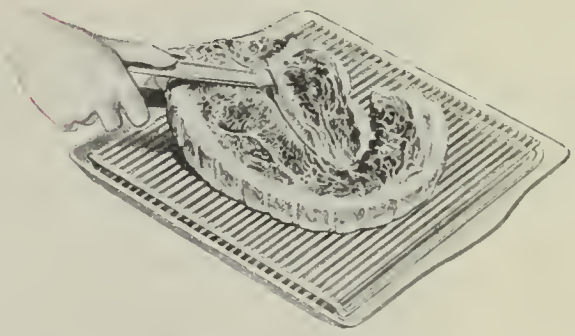
ow to get fine steaks every time...

U'LL ALWAYS GET FINE BEEF you buy by a Swift brand name. *ght on the meat,* the brand name entifies beef selected by Swift experts for tenderness nd flavor... the ick of all the vast mounts they see. *Swift's Premium, Swift's Select,* and *Swift's Arrow*— those are the three top brands. Look for them... on thrifty cuts or choice ones...whenever you buy beef. Now especially, when every morsel counts, your best buy is beef you can *depend* on, to the last tender tidbit!

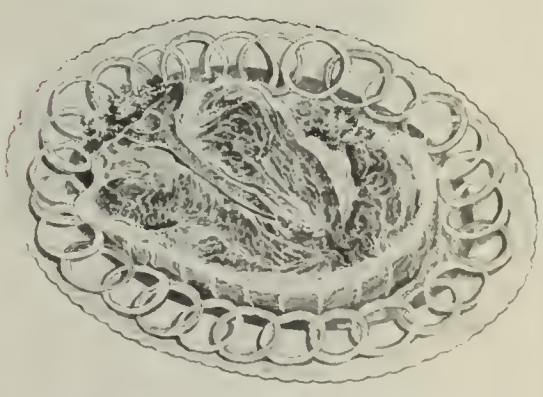
Just look for a Swift brand:

SWIFT'S PREMIUM,
SWIFT'S SELECT or
SWIFT'S ARROW

right on the meat!



Martha Logan,



Swift's Home Economist, tells you

HOW TO GIVE A STEAK A BREAK

EVEN THOSE FINER Swift branded steaks are better for proper broiling: Slash fat along edge in several places to prevent curling. Preheat broiler. Place steak on broiler rack 3" from heat source. A 1½" steak takes 10 min. each side for rare, 12 min. for med., 13 min. for well done.

TURN STEAK CAREFULLY to avoid piercing —tongs are best. To test for *doneness,* cut along bone with a sharp knife and *peek!* Season each side of steak after it is browned, not before. And *do* serve the steak on a really hot platter. A garnish of rosy onion rings (marinated in pickled beet juice) is an epicurean touch.

NO NEED TO WASTE A BIT of that Swift branded steak. Leftover fat may be cut in bits and used in hash browned potatoes. The flank end (less tender than the other two muscles) can make another meal — sliced fine for meat pie, sandwiches, salad, or meat sauce for a noodle or rice casserole.

and said, "I've done plenty for that man, but this is tops."

"He's worth it, Ruth," I said.

She gave me a look. "You bet he's worth it." She moved to the mirror. "I'd better get ready. First, off comes the make-up." She scrounged her cheeks with tissue, removed her make-up and lipstick. She turned for my inspection. "How's that?"

"Better," I said.

"I'll try a trace of eyebrow pencil," she said, and I watched faint circles form under her eyes. She turned again to me, looking haggard. "Better?"

"Good," I said. "Got a muffler?"

"I have a scarf."

"Wrap it around your throat. When we get off the train fetch up a hacking cough."

She practiced one. "Like that?"

"Like that," I said.

I took off my wet shoes and put my feet up against the heat register. They were dry by the time we reached Hydetown, and by then I had my shoes on again and I had Ruth wrapped up in her fur coat, with a scarf around her neck and another scarf over her head. It was still raining hard, but the wind seemed less strong.

The train moved slowly into the station. I had a glimpse of soaked yellow shingles and steamy windows, and then close against the wall of the station I saw the clustering umbrellas and raincoats of the reception committee. Among the women was Ginny Perkins, in a transparent, hooded raincoat.

"Now is your big scene, Ruth," I said. "Lean on me."

I HELPED Ruth Warburton along the passage to the vestibule. The train stopped and the porter put down the yellow steps in the rain. The committee drew near, and Ginny Perkins stepped forward and said in a clear, rehearsed voice, "Welcome home to Hydetown, Mrs. Warburton."

I went down the steps ahead of Ruth, and Ginny's eyes opened wide. "Why, Roy Mason," she said. "You jack-in-the-box!"

"Get an ambulance," I said.

"An ambulance?"

"Mrs. Warburton has a fever of a hundred and four," I said. "It looks like pneumonia. She was caught in the big storm last night." I stood on the bottom step and raised my voice. "Ladies, Mrs. Warburton is extremely ill. I'm afraid we must dispense with the ceremonies."

I held out my hands to Ruth and she chose that moment for a cough that echoed in the rain. It was an achievement.

A plump, graying woman wearing a slicker and a transparent covering over a feathered hat moved forward and called, "Ruth, you must remember me. I'm Agnes Mills. My husband is here and we'll rush you straight to our house."

We had Ruth between us, and we went quickly across to the cindered ground where cars were nosed up to a white iron railing. John Mills had picked up Ruth's two suitcases, and as he overtook us I said loudly, "I've already notified the Governor, Mr. Mills. I sent a wire."

I saw Lucy Strawn holding open the door of a car. I helped Ruth in, and ran around the other side to get in front with John. Immediately he backed the car out.

As John drove away I turned and said, "Good work, Lucy. I didn't think you'd make it in time."

"She beat you by five minutes," John said. "Roy, I called Doc Arnold, and he'll meet us at the house."

John's house was a big yellow structure on the edge of town, a Victorian house with long galleries and gingerbread scrollwork and five yellow gables towering in the rain. There was a gravel driveway leading to the porte-cochere. John took it fast, spewing gravel, and braked under the porte-cochere. Lucy had the door open instantly, and we all scurried into the house.

With the door shut behind us, Agnes Mills said, "Of course you're Mr. Mason, aren't you?"

"Yes."

"Call the operator at Meridian, Mississippi. There's a long-distance call."

The three women went on up the stairs and John showed me the telephone in the downstairs hall. The doctor arrived as I was putting through the call.

Bill Evers' voice came over the wire. "Hello, hello. Who's this?"

"Roy," I said.

"Roy, where in hell is the Governor? What's happened? What's this about the man in cabin nine!"

"Take it easy," I said.

"Make sense," he shouted.

"Bill," I said, "the Governor is holed up in a tourist camp for the time being."

"In a tourist camp!" Bill shouted.

"Listen, Bill," I broke in. "Everything is all right. Now get this. Ruth Warburton is here in Hydetown, with a temperature of a hundred and four. She's got double pneumonia and we're getting her an oxygen tent."

COLLIER'S "It seemed like such a nice road in the car" STANLEY BERENSTAIN

"What?" Bill shouted. "Everything is all right, you say!"

"Now listen to the rest of it," I said. "The Governor is rushing here to be at her bedside. Got that? You tell the correspondents on the train, and I'll call in the local Associated Press man. The Governor will get here sometime this afternoon and I'll arrange for him to broadcast his Birmingham speech from here."

There was a pause, then Bill said, "I see. Ruth's not really sick. It's a fake."

"Don't say that out loud."

"I see," he said.

"A gale is blowing over here, Bill."

"All right," he said. "Roy, how about that other thing. Was that fixed up?"

"All fixed up." I said it with more confidence than I felt. Bill had enough to absorb at one dose without bringing Ginny Perkins in.

John Mills was waiting, leaning against a newel of the big staircase. When I had finished he nodded solemnly and said, "Shall we go visit the sickroom, Roy?"

A FEW of the stanch ladies who had waited at the station in the storm had assembled in the living room when I next went downstairs, and among them was Ginny Perkins. I gave her a nod and went on to the telephone.

I called the radio station in the city and arranged for the Governor's speech to be broadcast from the Mills home at eight o'clock, and as I talked I saw Ginny come slowly out of the living room. When I hung up she approached me and asked in a hushed tone, "How is Mrs. Warburton, Roy?"

"The doctor put her to sleep," I said.

"It's just a shame," Ginny murmured. "The day before the reception and all that. I suppose you'll have to call the whole thing off, won't you?"

"I don't know," I said. "We'll see. The Governor is planning to make his speech tonight, on schedule."

"Yes, I heard."

"I hope he'll be able to go through with it," I said. "This is a terrible strain for the Governor."

"Yes, it must be," Ginny said.

"He's a worried man, Ginny. I'd hate to see any more trouble now, when he can't fight back."

"Why should there be more trouble?"

I looked into her deep blue eyes. They were clear, guileless eyes, and their expression was gentle, almost tender. I reached out and took her hand. "I mean the sheepskin coat," I said.

"What sheepskin coat?" Her eyebrows went up.

"Miss Hattie's story," I said.

"I see. Aunt Hattie told you last night?"

I took her other hand and held them both firmly. "Ginny, it would be disastrous if a man like Clyde McDonald got hold of that. It wouldn't be fair. You can imagine what he'd do with it."

"But, Roy," she said. "I really don't think you understand Mr. McDonald."

"No?"

"We had a long talk last night," Ginny said, and giggled. "I suppose all Hydetown knows how late the lights were burning at our house. It must have been three in the morning when I finally got to bed. You know, he's still sleeping!"

"I see," I said. "You've already told him, haven't you?"

"Told him what?"

"About Miss Hattie and the Governor."

Ginny lifted her head, and a quick sidewise movement of her head sent her honey-colored hair swinging along her shoulders. "Really, all we talked about was Clyde McDonald," she said. "He's a very interesting talker, Roy. He's been simply everywhere. You know, it must be pretty exciting to have the President of the United States call you by your first name."

"What the President calls Clyde McDonald is a matter of conjecture."

"You're simply biased, Roy," she said. "You ought to give Clyde a chance. After all, he's a man with a front seat at history. It's his duty to write about everything he sees and knows, and to get the real facts. It's his historical duty."

"My God," I said, "I hope he h convinced you that *you* have a histo duty, too."

"He hasn't convinced me of anyth Ginny said stiffly. "But I do under him. He doesn't have a happy life. ple—important people—are always his scalp. They're trying to silence and they can't. He has courage, You'll concede him that, at least."

"He has the courage of his own dices," I said. "And he's got brass.

"That shows how far wrong you Ginny said. "He isn't brassy at al pretends to be hard, because he h but it's just pretense, just a pose. I armor, Roy, and underneath it he and worried and unhappy."

THAT was a new slant on McD I thought, and her reaction dist me. Clyde had not won his repu for a way with blondes by a ser rebuffs. I was sure of that. On one Ginny was certainly correct; he good talker.

"Ginny, it's an act," I said. "He ing to soften you up and get that from you. Please don't answer any tions he asks you. Will you prom that?"

She stepped back and gave me look. "Why should I make yo promises, Roy?"

"I can give you lots of reasons," "Just give me a chance, Ginny. here, I'm going to have a busy da after the Governor's speech tonig be free. May I see you tonight?"

She hesitated, and before she co swer, Dr. Arnold came down the saying loudly; "What's this? Ladi afraid you'll all have to go. Mrs. W ton is critically ill."

The sound of women's voices living room ceased abruptly and was a movement toward the doo

"You haven't answered me, Gin

"Roy, I don't see how I can s tonight," she said, with a little "Mr. McDonald is our house gue I have an obligation. Don't you s

"No," I said. "I don't see."

"Besides, we already made a We're going dancing tonight out Route One Casino."

I put my hands on both her sh and pulled her toward me.

"Ginny," I said, "you're going ing with *me* tonight."

She did not draw back, and wh arms went around her, she did sist. She stood motionless, in fr lence, and I dropped my arms. Th looked up at me and smiled.

"I tell you what, Roy," she s can get another girl and we can a g the Casino. How is that?"

"Get another girl for whom?"

"Why, so it will be a foursome

"Yes," I said, "But who gets th girl?"

"What difference does that We'll all be together."

I looked into her eyes and sh "I'll get the other girl," I said Clyde. She's right here in the ho he knows her pretty well already

Her eyebrows drew together. that?"

ing, found John Mills and Dr. Arnold talking at the foot of the stairs. I approached them and said, "John, it's noon. I'd better do something about the Governor."

I put on my hat and coat and went out to the car. I drove on out of the driveway and turned toward town. Two blocks farther on I cut off toward the highway. There was practically no rain now, and the wind had dropped low in Beaufort's scale. I made good time, and turned off the highway at the tourist camp at a quarter past one. I drove through puddles to cabin nine, jumped out, and hurried to the door.

In daylight the cabin was even more desolate than it had seemed by night. The three beds were rumpled and the walls looked drab and streaky. But my stare was not that of a man appalled by terrible *décor;* my stare was that of a man appalled by the absence of Governor Warburton. I looked in the shower. I looked in the garage. I called his name softly, and received no response.

I ran back to the car, and saw the old man of the night before watching me from a cabin two doors along. He called, "Looking for your friend?"

"Yes."

"He took out a little while ago," the old man said. "Said he was going to town."

I sucked in my breath and said, "Was he alone?"

"Alone? Yeah, he was alone."

I GOT in the car and drove toward town. At the first filling station I turned in and used the telephone. John Mills answered and I cried, "John, the Governor's not here!"

"I know," he said. "You'll find him at the Elite Pool Parlor, Roy, down on Columbia Street."

"A pool parlor," I said. "John, what the hell!"

"He telephoned just after you left, Roy," John explained. "He said the old fellow at the tourist camp kept snooping around and he thought he'd better get out, so he went to town and got in out of the rain first place he found."

"But a pool parlor!" I said. "Is this a rib?"

"Ever try to lose yourself, Roy?" John asked. "The movies weren't open yet, and he was walking past that pool parlor and he figured nobody would look for the candidate for Vice-President in a pool hall, so in he went. They think he's a drummer, he said."

"He *will* be a drummer if this ever gets out," I said, and went back to the car. I drove slowly on, looking for Columbia Street. I found it without asking questions. I drove on past the Elite Pool Parlor and stopped fifty feet above it, then I walked back to get the Governor.

He was actually playing pool with the table attendant. Completely relaxed, he looked no more like a man who had gone a night without sleep than he did his party's nominee for the Vice-Presidency. His coat was off and his shirt sleeves were rolled up, and a cigar was clamped in the corner of his mouth as he made his shot.

The six ball dropped in the corner pocket and the Governor grinned, glanced at me, and chalked his cue. He was about to shoot again when I said sharply, "Listen here, we've got to be moving."

He shrugged, put away his cue, and paid. I waited in silence as he put on his coat, and I kept silent until we were in the car, then I said indignantly, "Governor, hanging out in a pool hall is bad enough, but damn it, you shouldn't have shucked off your coat and played. You need a nursemaid."

"You think so, Roy?" He grinned.

"We have time to kill," I said as I drove out of town. "We're due in Hydetown around five o'clock. Governor, Lucy's portable is still in the back seat. Let's park somewhere and do some work on your speech."

"Oh, yes," the Governor said, "that Birmingham speech."

A few miles outside town I turned off on a side road and parked near a highway bridge. The Governor outlined his thoughts to me and I made notes, and had roughed out some of them on my typewriter, sitting on the back seat with the machine balanced on my knees, when the Governor pointed out at a quarter to four that it was time we started for Hydetown.

THE radio men came early and set up microphones in the living room, where at seven thirty I was still at work at a desk by the window. I had more than half the Governor's speech written, but I knew there was not time to complete it, so I arranged the notes in sequence and carried it all up to Governor Warburton to look over.

I tiptoed past the sickroom, where Ruth Warburton still slept, and was approaching the Governor's door when I met Lucy Strawn in the hall. I called to her, "Lucy, you and I have a date tonight."

I saw her quick smile. "My, my, this is unexpected, Mr. Mason."

"It's in the line of duty," I said.

"Oh," said Lucy, grinning. "I should have known. What kind of date is it? You and me and a typewriter?"

"You and me and a couple of aspirins," I said. "We're going dancing with Clyde McDonald and Ginny Perkins."

"That should be fun," Lucy said.

"Your assignment is to take Clyde's attention off the local talent," I said.

Lucy raised her eyebrows. "So it's that way," she said. "Jealousy intrudes his jaundiced eye."

"It's nothing of the sort," I said. "I've got to keep Clyde away from Ginny until I can get her promise to keep quiet."

"So," said Lucy. "But why is it so difficult to keep Clyde away? Can't you take care of that little job yourself?"

"She has a date with Clyde tonight."

Lucy grinned without sympathy. "For you I should think she'd break it, Roy. I thought you had a little influence."

"I haven't got a front seat at history."

"A front seat at history?" Lucy said musingly. "So Mr. McDonald has made a big impression, has he?"

"She's just a kid from a small tow I said. "Naturally she's impressed."

"I'm from a small town myself," s Lucy. "But even in high school I wo have sized up Clyde McDonald."

I stared at her. "*You're* from a sn town?"

"Smaller than Hydetown, as a ma of fact." Lucy said. "I got out of th fast, and if you ask me, I think your li you-all friend has the same idea."

"But what's wrong with that?"

"There's nothing wrong with th said Lucy. "Except the way I did i went to the city and got myself an ho job."

"Well?" I said.

"Well," said Lucy, "I expect there lots of good jobs in Washington, d you?" Her grin broadened. "If know the right people, I mean."

"Ginny's not that type," I said, i tated. "She's not the opportunist ty

"Either she's that type," said Lucy, Mr. Mason is sadly deficient in app poor fellow, to yield the field to com tion like Clyde McDonald."

I grunted, and walked on to the C ernor's room. If Lucy were right, I what I was up against. It would no easy to prevent Ginny from telling C McDonald all she knew, if that infor tion had a market value. But I did believe that Lucy was right. Lucy spoken from personal bias. Because had been a small-town girl with i feet herself, she imputed similar mot to Ginny. The caustic, cynical opin one woman passes on about another erally make me impatient, but I c not altogether overlook what Lucy said, and I was disturbed.

I knocked on the Governor's door, his cheerful voice called, "Yes, ready."

The Governor opened the door. had shaved and changed his clothes. had had the forethought to cram an e suit into the Gladstone that had traveling with him about the country plane and John Mills's car.

"Roy," he said, "how is everyt shaping up?"

I said, "I think we got away wit Governor."

He glanced at his watch. "Suppos go down."

We found John Mills standing g at the front door. He beckoned t and said, "Roy, those reporters wa

watch the Governor make his speech. What do you think about it?"

"Keep them outside," I said.

"Now wait a minute," the Governor said. "Seems to me they've got a right to be here, Roy. They're covering this story."

John and I hurriedly carried chairs from the hall and from a room opposite that John called the music room. When we had arranged the chairs in the living room John went back to the door and let the reporters in.

There were half a dozen of them, and John pointed to the row of chairs as they filed into the house. Last in line was a tall, deaconish man who showed John a faint and rather sour smile. His rasping voice said, "Where's the Governor?"

I said quickly. "Only the press is allowed in, Mr. Fisher. I'm sorry."

MELVIN FISHER raised his thin eyebrows. "Only the press?" he said. "I'm the mayor of Hydetown, young man, come to pay my respects to Governor Warburton."

"After the broadcast, Mel," John Mills said. "Come back after the broadcast."

But a genial voice interrupted. "Why, if Mel wants to listen, I don't see why he can't." Governor Warburton came forward, smiling. "I guess I can stand it if Mel can. How are you, Mel?"

Fisher gingerly put out a hand and the Governor shook it. The mayor said, "Welcome home, Willie. I had a little speech I was going to make when I met you at the train tomorrow, but I haven't practiced it up yet." He showed his thin smile again. "Matter of fact, I want to talk to you about that. I'm wondering what the plans are for tomorrow." He added hastily, "We're all mighty upset about Ruth."

"We'll have to call the reception off, Mayor," I told him.

"Willie, it's pretty near time," John Mills warned. "Better get in to the microphone."

John led the Governor into the living room and I went into the music room and switched on the radio. I was afraid my own nervousness would show if I stayed in the living room, and would affect the Governor. Melvin Fisher followed me in, and said as I bent to the dial, "What I want to know is what to do with those two hundred and fifty straw hats."

"Straw hats?" I said.

"And sunbonnets," he said. "For the kids. We got all those straw hats and sunbonnets for the kids to wear in the parade."

I shrugged my shoulders and adjusted the radio dial. The program had already begun in Birmingham and a United States senator was introducing the Governor. I sat down to listen to the Governor's speech, and Melvin Fisher, giving me the look of a deacon dissatisfied with the collection, turned his back and crossed to the living room.

Through the open door I could see across the hall into the living room, where the Governor sat at a table with the manuscript in front of him. He looked sad and tired. I knew it was an expression that characteristically came on his face when he was waiting to speak and had drained his mind of thought until the signal came, but to the group of newspapermen, who were not familiar with his traits, he must have seemed a worried man.

When he started speaking the Governor's tone was low, and I saw the radio engineer fiddling with his dials, but as he warmed up, his voice gained power. I waited for the time when he would have to lay the manuscript aside and speak from notes. There had been so much on the Governor's mind the past forty-eight hours that I was afraid he would have trouble speaking extemporaneously, but I should have known the Governor better. He went on speaking from the notes without a pause.

He had ten minutes yet to go when I heard a knock on the front door. It sounded loud in the hushed house, and the radiomen turned their heads and frowned. I hurried to the door and opened it. Ginny Perkins stood at the sill, and Clyde McDonald's bulk loomed behind her.

I motioned them into the music room, and indicated chairs, but before he sat down Clyde said, "Roy it's too bad about Ruth Warburton. I met the lady at the convention and she's okay."

I met his small eyes; there seemed to be no gleam of cynicism in them.

"Why, thanks, Clyde," I said. He lighted a cigarette and dropped into a chair, and I looked down at him, wondering how much Ginny Perkins had to do with it, and how much of it I could believe. I sat down again and listened to the speech.

Lucy Strawn tiptoed downstairs before the Governor had finished, and appeared smiling at the door of the music room. She had been a busy girl in the hour since I had seen her in the hall, and her entrance was effective. Clyde McDonald rolled his head around to look at her, and Ginny's shoulders became noticeably more erect.

The radio drummed with applause from the faraway Birmingham meeting, and I got up and turned it off. I imagined that in Birmingham, Bill Evers breathed a sigh of relief, as I did. In the room across the hall the reporters were crowding in around the Governor, and I hastened over to run interference. But the Governor chose to remain and answer a few questions. His wife was doing well, he said, as well as could be expected. They were awaiting the crisis and he would remain at her bedside until it had passed.

I cut the questions short, saying, "It's been a hard day for the Governor, fellows. I think that's enough."

The reporters moved on to the door, which John Mills held open, but Melvin Fisher lingered, and approached the Governor diffidently. His rasping voice was pitched low, and sounded unnatural. "Willie, I'm right concerned about Ruth," he said. "If there's anything I can do, I wish you'd call on me."

"Thank you, Mel," the Governor said. "I will. Indeed I will."

Melvin Fisher smiled, gave the Governor's hand a disengaging shake, and turned away. John Mills let him out the door, then pushed it shut hard.

From the stair well a voice called, "John, have the reporters gone?"

"Yes, all gone, Agnes."

The Governor heaved a mighty sigh and said, "Well, that's over."

He grinned at me, and my answering grin froze on my face as a clear, singi voice came drifting down from the flo above.

"Will," it said, "come on up her You haven't even said hello."

I lifted my eyes and saw Ruth W burton there at the head of the stai standing in her pink negligee with o hand on the railing.

She was not aware, as I was in eve jumping nerve, that Clyde McDon was there in the house, sitting in the m sic room just across the hall. She thou that all the reporters were gone, and s did not see Clyde until Clyde's red he appeared under the hall chandelier a his sharp eyes turned staring toward t stairs.

Ginny Perkins cried, *"Why,* it's M *Warburton!"*

Lucy Strawn had the presence of mi to whirl on the stairs and call, "Son body telephone the doctor. She must delirious. Roy, call the doctor quick

"I'll do it," John Mills said.

Clyde McDonald stood with his f wide apart. "What's going on here?" said, and slowly turned to face the G ernor. There was a wise, malicious sm on his lips. "So she's got pneumonia, I she?" he said. "What's the gag?"

Governor Warburton acted with characteristic hard-hitting Warburton rectness. He hit hard and with excell direction and Clyde never saw the coming. Neither did I, until I hear solid blow and saw Clyde's heavy b topple backward in the hall.

I looked down at his slack face a said, "Governor, I guess that does it."

"It was worth it, Roy," said Gover Warburton grimly, but with a note uneasiness. "There's something to pu his column."

CLYDE McDONALD opened eyes and lay staring up at Gover Warburton, but he made no move to up from the floor. Lying so, he had composure of a man in control of eve he did not have the look of a man had been knocked down.

I caught the Governor's elbow urged him toward the stairs, whisper "Go on up, Governor. Let me ha this."

Governor Warburton strode on up stairs in grim silence, and I turned b to Clyde McDonald. He was sitting now, and Ginny Perkins had knelt be him. Her blue eyes were big and face was flushed with excitement.

Clyde looked at me and said, "Wh the matter with the guy? What di do that for?" His voice was aggrie

"The Governor's under a pretty to strain, Clyde," I said. "You know th

said solemnly. "He can't get away with hitting a member of the press."

"Well, you can't get away with making cracks when his wife is critically ill."

"I didn't make any cracks," he said indignantly. "All I said was, 'What's the gag?' Well, what *is* the gag?" He got ponderously to his feet. "I saw her up there, practically dancing a jig. She's not sick."

"She's plenty sick," I said. "She was obviously delirious and got out of bed."

Clyde grunted and fixed his wary eyes on me. "Roy, what the hell is going on here? You're not kidding me. She's no more sick than Ginny here."

"You can ask the doctor about that."

"You've got something there." His eyes brightened. "I'll get a medical opinion on it, all right."

"Dr. Arnold should be here in a few minutes."

"Who's he? The local vet?"

"He's the leading physician of Hyde County."

CLYDE grinned without humor. "Fine. The leading physician of Hyde County attends the wife of the candidate for Vice-President, stricken with double pneumonia. What's his name again, Dr. Pellagra?"

I said quickly, "The Governor's personal physician is on his way here. Meanwhile Dr. Arnold is doing all he can."

"Dr. Arnold really is a good doctor, Clyde," Ginny said. "Ask anybody."

It was the first time she had spoken since the Governor had knocked McDonald down, and we had both forgotten she was there. Clyde looked at her, put his hand on her shoulder, and said, "Honey, you're sweet. I bet he treated your measles, didn't he?"

"He cured them, too," Ginny said.

Clyde patted her shoulder, but spoke to me. "Roy, I know I'm not going to get anything out of you, and I'm not going to try. But I'm beginning to see the light. You can go up there and tell your candidate he won't get away with it. You can tell him I'm going to get the facts and I'm going to use them."

"The facts are that he's a man with a sick wife," I said. "And you'd better be damned careful what you say."

"I've got a lawyer," said Clyde. "I'll listen to *his* advice on that, not yours." He took Ginny's arm. "Come on, honey. Let's go dancing."

Ginny gave me a smile at the door and called, "See you later, won't we, Roy?"

"No," said Clyde, "we won't."

"You'll see me, Ginny," I said.

For an instant Clyde and I met each other's eyes, and there was a mocking smile on his lips as he backed out the door and shut it.

I hurried up the stairs, and found a dejected group assembled in Ruth Warburton's room. She was back in bed, nervously smoking a cigarette, and when I entered there was an abrupt silence in the room. Everyone looked at me.

"He's gone," I said.

Ruth Warburton sighed. "Roy, I feel terrible. I thought they'd *all* gone."

"You think it's bad, do you, Roy?" the Governor asked. He sat down on the window seat, and he looked gloomy. "I'm ashamed of myself. The saying goes that the man who strikes the first blow has lost the argument. I guess I deserve what's coming to me."

"Clyde McDonald has been socked before," I said. "He glories in a martyr role. Governor, I'm afraid we're behind the eight ball."

The Governor winced. "Yes, it looks bad, but what do you suppose Clyde will do? As I look at it, I don't believe there's much he can do. What can he put his finger on? Where are his facts?"

"He never had much use for facts," I said. "Facts to him are what dough is to a pretzel bender."

The Governor got to his feet. "But see here, Roy, even though he did see Ruth on the stairs, and even if he c suspect what's going on, he has no pr He has nothing to go on, besides tha tell you, we're climbing molehills aga

"I think so, too, Willie," John said.

I shook my head. "There's plent worry about. Clyde McDonald is from stupid. He has the imaginatio figure the whole thing out, and prob he already has. All he needs is the p and I'm afraid he can get it."

The Governor's eyes darkened. "W do you mean, Roy?"

"All he needs is a foundation," I "He can build the structure on that, cal McDonald-style architecture. foundation is that sheepskin coat s If he gets that out of Ginny Perkins build his story on it."

John Mills frowned. "You mea tell me Ginny knows that story?"

"That's it."

He shook his head dolefully. "" she'll tell. If there's anything in it fo she'll tell. But what's in it for her?"

"A little trip to Washington," said. "Maybe a mink coat."

"I don't agree," I said. "I think y got Ginny wrong. I suppose a litt tention from a man like Clyde Mc ald may turn her head temporarily I think to appeal to her on materi grounds is a mistake."

"Roy," Lucy said, "someday find out that women are just born terialistic."

"At any rate, we're not resorti

bribery," the Governor put in. situation is questionable enough as

"She'll tell," John said. "If there thing in it for her, she'll tell."

"But wait," Lucy interrupted. "G nor, maybe we can't bribe her, but right to red-apple her a little, isn't it serve up our nicest, reddest apple

The Governor said, "Meaning

"Precisely," she said. "Govern have a date to go dancing tonigh Clyde and Ginny, and we had a planned for Roy to give the little big rush. I think that's our best ch

Ruth Warburton inspected m said, "Why not? Roy, you're an t tive man, you can do it."

"Roy," said Lucy, "are you pr to make the sacrifice?"

I scowled and said in a voice with irritation, "What am I suppo do, marry the girl?"

"The point is," Lucy explaine girl wants to get out of Hydeto isn't a question of a kiss. There's be more than that."

"Now, Lucy—" Governor War began.

"I mean something to get her out town," Lucy said, and blushed. "G Governor, if you're elected you give her a job in Washington, c you? That wouldn't be bribery?"

"I can always find a job for a fr Roy's," the Governor said.

"Then, Roy, we've got work Lucy cried. "Distasteful as it is. on."

"Roy," the Governor said, " don't want to—"

"I never had an assignment I li ter, Governor," I said, and wal of the room.

As we drove away Lucy said, where this place is, Roy?"

"Of course," I snapped. I had

to ask, but was obstinate enough not idmit it. Its name was a clue, so I ve out of town on the main highway, he direction the car was headed. We eled two miles, and saw neon lights he roadside spelling out Route One ino. I turned into the parking lot before we got out I briefed Lucy.

Your job is to concentrate on Clyde," d her. "Keep him busy. Dance with . Keep close to him. Make yourself bnoxious as possible."

Meaning that should be easy?" she

he casino was crowded, although it a weekday night. Apparently the ob- ance of Warburton Day had already n in Hyde County. The Casino was ke-box joint, with booths along the and space for dancing in the center, tonight the juke box was silent and pectral colors did not flow. Instead rchestra billed as the Piedmont Sex- was playing something that sounded black-eyed peas shaken in a shoe box e the noise in the casino. The in- r décor was by courtesy of a local painter whose motif was *Try Our B-Q.*

WE FOUND Clyde and Ginny in a remote wall booth, and the greet- received from Clyde was hardly a ing at all, although his eyes ap- ed of Lucy. He was sitting beside y, drinking beer, and he made no to rise. The bench opposite was cupied, and Lucy and I sat down.

oy," Clyde said. "I've been think- 's peculiar the way you keep pop- up. You were in Hydetown last when I got here, and this morning howed up on that train with Ruth urton, Ginny tells me. How do you "

hen it's a hundred and five now," said. "That's pretty high."

es," I said. "A hundred and five."

, quit kidding," Clyde said. His was flushed, and in another man I have thought the cause was a sense me at his behavior. He pointed a at me and said, "He won't get away itting a member of the press."

hy don't we forget all that?" Ginny s said softly. "Let's have fun. e friends."

de fingered his left eye. He glanced ny and she said, "No. I don't see ng yet. Don't worry about it."

"I'm getting a mouse, though," he said. "I can feel it. Let me have your compact, Ginny." He took it from her and held the mirror up to his eye. "It's beginning to swell," he said morosely. "Right here by the nose. See, Ginny. I'm going to have a mouse."

She put her hand on his and said tenderly, "Sweetie, don't worry about it."

"Clyde, Ginny's right," I said. "Let's forget it. Let's have a drink."

"A drink?" he said. "This damned county is dry, except for beer."

"They serve setups," Ginny said. "But you have to bring your own bottle."

"There must be some place in Hydetown we can get a bottle," I said.

"Yes, I know a place," Ginny said.

"Then suppose I get one," I said. "How about coming with me and showing me where to go?"

"All right," Ginny said, and Lucy gave me an approving glance. But as Ginny started to her feet Clyde said, "Not so fast. You're horning in a little bit, aren't you, Roy?"

"I don't think so."

"*I* think so." He sent the words sliding out of the corner of his mouth in the tough-guy way of talking he affected. "Ginny's *my* date."

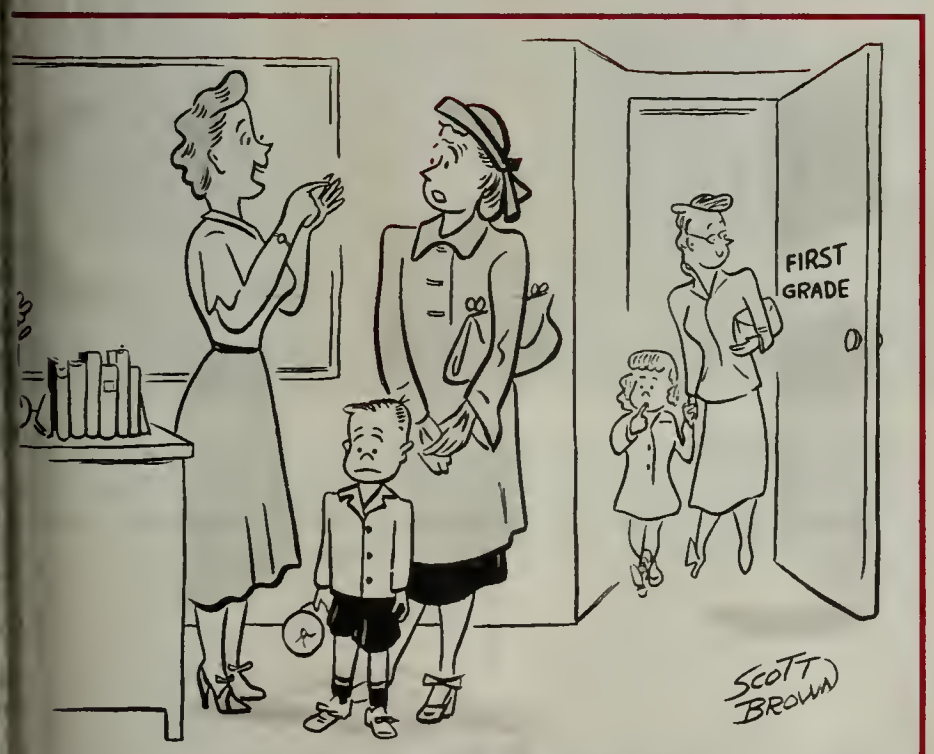
"Oh, Lord!" Lucy said. "Let's *all* go."

Clyde looked across at me, suddenly shrugged. "Oh, all right. You and Ginny go, Roy. But hurry back." He gave me a one-sided grin. "I'm in a pretty lousy mood tonight. I don't get clipped by a potential Vice-President every day." He put his palms on the table and pushed himself to his feet. "And I don't like it," he said.

Abruptly he walked away, and when I turned to stare after him I saw a thin, deaconish man waiting at the door, Melvin Fisher, the mayor of Hydetown, and the Governor's old enemy.

"So," Lucy said, "the clan gathers. Or should it be Klan with a capital K?"

"Lucy, we'll be right back," I told her.



I ignored her wink and took Ginny's arm. As we passed through the door I saw Clyde standing by a telephone booth with Melvin Fisher. The mayor's thin lips parted in a sour smile when my eyes met his, but he did not speak. Ginny called out, "Hello, Mel," and waved her hand as we went on out.

In the car on the way to town I asked, "Why the big conference with Melvin Fisher, do you suppose?"

"How should I know?"

"You know so much," I said.

Ginny smiled. "Well, I can guess;

"Here we stress citizenship, work and health habits, good sportsmanship, social traits, emotional control, honesty, co-operation, cheerfulness, attitude, dependability, and safety rules. If you want him to learn reading and writing, you'll have to teach him yourself at home"

SCOTT BROWN

I've discovered the longer, finer cigarette

PALL MALL

Good to look at . .

good to feel . . .

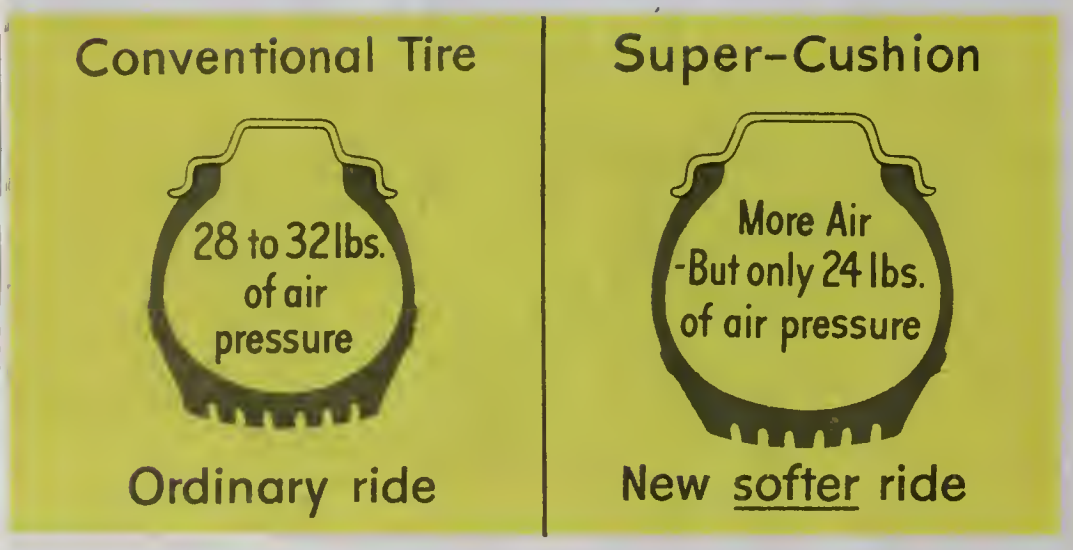
good to taste . . .

and good to smoke.

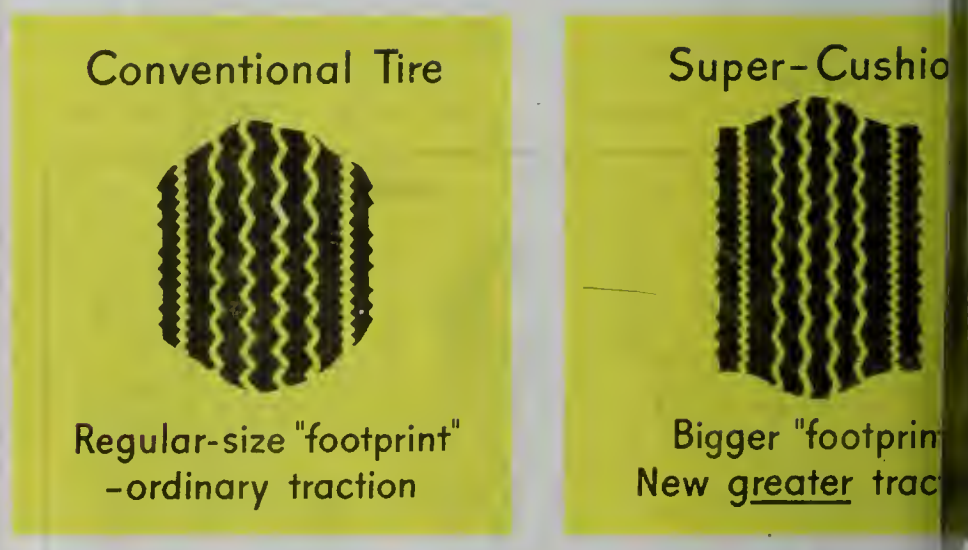
PALL MALL's greater length of traditionally fine tobaccos *filters the smoke on the way to your throat*—gives you that smoothness, mildness and satisfaction that no other cigarette offers you.

PALL MALL—the *longer, finer* cigarette in the distinguished red package.

OUTSTANDING



—and they are mild!



R. W. WELLS, office manager, Richmond, Va.: "I've driven thousands of miles since I switched to Super-Cushions, and I can tell you they improve the riding qualities of your car tremendously. And I know that the reduction of vibration will mean a great saving on maintenance costs in the life of any car. Also, Super-Cushions hug the road so well that it's safer to drive on turns or at higher speeds."

MRS. S. C. MCELHANEY, housewife, Phoenix, Ariz.: "Our new car c equipped with Super-Cushions, and it's a new type of driving to n paint as a hobby, and often drive over the desert completely off the r That's when these soft tires are most noticeable—the ride is smooth over rocks and dry washes! And on the highway, your car stops so e and quickly that you feel ever so much safer."

Softer Ride! The Super-Cushion is bigger and softer. *It runs on only 24 pounds of air!* It soaks up road shock, jolts, jars, and vibrations. This means you get a wonderfully smoother, *softer* ride. It also means less wear on your car, fewer rattles, fewer repair bills!

Remarkable Safety! The Super-Cushion has a larger contact area the road. So you get a new ease and stability in car handling. You ca seems to *hug* the road, to *flow* through traffic, to *float* around cu And you get quicker, safer stops—in all kinds of weather!

Super-Cushion T. M.—The Goodyear Tire & Rubber Company

More Mileage! Super-Cushions will not only modernize your car's road performance—*they also consistently average more mileage than the best standard tires!* They'll fit the wheels on your present car—so see your Goodyear dealer NOW!

1898 GOODYEAR 50 ANNIVERSARY 1948

MILLIONS OF SUPER-CUSHIONS ARE NOW IN USE ON NEW AND OLDER CARS

A. MONTZ, JR., farmer, La Place, La.: "My car is a 1939 model. I've had Super-Cushions on it ever since last year, and they certainly have made a great improvement in the way it rides and handles. Even on rough washboard roads, it rides smoothly, and most of the rattles have been taken out of the car. Steering is easier on the highway, too, because these Super-Cushions don't bounce over bumps."

THE GREATEST NAME IN RUBBER

by GOODYEAR

you see, Clyde doesn't think Mrs. Warburton is sick at all."

"So I gathered," I said cautiously.

"But why in the world should she pretend?" Ginny asked.

"She's not pretending," I said. "She never felt worse in her life."

"Make a right turn here," Ginny said. "Stop at that filling station up ahead."

I pulled up to the gas pump and Ginny called to the attendant, "Tom, will you fix my friend up?"

"You bet, Ginny."

WITH two pint bottles on the seat between us, I drove slowly back to the highway, where the traffic light was red, and stopped. I turned to Ginny. "Why don't we go somewhere else?"

She studied my face. "You mean not back to the casino?"

"They'll be happy together," I said. "There must be some place else we can go."

"No, definitely we must go back," she said. "We have the liquor, for one thing."

"We can give one pint to a waiter to take to them, and we can keep the other," I said. "How about it, Ginny? We haven't seen much of each other. Let's go someplace where we can talk."

"There's simply no other place to go," she said firmly. "The light's green, Roy. Go on."

I turned back onto U.S. 1, toward the glow of neon lights, bright in the autumn night. As I drove slowly toward the casino she said softly, "I'm sorry, Roy. I'd love to go off with you somewhere, but you know I can't. I have a date with Clyde."

"Clyde's happy," I said. "He has Lucy."

She said thoughtfully. "She's very pretty."

"Yes," I said.

"Her clothes cost a lot," Ginny added. "She must get a big salary."

I let that pass. I could not tell her that Lucy's dress belonged to Ruth Warburton's expensive wardrobe; it would seem a little ghoulish to Ginny for Lucy to be wearing Ruth's dress. I nosed the car into the parking area, and as she started to open the door I put my hand on her shoulder and said, "Wait a minute."

She met my eyes for an instant. "They'll be waiting for us, Roy."

"But I want to talk to you. It's important."

She hesitated, "Yes?"

My hand caressed her shoulder, "Ginny, you've been worrying me."

"Why should I worry you, Roy?"

"Bothering me, too," I said.

She smiled faintly, and made no move to get out of the car. I leaned forward and tried to kiss her, but there was only a brushing of our lips as she drew back and whispered, "I thought you wanted to talk."

"Ginny," I said. "I want to get you out of Hydetown."

Her blue eyes opened wide. "What an odd way to put it, Roy! What do you mean by that?"

"I mean you shouldn't be shut up in a little town like this," I said. "You ought to get out and see something of the world, and the world ought to see something of you."

"All right," said Ginny. "But how?"

"I thought you might like a good job in Washington," I said, watching her expression.

"Oh," she said, and her face told me nothing. "A job."

"In Washington," I said. "A responsible job with the Vice-President of the United States. If the Governor is elected I can get it for you, Ginny. I've already asked him about it."

"Yes," she said in a practical tone, "but do you think he'll be elected?"

"Don't you?"

"I don't follow politics much, Roy." She moved her shoulders slightly. "But Clyde says he hasn't much chance."

GEORGE PRICE

Patrons will soon be able to paddle into Maple Cove, in the Charles River, and sit in their canoes while viewing the latest movie.—News Item.

TAKE A LETTER

Canoe-In Theater,
Waltham, Mass.

Dear Sir:

I've had several unfortunate experiences in theaters but nothing compared to the seasick evening my girl friend and I spent last night at your aquatic movie palace.

Key Largo may be a swell picture on dry land but not when you're battling wind and tide and paddling like a Comanche Indian to keep from being swept out through the foyer into Boston Harbor.

It's a little tough, my friend, to keep a canoe in line while a couple of middle-aged women in a rowboat hold up the works by tying up at the cashier's window to inquire what time the main feature goes on and can they have two in the loges without whitecaps. For two cents I'd have dumped them both into that coal barge outbound for Nova Scotia. Anyway, we finally followed a motorboat in during the newsreel and were all nicely anchored for Humphrey Bogart and Lauren Bacall when, without warning, a sailboat put about in the lobby and, with no more than a "hard-a-lee" from the skipper, rammed us amidships and knocked my girl overboard. A thoughtful usher threw her a life preserver, but by the time I had hauled her half drowned over the gunwale we found ourselves under a lobster wharf half a mile down the river.

We finally got back to Key Largo on the flood tide in time to see Claire Trevor make with her night-club routine, but whatever dialogue wasn't killed by the chattering of Mildred's teeth and the popping of outboard motors was drowned out by the cluck in the next aisle grappling for soft shell clams.

I used to think that women's hats were tough to see through until I tried to see a movie screen through the spinnaker of a catboat.

Having tried to bail out a canoe with a tin can, follow the antics of Edward G. Robinson and wring out a girl's blouse, all at the same time, you'll know what I mean when I say your nautical movie theater just can't last. Not with me in it, it can't.

Yours truly,
Jack Cluett

"Clyde said the same thing abou Roosevelt, Ginny," I said.

"Did he?" Said Ginny. "What kind o job, Roy?"

"Secretary to the Governor."

"But I don't know shorthand."

"Can you type?"

"Yes. I learned in high school. B I'm pretty rusty." She gave me a quic glance. "Isn't Miss Strawn the Gove nor's secretary?"

"He has several secretaries," I sai "A press secretary, a personal secretar I'm sort of a secretary myself."

"We'd be working in the same offic then?" She smiled at me.

"We can do the town, you and I," said, and took her hand.

"I have to think it over, Roy," s said. "After all, how much would t Governor pay me?"

I said the first figure that came into m head. "Ninety dollars a week."

Her eyebrows went up. "That's pret good for a secretary who can only typ isn't it?"

"It's confidential work, Ginny," I e plained. "In Washington a man has to careful, and his employees must be di creet. But I told the Governor we cou depend on you. I told him you kn when to keep quiet."

"So I'd be paid so much for typing said Ginny, "and so much for bei quiet. Is that it?"

"In a way, yes," I said. "What's yo answer."

"It would be fine, Roy. Provided h elected."

"Ginny, there's one thing more."

"Yes?"

"Naturally I can get you the job o if the Governor is elected, and only nothing is done to hinder his electi You see what I mean?"

"Oh, yes, I see what you mean. I t you I'd think it over."

"Ginny, I want more than that. J tell me now that you'll keep your mou shut, and everything is set."

Smiling, she reached out and patt my hand. "Roy," she murmured, "y *worry* so much."

SHE slipped out of the car and start away. I picked up one of the pi and shoved it under my coat befor followed, but I caught her before reached the circle of light at the trance.

"I think you try to worry me," I t her. "You seem to get a kick out of

She giggled and said, "Of course I d This time when I tried to kiss her she not resist, but the concealed bottle w between us, which gave her cause for other giggle, and headlights of a car tering the parking area flicked across faces, which gave her cause to br away and whisper, "Come on, let's liver the bottled goods."

I felt relieved. Hand in hand we turned to the casino, and I thought w content that everything was all ri again. The Governor was safe and th was nothing Clyde could do now. L Strawn and Clyde were dancing.

I signaled a waiter and ordered set and was opening the bottle when L and Clyde returned from the dance fl Clyde sat down opposite Ginny pushed his face across the table tow her. "See," he said. "I *have* got a mou

"Sweetie, it's such a little one," Gi said soothingly. "It hardly shows."

"Warburton's going to pay for Roy," Clyde said.

"Forget it, Clyde, forget it," said L Strawn. "Let's all have a drink."

I poured whisky in the setups an soon as possible I asked Lucy to da I told her that everything was set that I was sure Ginny would take the that I could guarantee Ginny would silent. The kiss, I felt, had been a pror

Lucy said, "Clyde is up to someth Roy. I don't know what it is, but he rowed all my change and made a l

"DIAPERS! 28,470 of them!"

Some interesting arithmetic from Mrs. J. L. Granquist of Seattle—and some news about the only washer in the world that even puts in its own soap!

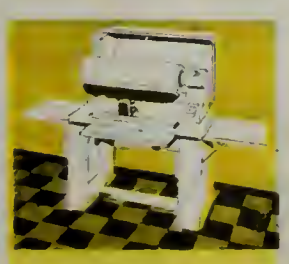
"Just for fun I figured it out...6½ years ...4 bouncing babies...at least 12 diapers a day! Altogether that's 28,470 diapers! How on earth could I have managed without my wonderful Bendix! And all the rest of the family wash, too...blankets, curtains, pillows, scatter rugs, even my good down quilts. It did all the work without me — and saved my time and energy for the children. I've been reading about the newest Bendix Washer and this I want to see! But, mostly, my heart is set on a Bendix automatic Dryer, and I can hardly wait!"

Mrs. J. L. Granquist

Only the "almost human" Bendix has the amazing automatic soap injector that puts in the exact amount of soap.

All you do is set the dials once. The Bendix *soaps*, *soaks*, washes, rinses and damp-drys the clothes all by itself. You needn't go back till the washing is done.

Save up to $110. You can buy a Bendix for as little as $199.95. Just a few dollars more than an old-fashioned, hard-work washer! Big savings on soap and water, too.



It's the world's most popular washer . . . used by more women . . . wanted by more women . . . voted best washer by more women than any other. It's the only automatic washer backed by 11 years of trouble-free, work-saving service!

See a demonstration at your nearby authorized Bendix Dealer's store. Choose the model that suits your home and pocketbook best! Bendix Home Appliances, Inc., South Bend 24, Indiana.

Models S-101 and B-201 are also manufactured in Canada and Mexico.

x automatic Dryer ends her worries. Clothes fluffy-dry in minutes.

Bendix automatic Ironer has many features not found in other ironers.

BENDIX automatic Washer

NEW BENDIX GYRAMATIC . . . doesn't have to be fastened down.

distance call. He was in the booth a long time, and when he came out he looked very satisfied."

"Clyde doesn't worry me any more," I said. "The hell with Clyde."

Lucy gave me a speculative glance that traveled over my face like a beam of light, but she said nothing more. Back in the booth we had another drink.

WHEN the sextet took a break Lucy and Ginny met each other's eyes, reached for their handbags, and with the remarkable telepathy of women in a public place, got to their feet without a word and started for the powder room. Clyde slouched back in his seat and his big hand went around his glass.

"That little country dumpling is quite a dish," he said. "You noticed that, Roy?"

"Yes, I noticed it."

"But she's hard to figure out," he said. "Some girls are born with know-how, and she's one of them. I'm wondering what you did to button her up."

"Button her up?" I said.

"Oh, let's come clean." His glance was baleful. "You know what's going on, and so do I. You've been working overtime on that kid, and don't think I don't know it."

I shrugged and said, "I don't follow you, Clyde."

He grinned. "You wouldn't even admit November second was Election Day, would you? But you know what I'm talking about, and you know why I'm in Hydetown, and I know why *you're* in Hydetown." His eyes gave me a sharp scrutiny. "It's why Governor Warburton is here, too."

"The Governor is here for the big celebration."

"A day ahead of schedule," Clyde said dryly.

"Pneumonia wasn't on the schedule," I said.

"Oh, don't give me that!"

"And to tell you the truth," I added. "I *don't* know what you're getting at. I've wondered all along why you attached yourself to the Governor's campaign. I understand Melvin Fisher sent for you."

"In a manner of speaking," he said, and picked up his glass. "You know damned well who sent for me, Roy. It was our little village belle."

I had not known it. I had only known that the telegram Clyde received had been signed by Melvin Fisher. But Ginny must have told Fisher that Miss Hattie had a story to tell.

"You got here ahead of me," Clyde went on. "You slipped in here and buttoned her up."

I shrugged, picked up the bottle and replenished our drinks.

"You know, pal, I've got this thing figured out," he said. "You want to know how I've got it figured out?"

"Not particularly," I said.

"Mrs. Warburton tipped me off," he went on. "Why should she fake pneumonia? That's what I wanted to know. Why? To get the Governor in Hydetown a day ahead of schedule. That's why. And why should he get here a day ahead of schedule? Because he was already here, that's why. And why was he already here—"

The girls returned then, and Lucy said, "Oh, let your eye alone, Clyde. It looks all right."

I was already on my feet, saying to Ginny, "How about a dance?" She put down her handbag and we moved to the dance floor. The sextet was vigorously at work and the music was loud. I put my lips close to her ear and whispered, "So it was you who sent for Clyde McDonald?"

She drew her head quickly back. "Oh, no, Roy, it wasn't."

"Clyde thinks it was."

"It was Mel Fisher," Ginny said. "Oh, I suppose in a way I was responsible. I happened to mention to him that Miss Hattie was so mad at the Governor she was planning to tell something pretty terrible about him, and the first thing I knew Mel called me up and told me Clyde was coming to Hydetown."

"But you arranged for Clyde to stay at your house and talk to Miss Hattie."

"No, that was Mel, too. It was his idea." She smiled at me. "But anyhow, Aunt Hattie changed her mind, and Clyde was furious. Have you ever seen a fat man mad, Roy?" She whistled softly. "He was mad at me, too, because I said it was up to Aunt Hattie to tell him, not me."

When the music stopped I felt that a reminder was necessary and said, "Ginny, we're going to have lots of fun in Washington."

"I'm looking forward to it, Roy." Her hand squeezed mine.

I felt that everything was under control, and back at the table I called the waiter and ordered more setups. He had hardly left the table when Ginny said in an unaffected, conversational tone, "Clyde, where's a good place to live in Washington?"

My mouth dropped open. It was a thunderbolt. Clyde said, "There's no place to live in Washington." Then he sat up straight. "Who's going to live in Washington? Not Roy. Not Governor Warburton."

"Oh, yes we are," I said.

"I am, too," Ginny said.

The Piedmont Sextet had resumed its work, and I jumped to my feet. "Ginny, let's dance."

"Not this time," Clyde cried. "She's *my* date." He said it with determination, and got up from his seat in a surge that nearly lost him his balance. He took a firm hold on Ginny's wrist, and his eyes gleamed with a bright light.

I met Ginny's mischievous eyes. She had done it deliberately, I was sure, and her faint, sly smile was confirmation. Clyde asked, "What's this about your going to Washington, Ginny?"

"Isn't it exciting?" Ginny smiled innocently at me. "Roy promised to get me a job."

"Oh, did he?" Clyde scowled at me. "Ginny, I didn't know you wanted a job. I can get you a better job than he can."

"Not with the Vice-President of the United States," I said. I was angry. Ginny had put the whole thing on the auction block and was encouraging bids; that was the only explanation.

Clyde pulled her toward the dan floor, but I caught her other wrist a said, "Ginny, stay here. You can't tr this guy. You can't believe anything says."

Clyde's meaty hand pushed at me a I looked into his angry, squinted ey He gave me a shove and my grip was to loose from Ginny's arm. I reacted Governor Warburton had, almost by flex. I took a step backward with right foot to regain my balance, then took a step forward with my left foot a let fly with my left in a wild haymak that caught Clyde on the forehead. also caught him off balance. He st gered back, struck against a chair, a fell.

I was as surprised as Clyde, I sto staring down at him, and I was not p ticularly angry. In fact, I felt like lau ing as he lay on the floor, for the seco time that night, as he sat up and look at me, blinking his eyes. I felt like lau ing, and I did laugh when Lucy sa "Clyde, now you've got mice, you ra

Lucy asked, "Public Strikes Back at Clyde McDonald. How's that?"

"I'm trying to find out what started it all," the Ego man said. "It was a very pretty thing, and I enjoyed it. But why?"

"A dispute over the check," Lucy said.

I got Lucy into the car. "It was a private quarrel," I told him. "That's all. We just don't like each other, politically or personally. But say, may I have a print of that picture?"

"Sure, if you want it."

As I drove away Lucy asked, "A souvenir?"

"More than that," I said. "If Clyde prints in his column that the Governor took a poke at him, I'll produce the print and say it was *me* hit him, not the Governor. It's our protection."

"Very good," Lucy said. "Very good on that point. But otherwise, Roy, everything looks particularly snafu to me."

"You're right," I said glumly. "She's no good. You were right about her."

"She's not too bad, Roy," Lucy said softly. "She's simply not the ideal you made of her, that's all. I had a chat with her in the powder room. She was pretty excited about going to Washington, and she was somewhat excited about you, too." She chuckled. "For that matter, she's also in a dither about Clyde McDonald."

I DROVE in under the porte-cochere of the Mills house, carried the remaining pint bottle in and put it on a table in the hall. It was a silent house. Only one light was burning downstairs, in the hall, and as we came under it Lucy looked at me and said with distaste, "You've had lipstick smeared all over your face all evening."

"Why didn't you tell me before?" I pulled out my handkerchief and dabbed at my mouth.

Her eyes were partly closed and there was a little curl of her full lips, the sarcastic twist that was so familiar. I felt again the surge of irritation that Lucy stimulated in me so often. She had that cocksure, confident, superior look about her, and the drooping of her lips and eyelids accentuated it.

It had never occurred to me before to kiss Lucy Strawn, but the depression and irritation and frustration I felt fused in an emotional impulse and I grabbed her rather roughly and tried to kiss her. Her palms shoved hard against my chest and her sharp voice said, "Stop it, Roy!"

I stopped, let my hands fall to my sides, and said, "I'm sorry, Lucy. When I get mad I seem to want to kiss somebody. I don't know why."

She gave me a level look and said, "I may be girlish, but I don't like to be kissed by a man who doesn't know why."

"I didn't mean that, exactly," I said.

"Nor do I like being kissed in anger."

"I'm not angry at you, Lucy," I said. "I'm just angry." I shrugged. "At women, I guess. All women."

"Just don't take out your little disappointments on me, Roy," she said firmly. "And don't be so sickeningly sophomoric about it."

"Sophomoric!" I was stung.

"What else?" said Lucy. "Angry at women. It's like being angry at the theory of relativity. You don't know anything about either one. The truth is you're angry at just one woman."

"All right," I said. "I admit it. I'm angry at just one woman."

"Then don't take it out on me."

I looked at her flushed face, and grinned, and pointed at the bottle. "So let's have a drink," I said.

"All right," said Lucy.

We found our way to the pantry of the old house, where the tap dripped water in a copper sink, and I chopped ice and washed it while Lucy found two glasses in a cupboard. We stood in the pantry, under the overhead light, to drink them, smoking cigarettes and flicking the ashes into the copper sink.

"I suppose I'm principally angry at myself," I said by way of making amends. "If I hadn't written that damned campaign biography we wouldn't be in this mess. It all comes back to me."

"Nobody blames you, Roy," she said.

"I blame myself," I said, and finished my drink. "I don't suppose we ought to wake up the Governor for any more bad news. He needs a good night's sleep."

"Yes," she said, and sighed wearily.

"Let him sleep. For that matter, I'm pretty shot myself. The last bed I was in I didn't even have time to rumple the covers."

She washed the glasses and put them away, and I switched out the light. As we returned to the hall I said, "We're friends again, aren't we?"

"Oh, naturally," she said. "I'll keep on listening to your troubles, same as ever."

"I'm sorry if I inflict my troubles on you, Lucy," I said, feeling tense and again.

She turned on the stairs, a step above me, and her face was level with mine. "Forget I said that, Roy," she said. "I didn't mean it that way. But it's been a depressing day. Here I was, dressed up like a million, and mostly I sat alone while you and Clyde chased around after a blonde."

"We both had a job to do," I reminded her.

"I know. You're right. You're entirely right." She smiled. "Just forget I said that, Roy. I'm a little angry myself, tonight."

Her palm touched my cheek lightly, then she bent toward me and her lips met mine. It was a warm, tender, friendly kiss, casually bestowed. Or so it seemed. And it was casual, for the moment it took me to absorb its impact and realize then it wasn't casual in the least. Her body came altogether off the steps and her arms were tight around my neck. I heard her whisper, "Roy," very softly, and it was not the familiar voice of Lucy Strawn, and it was not the Lucy Strawn I knew who lay warmly in my arms. I wasn't if I thought of anything at all I thought. Why in God's name had I never kissed Lucy Strawn before?

"Roy," she whispered. "Put me down, Roy!"

I held her more tightly, said, "I'll never put you down, Lucy."

Her whisper was urgent. "Put me down, Roy! There's somebody there!"

(To be concluded next week)

Beginning next week . . .

MARRIAGE '48

A new serial by

VERA CASPARY

One bright California morning three brides were married at the Little Church in the Vale. At first Lilith was too wise, Helen was too eager, and Carol was too naïve. Together they proved the vital statistic: One marriage out of every three ends in divorce within a year.

RECORD BY LOMBARDO

b is impossible for any man, or any oup of men, who base their opinions personal observation.

But the movie camera—the imperal, infallible observer—sees every portant game and every outstanding ayer. That's why Collier's—the originator of the All-America team—will use movie camera in pioneering a comtely modern technique for selecting its 48 All-America team.

Collier's All-America Board of the tion's top college coaches—Matty Bell Southern Methodist, Bernie Bierman Minnesota, Wally Butts of Georgia, f Cravath of Southern California, nk Leahy of Notre Dame and Lou tle of Columbia—will meet periodily. They will *evaluate* the Allerica candidates on the basis of filmed npetitive action. Then they will *com-e* the leading candidates.

Comparison is the unique advantage ich Collier's newsreel technique holds r all other selection methods. Last r, there was controversy over the sing merits of Johnny Lujack, Chuck nerly and Bobby Layne. Middle st experts (who hadn't seen Layne or nerly) voted for Lujack. Southern exts (who hadn't seen Lujack or Layne) ed for Conerly. And so on.

n similar controversial situations this r, Collier's board will pick the Allerica after studying impartial camera lence on every candidate. The board study play-by-play camera action ts prepared by Warner Pathé News official game films submitted by the ous colleges.

ollier's newsreel studies will elimi- many injustices. In the past, great ers have been overlooked because were on weak teams. Football exs (and newspaper headlines) follow ng teams. Probably Bulldog Turner e greatest of contemporary centers—e best example of what happens to ws who lack press clippings. Noy ever heard of Bulldog at Hardinmons. He was discovered by a ago Bear scout.

e Collier's board will have no diffi- recognizing the Bulldog Turners of . Conversely, camera studies will se those bogus All-Americas ocnally manufactured by the mimeoh magic of press agents and the erance of radio reporters.

ter 60 years, Collier's original All-rica is the only modern All-America.

FIGHTER BUILDER

Pinkie George of Des Moines is frank in talking about his fight promotions. "You can take a washed-up fighter and put him in the money without too much trouble," Pinkie admits. "Of course, you've got to take short cuts and avoid the guys who might hurt your boy. I know one thing—the fighters with the most ability don't always reach the top."

Ask for proof, and Pinkie recites the saga of Lee Savold. "I was sitting in a St. Paul saloon and I pointed to the bartender. 'Look at that guy,' I said, 'fat as lard. Bet I could have him fighting in Madison Square Garden in a year.'

"Couple of days later, that barkeep came to Des Moines. Said his name was Savoldi and that I had said I'd manage him. Well, I never said it, but I took a chance. I got the guy in shape, changed his name to Savold to attract the Norwegian trade, and introduced him to the proper opponents. Nine months later, he was fighting Billy Conn in the Garden."

Pinkie also rehabilitated Johnny Pacek, the Chicago heavyweight who retired in 1936 after winning only 14 fights in three years. Pinkie moved Pacek to Des Moines, put him to work as a bell hop, and looked around for acquiescent opponents. Under the name of Paychek, he won 25 straight fights—18 by knockouts—and eventually challenged Joe Louis for almost two rounds.

Moral: Most fighters aren't born. They're invented. Remember Carnera?

HICKMAN AND THE SEVEN DWARFS

Notre Dame had Seven Mules. Fordham had Seven Blocks of Granite. Now Yale has Seven Dwarfs. Herman Hickman, new coach of the Old Blues, incorporated his 1948 line under this picturesque diminutive during spring practice. Recently, there have been other hints that Yale may be short on muscle.

The strongest hint came when Herman took the Yale football staff to an East Stroudsburg, Pennsylvania, football clinic. At the banquet that climaxed the meeting, the toastmaster called upon Marvin (Preacher) Franklin, Yale's end coach, for the invocation. Franklin, an ordained minister, concluded the invocation on a wistful note ". . . and, Lord, please send Herman some good guards and tackles."

THE END

"When they all started getting their own television sets I had to do something to keep them from staying home"

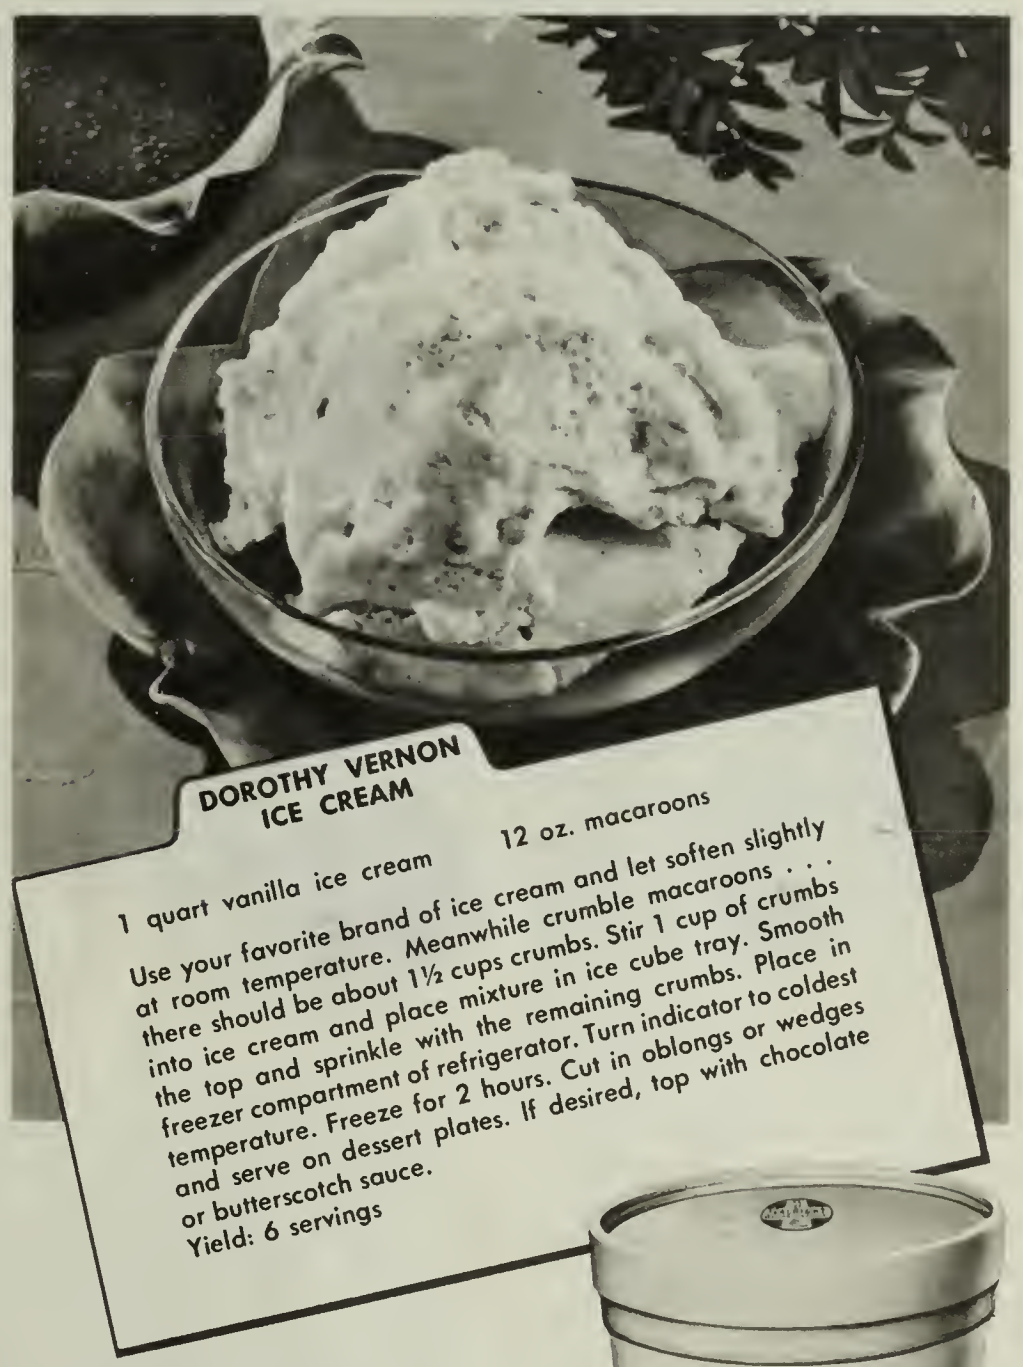
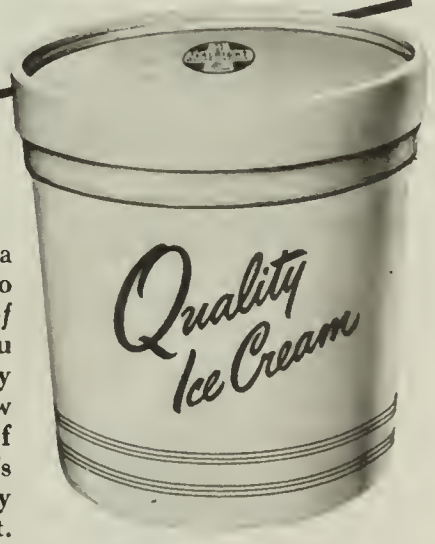
HOW TO MAKE



Dorothy Vernon Ice Cream

as served at the famous



CHALFONTE-HADDON HALL,
Atlantic City, N. J.

One of the world's most famous resorts, on the Atlantic ocean, where the warm Gulf Stream tempers the climate, and the deep sea fishing is unexcelled. Known as one of the world's grand hotels, Chalfonte-Haddon Hall is equally famous for good food. Try their specialty dessert, Dorothy Vernon Ice Cream. And here's how you can make it at home.

1 quart vanilla ice cream
12 oz. macaroons

Use your favorite brand of ice cream and let soften slightly at room temperature. Meanwhile crumble macaroons . . . there should be about 1½ cups crumbs. Stir 1 cup of crumbs into ice cream and place mixture in ice cube tray. Smooth the top and sprinkle with the remaining crumbs. Place in freezer compartment of refrigerator. Turn indicator to coldest temperature. Freeze for 2 hours. Cut in oblongs or wedges and serve on dessert plates. If desired, top with chocolate or butterscotch sauce.
Yield: 6 servings

Make this luscious dessert today. It's a dish to delight your family. So easy to make, with your *own favorite brand of quality ice cream* . . . the kind you usually find packaged in the sanitary Sealright container. Ask for the new recipe folder, "Favorite Desserts of Famous Resorts" at your fountain. It's prepared especially for home use by Mabel Stegner, noted home economist.

We use SEALRIGHT SANITARY SERVICE for Your Protection

THE ONE-EYED POACHER AND THE LONG NIGHT

Continued from page 27

Zibe moaned softly and a shudder of pain racked the sleek, rangy body. It was plain that the hound was beyond hope, and suffering needlessly.

"Hand me my rifle, Zack," said Uncle Jeff, huskily.

Zack silently obeyed. Carrying Zibe and the rifle, the old woodsman stalked across the back clearing into the cedars. Presently, those in the cabin heard a shot—a sound both grim and merciful.

"Sarah," said Zack, tonelessly, "get out the rum."

"I was a-goin' to, by my own self," said Sarah, "jest this one, dreadful time."

WHEN Jeff Coongate returned, the first jug was opened before him—and Tom Compus Mentis no longer stood in the doorway, but had drawn in a little toward the jug, his dark eyes having a look of sorrow and horizons.

Tactfully avoiding the Indian's gaze, Jeff and Zack both drank. Sarah, herself, turned a half ounce into a wine glass, and sipped. Touched by this breaking of precedent in homage to Zibe's passing, Jeff Coongate had bowed to Sarah. Then he nodded to Zack, and together they went out into the cedars with a shovel.

While they were gone, Sarah graciously bethought herself of the Indian, who stood paticntly by the jug.

"Why, Mr. Mentis! You ain't had any of the rum—after that terrible trip, an' all. Here, I'll get you a glass."

"No thanks glass," said Tom. He enfolded the jug in both palms, and tipped it upward. When the two woodsmen returned, the damage was begun—and they knew how dismally it would end.

"Honey," Zack hissed, in an aside to Sarah, "you lost your mind? Don't you know how ole Tom'll suffer? In the mornin' he'll see bugs a yard long, an' ravens perchin' on his wrists."

But morning was not yet. Nor had Tom Compus Mcntis told the story of the Hacketts, the great moose of Hedron Lake, and the wanton shooting of the far-wandering Zibe.

The Hacketts were three brothers, successful evaders of the late draft, the income tax and the obligations of gentlemen. They lived in Hedron, which, cross-forest, was twenty-four miles from Zack's cabin on Mopang—twenty-nine by canoe. One of the Hacketts ran a restaurant and bar. The other two had a farm planted to kale, which attracted deer. During the war, and currently, they killed moose and deer, put down the meat in jars, and sold it for a dollar a pint. They took the loin and hindquarters of a critter, and left the rest to rot. It was this practice which filled Uncle Jeff Coongate with fury and contempt. Although he personally scorned game laws, and the minions thereof, he despised the wasting of the fruit of the wild lands.

The one-eyed poacher and the butchering Hacketts differed in all their practices. Between Uncle Jeff and the successive game wardens who pursued him, there was a spirit of respect, as among duelists. Whenever they caught him red to the elbows, the old poacher went majestically down to jail in Mopang, where the first cell on the left was usually reserved for him. When he didn't get caught, he feasted royally with Zack Bourne, and if there were so much as a shank left over, it was dropped on the doorstep of some needy family.

But there was nothing of Robin Hood in the Hacketts of Hedron. To the Fish and Game Commissioner, they were known as the wantons of the wilderness, and he would rather have caught them even than Thomas Jefferson Coongate. Privily, the Commissioner himself would have agreed that the Hacketts' shooting of Zibe was most wanton of all. When the shooting occurred, Zibe had been deep in the sweet obsession of a fox track. As Tom Compus Mentis explained, nothing else could have lured him so far from home.

"But those Hacketts," muttered Tom, reaching for the jug, "they think maybe Zibe come to drive big moose away."

"Moose?" said the one-eyed poacher, kecning. "Do you know where they's a big one, Tom?"

The old Indian's face wrinkled like a scorched moccasin. "Big! I say big. Hacketts try to bribe me tell where he is. No tell. They got big order for moose meat—dollar pound. But they go hell."

Tom told how the Hacketts had tried to follow him to the moose's haunts, and how he had eluded them. Early that very morning, before the wind had wrinkled the lake, Tom had been playing cat and mouse with the Hacketts. He had heard a rifle shot. Half an hour later, he had cut back through the dense growth, picked up the Hacketts' trail, and found the empty cartridge from Red Hackett's .351 autoloading rifle. Near by, from the spruce blowdown where he had crawled to die, Zibe had dragged himself to Tom's side.

IT WAS night, now, and Uncle Jeff Coongate, listening to the Indian's tale, stood tall in the lamplight, as he planned revenge. The oaths slid wondrously from his lips, and his sinister mustaches gleamed white. Zack fervently echoed the oaths, while Sarah covered her ears.

"The Hacketts!" said the one-eyed poacher. "May they rot and fry, stricken in spleen and paunch."

After Sarah went to bed, they began on the second jug. Presently Zack suggested that they simply go over to Hedron in the morning and shoot the Hacketts in a bevy.

"No!" cried Sarah from the bedroom.

For years she had listened to her husband and his crony conspiring against the lives of game wardens, but had realized it was merely a form of play, or entertainment for them. But this business of the Hacketts had a serious ring that made her blood run cold. Surprisingly, it was Jeff Coongate, who, this time, eased her mind.

"Sarah's right, Zack," said Jeff. "'Course, I can see where it'd be pleasant to kill them Hacketts—angle shots, we could take on 'em. Clip off a little flesh to a time, till they was whittled to the bone. But I don't like to spend my whole life in jail—jest winters. Spring, I like to get out and spear a few salmon before fishin' season opens. *But*—"

It was not so much Jeff's voice, as his posture that underscored the word. Zack saw the baleful scheme-light flaring in his comrade's eyes. He sat back, waiting for Jeff to unfold, while Tom Compus Mentis took a pull from the jug.

"What d'you aim to do to them Hacketts?" Zack asked, finally.

"I aim to kill their moose—that big one Tom tells about. I aim to kill it right in their face an' eyes."

So far, the idea was a mere glimmering; but, inspired by the rising mists of rum and glory, the avengers leaped lightly over hazards.

"He'll dress out around six hundred," estimated Zack.

"Eight hundred, easy," corrected Jeff.

In the light of the many lamps which had seemed to multiply in the cabin kitchen, the moose finally tipped the scales at a thousand pounds, clear meat.

"It's too much," said Zack, sadly hefting the jug. "Some of it'll spoil, sure."

The one-eyed poacher gazed loftily at his less imaginative crony.

"Too much? Spoil? Are you thinkin', like always, jest of your own self, Zack? Ain't there other folks goin' hungry, same as me an' you? Give, seth the Lord. Blessid is the pore."

Heads together, huge hands clasped in the emotion of selfless giving, they outlined a vast program of philanthropy, while Sarah listened in terror and the old Indian's hand strayed more and more helplessly toward the jug.

"We shall feed the entire brood of Jumbo Tethergood."

"An' the pore li'l orphans of Rip an Julie Skillinger."

"With the Hacketts' moose, we shal pervide for the fam'lies of Mopang."

"An' Boomchain Junction, an' Nev York, an'—"

The one-eyed poacher was about t include starving Europe, but further ex pansion was checked by the thick, uncer tain voice of Tom Compus Mentis.

"Game warden," said Tom. "Ne man. Comin' Hedron—tomorrow."

At the time, a new game warden, zea ous though he might be, seemed like le of an obstacle than an added attractio

"Good," said the old outlaw of Mo pang. "Perfick. Spice things up a mite

But in the morning, the new gam warden loomed large, especially in th eyes of Sarah. She had read in the gam laws that the penalty for killing a moo was five hundred dollars fine and s months in jail.

"Almost like for murder," she wep "Don't you go, Zack. I beg you. O Zack—please."

SINCE his marriage late in life to Sara Zack had been emotionally tor Subtly influenced by Jeff to maintain t old, wild ways of the devil and the den john, he was as subtly swayed by Sarah prayers for his reform. Now, acut miserable, he looked from one to t other. But this time, it was the one-ey poacher who was moved by Sara pleading. Moreover, as Uncle Jeff vored the drama of the situation, he s opportunities dear to his actor's hea Head bowed, he stood in the doorw

"Zack—Sarah's right. You can't This mission is for a single man, with dependints, no one to mourn for hin

"Dang it, Jeff! You always took r We always done things—"

Jeff raised his hand in a gesture tragic sacrifice. "No. Zibe was min

So genuine was Jeff's grief for Zi that he no longer felt himself playin role. Reality threw him off for a m ment, and he gulped, and said, "Zac you got any 45-70 ca'tridges? I—I u my last one—out in the cedars—yest'd

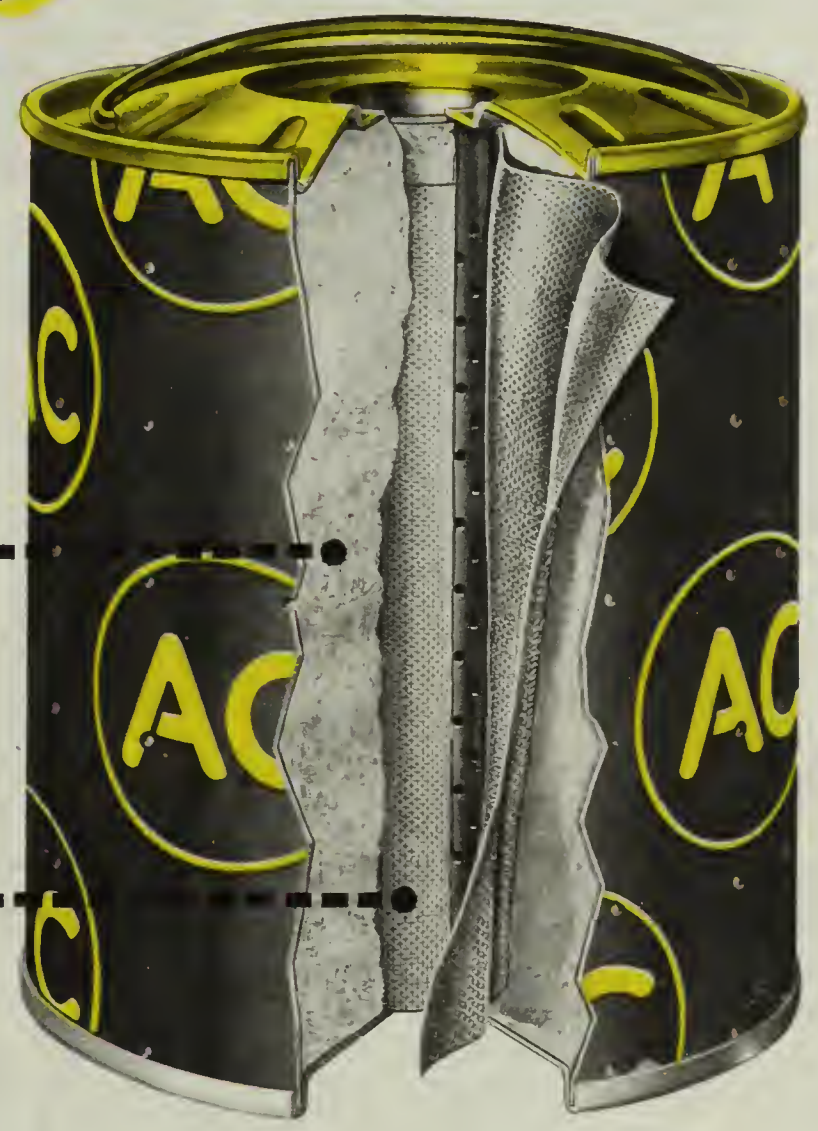
"No, but take my rifle, Jeff. You go o let me help that much."

"No," said Uncle Jeff, adding the m ter's stroke to Zack's torment, "'caus that new game warden gets me, he'll c fiscate the rifle. I couldn't bear to h that happen. Don't want to have my p sonal affairs hurt you, in no way wh ever. No, Zack, I can't take you with It's so big, I got to play a lone hand."

The crestfallen Zack slumped int chair, forlorn among the break dishes. He resembled a boy pluc from the very entrance to a circus.

By the lake shore, in the sand, Tom Compus Mentis drew a map of Hed Lake, showing a hidden inlet, an n known deadwater, and the great moo range. As he noticed the wavering l of the sand map, the one-eyed poach heart ached for the suffering Indian.

"Tom, your hand's a-twitchin' li chicken's foot in the mud."



"You got little bit rum left?" be ed Tom, abjectly. "Me bad sick."

"No, Tom. We killed her all. Yo go straight home in your canoe. I g to go down to Privilege to buy ca'tri es. I'll be to your shack tonight. I'll b you a dite of rum, but that's all. listen: Don't you tech a drop in He on —not till I get to you. Mind that, To"

The Indian slid away in his canoe nd Uncle Jeff Coongate saw despair i his wake. "Poor ole Tom," he mutt d, and strode forth on the Privilege already longing for Zack's compa on ship, his pleasure at Zack's frustr on diminishing as he realized to the ful at he had trapped himself into a consi ra-

FILTERS TWICE

FIRST FILTRATION IS THROUGH RAM-PACKED FILTERING MATERIAL

SECOND FILTRATION IS THROUGH THE GLASS CLOTH COLLECTOR TUBE TRAP

AC's Glass Cloth Collector Tube Trap Filters Engine Oil a Second Time

Only AC "Five-Star Quality" Oil Filters and Elements give you double filtration . . . first, through the ram-packed filtering material . . . second, through fine-mesh glass cloth, which forms the Collector Tube Trap. Being acidproof and corrosionproof, glass cloth can't rot to pollute the oil stream.

You'll want these and the many other AC "Five-Star Quality" advantages for your engine. There's an AC "Five-Star Quality" Oil Filter for nearly every make of engine . . . and an AC Replacement Element for almost every make of oil filter. Buy where you see the AC Service Sign.

Buy an AC "Five-Star Quality" Oil Filter and get these additional advantages:

- POSITIVE END SEALS
- EXTRA STURDY BAIL
- MACHINED GASKET SEAT
- HIGH OUTLET RESTRICTOR POSITION
- OUTSIDE-IN FLOW
- RAM-PACKED FILTERING MATERIAL
- EXTRA HEAVY METAL CASE
- EXTRA LARGE HEX DRAIN PLUG

ble adventure, what with a moose, three murderous Hacketts, and—what was that other? Oh, yes! A new warden!

In the afternoon, as he left Privilege and struck through the forest for Hedron Lake, it began to rain. He forgot the new game warden in his lonely longing for Zibe, and for Zack, and his heart steeled to his task. His tireless stride brought him to Tom Compus Mentis' shack before midnight. But the Indian was not there—and his stove was cold!

"Tom," he muttered, "the demons was too much for you. I got to find you."

DRENCHED to the skin, Uncle Jeff turned back toward the hamlet of Hedron, scorning the road, crosscutting through the woods. He came out on the road two miles from the town, and as he stood for a moment, the headlights of a car approached. The car drew up to him, and stopped. The door swung open and a pleasant voice hailed him.

"Howdy, stranger. Want a lift?"

Although bone-weary from the miles he had covered, the old woodsman replied with prideful reluctance, "I don't want to put no man out."

"Get in. It's raining."

Not till he had seated himself did the one-eyed poacher take full cognizance of his benefactor. But then the identity of the fellow was plain—the badge, the service cap, the uniform of forest green.

"Jest a moment, son," said Uncle Jeff, with magnificent aloofness. "Let me out. I never ride with game wardens."

The young warden smiled. His name was Steve Ireland. He was a graduate of Anzio beachhead, the State Wildlife Training School, and a boyhood spent in Hedron, where a certain old Indian had taught him to love the woods, pound ash withes for baskets, and showed him where an otter family played. Tonight, on his first solo assignment as game warden in the Hedron district, Steve Ireland had met and befriended that same old Indian. To meet the celebrated one-eyed poacher on the same night was to Steve like hitting the jackpot.

Steve Ireland had never seen Uncle Jeff. But the old poacher's features, physique and personality were unmistakable. The sweeping mustaches shone wet, the huge right hand held a Winchester between the peaked knees, and from the high-boned, imperious face, the one eye glowed like a blowtorch.
